(2) has any known financial interest in any person who (A) applies for or receives any permit or lease under, or (B) is otherwise subject to, the provisions of this Act or the Outer Continental Shelf Lands Act, shall, beginning on February 1, 1978, annually file with the Secretary of the Interior a written statement concerning all such interests held by such officer or employee during the preceding calendar year. Such statement shall be available to the public.

(b) The Secretary of the Interior shall—

(1) within ninety days after the date of enactment of this Act—

(A) define the term "known financial interest" for purposes of subsection (a) of this section; and

(B) establish the methods by which the requirement to file written statements specified in subsection (a) of this section will be monitored and enforced, including appropriate provisions for the filing by such officers and employees of such statements and the review by the Secretary of such statements; and

(2) report to the Congress on June 1 of each calendar year with respect to such disclosures and the actions taken in regard thereto during the preceding calendar year.

(c) In the rules prescribed in subsection (b) of this section, the Secretary may identify specific positions within the Department of the Interior which are of a nonregulatory or nonpolicymaking nature and provide that officers or employees occupying such positions shall be exempt from the requirements of this section.

(d) Any officer or employee who is subject to, and knowingly violates, this section shall be fined not more than $2,500 or imprisoned not more than one year, or both.

INVESTIGATION OF AVAILABILITY OF OIL AND NATURAL GAS FROM THE OUTER CONTINENTAL SHELF

SEC. 506. (a) The Congress hereby finds that—

(1) there is a serious lack of adequate basic energy information available to the Congress and the Secretary of the Interior with respect to the availability of oil and natural gas from the Outer Continental Shelf;

(2) there is currently an urgent need for such information;

(3) the existing collection of information by Federal departments and agencies relevant to the determination of the availability of such oil and natural gas is uncoordinated, is jurisdictionally limited in scope, and relies too heavily on unverified information from industry sources;

(4) adequate, reliable, and comprehensive information with respect to the availability of such oil and natural gas is essential to the national security of the United States; and

(5) this lack of adequate reserve data requires a reexamination of past data as well as the acquisition of adequate current data.

(b) The purpose of this section is to enable the Secretary of the Interior and the Congress to gain the best possible knowledge of the status of Outer Continental Shelf oil and natural gas reserves, resources, productive capacity, and production available to meet current and future energy supply emergencies, to gain accurate knowledge of the potential quantity of oil and natural gas resources which could be made available to meet such emergencies, and to aid in establishing energy pricing and conservation policies.

(c) The Secretary of the Interior shall conduct a continuing investigation, based on data and information which he determines has been adequately and independently audited and verified, for the purpose of determining the availability of all oil and natural gas produced or located on the Outer Continental Shelf.

(d) The investigation conducted pursuant to this section shall include, among other items—

(1) (A) a determination of the maximum attainable rate of production (MAR) of crude oil and natural gas from significant fields on the Outer Continental Shelf; and

(B) an analysis of whether the actual production has been less than the MAR and, if so, the reasons for the differences.

(C) For purposes of this subsection, the term "maximum attainable rate of production" or "MAR" means the maximum rate of production of crude oil and natural gas which may be produced under actual operating conditions without loss of ultimate recovery of crude oil and natural gas.

(2) an estimate of the total discovered crude oil and natural gas reserves by fields (including proved and indicated reserves) and undiscovered crude oil and natural gas resources (including hypothetical and speculative resources) of the Outer Continental Shelf;

(3) the relationship of any and all such information to the requirements of conservation, industry, commerce, and the national defense;

(4) an independent evaluation of trade association procedures for estimating Outer Continental Shelf reserves, ultimate recovery, and productive capacity for years in which trade associations made such estimates. In order to provide maximum opportunity for evaluation and continuity, the Secretary shall obtain all the available data and other records, including a description of the methodology and estimating procedures, which the trade associations used in compiling their data with respect to the reserves.

(e) The Secretary shall, not later than one year after the date of enactment of this section, submit an initial report to Congress. The initial report shall include cost estimates for the separate components of the continuing investigation and a time schedule for meeting all of its specifications. The schedule shall provide for producing all the information required in subsections (d)(1)(A), (d)(2), and (d)(3) of this section on the day following the first complete calendar year after enactment, and every two years thereafter. The Secretary shall make separate reports on the data acquired pursuant to subsection (d)(4) of this section as follows:

(1) a report within six months after the date of enactment of this section, on the acquisition and details of trade association data and information;

(2) within twelve months after submission of the report required by subsection (e)(1) above, an evaluation of the trade association materials; and

(3) within twelve months after submission of the report required by clause 2 of this subsection, the relationship between trade association data and the new data collected under this section.

(f) The Secretary of the Interior shall consult with the Federal Trade Commission regarding categories of information acquired pursuant to this section. Notwithstanding any other provision of law, the Secretary of the Interior shall, upon request of the Federal Trade Commission, make available to such Commission any information acquired under this section.

(g) For purposes of this section, the term "Outer Continental Shelf" has the meaning given such term in section 2(a) of the Outer Continental Shelf Lands Act.

STATE MANAGEMENT PROGRAM

SEC. 507. Section 307(c)(3)(B)(ii) of the Coastal Zone Management Act of 1972 (16 U.S.C. 1456(c)(3)(B)(ii)) is amended to read as follows:

"(ii) concurrence by such state with such certification is conclusively presumed as provided for in subparagraph (A), except that the time period after which such concurrence shall be presumed shall be three months; or".

RULE AND REGULATION REVIEW

SEC. 508. (a) Any rule or regulation prescribed pursuant to this Act or the Outer Continental Shelf Lands Act, as amended by this Act, by the head of any Federal department or agency may by resolution of either House of Congress be disapproved, in whole or in part if such resolution of disapproval is adopted not later than the end of the first period of 60 calendar days when Congress is in session (whether or not continuous) which period begins on the date such rule or regulation is finally adopted by the head of such department or agency. The head of any Federal department or agency who prescribes such a rule or regulation shall transmit such rule or regulation to each House of Congress immediately upon its final adoption. Upon adoption of such a resolution of disapproval by either House of Congress within such 60-day period, such rule or regulation, or part thereof, as the case may be, shall cease to be in effect.

(b) Congressional inaction on or rejection of a resolution of disapproval of a rule or regulation promulgated under this Act or the Outer Continental Shelf Lands Act, as amended by this Act, shall not be deemed an expression of approval of such rule or regulation.

(c) The provisions of this section shall not apply to any finding or action by the Secretary of the Interior pursuant to section 8(a)(5)(C)(ii) or 8(b)(4) of the Outer Continental Shelf Lands Act, as amended by this Act.

RECOMMENDATIONS FOR TRAINING PROGRAM

SEC. 509. Not later than 90 days after the date of enactment of this Act, the Secretary of the Interior, in consultation with the Secretary of the Department in which the Coast Guard is operating, shall prepare and submit to the Congress a report which sets forth the recommendations of the Secretary for a program to assure that any individual—

(1) who is employed on any artificial island, installation, or other device located on the Outer Continental Shelf; and

(2) who, as part of such employment, operates, or supervises the operation of pollution-prevention equipment, is properly trained to operate, or supervise the operation of such equipment, as the case may be.

RELATIONSHIP TO EXISTING LAW

SEC. 510. (a) Except as otherwise expressly provided in this Act, nothing in this Act shall be construed to amend, modify, or repeal any provision of the Coastal Zone Management Act of 1972, the National Environmental Policy Act of 1969, the Mining and Mineral Policy Act of 1970, or any other Act.

(b) Nothing in this Act or any amendment made by this Act to the Outer Continental Shelf Lands Act (43 U.S.C. 1331, et seq.) or any other Act shall be construed to affect or modify the provisions of the Department of Energy Organization Act (42 U.S.C. 7101 et seq.) which provide for the transferring and vesting of functions to and in the Secretary of Energy or any component of the Department of Energy.

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar House bill (H.R. 1614) was laid on the table.

AUTHORIZING THE CLERK TO MAKE CERTAIN CORRECTIONS IN ENGROSSMENT OF AMENDMENTS TO S. 9

Mr. MURPHY of New York. Mr. Speaker, I ask unanimous consent that in the engrossment of the House amendments to the Senate bill S. 9, the Clerk be authorized to correct section numbers, punctuation, and cross references to reflect the actions of the House in amending the Senate bill S. 9.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

GENERAL LEAVE

Mr. MURPHY of New York. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on H.R. 1614, the bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

LEGISLATIVE PROGRAM

(Mr. MICHEL asked and was given permission to address the House for 1 minute.)

Mr. MICHEL. Mr. Speaker, I take this time to inquire of the distinguished minority whip as to what the program for next week will be.

Mr. BRADEMAS. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I am happy to yield to the gentleman from Indiana.

Mr. BRADEMAS. Mr. Speaker, the program for the House of Representatives for the week of February 6, 1978, is as follows:

On Monday the House meets at noon. We will have the Consent Calendar and there will be two bills considered under suspension. Votes on suspensions will be postponed until the end of consideration of suspensions on that day.

The first bill is S. 2076, Grand Canyon School District. The second is H.R. 9434, medicaid increases in Puerto Rico, Guam, and Virgin Islands.

Then we will consider H.R. 6362, to establish an Advisory Committee on Timber Sales Procedure, open rule, 1 hour.

Next, H.R. 2664, Sioux Indian claims, open rule, 1 hour.

Then H.R. 8336, Chattahooche River National Park (adopt the rule only).

On Tuesday, the House meets at noon. We will have the Private Calendar and consider one bill under suspension, which is H.R. 7843, additional Federal judges, followed by H.R. 6805, the Consumer Protection Act of 1977 (H.R. 9718, Consumer Representation and Reorganization Act), open rule, 1 hour.

With respect to Wednesday and Thursday, the House meets at 3 p.m. on Wednesday and at 11 a.m. on Thursday to consider the following bills: H.R. 3813, Redwood National Park, subject to a rule being granted; H.R. 2637, cargo capacity for civil aircraft, open rule, 1 hour; H.R. 5503, Defense Officer Personnel Management Act, open rule, 1 hour; and H.R. 8336, Chattahooche River National Park, general debate and votes.

The House will adjourn by 5:30 p.m. on all days except Wednesdays. There will be no Friday sessions.

The House will adjourn for the Lincoln Day work period from the close of business on Thursday, February 9, 1978, until 12 noon on Tuesday, February 14, 1978.

Conference reports may be brought up at any time, and any further program will be announced later.

Mr. Speaker, I thank my colleague, the gentleman from Illinois.

Mr. MICHEL. Mr. Speaker, may I ask one question with respect to the supplemental appropriation bill and especially with respect to the amendment in disagreement on the B–1 bomber.

Are there any plans at present to bring that measure up next week?

Mr. BRADEMAS. I know of no plan for bringing that bill up on a day certain, but that would be a matter for the chairman of the committee and the Speaker of the House.

Mr. MICHEL. Would we be given at least 1 day's notice on that or would it be programed 24 hours in advance?

Mr. BRADEMAS. That would be up to the chairman of the committee and the Speaker of the House.

Mr. MICHEL. Yes. Then I would expect that, considering how troublesome an issue that is or how tight an issue that is, we would have ample notice because Members would want to come back. As I understand it, when it was pulled, there were some Members absent who wanted to be recorded one way or the other, and I hope that we would afford those Members that courtesy.

Mr. BRADEMAS. I appreciate the observation of the gentleman from Illinois.

Mr. MICHEL. I hope that the gentleman will take it in good spirit.

Mr. DORNAN. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from California.

Mr. DORNAN. Mr. Speaker, I wonder if I could ask the gentleman from Indiana (Mr. BRADEMAS) a question? We have an unusual situation in this body where we are still talking about 1977 dollars. We are now in the fifth month of this fiscal year. There are 7,300 workers in my district who work on the B–1 project. They would like to know what in holy heaven's name is going on. When are we going to get a vote on the B–1 so that the GAO can get around to suing the

President of the United States to spend that money?

Mr. BRADEMAS. Mr. Speaker, I am always grateful for the observations of the gentleman from California (Mr. DORNAN).

Mr. DORNAN. Does the gentleman have any idea when it will be taken up?

Mr. BRADEMAS. I have nothing to add to what I said in response to the inquiries of the gentleman from Illinois (Mr. MICHEL).

Mr. MICHEL. I thank the distinguished majority whip and I yield back the balance of my time.

DISPENSING WITH BUSINESS IN ORDER UNDER THE CALENDAR WEDNESDAY RULE ON WEDNESDAY NEXT

Mr. BRADEMAS. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday Rule may be dispensed with on Wednesday next.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

ADJOURNMENT TO MONDAY, FEBRUARY 6, 1978

Mr. BRADEMAS. Mr. Speaker, I ask unanimous consent that when the House adjourns today, it adjourn to meet on Monday next.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

BLACK LUNG BENEFITS REFORM ACT OF 1977

Mr. ANDREWS of North Carolina (on behalf of Mr. PERKINS) filed the following conference report and statement on the bill (H.R. 4544) to amend the Federal Coal Mine Health and Safety Act to improve the black lung benefits program established under such act, and for other purposes.

CONFERENCE REPORT (H. REPT. No. 95-864)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 4544) to amend the Federal Coal Mine Health and Safety Act to improve the black lung benefits program established under such Act, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by Senate amendment insert the following:

SHORT TITLE

SECTION 1. This Act may be cited as the "Black Lung Benefits Reform Act of 1977".

DEFINITIONS

SEC. 2. (a) Section 402(b) of the Federal Mine Safety and Health Act of 1977 (hereinafter in this Act referred to as the "Act") is amended to read as follows:

"(b) The term 'pneumoconiosis' means a chronic dust disease of the lung and its sequelae, including respiratory and pulmonary impairments, arising out of coal mine employment.".

(b) Section 402(d) of the Act is amended to read as follows:

"(d) The term 'miner' means any individual who works or has worked in or around a coal mine or coal preparation facility in the extraction or preparation of coal. Such term also includes an individual who works or has worked in coal mine construction or transportation in or around a coal mine, to the extent such individual was exposed to coal dust as a result of such employment.".

(c) Section 402(f) of the Act is amended to read as follows:

"(f)(1) The term 'total disability' has the meaning given it by regulations of the Secretary of Health, Education, and Welfare for claims under part B of this title, and by regulations of the Secretary of Labor for claims under part C of this title, subject to the relevant provisions of subsections (b) and (d) of section 413, except that—

"(A) in the case of a living miner, such regulations shall provide that a miner shall be considered totally disabled when pneumoconiosis prevents him or her from engaging in gainful employment requiring the skills and abilities comparable to those of any employment in a mine or mines in which he or she previously engaged with some regularity and over a substantial period of time;

"(B) such regulations shall provide that (i) a deceased miner's employment in a mine at the time of death shall not be used as conclusive evidence that the miner was not totally disabled; and (ii) in the case of a living miner, if there are changed circumstances of employment indicative of reduced ability to perform his or her usual coal mine work, such miner's employment in a mine shall not be used as conclusive evidence that the miner is not totally disabled;

"(C) such regulations shall not provide more restrictive criteria than those applicable under section 223(d) of the Social Security Act; and

"(D) the Secretary of Labor, in consultation with the Director of the National Institute for Occupational Safety and Health, shall establish criteria for all appropriate medical tests under this subsection which accurately reflect total disability in coal miners as defined in subparagraph (A).

"(2) Criteria applied by the Secretary of Labor in the case of—

"(A) any claim which is subject to review by the Secretary of Health, Education, and Welfare, or subject to a determination by the Secretary of Labor, under section 435(a);

"(B) any claim which is subject to review by the Secretary of Labor under section 435(b); and

"(C) any claim filed on or before the effective date of regulations promulgated under this subsection by the Secretary of Labor;

shall not be more restrictive than the criteria applicable to a claim filed on June 30, 1973, whether or not the final disposition of any such claim occurs after the date of such promulgation of regulations by the Secretary of Labor.".

(d) Section 402 of the Act is amended by adding at the end thereof the following new subsection:

"(h) The term 'fund' means the Black Lung Disability Trust Fund established in section 3(a)(1) of the Black Lung Benefits Revenue Act of 1977.".

SURVIVOR ENTITLEMENT

SEC. 3. (a) Section 411(c) of the Act is amended—

(1) in paragraphs (1) and (2) thereof, by striking out "if" and inserting in lieu thereof "If" and by striking out the semicolon and inserting in lieu thereof a period;

(2) in paragraph (3) thereof, by striking out "if" the first place it appears therein and inserting in lieu thereof "If" and by striking out "; and" and inserting in lieu thereof a period; and

(3) by adding at the end thereof the following new paragraph:

"(5) In the case of a miner who dies on or before the date of the enactment of the Black Lung Benefits Reform Act of 1977 who was employed for 25 years or more in one or more coal mines before June 30, 1971, the eligible survivors of such miner shall be entitled to the payment of benefits, at the rate applicable under section 412(a)(2), unless it is established that at the time of his or her death such miner was not partially or totally disabled due to pneumoconiosis. Eligible survivors shall, upon request by the Secretary, furnish such evidence as is available with respect to the health of the miner at the time of his or her death.".

(b)(1)(A) Section 412(a)(3) of the Act is amended by striking out "and" the first place it appears therein, and by inserting after "the time of her death," the following: "and in the case of any child or children entitled to the payment of benefits under paragraph (5) of section 411(c),".

(B) The first sentence of section 412(a)(5) of the Act is amended—

(i) by striking out "or" the fifth place it appears therein; and

(ii) by inserting after "child, or parent," the following: "in the case of the dependent parent or parents of a miner (who is not survived at the time of his or her death by a widow or a child) who are entitled to the payment of benefits under paragraph (5) of section 411(c), or in the case of the dependent surviving brother(s) or sister(s) of a miner (who is not survived at the time of his or her death by a widow, child, or parent) who are entitled to the payment of benefits under paragraph (5) of section 411(c).".

(2) Section 411(e) of the Act is amended by striking out "or" the second place it appears therein and by striking out the period at the end thereof and inserting in lieu thereof the following: ", or (3) any such individual is entitled to benefits under paragraph (5) of section 411(c).".

(3) Section 421(a) of the Act is amended by inserting after "pneumoconiosis" the second place it appears therein the following: ", and in any case in which benefits based upon eligibility under paragraph (5) of section 411(c) are involved.".

(4) The first sentence of section 422(a) of the Act is amended by inserting before the period at the end thereof the following: ", or with respect to entitlements established in paragraph (5) of section 411(c)".

OFFSET LIMITATION

SEC. 4. The first sentence of section 412(b) of the Act is amended by inserting after "disability of such miner" the following: "due to pneumoconiosis".

EVIDENCE REQUIRED TO ESTABLISH CLAIM

SEC. 5. (a) Section 413(b) of the Act is amended by inserting after the second sentence thereof the following new sentences: "Where there is no medical or other relevant evidence in the case of a deceased miner, such affidavits shall be considered to be sufficient to establish that the miner was totally disabled due to pneumoconiosis or that his or her death was due to pneumoconiosis. In any case in which there is other evidence that a miner has a pulmonary or respiratory impairment, the Secretary shall accept a board certified or board eligible radiologist's interpretation of a chest roentgenogram which is of a quality sufficent to demonstrate the presense of pneumoconiosis submitted in support of a claim for benefits under this title if such roentgenogram has been taken by a radiologist or qualified technician, except where the Secretary has reason to believe that the claim has been fraudulently represented.

In order to insure that any such roentgenogram is of adequate quality to demonstrate the presence of pneumoconiosis, and in order to provide for uniform quality in the roentgenograms, the Secretary of Labor may, by regulation establish specific requirements for the techniques used to take roentgenograms of the chest. Unless the Secretary has good cause to believe that an autopsy report is not accurate, or that the condition of the miner is being fraudulently misrepresented, the Secretary shall accept such autopsy report concerning the presence of pneumoconiosis and the stage of advancement of pneumoconiosis.".

(b) Section 413(b) of the Act, as amended in subsection (a), is further amended by adding at the end thereof the following new sentence: "Each miner who files a claim for benefits under this title shall upon request be provided an opportunity to substantiate his or her claim by means of a complete pulmonary evaluation.".

(c) The fifth sentence of section 413(b) of the Act is amended by striking out "(f)," and by striking out "and (1)," and inserting in lieu thereof "(1), and (n),".

(d) Section 413 of the Act is amended by adding at the end thereof the following new subsection:

"(d) No miner who is engaged in coal mine employment shall (except as provided in section 411(c)(3)) be entitled to any benefits under this part while so employed. Any miner who has been determined to be eligible for benefits pursuant to a claim filed while such miner was engaged in coal mine employment shall be entitled to such benefits if his or her employment terminates within one year after the date such determination becomes final.".

APPROVAL OF STATE WORKERS' COMPENSATION LAWS

SEC. 6. (a) Section 421(b)(2)(A) of the Act is amended by inserting before the semicolon the following: ", except that (i) such law shall not be required to provide such benefits where the miner's last employment in a coal mine terminated before the Secretary's approval of the State law pursuant to this section; and (ii) each operator of a coal mine shall secure the payment of benefits pursuant to section 423 with respect to any miner whose last employment in a coal mine terminated before the Secretary's approval of the State law pursuant to this section".

(b) Section 421(b)(2)(C) of the Act is amended by striking out "part B of this title" and inserting in lieu thereof "this part", by striking out "of Health, Education, and Welfare", and by striking out "thereunder" and inserting in lieu thereof "under this part".

(c) Section 421(b)(2)(D) of the Act is amended to read as follows:

"(D) any claim for benefits on account of total disability of a miner due to pneumoconiosis is deemed to be timely filed if such claim is filed within three years after a medical determination of total disability due to pneumoconiosis;".

DETERMINATION OF CLAIMS FOR BENEFITS UNDER PART C OF TITLE IV OF THE ACT

SEC. 7. (a) The first sentence of section 422(a) of the Act is amended—

(1) by inserting after "as amended" the following: ", and as it may be amended from time to time";

(2) by inserting a comma after "and 51 thereof)"; and

(3) by striking out "and except as the Secretary shall by regulation otherwise provide" and inserting in lieu thereof "or by regulations of the Secretary and except that references in such Act to the employer shall be considered to refer to the trustees of the fund, as the Secretary considers appropriate and as is consistent with the provisions of section 424".

(b) Section 422(b) of the Act is amended by adding at the end thereof the following new sentence: "An employer, other than an operator of a coal mine, shall not be required to secure the payment of such benefits with respect to any employee of such employer to the extent such employee is engaged in the transportation of coal or in coal mine construction. Upon determination by the Secretary of the eligibility of the employee, the Secretary may require such employer to secure a bond or otherwise guarantee the payment of such benefits to the employee.".

(c) Section 422(c) of the Act is amended—

(1) by striking out "and the Secretary of Health, Education, and Welfare"; and

(2) by striking out "the period" and inserting in lieu thereof "a period after December 31, 1969,".

(d) Section 422(e) of the Act is amended by inserting "or" at the end of paragraph (1) thereof, by striking out ", or" at the end of paragraph (2) thereof and inserting in lieu thereof a period, and by striking out paragraph (3) thereof.

(e) Section 422(f) of the Act is amended to read as follows:

"(f) Any claim for benefits by a miner under this section shall be filed within three years after whichever of the following occurs later—

"(1) a medical determination of total disability due to pneumoconiosis; or

"(2) the date of the enactment of the Black Lung Benefits Reform Act of 1977.".

(f) Section 422(h) of the Act is amended by striking out the first sentence thereof.

(g) Section 422(i) of the Act is amended to read as follows:

"(i)(1) During any period in which this section is applicable to the operator of a coal mine who on or after January 1, 1970, acquired such mine or substantially all the assets thereof, from a person (hereinafter in this subsection referred to as a 'prior operator') who was an operator of such mine, or owner of such assets on or after January 1, 1970, such operator shall be liable for and shall, in accordance with section 423, secure the payment of all benefits which would have been payable by the prior operator under this section with respect to miners previously employed by such prior operator as if the acquisition had not occurred and the prior operator had continued to be an operator of a coal mine.

"(2) Nothing in this subsection shall relieve any prior operator of any liability under this section.

"(3)(A) For purposes of paragraph (1) of this subsection, the provisions of this paragraph shall apply to corporate reorganizations, liquidations, and such other transactions as are specified in this paragraph.

"(B) If an operator ceases to exist by reason of a reorganization or other transaction or series of transactions which involves a change in identity, form, or place of business or organization, however affected, the successor operator or other corporate or business entity resulting from such reorganization or other change shall be treated as the operator to whom this section applies.

"(C) If an operator ceases to exist by reason of a liquidation into a parent or successor corporation, the parent or successor corporation shall be treated as the operator to whom this section applies.

"(D) If an operator ceases to exist by reason of a sale of substantially all his or her assets, or as the result of a merger, consolidation, or division, the successor operator, corporation, or other business entity shall be treated as the operator to whom this section applies.

"(4) In any case in which there is a determination under section 424 that no operator is liable for the payment of benefits to a claimant, nothing in this subsection may be construed to require the payment of benefits to a claimant by or on behalf of any operator.".

(h) Section 422 of the Act is amended by adding at the end thereof the following new subsections:

"(j) Notwithstanding the provisions of this section, section 424 shall govern the payment of benefits in cases—

"(1) described in section 424(a)(1); or

"(2) in which the miner's last coal mine employment was before January 1, 1970.

"(k) The Secretary shall be a party in any proceeding relative to a claim for benefits under this part.

"(l) In no case shall the eligible survivors of a miner who was determined to be eligible to receive benefits under this title at the time of his or her death be required to file a new claim for benefits, or refile or otherwise revalidate the claim of such miner.".

(i) Notwithstanding the provisions of section 422(a) of the Act, individuals appointed to hear and determine claims for benefits under part C of title IV of the Act and under section 415 of the Act pursuant to Public Law 94-504 (90 Stat. 2428) may continue to adjudicate such claims during the one-year period following the date of the enactment of this Act.

PENALTIES FOR FAILURE TO SECURE PAYMENT OF BENEFITS

SEC. 8. Section 423 of the Act is amended by adding at the end thereof the following new subsection:

"(d)(1) Any employer required to secure the payment of benefits under this section who fails to secure such benefits shall be subject to a civil penalty assessed by the Secretary of not more than $1,000 for each day during which such failure occurs. In any case where such employer is a corporation, the president, secretary, and treasurer thereof also shall be severally liable to such civil penalty as provided in this subsection for the failure of such corporation to secure the payment of benefits. Such president, secretary, and treasurer shall be severally personally liable, jointly with such corporation, for any benefit which may accrue under this title in respect to any disability which may occur to any employee of such corporation while it shall so fail to secure the payment of benefits as required by this section.

"(2) Any employer of a miner who knowingly transfers, sells, encumbers, assigns, or in any manner disposes of, conceals, secretes, or destroys any property belonging to such employer, after any miner employed by such employer has filed a claim under this title, and with intent to avoid the payment of benefits under this title to such miner or his or her dependents, shall be guilty of a misdemeanor and, upon conviction thereof, shall be punished by a fine of not more than $1,000, or by imprisonment for not more than one year, or both. In any case where such employer is a corporation, the president, secretary, and treasurer thereof also shall be severally liable for such penalty of imprisonment as well as jointly liable with such corporation for such fine.

"(3) This subsection shall not affect any other liability of the employer under this part.".

CLINICAL FACILITIES

SEC. 9. The first sentence of section 427(c) of the Act is amended by striking out "of the fiscal years ending June 30, 1973, June 30, 1974, and June 30, 1975" and inserting in lieu thereof "fiscal year".

APPLICABILITY OF AMENDMENTS

SEC. 10. Section 430 of the Act is amended—

(1) by inserting "and by the Black Lung Benefits Reform Act of 1977" after "1972"; and

(2) by striking out the colon and all that follows it and inserting in lieu thereof a period.

MEDICAL CARE

SEC. 11. The Secretary of Health, Education, and Welfare shall notify each miner receiving benefits under part B of title IV of the Act on account of his or her total disability who such Secretary has reason to believe became eligible for medical services and supplies on January 1, 1974, of his or her possible eligibility for such benefits. Where such Secretary so notifies a miner, the period during which he or she may file a claim for medical services and supplies under part C of title IV of the Act shall not terminate before six months after such notification is made.

PENALTIES FOR FALSE STATEMENTS AND FAILURES TO FILE REPORTS

SEC. 12. (a) Section 431 of the Act is amended to read as follows:

"SEC. 431. Any person who willfully makes any false or misleading statement or representation for the purpose of obtaining any benefit or payment under this title shall be guilty of a misdemeanor and on conviction thereof shall be punished by a fine of not more than $1,000, or by imprisonment for not more than one year, or both.".

(b) Part C of title IV of the Act is amended by adding at the end thereof the following new section:

"SEC. 432. (a) The Secretary may by regulation require employers to file reports concerning miners who may be or are entitled to benefits under this part, including the date of commencement and cessation of benefits and the amount of such benefits. Any such report shall not be evidence of any fact stated therein in any proceeding relating to death or total disability due to pneumoconiosis of any miner to which such report relates.

"(b) Any employer who fails or refuses to file any report required of such employer under this section shall be subject to a civil penalty of not more than $500 for each such failure or refusal.".

INSURANCE FUND

SEC. 13. Part C of title IV of the Act, as amended by section 12(b), is further amended by adding at the end thereof the following new section:

"SEC. 433. (a) The Secretary is authorized to establish and carry out a black lung insurance program which will enable operators of coal mines to purchase insurance covering their obligations under section 422.

"(b) The Secretary may exercise his or her authority under this section only if, and to the extent that, insurance coverage is not otherwise available, at reasonable cost, to operators or coal mines.

"(c)(1) The Secretary may enter into agreements with operators of coal mines who may be liable for the payment of benefits under section 422, under which the Black Lung Compensation Insurance Fund established under subsection (a) (hereinafter in this section referred to as the 'insurance fund') shall assume all or part of the liability of such operator in return for the payment of premiums to the insurance fund, and on such terms and conditions as will fully protect the financial solvency of the insurance fund. During any period in which such agreement is in effect the operator shall be deemed in compliance with the requirements of section 423 with respect to the risks covered by such agreement.

"(2) The Secretary may also enter into reinsurance agreements with one or more insurers or pools of insurers under which, in return for the payment of premiums to the insurance fund, and on such terms and conditions as will fully protect the financial solvency of the insurance fund, the insurance fund shall provide reinsurance coverage for benefits required to be paid under section 422.

"(d) The Secretary may by regulation provide for general terms and conditions of insurability as applicable to operators of coal mines or insurers eligible for insurance or reinsurance under this section, including—

"(1) the types, classes, and locations of operators or facilities which shall be eligible for such insurance or reinsurance;

"(2) the classification, limitation, and rejection of any operator or facility which may be advisable;

"(3) appropriate premiums for different classifications of operators or facilities;

"(4) appropriate loss deductibles;

"(5) experience rating; and

"(6) any other terms and conditions relating to insurance or reinsurance coverage or exclusion which may be appropriate to carry out the purposes of this section.

"(e) The Secretary may undertake and carry out such studies and investigations, and receive or exchange such information, as may be necessary to formulate a premium schedule which will enable the insurance and reinsurance authorized by this section to be provided on a basis which is (1) in accordance with accepted actuarial principles; and (2) fair and equitable.

"(f)(1) On the basis of estimates made by the Secretary in formulating a premium schedule under subsection (e), and such other information as may be available, the Secretary shall from time to time prescribe by regulation the chargeable premium rates for types and classes of insurers, operators of coal mines, and facilities for which insurance or reinsurance coverage shall be available under this section and the terms and conditions under which, and the area within which, such insurance or reinsurance shall be available and such rates shall apply.

"(2) Such premium rates shall be (A) based on a consideration of the risks involved, taking into account differences, if any, in risks based on location, type of operations, facilities, type of coal, experience, and any other matter which may be considered under accepted actuarial principles; and (B) adequate, on the basis of accepted actuarial principles, to provide reserves for anticipated losses.

"(3) All premiums received by the Secretary shall be paid into the insurance fund.

"(g)(1) The Secretary may establish in the Department of Labor a Black Lung Compensation Insurance Fund which shall be available, without fiscal year limitation—

"(A) to pay claims of miners for benefits covered by insurance or reinsurance issued under this section;

"(B) to pay the administrative expenses of carrying out the black lung compensation insurance program under this section; and

"(C) to repay to the Secretary of the Treasury such sums as may be borrowed in accordance with the authority provided in subsection (i).

"(2) The insurance fund shall be credited with—

"(A) premiums, fees, or other charges which may be collected in connection with insurance or reinsurance coverage provided under this section;

"(B) such amounts as may be advanced to the insurance fund from appropriations in order to maintain the insurance fund in an operative condition adequate to meets its liabilities; and

"(C) income which may be earned on investments of the insurance fund pursuant to paragraph (3).

"(3) If, after all outstanding current obligations of the insurance fund have been liquidated and any outstanding amounts which may have been advanced to the insurance fund from appropriations authorized under subsection (i) have been credited to the appropriation from which advanced, the Secretary determines that the moneys of the insurance fund are in excess of current needs, he or she may request the investment of such amounts as he or she deems advisable by the Secretary of the Treasury in public debt securities with maturities suitable for the needs of the insurance fund and bearing interest at prevailing market rates.

"(h) The Secretary shall report to the Congress not later than the first day of April of each year on the financial condition of the insurance fund and the results of the operations of the insurance fund during the preceding fiscal year and on its expected condition and operations during the fiscal year in which the report is made.

"(i) There are authorized to be appropriated to the insurance fund, as repayable advances, such sums as may be necessary to meet obligation incurred under subsection (g). All such sums shall remain available without fiscal year limitation. Advances made pursuant to this subsection shall be repaid, with interest, to the general fund of the Treasury when the Secretary determines that moneys are available in the insurance fund for such repayments. Interest on such advances shall be computed in the same manner as provided in subsection (b)(2) of section 3 of the Black Lung Benefits Revenue Act of 1977.".

STATEMENT OF REASONS FOR DENIAL OF CLAIMS

SEC. 14. Part C of title IV of the Act, as amended by sections 12(b) and 13, is further amended by adding at the end thereof the following new section:

"SEC. 434. Any individual whose claim for benefits under this title is denied shall receive from the Secretary a written statement of the reasons for denial of such claim, and a summary of the administrative hearing record or, upon good cause shown, a copy of any transcript thereof.".

REVIEW OF PENDING AND PREVIOUSLY DENIED CLAIMS

SEC. 15. Part C of title IV of the Act, as amended by sections 12(b), 13, and 14, is further amended by adding at the end thereof the following new section:

"SEC. 435. (a)(1) The Secretary of Health, Education, and Welfare shall promptly notify each claimant who has filed a claim for benefits under part B of this title and whose claim is either pending on the effective date of this section or has been denied on or before that effective date, that, upon the request of the claimant, the claim shall be either—

"(A) reviewed by the Secretary of Health, Education, and Welfare under paragraph (2) for a determination based on the evidence on file, taking into account the amendments made by the Black Lung Benefits Reform Act of 1977; or

"(B) referred directly by the Secretary of Health, Education, and Welfare to the Secretary of Labor for a determination under paragraph (3), with an opportunity for the claimant to present additional medical or other evidence in accordance with that paragraph, taking into account the amendments made by the Black Lung Benefits Reform Act of 1977.

"(2)(A) The Secretary of Health, Education, and Welfare shall approve forthwith each claim for which review is requested under paragraph (1)(A) if, based upon the evidence on file, the provisions of part B of this title, as amended by the Black Lung Benefits Reform Act of 1977, require such approval. The Secretary of Health, Education, and Welfare shall certify such approval to the Secretary of Labor and such approval shall be binding upon the Secretary of Labor as an initial determination of eligibility. Upon receipt of that certification, the Secretary of Labor shall immediately make or otherwise provide for the payment of the claim in accordance with this part.

"(B)(i) The Secretary of Health, Education, and Welfare shall refer to the Secretary

of Labor any claim not approved under subparagraph (A) for a determination under paragraph (3), and shall notify the claimant of that referral to the Secretary of Labor for such a determination.

"(ii) The Secretary of Health, Education, and Welfare shall notify each claimant whose claim has been approved under subparagraph (A) that, if the claimant disputes the scope or terms of the award, such dispute shall be referred to the Secretary of Labor for a determination under paragraph (3).

"(C) Upon the completion of the review of any claim by the Secretary of Health, Education, and Welfare under this paragraph, the responsibility for further action with respect to such claim shall be transferred to the Secretary of Labor. The Secretary of Labor shall consider each such claim in accordance with paragraph (3).

"(3)(A) Except as provided in this section, the Secretary of Labor shall treat each claim referred by the Secretary of Health, Education, and Welfare under paragraph (1)(B) or (2)(B) as if it were a claim filed under this part. The provisions of subsection (b) shall apply to any determination of the Secretary with respect to any such claim referred to the Secretary.

"(B) The Secretary of Health, Education, and Welfare shall promptly furnish to the Secretary of Labor all pertinent information in the possession of the Department of Health, Education, and Welfare relating to claims referred to the Secretary of Labor under this subsection.

"(4) For the purposes of any determination by the Secretary of Labor under paragraph (3), the date of the request under paragraph (1) shall be considered the date of filing of the claim.

"(b)(1) The Secretary of Labor shall review each claim which has been denied under this part (or under section 415) on or before the effective date of this subsection, and each claim which is pending under this part (or under section 415) on such effective date, taking into account the amendments made to this part by the Black Lung Benefits Reform Act of 1977. The Secretary shall approve any such claim forthwith if the provisions of this part, as so amended, require that approval, and the Secretary shall immediately make or otherwise provide for the payment of the claim in accordance with this part.

"(2)(A) The Secretary, in carrying out the review of any claim under paragraph (1) and in making any determination under subsection (a)(3), shall not require any additional medical or other evidence to be submitted if the evidence on file is sufficient for approval of the claim, taking into account the amendments made to this part by the Black Lung Benefits Reform Act of 1977.

"(B) If the evidence on file is not sufficient for approval of the claim, the Secretary shall provide an opportunity for the claimant to present additional medical or other evidence to substantiate his or her claim and shall notify each claimant of that opportunity.

"(c) Any individual whose claim is approved pursuant to this section shall be awarded benefits on a retroactive basis for a period which begins no earlier than January 1, 1974.".

SHORT TITLE FOR THE ACT

SEC. 16. Section 401 of the Act is amended by inserting "(a)" after "SEC. 401." and by adding at the end thereof the following new subsection:

"(b) This title may be cited as the 'Black Lung Benefits Act'."

OCCUPATIONAL DISEASE STUDY

SEC. 17. (a) The Secretary of Labor, in cooperation with the Director of the National Institute for Occupational Safety and Health, shall conduct a study of all occupationally related pulmonary and respiratory diseases, including the extent and severity of such diseases in the United States. Such study shall further include analyses of (1) any etiologic, symptomatologic, and pathologic factors which are similar to such factors in coal workers' pneumoconiosis and its sequelae; (2) the adequacy of current workers' compensation programs in compensating individuals with such diseases; and (3) the status and adequacy of Federal health and safety laws and regulations relating to the industries with which such diseases are associated.

(b) The study required in subsection (a) shall be completed and a report thereon submitted to the President and to the appropriate committees of the Congress no later than 18 months after the date of the enactment of this Act.

FIELD OFFICES

SEC. 18. (a) The Secretary of Labor shall establish and operate such field offices as may be necessary to assist miners and survivors of miners in the filing and processing of claims under title IV of the Act. Such field offices shall, to the extent feasible, be reasonably accessible to such miners and survivors. The Secretary, in connection with the establishment and operation of field offices, may enter into arrangements with other Federal departments and agencies, and with State agencies, for the use of existing facilities operated by such departments and agencies. Where the establishment of separate facilities is not feasible the Secretary may enter into such arrangements as he deems necessary with the heads of Federal departments, agencies, and instrumentalities and with State agencies for the use of existing facilities and personnel under their control.

(b) There are authorized to be appropriated for the purposes of subsection (a) such sums as may be necessary.

INFORMATION TO POTENTIAL BENEFICIARIES

SEC. 19. The Secretary of Health, Education, and Welfare and the Secretary of Labor shall disseminate to interested persons and groups the changes in title IV of the Act made by this Act, together with an explanation of such changes, and shall undertake, through appropriate organizations, groups, and coal mine operators, to notify individuals who are likely to have become eligible for benefits by reason of such changes. Individual assistance in preparing and processing claims shall be offered by the Secretary of Health, Education, and Welfare and the Secretary of Labor and provided to potential beneficaries.

EFFECTIVE DATES

SEC. 20. (a) The provisions of this Act shall take effect on the date of the enactment of this Act.

(b) In the event that the payment of benefits to miners and to eligible survivors of miners cannot be made from the Black Lung Disability Trust Fund established by section 3(a) of the Black Lung Benefits Revenue Act of 1977, the provisions of the Act relating to the payment of benefits to miners and to eligible survivors of miners, as in effect immediately before the date of the enactment of this Act, shall take effect, as rules and regulations of the Secretary of Labor until such provisions are revoked, amended, or revised by law. The Secretary of Labor may promulgate additional rules and regulations to carry out such provisions and shall make benefit payments to miners and to eligible survivors of miners in accordance with such provisions.

(c) In accordance with the requirements of section 5 of the Black Lung Benefits Revenue Act of 1977, it is hereby provided that such Act shall take effect in accordance with the provisions of such Act. The provisions of this subsection are hereby deemed to be in explicit satisfaction of the requirements of section 5 of such Act.

And the Senate agree to the same.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 4544) to amend the Federal Coal Mine Health and Safety Act to improve the black lung benefits program established under such Act, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The Senate amendment struck out all of the House bill after the enacting clause and inserted a substitute text.

The House recedes from its disagreement to the amendment of the Senate with an amendment which is a substitute for the House bill and the Senate amendment. The differences between the House bill, the Senate amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached by the conferees, and minor drafting and clarifying changes.

DEFINITIONS

Pneumoconiosis

The House bill did not modify the existing law defining "pneumoconiosis". The Senate amendment defined pneumoconiosis as a "chronic dust disease of the lung and its sequelae, including respiratory and pulmonary impairments, arising out of coal mine employment".

The conference substitute conforms to the Senate amendment.

Miner

The House bill did not modify the existing definition of "miner". The Senate amendment modified the definition to include all self-employed miners and specified that the term includes workers who are employed in or around a coal mine or preparation facility in the extraction, preparation, or transportation of coal, and construction workers who are exposed to coal dust in their employment.

The conference substitute conforms generally to the Senate amendment with an

amendment to clarify that transportation and construction workers are covered only to the extent they work in or around a coal mine and are exposed to coal dust. The conference substitute elsewhere provides that coal mine construction and transportation employers who are not also mine operators shall not be obligated to purchase insurance for the payment of claims under the Federal Mine Safety and Health Act of 1971. However, the conference substitute elsewhere also provides that coal mine construction and transportation employers who are not also mine operators shall be individually liable for the payment of approved claims in appropriate cases. (See section 7, which amends the Act to require such employers to secure a bond or otherwise guarantee the payment of such claims once approved.)

Total disability

The House bill did not modify the provisions of current law which authorize the Secretary of Health, and Welfare to promulgate medical standards for the determination of total disability for all claims. The House bill did, however, bind the Secretary of HEW to prescribing part C regulations no more restrictive than those in effect for claims filed on June 30, 1973 ("interim" standards). The Senate amendment authorized the Secretary of Labor to promulgate new medical standards to be applied to all part C claims and retained the standard-setting authority of the Secretary of HEW with respect to part B claims. The Senate amendment further provided that the Secretary of Labor, in consultation with NIOSH, would establish criteria for medical tests consistent with the definition of total disability.

The conference substitute conforms to the Senate amendment with the proviso that the so-called "interim" part B medical standards are to be applied to all reviewed and pending claims filed before the date the Secretary of Labor promulgate new medical standards for part C cases.

The conferees intend that the Secretary of Labor shall promulgate regulations for the determination of total disability or death due to pneumoconiosis. With respect to a claim filed or pending prior to the promulgation of such regulations, such regulations shall not provide more restrictive criteria than those applicable to a claim filed on June 30, 1973, except that in determining claims under such criteria all relevant medical evidence shall be considered in accordance with standards prescribed by the Secretary of Labor and published in the Federal Register.

The conferees also intend that all standards are to incorporate the presumptions contained in section 411(c) of the Act.

The House bill amended section 413 to provide that a claim cannot be rejected solely on the basis of current employment as a miner if (1) the miner's work location has recently been changed to a less dusty area; (2) the nature of employment has been changed to be less rigorous; or (3) the nature of employment has been changed to result in receipt of substantially less pay.

The Senate amendment modified the definition of "total disability" to provide that: (1) a deceased miner's employment in a mine at the time of death is not conclusive evidence that the miner was not totally disabled; and (2) a living miner's employment with changed employment circumstances indicating a reduced ability to do his usual coal mine work, is not conclusive evidence that the miner is not totally disabled.

The conference substitute conforms to the Senate amendment. By this amendment, the conferees intend to conclusively establish what is already implicit in current law; that is, that mere status as an employee is not always accompanied by the absence of total disability (within the meaning of the Act). It is in response to the administrative practice of denying claims solely on the basis of employment status without regard to the type of work being performed. The amendment thus identifies certain situations which may suggest the existence of legal disability notwithstanding continued employment status and where additional administrative inquiry is therefore directed.

The House bill also provided that a miner could file a claim for benefits regardless of whether the miner was currently employed and that the Secretary of Labor could advise the miner if he would be eligible for benefits if he changed the circumstances of his work. The Senate amendment did not contain these provisions.

The conference substitute does not include the House provision since the provision would essentially duplicate authority provided elsewhere in the conference substitute, arising out of identical provisions in the House bill and Senate amendment, which prohibits benefit payments to employed miners (except those afflicted with complicated pneumoconiosis, as described by section 411(c)(3)), but permits a miner to receive benefits if his employment terminates within 1 year after he is determined to be otherwise eligible for benefits.

EVIDENCE

Affidavits

The House bill provided that where there is no relevant medical evidence in the case of a deceased miner, affidavits shall be considered sufficient to establish eligibility. The Senate amendment provided that in the case of a deceased miner, where there is no medical evidence or where such evidence is inconclusive, a claim shall be approved if other evidence in the record, including affidavits, taken as a whole, establishes eligibility.

The conference substitute conforms to the House provision with a Senate amendment that affidavits are sufficient to establish eligibility in the case of a deceased miner where there is no medical "or other" relevant evidence.

X-ray rereading prohibition

The House bill required the Secretary to accept the opinion of a claimant's physician regarding whether the miner's X-ray shows pneumoconiosis unless the Secretary has good cause to believe the X-ray is not of sufficient quality, or the miner's condition is being fraudulently represented. The Senate amendment provided that if the miner is employed for 25 or more years in the mines and there is other evidence of pulmonary or respiratory impairment, the Secretary must accept the reading of a board-certified or board-eligible radiologist if the X-ray is of sufficient quality and is taken by a radiologist or a qualified radiologic technologist or technician, except where the Secretary has reason to believe that the claim has been fraudulently misrepresented. The Secretary of Labor may by regulation establish specific requirements for techniques used to take X-rays.

The conference substitute generally conforms to the Senate provision except that the limitation on the prohibition as it pertained to claims of miners with 25 or more years of mining employment contained in the Senate amendment is deleted. In the case of X-rays read by a board-certified or board-eligible radiologist it is the intention of the conferees that the Secretary shall accept, for whatever evidentiary value X-rays generally may have, the evaluation of such X-rays read by a board-certified or board-eligible radiologist without submitting them to a further rereading.

Autopsy reports

The House bill provided that the Secretary must accept an autopsy report for purposes of determining the presence of pneumoconiosis and the stage of advancement of pneumoconiosis, unless the Secretary has good cause to believe it is not accurate, or that the miner's condition is being fraudulently misrepresented. The Senate amendment did not contain these provisions.

The conference substitute conforms to the House bill.

Pulmonary examination

The Senate amendment required that miners be provided an opportunity to substantiate their claims by means of complete pulmonary examinations. The House bill contained no such provision.

The conference substitute adopts the Senate provision with an amendment to clarify that the miner-claimant has the right to insist on a complete pulmonary examination in substantiating the claim. The conferees recognize that complete pulmonary examinations, including blood gas tests, may be an especially important tool in diagnosing total disability due to pneumoconiosis for miners in certain cases, such as high-altitude miners. In adopting this provision, the conferees intend that in evaluating claims, all relevant evidence be considered but that no claim may be denied unless the claimant has been offered the opportunity to substantiate his claim by means of such pulmonary examinations (except where it is determined in consultation with the miner's physician that such test is medically contraindicated) and the miner has been given a reasonable period of time to avail himself or herself of such opportunity. The conferees do not intend by this provision, however, that any single medical test be given priority in establishing total disability due to pneumoconiosis.

BENEFIT ELIGIBILITY

Survivor presumption

The Senate amendment entitled the survivor of a miner who died before the date of enactment of the 1977 amendments and who had at least 25 years of coal mine employment prior to June 30, 1971, to benefits, unless it is established that, at the time of death, the miner was not partially or totally disabled due to pneumoconiosis. The survivor was required upon request to supply the Secretary with available evidence concerning the health of the miner at the time of death. The House bill had no equivalent provision.

The conference substitute adopts the Senate provision.

Mine accident provisions

The House bill provided that if a miner was employed 17 years or more in underground coal mines and died as a result of an accident in any such coal mine which occurred before June 30, 1971, an eligible survivor would be entitled to part B black lung benefits. The Senate amendment had no comparable provision.

The conference substitute does not contain this provision.

Determination of year of employment

The Senate amendment provided that a miner would be credited with a year of employment if the miner had four quarters of coverage as defined in the Social Security Act, was continuously on the payroll of a coal company, or if the Secretary of Labor determined on the basis of other evidence that he was employed as a miner. The House bill had no comparable provision.

The conference substitute does not contain this provision.

Use of 15-year presumption

The House bill did not modify current law under which part C claimants, in order to use the section 411(c)(4) presumption of total disability due to pneumoconiosis, must have worked 15 years in the coal mines prior to June 30, 1971, and have filed the claim within 3 years of last exposed employment in a coal mine for a living miner and within

15 years of last exposed employment in a coal mine in the case of a survivor's claim. The Senate amendment eliminated all time limitations on the use of the section 411(c)(4) presumption.

The conference substitute conforms to the Senate amendment.

Statute of limitations

The House bill provided that, in addition to the provisions of current law under which a part C claim may be filed within 3 years of discovery of total disability due to pneumoconiosis or within 3 years of death due to pneumoconiosis, a part C claim may also be filed within 3 years of the date of enactment of these amendments. The Senate amendment permitted the filing of a part C claim by a miner within 3 years after a medical determination of total disability due to pneumoconiosis, and eliminated the statute of limitations on survivor claims.

The conference substitute conforms to the Senate provision with an amendment which would permit the filing of a part C claim within 3 years of the date of enactment of these amendments.

Survivors of approved claimants

The Senate amendment provided that the eligible survivors of approved claimants would not be required to file a new claim for benefits. The House bill had no comparable provision.

The conference substitute conforms to the Senate amendment.

Medical benefits

The House bill required the Secretary of HEW to notify miners receiving benefits under part B of the eligibility to file for medical benefits under part C. Such miners would then have 6 months to file a part C claim for medical benefits, without regard to the current 3-year statute of limitations. The Senate amendment had no comparable provision.

The conference substitute adopts the provision of the House bill. The conferees intend that the so-called "interim" part B medical standards are to be applied to all of these medical benefits claims.

Applicability of 1977 part B amendments to part C

The Senate amendment made these amendments to part B applicable to part C where relevant. The House bill had no comparable provision. The conference substitute conforms to the Senate amendment. Neither this provision nor any other provision in the conference substitute eliminates or narrows the current applicability of all part B presumptions to part C claims. Indeed, it is the express intent of the conferees to expand the regulatory authority of the Department of Labor in administering the black lung benefits program.

NOTIFICATION AND REVIEW

Notification

The House bill provided that the Secretaries of Labor and HEW would disseminate to interested persons and groups information on changes in the law. Each Secretary would undertake a program to give individual notices. The Secretary of HEW would locate and notify individuals with long periods of coal mine employment or their survivors of their eligibility to file a part B claim if they had not previously filed a part B or part C claim and such persons could file clai mswithin 6 months of notification.

The Senate amendment required the Secretaries of Labor and HEW to disseminate jointly to interested persons and groups information on changes in the law, and through group organizations and operators to undertake to notify individuals. Individual assistance was to be provided to potential beneficiaries.

The conference substitute conforms to the House bill with an amendment to delete any requirement that a delegate of the Secretary personally visit individuals to inform them of their eligibility for benefits. Also deleted is the provision in the House bill permitting the reopening of part B to "notified" potential claimants. In addition, as discussed below, the Secretary of HEW will notify denied part B claimants and the Secretary of Labor will notify denied part C claimants of their review rights and, with regard to part C claimants, of their right to augment their files. The conference substitute also retains the Senate provision requiring that individual assistance be provided to potential beneficiaries. The conferees intend that the Secretaries undertake a broad campaign to disseminate information about the changes in the program and to notify individuals who may have become eligible for benefits, through appropriate organizations, groups, and coal mine operators.

Review

The House bill provided that the Department of Health, Education, and Welfare would automatically review all previously denied or pending part B claims and that the Department of Labor would likewise review all previously denied or pending part C claims to determine if the respective claimants would be eligible for benefits in light of the 1977 amendments. The Senate amendment provided that claimants with previously denied claims would be permitted to refile under part C under an expedited procedure to be established by the Secretary of Labor.

The conference substitute adopts the requirement of the House bill of entitlement to review of all denied or pending claims (part B and part C) taking into account the changes made by these amendments. It requires the Department of HEW to notify individuals whose part B claims have been denied or are pending that they may elect to have HEW review the claim on the existing record or have the claim referred to the Department of Labor for refiling under part C with an opportunity to submit new evidence. Where the claimant elects review under part B and the Department of HEW finds the claimant eligible in light of these amendments, or for other reasons, the Secretary of HEW is to certify this determination to the Secretary of Labor. This certification is binding upon the Secretary of Labor as an initial determination of eligibility and the Secretary of Labor is required to immediately make or otherwise provide for the full payment of the claim in accordance with relevant part C provisions.

When the claimant elects review under part B and the Department of HEW does not find the claimant eligible for benefits on the existing record, the claim will be referred to the Secretary of Labor for refiling under part C, and consideration thereunder (including the opportunity to submit new evidence), and the claimant is notified by HEW of that referral. Once the Secretary of HEW makes the determination of claim approval or denial based on review on the existing record, the responsibility for further review action on any such claim is transferred to the Secretary of Labor. This also includes the situation where a claimant is dissatisfied with the scope or terms of an HEW approval (e.g., dispute regarding augmentation of benefits because of dependents). The Department of HEW is thus expressly relieved of providing an administrative process for appeal from its determinations under these provisions and that responsibility rests with the Department of Labor.

Where the claimant does not elect review under part B, but elects to have the claim referred to the Department of Labor for refiling under part C, HEW shall so notify the Secretary of Labor and shall promptly provide the Secretary with the claimant's case file, and all pertinent information necessary to further process the claim. With respect to all claims referred by HEW to the Secretary of Labor, and thus refiled as part C claims, the Secretary of Labor shall provide an opportunity for the claimant to present additional medical or other evidence in support of the claim and shall notify each claimant of that opportunity.

The conference substitute also requires the Secretary of Labor to automatically review all currently denied or pending part C claims, taking into account the changes made by these amendments. The Secretary is required to immediately make or otherwise provide for the full payment of claims approved under these provisions in accordance with relevant part C provisions. If the evidence on file is not sufficient for approval of a claim, the Secretary shall provide an opportunity for the claimant to present additional medical or other evidence in support of the claim and shall notify each claimant of that opportunity. If a claim is denied on review on the existing record, the claimant shall once again be informed of his right to submit additional evidence in support of the claim under part C.

All reviews or refiled claims shall receive expedited treatment. The conferees also expect the Secretaries of HEW and Labor to establish a satisfactory mechanism to coordinate their responsibilities and to avoid both agencies simultaneously reviewing the claim of any claimant previously denied under part B and later denied, pending, or entitled under part C. The conferees expect the Secretary of HEW to administer the "interim" standards with a view to the just accomplishment of the purpose of allowing for reviewed part B claims to establish disability within the meaning of the 1977 amendments as they apply to all reviewed part B claims.

For purposes of payment of benefits, all claims under review shall be treated as part C claims and shall be subject to relevant part C provisions which require payment of benefits by a coal mine operator, other employer, or by the trust fund established by the Black Lung Benefits Revenue Act of 1977.

Retroactivity

The House bill provided no payment retroactivity pursuant to review. The Senate amendment provided that a part B denial, refiled as a part C claim and approved, would be paid from January 1, 1974, as would a denied section 415 claim (that is, a claim filed between July 1 and December 31, 1973). A previously denied part C claim approved after refiling would be paid benefits from the date of original filing.

The conference substitute conforms generally to the Senate amendment with an amendment which does not alter the current law regarding retroactivity of benefits payments but which precludes any retroactivity of benefits for a period prior to January 1, 1974.

Pre-1970 employment

The House bill reopened part B (claims paid out of general revenues) for all claims predicated upon employment which terminated prior to December 30, 1969. The Senate amendment provided that any approved part C claim based upon coal mine employment which terminated prior to January 1, 1970, was to be paid by the trust fund established by the Senate amendment. The Senate amendment did not permit newly filed claims under part B.

The conference substitute conforms to the Senate amendment. The responsibility for payment of part B claims approved upon review pursuant to these amendments is dealt with elsewhere in the conference substitute.

Successor operator

The Senate amendment added to current law a requirement that, on or after Janu-

ary 1, 1970, if an operator reorganizes to change its identity, form, or place of organization, is liquidated into a parent corporation, or ceases to exist because of a sale of assets, merger, consolidation, or division, the successor operator or corporation is liable for claims based on coal mine employment for the predecessor operator, except that a predecessor operator shall be primarily liable if the predecessor operator remains a coal mine operator and is financially responsible for the payment of the claim. The House bill had no such provision.

The conference substitute conforms to the Senate amendment.

CLAIMS ADJUDICATION

Procedures

The House bill retained provisions under current law by which the Longshoremen's and Harbor Workers' Act procedures applied with respect to claims processed by the Secretary of Labor. In addition, the House bill added provisions establishing a new hearing procedure which required an expedited hearing within 45 days if requested by a claimant. The House bill also required the claimant's appeal from a final decision of the Secretary to be taken to a U.S. district court. The standard of review applied by the district court would have been "weight of the evidence".

The Senate amendment retained the Longshoremen's Act procedures for the adjudication of all claims processed by the Secretary of Labor but permitted the use of hearing officers for a period of 1 year. It also made future amendments to Longshoremen's Act procedures automatically applicable to black lung claims.

The conference substitute conforms to the Senate amendment. For purposes of adjudication, all claims certified, referred, or otherwise subject to review by the Secretary of Labor under section 435, shall be treated as part C claims.

Participation

The House bill provided that no operator may participate in the adjudication of any claim. The trustees of the fund (established by the House bill) could participate in the claims process on behalf of all operators only to the extent that they could appeal a prior decision, and medical determinations of the Secretary would not be appealable. If the trustees appealed a decision their appeal would be taken to the appropriate court of appeals.

The Senate amendment provided that only the Secretary and the claimant may participate in proceedings for which the trust fund may be liable. Neither the fund nor any operator could participate in any trust fund claim initially or on appeal. The Senate amendment made the Secretary of Labor a party in any part C proceeding and retained the current authority for operators to participate in claims adjudication with respect to claims for which they might be responsible.

The conference substitute conforms to the Senate amendment in the respect that the Secretary of Labor is a party in any part C proceeding and in retaining the authority of current law for operators to participate in the adjudication of claims for which they may be individually found liable (including part B claims certified or otherwise referred to the Secretary of Labor by the Secretary of HEW pursuant to the conference substitute). The balance of the Senate provision is incorporated in the provisions of the Black Lung Benefits Revenue Act of 1977, a prior and separate enactment dealing generally with the trust fund financing mechanism for the Black Lung Benefits Act.

Enforcement of operator liability to claimants

The House bill did not modify current law under which the failure of an operator to pay a claimant results in payments by the Secretary of Labor made on behalf of such operator. The Secretary may bring a civil action for recovery. Pursuant to incorporated Longshoremen's Act provisions, the operator may be required to pay the claimant 20 percent in addition to compensation if timely payments are not made. There is no penalty for failure to insure.

The Senate amendment provided that the failure of an operator to pay a claimant would result in payments being made by the trust fund. If the operator refused to repay the fund, there would be a lien against such operator's assets, enforceable in a U.S. district court. The operator would also be liable for the payment of a 20 percent penalty to the claimant pursuant to the Longshoremen's Act. A civil penalty of up to $1,000 a day would be provided for failure of an employer to secure benefits and corporate officers would be made jointly and severally liable. Criminal penalties would be imposed against an operator who knowingly destroyed or encumbered his property to avoid paying benefits. Other penalties would be imposed by the Senate amendment for the filing of false statements. The Secretary would be authorized to require employers to file reports concerning who may be entitled to benefits. Failure to file such reports would be subject to a civil penalty.

The conference substitute conforms to the Senate amendment with regard to its provisions establishing penalties for failure to secure payment of benefits and for false statements and reports. The balance of the Senate provision (e.g., trust fund liability lien provisions) is incorporated in the provisions of the Black Lung Benefits Revenue Act of 1977 (discussed above).

The conferees intend that the Secretary of Labor fully utilize the regulatory authority under which he or she may require reports of employers (regarding black lung beneficiaries or potential beneficiaries) to collect broad statistical data and to monitor the status of individual or groups of claims.

Enforcement of operator liability to fund

The House bill provided that if an operator failed or refused to pay an assessment or premium to the fund, the trustees would be authorized to bring a civil action against such operator in an appropriate U.S. district court. Nine percent interest could be assessed on past due balances. In addition, the Secretary of the Treasury could assess penalties not in excess of unpaid premiums and assessments to be paid by a defaulting operator. Penalties could be recovered by the Secretary of the Treasury in an appropriate U.S. district court, and would be paid into the fund.

The Senate amendment provided that if an operator failed to pay his designated 1 percent sales tax or repay the fund for the amounts paid on such operator's behalf, there would be either a default in tax liability declared by the Internal Revenue Service or in the latter case a lien imposed pursuant to provisions of the Internal Revenue Code of 1954. Such lien would be enforced by the Secretary of Labor in a U.S. district court.

The conference substitute does not contain either provision since the provision of the Senate amendment is incorporated in the provisions of the Black Lung Benefits Revenue Act of 1977, a prior and separate enactment (discussed above).

Administration

The House bill established a coal industry administered fund, the trustees of which would be elected by coal mine operators. The operator trustees administered and managed the fund and were authorized to invest the corpus in accordance with ERISA limitations. The Senate amendment established a trust fund and provided that the trustees of the fund would be the Secretaries of Treasury, Labor, and HEW, with the Secretary of the Treasury the managing trustee. Assets of the fund would be invested only in public debt securities.

The conference substitute does not contain either provision since the provision of the Senate amendment is incorporated in the provisions of the Black Lung Benefits Revenue Act of 1977 (discussed above).

Payments

The House bill provided that the trust fund would pay the full cost of all part C claims including reimbursing the Federal Government for any payments made after December 31, 1973, for claims filed after June 30, 1973, and authorized the trust fund to assume payment of the obligations (in return for reasonable payment) of insurance carriers or operators who incurred a prior obligation under this part. The fund would pay only its own administrative expenses.

The Senate amendment provided that the trust fund would pay all part C claims which are predicated upon employment which terminated prior to January 1, 1970, and claims with respect to employment after that date where no responsible operator can be found or the miner's coal mine employer is insolvent or uninsured. The fund would also reimburse the Treasury for all part C claims paid by the Federal Government prior to enactment of these amendments with respect to periods of eligibility from January 1, 1974. The fund would pay the administrative expenses of Labor, HEW, and Treasury.

The conference substitute provides that the trust fund (established by the Black Lung Benefits Revenue Act of 1977) pays benefits in cases in which there is no operator who is required to secure the payment of such benefits or where a liable operator has failed to make payment in a timely manner or cases in which the miner's last coal mine employment was before January 1, 1970 (irrespective that in cases reviewed under section 435 the claim was initially filed as a part B or part C claim). The balance of the Senate amendment is incorporated in the provisions of the Black Lung Benefits Revenue Act of 1977 (discussed above).

Financing

The House bill provided that the trust fund would be supported by premiums and assessments payable by each coal mine operator in the United States, except where a State law has been certified. The amount of the premium would be established in the first year by the Secretary of Labor predicated upon the tons of coal mined by each such operator. In following years, the premium would be established by the trustees subject to modification by the Secretary. Premiums would have to be sufficient to meet the obligations of the fund. Premium rates would be uniform throughout the coal mine industry. Premiums due and payable would be collected by the Secretary of the Treasury in the same manner as quarterly payroll reports of employers, and penalties could be assessed by the Secretary of the Treasury for failure to pay premiums. In addition to the annual premiums, assessments would also be required to be paid into the fund by individual coal mine operators at the end of each year in an amount which would be equal to the claim liability experience of such operator.

The Senate amendment established a trust fund on the books of Treasury, supported by a uniform 1 percent ad valorem manufacturers excise tax on coal (other than lignite) sold by producers, after September 30, 1977. Claims for which there is a responsible operator would be financed through insurance or self-insurance, as under current law.

The conference substitute makes reference to the Black Lung Disability Trust Fund established by the Black Lung Benefits Revenue Act of 1977 (discussed above). The fi-

nancing mechanism for the trust fund, as prescribed in the Revenue Act, conforms generally to the Senate amendment, except that the tax is based upon the tonnage of coal mined by coal operators (as in the House bill) at the rate of $0.50 per ton for underground coal and $0.25 per ton for surface-mined coal (but not to exceed 2 percent of the price at which the ton of coal is sold by the producer). The conference substitute does continue the current law regarding the individual liability of responsible operators (except where the miner's last coal mine employment was before January 1, 1970).

MISCELLANEOUS

Insurance

The Senate amendment created a black lung compensation insurance fund in the Department of Labor to enable the Secretary of Labor to offer insurance to operators if such insurance is unavailable privately at reasonable cost. The Senate amendment further authorized repayable advances to the insurance fund. The insurance fund would charge premiums consistent with accepted actuarial principles. The House bill had no such provision.

The conference substitute conforms to the Senate amendment. It is the intent of the conferees that the insurance fund not be operated solely as an insurer of a high-risk pool. The Secretary is also expected to utilize this authority to assist in encouraging private insurers to make contract insurance widely available at reasonable costs.

Field offices

The House bill required the Secretary of Labor to establish field offices. The Senate amendment authorized the Secretary of Labor to establish field offices.

The conference substitute conforms to the House bill with an amendment authorizing the Secretary of Labor to enter into agreements to use the facilities of other Federal or State agencies in establishing such field offices, and to use such facilities and also personnel if necessary in lieu of establishing separate field offices where separate Labor Department staffed field offices are not feasible. The conferees intend that, while the Secretary of Labor establish field offices wherever there are sufficent claimants in need of assistance, the Secretary not be required to maintain separately staffed field offices in locales where there is likely to be an insufficient number of claimants to justify their continued existence.

Occupational disease study

The House bill provided that the House Education and Labor Committee would conduct a study of white lung disease in 1 year. The Senate amendment required the Secretary of Labor, in cooperation with NIOSH, to conduct an 18-month study of all occupationally-related pulmonary and respiratory diseases.

The conference substitute conforms to the Senate amendment.

Information to denied claimants

The Senate amendment required the Secretary of Labor to supply each denied claimant with a written statement of the reasons for such denial and a summary of the administrative hearing record or, on a showing of good cause, a copy of any transcript thereof. The House bill had no such provision.

The conference substitute conforms to the Senate amendment.

Interim part C payments

The House bill provided that part C benefits would be paid by the Secretary in any case in which the Black Lung Disability Insurance Trust Fund was not in operation. The Senate amendment had no such provision.

The conference substitute conforms to the House bill except that the reference is to the Black Lung Disability Trust Fund established by the Black Lung Benefits Revenue Act of 1977 (discussed above). The intent underlying this provision is to essentially "revive" the payment provisions of the current law in the event payments cannot lawfully be made from the trust fund. An example (and perhaps the only imaginable eventuality which could trigger this provision) would be a Supreme Court finding of legal infirmity going to an aspect of the trust fund sufficient to prevent the trust fund from adequately assuming the purpose and responsibility for which it was established.

Retroactivity—State exemption

The House bill made no change in the current law under which a State could gain an exemption for its operators from the provisions of the Federal statute if the State enacts a black lung compensation law which the Secretary of Labor could certify as meeting the Federal statutory standards. Such standards required *inter alia* State law coverage for miners last employed before enactment. The Senate amendment modified the existing law to permit the Secretary of Labor to approve State laws which provided coverage for miners whose last employment terminates after the Secretary's approval of such State law.

The conference substitute conforms to the provisions of the Senate amendment with an amendment to clarify the intent of the conferees that operators in certified States under the Federal statute would still be required to secure the payment of benefits pursuant to Federal law with respect to miners whose last employment in coal mining terminated before the Secretary's approval of the State law. It is the intent of the conferees that no miner currently covered by the Federal statute be denied coverage under either the Federal statute or a certified State law because of the operation of this provision. Operators in certified States would nonetheless be liable for the coal excise tax imposed by the Black Lung Benefits Revenue Act of 1977, and miners whose employment ceased before the State law was certified would be paid pursuant to the operation of the Federal law.

Self-insurance

The Senate amendment provided specific income tax treatment for a qualifying trust used by a coal mine operator to self-insure for liabilities under Federal and State black lung benefits laws, and allowed deductions within certain limits for amounts contributed to the trust by the operator. The Senate amendment further imposed certain investment limitations and prohibitions on "self-dealing" and "taxable expenditures" designed to prevent abuses of such trusts. The Senate amendment provisions would be effective for taxable years beginning after December 31, 1977. The House bill contained no such provision.

The conference substitute does not contain this provision although it is incorporated in the provisions of the Black Lung Benefits Revenue Act of 1977 (discussed above).

Addresses

The Senate amendment amended section 6103 of the Internal Revenue Code of 1954 to allow the IRS to provide NIOSH with addresses of taxpayers for purposes of locating individuals who may have been exposed to occupational hazards. The House bill contained no such provision.

The conference substitute does not contain this provision because this provision was included in the Act of December 13, 1977 (Public Law 95-210; 91 Stat. 1485), an amendment to the Social Security Act to provide payment for rural health clinic services.

Location of Division of Coal Mine Workers' Compensation

The House bill provided that the Division of Coal Mine Workers' Compensation would be located in the Office of the Secretary of Labor. The Senate amendment had no such provision.

The conference substitute does not contain this provision from the House bill.

Effective dates

The House bill provided generally that the bill would take effect on the date of enactment. The House bill also contained additional effective dates relating to the manner in which the funding provisions of the House bill would take effect. The Senate amendment contained similar provisions for a generally applicable effective date on the date of enactment, with additional effective date provisions relating to funding.

The conference substitute provides that the amendments will take effect on the date of enactment. Additional effective dates relating to funding were made unnecessary as a result of the enactment of the Black Lung Benefits Revenue Act of 1977 (discussed above).

SALT II: THE HIGH STAKES GAME WE ARE LOSING

(Mr. CHARLES H. WILSON of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. CHARLES H. WILSON of California. Mr. Speaker, as a Member of the House appointed by the Speaker to be an official observer to the SALT II negotiations, as a ranking member on the Subcommittee on Intelligence and Military Application of Nuclear Energy and Arms Control and a member of the full House Armed Services Committee for the past 15 years, no one is more aware of the need to control strategic nuclear armaments. As an observer of a great deal of the world's history over several decades, I am also aware of the dangers inherent in unilateral disarmament.

In our desire to control strategic weapons, we should always be aware that

our own weakness is a source of strength for a potential enemy. We must take every precaution to assure that our strategic forces will be sufficient to meet our possible future needs. SALT II gives me no such assurance.

SALT II is of vital importance to every American and to others in the world whose peaceful existence depends upon the deterrent power of our "nuclear umbrella." It is a matter which should be widely understood and debated. Our purposes for seeking a SALT II agreement should be made clear. Americans deserve to know the full risks and ramifications to our national security even if the Soviets live up to the terms of the treaty and protocol, and where we will stand as a nation if the United States continues to push vital decisions on strategic systems into the future.

For this reason, I would like to present my declassified report on the SALT II negotiations which I submitted to the Speaker and the chairman of the House Armed Services Committee for the consideration and debate of my colleagues in the Congress.

REPORT OF REPRESENTATIVE CHARLES H. WILSON ON SALT III

On December 8, 1977, I completed a nine-day period of official travel in connection with matters within the legislative and oversight jurisdiction of the Subcommittee on Intelligence and Military Application of Nuclear Energy in the furtherance of my responsibilities as a Delegate of the House of Representatives to the Strategic Arms Limitation Talks (SALT) in Geneva, Switzerland.

THE SALT TALKS

Meetings attended

I arrived in Geneva on the afternoon of Sunday, December 4, and on the following morning met privately with Ambassador Ralph Earle II who has been appointed by Ambassador Paul Warnke to act as chief negotiator for SALT. Mr. Warnke is not only the chief negotiator for SALT but he is simultaneously handling SALT, the Indian Ocean negotiations, and the Comprehensive Test Ban Treaty (CTBT) talks. In addition, he plays a leading role in the Mutual and Balanced Force Reduction (MBFR) talks and as a liaison with U.S. Allies in Western Europe.

I also attended meetings of the members of the U.S. Delegation, joint meetings of the U.S./Soviet drafting group at the Soviet Mission, and the Plenary session on December 6, 1977. The Plenary (formal) session at the Soviet Mission was also attended by Senators Culver and Hart. Plenary sessions involve the reading of formal statements by the chief negotiators which state the positions of each government. Following these formal sessions, delegation members meet privately with their counterparts in informal conferences where the give and take is polite but unconstrained. It is at this level, which includes both members of the two delegations and staff members, that most tentative agreements have been reached. Informal meetings between U.S. and Soviet delegation members, or between staff members, take place on an almost daily basis.

I attended meetings on December 5, 6, and 7. In addition to these meetings, a reception was attended at the residence of Ambassador Earle on the evening of December 6, during which an exchange of views with members of the Soviet SALT Delegation was possible. I also met with Ambassador Warnke and United States and British negotiators who are working on the Comprehensive Test Ban Treaty.

SUMMARY OF FINDINGS (SALT)

The following remarks summarize factual information obtained and general impressions formed during the SALT sessions:

The U.S. versus the Soviet SALT delegations

With the exception of two members of the U.S. Delegation (Ambassador Earle and Lt. Gen. Rowny), no U.S. negotiator has had previous experience with SALT or other negotiations with the Soviets.

The Soviet Delegation on the other hand, headed by Mr. Vladimir S. Semenov, is an experienced team which has dealt with SALT matters since the SALT I talks began in 1969. Most members of the Soviet Delegation speak fluent English and several have occupied diplomatic posts within the United States.

The philosophy of U.S. negotiations

The guiding principles which should drive U.S. negotiations in SALT II are the maintenance of a credible U.S. strategic nuclear deterrent force during the life of any subsequent treaty and, in the event that the treaty were to be abrogated, the assurance of balanced strategic forces in future years. Unfortunately, the majority of the U.S. Delegation do not emphasize deterrence, nor do they consider the possible shape of things after 1985.

Too little attention is being given to the question of the real power of the U.S. nuclear deterrent in terms of throw weight, weapon yields, accuracy, silo hardening, and civil defense. Allowances are not being made for the the future effects of Executive Branch decisions which will vitally affect U.S. security in the 1980's and 1990's, such as:

Cancellation of the B–1;

Ageing of the B–52 force;

The future or non-future of the FB–111H;

The future or non-future of the MX missile;

Uncertainty of the cruise missile and cruise missile carriers;

Improvements in Soviet missile accuracy;

Current and future asymmetry in throw weight and weapon yield;

Improved and expanded Soviet air defenses; and

The issue of the BACKFIRE bomber.

The philosophy of Soviet negotiations

The Soviet negotiators are pragmatists who recognize that the U.S. manned bomber force is on the decline as a result of the President's unilateral decision. They realize that the U.S. Minuteman force is highly vulnerable and that a considerable percentage of their land-based missile forces could perhaps survive a first strike or counterblow. The Soviets now have about 35 percent of their long-range (4,200 NM) strategic missiles in submarines, while our C–4 is in the testing stage. They have already deployed a 600 KM air- and sea-launched cruise missile. They have tested a 5,700 NM SLBM.

The Soviet negotiators do not speak in terms of deterrence. While the Soviets offer no apologies for their growing strategic and conventional forces, they also offer no clues to the intended use of these forces.

Lest we forget the traditional pragmatism of the Soviets with respect to military matters, and become naively overconfident and trusting, we should consider other possible Soviet motivations toward a SALT treaty. First, neither the treaty nor the protocol would enhance the survivability of the U.S. Minuteman force, while the survivable MX system is stalled in R&D for at least three years. United States cruise missile technology may become limited. Limitations on testing and deployment of "new systems" will tend to freeze U.S. ICBM and SLBM accuracy at present levels. The Backfire bomber is not even under discussion in SALT, nor are the thousands of MRBMs targeted upon NATO.

Given the statements of the President, and the selection of policymakers and negotiators with a disarmament (at times unilateral) mind set, the Soviets may well perceive that a treaty as now shaped is to their great advantage. It would seem to have several advantages to them:

It would freeze U.S. technology while permitting the Soviets to go ahead. (SALT I permitted them to pull even.)

It would undercut congressional support for defense programs, including R&D. (Systems delayed by the treaty or protocol will probably be delayed in the appropriations process.)

It would result in favorable world propaganda, and

The treatment of cruise missile technology transfer could possibly drive a wedge between the U.S. and NATO Allies.

The Soviets are also very interested in whether SALT II can be "sold" to the Congress. They had received encouragement from some other Members of Congress but had been discouraged by others.

Reminding the members of the Soviet Delegation that the House does not vote on ratification, I advised them that in my opinion, the acceptance of a treaty and the protocol by the American people and the Senate would depend on the final content. If either the treaty or protocol are considered to be one-sided, inequitable or adverse to our national security interests, I predicted that ratification would be very difficult if not impossible. In this connection, I pointed out that the Soviet conventional arms buildup and Soviet intentions were also things which bothered most Americans. While the two problems—conventional and strategic arms—are not directly linked in the SALT talks, I pointed out that they are linked in the minds of many Members of Congress and U.S. citizens.

Verification

Perhaps one of the most troubling features of the SALT II accord, as now structured, is an inadequate degree of verifiability of compliance. The Soviet Union is a closed society with a controlled press where the movements of persons are carefully controlled. There are no Congressional Committees to review military programs, and harsh punishments are meted out for the unauthorized disclosure of security information. The fact that the opposite is true in the United States assures our 100 percent compliance with a treaty or protocol, while the Soviets would be relatively free to cheat.

The U.S. national means of verification may permit us to verify total numbers of ICBMs or SLBMs and, to some extent, which missiles are "heavy" missiles. The number of missiles which are MIRVed will depend upon Soviet compliance with the SALT rules. The national means of verification will not satisfactorily disclose which systems have been upgraded with new guidance systems or other components, nor will it disclose the range or type of warhead of a cruise missile. In addition, verification of the configuration of BACKFIRE for cruise missile carriage may present a considerable problem.

Without this information, even if the Soviets supplied some information, there can be no satisfactory verification of the series of interlocking ceilings to control the active Soviet inventory of strategic weapons.

The "numbers game" and semantics

Those who may wish to view the current state of the SALT treaty as an enhancement of U.S. security through a more credible deterrent force should be disappointed. Those who may wish to view it as stabilizing the arms race or as any real constraint upon the raw strategic power of the Soviets should also be disappointed. The treaty merely deals with gross numbers of weapons and, as it now stands, the Soviets are assured of a degree or nuclear superiority. For example, the Soviets are assured of at least twice the number of RVs on ICBMs that the U.S. will pos-

sess. Modern Soviet RVs are believed to be approaching the accuracy of those of the U.S., while possessing yields several times higher.

The Soviets are permitted more than 300 "heavy" ICBMs, while the U.S. would have none.

Aside from the treaty, the SALT negotiators are considering a protocol and a "statement of principles." The protocol, in the nature of an Executive agreement, restricts "new" systems, and the deployment of cruise missiles beyond a 600 KM range capability. While Backfire bombers would not count under the treaty or under the protocol, the FB–111, B–52, wide-bodied or any other aircraft equipped to carry long-range missiles would count against the total systems permitted, probably as a MIRVed system.

The NATO/cruise missile issue

The Soviets have been adamant in their position that the agreement must provide against the transfer of cruise missile technology to U.S. NATO Allies. Since the land- and sea-launched cruise missile is considered by several allies, Britain, Germany and France in particular, as a means of stabilizing the situation in Western Europe, they are seriously afraid that the U.S. will foreclose any land- or sea-based options which they may have. I share their concern.

The cruise missile is also considered to be a stabilizing strategic weapon since it can be deployed in large numbers and cannot be targeted in a first strike by the Soviets as missile silos and strategic aircraft may be. It represents a ready and secure retaliatory force.

The treaty and U.S. policy

The policy of the United States with respect to the limitation of strategic offensive arms is expressed in Public Law 92–448, approved by the President on September 30, 1972. As stated in Section 3 of Public Law 92–448, national policy calls for:

A stable international strategic balance. No threat to the survivability of U.S. strategic deterrent forces;

A future treaty that would not limit the U.S. to levels of intercontinental strategic forces inferior to the limits provided for the Soviet Union;

Maintenance of a vigorous research and development and modernization program.

The SALT agreement under discussion in Geneva does not, in my opinion, measure up to our existing policy for the following reasons:

The asymmetry in total strategic power is continued and will grow more favorable to the Soviets during the life of the treaty, with the deployment of Soviet MIRVed heavy and more accurate missiles, and the deployment of additional Backfires.

The survivability of U.S. ICBMs is already threatened by heavy Soviet ICBMs. So is at least a part of SAC and those units of our SLBM force which would not be at sea. Nothing in the proposed treaty will make our ICBM force more secure. Instead, the threat will grow in proportion with the increasing number and accuracy of Soviet RVs, especially on ICBMs. Under current Administration policies, the manned bomber leg of the triad will deteriorate. The Administration is not committed to the production or deployment of any new systems.

With the exception of "heavy" ICBMs which the Soviets will be able to deploy under the treaty, and the BACKFIRE bombers which are not even under discussion, the U.S. and Soviet sides will be permitted a rough equivalence in numbers of strategic delivery systems. Numbers alone, however, are no measure of the inferiority or superiority of intercontinental strategic force levels. Even without the BACKFIRE, the Soviets will be guaranteed superiority in the numbers of ICBM RVs and yield, and the opportunity to modernize and improve the accuracy of existing systems.

Soviet concessions, and even some U.S. concessions, have dealt with systems which we do not have such as the cruise missile, cruise missile carriers, FB–111H, and the MX. In the absence of an early Presidential commitment, we may never have these systems.

U.S. concessions have dealt with Soviet systems which are in being or under advanced development such as the SS–9, SS–16, SS–17, SS–18, SS–19, and SS–NX–18 SLBM.

The status of the U.S. cruise missile, cruise missile carriers, the MX missile, and the TRIDENT II missile are to be left by the treaty and protocol in a state of limbo. The fate of each of these systems is in the hands of OSD, OMB, the President and the Congress, creating a double uncertainty. Each of them may suffer the same fate as the B–1. I fear that a hastily signed treaty, which has no real advantages to the U.S., may well have the effect of drying up R. & D. funds for our deterrent forces of the future. This, coupled with a comprehensive test ban treaty and the stockpile problems such a treaty would cause, would result in woefully weak U.S. deterrent forces by 1985.

Conclusion and recommendations

The SALT II treaty in its present form is not in the best interest of the United States during the period 1978–85. In view of a withering bomber force which will decline in capability during the period, a highly vulnerable ICBM force, and with the TRIDENT and cruise missile programs in doubt within our own government, no treaty would be preferable to an instrument which would guarantee Soviet strategic superiority for the remainder of the century.

In view of the seriousness of this matter, and the desire of the Administration to conclude a treaty, I recommend:

That all Members of the Committee on Armed Services make a special effort to attend one or more of the SALT plenary and/or working sessions early in calendar year 1978.

That the Chairman establish a special panel on international arms control and disarmament within the Subcommittee on Intelligence and Military Application of Nuclear Energy for consideration and study of the SALT II and Comprehensive Test Ban Treaties (CTBT). The issues involved are complicated and constantly shifting. I believe that it is most important and urgent that the Committee on Armed Services should have a forum in which to examine these critical national security issues on a continuing basis.

That the Chairman appoint Members of the Committee on Armed Services as observers to the negotiations now in progress on the Comprehensive Test Ban Treaty, Indian Ocean, and Mutual and Balanced Force Reductions.

CONCURRENT RESOLUTION BY THE GENERAL ASSEMBLY OF THE STATE OF IOWA, FEBRUARY 2, 1978

The SPEAKER. Under a previous order of the House, the gentleman from Iowa (Mr. GRASSLEY) is recognized for 5 minutes.

Mr. GRASSLEY. Mr. Speaker, since Congress reconvened for the second session of the 95th Congress, farmers from throughout the Nation have spent many hours telling their elected officials here in Washington of the current plight of American farmers. In my opinion, a serious situation does exist with many farmers, and I feel that Congress and the administration must address the problems of the American farmers in a sensible and reasonable manner. I am pleased that the House Committee on Agriculture will be holding hearings shortly on the current farm problems.

The American farmer is the backbone of our Nation and, in a way, represents the hardworking, independent, productive individuals who have made our country great. The family farm is an institution which must be preserved. I have the distinct honor and privilege of serving as the ranking minority member on the Subcommittee on Family Farms, Rural Development, and Special Studies. In this capacity I pledge to work for the family farmers.

In addition to the public demonstration here in Washington, farmers have held rallies in their communities and State capitals. This has been the case in my home State of Iowa. In response to the conditions facing farmers in Iowa, the Iowa General Assembly has passed a concurrent resolution regarding the situation facing the family farmers and their need for assistance. At this time I would like to share with my colleagues the text of the resolution passed by the general assembly of Iowa. It reads as follows:

HOUSE CONCURRENT RESOLUTION 104

A concurrent resolution in support of the family farm and the need for family farmers to earn an economic profit

Whereas, the family farm is the most efficent in the nation; and

Whereas, Iowa family farmers have lost equity and enormous sums of money in the last four years due to drought and depressed prices for agricultural products; and

Whereas, more than one-fourth of the nation's farmers and ranchers will be forced to either liquidate or refinance their operations this year; and

Whereas, it is a policy of the nation that a minimum of the people's disposable income be spent on food; and

Whereas, this directly affects the prices paid to family farmers; and

Whereas, unless positive action is taken by the federal government to assure that family farmers are able to recover production costs and earn an economic profit on their food products, large corporations will be the only entities left with the resources required for the production of food, now therefore,

Be it resolved by the House of Representatives, the Senate concurring, That the members of the Sixty-seventh Iowa General Assembly, 1978 Session, recognizes that the Iowa family farmer needs and should recover fair, profitable return from his farming enterprise; and

Be it further resolved, That a copy of this Resolution be sent to President Carter, Secretary of Agriculture Bergland and members of the Iowa Congressional Delegation.

We, Dale M. Cochran, Speaker of the House and Arthur A. Neu, President of the Senate, and David L. Wray, Chief Clerk of the House and Steven C. Cross, Secretary of the Senate, hereby certify that the above and foregoing Resolution was adopted by the House of Representatives and the Senate of the Sixty-seventh General Assembly, Second Regular Session.

LOBBY DISCLOSURE LOOPHOLES

The SPEAKER. Under a previous order of the House, the gentleman from Illinois (Mr. RAILSBACK) is recognized for 5 minutes.

Mr. RAILSBACK. Mr. Speaker, an article in this morning's Washington Post clearly points out the need for lobby reform. I am encouraged that both the Senate and House committees will be considering such legislation this month.

As we all know, those who lobby the legislative branch are currently supposed to file quarterly reports under the 1946 Federal Regulation of Lobbying Act. However, the statute is really a sham, and so treated by the multitude of professional lobbyists and Washington representatives who should register and report, but do not.

I would like to say, however, that I firmly believe that seeking to influence the decisions of Government officials is not inherently wrong nor necessarily injurious to the policymaking process. This is a right guaranteed by the constitutional safeguards of free speech, assembly, and petition for the redress of grievances. Further, various interest groups often provide valuable information and technical assistance that is simply not available elsewhere.

However, I believe just as strongly that the secrecy that too often dominates lobbying activities and undermines accountability and contributes to a loss of confidence in the conduct of our Government and its officials must be eliminated. Citizens and policymakers alike have the right to know how money, in particular, is being spent to influence a public decision. Knowing who is supporting a particular piece of legislation and the extent of that support as measured in the dollars and cents an individual or group is willing to expend in its cause, provides the public and policymakers with important knowledge on which to base informed decisions.

The lobby law we now have has been woefully inadequate in meeting the need for accountability in the lobbying process. In 1970 House hearings, it was described as "vague and ambiguous," "incomprehensible and unworkable." A 1975 GAO report cited the incompleteness of lobbying reports and the lack of enforcement.

As the 1946 act is written, large loopholes exist which permit many interests to avoid registering. Under the narrow definitions of the law as set forth by the Supreme Court decision in 1954, numerous organizations do not register by claiming lobbying is not their principal purpose. The act also does not cover lobbying activities unless the Member of Congress is contacted directly by the lobbyist. Contacts with members of a congressional staff and much of the grassroots pressure are thus exempted.

Perhaps the extent to which the law has failed is suggested by the fluctuations in lobby registrations, depending on whether Congress is investigating lobbying abuses. For example, Watergate was investigated by Congress from early spring 1973, through the impeachment inquiry which ended in the summer of 1974. Available lobby registration figures disclose that for the period from October 1972, through December 1973, 799 persons registered as lobbyists, as compared with only 374 persons who registered as lobbyists during the immediate preceding period, December 1971, through October 1972. Similarly, the investigation into the activities of Bobby Baker was followed by a rise in lobby registrations.

Now a report, published by Common Cause, points out even more dramatically the loopholes in our current lobby disclosure law. This report, the Power Persuaders, explains how little information is currently disclosed about the oil companies and their lobbying activities. I would urge every Member to read this publication, as I believe it all too well points out the need for a new lobby law. For example, in the study of 376 organizations and 954 individuals, only 1 in 10 energy-related organizations with Washington representatives register with Congress as lobbying groups, and most of those who do register with Congress report such small expenditures that their reports are close to meaningless.

This and other information about the Common Cause study appear in Mary Russell's Washington Post article, and for the review of my colleagues I ask that it be included in the RECORD immediately following my remarks:

"LOOPHOLES" IN U.S. LOBBY DISCLOSURE LAW SCORED

(By Mary Russell)

Loopholes in the current federal lobby disclosure law have allowed the energy companies to "hide more than they disclose" about their "multimillion-dollar lobbying campaign on President Carter's energy package," Common Cause charged yesterday.

Common Cause, which calls itself a public interest lobby, released a study of lobby disclosure reports by energy-related organization during the first nine months of 1977, when Carter's energy package was being fought out in Congress.

The law is so full of loopholes that, according to the Common Cause study:

Not one of the seven major oil companies registered as a lobbyist and only one in 10 energy-related organizations registered, since the law requires only groups whose "principal purpose" is lobbying to register.

The law did not require Mobil Oil to report $4 million spent on "advocacy" advertising in relation to energy, and does not require reporting of activities aimed at getting the "grass roots" to lobby Congress.

Cumulative spending reported by the gas and oil industry is "misleadingly low." The oil industry reported spending "only $600,000" and the gas industry $550,000. Common Cause, with a $5 million budget, reported spending $1 million, while the American Petroleum Institute, with a 1977 budget of $30 million, reported spending "only $274,900."

Among the individual energy lobbyists identified by Common Cause, fewer than half file lobby reports with Congress.

Expenditures reported by lobbyists are sometimes so low as to be meaningless. Several full-time lobbyists reported expenditures of less than $10 during the quarterly period, the report said.

Common Cause President David Cohen termed the lobby disclosure requirements "a charade" and called for enactment of a tougher lobby disclosure law.

A House subcommittee has reported a bill that would tighten the provisions in the lobby disclosure law. The House Judiciary Committee is expected to mark up the bill in a couple of weeks. A Senate Governmental Affairs subcommittee is expected to consider a similar bill soon.

A revision of the lobby disclosure law passed both the Senate and the House in 1976, but died in conference.

According to Common Cause, any new law should require reports by organizations, not individuals; should cover all groups that engage in significant lobbying; and should include meaningful reports on expenditures, advertising and mass-mailing efforts.

The study said that under a tighter California law "the same oil companies which don't register as lobbying groups under federal law report spending hundreds of thousands of dollars to influence California decision-making."

"In 1978, for example, Standard Oil of California reported spending $292,933, Union Oil $146,876 and Mobil Oil $107,540 on California lobbying—a total of $547,349, only $90,000 less than the entire oil industry reported spending on federal lobbying during the first nine months of 1977."

Three gas and electric utilities reported spending $930,968 on California lobbying in 1976, "one and a half times as much as the $507,047 the entire gas industry reported spending during the first nine months of 1977 on their federal lobby disclosure reports," the study said.

CONSUMERS CAN HELP THEMSELVES WITH CO-OP BANK

The SPEAKER. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

Mr. ANNUNZIO. Mr. Speaker, last July this body approved the National Consumer Cooperative Bank Act, H.R. 2777, which I was proud to cosponsor. Now, after some delay, our colleagues in the Senate have begun deliberation on this important bill. It is my hope that they will act quickly to pass this legislation so that millions of Americans can get about the business of developing their own self-help organizations.

As I have stated before, there is an urgent need for such a bank. The growth of co-ops in this country has been stunted by the lack of credit available from private lending sources. Banks and other institutions are reluctant to invest in blighted urban areas or in programs designed not to make a profit. In some parts of our great cities there are limited services—services such as food, health care, and housing which are essential to the survival of a community. And cooperatives springing up to meet these needs face the double hex of lack of funds and lack of technical assistance. The Consumer Co-op Bank will be a vehicle for consumers to help themselves.

This bill will establish a bank to make loans at the market rate of interest to fledgling co-ops and it will create a self-help development fund to insure that these co-ops receive the assistance necessary for success. This will be a particular boon to low income, minority, and elderly residents of inner-cities in desperate need of revitalization. It will make sure that the dollars spent by the community stay in the community. It will boost local economies so that these areas can develop into growing and self-supporting entities.

It should be noted that far from being a Government subsidized program, the Consumer Co-op Bank will repay the Government's investment at competitive interest rates. Like the Farm Credit System, established more than 60 years ago, these co-ops will merely be started with

Government capital—seed money—and they will be owned and operated entirely by their members. And if the Farm Credit System is any yardstick, we can predict that this bill will result in a successful and rewarding venture.

Mr. Speaker, the kinds of consumer cooperatives that this bill can stimulate are endless. From child care to automobile repairs to optical and health services, greater segments of the population will now be able to take advantage of services and goods that were either unavailable or too costly before. And contrary to what some opponents have said, the small businessman will not suffer. Rather, cooperatives can be an added feature to our free enterprise system, for they can determine competitive prices and give the consumer bargaining power.

I am especially gratified that the administration has come out in support of this bill. President Carter has long been an advocate of cooperatives and I applaud his concern in this area. With this bill, the ball is passed to the consumers—to the people who benefit most by an improving quality of life and services in their community. And just as the Farm Credit System helped the economic recovery of rural areas, the Consumer Co-op Bank can inject a much needed stimulus into deteriorating inner-cities.

I urge the Senate to pass this bill and to provide a means of self-help for consumers that will work to the advantage of all.

SOCIAL SECURITY REFORM: VOLUNTARY COVERAGE

The SPEAKER. Under a previous order of the House, the gentleman from California (Mr. CHARLES H. WILSON) is recognized for 10 minutes.

Mr. CHARLES H. WILSON of California. Mr. Speaker, as previously scheduled FICA tax rate increases go into effect this year and take-home pay deductions jump from $585 to $605 for the average $10,000 wage earners. Americans will be able to perceive firsthand the hard implications of the recently enacted social security financing amendments. For more than 92 percent of all working Americans, they mean an increased tax burden of more than $80 billion in the next 5 years, and I, for one, do not approve.

Raising social security taxes is a temporary, simplistic, and unacceptable solution to a very complex problem that Congress and the President are committed to face. Part of that problem is the social security system's financial structure. The trust funds that keep the system in the black are low, and reports have indicated that, without immediate replenishment, the funds will vanish altogether and leave millions of beneficiaries either out in the cold or completely reliant on the general revenue for financial and medical assistance.

Justifiably, Congress reacted to this threat; regretfully, the reaction was impetuous. While the recently enacted social security bill may, indeed, remove the immediate bankruptcy threat and "provide financing well into the next century," that is all it does. There are no far-reaching reforms and no guarantees that there will not be a replay of last year's financial havoc sometime in the future.

Congress has prescribed a cure for a symptom of the social security problem without diagnosing the disease, itself. And this—when added with the extravagance of the cure—is unconscionable. Why should taxpayers have to pay more into a system to keep it solvent when, first, the extra money will not correct its fundamental faults, and second, the need for an all-inclusive social security system is debatable? They should not, and I voted against the bill for that reason.

The economic and demographic character of the country have changed so significantly in the 40 years since social security was originally conceived and implemented, that we are compelled to examine the needs of contemporary American workers and the modern implications of the social security system. Is the recently enacted legislation in the best interest of the American worker or does it merely perpetuate a 40-year tradition? I think the latter, and the increasingly expensive tradition has to change.

It is such a change that I have just proposed in the form of H.R. 10458, a bill that would make it possible for an individual to elect, on an annual basis, to contribute to a private retirement fund rather than social security.

The social security system, as it stands now, is unfair to the many social security contributors that either do not intend to collect benefits or cannot because they do not meet any number of fairly specific prerequisites for eligibility. This fundamental inequity in the system is made even more intolerable by the size of the tax increases that these contributors are now bound to pay. Under H.R. 10458, workers would have the freedom to choose their own retirment plan without penalty (while contribution to some retirement program would remain mandatory to insure that workers are not left destitute upon reaching retirement age).

It is only through such responsible reform efforts that the integrity of the social security system, as well as Americans' confidence in a secure retirement, can be restored.

IMMIGRATION AND NATURALIZATION SERVICE OVERSIGHT HEARINGS

The SPEAKER. Under a previous order of the House, the gentleman from Pennsylvania (Mr. EILBERG) is recognized for 10 minutes.

Mr. EILBERG. Mr. Speaker, I wish to announce that the Subcommittee on Immigration, Citizenship, and International Law will conduct 2 days of oversight/authorization hearings on the administration of the Immigration and Nationality Act by the Immigration and Naturalization Service.

Testimony will be received from INS Commissioner Leonel J. Castillo, and the subcommittee will review various areas of internal management and operational functions including: Backlogs in adjudications, the problem of fraudulent immigration documents, antismuggling efforts, and recent court decisions affecting the administration of the Immigration and Nationality Act.

The hearings will be held Wednesday, February 8 and commence at 10 a.m. in room 2237, Rayburn House Office Building, and continue on Thursday, February 9 at 9 a.m. in room 2226.

FAMILY FARM DEVELOPMENT ACT OF 1978

The SPEAKER. Under the previous order of the House, the gentleman from Minnesota (Mr. NOLAN) is recognized for 5 minutes.

Mr. NOLAN. Mr. Speaker, the fact is that we have a feast or famine, boom or bust farm policy in this country that fuels inflation, forces family farmers off the land and increasingly concentrates ownership in food production to a few wealthy and powerful individuals. Earlier this year, our Subcommittee on Family Farms, Rural Development, and Special Studies held extensive hearings in Vermont, Iowa, California, and Minnesota. We were seeking evidence as to the obstacles which are serving to break down the family farm system, and everywhere we have gone, the story has been the same. Good sized, efficient family farmers are leaving the land and leaving our small communities by the tens of thousands, because Government land policy, Government price policy, Government tax policy, Government marketing policy, and Government extension policies are designed to enhance large corporate farmers, speculators, and middlemen. The legislation we are introducing today establishes a price support goal of 100 percent of parity—parity being nothing more than a method of computing cost of production plus a reasonable profit. We believe we can reach that goal by authorizing nonrecourse loans at 90 percent of parity and by prohibiting the Commodity Credit Corporation from releasing stocks at below 110 percent of parity. Under this plan, price supports for milk would be increased to 100 percent of parity for the first 500,000 pounds of production. As you will note from the attached sheets, this new price support system would be tied to strict national production goals and orderly marketing procedures; a grain reserve with new incentives to participate; a food price review board—and new authority whereby the Commodity Credit Corporation serves as seller or marketing agent for all export sales of wheat, feedgrains, and oilseeds—selling at as close to 100 percent of parity as possible. It is fact that a successful fam-

ily farm policy must be geared toward a program which gives farmers the opportunity to obtain 100 percent of parity in the marketplace—but not in such a way as to allow huge farmers and corporations to receive windfall profits—profits which they, in turn, use to compound the problems even further. Despite what you may have heard and read, the truth of the matter is that 100 percent of parity for farmers—tied to production controls, orderly marketing, and sound conservation practices—fights inflation in the marketplace and assures consumers a stable supply of food at reasonable prices in the supermarket. Finally, I want to make it clear that within the coming days it is still my intention to introduce legislation calling for 100 percent of parity at first point of sale—a concept advanced and supported by the American Agriculture Movement—legislation which in no way would be in conflict with the loan proposal but in fact would complement it by providing absolute assurance of 100 percent of parity prices at the first point of sale for agricultural commodities.

The problems in our food policy have many potential solutions, and in order to arrive at the right combination, we intend to explore them all.

Mr. BROWN of California. Mr. Speaker, this legislation is an appeal. It appeals to the Congress, the administration, and the people to recognize the crossroads that agricultural and rural development has reached. We all know that family farms are constantly going out of business, that other farms are expanding greatly in size, that farm technology is becoming more and more energy intensive, large and costly, that our farm soil and water quality are being seriously depleted and exhausted and that young farmers are unable to consider farming as a viable way to make a living. What we do not seem to recognize is that unless we change our directions now—change our overall agricultural policy—that farming will no longer have the family orientation which has made it so productive in this country. Without that change in direction the small rural communities dependent on the buying power of such farmers will be eliminated or changed completely. Is this what we want?

We can change directions. Family farms of a small or moderate-size can survive and be successful if given the chance. We would be closing off our opportunities—our choices—if we allow the current trend to exist. We would also be ignoring the harmful effects that very large-scale farming has and will have on our soil quality and our food quality. Moreover, we would be maintaining a dependence on the costly and limited sources of fossil-fuel energy on which high capital corporate-scale farming depends.

Many groups and organizations have recognized these problems and have provided in depth studies of the productive potential of small and family farms. The small farm viability project in California, just produced a vitally important report on the potential of small farms and the needed support for such enterprises. Numerous solar energy projects on farms are also demonstrating reduction in costs in changing technologies. On the other side of the coin, statistics are showing the impact of farm loss on rural economies. This has led me to the realization that we must move now to support small- and moderate-sized family farms, and support them strongly. The family is a bulwark of our entire society and I do not wish to see it further undermined.

To reverse the trend will take a massive effort. Congressman NOLAN and I have worked for over a year with many organizations, farmers, and other Members, including Congressmen PANETTA, RICHMOND, and JEFFORDS of the Agriculture Committee, in putting together a package of proposals known as the Family Farm Development Act. We have tackled price policy, conservation, loans, availability of land for new farmers, USDA reorganization, education, demonstration, and research. We feel that this legislation has many new ideas and a cohesive plan to move us in the direction of supporting a strong family farm system of agriculture. We will be strongly urging the support of our colleagues on the Agriculture Committees of the House and the Senate as well as in the Congress as a whole.

FAMILY FARM DEVELOPMENT ACT OUTLINE

This legislation contains a variety of urgently needed new and amended programs dealing with farm prices, conservation, taxes, loans, research, and education affecting the development and maintenance of a strong family farm system of agriculture.

This legislation seeks to change the direction of Federal priorities in agriculture to the goals of strengthening the position of the family farmer, helping young farmers become established in farming, improving and maintaining soil, water. and food quality, and improving the economy of rural communities in general.

To do so requires improved prices for the farmer, a vast array of improved low-cost, energy-efficient, environmentally protective farming practices and technology, better marketing systems, a method with which to deal with prohibitive land prices, loans to assist new and marginal farmers, amendments to the tax structure to remove support for tax-loss farming and corporate farming, education and training of new farmers, and improved managerial and technical assistance to marginal farmers.

We have attempted to pull these pieces together in the Family Farm Development Act, which will be introduced on February 2. Attached is an outline of the bill:

TITLE I: 90 PERCENT PARITY COMMODITY LOANS TIED TO CONSERVATION PRACTICES

This title raises the loan rate for agriculture commodities currently covered by the commodity loan program—wheat, feedgrains, cotton, wool, rice, soybeans, and peanuts—in return for establishing conservation practices on the farm. In addition,

PRICE SUPPORT

Milk price supports shall be raised to 100% of parity for up to 500,000 pounds of annual production. Milk production exceeding that amount shall be supported at levels as the Secretary is authorized to establish. The Commodity Credit Corporation shall not sell in the domestic market production which it owns or controls for less than 110% of parity. The goal, therefore, is for commodity prices to reach 100% of parity in the market place.

GRAIN EXPORT BOARD

The CCC shall be the seller or marketing agent for all export sales of wheat and feed grains. Private exporters will continune to function as they do now, except that the CCC must approve the prices, terms and conditions for all export sales.

The CCC may negotiate export sales at less than 100% of parity, but the CCC must seek export prices which are as close to parity as possible. Losses, if any, will be borne by the Treasury.

PRODUCTION GOALS AND MARKETING CERTIFICATES

In order for farmers to market their production in an orderly manner, the Secretary shall establish national production goals for all agriculture commodities other than livestock and poultry. The Secretary shall also issue marketing certificates, allocated to producers on the basis of their average production history over the previous three years. If increases or decreases in the production goals are announced, the amount allocated by marketing certificates will be adjusted accordingly and applied on a uniform basis to all producers.

Market certificates shall be allocated only to producers actively engaged in agriculture production and each such producer or land owner shall not receive marketing certificates valued in excess of $500,000. No agriculture commodities shall be bought, sold, or traded, unless accompanied by marketing certificates.

The Secretary shall establish rules and procedures to assure fair and equitable allocations of marketing certificates, giving priority to new and beginning farmers in any reallocation of certificates. In addition, any producer who purchases land in an amount which exceeds 150 percent of the average farm size in the county wherein the farming operation is located, shall not receive marketing certificates for the land held in excess of the county average.

GRAIN RESERVES

In order to build the extended producer-owned reserve program mandated by Congress, the Secretary shall establish a uniform storage rate authorizing storage payments of 25 cents per bushel for wheat and corn. If the extended reserve is not accumulated within one year, the interest charged shall be adjusted or waived.

FOOD PRICE REVIEW BOARD

In order to prevent unwarranted increases in food prices, the Department of Agriculture (specifically, the Assistant Secretary for Marketing Services) shall have oversight authority over food price increases. A Consumer Price Review Board representing the interests of farmers, consumers, other federal agencies, and the food industry shall be established by the USDA to conduct hearings investigating food price increases. If the Board determines that food price increases are unwarranted, the Department shall report such findings, together with recommendations, to the President and to Congress. The President shall have the authority to roll back food prices to the levels recommended by the Board.

To receive this increased 90 percent loan payment, a farmer would have to apply a system of best management practices on the farm with the help of the Soil Conservation Service. In return for applying these conservation practices, the farmer would receive a certificate from SCS to be turned in at the request for loan payments. With-

out the certificate, the farmer would receive no loan payments whatsoever.

These conservation practices will not have to be applied all at once. The farmer will have a five-year period to apply the entire conservation plan.

TITLE II: TAX-STRUCTURE AMENDMENTS

Two changes would be made in the Internal Revenue Rules which permit farmers to create artificial tax losses by using cash accounting (and ignoring inventory changes).

1. Farmers having more than $100,000 annual gross farm sales would be required to adopt accrual accounting;

2. Taxpayers having more than $15,000 non-farm income will be discouraged from using cash accounting methods.

For tax purposes, farm losses allowable to off-set non-farm income would be limited to $15,000 reduced by the amount that non-farm income exceeded $15,000. If non-farm income exceeded $30,000, no farm losses could be used to off-set any non-farm income, unless accrual accounting were adopted.

These two changes would discourage tax loss farming by very large farms, and by non-farmers, but still allow small family farmers to obtain the full benefit of cash accounting.

TITLE III: FAMILY FARM PRESERVATION PROGRAM

This title establishes a new program for buying and selling agricultural land for the purpose of 1) providing opportunities for new, young, small or limited resource family farmers to acquire farm land, 2) keeping family farmers on the land to prevent it from being used for non-agricultural development or acquisition by large land owners; 3) helping the economic base of rural communities by bringing more farmers into the area.

The program will work this way: when farmland is up for sale, local organizations or county or city governments, are authorized to buy the land at market price. The cash for such purchases will be available from a federal grant to be used exclusively for purchase and sale of local farmland.

The land can then be sold (or divided and sold) to new, small or limited resource family farmers who need to acquire land in order to establish a family farm of no larger than 640 acres.

TITLE IV: FAMILY FARM OWNERSHIP AND OPERATING LOANS

(1) This is a new Farmers' Home Loan program for those new and marginal small and family farms and cooperatives who presently are unable to obtain loans for the ownership or operation of farms from traditional public or private lenders.

(a) The ownership loan section provides for low interest (5%) loans with payments that amount to 10% of normal annual payment during the 1st year, 20% in the second year, etc., until the tenth year of the term, when the recipient of the loan would pay 100% of what the normal annual payment would be under regular interest/principal payments. The difference over those 10 years of reduced payments is amortized over the remaining 30 years of the loan period:

(b) The Farm Operating Loan program resembles normal Farmers Home Administration (FMHA) operating loans except that it offers a 3% low-interest payment and is available only to small or family farmers who can not otherwise obtain loans because they are considered high risk;

(c) Farm cooperatives and farm partnership are included in the eligibility requirements for these two loan programs.

(2) Farmers Home Loan program are amended to give FMHA authority to offer loans for installation of appropriate technology on farms.

(3) The ownership loan program outlined in 1(a) is also extended to those participating in the program outlined in Title III, at a reduced 3% interest levels, to encourage use of the program.

TITLE V: FARM MARKETING PROGRAMS

This title creates new marketing programs, including the following:

(1) Broadening the authority of the Farmer Cooperative Service to give assistance to small and moderate sized family farmers with technical, managerial, financial and statistical information so they can establish small cooperatives to help market their products and also encouraging FCS to emphasize aid to small and family farm cooperatives succeed at marketing their products.

(2) Amending the school lunch program to provide that schools shall spend an average of 2c per lunch to buy local fresh farm products which are nutritional, valuable and acceptable to local eating preferences, emphasizing those purchases having greatest impact on small and moderate sized family farms.

(3) Directing the Agricultural Marketing Service to evaluate its programs to determine the extent to which they aid small and family farmers and how they could be made more useful to these farmers;

(4) Establishing a pilot project in 12 states based on a program in Indiana which uses electronic computer systems to help small and family farmers;

(5) Establishing Federal-State Direct Marketing Program which allows any interested state government or private organization to submit a proposal to USDA for creating a state-wide direct marketing system that includes:

(a) Maximum participation by farmers and consumers;

(b) A method to attract wholesale and retail buyers;

(c) Locations and good facilities for storage and selling of farm products;

(d) Methods of transferring products between each market, so surpluses are reallocated in an efficient manner.

If the proposal is satisfactory, the cost for establishing and operating it for 3 years are shared 75/25—federal/state or private organization.

(6) The Farmer-to-Consumer Direct Marketing Act is amended to permit non-profit organizations to receive grant money from the U.S.D.A. to carry out direct marketing projects. (Currently, only the Extension Service and State Departments of Agriculture can receive it.)

TITLE VI: FAMILY FARM DEVELOPMENT

This title establishes a Family Farm Development Service within the U.S. Department of Agriculture to focus needed attention on the small family farmer's problems. This Service would have the authority to:

(1) Coordinate activities within the USDA concerning development & maintenance of small and moderate-sized family farms. This would require working with Extension Service, Farmer Cooperative Service, etc. to enhance communication and avoid duplication of efforts;

(2) Evaluate the activities of the USDA in terms of their impact on small & family farmers and communicate this annual evaluation to the Congress with recommendations for changes;

(3) Develop a national long-term plan to re-direct agricultural policy towards an agricultural system comprised of energy-efficient, environmentally-protective, economically sound family farms which provide a good standard of living to their owners; and report this national plan to Congress in 3½ years;

(4) Set up a Family Farm Assistance board which will also be responsible for giving out research and education grants that will help develop the technology and practices necessary to re-vitalize the family farm.

TITLE VII: RESEARCH PROGRAM

The Family Farm Development Service will give grants to individual organizations, colleges and universities, agencies of a state or local government and other federal agencies to conduct research concerning the development and maintenance of small and moderate-sized family farms—primarily for small farms with gross sales under $30,000 and moderate-sized farms with gross sales of less than $100,000. This research shall include the following matters:

(1) Analysis of the situation leading to the decline in farm numbers—causes of the trend (economic, social, and other) ways to reverse trend, statistics on present farm sizes and numbers, analysis of the relationship between rural economic stability and reduction in numbers of farmers;

(2) Surveys to determine who are beneficial and nominal owners of land and an analysis of trends regarding land ownership;

(3) Ways to enhance the lifestyle of small and moderate-sized family farmers, including community services;

(4) Development of energy efficient, appropriate farm techniques and technologies that are low-in-cost, environmentally protective, such as utilization of solar, wind, water, waste products, and improved soil and water conservation;

(5) Analysis of costs/benefits of these various technologies in comparison to currently used systems and deveopment of means by which to apply these methods on the farm;

(6) Ways to increase and improve nutrient levels of the soil, increase soil productivity, reduce nutrient runoff and water pollution from farming;

(7) Benefits of increasing humus content of the soil—costs/benefits; water retention; food quality; effects on soil erosion, pest control, necessity for irrigation;

(8) Methods to increase humus methods in soil, i.e., composting, cover cropping;

(9) New and improved methods of biological and integrated pest control;

(10) Development of closed-nutrient cycle models for small farms and a cost-benefit analysis;

(11) Studies of agricultural methods in other countries and ways they could be applied to us farmers;

TITLE VIII: EDUCATION, TRAINING AND DEMONSTRATION PROGRAMS

This title contains new programs and amends old programs to change the emphasis of existing education and demonstration programs. These include the following:

(a) Broadening the small farm extension program (often called the "para-professional program") to apply it in every state to help small farmers with financial, managerial, credit, bookkeeping marketing, conservation, and choices of cropping assistance which will help lower costs. This assistance shall include providing information and training on pest control, new crops and better machinery, etc. The para-professionals hired to do this shall be mostly local people, and preferably consist of small farmers themselves.

(b) Establishing Farm Demonstration and Training Centers in each state, located in rural areas, to help train new farmers in improved methods of small and moderate-sized farming and simultaneously demonstrate the new methods and technologies being researched which are energy-efficient, low-in-cost, and environmentally protective.

These Centers shall be managed by the agency, group or individual in each state whose proposal is approved by the Family Farm Development Service and funded by the service.

Instruction to students will include all basic skills needed to operate and manage a small family farm—bookkeeping, machinery repair, carpentry, livestock and crop production, soil and water maintenance and protection, etc.—utilizing those new methods and technology which are energy-efficient, low-in-cost and ecological.

Tours of these Centers and demonstrations shall be provided to farmers and interested groups on a regular basis; reports on costs, energy-savings, soil erosion and quality, and other pertinent statistics of the Centers' operation shall be prepared annually.

(c) Training one USDA agent per state to help instruct small and family farmers in installing and operating appropriate technology;

(d) Establishing a new USDA program to instruct and demonstrate biological and integrated pest control methods, and soil and water conservation methods to family farmers; also to instruct methods to increase soil humus content of soil;

(e) Authorizing new USDA program called the "Apprenticeship Program" to establish a system to help farmers needing workers, and young people wishing to learn how to farm, contact, each other. If an apprentice works for 3 years, this then counts as eligibility for a young farmer loan program to buy and operate a farm.

TITLE 9

The Secretary of Agriculture is authorized to establish regulations by which retail stores shall display signs under all major food commodities which compare the "unit price" to the price received by the farmer for the food value within that community.

Through this mechanism consumers will be able to see the percentage of the price they are paying for the commodity that the farmer received for his product.

HOME HEALTH CARE LEGISLATION TO REDUCE UNNECESSARY INSTITUTIONALIZATION OF THE AGING

The SPEAKER. Under a previous order of the House, the gentleman from Florida (Mr. PEPPER) is recognized for 5 minutes.

Mr. PEPPER. Mr. Speaker, I am today introducing legislation which can take us a long way toward our goal of improved health care for older Americans. I am joined by two of my colleagues on the Select Committee on Aging, which it is my privilege to chair, Representative WILLIAM S. COHEN, who serves very ably as Ranking Minority Member of the Subcommittee on Health and Long-Term Care, which I also chair, and Representative HAROLD E. FORD, who serves with great distinction as a member of our subcommittee as well as the Ways and Means Subcommittee on Health.

The bills we offer seek to implement recommendations adopted by the committee in 1976. They are simplified, refined versions of legislation I introduced at the beginning of the 95th Congress with broad bipartisan cosponsorship as part of a "legislative package for the elderly."

The first, the "Medicare Home Health Amendments of 1978" seeks to remove several restrictive requirements which prevent many older and disabled persons from receiving home health benefits under Medicare—benefits which they need and to which they are entitled. The second, the "Home Health Clearinghouse Act") addresses the insidious and pervasive problems of proliferation and fragmentation which prevent the effective delivery of in-home services.

MEDICARE HOME HEALTH AMENDMENTS OF 1978

Since its establishment, the Select Committee on Aging and its Subcommittee on Health and Long-Term Care have devoted a great deal of time and attention to the need for a coordinated system of health and social services for the elderly. This simply just does not exist under our current health care programs.

Medicare, the health insurance program for the aged, is a crisis management system. It provides assistance in meeting the costs of hospital care and some degree of rehabilitative care in skilled nursing facilities and home health care, but for the most part, the system is built around hospital stays and direct services by physicians. Its acute, episodic illness orientation denies assistance where the elderly need it most—in health maintenance and treatment of chronic disease. Elderly citizens pay more now for health care than they did before medicare was enacted more than a dozen years ago.

It has been estimated that some 8.5 million of the almost 23 million elderly Americans suffer from some form of chronic impairment. Almost one-fifth are limited in mobility, while over two-fifths experience limited activity as a result of chronic disability. The incidence of chronic disability among the elderly is greater than twice that of any other age group. Despite this fact, chronic illness is effectively ignored in the current medicare reimbursement structure.

As an early and ardent supporter of medicare, I am well aware that it has been a godsend for millions of Americans. But at least 17 days of hearings by our committee have demonstrated the weaknesses which plague the program—shortcomings which prevent medicare from providing care where it is needed most.

Dr. Stanley Brody of the University of Pennsylvania has aptly observed:

While the aged have need for acute medical care, their major requirement is in the continuum of services for the chronically disabled that will enable them to function optimally. Any health system which continues to be limited to a disease orientation will not meet the increasing needs of the aging community. Medical services must take their place as a part—and only part—of the continuum of health care.

The current medicare program perpetuates an institutional bias, a bias which is costly, both in terms of dollars inappropriately spent, and more importantly, in terms of the quality of human life.

Chief among the goals of our committee is the development of a continuum of care, a network of services, both community-based, noninstitutional, and institutional services, which can meet the specific needs of older citizens and which acknowledges the changing nature of this need.

An established spectrum of services available in the community can prevent delayed entry into the acute care health system by promoting early detection and treatment. It can promote more efficient use of health resources and manpower. It can minimize dependency upon institutionalization for individuals whose needs call less for cure than for maintenance and rehabilitation. It can help to remedy the neglect of millions of older Americans whose needs for care do not conform to the artificial, institution-biased, reimbursement structure.

The network we envision would include day care programs, multipurpose senior centers, outpatient clinics, and other community-based programs, as well as long-term care facilities.

At the heart of this network should exist a well-developed program of home health services—medical-social services provided in the home, where older persons are most comfortable and where families and friends remain the basis of a supportive environment.

The need for greater attention to home health care has been clearly demonstrated in hearings before our committee. In our 1976 report entitled, "New Perspective in Health Care for Older Americans," the committee pointed to a 1975 study contracted by the Department of Health, Education, and Welfare which indicated that between 14 and 25 percent of the approximately 1 million institutionalized elderly may be "unnecessarily maintained in an institutional environment."

A 1972 General Accounting Office report observed:

There is a consensus among health care authorities that about 25 percent of the patient population are treated in facilities which are excessive to their needs.

Moreover, Dr. Robert Morris, of the Levinson Gerontological Policy Institute at Brandeis University, testified that unnecessary institutionalization ranges as high as 40 percent, depending on the part of the country studied.

The National Council of Senior Citizens has estimated that one out of six noninstitutionalized older persons needs health and social services in order to remain in their own homes. Our own 2 to 3 million noninstitutionalized elderly persons are bedfast, homebound, or have difficulty getting outdoors without assistance.

The need is great, Mr. Speaker. And we have the ability to address it effectively. But current restrictions make it extremely difficult for older persons to obtain home health benefits under medicare.

In order to obtain home health care, under part A (hospital insurance), an elderly or disabled person must have had a hospital stay of at least 3 days; he or she must be "homebound" and require "skilled" care that is directly related to the spell of illness for which he or she was hospitalized to be eligible for any in-home care; the care must be prescribed by a physician; and visits are limited to 100 per spell of illness.

Under part B no hospitalization is required, but the "homebound" and "skilled" requirements must nevertheless

be met. Visits under this part, medical insurance, are limited to 100 per calendar year.

These requirements are so restrictive, in many cases, that older persons who need some form of in-home care are unable to benefit at all. The result, too often, is needless institutionalization.

Mr. Speaker, the call for increased home health benefits is loud and clear. In October of last year, the Department of Health, Education, and Welfare conducted a far-reaching "outreach" effort to obtain views and recommendations from the public regarding National Health Insurance. Through public hearings, small meetings, and written comments, thousands of individuals expressed their views. In its National Health Insurance National Outreach Report, the Department noted many of these comments. The report states, for example:

There was very strong support for expanded coverage for home health services.

In a section regarding reform of the health delivery system, the Department noted:

It was stated that the current lack of home health services forces individuals to seek out less humane and costly long term care facilities. Home health services were also seen as contributing to the preservation of the extended family.

According to the report, some regions reported the feeling that home health care and outpatient care should be the norm and institutionalization or hospitalization only a last resort.

Further along in the report, the Department notes:

While priorities for supporting specific programs varied from region to region, a number of special services were consistently advocated.

Not surprisingly, home health care is listed first. Continuing, it was noted:

Comprehensive home health care services both to shorten and prevent institutionalization, especially of the elderly, were highlighted in several regions.

Finally, the report observes:

The elderly want to remain full members of society, living in their own homes and many would be able to do so if reimbursement were available for supportive home services. Many felt that the stringency of Medicare requirements make less desirable and more costly institutionalization the only affordable alternative.

Mr. Speaker, the elderly have told us, time and time again: They want to remain at home, in their own communities, among their friends and families.

It is time that we listen. Hopefully the administration will listen to these pleas when a national health insurance proposal is drafted. But we cannot wait for national health insurance, and we need not wait.

The legislation we introduce today would make several changes in the medicare home health benefit structure. This proposal reflects the most affordable and the most often called for changes in the current program. It would remove the prior hospitalization requirement in part A; eliminate the requirement in both parts A and B that a patient be "homebound" in order to qualify; delete the visit limits in both parts A and B; and add homemaker and periodic chore services to the list of covered services.

Early last month, the General Accounting Office released a report which was prepared as a result of a request I made in August of 1976. This report gives us important evidence that a wide range of home health services can be as economical in terms of dollars as it is in terms of the quality of life.

The GAO concluded:

Until older people become greatly or extremely impaired, the cost of nursing home care exceeds the cost of home care including the value of the general support services provided by family and friends.

This is an important conclusion for several reasons. First, the GAO did what few, if any, have done thus far: It computed the dollar value of the services provided by friends and families, in addition to the home health care that is paid for by public agencies. It concluded, using this formula, that only when an older person becomes greatly or extremely impaired does the cost of home care exceed the cost of institutional care.

The GAO noted that only about 17 percent of those over 65 are greatly or extremely impaired. Of these, some one-third are in institutions. Those most likely to enter institutions are the greatly or extremely impaired who live alone. Of the 17 percent who are greatly or extremely impaired, 31 percent live alone; 76 percent of these persons enter institutions.

The GAO was not suggesting that institutional care may be desirable for those who are greatly impaired; on the contrary, it has recommended that the 200,000 public service jobs intended to provide home services under the President's welfare reform proposal be directed at these, who are most vulnerable to institutionalization.

The report was most helpful in describing the elderly population who could benefit from home health care, but it also refutes the contention that we cannot afford to expand home health coverage. At my request, the GAO report calculated the projected costs, estimated by Social Security Administration actuaries, of eliminating certain medicare restrictions. The results were revealing. The projected fiscal year 1978 cost of eliminating the home visit limit, for example, is $12.5 million, or a 2-percent increase in home health benefits costs. The cost of eliminating the prior hospitalization requirement would also be $12.5 million. To do away with the requirement that patients be homebound would cost $92.5 million, according to this estimate, and to add homemaker and chore services would cost some $75 million.

It is difficult to estimate with any precision what the overall cost-saving might be in the short term. In my view, the most telling evidence will come over a few years, when we are able to observe reduced numbers of unnecessary hospital and nursing home placements.

But one thing we know with certainty, the institutional bias that colors our current programs means that the vast majority of elderly citizens are not receiving the kinds of care they need. In fiscal year 1976, only some 1 percent of the $3 billion spent by medicaid for persons over 65 was spent for home health care, as compared to the 70 percent that went for care in long-term care facilities. Only about 10 percent of medicare part A funds paid for home health care, and only some 1 percent of part B funds paid home health bills. We cannot continue to invest this disproportionate share of the scarce health dollar in nursing home care for those who do not need or wish it.

The proposal we offer goes to the heart of the GAO report. We contend, as does the GAO, that institutional care is not the only financially feasible way of caring for elderly persons. But no study can estimate the real savings provided by home health alternatives. The cost of needless institutionalization cannot be measured merely in dollars; it must also be measured in terms of its effect on the quality of human life. The human cost involved in tearing elderly persons from their homes and their communities is incalculable.

We must delay no longer. We must make these changes not only because they hold the promise of saving money, but because it is the right thing to do.

"HOME HEALTH CLEARINGHOUSE ACT"

The second bill we propose, Mr. Speaker, addresses another recommendation of our committee, and it speaks to a problem brought out in the GAO report—the proliferation and fragmentation of current home health programs.

Some form of home health benefit is now available under at least eight Federal programs, including titles XVIII (medicare), XIX (medicaid), and XX (social services) of the Social Security Act; the Public Health Service Act program of home health demonstration grants and training; titles III and VII of the Older Americans Act; the senior companion program and retired senior volunteer program under title II of the Domestic Volunteer Service Act; and older American community service employment program, senior opportunities and services under the Community Services Act.

The proliferation and fragmentation of Government and private programs serve to prevent many citizens from receiving benefits to which they are entitled. Time and again, hearings conducted by our subcommittee brought to light the difficulties experienced by older persons who endeavor to obtain information on the health programs available to them.

We propose to establish, within the Department of Health, Education, and Welfare a clearinghouse to disseminate information concerning the various public and private agencies which provide home care and related services to the elderly.

It would collect information on Federal, State, local, and private services and assist in information referral to organizations, agencies, and private individuals.

Under our proposal, the clearinghouse would establish a computer system to gather pertinent information from local Social Security Administration offices and other public and private agencies which provide services for the elderly.

The Secretary of HEW would be required to insure the fullest possible utilization of existing computer systems within the department.

Moreover, the Secretary would be instructed to consider the existing functions of area agencies on aging and social security offices, and, if appropriate, locate the clearinghouse in these offices.

The clearinghouse established by this bill would be required to keep an up-to-date publication describing services and benefits, eligibility criteria for each service, and how the services may be obtained. In addition to feeding into the social security offices which already have computer systems, the following locations would also be considered for computer linkages: area agencies on aging; local welfare offices; senior centers; and other public or voluntary agencies.

The system we envision would produce virtually instantaneous information, while protecting the privacy of the beneficiary. Necessary information, without the beneficiary's name, would be given to the computer and a printout would be made of the Federal, State, and local outpatient and home health benefits to which that person is entitled, names of persons to contact with regard to benefits, and hopefully a list of benefits from voluntary agencies, as well.

Mr. Speaker, these steps are long overdue. It is my hope that the committees with jurisdiction will act expeditiously to bring these proposals before the House.

VETERANS' AFFAIRS COMMITTEE TO HOLD HEARINGS ON OVERALL PENSION PROGRAM FOR NON-SERVICE-CONNECTED VETERANS

The SPEAKER. Under a previous order of the House, the gentleman from Mississippi (Mr. MONTGOMERY) is recognized for 5 minutes.

Mr. MONTGOMERY. Mr. Speaker, I am pleased to announce that the House Veterans Affairs Subcommittee on Compensation, Pension and Insurance will hold hearings February 7, 8, and 9 on the overall pension program for our non-service-connected veterans. The focal point for the hearings will be the Veterans and Survivors Pension Improvement Act of 1978, which I introduced last November. We will also be considering other legislation of a similar nature introduced by our colleagues.

World War I veterans have continued in their support of a service pension and at the same time there has been a groundswell in the Congress for pension reform which would solve the problem of reducing VA pensions for all veterans and survivors as a result of increases in social security.

My bill is designed in such a way that it will solve the social security adjustment dilemma, and it will also raise the basic level of support for eligible veterans and survivors well above the poverty level. The bill also provides for automatic cost-of-living increases every year without the necessity of congressional approval as is the case currently.

Mr. Speaker, as my colleagues probably remember the last Congress passed Public Law 94-432 mandating that the Veterans' Administration analyze and evaluate the veterans pension program, develop legislative recommendations and cost estimates for its reform. The law required that the study be submitted to Congress no later than October 1, 1977.

Unfortunately, the VA did not submit the report as required by law until 4 months after the deadline passed. I finally received the report January 30 of this year. Also unfortunately, this 2-inch thick study does not contain what the law specifically required: legislative recommendations and their costs. I am most concerned that the VA did not address the cost estimates as they were clearly required to do by law and I am further concerned that the VA budget which was submitted to Congress a few days ago allowed only $111 million for pension improvement—a pittance considering the need.

Mr. Speaker, with or without the help and cooperation of the Veterans' Administration, our committee will provide needed reform of the veterans pension program. We ask each Member of the House to consider this problem with us and to share his or her thoughts during our studies.

NATIONAL PRAYER BREAKFAST

The SPEAKER. Under a previous order of the House, the gentleman from Indiana (Mr. CORNWELL) is recognized for 5 minutes.

Mr. CORNWELL. Mr. Speaker, this morning I attended my first national prayer breakfast. I left feeling wiser and with a sense of comfort and security that I had never felt before. I was particularly moved by the very deep and highly inspirational message of Max Cleland, Administrator of the Veterans' Administration. Mr. Cleland recounted to those in attendance, his life, and its processes and failures. His success as an Army officer in Vietnam and his disheartening return as a battered triple amputee. His successful bid for the State Senate of Georgia, and then his defeat in a political bid for Lieutenant Governor of Georgia. And now as head of the Veterans' Administration and the spiritual strength he must call upon to correct the inadequacies of that Administration.

I am not an active religious person. But the message of all of those who spoke—Congressman BEDELL, Congresslady JORDAN, Senator ALLEN, Senator LUGAR, Judge Sirica, General Wilson, and President Carter, told me that I too must see that my strength is not only in the presence of a physical human body. But that there is an entity more supreme and more right than am I. Max Cleland only confirmed this unusual but comforting sensation. As a veteran of the Vietnam conflict I often found it necessary to communicate with Christ. But when the conflict passed and I returned to the security of U.S. soil, I lost that need to keep in touch with Christ. This morning's program has shown me that I cannot turn on and off this need as I would a light bulb. It is a daily happening, painless but morally profitable and in no way embarrassing as I have sometimes felt it to be.

My thanks and my prayers to those who today have taught me a great lesson.

LEGISLATION IS INTRODUCED TO REVERSE PROPOSED TREASURY ACTION ON DEFERRED COMPENSATION PLANS

The SPEAKER. Under a previous order of the House, the gentleman from Louisiana (Mr. WAGGONNER) is recognized for 10 minutes.

Mr. WAGGONNER. Mr. Speaker, I am introducing today a bill to reverse proposed Treasury action that would seriously impact the public employees of my State and the public employees of 30 other States. My bill requires the Treasury to issue regulations consistent with longstanding Internal Revenue Service actions upon which my State and the States of many of my colleagues have relied.

Pursuant to State statute, Louisiana adopted and authorized the State of Louisiana Deferred Compensation Commission to establish and administer a deferred compensation plan for all public employees of my State. I understand that at least 30 other States have similar plans or have enacted legislation providing for such plans.

On January 17, 1977, the Internal Revenue Service issued a favorable ruling with respect to Louisiana's plan. In specific reliance upon this ruling and other Treasury and Internal Revenue Service pronouncements, Louisiana undertook full scale implementation of this plan. In the short period of time that enrollment procedures have been ongoing, almost 3,000 employees of my State have enrolled and are realizing the benefits of this plan.

Mr. Speaker, these plans, of which Louisiana's is typical, allow the State's employees to defer part of their salary to provide for their retirement. The amounts deferred are not taxed to them in the year deferred. When paid upon retirement, such amounts are then taxed as income to the participant. In these days of increasing concern over the availability of adequate income during the retirement years, such plans should be encouraged, not discouraged.

From my State's viewpoint, its plan offers ease of administration, encouragement of voluntary savings for retirement and at no additional cost to the State. Louisiana employees are offered a practical method of aiding in providing for their eventual retirement. Everyone benefits by these type plans.

Let me emphasize that the Louisiana plan is nondiscriminatory and experience with the Louisiana plan indicates that it is not utilized as a tax shelter for the highly compensated. To the contrary, it is utilized by employees at all salary levels. In fact, 80 percent of the

participants in my State's plan earn less than $20,000 yearly.

The legislation I have introduced today simply reiterates what until now has been the continuous and consistent Treasury and IRS policy toward these plans. That policy needs to be continued. With this legislation, the public employees of Louisiana and the employees of other States which have adopted such plans, will be able to more fully plan for their retirement.

The following States have public employee deferred compensation plans currently in operation or have adopted legislation providing for such plans. Additionally, there are any number of municipalities which have deferred compensation plans in operation or contemplate implementing them.

Alabama, Alaska, Arizona, California, Connecticut, Delaware, Florida, Idaho, Illinois, Indiana, Kansas.

Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, North Carolina.

North Dakota, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Wyoming.

PARTIAL CORPORATE INTEGRATION—RELIEF FROM DOUBLE TAXATION OF DIVIDENDS

The SPEAKER. Under a previous order of the House, the gentleman from Oregon (Mr. ULLMAN) is recognized for 10 minutes.

Mr. ULLMAN. Mr. Speaker, today, I am making a proposal that would represent a start toward eliminating the double taxation of dividends. I will ask the Committee on Ways and Means to consider this proposal along with President Carter's tax reduction and reform program, and I hope that witnesses will address themselves to it during the committee's hearings on the subject.

Many of us are concerned that the current system of double taxation of dividend income reduces business investment, causes distortions in the capital markets, creates a dangerous bias toward debt financing over new stock issues, and encourages the unnecessary retention of earnings. My proposal would be a modest, but important start toward making corporate finance more efficient and more responsive to the country's need for increased capital formation. More investment will lead to increases in both employment and wages.

Under existing law, corporate income is subject to two income taxes. Corporate taxable income is subject to a tax rate of up to 48 percent. When this corporate income is distributed to individual shareholders as dividends, it is subject to another tax at the individual level at tax rates up to 70 percent. Thus, there is double taxation of corporate income paid out as dividends. In contrast, earnings retained by the corporation, while they are taxed once at the corporate level, are not taxed at all at the shareholder level except to the extent they raise the value of the stock and result in recognized capital gains.

Under my corporate integration proposal, shareholders would receive a tax credit equal to a percentage of their dividend income—initially 10 percent but increasing over a 6-year period to 20 percent. They would include this credit in their gross income. This shareholder credit would, when fully phased in, eliminate almost 22 percent of the current double tax on dividends.

First. Capital formation.—The double tax on dividends significantly increases the cost of funds for corporate investment financed by new issues of stock. As a result, corporations undertake fewer investments than they otherwise would. More investment is needed in the economy to create high-paying productive jobs for our work force.

Second. Bias toward debt financing.—A strong tax incentive encourages corporations to use certain sources of funds and to avoid others. In particular, current law makes debt financing more appealing than new issues of common stock, because interest payments are deductible and dividends are not. More use of debt increases the risk associated with corporate financial structures because firms must meet higher fixed payments for interest and face greater risk of bankruptcy. In my opinion, this distortion in corporate finance is a major cause of our inadequate economic performance in the past decade.

Third. Bias toward retained earnings.—The existing tax laws also encourage corporations to retain earnings in order to avoid the double tax on dividends. By encouraging the use of retained earnings as a source of equity financing rather than new issues of stock, the double taxation of dividends bias the allocation of capital in favor of those firms that are already earning income and against new businesses. This tax incentive for earnings retention may also be a major cause of corporate mergers and takeovers.

Fourth. Tax equity.—In an equitable tax system, all income would be taxed only once. The double taxation of dividends clearly violates this principle, and reducing double taxation is the most equitable and progressive way of encouraging capital formation.

Fifth. Tax preferences.—Under my integration proposal, shareholders would generally only be able to receive a credit to the extent corporations actually paid U.S. Federal income tax. I plan, however, to make some exceptions from this general rule during a transitional period to give corporations time to adjust to the new system. This aspect of integration will discourage corporations from using tax preferences as much as they have in the past, and thus integration will lead to a more uniform system of corporate taxation.

I do not intend integration to be a substitute for other corporate tax reductions or to be contingent on enactment of any offsetting tax increases. My integration program is designed to have a modest initial revenue impact—about $1½ billion—so that there is no need for any trade-offs.

I insert in the RECORD a summary and explanation of my integration proposal.

PARTIAL CORPORATE INTEGRATION—RELIEF FROM DOUBLE TAXATION OF DIVIDENDS

SUMMARY OF PROPOSAL

Under present law, income earned by a corporation is taxed at corporate tax rates of up to 48 percent. This corporate income is again taxed when distributed as dividends to individual shareholders at tax rates ranging from 14 to 70 percent. However, each individual is allowed to exclude from gross income the first $100 of dividends received.

Under my integration proposal, for 1979 and 1980, shareholders would receive a tax credit generally equal to 10 percent of their cash dividends. This credit would be increased by an additional 2 percentage points a year beginning in 1981 up to a credit of 20 percent for cash dividends received in 1985 and thereafter. This shareholder credit, in effect, refunds to eligible shareholders a portion of the corporate income tax associated with corporate earnings from which the dividend was paid, and in that way it eliminates a portion of the double taxation of dividends.

Shareholders receiving dividends would include in their gross income the amount of cash dividend received plus the amount of their shareholder credit. They would be allowed to treat the amount of the shareholder credit as a payment against their Federal income tax liability.

The following example illustrates how the proposal affects individual shareholders:

Under present law, individual shareholders A and B each compute their marginal Federal income tax liability attributable to their dividends received as follows (the example disregards the dividend exclusion):

	Shareholder	
	A	B
Dividend income ($10 × 10 shares)	$100	$100
Tax rate (percent)	20	60
Tax liability on dividends	$20	$60

Under the proposed credit, the tax computation would be as follows:

	Shareholder	
	A	B
Dividend income ($10 × 10 shares)	$100	$100
Gross-up by amount of shareholder credit ($100 × 10 percent)	10	10
Dividends included in gross income	$110	$110
Tax rate (percent)	20	60
Tax on dividends before credit	$22	$66
Shareholder credit	10	10
Tax on dividends after credit	$12	$56
Tax reduction from present law	$8	$4

Note that the tax reduction is higher for the low-bracket shareholder than for the shareholder in the high bracket. This illustrates that integration is a relatively progressive way to reduce corporate taxes.

Under the proposal, the shareholder credit would only reflect corporate income taxes actually paid to the U.S. Treasury. However, there would be some exceptions to this general rule during a transitional period to give corporations time to adjust to the new system. If a corporation has not paid enough tax to justify the full 10-percent credit, it

would be given the choice of either declaring a lower rate of credit for its shareholders or of paying an additional withholding tax.

GENERAL EXPLANATION

Present law

Under present law, income earned by a corporation is taxed at the corporate level at tax rates up to 48 percent. This corporate income is again taxed when distributed as a dividend to individual shareholders at individual tax rates ranging from 14 to 70 percent. In order to relieve a portion of this double tax, each individual is given an exclusion for the first $100 of dividends.

General proposal

Under the proposal, starting in 1979, eligible shareholders would receive a tax credit generally equal to 10 percent of their cash dividends. This shareholder credit would increase by 2 percentage points a year starting in 1981 to a total credit of 20 percent of cash dividends paid in 1985.

For any corporation, credits allowable to its shareholders would be limited to the amount in a "shareholder credit account." This account would initially equal 10.83 percent of the U.S. Federal income taxes actually paid by the corporation.[1] However, there could be certain additions to the account during a transitional period. The 10.83 percent figure would increase in 1981 and subsequent years as the rate of the shareholder credit increased from 10 to 20 percent.

Whenever allowable shareholder credits would otherwise exceed this limitation, corporations would be given the choice of either paying a shareholder withholding tax to the Treasury, which dollar for dollar would be treated as additional shareholder credits or of electing a lower rate of shareholder credit for their shareholders.

Shareholders receiving dividends would include in their gross income the amount of any cash dividend received plus the amount of their shareholder credit. They would be allowed to claim the amount of the shareholder credit against their Federal income tax liability. Shareholders would be allowed to claim a refund if this credit exceeded their income tax liability.

The current $100 dividend exclusion could be phased out during a transitional period.

Shareholder credit account

Each corporation would maintain a "shareholder credit account" on its books. At the close of each taxable year a corporation would add a certain percentage of its Federal income tax liability (net of all allowable tax credits) to its shareholder credit account. The percentage of a corporation's tax liability that would be added to the shareholder credit account would be fixed by statute as follows:

Percentage of corporate tax liability added to shareholder credit account

Taxable years beginning in:	Percent
1979	10.83
1980	10.83
1981	13.00
1982	15.17
1983	17.33
1984	19.50
1985 and thereafter	21.67

[1] The 10.83 percent figure is derived as follows: With a 48-percent tax rate, $100 of before-tax corporate income yields $52 in after-tax income. A credit of 10 percent of the cash dividend equals $5.20, which is 10.83 percent of the $48 corporate tax liability. This explanation assumes the 48-percent maximum statutory rate of existing law. No inference is intended about the possibility of Congress' reducing that rate, and any such reduction would require a change in the 10.83 percent figure.

These percentages would have to be changed if Congress enacts a cut in the maximum statutory corporate tax rate.

At the close of each of its taxable years, the corporation would subtract from its shareholder credit account the total amount of the shareholder credits it declared for the benefits of its shareholders for the year. Unless the corporation elected a lower rate, this would initially be 10 percent of cash dividends paid. Any amount remaining in the shareholder credit account after these adjustments would be accumulated in the account and carried forward to future taxable years.

This accounting mechanism is necessary to ensure that the shareholder credit is based upon corporate taxes actually paid. However, certain adjustments could be made during a transitional period to permit a larger shareholder credit even though a corporation may not have paid enough corporate tax to justify the statutory shareholder credit.

Foreign tax credits

The Secretary of the Treasury would have the authority (within certain limits) to allow corporations to add a portion of foreign tax credits to the shareholder credit account as a result of tax treaties with foreign governments.

Corporate election

The corporation would be required to elect the rate of shareholder credit applicable to all dividends paid during the taxable year prior to the first dividend distribution made during the taxable year.

Shareholders eligible for the tax credit

All U.S. citizens and individual resident aliens would be permitted to claim the shareholder credit.

Shareholders not eligible for tax credit

a. Tax-exempt shareholders—

Tax-exempt shareholders would not be permitted to claim the shareholder credit on dividends they receive from U.S. corporations except to the extent such dividends are taxed to them as unrelated business income. For these purposes, tax-exempt shareholders would include qualified pension and profit-sharing trusts.

b. Foreign shareholders—

Foreign shareholders of U.S. corporations would not be permitted to claim the shareholder credit on dividends they receive from such corporations. However, the Secretary of the Treasury would have the authority to grant such treatment through tax treaties with foreign governments.

Corporate shareholders

Under current law, corporations are generally entitled to a deduction equal to 85 percent of the amount of dividends received from U.S. domestic corporations. A 100-percent dividend received deduction is allowed for dividends received from small business investment companies and from members of an affiliated group.

Under the proposal, corporations would still be entitled to the dividends received deduction. However, corporations would not be entitled to claim the shareholder credit on dividends received from other corporations. Instead, corporate shareholders would be permitted to add the shareholder credit otherwise allowable to its shareholder credit account. These additions to the shareholder credit account would be available as credits to the individual shareholders of the corporate shareholder when the corporation's dividend income is distributed.

Corporate distributions eligible for shareholder credit

The shareholder credit would be given only with respect to cash dividends that under State law are legally declared and paid, and that are classified as dividends under the Internal Revenue Code. Thus, the shareholder credit would not be given with respect to redemptions, constructive dividends, or other corporate distributions which are not paid from earnings and profits. Special rules will be developed for other corporate transactions, such as liquidations and reorganizations.

Net operating losses

Under present law, a net operating loss may be carried to, and allowed as a deduction in, the three immediately preceding taxable years and the seven taxable years following the year in which the net operating loss arose. A taxpayer may, however, elect not to carry the loss back to preceding years.

Under the proposal, if a net operating loss is carried back and applied against an earlier year's taxable income, the corporation would be required to adjust its shareholder credit account to take account of its reduced tax liability for the prior year. If, after making this adjustment, the corporation has a negative balance in its shareholder credit account for any taxable year, it would be required to pay a shareholder withholding tax equal to the negative balance.

Audit adjustments and amended returns

Any adjustments to tax liability for the corporation's previously filed tax returns made by an amended tax return or audit would require adjustments to the shareholder credit account. If the adjustment results in a native balance in the shareholder credit account, the corporation would be required to pay a shareholder withholding tax equal to the negative balance. The tax liability of any shareholder would not be affected by any such adjustments.

Timely reporting

Corporations would be required to report to shareholders by the end of February the amount of dividends paid during the preceding calendar year and the shareholder credit allowable with respect to those dividends.

Rules for specially treated entities

Special rules will be developed to clarify the treatment of the shareholder credit for estates and trusts, subschapter S corporations, insurance companies, mutual funds and other entities specially treated under the Internal Revenue Code.

Examples

Example 1—For its taxable year ended December 31, 1979, X Corporation has financial income of $100 on which it pays a Federal income tax of $48 ($100 taxable income times 48 percent Federal income tax rate).

As of the end of 1979, X places $5.20 ($48 tax liability times 10.83 percent) in its shareholder credit account. During 1979, X declares and pays a $20 cash dividend to its shareholders. The shareholder credit on this dividend will be $2 ($20 cash dividend paid times 10 percent). The balance in X's shareholder credit account after the payment of the $20 cash dividend is $3.20 ($5.20 minus $2.00) which may be carried over to 1980 and future years.

X's eligible shareholders will include $22 ($20 actual cash dividend received plus $2 shareholder credit) in their gross income for 1979, and will be entitled to a $2 shareholder credit against their personal income tax liability for 1979.

Example 2—For its taxable year ended December 31, 1979, X Corporation has financial income of $100 and has taxable income of $38.47 ($100 financial income less $61.53 of special deductions and exclusions. X pays a Federal income tax of $18.47 ($38.47 taxable income times 48 percent Federal income tax rate). During 1979, X pays a $20 cash dividend.

As of the end of 1979, X places $2 ($18.47 Federal tax liability times 10.83 percent) into its shareholder credit account. The share-

holder credit will still be $2 ($20 cash dividend times 10 percent). The balance in X's shareholder credit account after the payment of the $20 cash dividend would be zero ($2 put in the account minus $2 applied shareholder credit).

X's eligible shareholders will include $22 ($20 actual cash dividend received plus $2 shareholder credit) in their gross income for 1979, and will be entitled to a $2 shareholder dividend credit for 1979.

Example 3—For its taxable year ended December 31, 1979, X Corporation has financial income of $100, and has taxable income of $38.47 ($100 financial income less $61.53 of special deductions and exclusions). X pays a Federal income tax of $18.47 ($38.47 taxable income times 48 percent Federal income tax rate). During 1979, X pays a $30 cash dividend to its shareholders.

As of the end of 1979, X places $2 into its shareholder credit account ($18.47 Federal tax liability times 10.83 percent). Unless X elects a lower rate for its shareholders, their credit would be $3 (10 percent of $30 cash dividend). Thus, X would have to pay $1 ($3 shareholder credit less $2 in the shareholder credit account) of shareholder withholding tax to the U.S. Treasury. If, instead, X elected a lower shareholder credit rate of 6⅔ percent for its shareholders, the shareholders would be entitled to credits of $2, and the corporation would not have to make a withholding tax payment to the U.S. Treasury.

If X declared the lower shareholder credit rate of 6⅔ percent, its eligible shareholders would include $32 ($30 actual cash dividend received plus $2 shareholder credit) in their gross income for 1979, and will be entitled to a $2 shareholder dividend credit for 1979.

CONSUMER REPRESENTATION AND REORGANIZATION ACT OF 1977

The SPEAKER. Under a previous order of the House, the gentleman from Texas (Mr. BROOKS) is recognized for 5 minutes.

Mr. BROOKS. Mr. Speaker, next week the House is expected to consider legislation to create an Office of Consumer Representation (H.R. 9718). The text of this bill will be offered as an amendment in the nature of a substitute to H.R. 6805.

H.R. 9718 has been available to Members for study for the past 3 months. It makes significant changes in the committee reported bill. Under the substitute bill the powers vested in the OCR before the Federal Government and courts are no greater than those already available to business. To be sure, the OCR, under H.R. 9718, is empowered to intervene, to seek judicial review, to petition another agency to initiate an action within its authority, and to use a host agency's subpena powers during a formal-type proceeding. But, each of these powers is available to any business entity to precisely the same extent that they would be available to OCR.

Because opponents of H.R. 9718 persist in misrepresenting its clear meaning. I am joining with Mr. ROSENTHAL and Mr. HORTON in a further report on and explanation of the substitute, which we will include in the RECORD at this point:

CONSUMER REPRESENTATION AND REORGANIZATION ACT OF 1977

(Mr. BROOKS, Mr. ROSENTHAL and Mr. HORTON submitted the following report to accompany H.R. 9718)

On May 16, 1977, the Government Operations Committee reported to the Committee of the Whole House on the State of the Union, H.R. 6805, a bill to establish an agency for consumer protection. In response to expressions of concern over the nature and extent of powers vested to the administrator of the Agency by H.R. 6805, the principal sponsors of the bill and others fashioned an Amendment in the nature of a substitute (H.R. 9718) which made significant changes in the committee-reported legislation. On October 26, 1977, the Committee on Rules granted an open rule providing one hour of general debate and making it in order to consider the text of H.R. 9718 as an Amendment in the nature of a substitute for H.R. 6805.

SUMMARY AND PURPOSE

H.R. 9718, like the legislation for which it is a substitute, is designed to provide an institutional mechanism for the representation of consumer interests before Federal agencies and courts. The underlying premise of the legislation is that the "public interest" can best be served when Federal decisions of importance to consumers are made after all other interested parties—including consumers—have had an ample opportunity to be heard. There is incontestable evidence that in the overwhelming majority of such Federal agency proceedings, decisions are made after detailed testimony from business interests but without effective representation for consumer interests.

Just as the principles of "equal justice" and "due process" require that all parties to a judicial proceeding be adequately represented by counsel; the principles of "basic fairness" and "good government" require that each major interest group affected by a Government decision be effectively represented.

Although there are a number of vital differences between H.R. 9718 and the committee-reported bill, both share the following similarities:

Both bills would establish a non-regulatory agency in the Executive Branch to represent consumers before Federal agencies and courts, to develop and provide information to the public about consumer products and to serve as a clearinghouse for consumer complaints.

The consumer agencies created by both bills have no power whatsoever to regulate any business activity and no power whatsoever to tell any other agency or court how to decide consumer issues.

Both bills provide comprehensive safeguards against the disclosure of trade secrets and commercial and financial information. The consumer agencies established by both bills can be denied access to legally privileged information and information concerning national security, internal policy recommendations, personnel and medical files, etc. They can both be prohibited from publicly disclosing information obtained from another Federal agency if the information is declared, by another agency, to be exempt from disclosure under the Freedom of Information Act.

Both bills require that interventions and judicial review activities by the consumer office conform to the rules of practice and procedures of the host agency or the court.

DIFFERENCES BETWEEN H.R. 9718 AND H.R. 6805

H.R. 9718 differs in material ways from the committee-reported bill. The underlying difference is that under H.R. 9718, the powers vested in the OCR before the Federal Government and courts are no greater than those already available to business. To be sure, the OCR, under H.R. 9718, is empowered to intervene, to seek judicial review, to petition another agency to initiate an action within its authority, and to use a host agency's subpena powers during a formal-type proceeding. But, each of these powers is available to any business entity to precisely the same extent that they would be available to OCR. In fact, in one instance—where the OCR seeks to participate in an ongoing judicial review from a Federal agency's decision to which it was not a party or participant—the OCR's opportunity to secure judicial review is more narrow than that of a business non-party or non-participant.

Major differences between the two bills are enumerated below:

H.R. 9718 creates an Office of Consumer Representation (OCR) to represent consumer interests before Federal agencies and courts.

H.R. 9718 provides for a statutory reorganization which transfers the resources of 20 existing onsumer programs totaling $11.6 million to the new OCR and requires to cut an additional $10 million in consumer-related spending in the next budget request. As compared to the consumer office's FY 78 authorization of $15 million, a net savings of almost $7 million per year will result from the creation of a consumer office.

OCR would have no greater rights than those already enjoyed by advocates for business interests:

OCR itself would have no interrogatory powers. It could not require business to answer interrogatories or to file reports.

OCR would have no greater rights of judicial review from a Federal agency decision than any business entity. This equality of judicial review rights would extend both to instances where OCR was a party or participant in a proceeding and where it was not.

OCR would have no greater rights than any business entity to use a host agency subpena or other discovery powers during a proceeding.

OCR would be authorized to represent the interests of small business as consumers of regulated goods and services.

OCR would have no authority to set up product testing laboratories.

OCR would have no authority to set up regional offices.

OCR would be required to report to Congress on any rules or orders of a Federal agency found to be in conflict with or duplicative of those of another agency.

OCR would be required to report to Congress on the impact of intervention (including delays) on the effectiveness and efficiency of the regulatory process.

OCR would be required to notify the President 30 days in advance of its intention to seek judicial review of an Executive Branch, non-regulatory action.

SECTION-BY-SECTION STATEMENT OF DIFFERENCES BETWEEN H.R. 9718 AND H.R. 6805

SECTION DESCRIPTION	H.R. 6805	SUBSTITUTE (H.R. 9718)
1. Short Title	Consumer Protection Act of 1977 (p. 1)	Consumer Representation and Reorganization Act of 1977 (p. 1)
2. Sec. 2, "Statement of Findings"	Interests of consumer inadequately represented and protected within the Federal Government; such representation and protection essential to fair and efficient functioning of free market economy (pp. 1–2)	Adds: Consumer interests adversely affected when Government rules, regulations or orders are contrary to regulatory intent or are duplicative or conflicting in purpose or implementation; proper protection of con-

SECTION-BY-SECTION STATEMENT OF DIFFERENCES BETWEEN H.R. 9718 AND H.R. 6805—Continued

SECTION DESCRIPTION	H.R. 6085	SUBSTITUTE (H.R. 9718)
		sumer interests requires establishment of Office of Consumer Representation and reorganization of certain existing consumer programs (pp. 1–2)
3. Sec. 3, "Establishment"	Establishes independent Agency for Consumer Protection (ACP) within executive branch of Government (pp. 2–3)	Establishes independent Office of Consumer Representation (OCR) within executive branch of Government (pp. 2–3)
4. Sec. 4 "Powers and Duties of Administrator" (Annual report to Congress)	Subsection "(d)", (Annual Report to Congress), requires a statement of ACP activities, summary of consumer complaints received and evaluation of selected major consumer programs of other Federal agencies (p. 7)	Subsection "(d)", (Annual Report to Congress) adds: identification of and comments on any Federal agency rule, regulation or order found to be contrary to legislative intent or in conflict with or duplicative of a rule, regulation or order of another Federal agency; and Assessment of the impact of intervention by the Office and by others on the effectiveness and efficiency of the administrative processes of the Government (p. 7)
5. Sec. 6, "Representation of Consumers" (Judicial Review)	A. Subsection "(d)" (Judicial Review) provides the Consumer Agency with automatic "standing" to get court review of a Federal agency action when ACP did not intervene at the Federal agency level, unless the court chooses to find that judicial review would impede the interests of justice (p. 11)	A. Subsection "(d)" revokes the automatic standing of the Office to require judicial review when it did not intervene at the Federal agency level. Under the substitute, the OCR could get into court only "to the same extent and in the same manner" as any other person or business entity who did not intervene or participate at the Federal agency level. Additionally, the court would have to find that the agency action being appealed from "may adversely affect an interest of consumers," and, where the OCR sought to join an ongoing judicial review of a Federal agency action, "that the consumer interests would not otherwise be adequately represented in a judicial review of such action". Before the OCR could undertake an intervention which might lead to a judicial review request, it would first have to determine that the result of the Federal agency proceeding or activity may "substantially affect an interest of consumers". B. Paragraph (4) of subsection (d) imposes a new limitation on the OCR's judicial review authority: before the Administrator can seek judicial review of a Federal agency decision that is of a nonregulatory, policy type, the Administrator must notify the President 30 days in advance of his intention to seek such review. (p. 12)
6. Section 6, "Representation of Consumers" (use of host agency discovery powers)	Subsection "(g)" requires a host agency to issue subpoenas at the request of the Consumer Agency during a formal-type proceeding on a showing of general relevance and reasonable scope of the evidence sought (p. 13)	Subsection "(g)" equalizes the use, by the office and a private person, of a host agency's subpoena power during a formal-type intervention. It allows the use of another agency's discovery powers only "to the same extent, upon the same statement or showing and subject to the same requirements as are applicable to requests for such orders from any other intervenor or participant." (p. 13)
7. Section 9, "Research"		Prohibits the establishment, by OCR, of consumer products testing laboratories (p. 19)
8. Section 10, "Information Gathering"	Section 10(a) authorizes the ACP to issue interrogatories to and mandate reports from business entities regarding actions that may constitute consumer fraud, substantial economic injury or which may injure consumers (p. 18)	No authority to issue interrogatories to or mandate reports from any business or other entity.
9. Section 14, "Transfer of Programs, Operations, and Activities"	A. Requires the President to submit a Reorganization Plan to the Congress within 6 months of the date of enactment providing for the eventual transfer to the ACP of consumer programs which could more effectively be performed in the new agency and the abolition of those consumer programs which are ineffective. No dollar amounts specified.	A. Requires (1) the transfer to the Office of specified duplicative consumer programs totaling $11.6 million and (2) a FY 1979 administration request for a budget reduction of an additional $10 million in duplicative consumer programs (p. 26) B. Authorizes OMB to report to Congress on the consumer programs of any Government agency that duplicate or conflict with the OCR's functions (p. 29)
10. "Definitions"	Section 16, Definition of "interests of consumers" excludes concerns of small business.	Section 15(5) of substitute adds to the definition of the term "interests of consumers" any concerns of small business entities that are consistent with those of consumers. This allows the OCR to represent the interests of small business on matters such as freight rates, utility costs, enforcement of anti-trust laws, etc. (pp. 30–31)

SECTION-BY-SECTION STATEMENT OF DIFFERENCES BETWEEN H.R. 9718 AND H.R. 6805—Continued

SECTION DESCRIPTION	H.R. 6085	SUBSTITUTE (H.R. 9718)
11. "Termination"	Section 23 provided for ACP's termination on Sept. 30, 1982.	Section 22 contains a sunset provision specifying termination five years after the effective date of the Act and specifies a study and report to Congress by the oversight committees of the Congress and by the President on OCR's effectiveness. (p. 35)

EXPLANATION OF SECTIONS 6 AND 14 OF H.R. 9718

SEC. 6. ("Representation of Consumers"):

This section authorizes the Office of Consumer Representation to represent the interests of consumers in proceedings or activities of other Federal agencies and in actions pending before courts of the United States. The Office of Consumer Representation's authority to intervene as a party involves those proceedings conducted under the applicable sections of the Administrative Procedure Act, generally described as "formal" or "structured" proceedings. The bill also gives the OCR authority to participate or communicate in Federal agency proceedings and activities that are generally described as informal or unstructured. These may lead to formal proceedings or to final agency action where formal proceedings are not required. The Act permits the Administrator to "participate or communicate" in these "informal" activities or proceedings in any manner that any person may do so. This "participation" is not the same as "intervention", for generally there is no way to "intervene" in such activity. But the Administrator will be able to make his voice heard, and the agency must give his views full consideration in agency activities where it is important that consumer interests be considered. All intervention and participation by OCR must be accomplished without thwarting or obstructing the agency's normal operations. OCR may also initiate or intervene in a court review of an agency decision.

Section 6(a)—If the Administrator determines that a proceeding or activity of a Federal agency may substantially effect the interests of consumers, he may as of right intervene as a party or otherwise participate in a proceeding subject to special provisions of the Administrative Procedure Act (5 U.S.C. 553, 554, 556, or 557) or a proceeding conducted on the record after opportunity for agency hearing. In any other agency proceeding or activity, he may as a right participate or communicate in any manner that any person may so participate. In the latter case, the Federal agency is required to give full consideration to the submission of the OCR which shall be presented in an orderly manner without causing undue delay. In all cases, the OCR's intervention or participation shall be in accordance with the Federal agency's statutes and rules of procedure.

Section 6(b)—At such time as the OCR decides to intervene or participate in a proceeding he shall issue a public statement (and file a copy in the proceeding) stating concisely the interests of consumers to be protected.

Section 6(c)—With respect to any proceeding before a Federal agency which seeks primarily to impose a fine, or forfeiture which the agency may impose under its own authority, where it is the opinion of the OCR that the interests of consumers may be substantially affected, the OCR, may upon its own motion or at the request of the officer charged with presenting the case for the Federal agency or the United States, transmit relevant information or evidence. Furthermore, in the discretion of the agency or court, the OCR may appear as amicus curiae.

Section 6(d)—Judicial Review.—The OCR, only to the extent that any aggrieved person may have such a right, may institute a proceeding for judicial review or intervene as a party in such a judicial review of any Federal agency action in which the Administrator intervened or participated. Where the Administrator did not intervene or participate at the agency level the Administrator can seek the initiation of judicial review if the court finds that such agency action may adversely affect an interest of consumers; and, in the case of an intervention in an ongoing judicial proceeding, that the consumers' interests would not otherwise be adequately represented in a judicial review of such action.

The Administrator's institution of or intervention in a judicial review proceeding where he did not intervene or participate at the Federal agency level, is authorized only "to the same extent and in the same manner as any person not a party or participant. . . ." This requirement encompasses procedural and substantive tests. For example, if any person not a party of a participant is required, under the rules of practice and procedure of the host agency, to file a petition for rehearing or reconsideration at the agency level, then that same procedural requirement would be imposed on the Administrator of the OCR.

In the case of an intervention, by the Administrator, in an ongoing court proceeding, such intervention would be dependent on the court's conclusion that "the consumers' interests would not otherwise be adequately represented in a judicial review of such action." This requirement imposes a test to which private parties are not ordinarily subjected.

Because the OCR Administrator—prior to intervention—must find that the result of a Federal agency proceeding or activity may "substantially affect an interest of consumers", any request for judicial review would necessarily be premised on such a finding.

When decisions which result from Federal agency activities are of a nonregulatory, policy-nature (such as State Department decisions pertaining to an International Coffee Agreement), the Administrator's judicial review authority cannot be exercised without 30 days advance notice in writing to the President.

In any Federal agency proceeding which is subject to the Administrative Procedure Act or to any other statute, regulation or practice authorizing a hearing or which is conducted on the record after opportunity for agency hearing, the Administrator is authorized to request a Federal agency to issue, and the Federal agency shall issue, such orders as are authorized by the Federal agency's statutory powers, for the copying of documents, papers and records, summoning of witnesses, production of books and papers and submission of information in writing. The Federal agency's issuance of such orders at the request of the OCR is dependent on the OCR's ability to meet the procedural and substantive tests required by the host agency's rules of practice and procedure. The OCR's authority to request and receive information pursuant to the host agency's discovery powers is no greater than that available to any other intervenor or participant.

Sec. 14. ("Transfer of Programs, Operations, and Activities"):

This section specifies that all funds, records and property utilized in connection with 20 named Federal consumer entities shall be transferred to the Office of Consumer Representation within 120 days of the effective date of the Act. The total value of the transferred resources of these 20 entities is $11.6 million. This section also requires OMB to recommend to Congress in the President's fiscal 1980 budget an additional $10 million reduction in Federal consumer functions. The net effect of these transfers and reductions will be a savings to the taxpayer in the millions of dollars over the authorized annual cost of the OCR at the end of its first full year of operation.

LE FANTE URGES TIGHTER CONTROLS ON POISONOUS SUBSTANCES IN HUDSON COUNTY

The SPEAKER. Under a previous order of the House, the gentleman from New Jersey (Mr. LE FANTE) is recognized for 5 minutes.

Mr. LE FANTE. Mr. Speaker, I want to bring to the attention of my colleagues in the House a situation which must not be left uncorrected. Last spring, the U.S. Environmental Protection Agency discovered residue of the highly toxic substance polybrominated biphenyls (PBBs') in human hair, fish, water, and soil near one chemical plant in my district in Hudson County, and another in central New Jersey.

At my urging and that of my colleagues in the New Jersey congressional delegation, the EPA will hold a hearing tomorrow on proposed rules which will regulate and possibly ban the use of PBB's. I want to bring to your attention the testimony I prepared for the hearing and include it here in my remarks:

TESTIMONY BY REPRESENTATIVE JOSEPH A. LE FANTE

I would like to commend the Environmental Protection Agency for holding a hearing today on the need for control of the release of Polybrominated Biphenyls (PBBs) into the environment. This subject is one of great concern to me and to my constituents.

I represent Bayonne, New Jersey where the White Chemical Company is located. In the summer of 1977, E.P.A. announced that there had been possible contamination of the Bayonne environment by the toxic polybrominated biphenyls produced at White Chemical.

My constituents are extremely troubled about this situation and the eventual effect which it might have on their lives. While production of PBBs has stopped and no adverse reactions to the chemical have thus far been reported in New Jersey, the disastrous results of the direct ingestion of the substance by Michigan residents and the potentially adverse effects of the substance already established by scientists make it imperative that we investigate and document the short and long range impact of PBBs. It is also necessary that we establish controls on the production of this chemical until this impact can be determined.

I realize that there are difficulties in estimating the consequences of the dispersal of PBBs into the environment during the next

few years. The very nature of this substance—which can remain stable and persistent while stored in fatty tissues—has led many scientists to declare that the lingering effects of PBBs may not be evident for many years to come.

Already we know that PBBs have an adverse effect on the kidney, liver and thyroid of laboratory animals. Scientists have labeled PBB a suspected carcinogen. Certainly, these facts indicate that controls must be placed on the dispersal and disposal of PBBs.

Our first concern in deciding what these controls should be is the health and safety of those human beings who come into contact with the substance during its manufacture, use and disposal. These include workers in chemical plants, individuals who have ingested the chemical and eventually, those who have used products containing PBB.

In order to decide which types of control are necessary, we must identify the extent and magnitude of the PBB contamination which has taken place to date. We must also enforce the provisions of the Toxic Substances Control Act to prevent incidents like the PBB disasters from reoccurring. As early as 1970, two major chemical companies—Dow and Dupont Chemical—tested PBBs and decided against manufacture because of the potential health and environmental problems involved. These companies advised the Federal Government of the possible dangers of PBBs. Yet manufacture of the chemical was allowed to begin at Michigan Chemical in 1971.

The Toxic Substances Control Act, which was passed by the Congress in 1976 would have prevented this manufacture from taking place without further testing and regulation of this toxic substance, and the deleterious effects of PBB could have been studied before its manufacture.

Now it is not a question of prevention but one of cure. The release of PBBs into the New Jersey and Michigan environments is not an isolated incident, but part of a growing trend where toxic substances such as PBBs, PCBs and Kepone are being continually dispersed into the atmosphere. This is a trend which we can not allow to continue unchecked. Controls must be established for both the manufacture of and disposal of PBBs. If production of polybrominated biphenyls poses a serious threat to the lives and well being of humans, then we must ban the continued use of the substance. The hazards created by PBBs far outweigh any worth which they might have in production and manufacture. We must act and we must act quickly.

THE AGRICULTURE REFINANCE ACT OF 1978

The SPEAKER. Under a previous order of the House, the gentleman from Oklahoma (Mr. ENGLISH) is recognized for 5 minutes.

Mr. ENGLISH. Mr. Speaker, there is no Member of the House who is not aware that there is a serious problem facing America's agricultural producers. But many of my colleagues may not be aware of the extent of the crisis which is threatening the economy of our entire Nation.

The U.S. Department of Agriculture now estimates that more than 5 percent of America's family farmers—more than 1 in 20—are in immediate danger of bankruptcy. This alarming warning, combined with the fact that one-third of our gross national product is made up of agricultural production, makes it clear that immediate action is necessary to prevent a major disaster for our Nation.

Mr. Speaker, I am today joining with 34 of my colleagues from both parties, and from both urban and rural areas in reintroducing H.R. 10539, the Agriculture Refinance Act of 1978, which I first introduced last week. This legislation will provide those farmers facing bankruptcy with an opportunity to consolidate their agricultural indebtedness under a single Farmers Home Administration loan, and it will allow them to defer their first payment on the consolidated loan for up to 5 years, depending upon the nature of the loan.

Since Congress reconvened a few weeks ago, thousands of farmers from across the Nation have visited Capitol Hill asking us to provide help for their troubled industry. This legislation is designed to address the immediate and urgent needs of those most in danger of bankruptcy—an entire generation of young family farmers. H.R. 10539 will help preserve the future of family farming, while allowing farmers and legislators alike enough time to find a more permanent solution to the problems facing our agricultural community.

Mr. Speaker, I urge my colleagues from all areas of the country to join me in this vital effort, and I insert a copy of the Agriculture Refinance Act of 1978, and a fact sheet describing the legislation, be printed in the RECORD at the conclusion of my remarks.

Thank you very much.

The material follows:

MAJOR PROVISIONS OF CONGRESSMAN ENGLISH'S AGRICULTURAL REFINANCE ACT

(1) Qualified farmers and ranchers may obtain Farmers Home Administration financing to consolidate up to one million dollars in agricultural indebtedness incurred between January, 1973 and January, 1978. Only farmers unable to obtain credit elsewhere would be eligible for such a loan.

(2) Interest on the outstanding balance of the loan shall accrue annually at the rate of interest currently charged to the Federal Government.

(3) The first payment of interest and principle under the program shall be deferred according to the type of original indebtedness refinanced by the following schedule:

Real Estate Loans; deferred for five years.
Equipment Loans; deferred for three years.
Operating Loans; deferred for two years.

(4) The entire outlay under this program will be repaid with interest.

H.R. 10724

A bill to amend the consolidated Farm and Rural Development Act to provide an alternative method of financing the land, equipment, and operating expenses of qualified farm families, including young farmers, and to help provide the farm family with adequate standards of living and the consumer with reasonable prices for agricultural products and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. That this Act may be cited as the Agriculture Refinance Act of 1978.

SEC. 2. The Consolidated Farm and Rural Development Act as amended is amended to provide that:

(a) Direct loans may be made under sections 303 and 312 for the purpose of refinancing existing indebtedness incurred by farm owners and operators for the purchase of land, equipment, and/or for debts incurred for operating expenses during the years January 1, 1973, through December 31, 1977, inclusive, without regard to the limitations of sections 305 and 313, but not to exceed one million dollars ($1,000,000).

(b) Notwithstanding the provisions of sections 307 and 316, loans made or insured under this section shall bear interest at rates determined by the Secretary, but not in excess of a rate determined by the Secretary of the Treasury taking into consideration the current average market yield on outstanding marketable obligations of the United States comparable to the average maturities of such loans, and considering the Secretary's insurance of the loans, plus an additional charge, as may be prescribed by the Secretary, to cover the Secretary's losses and cost of administration, which charge shall be deposited in the rural development insurance fund or the agricultural credit insurance fund as appropriate; any rate determined by the Secretary under this subsection shall be adjusted to the nearest one-eighth of 1 per centum.

(c) The pro rata amount of the loan approved under this section that is attributed to the refinancing of real estate loans may be repaid in a period not to exceed forty years. Interest shall accrue annually on the entire indebtedness attributed to real estate loans at the rate specified in subsection (b) of this section; but the first payment for interest and principle on the real estate shall not be due and payable for five years after the receipt of the loan funds by the borrower; and the balance of the real estate loan shall be due and payable in equal annual installments over the immediately following thirty-four years.

(d) The pro rata amount of the loan approved under this section that is attributed to refinancing of equipment loans may be repaid in a period not to exceed twelve years. Interest shall accrue annually on the entire indebtedness attributed to equipment loans at the rate specified in subsection (b) of this section; but the first payment for interest and principle shall not be due and payable on the equipment loan for three years after the receipt of the loan funds by the borrower; and the balance of the equipment loan shall be due and payable in equal annual installments over the immediately following eight years.

(e) The pro rata amount of the loan approved under this section that is attributed to refinancing of operational loans may be repaid in a period not to exceed five years. Interest shall accrue annually on the entire indebtedness attributed to operational loans at the rate specified in subsection (b) of this section; but the first payment for interest and principle shall not be due and payable on the operational loan for two years after the receipt of the loan funds by the borrower; and the balance of the operational loan shall be due and payable in equal annual installments over the immediately following two years.

(f) The Secretary is authorized to make and insure loans under this section to farmers and ranchers in the United States and in Puerto Rico and the Virgin Islands who (1) are citizens of the United States, (2) have a farm background, except with respect to veterans as defined in section 1983(e) of title 7 of the United States Code. A farm background shall not be required as a condition precedent to obtaining any loan, and either training or farming experience which the Secretary determines is sufficient to assure reasonable prospects of success in the proposed farming operations, (3) are or will become owner-operators of not larger than family farms, and (4) are unable to obtain sufficient credit elsewhere to finance their actual needs at reasonable rates and terms,

taking into consideration prevailing private and cooperative rates and terms in the community in or near which the applicant resides for loans for similar purposes and periods of time.

SEC. 3. The amount of unpaid principle and interest of prior loans consolidated or rescheduled pursuant to section 2 of this act shall not create a new charge against any loan levels authorized by Congress.

"DE LUNA"

(Mr. SIKES asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. SIKES. Mr. Speaker, there is a new historical novel on the market. The title is "De Luna." The book provides a graphic portrayal of the exciting beginning and tragic ending of the first European settlement in what is now the United States. Those who are interested in early American history will find it highly worth while.

The book was written by John Appleyard, a historian of note and an author of ability in Pensacola, Fla.

The first expedition to found a settlement north of Mexico was headed by Don Tristan de Luna in 1556. It was heralded as Spain's answer to French and English claims to the then-unsettled areas of the continent. The riches of Mexico were being successfully exploited by Spain. Early explorations led to the belief that there were cities of gold elsewhere in the continent as well.

Fifteen hundred soldiers, settlers, and clergy with a wealth of supplies sailed from Vera Cruz to Pensacola Bay, which was called Achuse or Ochus on early maps and was called Polonza by de Luna. Their auspicious start with high hopes came to naught when a vicious hurricane destroyed nearly all the expedition's ships and supplies 2 days after they landed on the shores of Pensacola Bay. After 2 years of constant hardship and unbelievable misfortune, it was abandoned. In 1566, another settlement was undertaken at St. Augustine. This one was successful.

Mr. Appleyard's book represents a great amount of research in which recorded history is interwoven with imagination to provide a work of great interest. It is a book that is hard to put down once you start reading it.

SPOILER'S ROLE IN RHODESIA

(Mr. SIKES asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. SIKES. Mr. Speaker, courage of an unusual degree is required for a frank and factual discussion of the efforts now underway for control of the Government of Rhodesia. The attitude of our Government is such that the truth about Rhodesia apparently is not wanted. For a newspaper to speak out in opposition to the popular line requires a high degree of courage. The Washington Star has shown that kind of courage.

The case of Rhodesia is one of the few instances in history where the U.S. Government has tried to undermine and destroy a movement for independence. The Rhodesians declared their independence of Britain. The British Government refused to recognize independence and asked for sanctions by the United Nations. We have tagged along like a puppet on a string. We claim to base this attitude on the fact that Rhodesia has an all-white government in a country which is very predominantly black. However, in response to world demand, the Rhodesian Government has been seeking and apparently is nearing accord with black leaders within the country for a new government which would shift control to the blacks.

Instead of applauding this progress, the United States and Britain oppose it and have held meetings with black leaders who operate from outside Rhodesia and carry on terrorist raids across the borders from bases in Zambia and Mozambique to kill and burn indiscriminately. These factions are Communist-armed and Communist-trained. Support for them is a direct step toward a handover of Rhodesia to Soviet domination. The black factions which our Government supports want immediate control of Rhodesia with no guarantee of any type for the safety of the whites.

The Washington Star on January 31 editorialized on this situation and told it like it is. This editorial deserves to be reprinted in the CONGRESSIONAL RECORD and I submit it for that purpose:

[From the Washington Star, Jan. 31, 1978]

SPOILER'S ROLE IN RHODESIA

If the American people understood the spoiler's role which their government is playing in the current Rhodesian negotiations, how long would they tolerate it? Not long, we suspect. They would insist that Ambassador Andrew Young be summoned from the spoilers' conclave at Malta this week, where another attempt is being made to revive the faltering Anglo-American peace plan. And they would probably insist that the U.S. at long last wish godspeed to those who now seem on the verge of negotiating an internal peace in Rhodesia.

This, we say, is what would probably happen if the complexities of the issue were understood. Unfortunately, they are not. It is not widely understood that after years of international clamor, Prime Minister Ian Smith has conceded the principles of universal suffrage and majority rule. It is not widely understood that, in response to this, three moderate black leaders—who are thought by informed observers to represent a considerable majority of Rhodesian blacks—have negotiated with Mr. Smith a new constitution providing for assured "minority" representation (i.e., largely white) in parliament; a bill of rights; an independent judiciary; and other institutional arrangements that seem fair and workable. It is not widely understood that this "internal" breakthrough, proceeding from Mr. Smith's concession of universal suffrage, is on the verge of consummation if it is not derailed by the foot-dragging of U.S., British and UN officials, who seem to think the black negotiators should hold out for tougher terms.

Finally, it is not widely understood that the U.S. is closely identified with the unyielding terrorist-guerrilla "front" led by Joshua Nkomo and Robert Mugabe, which is armed by the communists and supported by the five neighboring "front-line" African states.

The peace terms of these "external" forces are extreme. Although Mr. Nkomo has made occasional noises of moderation, Mr. Mugabe recently threatened to "bash" all the "reactionary" participants in the internal negotiations: a threat that may happily prove idle if peace comes to Rhodesia and his guerrilla troops begin to melt away.

Meanwhile, the Nkomo-Mugabe faction insists that Rhodesia's future must be settled between Great Britain (whose crown colony Rhodesia was before declaring its independence unilaterally in 1965) and their "Patriotic Front," whose "patriotic" activities consist largely of the ruthless murder of women, children and the elderly, mostly black. They insist that Ian Smith be deposed, and that they, the intruders and disturbers of the peace, be handed immediate control of the army and the police. In short, they demand capitulation by the Rhodesian moderates; and they indicate no willingness to compromise.

What is preverse about the U.S. position is that the closer Ian Smith and the black moderates come to an agreement, the more cozily we seem to collaborate with the U.S.-British-UN cabal to undermine it. The Economist's Salisbury correspondent reported, on January 21: "There are signs that the (Patriotic Front) is speeding up the war and deliberately picking on black civilian targets in an effort to prevent a peaceful changeover to majority rule. From Salisbury, it appears as if the British foreign secretary, D. Owen, and the British commissioner-designate, Lord Carver, are actively discouraging an internal settlement."

In harsher language, the U.S. risks playing accomplice to further bloodshed by pursuing a Rhodesian settlement agreeable to radical outsiders and guerillas. This is the actual, but we cannot imagine the calculated risk of U.S. policy. Why, then, do we take so sour a view of the heartening chances of internal peacemaking?

The reasons must necessarily be a matter of speculation. In Washington, we suppose, it may be thought more important to appease the demands of Rhodesia's "front-line" neighbors than to bring internal peace to the country. The effect of that policy, intended or not, is to sacrifice the moderate majority in Rhodesia, black and white, to considerations of African real-politik.

This is discreditable enough. It becomes unconscionable if one considers how close Mr. Smith and the black moderates are to a peace settlement and a new constitution. As noted by Morley Safer on the CBS program "60 Minutes" Sunday evening, Rhodesia is one of the few functioning biracial societies in Africa. It is not a police state. Its segregationist policies are disappearing. The army and police are predominantly black, and, so organized, can hardly be accounted dependable instruments of white tyranny.

In bitter truth, the Anglo-American policy on Rhodesia seems to be influenced not only by dubious strategic calculations, but also by an uncharacteristically petty-minded British resentment that Rhodesia has made a success of unauthorized independence. Against all odds and predictions, Rhodesia has become a country in being. It needs only the support of the outside world to make reasonable democratic terms with the black majority.

That the U.S. might not only neglect but actually undercut this success is an offense to sense and conscience. Let us call a halt to this foolish policy—now.

PROPOSED WELFARE PROGRAM

(Mr. ULLMAN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. ULLMAN. Mr. Speaker, I am offering today a welfare program that is

workable. It is achievable. And we can afford it.

The country has no clear welfare philosophy. We have patched and pasted together programs with no design in mind. The result is frustrating and wasteful. Today, the welfare check is a symbol of shame—both for the poor and the taxpayers.

The President has offered a plan in the spirit of welfare reform. But, we cannot afford to spend an extra $20 billion without threatening general economic recovery. We cannot go on trying to buy reform.

The administration has fallen into an old trap. It is convinced that we can make poor Americans happy and secure by giving them a guaranteed national income based on family size and earnings. To accept that concept is to perpetuate the "welfare syndrome."

I do not think there is the time or the climate in Congress to push through a massive all-or-nothing welfare program this year.

By contrast, my proposal is comprehensive, but can be put into effect one piece at a time. It repairs existing programs in a sensible, economic way—rather than tearing down the entire system and rebuilding it at enormous cost and disruption.

The bottom line of my program is jobs—with heavy emphasis on putting people back to work in the private sector. We must give the poor who can work the greatest possible incentives to take a job—and the least possible incentives to stay home.

My bill rewards States for finding private jobs—especially for families with both parents unemployed—and adds a heavy financial burden for standing still. Employers are given tax incentives for hiring workers off welfare rolls. And an expanded earned income credit provides liberal benefits for those who work and have at least one child.

Those who cannot work must have the security of uniform benefits. Today the Nation has 50 different welfare programs to help families with dependent children. Why should a single-grant family of four in Yonkers, N.Y., get $7,300, when the same family with the same income, gets $2,700 in Yazoo City, Miss.?

My plan sets forth a national standard for aid to families with dependent children (AFDC). It establishes a national minimum payment and slowly but surely closes the benefits gap between States.

Food stamps remain a basic element in the bill. I do not agree that food stamps are demeaning or presumptious. Food stamps are only one way this Nation feeds its own people in economic distress. The program works. And it should be continued.

My plan cuts through much of the administrative mess. It brings order and simplicity to a jumble of programs and benefits. States, rather than the Federal Government, are given control over programs. The bill takes a tough approach to fraud and abuse. Administrative errors bring financial penalties to the States. Excessive payments to high-income earners will bring dollar-for-dollar collection through the tax system.

My welfare plan is essentially an employment plan. It focuses on private sector jobs. We do not have the money or the experience to open up a million new public jobs. The ball carries an overall cost of less than half of the President's program. But more important, we can move critical parts of the plan through Congress this year.

The Ullman plan hits six of the most visible trouble areas in the welfare system.

TROUBLE AREAS IN THE WELFARE SYSTEM

UNIFORMITY/EQUITY IN PUBLIC ASSISTANCE

1. National standards for AFDC.—
Mandate unemployed parent (UP) program in all states;
$4,200 minimum benefit for family of four (including food stamps); and
Cash assistance is not computed by family size (food stamps continue to vary).
2. All states get increased Federal assistance—with recipients in poorer states benefiting more than recipients in bigger states.
3. Benefit levels (ultimately 30 percent of median state income) expected to converge across nation.
4. AFDC is entirely administered by states.

WORK INCENTIVES

1. Overall incentives for finding work in the private sector are much greater than taking job in the public sector.—
Increase in the EITC (faster phase out of public assistance);
Substantial credit for employers who hire from AFDC and public sector rolls;
Longer period for job search;
States forced to pay assistance cost to intact families if no private sector job found within 17 weeks; and
Limited bonus to states for finding private sector jobs.
2. Expansion of Work Incentives (WIN) to create a limited number of targeted public sector employment (PSE) jobs.
3. Virtual guarantee of PSE job to each two-parent family. Persons receiving AFDC are eligible for PSE on a volunteer basis. Students, childless couples and singles are not eligible for PSE.
4. Stiff penalty for a head of two-parent family refusing a job.
5. Taxing of unemployment insurance (UI) as ordinary income.

FEDERAL-STATE RELATIONS

1. States pay a fixed 85 percent of their 1977 cost in the future—relieving much of the political decision on benefit levels, tax rates and income eligibility cutoffs.
2. Federal government pays rest, including additional increases due to unemployment and inflation.
3. State administration of all public assistance programs.
4. Caseload increases due to unemployment will be borne by Federal government.
5. Increased fiscal relief to all states.

SIMPLIFICATION

1. Uniform AFDC and Food Stamp rules with a single application form.
2. Earned income tax credit (EITC) that doesn't depend on family size—as does Carter proposal.
3. Eligibility is calculated on a one-month retrospective accounting period—rather than six.
4. Federal and state costs and responsibilities are well defined and predictable.

ADMINISTRATION

1. Simplified eligibility rules.
2. No additional federal employees or federal welfare bureaucracy.
3. Fiscal rewards for good administration—fiscal penalties for error rates.
4. No disruption of state agencies that are working efficiently.

FRAUD AND ABUSE

1. Simplification of eligibility rules.
2. More reliance on food, rather than cash, as welfare support.
3. Overpayments, especially to higher income earners, is collected dollar-for-dollar through the tax system.
4. States are penalized 50 percent of the cost of errors.

SUMMARY OF ULLMAN WELFARE REFORM PROPOSAL FEBRUARY 2, 1978

EARNED INCOME TAX CREDIT

1. Increase credit to 20 percent of first $5,000; phased out between $7,500 and $15,000. Not available for public service employment.
2. Available to all families with children, including those on welfare with earnings.
3. Available from employers through withholding system on a current payroll basis.

FOOD STAMPS

1. Lower benefit reduction rate to .2 below $7,500 of income to provide more work incentive to recipients covered by AFDC; raise benefit reduction rate to .4 above $7,500.
2. Repeal shelter deduction.
3. Repeal deduction for work expenses; a lowered benefit reduction rate will compensate for this repeal.
4. Liberalize itemized child care deduction to $100 per month per child; maximum of $300 per family or 50 percent of income of person with lowest earnings.
5. Allow standard deduction of $30 per month.
6. Institute minimum benefit of $10 per month for all household sizes.

SSI (AGED, BLIND AND DISABLED)

1. Grant a one-time increase in Federal benefits of $15 per month for single individuals, $30 per month for couples, replacing Food Stamp eligibility.
2. Require states which supplement to pass the Federal increase through.

AFDC (SINGLE-PARENT FAMILIES WITH CHILDREN)

1. Institute a national minimum benefit of $4,200 (cash plus Food Stamps) for a family of four.
2. Gradually move benefits toward Federally-mandated targets based on state median family incomes; any benefits greater than Federal levels are entirely at state expense.
3. Federal government pays entire cost of program, except state pays 85% of 1977 AFDC payments to single-parent families and 50% of the cost of all errors made.
4. Adopt same nationally uniform income definitions, accounting periods, work requirements, reporting requirements and asset rules as Food Stamps. No distinction between initial and subsequent eligibility.
5. Repeal deduction for work expenses; increased earned income tax credit will cover these.
6. Child care deduction in AFDC is identical to that in Food Stamps.
7. Allow a $30 deduction from income and a ⅓ deduction of all remaining income.
8. Cash benefits would not vary by family size; Food Stamp benefits would continue to vary.
9. Institute minimum benefit of $10 per month.
10. Medicaid expense is not increased, nor is there a dual eligibility determination for Medicaid.
11. Administrative reforms—State takeover of welfare administration; redetermination required every four months or sooner at State

option; and common application form for AFDC and Food Stamps.

REFORMED UNEMFLOYED PARENT COMPONENT OF AFDC (INTACT FAMILIES WITH CHILDREN)

1. Families with incomes less than $350 per month are eligible for aid in all states.

2. Aid would be available to any family for a maximum of 17 weeks per 52-week period entirely at Federal expense. If, at the end of 17 weeks, a PSE job is not available, the state must extend aid for another 35 weeks at state expense.

3. Benefits for families with no income would be $200 for families with children (regardless of family size) with a benefit reduction rate of 60%. States may supplement this schedule up to $150 per month.

4. Families may not receive unemployment compensation and aid simultaneously. They may receive aid after their unemployment compensation has expired, but not vice versa.

5. Other rules are the same as AFDC.

COORDINATION WITH TAX SYSTEM

1. Unemployment Compensation benefits would be treated as income.

2. Recoup all Food Stamp and AFDC benefits paid to families whose adjusted gross income plus transfers exceed the Food Stamp phaseout point by $2,000.

EMPLOYMENT PROPOSALS

1. Expand public service jobs component of WIN and insure that State has primary responsibility and control of administration.

2. WIN should contract with CETA prime sponsors for job creation to maximum extent feasible.

3. Jobs available to families who were on AFDC for at least 16 weeks with priority to two-parent families. No single-parent families with children would be required to take subsidized jobs.

4. Workers would start at minimum wages; funds would be available to raise the wage rate to reward good work behavior.

5. Tax credits to private employers for hiring WIN registrants including those with public service jobs.

6. Bonus to employment service of $200 each for placing these individuals.

7. Provide general or specific vocational training in lieu of PSE job. Stipend is $30 per week, plus continuation of full AFDC and Food Stamp benefits.

8. Expand existing WIN job referral and supportive service components.

9. Employer cost increases if time on PSE job extends to over a year.

Ullman Plan cost.—Preliminary estimates

(Incremental cost over current law, fiscal year 1982)

[Billions of dollars]

Title I:	
Earned income tax credit	3.356
Tax unemployment benefits	−1.734
Recoupment (7 percent of benefits)	−1.472
Jobs credit	0.050
Title II:	
AFDC	3.336
Title III:	
Food stamps	−0.683
Title IV:	
WIN expansion	5.070
Title V:	
SSI benefit increase	0.542
Less Federal tax increases	−0.283
Total cost	7.5–9.0

"SAVE ALASKA FOR POSTERITY"—TEXAS SUPPORT FOR ALASKA NATIONAL INTEREST LANDS BILL

(Mr. SEIBERLING asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. SEIBERLING. Mr. Speaker, the House Interior Subcommittee on General Oversight and Alaska Lands is nearing completion of its markup of H.R. 39, the Alaska National Interest Lands Conservation Act. Today, the subcommittee approved a new title IX, providing a simplified process under which the Secretary of the Interior could recommend opening up nonwilderness areas in the national wildlife refuges and the national park preserves for mineral exploration, development, and extraction.

Upon making a finding of national need and no serious, permanent environmental damage, the Secretary could recommend opening up specified areas and Congress would have a limited time in which to act on his recommendation.

The subcommittee has yet to determine how much land will be set aside as wilderness and, therefore, not subject to the mineral process. That vote is now scheduled for next Monday. That, of course, is the crucial vote, since the unique and superlative value that the legislation is attempting to preserve for the enjoyment of all Americans is some prime samples of the vast, unspoiled Alaskan wilderness.

Mr. Speaker, the Austin American-Statesman of Austin, Tex., on September 17, 1977, wrote an outstanding editorial on this subject entitled "Save Alaska for Posterity." As the editorial points out:

If the opportunity is passed by, protection of the land, wild rivers, wildlife and forests will expire. And a once-in-history chance will have gone the way of the passenger pigeon, into oblivion.

The full text of the editorial follows these remarks:

SAVE ALASKA FOR POSTERITY

The Carter administration, through the Interior Department, has sided with protectionists in proposing to set aside nearly 92 million acres of Alaskan wilderness for eternal preservation.

The Carter proposal is for a greater amount of land than had been anticipated, but less than the amount wanted by the Alaska Coalition of conservation groups, which had proposed 115 million acres.

Thus the stage is set for a fierce fight between environmentalists and those who want to capitalize on the vast mineral and other resources of the biggest state.

The weight of the administration is gratifying in the battle, for the country's last wilderness is at stake, and as much as possible should be preserved.

The area proposed to be saved is indeed vast—the size of Montana. It would create 10 new national parks, add to three others, add nine new wildlife refuges, enhance five others, supplement two national forests and add 33 scenic river systems.

But there is much of Alaska left for development and exploitation. The state itself gets 103 million acres under the plan, and the native Alaskan peoples get more than 44 million acres.

Certainly the Congress will be urged to go the whole way and preserve everything; and it will be urged to preserve only a little bit of the pristine wilderness and let the rest go to sawmills and mines. And almost certainly the Congress will do neither; extremism is not its bag.

But as the Congress wrangles with the various proposals, it should weigh heavily the benefits to future generations offered by conserving a large portion of the wild area. There is an opportunity to do something in Alaska which was not done in the lower states. That is to preserve entire ecosystems and watersheds.

If the opportunity is passed by, protection of the land, wild rivers, wildlife and forests will expire. And a once-in-history chance will have gone the way of the passenger pigeon, into oblivion.

GENERAL LEAVE

Mr. RAHALL. Mr. Speaker, I ask unanimous consent that all Members be permitted to extend their remarks and to include therein extraneous material on the subject of the special order speech today by the gentleman from Minnesota, Mr. NOLAN.

The SPEAKER. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. CORMAN (at the request of Mr. WRIGHT), for after 3:30 p.m. today, on account of official business.

Mr. BINGHAM (at the request of Mr. WRIGHT), for today, on account of illness.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. CAPUTO) and to revise and extend their remarks and include extraneous matter:)

Mr. GRASSLEY, for 5 minutes, today.

Mr. RAILSBACK, for 5 minutes, today.

(The following Members (at the request of Mr. RAHALL) and to revise and extend their remarks and include extraneous matter:)

Mr. ANNUNZIO, for 5 minutes, today.

Mr. GONZALEZ, for 5 minutes, today.

Mr. CHARLES H. WILSON of California, for 10 minutes, today.

Mr. EILBERG, for 5 minutes, today.

Mr. NOLAN, for 5 minutes, today.

Mr. PEPPER, for 5 minutes, today.

Mr. MONTGOMERY, for 5 minutes, today.

Mr. CORNWELL, for 5 minutes, today.

Mr. WAGGONNER, for 10 minutes, today.

Mr. ULLMAN, for 10 minutes, today.

Mr. VANIK, for 5 minutes, today.

Mr. BROOKS, for 5 minutes, today.

Mr. LE FANTE, for 5 minutes, today.

Mr. HANLEY, for 5 minutes, today.

Mr. LONG of Maryland, for 5 minutes, today.

Mr. ENGLISH, for 5 minutes, today.

Ms. HOLTZMAN, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. CAPUTO) and to include extraneous matter:)

Mr. COUGHLIN in two instances.

Mr. HAMMERSCHMIDT.

Mr. PURSELL.

Mr. HORTON.

Mr. LAGOMARSINO.

Mr. DERWINSKI in three instances.

Mr. HOLLENBECK.

Mr. ANDERSON of Illinois in five instances.

Mr. HYDE.
Mr. WYDLER.
Mr. RAILSBACK.
Mr. SYMMS.
Mr. DORNAN in three instances.
Mr. SEBELIUS.
Mr. STEERS.
Mr. WHITEHURST.
Mr. LEACH.
Mr. YOUNG of Florida.

(The following Members (at the request of Mr. RAHALL) and to include extraneous matter:)

Mr. HARKIN.
Mr. ANDERSON of California in three instances.
Mr. GONZALEZ in three instances.
Mr. MURTHA.
Mr. STUDDS.
Ms. MIKULSKI.
Mr. AKAKA.
Mr. MITCHELL of Maryland in two instances.
Mr. BINGHAM.
Mr. NOLAN.
Mr. PATTEN.
Mr. WON PAT.
Mr. RODINO.
Mr. MILFORD.
Mr. ULLMAN.
Mr. FRASER.
Mr. EDWARDS of California.
Mrs. MEYNER.
Mr. GLICKMAN.
Mr. SIMON in three instances.
Mr. HANLEY.
Mr. MAGUIRE.
Mr. ROE.
Ms. HOLTZMAN in five instances.
Mr. DERRICK.

ADJOURNMENT

Mr. RAHALL. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 31 minutes p.m.), under its previous order, the House adjourned until Monday, February 6, 1978, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive comunications were taken from the Speaker's table and referred as follows:

3153. A letter from the Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Air Force's proposed sale of certain defense equipment and services to the United Kingdom (transmittal No. 78–10), pursuant to section 813 of Public Law 94–106; to the Committee on Armed Services.

3154. A letter from the Director of Legislation, Department of the Navy, transmitting notice of the Navy's intention to sell certain naval vessels to the Government of Ecuador, pursuant to 10 U.S.C. 7307; to the Committee on Armed Services.

3155. A letter from the Director of Legislation, Department of the Navy, transmitting notice of the Navy's intention to sell certain naval vessels to Greece, pursuant to 10 U.S.C. 7307; to the Committee on Armed Services.

3156. A letter from the Director of Legislation, Department of the Navy, transmitting notice of the Navy's intention to sell the diesel submarine *Lizardfish* to Italy, pursuant to 10 U.S.C. 7307; to the Committee on Armed Services.

3157. A letter from the Director of Legislation, Department of the Navy, transmitting notice of the Navy's intention to sell the salvage ship *Grasp* (*ARS–24*) to the Republic of Korea, pursuant to 10 U.S.C. 7307; to the Committee on Armed Services.

3158. A letter from the Director of Legislation, Department of the Navy, transmitting notice of the Navy's intention to sell certain naval vessels to Mexico, pursuant to 10 U.S.C. 7307; to the Committee on Armed Services.

3159. A letter from the Public Printer, transmitting his annual report for fiscal year 1977; to the Committee on House Administration.

3160. A letter from the Assistant Secretary of State for Congressional Relations, transmitting a report on the operations and mandate of the Bureau of Human Rights and Humanitarian Affairs, pursuant to section 109(a)(7) of Public Law 95–105; to the Committee on International Relations.

3161. A letter from the Assistant Secretary of State for Congressional Relations, transmitting reports on the observance of human rights by recipients of economic assistance and proposed recipients of security assistance, pursuant to sections 116(d) and 502B(b) of the Foreign Assistance Act of 1961, as amended (91 Stat. 537 and 90 Stat. 748), to the Committee on International Relations.

3162. A letter from the Acting Administrator, Agency for International Development, Department of State, transmitting a report on the study of options for implementing cooperative programs with developing countries to meet their energy needs, pursuant to section 119(b)(2) of the Foreign Assistance Act of 1961, as amended (91 Stat. 538); to the Committee on International Relations.

3163. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Air Force's intention to offer to sell certain defense equipment and services to the United Kingdom (transmittal No. 78–10), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

3164. A letter from the Comptroller General of the United States, transmitting a report recommending that cost ranges which measure the potential cost impact of a Federal program be used instead of the single-point or specific-dollar estimates currently in use (PSAD–78–12, February 2, 1978); jointly, to the Committees on Government Operations, and Appropriations.

3165. A letter from the Comptroller General of the United States, transmitting a report on the problems involved in developing, putting into practice, and complying with Federal equal employment opportunity guidelines on employee selection (FPCD–77–54, February 2, 1978); jointly, to the Committees on Government Operations, Education and Labor, and Post Office and Civil Service.

3166. A letter from the Chairman, Advisory Committee on Reactor Safeguards, U.S. Nuclear Regulatory Commission, transmitting a summary of the committee's review and evaluation of the Commission's safety research program, previously submitted pursuant to section 29 of the Atomic Energy Act of 1954, as amended (91 Stat. 1483); jointly, to the Committees on Interior and Insular Affairs, and Interstate and Foreign Commerce.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. LONG of Louisiana: Committee on Rules. House Resolution 998. Resolution providing for the consideration of H.R. 9370. A bill to provide for the development of aquaculture in the United States, and for other purposes (Rept. No. 95–863). Referred to the House Calendar.

Mr. PERKINS: Committee of conference. Conference report on H.R. 4544 (Rept. No. 95–864). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ULLMAN:

H.R. 10711. A bill to amend the Internal Revenue Code of 1954, parts A and C of title IV of the Social Security Act, and the Food Stamp Act of 1977 for the purpose of revising, coordinating, and improving Federal public assistance and food stamp programs and for the purpose of providing increased employment opportunities for needy families, and for other purposes; jointly, to the Committees on Agriculture, Education and Labor, and Ways and Means.

By Mr. ABDNOR:

H.R. 10712. A bill to name a certain Federal building in Huron, S. Dak., the Hubert H. Humphrey Building; to the Committee on Public Works and Transportation.

By Mr. ADDABBO (for himself, Mr. CONTE, Mr. STEED, Mr. RICHMOND, Mr. GONZALEZ, Mr. MCDADE, Mr. NOLAN, and Mrs. FENWICK):

H.R. 10713. A bill to amend the Small Business Act and the Small Business Investment Act of 1958; to the Committee on Small Business.

By Mr. ANDERSON of Illinois:

H.R. 10714. A bill to amend title XIV of the Public Health Service Act to provide Federal grants for small public water systems to meet national primary drinking water regulations; to the Committee on Interstate and Foreign Commerce.

By Mr. ASHBROOK (for himself and Mr. MILLER of Ohio):

H.R. 10715. A bill to direct the Secretary of the Army to conduct an inspection of the Buckeye Lake dam and levee, Buckeye Lake, Ohio, to determine its structural stability; to the Committee on Public Works and Transportation.

By Mr. BROWN of California (for himself, Mr. NOLAN, Mr. RICHMOND, Mr. JEFFORDS, and Mr. PANETTA):

H.R. 10716. A bill to encourage the continuation of family farming as a part of the agricultural system in the United States; jointly, to the Committee on Agriculture and Ways and Means.

By Mr. BROYHILL (for himself, Mr. RINALDO, Mr. KRUEGER, and Mr. LUKEN):

H.R. 10717. A bill to amend the Securities Act of 1933 and the Investment Company Act of 1940 to encourage investment in small business concerns; to the Committee on Interstate and Foreign Commerce.

By Mrs. BURKE of California (for herself, Mr. PREYER, Mr. CORNELL, Mr. MCCLOSKEY, and Mr. BONKER):

H.R. 10718. A bill to amend the Comprehensive Employment and Training Act of 1973 to establish a program of assistance to multipurpose service centers for displaced homemakers, and for other purposes; to the Committee on Education and Labor.

By Mr. BURKE of Massachusetts (for himself, Mr. ADDABBO, Mr. ANNUNZIO, Mr. BOLAND, Mr. BEARD of Rhode Island, Mr. BIAGGI, Mr. BLANCHARD, Mr. BONIOR, Mr. BRODHEAD, Mr. CARNEY, Mr. CLAY, Mr. CONYERS, Mr. DE LUGO, Mr. DRINAN, Mr. EARLY, Mr. EILBERG, Mr. EVANS of Colorado, Mr. FARY, Mr. FAUNTROY, Mr. FLOOD, Mr. FLORIO, Mr. FORD of Tennessee, Mr. GAYDOS. Mr. HANLEY, and Mr. MARKEY):

H.R. 10719. A bill to amend the Social Security Act and the Internal Revenue Code of 1954 to provide for Federal participation in the costs of the old-age, survivors, and disability insurance program and the medicare

program, with appropriate reductions in social security taxes to reflect such participation, and with a substantial increase in the amount of an individual's annual earnings which may be counted for benefit and tax purposes; to the Committee on Ways and Means.

By Mr. BURKE of Massachusetts (for himself, Ms. CHISHOLM, Mr. HARRINGTON, Mr. LE FANTE, Mr. MITCHELL of Maryland, Mr. MURPHY of Illinois, Mr. NOLAN, Mr. PATTISON of New York, Mr. PATTERSON of California, Mr. PERKINS, Mr. PRICE, Mr. RANGEL, Mr. RICHMOND, Mr. RODINO, Mr. ROSE, Mr. ROSENTHAL, Mr. SHIPLEY, Mr. SEIBERLING, Mr. SIMON, Mr. SISK, Mr. ST GERMAIN, Mr. STUDDS, Mr. TSONGAS, Mr. WEAVER, and Mr. WOLFF):

H.R. 10720. A bill to amend the Social Security Act and the Internal Revenue Code of 1954 to provide for Federal participation in the costs of the old-age, survivors, and disability insurance program and the medicare program, with appropriate reductions in social security taxes to reflect such participation, and with a substantial increase in the amount of an individual's annual earnings which may be counted for benefit and tax purposes; to the Committee on Ways and Means.

By Mr. CARNEY (by request):

H.R. 10721. A bill to provide a bonus to each World War II veteran; to the Committee on Veterans' Affairs.

By Mrs. COLLINS of Illinois (for herself, Mr. MARKEY, and Mr. DOWNEY):

H.R. 10722. A bill to prohibit the export of certain militarily significant items to the Republic of South Africa and to provide for notification to the Congress of the proposed issuance of a validated license for an export to the Republic of South Africa, with each House of Congress being able to prevent the issuance of any such license by adoption of a resolution of disapproval; to the Committee on International Relations.

By Mr. ENGLISH (for himself, Mr. AKAKA, Mr. ANDREWS of North Dakota, Mr. BAUCUS, Mr. CAVANAUGH, Mr. DAN DANIEL, Mr. EDWARDS of Oklahoma, Mr. EVANS of Georgia, Mr. FUQUA, Mr. GLICKMAN, Mr. HALL, Mr. HIGHTOWER, Mr. HUCKABY, Mr. JENRETTE, Mr. JOHNSON of Colorado, Mr. JONES of Oklahoma, Mr. KEMP, Ms. KEYS, and Mr. KINDNESS):

H.R. 10723. A bill to amend the consolidated Farm and Rural Development Act to provide an alternative method of financing the land, equipment and operating expenses of qualified farm families, including young farmers, and to help provide the farm family with adequate standards of living and the consumer with reasonable prices for agricultural products and for other purposes; to the Committee on Agriculture.

By Mr. ENGLISH (for himself, Mrs. LLOYD of Tennessee, Mr. MCCORMACK, Mr. NOLAN, Mr. PURSELL, Mr. RISENHOOVER, Mr. RUNNELS, Mr. RYAN, Mr. SANTINI, Mr. SEBELIUS, Mr. STEED, Mr. THOMPSON, Mr. TRIBLE, Mr. TUCKER, Mr. UDALL, Mr. WATKINS, and Mr. YATRON):

H.R. 10724. A bill to amend the consolidated Farm and Rural Development Act to provide an alternative method of financing the land, equipment and operating expenses of qualified farm families, including young farmers, and to help provide the farm family with adequate standards of living and the consumer with reasonable prices for agricultural products and for other purposes; to the Committee on Agriculture.

By Mr. FISH (for himself, Mr. CEDERBERG, Ms. SPELLMAN, Mr. CONTE, Mr. THOMPSON, Mr. ZEFERETTI, Mr. TRIBLE, Mr. GLICKMAN, and Mr. O'BRIEN):

H.R. 10725. A bill to amend section 1332 of title 28, United States Code, to grant jurisdiction to the district courts to enforce any custody order of a State court against a parent who, in contravention of such order, takes a child to another State; to the Committee on the Judiciary.

By Mr. HAMMERSCHMIDT:

H.R. 10726. A bill to amend title 38, United States Code, to increase the maximum permissible loan amounts in the case of a Veterans' Administration home loan guarantee; to the Committee on Veterans' Affairs.

By Mr. MOAKLEY (for himself, Mr. HANNAFORD, Mr. DRINAN, Mr. TRAXLER, Mr. ICHORD, Mr. CORRADA, Mr. FITHIAN, Mr. PATTERSON of California, Mr. THONE, Mr. MARKEY, Mr. LAFALCE, Mr. ROSE, Mr. BONIOR, Mr. SNYDER, Mr. HUGHES, Mr. ADDABBO, Mr. FARY, Mr. OBERSTAR, Mr. MITCHELL of Maryland, Mr. CORNWELL, Mr. MURPHY of Pennsylvania, Mr. BURKE of Massachusetts, Mr. NEDZI, Mr. BEARD of Rhode Island, and Mrs. HECKLER):

H.R. 10727. A bill to amend title XVIII of the Social Security Act to authorize payment under the supplementary medical insurance program for the cutting and removal of corns, warts, and calluses and the reduction of club nails; jointly, to the Committees on Ways and Means and Interstate and Foreign Commerce.

By Mr. MONTGOMERY (for himself, Mr. EDWARDS of California, Mr. HARRINGTON, Mr. PERKINS, Mr. HUCKABY, Mr. GINN, Mr. D'AMOURS, Mr. YATRON, Mr. GOODLING, Mr. COTTER, Mr. BURKE of Florida, Mr. OTTINGER, Mr. BROYHILL, Mr. CEDERBERG, Mr. FLOWERS, Mr. PEPPER, Mr. WHITE, Mr. DUNCAN of Tennessee, Mr. LOTT, Mr. YOUNG of Alaska, Mr. EILBERG, Mr. JOHNSON of California, Mr. CAPUTO, Mr. STEERS, and Mr. O'BRIEN):

H.R. 10728. A bill to amend title 38, United States Code, to improve the pension programs for veterans, and survivors of veterans, of the Mexican border period, World War I, World War II, the Korean conflict, and the Vietnam era, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. MURPHY of New York (for himself, Mr. RUPPE, Mr. DINGELL, Mr. JONES of North Carolina, Mr. LEGGETT, Mr. BIAGGI, Mr. ANDERSON of California, Mr. DE LA GARZA, Mr. METCALFE, Mr. BREAUX, Mr. ROONEY, Mr. GINN, Mr. STUDDS, Mr. BOWEN, Mr. EILBERG, Mr. DE LUGO, Mr. HUBBARD, Mr. BONKER, Mr. PATTERSON of California, Mr. ZEFERETTI, Mr. OBERSTAR, Ms. MIKULSKI, Mr. AKAKA, Mr. YOUNG of Alaska, Mr. EMERY, and Mr. TRIBLE):

H.R. 10729. A bill to authorize appropriations for the fiscal year 1979 for certain maritime programs of the Department of Commerce, and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. MURPHY of New York (for himself, Mr. LEGGETT, Mr. RUPPE, Mr. BIAGGI, Mr. ANDERSON of California, Mr. FORSYTHE, Mr. DE LA GARZA, Mr. METCALFE, Mr. MCCLOSKEY, Mr. BREAUX, Mr. GINN, Mr. PRITCHARD, Mr. STUDDS, Mr. BOWEN, Mr. LENT, Mr. DE LUGO, Mr. HUBBARD, Mr. EMERY, Mr. BONKER, Mr. AUCOIN, Mr. BAUMAN, Mr. D'AMOURS, Mr. PATTERSON of California, Mr. ZEFERETTI, and Mr. OBERSTAR):

H.R. 10730. A bill to authorize appropriations to carry out the Marine Mammal Protection Act of 1972 during fiscal years 1979, 1980, and 1981; to the Committee on Merchant Marine and Fisheries.

By Mr. MURPHY of New York (for himself, Mr. AKAKA, Mr. TRIBLE, and Ms. MIKULSKI):

H.R. 10731. A bill to authorize appropriations to carry out the Marine Mammal Protection Act of 1972 during fiscal years 1979, 1980, and 1981; to the Committee on Merchant Marine and Fisheries.

By Mr. MURPHY of New York (for himself, Mr. LEGGETT, Mr. FORSYTHE, Mr. BIAGGI, Mr. METCALFE, Mr. MCCLOSKEY, Mr. BREAUX, Mr. GINN, Mr. PRITCHARD, Mr. STUDDS, Mr. BOWEN, Mr. YOUNG of Alaska, Mr. DE LUGO, Mr. HUBBARD, Mr. LENT, Mr. BONKER, Mr. AUCOIN, Mr. EMERY, Mr. D'AMOURS, Mr. PATTERSON of California, Mr. DORNAN, Mr. ZEFERETTI, Mr. OBERSTAR, Mr. BAUMAN, and Mr. HUGHES):

H.R. 10732. A bill to authorize appropriations to carry out the Fishery Conservation and Management Act of 1976 during fiscal years 1979, 1980, and 1981; to the Committee on Agriculture.

By Mr. MURPHY of New York (for himself, Mr. AKAKA, Mr. TRIBLE, and Ms. MIKULSKI):

H.R. 10733. A bill to authorize appropriations to carry out the Fishery Conservation and Management Act of 1976 during fiscal years 1979, 1980, and 1981; to the Committee on Merchant Marine and Fisheries.

By Mr. NEAL (for himself and Mr. RINALDO):

H.R. 10734. A bill to establish a Solar Energy Development Bank to provide long-term low-interest loans for the purchase and installation of solar energy equipment in commercial and residential buildings in the United States; to the Committee on Banking, Finance and Urban Affairs.

By Mr. OBERSTAR (for himself and Mr. RUSSO):

H.R. 10735. A bill to amend title XIX of the Social Security Act to eliminate Federal payments for abortions under the medicaid program except for abortions to prevent the death of the mother; to the Committee on Interstate and Foreign Commerce.

By Mr. PEPPER (for himself, Mrs. CHISHOLM, and Mr. ROYBAL):

H.R. 10736. A bill to amend the Elementary and Secondary Education Act of 1965 to establish projects to educate, motivate, and encourage secondary school students from an economically disadvantaged background to pursue training at the undergraduate and graduate levels in the biomedical sciences; to the Committee on Education and Labor.

By Mr. PEPPER (for himself, Mr. COHEN, and Mr. FORD of Tennessee):

H.R. 10737. A bill to establish within the Department of Health, Education, and Welfare a Home Health Clearinghouse to provide elderly persons with a single place where they can obtain complete information on the Federal home health programs available to them; to the Committee on Interstate and Foreign Commerce.

H.R. 10738. A bill to amend title XVIII of the Social Security Act to remove all limits on the number of home health visits for which payment may be made under both part A and part B (eliminating the requirement of prior hospitalization in the case of home health care under part A), to include additional types of services as home health care, and for other purposes; jointly, to the Committees on Ways and Means, Interstate and Foreign Commerce.

By Mr. NOLAN (for himself, Mr. BROWN of California, Mr. RICHMOND, Mr. JEFFORDS, and Mr. PANETTA):

H.R. 10739. A bill to encourage the continuation of family farming as a part of the agricultural system in the United States; jointly, to the Committees on Agriculture, and Ways and Means.

By Mr. PURSELL:

H.R. 10740. A bill to encourage on-the-scene emergency care aboard aircraft by relieving physicians, registered nurses, and aircraft employees from civil liability for damages resulting from any act or omission in rendering such care; to the Committee on the Judiciary.

By Mrs. SPELLMAN (for herself, Mr. LUNDINE, and Mr. MCKINNEY):

H.R. 10741. A bill to assist cities and States by amending section 5136 of the Revised Statutes, as amended, with respect to the authority of national banks to underwrite and deal in securities issued by State and local governments, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. STAGGERS:

H.R. 10742. A bill to amend part I of the Interstate Commerce Act to provide that certain provisions for the protection of railroad employees shall be prepared by the Commission in consultation with the Secretary of Labor and shall be subject to subsequent review by such Secretary; to the Committee on Interstate and Foreign Commerce.

By Mr. STEERS:

H.R. 10743. A bill to amend title 5, United States Code, to make the birthday of Abraham Lincoln a legal public holiday; to the Committee on Post Office and Civil Service.

By Mr. UDALL (for himself, Mr. EILBERG, Mr. GLICKMAN, Mr. MOTTL, and Mr. VANIK):

H.R. 10744. A bill to provide for limited public financing of congressional general election campaigns, to provide that candidates receiving public funds in Presidential elections may accept certain contributions and make increased expenditures, and for other purposes; to the Committee on House Administration.

By Mr. ULLMAN:

H.R. 10745. A bill relating to the year for including in income certain payments received in 1978 under the Agricultural Act of 1949 and attributable to drought or other disaster in 1977; to the Committee on Ways and Means.

By Mr. WAGGONNER (for himself and Mr. HOLLAND):

H.R. 10746. A bill to defer from income certain amounts deferred pursuant to State or local public employee deferred compensation plans; to the Committee on Ways and Means.

By Mr. WALSH:

H.R. 10747. A bill to amend the Federal Food, Drug, and Cosmetic Act to require food package labels to disclose, in addition to other information required under law, the packing date and last sale date of the food; to the Committee on Interstate and Foreign Commerce.

By Mr. WHITEHURST:

H.R. 10748. A bill to assist former spouses of Federal employees in obtaining court-ordered payments; to the Committee on Ways and Means.

By Mr. WYDLER:

H.R. 10749. A bill to provide policies, methods, and criteria for the acquisition of property and services by executive agencies; to the Committee on Government Operations.

By Mrs. HECKLER:

H.J. Res. 712. Joint resolution to authorize the President to call a White House Conference on the Arts; to the Committee on Education and Labor.

By Mr. HANSEN (for himself, Mr. MURPHY of New York, Mr. MICHEL, Mr. GAMMAGE, Mr. JENKINS, Mr. DUNCAN of Oregon, Mr. MURPHY of Illinois, Mr. DERWINSKI, Mr. YATRON, Mr. YOUNG of Texas, Mr. ROBERTS, and Mrs. COLLINS of Illinois):

H. Con. Res. 467. Concurrent resolution expressing the sense of the Congress with regard to the disposition by the United States of any right to, title to, or interest in the property of Canal Zone agencies and any real property located in the Canal Zone; to the Committee on Merchant Marine and Fisheries.

By Mr. HANSEN (for himself, Mr. MURPHY of New York, Mr. ZABLOCKI, Mr. PATTEN, and Mr. NEAL):

H. Con. Res. 468. Concurrent resolution expressing the sense of the Congress with regard to the disposition by the United States of any right to, title to, or interest in the property of Canal Zone agencies and any real property located in the Canal Zone; to the Committee on Merchant Marine and Fisheries.

By Mr. MAGUIRE (for himself and Mr. MITCHELL of Maryland):

H. Con. Res. 469. Concurrent resolution to disapprove the determination of the President denying import relief under the Trade Act of 1974 to the U.S. high-carbon ferrochrome industry; to the Committee on Ways and Means.

By Mrs. SPELLMAN:

H. Con. Res. 470. Concurrent resolution expressing the sense of the Congress that coffee containers available for retail distribution should be labeled to specify the percentage of coffee which has been purchased from Uganda; to the Committee on Interstate and Foreign Commerce.

By Mr. FRASER:

H. Res. 999. Resolution authorizing the Subcommittee on International Organizations of the Committee on International Relations in conducting its investigation of Korean-American relations to require, by subpena or otherwise, the attendance of any person at the taking of a deposition by any member of that subcommittee; to the Committee on Rules.

By Mr. MURPHY of New York:

H. Res. 1000. Resolution to provide for the expenses of investigations and studies to be conducted by the Committee on Merchant Marine and Fisheries; to the Committee on House Administration.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII,

Mr. DORNAN introduced a bill (H.R. 10750) for the relief of Surip Karmowiredjo, which was referred to the Committee on the Judiciary.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 9214

By Mr. STEERS:

Page 3, add new section (d) after line 14: The Bretton Woods Agreement Act (22 USC 286–286k–2), as amended, is further amended by adding at the end thereof the following new subsection:

"(d)(1) The Secretary of the Treasury shall instruct the United States Executive Director on the Executive Board of the International Monetary Fund to initiate a wide consultation with the Managing Director of the Fund and other member country Executive Directors with regard to encouraging the IMF staff to formulate stabilization programs which, to the maximum feasible extent, foster a broader base of productive investment and employment, especially in those productive activities which are designed to meet basic human needs.

"(2) In accordance with the unique character of the International Monetary Fund, the Secretary of the Treasury shall direct the U.S. Executive Director to take all possible steps to the end that all Fund transactions, including economic programs developed in connection with the utilization of Fund resources, do not contribute to the deprivation of basic human needs, nor to the violation of basic human rights, such as torture, cruel or inhumane treatment or degrading punishment, prolonged detention without charge, or other flagrant denials of life, liberty and the security of person; and to oppose all such transactions which would contribute to such deprivations or violations.

"(3) In order to gain a better understanding of the social, political and economic impact of the Fund's stabilization programs on borrowing countries, especially as it relates to the poor majority within those countries, the Secretary of the Treasury shall direct the Executive Director representing the United States to the Fund to prepare and submit, not later than 180 days after the close of each calendar year, a report to the Congress. Such report shall evaluate, with respect to countries to which loans are made by the Fund during such year, the effects of policies of those countries which result from the standby agreement(s) on the ability of the poor in such countries to obtain:

(a) an adequate supply of food with sufficient nutritional value to avoid the debilitating effects of malnutrition;

(b) shelter and clothing;

(c) public services, including health care, education, clean water, energy resources, and transportation;

(d) productive employment that provides a reasonable and adequate wage."

S. 2076

By Mr. UDALL:

Page 3, line 11, after the word "authorized" insert "for the two-year period commencing October 1, 1978, and ending September 30, 1980."

Page 4, lines 20 through 23, strike the portion of the sentence beginning on line 20 to the proviso on line 23 and insert in lieu thereof the following: "There are authorized to be appropriated an amount not to exceed $1,500,000 for fiscal year 1979 and an amount not to exceed $1,500,000 for fiscal year 1980 to carry out the provisions of this Act:".

EXTENSIONS OF REMARKS

AMERICAN POLICY IN RHODESIA

HON. HARRY F. BYRD, JR.

OF VIRGINIA

IN THE SENATE OF THE UNITED STATES

Thursday, February 2, 1978

Mr. HARRY F. BYRD, JR. Mr. President, the United States has been pursuing a policy with regard to Rhodesia that is an affront to the American people.

The State Department, which has proudly boasted of its concern for majority rule in southern Africa, has been pursuing a policy which may very well spoil the chances for a peaceful transition to a true majority rule in Rhodesia.

Negotiations between the white government and black Rhodesian moderates have been proceeding well and there is every likelihood that if left alone they will soon come to agreement.

However, our State Department is making every effort to see the negotiations fail.

The reason for this is that our State Department is supporting a group of Marxist terrorist who want to take over Rhodesia by violence.

I am pleased to note, however, that a growing number of Americans are raising their voices in protest as they become aware of the travesty of current American policy in southern Africa.

This week important editorials were published in the Richmond Times-Dispatch and the Washington Star concerning this matter. I ask unanimous consent that they be printed in Extensions of Remarks.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the Richmond Times-Dispatch, Jan. 30, 1978]

REALLY, MR. VANCE?

In a recent preview of foreign policy decisions for 1978 Secretary of State Cyrus Vance spoke in glowing terms of the American effort to bring about solutions to the difficult racial problems of Rhodesia and South Africa.

Declared Mr. Vance: ". . . we are among the few governments in the world that can talk to both white and black Africans frankly, and yet with a measure of trust."

That is a remarkable assertion to come from the head of a department that has disparaged the current negotiations in Rhodesia between the white governmental leaders and black moderates. The talks are aimed at transferring political power to the black majority without bloodshed. Here are whites and blacks sitting down together at a conference table to try and settle their differences, but the State Department wants none of it.

Mr. Vance's puffery about the administration's ability to communicate with both white and black Africans is all the harder to swallow because of his department's denial of visas late last year to three black tribal leaders from Rhodesia who wished to visit the United States. The three are members of the Zimbabwe United People's Organization, which supports the current talks in Salisbury. But that does not mean ZUPO is a Rhodesian "Uncle Tom" outfit that favors continuation of white rule. Quite to the contrary, ZUPO is seeking the reins of power for itself. But by peaceful means.

What makes the current black-white negotiations and the activism of moderate Rhodesian blacks so unpalatable to the Department of State is that they exclude the black nationalist who are fighting the white government from bases outside Rhodesia using tactics of murder, arson and pillage. Washington wishes to impose a solution on both black and white Rhodesians that would give these black terrorists a share of power.

The non-violent methods that the Rev. Martin Luther King espoused to advance black rights in the United States are not the methods that the Carter administration is encouraging in southern Africa. Any claim by an American spokesman of credit for a black-white dialogue in that troubled region of the world will be spurious so long as Washington continues to favor the warmongers over the peacemakers among the blacks.

[From the Washington Star, Jan. 31, 1978]

SPOILER'S ROLE IN RHODESIA

If the American people understood the spoiler's role which their government is playing in the current Rhodesian negotiations, how long would they tolerate it? Not long, we suspect. They would insist that Ambassador Andrew Young be summoned from the spoiler's conclave at Malta this week, where another attempt is being made to revive the faltering Anglo-American peace plan. And they would probably insist that the U.S. at long last wish godspeed to those who now seem on the verge of negotiating an internal peace in Rhodesia.

This, we say, is what would probably happen if the complexities of the issue were understood. Unfortunately, they are not. It is not widely understood that after years of international clamor, Prime Minister Ian Smith has conceded the principles of universal suffrage and majority rule. It is not widely understood that, in response to this, three moderate black leaders—who are thought by informed observers to represent a considerable majority of Rhodesian blacks—have negotiated with Mr. Smith a new constitution providing for assured "minority" representation (i.e., largely white) in parliament; a bill of rights; an independent judiciary; and other institutional arrangements that seem fair and workable. It is not widely understood that this "internal" breakthrough, proceeding from Mr. Smith's concession of universal suffrage, is on the verge of consummation if it is not derailed by the foot-dragging of U.S., British and UN officials, who seem to think the black negotiators should hold out for tougher terms.

Finally, it is not widely understood that the U.S. is closely identified with the unyielding terrorist-guerrilla "front" led by Joshua Nkomo and Robert Mugabe, which is armed by the communists and supported by the five neighboring "front-line" African states.

The peace terms of these "external" forces are extreme. Although Mr. Nkomo has made occasional noises of moderation, Mr. Mugabe recently threatened to "bash" all the "reactionary" participants in the internal negotiations: a threat that may happily prove idle if peace comes to Rhodesia and his guerrilla troops begin to melt away.

Meanwhile, the Nkomo-Mugabe faction insists that Rhodesia's future must be settled between Great Britain (whose crown colony Rhodesia was before declaring its independence unilaterally in 1965) and their "Patriotic Front," whose "patriotic" activities consist largely of the ruthless murder of women, children and the elderly, mostly black. They insist that Ian Smith be deposed, and that they, the intruders and disturbers of the peace, be handed immediate control of the army and the police. In short, they demand capitulation by the Rhodesian moderates; and they indicate no willingness to compromise.

What is perverse about the U.S. position is that the closer Ian Smith and the black moderates come to an agreement, the more cozily we seem to collaborate with the U.S.-British-UN cabal to undermine it. The Economist's Salisbury correspondent reported, on January 21: "There are signs that the (Patriotic Front) is speeding up the war and deliberately picking on black civilian targets in an effort to prevent a peaceful changeover to majority rule. From Salisbury, it appears as if the British foreign secretary, Dr. Owen, and the British commissioner-designate, Lord Carver, are actively discouraging an internal settlement."

In harsher language, the U.S. risks playing accomplice to further bloodshed by pursuing a Rhodesian settlement agreeable to radical outsiders and guerrillas. This is the actual, but we cannot imagine the calculated risk of U.S. policy. Why, then, do we take so sour a view of the heartening chances of internal peacemaking?

The reasons must necessarily be a matter of speculation. In Washington, we suppose, it may be thought more important to appease the demands of Rhodesia's "front-line" neighbors than to bring internal peace to the country. The effect of that policy, intended or not, is to sacrifice the moderate majority in Rhodesia, black and white, to considerations of African realpolitik.

This is discreditable enough. It becomes unconscionable if one considers how close Mr. Smith and the black moderates are to a peace settlement and a new constitution. As noted by Morley Safer on the CBS program "60 Minutes" Sunday evening, Rhodesia is one of the few functioning biracial societies in Africa. It is not a police state. Its segregationist policies are disappearing. The army and police are predominantly black, and, so organized, can hardly be accounted dependable instruments of white tyranny.

In bitter truth, the Anglo-American policy on Rhodesia seems to be influenced not only by dubious strategic calculations, but also by an uncharacteristically petty-minded British resentment that Rhodesia has made a success of unauthorized independence. Against all odds and predictions, Rhodesia has become a country in being. It needs only the support of the outside world to make reasonable democratic terms with the black majority.

That the U.S. might not only neglect but actually undercut this success is an offense to sense and conscience. Let us call a halt to this foolish policy—now.

CONGRESSIONAL BLACK CAUCUS LEGISLATIVE AGENDA

HON. PARREN J. MITCHELL

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. MITCHELL of Maryland. Mr. Speaker, I am inserting into the RECORD the Congressional Black Caucus legislative agenda for the 2d session of the 95th Congress. This is the fourth formal legislative agenda presented by the Caucus, and it defines the primary legislative goals for 1978 for the caucus and for many persons who look to us for leadership in the national policymaking process. We hope that each of our colleagues, and many others throughout the Nation, will look closely at the objectives and legislative proposals set forth in the agenda and will lend us their support during the coming year.

This year, the Congressional Black Caucus' primary legislative agenda item, as it has been for the past 3 years, is passage of the Full Employment and Balanced Growth Act (H.R. 50), the Humphrey-Hawkins bill. This year the House and Senate will act on the Full Employment bill, and we expect that it will be passed. setting into law a national commitment to the elimination of unemployment. It will then be our task jointly with the administration to define the specific economic policies to eliminate unemployment. We urge that each subcommittee and committee, and the full House and Senate, include in deliberations on each piece of proposed legislation a review of its impact on job creation. In that way, we will be able to rapidly implement the policy in the Humphrey-Hawkins Full Employment Act.

CONGRESSIONAL BLACK CAUCUS LEGISLATIVE AGENDA

Over the last year, the Congressional Black Caucus has developed its role of working together with a President of the same party while maintaining its independence to speak out on issues as its members see them. It has been a year of notable successes. The Full Employment and Balanced Growth Act (H.R.

50), the Humphrey-Hawkins bill, has been endorsed by the President and will be acted upon by the Congress early this year. Progress has been made in strengthening equal opportunity law enforcement, in providing set-asides for minorities in public works programs, in raising the minimum wage and in applying additional pressure aganist the illegal South African regime. Congress passed legislation prohibiting the importation of Rhodesian chrome because of that country's illegal regime. Appropriations for health, education and welfare programs were increased, and a major effort to limit those appropriations was defeated. Additional jobs for youth were created in the Youth Employment Act.

These are clear legislative gains. They occurred, in part, because of efforts by the Congressional Black Caucus, and also because people and organizations across the country participated in the political process by letting their representatives in Congress know of their support for these bills. Only with a national legislative support movement can the effort to pass legislation to benefit underrepresented groups succeed.

Each year, since the first Congressional Black Caucus Legislative Agenda was published in 1975, we have attempted to specify particular legislation supported by the Caucus while providing a brief discussion of the substance of that legislation. In the Agenda this year, we continue to stress a brief description of the Caucus' position and encourage individuals to write to the Caucus Members and to their own Representatives and Senators to gain additional information about the legislative proposals supported by the Caucus.

FULL EMPLOYMENT (HAWKINS, CONYERS)

Goal: National commitment to the principles of the Humphrey-Hawkins Full Employment Act and delineation of specific economic policies in monetary and fiscal terms and in terms of programs to address structural unemployment. The Congress must this year pass the Full Employment Act setting an interim target of no more than 4 percent unemployment in 5 years.

Status: The Humphrey-Hawkins bill has been endorsed by the President, has 69 cosponsors, and is expected to be acted upon by the House by March and by the Senate soon after.

Bill No. H.R. 50/S. 50.

EQUAL OPPORTUNITY/AFFIRMATIVE ACTION (HAWKINS, CLAY, BURKE, JORDAN)

Goal: There are four clear goals in furthering equal opportunity efforts: (1) strengthen legislation protecting civil rights: (2) reorganize the Federal civil rights enforcement agencies so that the machinery for enforcing the civil rights laws is more effective: (3) support affirmative action efforts and require set-asides for minorities both in legislation and by executive action; (4) defeat restrictive amendments designed to weaken the civil rights laws (such amendments have been offered to a variety of legislation in the past several years).

Status: (1) a bill to strengthen title VI of the 1964 Civil Rights Act was introduced at the end of 1977; (2) independently, the Office of Management and Budget has recommendations to the President for reorganithe Federal equal employment opportunity agencies designed to strengthen the enforcement machinery in this area. The Caucus, in February 1977, submitted firm recommendations to the President for reorganizing the equal employment agencies, and these recommendations stand as a guideline; (3) the *Bakke* case, which may have broad implications for affirmative action, is expected to be decided by the Supreme Court by Spring; a set-aside amendment was adopted to the Public Works bill in 1977; (4) amendments restricting civil rights laws may be offered to any legislation, but most have frequently been offered to the Labor-HEW appropriations bill.

Bill No. (1) The bill to strengthen title VI is H.R. 9329 and would provide timetables for fund cutoffs for civil rights violations and provides for strict enforcement of the 1964 Civil Rights Act; (2) the President's reorganization proposal is expected to be submitted to the Congress in February and will receive a bill number at that time; (3) affirmative action and set-asides are relevant to all legislation; (4) the Labor-HEW appropriations bill is not given a number until it is offered for House floor action, probably about June.

MINORITY BUSINESS DEVELOPMENT (MITCHELL)

Goal: To increase substantially minority participation in business, including gaining the benefits of government spending, and to reorganize Federal agencies concerned with minority enterprise. The Minority Enterprise Act would centralize minority small business programs under an Assistant Administrator of the Small Business Administration, increase maximum loan amounts, provide set-asides for minority businesses, and waive bonding requirements for minority small businesses. It is intended to make a major breakthrough in minority economic development and to move minorities further toward economic parity.

Status: Hearings were held during 1977 on the legislation before the Minority Enterprise Subcommittee of the House Small Business Committee. Action by the House and Senate are expected during 1978.

Bill No. H.R. 567

POLITICAL PARTICIPATION (FAUNTROY, JORDAN)

Goal: To simplify voter registration procedures and to encourage political participation by all persons, particularly by minorities, who continue to vote less frequently than others.

Status: Legislation to eliminate the requirement for voter registration prior to election day was not considered by Congress last year due to heavy political opposition. Bills to simplify voter registration by permitting persons to register by mail are still pending. Legislative action and enforcement actions, such as for the Voting Rights Act of 1965, remain necessary to ensure full political participation by all persons.

Bill No. H.R. 5400 (the universal registration bill not considered last year); H.R. 2347 (registration by mail).

FOREIGN AFFAIRS (DIGGS, COLLINS, NIX)

Goal: Primary aims are to bring about majority rule in South Africa and Rhodesia and provide greater economic assistance and trade benefits to the Third World Nations. The Administration must commit itself to firm steps to bring about majority rule in southern Africa, and the Congress must pass additional legislation providing diplomatic and economic sanctions against South Africa.

Status: While an important bill—banning Rhodesian chrome imports—and an important Resolution—condemning South Africa for its repressive actions and calling for effective actions against that country—were passed by the House, legislation providing specific economic and diplomatic sanctions against South Africa has not been passed. Also, few of the twelve points for actions recommended by the CBS have been implemented by the Administration.

Bill No. H. Con. Res. 94, H. Con. Res. 356, H. Con. Res. 357, H. J. Res. 338, H. J. Res. 379, H.R. 5796, H.R. 9102, H.R. 9103. H. Res. 931, H. Res. 913, H.R. 9754, H. Con. Res. 414, H.R. 10091, H.R. 9746.

URBAN POLICY (MITCHELL, DELLUMS)

Goal: There must be a firm commitment to coordinate programs with adequate funds to make an advance against the physical and social ills of the cities and against similar conditions in non-urban areas. These policies must be under the overall umbrella of a full employment policy. The urban policy must address housing revitalization, improvement of other physical conditions and provide a broad-based attack on other aspects of urban ills such as crime, educational shortcomings, public assistance needs and others. There must be a clear commitment to provide the aid to persons with the greatest need, while recognizing the general fiscal needs of the cities.

Status: An Administration task force is presently revising a policy for presidential approval, following widespread criticism of an initial draft. The President has stated an unwillingness to provide major new funds for old programs, but left open the possibility of additional funding for new programs. The final plan is expected in March.

Bill No. A variety of legislative initiatives will be required to implement an urban policy, and much of the legislation coming before Congress this year will have an impact on urban areas.

EDUCATION (CHISHOLM)

Goal: To greatly improve public school education, provide equality of educational opportunity, and in higher education to provide greater resources to predominantly Black colleges and universities, increase the number of predominantly Black medical schools, and provide greater access of minority students to other universities and colleges in undergraduate, gradute and professional school studies.

Status: The major legislative issue in 1978 will be renewal and revision of the Elementary and Secondary Education Act. The Congressional Black Caucus supports H.R. 9968, a major bill which retains the present Title I focus on educationally and economically deprived children. This bill includes revisions which would ensure assistance to the students most in need, strengthens parent involvement and auditing procedures and provides for summer programs and a progam for gifted and talented children. In addition, H.R. 250 would ensure that lower-income children participating under the Title I program remain eligible for assistance through grade 3, notwithstanding improvements in their reading aptitude, to ensure that gains made by young children are not quickly lost.

Bill No. H.R. 9968.

WELFARE REFORM (HAWKINS, CLAY, RANGEL, FORD, CHISHOLM)

Goal: To bring about a major reform of the welfare assistance system which provides decent jobs to those able and seeking to work, adequate cash assistance to those in need, elimination of oppressive requirements to obtain assistance, provision of adequate social services and humanization of the welfare system in general.

Status: The House Welfare Subcommittee has completed a major portion of the markup on the welfare bill submitted by the Administration. Congressional Black Caucus testimony raised major concerns about the Administration bill. The picture for welfare reform this year is not clear, with talk of alternative legislation from the House and the possibility that only minor changes in the law will result from the process.

Bill No. H.R. 9030 (Administration bill)

HEALTH (STOKES, METCALFE, DELLUMS, FORD)

Goal: To provide adequate health care protection for every person in the country both prior to and during illness. Legislation to provide a National Health Service Act, or in the alternative, a system of National Health Insurance operated by the Federal government, should be passed to implement the protection.

Status: A bill to create a National Health Service System and several bills to provide a system of national health insurance have

been introduced in Congress. The Administration is expected to introduce its national health insurance bill toward the end of 1978.

Bill No. National Health Service Act—H.R. 6894. Health Security Act (Kennedy-Corman)—H.R. 21/S. 3.

COMMUNICATIONS (CLAY, STOKES)

Goal: To provide access to all forms of mass communication, printed and electronic, to minorities and to greatly increase minority ownership of media. In addition to ownership, this includes programing more responsive to minorities, more minorities hired in all aspects of media, greater minority involvement in publicly supported broadcasting and better coverage of minority viewpoints by all media.

Status: The Communications Act of 1934 will be rewritten during the 1978 congressional session and the Congressional Black Caucus will be proposing amendments to that legislation to achieve the stated purposes.

Bill No. —. Not yet introduced.

The preceding list of major legislative goals are, for the most part, specific proposals with potentially significant impact. Each year. however, Members of Congress vote on innumerable issues and a large number of bills are introduced. A review of the Caucus' legislative agenda for the past 3 years indicates other legislation which the Caucus has supported and continues to support. In particular, the Congressional Black Caucus supports passage of: (1) The bill to make the birthday of Dr. Martin Luther King, Jr., a national holiday (H.R. 2973); (2) full voting representation for the District of Columbia (H.J. Res. 554); (3) the transfer amendment to the budget resolution to shift funds from military purposes to domestic needs; (4) labor law reform (H.R. 8410, S. 1883); (5) the Consumer Bank bill (H.R. 2777).

1978: THE YEAR FOR TAX INDEXATION

HON. LAWRENCE COUGHLIN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. COUGHLIN. Mr. Speaker, for years the Federal Government has reaped a hidden reward from inflation because of a tax system which taxes rising dollar incomes at ever higher rates while purchasing power in real terms stays the same or actually declines. The average taxpayer is awakening to the fact that the tax cuts Congress votes for him every few years really do nothing more than repeal the built-in tax increases which take place as inflation steadily pushes his dollar income into higher brackets where it is taxed at a higher rate.

As chief House sponsor in this and the past two Congresses of tax indexing legislation which would correct this inequity by requiring automatic annual cost-of-living adjustments in the tax rates, standard deduction, personal exemption, depreciation allowance, capital gains, and interest on certain U.S. obligations, I regret that President Carter's long-awaited proposals for revision of the tax code ignore this fundamental reform.

Tax indexing has gained broad bipartisan support not only in Congress but from such national figures as Leonard Woodcock, former president of the United Automobile Workers, and Walter Wriston, president of the First National City Bank. The Wall Street Journal has repeatedly called for the adoption of tax indexing and the National Taxpayers Union has endorsed it. Furthermore, a staff study prepared last year by the Joint Economic Committee concluded that present tax schedules aggravated the 1974–75 economic downturn and that indexing the tax rates to offset the impact of inflation would contribute to economic stability.

Once again I urge the Ways and Means Committee to heed these voices as it considers the issues of tax reform this year. 1978 can and should be the year in which Congress enacts meaningful tax reform and there is not more logical or compelling place to begin than with tax indexing.

On January 31, 1978, The Washington Post reprinted an article from The National Journal entitled "Indexation: An Idea Whose Time Has Come" by Robert J. Samuelson. It is a cogent explanation of what tax indexing is and why it makes such good sense. I insert it in the RECORD at this point:

[From the Washington Post, Jan. 31, 1978]

INDEXATION: AN IDEA WHOSE TIME HAS COME

(By Robert J. Samuelson)

Tax indexation is an idea whose time has come—and this year is going to prove it.

Though indexation sounds complicated, it actually is simple. It means that the government automatically corrects the income tax system to prevent inflation from kicking taxpayers into higher and higher brackets. Assume, for example, that inflation raises a family's income 10 percent. It goes into a higher tax bracket, and its tax rate increases even though its "real" income hasn't. Without indexation, Congress must pass a major tax "cut" every few years to prevent this invisible tax increase.

That's precisely what has been happening. Assuming a tax package passes in 1978. Congress will have approved major tax reduction bills in three of the past four years. So long as inflation persists at a 5 percent to 6 percent annual rate, the cycle will continue.

The defects of this system are now becoming increasingly clear.

Most important, it's fundamentally dishonest. It confuses the average citizen and, indeed, possibly the average congressman. It puts the nation's highest officials, starting with the president, in the foolish and ultimately self-defeating position of pushing half-truths on the public. They promise tax reductions, but in the main, all they are doing is repealing automatic tax increases.

Average taxes, as a percentage of personal income, are declining largely against what they would have been, not what they were. Even if President Carter's program passes as proposed the average tax level is estimated to be higher in 1979 than in seven out of the past 10 years, as the following table indicates. It shows federal income taxes as a percentage of personal income since 1969:

	Percent
1969	11.6
1970	10.5
1971	9.9
1972	9.9
1973	10.3
1974	10.7
1975	9.9
1976	10.2
1977	10.1
1978 (est.)	10.3
1979 (est.)	10.5

Bombarded from Washington with propaganda about the beneficence of tax cuts and confronted with a largely static tax bill, the average taxpayer sooner or later is bound to react in anger and disillusionment.

A second flaw of the current system is that it hampers economic policy and increases the likelihood of an economic downturn or recession. In the days when inflation crept along at an annual rate of 1 percent to 3 percent, the dynamics of the income tax system were thought to represent a helpful "automatic stabilizer." If inflation increased, incomes would rise and, consequently, so would the tax bite. That would reduce consumer spending, the economy would slow, and inflationary pressures would abate. This was a comforting notion.

Unfortunately, it does not sit well with reality. As the past few years have demonstrated vividly, inflation has an independent momentum. Through powerful unions, oligopolistic companies, government fiat and social custom—the idea that everybody should stay "even"—inflation gets perpetuated, checked only feebly by weak constraints.

In this climate, the "automatic stabilizer" simply puts the economy on its backside—or threatens to do so—with a mild impact on inflation. There is then a rush to pass a tax cut to revive the economy.

The outlook for 1978 illustrates the risks. Many economists worry that the economy may slow down in the second half of the year, in part because the rising tax bite will curb consumer spending. But the administration doesn't think it can possibly get its tax cut passed before Oct. 1. So Carter's economists are forced to bite their nails and hope that the timing turns out right.

A final defect of the existing anarchic approach is that it constitutes a cruel and unusual punishment of congressmen. This, of course, contradicts the conventional wisdom that politicians like nothing better than approving tax cuts and then basking in the ensuing public approval. Many congressmen may have once embraced this simple logic. but, by now, a more complicated reality is forcefully asserting itself.

That reality is that Congress stirs up as much grief as gratitude when it acts on a major tax bill. Every interest group that feels entitled to some new tax break, or simply wants to protect an existing benefit, makes a pilgrimage to Capitol Hill. Any congressman is bound to disappoint some of these petitioners. And the more big tax bills there are, the greater the opportunity for offense.

Moreover, on the other side of the political ledger, public gratitude for tax reductions is increasingly tempered by the realization that they largely represent a holding action against inflation. The political arithmetic of this process is not especially favorable. The more the cycle of phantom tax cuts occurs, the worse the arithmetic will become. Ultimately, Congress is bound to search for an exit.

Indexation would minimize its problems. Although adjusting corporate and business taxes for inflation is difficult, the necessary alterations for the personal tax present no insuperable technical problems. Tax rates, deductions, exemptions and credits can automatically be changed to reflect inflation.

Indexation wouldn't—and shouldn't—exempt Congress from the necessity of changing the tax laws. There are fundamental political and social problems that will not conveniently vanish. As Social Security taxes

rise (reflecting the program's higher costs), should Congress let the total federal tax bite increase, or should it cut some existing spending? Should the tax system be used more aggressively to promote income redistribution or, on the other hand, investment?

Regardless of what it does, Congress will have a difficult time permanently evading these issues. But, already overburdened by complicated problems that it only dimly understands, it does not need to create added uncertainties by having to fiddle with tax rates every 18 months.

HOW I REMEMBER IKE

HON. JOHN P. HAMMERSCHMIDT

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 25, 1978

Mr. HAMMERSCHMIDT. Mr. Speaker. Dwight David Eisenhower will always enjoy a very special place in the national memory. The respect, appreciation, and affection felt for him transcends partisan politics and conflicting philosophies.

He was self-effacing. But he was gregarious. His love for people was well established. His spirit of good will and well-being was contagious. Respect for him was universal.

He hated war. But he became one of history's greatest wartime military commanders. He was a commander charged with more than bringing conflicting national elements together. His was the greater job of bringing conflicting international elements together. He did it well. The war in Europe was brought to its appropriate conclusion, in Eisenhower-commanded Allied victory.

He had little zest for politics. Yet, even as his job as Allied commander, Europe, sought him, so did his job as President. In that job, as in the earlier job, he went about it calmly, and without great, self-seeking fanfare. Yet, there never was any question about his interest in America, and her future.

I remember when, as a newly elected Member of Congress, I had the privilege of visiting him at his Gettysburg farm. He was, of course, in well-earned official retirement from the world and national cares which, so so long, he helped to bear. But he still demonstrated an enormous interest in the continuing course of world and national events. Needless to say, he also continued to demonstrate great pride, faith, and confidence in America and in her people.

In contemplating his place in history, I can only conclude that he was, certainly, one of those rare men of destiny who, in war, and in peace, was the right man, in the right place, at the right time.

In contemplating, specifically, his more obvious Presidential contributions, I remember him as the President who kept his campaign promise to bring the Korean conflict to an end. I remember him as the President who kept his campaign promise to restore calm to America. He was, of course, too experienced a leader to attempt to be an activistic Chief Executive when such was neither needed nor desired.

So, I miss him—particularly amid efforts, by some, at hyperactivism when, again, the people plead for calm. I miss him, too, in this era of half-trillion-dollar budgets when the people plead for easement from the resultant burden of high taxes and high inflation.

And, I am certain that we all miss his fiscal sanity which, among other things, gave this Nation 2 years of back-to-back budgetary surplus.

ATTACK ON FIRE

HON. HAROLD C. HOLLENBECK

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. HOLLENBECK. Mr. Speaker, I was appalled to learn of the enormity of fire losses in this country; 7,500 deaths and 300,000 injuries a year. The Federal Government is only appropriating very small amounts, on the order of $12 to $14 million a year to the Fire Administration. This year the request is just under $18 million, whereas for medical research alone we appropriate billions of dollars. It appears to me, the lack of visibility and support for the Federal fire program is itself symptomatic of the fact that people in this country are generally unaware of the enormous toll that fire takes. We tend to think of fire as the excitement of clanging trucks and dramatic blazes, but this represents a tragedy to the person involved, it is not a game, it is not a pretty picture in a newspaper, and it is time that these attitudes change.

We must work much more diligently on fire prevention and adequate warning. In Japan, I am told, it is a social disgrace to have a fire, to have one's house burn, not a moment of excitement. In this connection, I have introduced legislation to permit individuals a tax deduction for the purchase of smoke detectors. But adequate warning is only one small step in a much larger picture. We must train members of the fire services, who themselves undergo enormous risks, to the importance of fire prevention and in this I see the National Fire Academy playing a vital role. I, too, am shocked to learn that the administration does not intend to ask for funds to complete the renovations of the recently purchased site at Marjorie Webster Junior College in Northwest Washington. We need, too, much better data on fire so we can understand the causes and not just the symptoms of our national fire problem. To this extent I am pleased by the progress that the Fire Administration has made in developing the National Fire Data Center. Two States are reporting complete data on fire losses and 19 more are joining the system this year. However, we have a long way to go, and I am sorry to say that my own home State of New Jersey has not yet joined the National Fire Data System and that many States including those believed to have the highest fire losses have not seen fit to join the national data system.

In conclusion let me say that I think the moment is near at hand for the Congress to decide whether it seriously intends to mount a coordinated national attack to assist States in combating the epidemic of fire or whether it will merely continue to pay lipservice to fire prevention in this country. I do not think that we have arrived at the turning point yet for we must receive the mandated report on master planning and receive more complete data from the national fire data system. However, I hope these hearings will provide us with the information we require, not only to determine the proper authorization for the Fire Administration and the Center for Fire Research, but also to set the stage for an aggressive Federal attack on fire.

CHICAGO TRIBUNE COLUMNIST POINTS TO FRA PROBLEM

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. SIMON. Mr. Speaker, as I have discussed with some of my colleagues, the Federal Railroad Administration, one of the slowest moving agencies in the entire Federal bureaucracy, has spent some years trying to determine whether or not railroad locomotives should have strobe lights or some other type of light to warn cars that may cross on unguarded crossings.

They have had three studies already, all of which have indicated they should go ahead and have strobe lights, but, apparently, they are waiting for higher fatality figures or who knows what. They have now indicated to me that come August, they are going to render a decision. In the meantime, approximately 100 people a month will be killed in collisions between automobiles and trains.

Michael Kilian writes a column for the Chicago Tribune and commented on all of this recently, and I thought my colleagues might be interested.

DIM U.S. RAIL AGENCY PUTS A BRIGHT IDEA ON SIDETRACK

(By Michael Kilian)

WASHINGTON.—Among the many things I've never cared much for is being run over by a train.

Give me the choice betweeen spending a week tea dancing with Candice Bergen in St. Tropez and being run over by a train, and I'll take the tea dancing every time.

Unfortunately, I seem to stand a much better chance of being run over by a train. I think the odds are that I would be run over by a train seven million times before once even getting to say hello to Miss Bergen.

Congressman Paul Simon would like to improve those odds—not, alas, by introducing me to Miss Bergen but by reducing the chances of me or anyone getting hit by a train.

Last year, no fewer than 1,200 people died in automobile-train accidents. Some of these cases involved disregarded crossing signals; some, malfunctioning crossing signals; some, nonexistent crossing signals. But nearly all shared one common factor: The driver didn't see the train approaching.

This wasn't necessarily negligence, as I learned some years ago. At the time, I was driving through a little town named Big

Bay Station in Congressman Simon's southern Illinois district. I don't know why the town is named that; it has no station, no bay, and nothing at all big.

At the edge of town [everything in Big Bay Station is at the edge of town], the main tracks at a crossing marked only by a stop sign. I obediently stopped, noted the tracks, looked, listened, and then moved ahead.

Halfway across, I heard the deep blast of a diesel locomotive horn as a train materialized out of absolutely nowhere, missing my scampering Volkswagen by only a few feet.

A great mind like Ralph Nader's would deal with this problem by requiring the installation of devices in automobiles that would prevent them from crossing railroad tracks. Congressman Simon has a simpler idea, rare though such things are among our Nation's lawmakers.

Why not, he asks, equip the Nation's 34,500 railroad locomotives with flashing strobe lights? That would make them extremely easy to see, even from long distances. Such lights have been installed on jetliners and some emergency vehicles with great success.

Even better—and even rarer for something thought up by a congressman—the cost would be low. Only about $500 per locomotive. The average railroad must spend that much every day on new playing cards and coffee pots for its train crews.

It is a peculiarity of our government that its regulatory agencies in time come to resemble the industries they're supposed to regulate, just as chameleons take on the color of their surroundings. Our Nation's sluggish railroads are overseen by the Federal Railroad Administration.

Simon made his strobe light suggestion to the FRA nearly two years ago, just after a train wiped out 11 children and one adult near another town in his district.

Since then, the FRA has been studying the matter.

It has completed three studies and has embarked on a fourth. It has spent $260,000 on these studies, enough money to install strobe lights on 520 trains. In all of these studies, the closest thing to an objection raised was the notion that the flashing lights might induce epileptic seizures, although neurosurgeons say there is no danger of that even with flashes as fast as three a second Amtrak, of all things, has begun ordering strobe lights on the new locomotives it buys.

The FRA, whose flashes do not come three to a second, says it may arrive at a decision as soon as next August.

Ha. Sooner will you see Candice and me dancing at Cap D'Antibes—with strobe lights strapped to our foreheads. But that's not all you'll see first.

Since Simon made his suggestion, more than 2,000 people have been killed by trains—clickety-click, clickety-click.

TRAFFIC SAFETY EDUCATIONAL PROGRAM IN NEW JERSEY

HON. EDWARD J. PATTEN

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. PATTEN. Mr. Speaker, David H. Mayerowitz, member and secretary of the New Brunswick, N.J., Traffic Safety Commission, spoke recently at a regional seminar of the New Jersey State Safety Council in Morristown.

In his address, Mr. Mayerowitz made several recommendations on pedestrian and two-wheel vehicle safety. The recommendations should be seriously considered.

They would help senior citizens, the physically handicapped and blind persons. Several organizations have expressed support for the recommended programs.

Mr. Speaker, Mr. Mayerowitz is an active, dedicated leader in the traffic safety field, so I am inserting an analysis of his recent speech in the CONGRESSIONAL RECORD with the hope that my colleagues will become familiar with some of the fine work he and others are doing to help people and to improve traffic safety:

REGIONAL SEMINAR ON PEDESTRIAN AND TWO-WHEEL VEHICLE SAFETY

Colonel David H. Mayerowitz, a Traffic Commissioner of the New Brunswick Traffic Safety Commission of New Brunswick, New Jersey addressed members of the conference and made the following constructive statements in the interest of formulating traffic safety programs relating to senior citizens, the physically handicapped, and blind persons.

Colonel Mayerowitz stated that he has conducted a research survey in regards to initiating a traffic safety education program in the State of New Jersey. According to his findings, senior citizens, the physically handicapped, and especially blind persons have been put in double jeopardy at busy intersections in business Districts where there are signal lights and crosswalks due to the fact that the State has initiated a right turn on red light law under title 39 of the revised statutes of the State of New Jersey. Further hazardous conditions in many of the cities throughout the State have been caused by bicycle riders of school age, college students, and adults who use sidewalks and walkways of shopping centers as bike paths. To safeguard these citizens of New Jersey, he suggests that new rules and regulations and new ordinances be adopted regarding bicycles, mopeds, and that signs should be erected in all municipalities at schools prohibiting right turns on red lights to protect senior citzens, the physically handicapped, and blind persons who use the facilities. He further recommends that a digest of the new traffic laws regarding a two-wheel vehicle, especially, the mopeds, and the turn right on red light be printed in Spanish and Braille under a Federal grant by the Traffic Safety Division of the New Jersey Department of Transportation and be distributed to the Spanish-speaking people and to blind persons as part of an educational traffic safety program to keep the State of New Jersey number 1 as the safest State in the Nation.

To further ensure the execution of his proposals, he also suggests that the New Jersey safety council recommend to all county safety councils the immediate adoption of resolutions in the interest of senior citizens, the physically handicapped, and blind persons and their safety and to forward copies of their resolution to the proper authorities so that this issue of vital importance can be expedited quickly in a successful traffic safety educational program.

NEW STAFF MEMBER

HON. HELEN S. MEYNER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mrs. MEYNER. Mr. Speaker, it is with great pleasure that I announce to my colleagues and constituents the name of the newest addition to my staff: Andrew A. Berrigan, III, born this morning to my press secretary, Tom Berrigan, and his wife Cesarina.

A GUIDE TO THE HUMPHREY-HAWKINS FULL EMPLOYMENT ACT

HON. PARREN J. MITCHELL

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. MITCHELL of Maryland. Mr. Speaker, the Humphrey-Hawkins Full Employment and Balanced Growth Act, which the Congressional Black Caucus has championed for the past several years, is now set for House action at the end of February. While the bill is now widely known by name, it is still little understood. I am inserting in the RECORD an explanation of the Full Employment Act which explains its provisions and purpose. I hope that each Member of the Congress, and other persons throughout the country will read this summary and the bill, itself, as we move to enact into law a national full employment policy.

A GUIDE TO THE FULL EMPLOYMENT AND BALANCED GROWTH ACT

In late 1977, the Humphrey-Hawkins Full Employment and Balanced Growth Act, H.R. 50 in the House and S. 50 in the Senate, became the central focus of national debate as President Carter gave his formal endorsement to the bill. Even though the Humphrey-Hawkins bill has been discussed for a number of years, it is still little understood, and at times misinterpreted. This paper is intended to give a simple and straightforward description of the bill and its provisions and purpose.

WHAT IS THE HUMPHREY-HAWKINS FULL EMPLOYMENT ACT?

Very simply, the Full Employment Act is an economic policy bill which focuses the Nation's resources on greatly reducing unemployment while controlling inflation. It does this by setting forth a specific goal to be reached in a specific time period and by requiring the President to submit an Economic Report to the Congress each year spelling out the programs and policies to reach the goals set. It is the President's responsibility to propose the programs and economic policies which will reduce the unemployment rate consistent with the goals and timetable. The Congress would be required to pass a resolution approving these or alternative policies, and the resolution would serve as a guide to Congress on legislative action to achieve full employment.

The goals and timetables are extremely important. It must be understood that the Humphrey-Hawkins bill simply amends existing law—the Employment Act of 1946—to strengthen that existing law. For instance, where the 1946 Act calls for "maximum employment", the Humphrey-Hawkins bill calls for a meaningful job for every person able, willing and seeking to work at fair rates of compensation and for no more than 4 percent overall unemployment within no more than 5 years. The Humphrey-Hawkins bill clearly states that this is an "interim" goal, and that the ultimate goal is to provide a useful job at a decent wage to everyone willing and able to work. Rejected outright is the idea that we must accept a so-called "tolerable" level of unemployment.

HOW WILL THE HUMPHREY-HAWKINS BILL ACHIEVE FULL EMPLOYMENT?

Each day, the Federal government makes thousands of decisions which affect the number of jobs which will be created in the private economy. Some of those decisions are large decisions with great impact, such as tax increases or decreases, the setting of interest rates, the level of federal spending, amounts of federal dollars going to different geographic areas and to different sectors of the economy. Included are subsidies, grants, loans, guarantees, and outright contracts to provide goods and services.

For example, if a certain program distributes money to every city and town in the country, regardless of the unemployment level, a smaller percentage of the money is likely to be used to create jobs than if all the money went to cities and rural areas with high unemployment.

A decrease in interest rates may result in greater borrowing and investment in industries which will produce more jobs. A tax decrease for certain income groups might stimulate spending resulting in more goods being produced and more people hired to produce them.

The major economic powers of the Federal government consist of fiscal (taxation and spending) and monetary (money supply and interest rates) policies. These have generally been used to stimulate aggregate demand or purchasing power.

Often these powers have not been used effectively, resulting in recessions and inflation. Since 1969, for example, the Federal government has deliberately followed a policy of maintaining high unemployment as a means of fighting inflation despite the fact that no evidence indicates inflation is caused by too many people working, but just the opposite.

The Humphrey-Hawkins bill prohibits such a trade-off and requires that the means used to reduce unemployment and inflation must be mutually self-reinforcing. For example, putting people to work producing goods in short supply or in skills where shortages exist both reduce costs and prices as well as unemployment. It is also true that ending discrimination against women, minorities and our aged would increase production and employment and decrease inflation.

The Humphrey-Hawkins bill, by requiring the President to present a plan directed at reducing the unemployment rate to a specific level in a specific time period would require by law that all of these economic decisions which take place each day would be directed toward the primary goal of reducing unemployment.

There is one additional aspect to the means by which full employment will be achieved, and it is one that is frequently misunderstood when the bill is discussed. To the extent that the types of economic policies mentioned above do not reduce the unemployment rate to the levels required in the bill, the President must develop programs to reach the goal. This includes so-called "last resort" jobs. These are jobs funded directly by the Federal Government where employees perform public services which result in the general betterment of the community. Jobs under the Comprehensive Employment and Training Act (CETA) and other manpower programs are such public service jobs, and expansion of these programs is one means by which additional last resort jobs might be created. The bill permits the last resort jobs to be instituted only after two years following the bill's passage, but the President can expand existing programs at any time with congressional agreement.

The confusion has been that many persons have seen the Humphrey-Hawkins bill as simply a bill to create government paid jobs. In fact, as has been shown, it is a bill to require by law that Federal policies work to maximize private employment opportunities, and only those persons who remain unemployed will be employed on Federal public jobs programs.

WHAT JOBS WILL THE UNEMPLOYED TAKE?

The double harm done by the high unemployment rate is that those who desire work cannot find jobs, and that great physical and social needs of the nation in housing, health, food production, energy, education and many, many other areas remain unmet. It is a tragedy that those who want to work are not matched up with the work that needs to be done. While this may sound like a simple concept, the essence of the problem is that the match is not made and that human resources have not been coordinated around priority needs. Economic decisions have not brought together the unemployed and the necessary work to be done within these national priorities.

WHAT GROUPS DOES THE BILL HELP?

As a national economic policy bill, the Full Employment and Balanced Growth Act is aimed at improving the conditions for all people in the country. Its basic, underlying premise is that the economy has not operated to full capacity, and an economy operating at full capacity will improve conditions for all persons.

The bill, of course, will specifically benefit the unemployed—not just minority unemployed, but all the nation's unemployed. It puts the full weight of the Federal government and the laws and policies of the United States behind creating jobs for the unemployed.

The Full Employment Act is very explicit about reducing and eliminating the employment gap for groups with unusually high unemployment rates. These are primarily minorities, young people and women. Among the methods for actieving these goals are targeted training programs and a strong non-discrimination provision.

WHY HAVE THESE GOALS NOT BEEN ACHIEVED? HOW WILL THE BILL HELP?

If full employment is a desirable goal, many ask, why has the government not undertaken the policies to achieve full employment in the past? The answer is first that the Federal government has failed to fully coordinate the large number of programs and policies which affect employment because these were created individually and are responsive to fragmented authorities. Second, there are always competing political and economic pressures which move decisions away from those policies which maximize employment.

There is one very important point to be made on competing economic interests. Some have suggested that significantly reducing unemployment would necessarily result in inflation. There are three answers to this contention: (1) there is substantial evidence that this would not take place; (2) the bill provides strong anti-inflation protections: (3) our economy does not require high unemployment to operate properly, as the theory suggests, and economic policies can be found to achieve low unemployment and low inflation simultaneously.

"Stagflation" is a word which has been used more and more. It describes the situation of high unemployment and high inflation, which presently exists. This contradicts the notion of some economists that high unemployment will control inflation. It is part of the evidence that has been cited by such distinguished economists as Dr. Leon Keyserling, former Chairman of the Council of Economic Advisers, Dr. Robert Browne of the Black Economic Research Center, Professor Robert Lekachman of the City University of New York, Gus Tyler, Assistant President of the International Ladies Garment Workers Union and Dr. Gar Alperovitz of the Exploratory Project on Economic Alternatives. The Full Employment bill, itself, provides seven steps to control inflation, including strong antitrust law enforcement and other action to increase competition in the private sector.

Currently, it is being suggested that 6 percent unemployment is comparable to what 4 percent unemployment used to be, and that perhaps we ought to accept such a goal. Humphrey-Hawkins rejects this idea as both uneconomic and immoral. The bill and its supporters reject the position that our economy requires a high unemployment rate to operate properly. Expanding job opportunities in general and targeting programs to specific groups at the same time is the only way in which the goals and ultimate objectives of full employment properly defined can be achieved.

WHAT ABOUT CRITICISMS OF THE BILL?

"It would be a mistake to regard Humphrey-Hawkins as a legislative paper tiger. . . . Carter's acceptance of Humphrey-Hawkins, which Congress will probably pass early next year, puts the nation's unemployment problem squarely at the center of economic policymaking for years to come. . . ." So said the respected business magazine *Business Week*, November 28, 1977, in commenting on the Full Employment bill agreed to between the President and the bill's proponents in Congress and outside.

There have been two major criticisms of the bill: That it will lead to higher inflation and that it is weak and ineffective. These are, of course, contradictory assertions, and the bill cannot be both at the same time. The inflation argument was answered in the last section.

As for the argument that the bill has been weakened in the negotiating process with the President, the answer is simply that while the bill now gives the President and Congress flexibility as to the exact methods and programs to be used to achieve lower unemployment goals, it continues to require them, by force of law and national policy, to use every effort to reach those given unemployment goals and timetables and ultimate full employment.

The bill requires that the President's annual Economic Report spell out proposals to reach full employment and interim unemployment goals.

The bill requires that the main elements of the President's budget support the full employment goal.

The bill requires incorporating key national priorities in the program for full employment.

The bill requires that the last resort jobs be made available to reach the stated goals if after two years other economic policies are not succeeding in moving the nation to the goals.

The bill requires the use of tools such as training and counseling programs, youth employment programs and other microeconomic tools to attain the goal.

The bill requires the Federal Reserve Board to transmit to Congress its intended policies for the year ahead and their relationship to the short-term goals in the President's Economic Report.

What the current version of the bill does that it did not do in the past is to allow the President to set forth the proper mix of these policies and programs to achieve the goals. But the law would require that the goals be met. That is not weakening the bill; it is merely providing flexibility as to how the goal is achieved, not whether it should be achieved.

These arguments have been made by the bill's authors, Congressman Augustus Hawkins and the late Senator Hubert Humphrey, and by its major proponents, and their validity has been affirmed by some of the major economic commentators in the nation. The

chief economic correspondent for the New York Times, A. H. Raskin, wrote that:

"The Humphrey-Hawkins bill is much more than a palid extension of the Employment Act of 1946. If enacted next year in anything like its present form, it will establish targets for economic activity and jobs involving a degree of specificity the nation has never known before." (November 20, 1977).

The chief economic writer for the Washington Post, Hobart Rowen, made the same point:

"There is much more than meets the eye in the compromise Humphrey-Hawkins "full employment" bill . . . the vigor of the attack on this latest Humphrey-Hawkins version should suggest to the careful observer that the proposal would, in fact, have an impact on the economy and the way economic policy is made. . . . Complying with the timetables would not be optional. . . . The Humphrey-Hawkins bill, as it emerges now, with Carter's cooperation, is worthwhile." (November 17, 1977).

The respected Black journalist, Carl Rowan, made the same point:

"It does something very important: It establishes the right of all Americans to a useful job at fair wages. We have never before had such a specific national commitment. . . . You ought to understand what I am sure Jimmy Carter understands: While the compromise gives the President some flexibility, he cannot change the 4 percent goal without Congressional agreement. . . . I hope the Congress passes the Humphrey-Hawkins bill." (Washington Star, November 21, 1977).

The Congressional Research Service of the Library of Congress, in an analysis of changes made in the bill through negotiations between the President and bill's sponsors, said:

"A close review of the January 1977 version of the Humphrey-Hawkins bill and the November 1977 version indicates that very few changes have been made to the major provisions of the bill." (November 18, 1977).

A Business Week magazine editorial summed it up, "There should be no doubt that Humphrey-Hawkins can and will be used to maintain pressure on Carter and future Presidents to fight unemployment." (November 28, 1977).

We will not even begin to move toward full employment unless every person concerned about the tragedy of continuing high unemployment speaks out and works for passage of H.R. 50, the Humphrey-Hawkins Full Employment and Balanced Growth Act.

POSTAL SERVICE CRISIS

HON. JAMES M. HANLEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. HANLEY. Mr. Speaker, what would happen if no one bought balcony seats in a theater, or the airlines could not book any tourist class seats, or the telephone company could get no business during its nonpeak hours. It is simple, either prices would have to go up drastically for the orchestra seats, first-class fares or peak-hour telephone calls or services would have to be cut even for those who continued to use them.

Sounds like a farfetched situation. No business would be stupid enough to throw away revenue which was important to the maintenance of a sound and balanced service.

No one, that is, except the Postal Service.

I have spoken many times of the problems facing the Postal Service and its patrons. Constant financial crises have eroded public and Congressional confidence in the Postal Service. Employee morale seems to hit a new low every day. Electronic communications has thrown into serious question the very future of the Postal Service.

Now, however, we are facing a new and potentially dangerous situation, the diversion of large quantities of mail not covered by the private express statutes into alternative sources of delivery.

Since we would still be required to maintain an extensive postal system to service first-class customers, those customers would be socked with a whopping bill far in excess of the increases suffered so far.

It is convenient to say that those who use first-class mail are really subsidizing other, less expensive, classes of mail. This is a vast oversimplification which, if totally accepted, could lead to even more substantial increases in first-class rates. The average postal patron is being misled if he or she believes that reasonable postal rates can be maintained if some of the less expensive classes of mail are dropped. Regular rate second and third-class mail provide valuable additional income. Loss of this income would not be offset by commensurate declines in costs—unless substantial service reductions are instituted. This leaves only one person to pick up the tab either through increased mail rates or through even greater subsidies.

However, postal rates have been so greatly increased during the past 7 years for third-class (advertising mail) and second-class (magazines and newspapers) that these mail users are seriously studying alternative means of delivery. Many rate experts are saying that only one more rate hike is needed in order to make it feasible for many major mail users to go to other sources of delivery. Some publishers have already reached the point where private delivery is cheaper than the Postal Service.

The Postal Service stands to lose billions of dollars in potential revenue from this alarming move.

Yesterday, the Magazine Publishers Association held an alternative delivery symposium in New York. Leaders from many major mail users met to discuss the feasibility of shifting delivery away from the Postal Service. The conclusions were sobering to anyone interested in the future of mail delivery in this country.

A few general figures might help put this serious problem in some perspective. Rates for magazines and newspapers have on the average, increased by more than 400 percent since the passage of the Postal Reorganization Act. We expected some increases—but nothing of this magnitude. To bring this general figure closer to home, the average mailing price for Better Homes and Gardens has jumped from 3 cents in 1970 to 9.3 cents this year. It will go to 16.8 cents in 1979 when phasing ceases and proposed rates go into effect.

Rates for third-class regular rate advertising mail have jumped at least 83 percent since 1971 and will go up even further in May of this year.

The average 2-pound book could be mailed for 18 cents in 1971 and is now being mailed for about 40 cents. In 1979, that price will go to 73 cents.

This would not be so alarming if rates were simply catching up to true postal costs. But, as the participants in the symposium graphically demonstrated, current and proposed rates are so high, that it is fast becoming more feasible to deliver privately in many areas. The Postal Service may be pricing itself out of existence.

Here are a few examples:

An official of Better Homes and Gardens said that their objective was to have 60 percent of the magazines delivered privately. Tests in Kansas City showed that Better Homes and Gardens could be delivered for a net cost to the magazine of 1 cent a copy by piggybacking advertising circulars—a double threat to the Postal Service.

Daily newspapers now have the capability to deliver privately to 90 percent of the homes in the country. This network could also be used by many other present customers of the Postal Service.

A model system developed by prominent economists indicates that it is now possible to deliver some high circulation magazines and newspapers in densely populated areas for from 1.5 cents to 7 cents less than the Postal Service.

Tests of alternative delivery for books indicate that private delivery could deliver a 2-pound book over long distances for 67 cents—which includes both drop shipment and local delivery. In July of this year, the Postal Service costs will go to 60 cents and in July, 1979, to 73 cents. It could cost only 48 cents to send a book shorter distances by private delivery.

The Wall Street Journal is now delivering 160,000 copies a day by alternative means at a cost of about 7 cents a copy versus 7.2 cents by the Postal Service. On top of that, private delivery of the newspaper is more reliable and timely. Also the 7-cent figure includes drop shipping whereas the 7.2 cents postal figure does not.

Imaginative use of alternative delivery can combine second-, third-, and fourth-class type of material to make alternative delivery even more attractive for many mailers. For example, national magazine advertising campaigns could be supplemented by including flyers from local businesses keyed to the overall campaign—flyers which previously would have been mailed. Magazine subscription campaigns heretofore conducted through the mail could be handled by private carriers delivering subscription material to the neighbors of subscribers. Specialty magazines could be accompanied by advertising material pitched to the particular audiences. The possibilities are almost infinite.

Almost no one at the conference wanted to leave the Postal Service but all said they were being forced by economics to do so. The possible results have

frightening implications for those interested in a sound Postal Service.

The tragedy goes even beyond the possibility of greater costs for customers who must continue to use the mail. The tragedy is that we seem to be slowly abandoning the principle that this country should continue to provide, as it has through most of its history, an inexpensive and convenient mode of communication.

What can be done. I believe that much of the solution can be found in H.R. 7700, the Postal Service Act of 1977. This bill would increase substantially authorizations for public service appropriations and return some measure of control over the Postal Service to the President and to Congress. It is a realistic approach and I strongly urge the positive and vocal support of my colleagues. I would also urge every Member of the House who is concerned about the future of the Postal Service to convey that concern to the President.

If we don't act soon, we might not have a Postal Service to be concerned about.

TAIWAN GOVERNMENT SHOULD HELP ITS CITIZENS

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. SIMON. Mr. Speaker, I have been one of those who has stood on this floor and said that we must not turn our backs on our friends on Taiwan. I have also long advocated diplomatic recognition of the People's Republic of China. But our friends on mainland China should understand that while we stand ready at any point they desire to have mutual diplomatic recognition, it will not be at the expense of a loss of recognition of the Government of Taiwan; not a denial of a treaty that we have signed with Taiwan.

Having said that, which I hope establishes my credentials for friendship to the Government on Taiwan, I did read with regret the story in the Washington Post titled "Taiwan Reluctant To Accept Its Citizens From Vietnam."

I am having that printed in the RECORD for my colleagues in the House and Senate to read. I do so because we have a special responsibility for the tragedy of Vietnam.

I hope that our friends on Taiwan will reconsider the action they have taken.

[From the Washington Post]

TAIWAN RELUCTANT TO ACCEPT ITS CITIZENS FROM VIETNAM

(By Jay Mathews)

HONG KONG.—Wong Mei-lan, a 27-year-old teacher living in Saigon, is a citizen of Nationalist China, according to the passport given her in 1974 when Taiwan was promoting its image in Vietnam's Chinese community.

Now, reduced to basic rations and denied a regular job since the communist takeover in 1975, she would like to exercise her rights and move to Taiwan. The Vietnamese have her exit permit ready. But Taiwan, while still advertising itself as a champion of those fleeing communism, has effectively shut the door on her and an estimated 10,000 others holding Taiwan passports in a move one relief official here calls "the height of hypocrisy."

The practically forgotten Saigon Chinese, many of them former merchants now stripped of their livelihood, have appealed to friends and relatives outside Vietnam for help. Relief officials, usually reluctant to talk about sensitive political issues, have now been persuaded to speak out by what they see as one of the greatest injustices to come out of the fall of Saigon and Taiwan's 30-year-old propaganda war with its Communist Chinese rivals.

"Back during the war the Nationalist Chinese were big in Saigon," said one official who spent some time in Vietnam before 1975. "They had ROC [Republic of China] schools and handed out all those ROC passports. Now they're saying all those papers are worthless."

In the past two years, Taiwan has issued entry permits to 892 Chinese residents of Vietnam. In almost every case the permits have come through appeals from relatives already living in Taiwan where 16 million people enjoy one of the healthiest economies in Asia. Relief officials say authorities in the Taiwan capital of Taipei have dragged their feet in arranging flights for even these relatively few Saigon Chinese. The Vietnamese, eager to get rid of people they consider troublesome foreigners, have in contrast presented few problems.

Some Chinese have been told they have seats on the special flights from Saigon to Taipei through Bangkok. They have sold their belongings to ease the journey, and perhaps to pay off whatever bribes Vietnamese officials have extracted. Then they have suffered as the Taipei authorities have delayed the flights, relief officials say.

Taiwan authorities say publicly they can not process the Saigon Chinese applications for entry permits because they are living in a communist country without diplomatic ties to Taiwan. Privately they express the fear that some Chinese from Vietnam might be spies or pose too great an economic burden on the island.

None of this stops the official Taiwan news agency from regularly lamenting the plight of people living in China or Vietnam, or from vigorously protesting when governments like Hong Kong enforce regulations to stop the inflow of illegal refugees from communist neighbors.

"For the sake of humanity," said Taiwan's Free China Relief Association in a recent bulletin, "the Hong Kong government should allow the Chinese freedom seekers to stay in Hong Kong or let them leave for other free countries."

"How can they broadcast complaints on the morality of Hong Kong, when they turn their backs on their own documented citizens," asked one relief official here. "Sure the Chinese in Saigon are angry, but what can they do?" said a relative of Wong, the teacher. The relative asked that Wong's real name not be used in order not to prejudice what slim chance she might still have of leaving Vietnam.

"If the overseas Chinese in Vietnam go to countries in the free world, ROC representatives can process their applications," said an employee of the Overseas Chinese Affairs Commission in Taiwan. No one can legally leave Vietnam without valid entry permits to another country, however, and illegal escape remains difficult. Wong once traveled to the coastal city of Wungtau in an escape attempt. She just missed arrest when her companions were picked up by police while she was packing in her hotel room.

"The entry procedures for the Republic of China happen to be more cautious than those of the United States because we are fighting a war against communism," said the overseas Chinese commission employee.

Relief officials familiar with the business-oriented Chinese of Saigon, and their unhappiness with living under communism, scoff at suggestions that they pose a security threat.

Taiwan has allowed a private welfare organization in Taipei, the Vietnam-Taiwan Friendship Association, to transmit lists of the few Saigon Chinese it will accept to Hanoi.

The International Committee of the Red Cross serves as middleman in this process, reconciling the Taiwan list with a list of people Vietnam is willing to let go and chartering the flights from Saigon to Bangkok.

Relief officials say there are enough names cleared now to fill one or two more flights, but Taiwan is again delaying the scheduling of a pickup flight from Taipei.

Francis Amar, head of the Red Cross delegation in Bangkok, declined to comment on charges of Taiwan footdragging in the program. He said he did not expect Taipei to liberalize its entry policy but thought there would be another flight "in the not too distant future." He said he could not speculate when that would be.

U.S. FARM POLICY

HON. RICHARD NOLAN

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. NOLAN. Mr. Speaker, one of the featured speakers at last week's Consumer Federation of America's national assembly held here in Washington was our colleague, TOM HARKIN, of Iowa.

TOM HARKIN represents the eighth most rural congressional district in the Nation. As chairman of the House Subcommittee on Family Farms and Rural Development, I have come to know TOM HARKIN to be an able and effective spokesman for the Nation's family farmers.

TOM HARKIN rejects the age-old rhetoric that somehow farmers and consumers are natural enemies. "They are not," he told the consumer assembly. "They are natural allies."

In his remarks he outlined an agenda for dealing with the common problems shared by family farmers and consumers, including a call for some sweeping changes in U.S. farm policy—most notably, a call for a graduated farm program to concentrate the Federal Government's help on those who need it most—small and average sized family farmers.

I commend his remarks to the attention of my colleagues:

SPEECH BY REPRESENTATIVE TOM HARKIN

Thomas Jefferson, himself a farmer and farm innovator, once described farmers as "the chosen people of God." He went on further to say they had "a special character based on substance and genuine virtue."

Like most of our founding fathers, Jefferson believed very deeply in a system of agriculture, based on family farms.

That base had more than just symbolic importance to them . . . for as long as Americans could chart their own destiny and build their own prosperity as independent family farmers and land owners . . . Americans would remain free.

Many things have changed in this nation since then.

But perhaps no other change that has taken place since that time would surprise them as much as the change in our agriculture system.

The answer to the question: "Who shall control agriculture?" is not as easy to answer in our day as it was in theirs.

Then the answer was simple: family farmers shall control agriculture.

Today, our generation must decide:

Will it be the agri-business corporations?

An agriculture system based on absentee land ownership?

Will our system of agriculture be based on absentee land ownership?

Or will it be based on a great many farms, owned and operated by the independent families who live on these farms?

As a member of the House Agriculture Committee . . . and its Subcommittee on Family Farms . . . these are questions I face every day.

And as a Member of those committees, I want to take this opportunity to thank the Consumer Federation of America for the thoughtful and well documented testimony it provides as we consider these questions.

As the Representative of the 8th most rural Congressional District in the nation . . . and as the Representative of thousands of family farmers . . . I also want to take this opportunity to thank the Consumer Federation of America for its strong and enthusiastic support of legislation favoring the choice of a system of agriculture based on many farms, owned and operated by the families who live on them.

Your opinions are respected.

And your support has made the difference on several crucial occasions.

That support for family farms by the Consumer Federation of America sometimes surprises people.

Mostly, it surprises people who've "bought" the age-old rhetoric that somehow farmers and consumers are natural enemies.

They are not, and in fact, they are natural allies.

Too often, we tend to talk about farmers as if they were just producers, and therefore, as if they had nothing in common with consumers.

But farmers are not only producers.

Most of what farmers use to produce their crops—except their own labor and management abilities—they buy off the farm.

They, too, are important consumers.

They consume tractors, combines, plows, fertilizers, seed corn, cars, clothes, and gas . . . even food.

Inflation has taken a heavy toll on all consumers in the past five years. Its impact has, perhaps, been most noticeable on the nation's grocery shelves, in the retail price of food.

But it has also had an important impact on those on-the-farm consumers, as well.

Five years ago a loaf of bread cost 32 cents. Today it costs 36 cents. The farmer's share of that retail price has dropped from 5.6 cents to 2.8 cents . . . down 50 per cent . . . in the same period.

Five years ago, a 12 ounce box of cornflakes cereal cost 35 cents. Today, it costs 57 cents . . . up 63 per cent.

The farmer's share of that retail price has dropped from 4.2 cents to 3.2 cents . . . down 24 per cent.

Five years ago the average retail price for pork was $1.16 per pound. Today, it is $1.28 per pound.

The farmer's share of the retail price has not changed . . . and remains the same . . . at 70 cents per pound.

In the past five years, the retail price of USDA's Market Basket of Food has increased by 19 per cent.

The farmer's share of the retail price has decreased by 5.6 per cent, during the same time.

Yes, food prices are rising.

But not because of the farmer. Due to falling farm prices, fewer and fewer of our food dollars are going to the farmer.

And due to inflation on the goods he consumes . . . the farmer is having a hard time holding on to those few dollars that are reaching him, because of higher production costs.

In the past five years, the price farmers were paid for wheat dropped 49 per cent.

The price they were paid for corn dropped 17 per cent.

The price they were paid for beef cattle dropped 5 per cent.

The price they were paid for hogs went up, by only 2 per cent.

During the same past 5 years;

The price farmers paid for a medium sized tractor went up from $13,700 to $26,300 . . . up 92 percent.

The price they paid for a medium sized combine went up from $17,600 to $36,100 . . . an increase of 10 per cent.

The price of a new-five bottom plow went up from $1,920 to $3,900 . . . up 103 percent.

The price for one-ton of fertilizer went up from $92.50 to $170 . . . up 84 percent.

The price farmers paid for a bushel of seed corn went up from $23 to $39.50 . . . an increase of 72 percent.

If you think you've had problems with inflation go talk to a farmer.

Our food costs, according to the USDA, are up by about 19 percent in the past five years. The farmer's production costs, in most cases, have at least doubled.

With farm prices falling and retail prices going up, it's often popular to blame the "middle-man"—to blame his greed.

In many cases, that's probably true.

But more often than not . . . the real enemy is us.

That's right . . . us, the consumer.

We will continue to pay more for our food—and farmers will continue to get a smaller share of the food dollar—as long as we, the consumer, continue to demand extensive preparation, packaging, boxing, and general adulteration of our food in the name of convenience.

We don't need to buy cheese, sliced and individually wrapped in plastic. But we do, because it's easier to use. And we pay for it.

We don't need to buy potatoes partially cooked and sliced, or even mashed—so all we have to do is add hot water—

But we do buy them that way, because it's easier.

We've come to believe that if you can't "unzip the zip-lock" plastic bag, pop it in the micro-wave oven, and eat it in a matter of minutes, it is somehow less desirable than if we had to prepare it and cook it ourselves. And we pay the price for that attitude, at the check out counter.

Convenience packaging—that's one big avoidable cost of food. In fact, in 1976, food processing & marketing took about 60 cents of every dollar consumers spent on food.

So we pay at the check out counter—and the evidence is mounting that we pay in other ways, too.

For years we consumers have demanded the meat we buy in the grocery stores be bright red. So processors have filled their fresh meats with nitrates, which make them bright red.

They have minimal, but some preservative qualities. The major thing they add to the meat is a bright red color.

Without nitrates, the meat would taste just the same, would remain fresh nearly as long, but it would not appear so red. That's the only difference.

The evidence now suggests nitrates may be carcinogenic.

Consumers are understandably concerned about that. There's talk of banning them from the market.

Pork producers, who supply bacon, which is usually treated with nitrates by the processors, are understandably concerned about that.

So here's another area where farmers and consumers' interests come together.

We the consumers don't like chemicals and other junk added to our food. And I can tell you family farmers don't like it either. They don't like middle-men to add them, and they don't like adding them themselves, as pesticides and herbicides.

But right now, the system demands it.

We've got to change this system.

With farmers and consumers working together, we can do that.

We must let processors and the Department of Agriculture know that we don't want chemicals added to our food.

For many years the research service of the Department of Agriculture has promoted greater use of chemicals in growing food. At the time it seemed alright to most people. Most chemicals are derivatives of petroleum . . . and oil was very cheap.

The property of carcinogens were little understood and were hard to detect.

But now there are two good reasons why we must change the focus of the research service. The cost of chemicals has skyrocketed, and our testing procedures for detecting carcinogens is much better . . . and again in most cases, these chemicals are highly carcinogenic.

So we can make a difference that way.

There are other areas where farmers and consumers ought to get together and make that natural alliance work for them.

We can avoid some of the costs of consumable food by encouraging more direct marketing of food from the farmer to the consumer.

Farmers and consumers know the more farms we have, the greater the competition in the market place.

Yet in the last 25 years, the number of farms in this nation has been cut by one-half—down from 5.6 million to 2.8 million. More direct marketing will help reverse this trend.

Farmers and consumers know that the family farmer is the best trustee for our life-sustaining soil resources.

The large agri-business corporation or the speculator from the city is more concerned with immediate profits: tear down the wind breaks, plow up the pastures, cultivate the hills, deplete the water table by irrigating dry lands, and after the profits are made and the soil depleted they take their money to another business venture.

I can tell you from experience that family farmers have a conservation ethic and agri-business corporations do not.

Farmers and consumers know the family farmer is the best hope for maintaining a strong rural community with profitable and independent family businesses. Yet today agri-business corporations own nearly 1/10 of the nation's farm land and account for 1/5 the nation's farm produce sales.

Farmers and consumers know that if the family farm system is to remain viable, young people must be able to enter farming. Farm land must be available to them at prices they can afford.

But the price of land is skyrocketing. Farm land in my area of Iowa which 4 years ago sold for $600–$800 an acre is now selling for $1800–$2500 an acre.

Land that does come up for sale now is being purchased by established farmers. Farm enlargements by these established farmers now account for 63 percent of all farm land purchases.

The average age of the nation's farmers is in the mid-50s.

The size of the average farm has increased by 81 percent in the last 25 years.

Finally, farmers and consumers know if we are to have any family farms at all, a family has to be able to make a living at it.

Yet the purchasing power of farm income . . . currently at 64 percent of parity . . . has not been lower since March 1933.

Total net income for farmers in the United States in 1977, was $10 billion less than it was four years ago.

Each dollar of net cash farm income in 1977 supported over $8 in debt. Four years ago, each dollar in net cash farm income supported only $2.50 in debt.

Total outstanding farm debt on January 1, of this year, was estimated at $187.7 billion . . . double the debt load of farmers on January 1, 1972.

Farmers not only know this, they feel it. And that is why you have seen thousands of farmers in Washington and state capitols throughout the country demand better prices for their products and threatening not to plant if they don't get it.

But I also wanted to make sure that you, the leaders of the Consumer Movement in America also know it. The time has come to build an alliance between those farmers you see on the streets of Washington and consumers in the cities. Together we can have an impact. But apart, we will still be at the mercy of the forces which have brought us to our present situation.

What then should be our agenda, and what needs to be done to strengthen our family farms?

As I mentioned earlier, we must encourage more direct marketing from farms to consumers. Consumer cooperatives which buy in volume from the farmer should be encouraged. Farmers markets should be encouraged.

Consumers will pay less, farmers will make more, and the quality will be better.

But first and foremost, we must work for a new attitude in the Department of Agriculture and in Congress. We must have a new approach to our farm program and farm legislation.

One of the great errors of the past, is that our farm policies have treated all farmers as if they were alike.

All farmers are not alike.

Not all farmers need federal government help.

And not all farmers should have it.

There is no reason why a farmer with over a million dollars in equity and sales over $200,000 a year—be he an individual or a corporation—should receive the same price protection from the federal government as a small family farmer who genuinely needs that protection to stay in business another year.

We ought to have a graduated farm program . . . just like we have a graduated income tax.

As the farmer gets larger, the amount of government supports and guarantees should decrease.

Such a policy would concentrate our help on those who need it most, and end it for those who don't need it at all.

We must work for a new emphasis in the Department of Agriculture, and in Congress, on helping the young person start farming.

A graduated farm program would help in this effort. It would stop government subsidization and support for the giant farmer, which may check his expansion. More farm land might then be available, on the market, to the new farmer, since the giant farmer—or the "land hog" as we call them in Iowa—wouldn't have the use of government money to make his expansion purchases.

With the high cost of farm land, and farm equipment, the young farmer faces almost impossible capital requirements. We must help him meet his capital needs.

One way would be low interest, long term, deferred payment, loan program to help the new farmer get started.

We must discourage absentee ownership of farm land.

Absentee owners currently buy one-fifth to one-fourth of all farm acres that come on the market. Often buying as an investment, they drive the price of farm land even higher. That raises further the amount of money needed to start farming, and increases the property taxes due for all the near-by farms.

Absentee owners reduce the number of acres available to young people who want to begin farming. And they add nothing to their near-by communities, as they do little to support the local demand for goods and services.

We can discourage absentee ownership through our tax laws.

Income from farm land owned by people who do not live and work on it, should be taxed at a higher rate . . . it should be taxed on a progressive scale, so the absentee owner cannot recover those higher taxes, simply by charging his tenants more rent. Our tax laws should be written to make it more profitable to work farm land, rather than to hold on to it as an investment, waiting for appreciation to provide profit.

Another way is through utilization of the so-called Saskatchewan Plan or perhaps a plan recently enacted in the State of Minnesota. This is a plan whereby the government would purchase land on the open market and then sell it to qualified young people who want to enter farming.

There would be no payments on principal for the first several years or so, and then the payments on principal would increase and balloon at the end of 20–30 years.

I understand that Saskatchewan has had a great success with this plan and that a modified version is working well in Minnesota.

These tasks will not be easy.

But they must be done, if we are to preserve the family farm structure this nation was founded upon 200 years ago.

Farmers, alone, cannot achieve them.

And neither can consumers.

But by joining together, and working towards common goals, I think we can win the battle.

I hope—and I believe we are—entering a new day when farmers and consumers are recognizing they share a number of common goals . . . and when they are realizing they can only reach them, with each other's help.

No single other development could be more important for either the future of the family farmer, or the American consumer.

And I thank the Consumer Federation of America for leading the way.

SETTLEMENT OF STATE CLAIMS AGAINST HEW

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. RODINO. Mr. Speaker, recently I introduced a bill (H.R. 10101) that authorizes the appropriation of $543 million to implement a settlement reached by 28 States and the Department of Health, Education, and Welfare on outstanding State claims for reimbursement of expenditures for social services. The bill was referred jointly to the Committees on the Judiciary and on Ways and Means, and has also been introduced by our distinguished colleague JAMES C. CORMAN (H.R. 10511).

These States have been engaged in a long dispute with the Department over claims for reimbursemnt of expenditures for social services provided by the States prior to October 1, 1975 under various titles of the Social Security Act. Close to $3 billion of claims are in dispute, of which over half represents claims on file with the Department but not paid.

After months of negotiations, the Department of Health, Education, and Welfare and the States have reached agreement on a settlement of these claims. Virtually all States have agreed to accept the settlement, which provides for payment of up to $543 million. Under the agreement, the Department would also terminate all efforts to recover funds previously paid and the States would make no additional claims for Federal funding for this period.

On October 5, 1977, Secretary of Health, Education, and Welfare Joseph A. Califano, Jr. issued a statement describing the agreement and I ask that it be printed at this point in my remarks, together with a list of the proposed settlements by State.

This settlement ends many years of discord that has already produced extensive and burdensome litigation. It will prevent what promises to be several more years of struggle in administrative and court proceedings. The settlement is a compromise, but I believe its terms are reasonable and fair to both sides.

It is time to bring this long controversy to an end, for its continuation can only serve to exacerbate Federal-State relations and interfere with the proper functioning of crucial welfare programs. Moreover, the States involved have an urgent need for the additional Federal funds that would be received.

Mr. Speaker, a number of our colleagues have already indicated to me their desire to cosponsor this legislation, so I plan to reintroduce it and would welcome additional cosponsors. It is my hope that we will be able to obtain early consideration of this essential legislation and see it enacted before this Congress ends.

STATEMENT BY JOSEPH A. CALIFANO, JR., SECRETARY OF HEALTH, EDUCATION, AND WELFARE

We have reached an agreement to settle the largest financial dispute between the Federal government and the states. The agreement involves payments to 28 states for the cost of social services provided to low income families and individuals from 1969 to 1975.

Under the agreement, 19 states will receive Federal payments totaling $532 million and 22 states (13 of them also members of the group of 19) will have Federal government claims against them dropped.

The action, contingent upon the approval of Congress, is part of a settlement between HEW and a total of 28 states over some $2.4 billion in disputed payments. Of this $2.4 billion, $1.56 billion represented state claims that were never paid by HEW and the balance represented payments that had been

made by HEW but whose validity the Department disputed.

The Congress will be asked to authorize $543 million for the settlement. Eleven million dollars will be held as a contingency to be allotted as a part of the final agreement.

The dispute over these claims goes back into prior administrations. It has resulted in years of expensive and inconclusive litigation between the States and the Federal government, and it has been a nagging irritant in the relations between HEW and the states.

Shortly after I became Secretary of HEW, I asked Under Secretary Hale Champion to seek a compromise in this matter, instead of permitting it to drag through the courts for years. Mr. Champion has done a superb job in reaching this settlement. The agreement removes a major, long-standing barrier to accomplishing our goal of better Federal-State relations.

The dispute began in the early 1970's when HEW took two actions: (1) it refused to pay 19 of the States some $1.56 billion in social services claims; and (2) it sought reimbursement from 13 of these 19 states, plus nine other states, of Federal funds already paid to the states for social services.

The focus of the dispute has chiefly been over the types of social services for which the federal government should reimburse the states and whether certain state procedures were proper.

These services were covered under the old Titles I, IV, VI, X, XIV, and XVI of the Social Security Act which became obsolete on October 1, 1975, when Title XX became effective. Title XX of the Social Security Act is the new consolidated Title authorizing Federal payments for social services provided by the states.

The social services covered such areas as day care for children; protective services for neglected or abused children; drug and alcohol abuse services, counseling on family planning, and a variety of services for aged, blind, or disabled persons.

The agreement now reached would pay, on a formula worked out between the Depart- and the states, a portion of the pending unpaid claims. In addition, 22 affected states will not be asked for reimbursement of funds already given them. (See attached table.)

The amounts to be paid to the states may be adjusted slightly if existing claims by the states are adjusted or if additional claims are filed.

PROPOSED SETTLEMENTS BY STATE

[In millions]

State	Claimed payment due from HEW (1969–75)	Proposed payment	U.S. claims against States dropped
Alabama			$1.0

EXTEND THE LIFE OF THE U.S. COMMISSION ON CIVIL RIGHTS

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. EDWARDS of California. Mr. Speaker, today I am introducing a bill to extend the existence of the U.S. Commission on Civil Rights for an additional 5 years. The Commission is a temporary, independent, bipartisan agency established in 1957 for the purpose of studying and collecting information about or appraising any legal developments or laws that may constitute a denial of the equal protection of the laws, because of a person's sex, race, color, religion, or national origin or in the administration of justice. The Commission is a well-known and respected agency, and it has, since its founding 20 years ago, done more than any other governmental agency to identify and suggest solutions to various civil rights violations.

The Commission has been our official conscience. Both the President and we in the Congress have listened to its voice and responded by enacting legislation to right the wrongs of years of injustices. It has been our eyes and ears in helping us ascertain whether our efforts to end discrimination have been successful.

There are those who would say the sun should set on the Commission, that 20 years of analyses and recommendations are long enough. It seems to me, those persons must now be prepared to say that there no longer exists segregation in the schools and in housing, that discrimination against females and minorities in the insurance industry and in employment has ended; that equal opportunity for the aged and handicapped exists. They must be prepared to conclude that racial minorities and language minorities are no longer subject to blatant or subtle discriminatory practices—practices which are obvious to those who experience them but are not apparent to those of us who have the power to remedy such wrongs.

Surely, we are not prepared to say that equal justice and opportunity exists for all Americans; we have acknowledged that there are substantial numbers of Americans whom this Nation has forgotten. We need the Commission to continue to provide the objective insight necessary to our movement toward making this country realize the greatest potential of all its citizens.

I ask unanimous consent that the bill be included in the RECORD at this point.

The bill I am introducing today would extend the Commission for 5 years. It also includes both technical and substantive changes in its charter, the Civil Rights Act of 1957. Sections 2, 4, and 6 contain the technical amendments to the act, and sections 3, 5, and 7, the substantive provisions.

Section 2 (a) and (b) tracks the language citations that come about as a result of the 1966 codification of title 5 of the United States Code. Section 4 deletes language now in the act concerning the compensation due the Commission's staff director which was superseded by Public Law 89–554 and Public Law 88–426. Section 6 merely amends the citation to the sections of title 18 of the United States Code which were changed by Public Law 87–489.

The substantive changes found in section 3, 5, and 7 do relatively little to change the Commission or its work. Section 3(a) adds the authority to study, collect information, and appraise the laws in regard to discrimination on account of age or handicap; section 3(b) extends the Commission's existence for an additional 5 years. Section 5 would require the establishment of State Advisory Committees. Section 7 authorizes those appropriations necessary to carry out the Commission's duties during the extension until fiscal year 1983.

Mr. Speaker, the Subcommittee on Civil and Constitutional Rights, of the House Committee on the Judiciary, will begin hearings on this bill within the month.

The bill follows:

H.R. —

A bill to extend the Commission on Civil Rights for five years, to authorize appropriations for the Commission, to effect certain technical changes to comply with other changes in the law, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Civil Rights Commission Act of 1978".

SEC. 2. (a) Section 103(a) of the Civil Rights Act of 1957 (42 U.S.C. 1975b.(a); 71 Stat. 635), is amended by striking out "in accordance with section 5 of the Administrative Expenses Act of 1946, as amended" and inserting in lieu thereof the following: "in accordance with section 5703 of title 5".

(b) Section 103(b) of the Civil Rights Act of 1957 (42 U.S.C. 1975b.(b); 71 Stat. 635) is amended by striking out "in accordance with the provisions of the Travel Expenses Act of 1949, as amended" and inserting in lieu thereof the following: "in accordance with the provisions of subchapter I of chapter 57 of title 5".

SEC. 3. (a) Section 104(a) of the Civil Rights Act of 1957 (42 U.S.C. 1975c(a); 71 Stat. 635) is amended by striking out "and" at the end of clause (5), by redesignating clause (6) and all references thereto, as clause (7), and by inserting after clause (5) the following new clause:

"(6) study and collect information concerning legal developments constituting unlawful discrimination or a denial of the equal protection of the laws under the Constitution on account of age, or with respect to handicapped individuals as defined by the second sentence of section 7(6) of the Rehabilitation Act of 1973 (29 U.S.C. 706(6); 87 Stat. 361), appraise the laws and policies of the Federal Government with respect to such discrimination or denials on account of age, or with respect to handicapped individuals as defined by the second sentence of section 7(6) of the Rehabilitation Act of 1973, and serve as a national clearinghouse for information in respect to such discrimination or denials on account of age or with respect to handicapped individuals as defined by the second sentence of section 7(6) of the Rehabilitation Act of 1973; and". (b) Section 104(b) of the Civil Rights Act of 1957 (42 U.S.C. 1975c.(b); 71 Stat. 635), is amended by striking out "1978" and inserting in lieu thereof "1983".

SEC. 4. Section 105(a) of the Civil Rights Act of 1957 (42 U.S.C. 1975d.(a); 71 Stat. 636) is amended by striking out "and who

shall receive compensation at a rate, to be fixed by the President, not in excess of $22,500 a year".

SEC. 5. Section 105(c) of the Civil Rights Act of 1957 (42 U.S.C. 1975d.(c); 71 Stat. 636) is amended by striking out the word "may" the first time it appears and inserting in lieu thereof the word "shall".

SEC. 6. Section 105(d) of the Civil Rights Act of 1957 (42 U.S.C. 1975(d); 71 Stat. 636) is amended by striking "sections 281, 283, 284, 434, and 1914 of title 18, and section 190 of the Revised Statutes" and inserting in lieu thereof "sections 203, 205, 207, 208, and 209 of title 18".

SEC. 7. Section 106 of the Civil Rights Act of 1958 (42 U.S.C. 1975e.; 71 Stat. 636) is amended to read as follows:

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 106. There are authorized to be appropriated such sums as are necessary to carry out the provisions of this Act.".

THE PEACE CORPS AND LIGHT CAPITAL TECHNOLOGY

HON. CLARENCE D. LONG

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. LONG of Maryland. Mr. Speaker, helping the poor people of the world to help themselves is the principal goal of the U.S. foreign aid program. Through light capital technologies that will enable small farmers and rural craftsmen to create their own "sweat capital," we can initiate endogenous development among the hundreds of millions of small producers in the poor countries.

I should like to bring to my colleague's attention a recent speech by Mary E. King, Deputy Director of ACTION, on the importance of appropriate technologies in involving the poor in their own development. In her speech, Ms. King describes how Ecuadorean villagers heard of a new technology in use nearby—a methane generation plant producing cooking fuel and fertilizer—and how these villagers asked a Peace Corps volunteer to help them build such a plant in their own village. This example illustrates the importance of providing poor people with information on existing technologies they can use as well as rural villagers' eagerness to help themselves.

The existing network of 6,000 Peace Corps volunteers around the world could provide a vital link in a worldwide information and delivery system for light capital technologies. I hope my colleagues will take the time to read the speech which follows:

REMARKS BY MARY E. KING

I am particularly pleased to address this meeting of the Partners of the Americas. The word "Partners" has a special significance for me, not simply because I am here representing the Peace Corps, another organization committed to the concept of partnership.

Indeed, we enjoy a special contractural agreement with the Partners to identify Volunteers to work in special education with mentally retarded, the blind and deaf. We have long worked together in agriculture, nutrition and health.

But the concept of partnership has meaning for me because of what I learned when I worked in the civil rights struggle in my country. The lessons are clear. Meaningful change comes about only when people work together in partnership, not as donors or recipients, but as equals, with an equal obligation to participate. The civil rights movement taught me that change cannot be bestowed from without nor can it be imposed from above; it can only be the result of the full participation of the people most affected.

So, too, in development.

It is clear that the principles relating to the involvement of people in their own development are universal: they apply to small communities, to nations, and to interaction between nations. Nothing can ultimately be substituted for the direct involvement of people, people who feel a deep sense of commitment to finding locally relevant solutions to local problems.

The Partners of the Americas and the Peace Corps have long held to these principles of participatory development. Today, as political leaders and development theoreticians increasingly come to these same conclusions, we have a special responsibility and a unique opportunity to serve as an example to the rest of the international community.

This leads me to my topic—"Appropriate Technology, the Key to Participatory Development."

Technology can be defined as the application of scientific principles for the achievement of "Progress." But when we talk of Appropriate Technology, we are talking about an approach, an attitude, a way of looking at the nature of change—a strategy which leads to meaningful development through increased self-reliance at the local level.

Writing over 40 years ago, Mahatma Gandhi said that helping small-scale industries and otherwise strengthening local communities, "provides an outlet for the creative faculties and resourcefulness of the people . . . It may harness all the energy that at present runs to waste."

The Appropriate Technology approach to development taps this energy and talent, and is based on certain principles. Let me suggest these three principles for our thought and discussion:

1. Development begins at the community level and moves upward and outward to build nations; it cannot be imposed "from the top down"

2. The goal of development is self-sufficiency, not reliance on external resources with resulting dependency.

3. No meaningful change can take place if people are not involved as full participants in the development and use of their own resources.

Generally, appropriate technology implies low cost, small-scale, labor-intensive solutions to local problems.

Always, it implies understanding that undue reliance on finite resources will inevitably lead to social and economic dislocation, and that all solutions must be socially and culturally appropriate to the particular setting.

The means and processes brought to bear, then, are those that can be reproduced and continued locally, without the need for unrealistic amounts of outside capital or technical support. At their best, appropriate technologies should be replicable in other communities, but only when and where it makes sense in local terms. Basic to appropriate technology is the premise that each approach must be constantly evaluated and reevaluated to determine just how appropriate it is for a given time, place, culture and setting.

As you probably know, questions have been raised about the true intent and impact of appropriate technology. To some, appropriate technology is village-level "busy work," sidetracking people from addressing broader and more fundamental institutional and political reforms. Some see it as second-class "hand-me-down" technology—an inexpensive way for the "have" nations to keep the "have-nots" temporarily satisfied and quiescent while continuing to control the more modern means of production.

Much of this skepticism has been spawned from previous development schemes which in fact were heavy-handed and sometimes arrogant. Such efforts, regardless of intent, imposed Western models on cultures and places where such models were inappropriate or even destructive.

By focusing on the community level, appropriate technology can help a society gradually adjust to the necessary changes that development can cause while maintaining, preserving, even promoting local culture, values and identities. Previous development approaches too often, whether intentional or not, required the wholesale abandonment of cultural standards.

Appropriate technology seeks to work in harmony with the cultural traditions of the area. With its emphasis on limited scale, appropriate technology can serve as a buffer against the kind of bulldozer-mentality development which has caused so much of the world (including large parts of the United States, I might add).

Perhaps the best way to describe appropriate technology is by illustration. Let me briefly tell you about a situation I think you'll agree exemplifies development at its best—leading to the kind of locally-based progress and self-sufficiency we all want to see.

People in the small community of Ilumán in the Province of Imbabura, Ecuador, heard about a machine in nearby Araque which converted cattle manure into a gas for cooking and a fertilizer for the fields and gardens. They went to see this Araque Methane Gas and Fertilizer Plant and were given a demonstration of how it worked. It was, in their words, "maravilloso" and they began to discuss how what they had seen could be usefully applied to their own village.

The Peace Corps became involved when these villagers sent a letter to the Volunteer who was working with the Araque project to ask for Peace Corps' help in establishing a similar methane digester operation in Ilumán. "We ask for your help," they wrote. "We will provide our total effort because we want to carry out this projected work for the benefit of our families."

In their letter, the farmers noted the need for better sanitation in their village. With the digester, manure would no longer be left along pathways or in other community places, but would be collected and converted into cooking gas. In addition, the resulting sludge would be an excellent fertilizer.

The villagers were very interested in the new source of fuel. To get firewood, they wrote, "we have to walk almost four hours to the hill of the hacienda, spend an hour to cut wood, and walk another four hours back to our house to cook with this wood, which lasts at most four days." Years ago, they could pick up the wood freely near their homes; now their land is denuded and bare, and they have to pay the owner of the hacienda for the privilege. "We are not satisfied living this way," they said.

Something else particularly attracted the people of Ilumán. Cattle would be kept in a central stable in order to facilitate the collection of manure for the digester. Villagers had long wanted a stable, because theft of cattle was a major problem. Many were forced to guard their precious cattle in their own houses with their families during the night.

There were several basic, predictable gains which would result from the methane digester. Yet, there is more to the story. When the pipes for the methane gas were installed in the village, they were tested for leakage with water. The sight of clear running water

in their houses prompted the village women to ask for a change in the plan. Our Volunteers are now working with them to convert the system so that it can deliver both water and gas, alternately, through the same pipes.

Three Peace Corps Volunteers served the people of Iluman. But the actual work—and even more importantly, the enthusiasm and desire—was based in the local community itself. The villagers are committed to the very hard work of building the digester because they know the potential the system offers.

You know as well as I do that "biogas generators" like the one in Iluman are not new. In various forms, such systems have been used for decades in India, China and elsewhere. To me, what is significant in this story is the development of human resources through the partnership of the Peace Corps Volunteers and the villagers—with appropriate technology. Although some of the skills and knowledge came from outsiders, there is NO way that this technology could have been imposed from outside on that village.

No expert could have predicted that a group of villagers would decide to use an alternative energy technology because their cows were being stolen, or that others in their village would become interested in joining the project because a test for leaks in the methane pipes resulting in running water in the houses of participating families. And the project is successful not just because the Volunteers are committed but because the people themselves want it to be; they have invested their energy, their sweat, their hopes—themselves—to make it succeed.

Appropriate technology recognizes that true development takes place only when the people who are to benefit are truly involved and committed.

Development theoreticians and practitioners are increasingly realizing that the focus of appropriate technology should be village-level development—as an antidote to the failure of 25 years of large-scale, capital-intensive development. But the principles of appropriate technology are equally applicable at all levels of development; both in the United States and in other countries. As an example, let me cite the predicament in which the U.S. finds itself with its current health care system.

Hospitals in the U.S. have become classic examples of what happens when technology is applied for technology's sake, losing sight of people and their real needs.

With massive expenditures of capital and professional energies, we in the United States have some of the most sophisticated medical training, records and facilities in the world. Yet at the same time, right in the nation's capital, the infant mortality rate of 29 per thousand live births in 1975 was higher than Taiwan's, which was 26. In that same year, the median income in Washington, D.C. was $9,583; in Taiwan it was $810. And life expectancy in Sri Lanka is higher than it is in Washington, D.C.

The hard fact is that in the U.S. something is wrong with our system of health. A single day in an American hospital can cost a patient several hundred dollars; care has become so costly that many don't even seek assistance when they need it.

We must, therefore, live with the contradiction of having highly sophisticated means to meet specialized problems and wholly inadequate, low-cost primary health care capabilities. The U.S. health system, in short, is inappropriate for large numbers of our nation's people. It has specialized and priced itself beyond reach of the basic needs of people in meeting the professional needs of practitioners and providers.

I believe that this situation can be turned around, especially if we're willing to learn from the experiences of other countries. Tanzania may be one example to study. President Julius Nyerere put it this way, "While other countries aim to reach the moon, we must aim for the time being to reach the village."

In 1972, over half of Tanzania's health budget went to hospital and high level care. By 1976, that number had dropped to 12 percent. The bulk of Tanzania's health budget last year was turned to more immediate primary care health needs.

The use of paraprofessionals, community based clinics, massive health immunization, and nutrition education programs—these are areas where the U.S. could learn a great deal from nations far ahead of us. The Peace Corps sends its volunteers to assist local communities. But equally important are the lessons they bring back to the United States.

The kind of volunteer exchange work in which you are involved has that same dual practical application. Texans going to work in their partner nation of Peru can go not only to assist Peruvians, but also to observe and study ways to improve basic social conditions and to foster cross-cultural understanding. And visiting Peruvians can offer assistance and also absorb information in a similar fashion. Ecuador has a partner in Idaho. Maybe the people from the mountainous area of Iluman could teach a few things to people from the mountains of Idaho.

We are coming to realize just how much is left to develop right at home in the U.S., how much we have to learn from others. In many countries, for example, women have much higher professional status, have more to say about policy, more control of family and community life and have more of an integral role in community and village life than is true in parts of the United States. Where women's efforts and contributions are wasted or downgraded, everyone loses. Some of you can be an example and a model for us.

We truly are partners here in the Americas. Partners in need, partners in interests, partners in meeting the economic, social and political needs of all of our people.

The Partners of the Americas represent the pluralism of the Americas as we are entering a period of perhaps less formal but more intense cooperation. We need to consult closely with each other, to assist and learn from each other's work.

The development work of private volunteer groups such as the Partners of the Americas has been outstanding. And while development needs still far outstrip all current efforts, volunteer potential is boundless. If the people of the Americas can be involved—as volunteers—in meaningful, relevant work to improve the situation for all our people, together we can move to meet basic human needs, and meet them in technically and culturally appropriate ways.

Appropriate technology can be a thread tying our efforts and our roles together. The opportunity exists now to achieve real and positive gains by building on the desire and resources of the people for whom our development programs are designed.

Pablo Casals once found the Peace Corps exciting in this way:

"It is new and it's always old. We have in a sense come full circle. We have come from the tyranny of the enormous, awesome discordant machine," he said, back to the realization that the beginning and end are people, that it is people who are important, not the machine; that it is people who account for growth, not just dollars or factories, and above all that it is people who are the object of all our efforts.

It is that vision we must all retain. Otherwise all the programs, all the spending, all the efforts in which we're engaged lose their point and their meaning.

THE 300TH AVIATION COMPANY

HON. DALE MILFORD

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. MILFORD. Mr. Speaker, I would like to call to the attention of my colleagues a special group of Army reservists in the Dallas/Fort Worth area.

The 300th Aviation Company, first organized in 1956, is composed of Army reservists who are also aviators. I believe this company is highly deserving of public recognition for their commitment to the ideals and purpose of the U.S. Army and its Reserve program.

Not only has the 300th maintained combat proficiency, but they have taken an active interest in community affairs. Individuals in the 300th have been cited for heroism in the rescue of three local citizens. Two were rescued from a creek flooded by torrential rain and one from a burning mobile home which was spotted on a routine training mission.

Our Reserve Forces are extremely important to our overall national defense policy. Since 1970, U.S. defense policy has consisted of small active professional forces immediately supported by reservists.

The All-Volunteer Force is a new concept. Some 820,000 personnel in selected Reserve units are now the only ready source of manpower for about 6 months, in any future conflicts.

Unless these Reserve units are combat-ready and capable of meeting exact deployment schedules, the concept fails. I believe the 300th Aviation Company meets the test. The 300th is stationed at Dallas Naval Air Station and has 31 UH–1 type helicopters assigned to it.

The primary mission of the 300th Aviation Company is to maintain combat proficiency. If called to active duty the company would support ground elements in conducting combat operations. Training goals are accomplished by meeting one weekend per month.

The unit conducts a 2-week summer camp annually for a total of 39 days of training per year. Pilots and crew members are authorized 24 additional flight training periods to assist them in maintaining their flight proficiency. Each aviator is required to fly a minimum of 80 hours per year and must maintain proficiency in a number of skills to include instruments, tactical, nap-of-the-earth, emergency procedures, formation and external load operations.

Because the unit is self-sufficient, unit enlisted personnel must remain proficient in aircraft maintenance, supply, administration, food preparation, finance, avionics, ground equipment maintenance and many other skills.

In addition to its primary mission, the 300th has taken a strong interest in community affairs. Through the USAR Boy Scout program, the company acts as sponsor and assists an Explorer Troop. A working relationships with local units of the Civil Air Patrol is maintained.

Joint training of Civil Air Patrol Cadets and USAR flight crewmen is conducted on simulated search and rescue missions. The unit has given support and realistic training to other Reserve, National Guard and ROTC groups in the Dallas/Fort Worth area.

I believe a strong, effective Guard and Reserve is the only alternative we have to larger, more costly active services. Pressure to keep defense spending down has made us more reliant and dependent upon the Reserve Forces. With this in mind, I think we must be prepared to invest money in the Reserves and provide the necessary training and equipment that is needed for a first-rate Reserve Force. I am proud of the 300th Aviation Company in the Dallas/Fort Worth Metroplex.

THE F–15 ONLY "DOUBLES TROUBLE"

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. EILBERG. Mr. Speaker, the news media continues to report that the Carter administration intends to propose the sale of 60 F–15 fighter bombers to Saudi Arabia.

The proposal will likely generate a great deal of heated debate. For this reason, I noted with special interest a January 27, 1978 New York Times column by James Reston, who points out that regardless of how one feels about the merits of the proposed sale, it clearly comes at an extremely poor time in light of the delicate negotiations now underway in the Middle East.

As Mr. Reston explains, this is no time to propose an arms sale of this magnitude. It has a large potential for disrupting the balance of power in the Middle East, and it unnecessarily presents a divisive issue to Congress at an inopportune time.

As the following column by Mr. Reston states, the proposed sale of the sophisticated F–15 fighter bomber only "doubles trouble" in the Middle East at a time when we would better serve the interests of peace by a more moderate approach to the problem.

[From The New York Times, Jan. 27, 1978]

HOW TO DOUBLE TROUBLE

(By James Reston)

WASHINGTON, Jan. 26.—Just when nobody needs it, another disruptive controversy is surfacing in Washington over Saudi Arabia's efforts to buy 60 F–15 fighter-bombers from the United States.

The F–15 is probably the most effective modern fighter-bomber in the world today. The Ford Administration originally promised to sell these planes to the Saudis, and President Carter, when he was in Saudi Arabia, apparently agreed to go through with the deal.

This is violently opposed by Israel on the ground that such a sale would alter the balance of power in the Middle East. So the outlook now is for a divisive debate on the issue between the Arabs and the Israelis and between the Carter Administration and the Congress precisely when the United States is trying to revive the Israeli-Egyptian peace talks.

The arguments for the deal within the Carter Administration—and this argument goes very high in the White House—is that Saudi Arabia is central to global stability and a moderate Arab world. It is important to the United States, according to this view, and also important to Israel.

In support of this argument, the highest security advisers to Mr. Carter emphasize that Saudi Arabia has been financing President Sadat and the more moderate Arabs; that it has opposed even higher oil prices and kept production of oil higher than it should have in its own interests; and that it is now threatened by the Soviet Union's efforts to establish military bases on Saudi Arabia's flank at the southern gate of the Red Sea.

The Israeli arguments against the deal, now being widely circulated in the Congress and the press here, are:

The F–15 is a very special aircraft, superior in its versatility, maneuverability and firepower, and would be a threat to the security of Israel, particularly if it were to be made available to other anti-Israeli states or taken over by militant Arabs in a coup against the Saudi Arabian monarchy.

The Saudis, according to this pro-Israeli argument, are already receiving 110 special F–5E fighters and 250 M–60 battle tanks from the United States, 300 French AMX tanks, and have not only produced a new military establishment in the last five years at a cost of over $12 billion but are building a major military complex at Tabuq, 125 miles from Israel's major southern port of Eilat and 140 miles from Sharm el-Sheikh on the Straits of Tiran.

If the Begin-Sadat peace talks had really broken down all the way, and the Israelis and the Arabs were squaring off for another tragic war, maybe the Saudi insistence on getting 60 of these special planes, and the Israeli opposition would make sense.

But what is developing here is a propaganda war over weapons before Messrs. Begin and Sadat have had a chance to remember why they startled the world with the hope of peace in the Middle East and what they are now in danger of losing.

For example, the American-Israel Public Affairs Committee in Washington has just put out a memorandum which not only calls the United States-Saudi deal a "threat to peace" but suggests that, if the deal goes through, Israel might have to take military action against Saudi Arabia in any major threat of war.

"If Saudi intentions are ambiguous or appear to be leaning toward involvement in a war," the memorandum says, "the Israelis will have to take this into account. During an Arab attack against Israel, should F–15's be stationed at or transferred to bases in the Northwest, the threat posed to Israel may compel the Israeli Air Force, faced with a multifront war, to undertake immediate strikes against these bases and aircraft even if Saudi Arabia had not yet brought its forces into the war. . . ."

So what's going on here? What is the point of this kind of talk at this awkward and sensitive but still hopeful time in Middle East negotiations? Why, if the Saudis are so "moderate" and "peaceful," are they pressing so hard now to get F–15's, which, even if they got them, couldn't possibly be put into operation by their own people for years? And why did President Carter go along at this particular time?

He is obliged, under present law, to notify the Congress 20 days in advance of his intention to make such an arms arrangement. And then he would be free to go through with it if the Congress did not forbid him to do so in the ensuing 30 days.

This would mean, if he gave notice Feb. 1, as I am told the Administration is now thinking of doing, that this military side issue would be dividing the Congress while Messrs. Sadat and Begin are still trying to come to their senses, when the Congress was trying to reach the long-delayed compromise on the energy bills, and when the Panama Canal treaties were coming up for debate in the Senate.

No doubt there is something to be said on both sides of the F–15 issue, but right now it only doubles trouble. As General Jackson said at the Battle of New Orleans: "Let's elevate them guns a little lower."

HOME HEALTH CARE

HON. WILLIAM S. COHEN

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. COHEN. Mr. Speaker, I join Mr. HAROLD FORD, my colleague on the House Select Committee on Aging, in cosponsoring two pieces of legislation introduced today by our chairman, Mr. PEPPER, to expand home health benefits under medicare and to improve information about home health programs through a national clearinghouse.

Since its inception, our committee has advocated a broad range of services to meet the needs of the chronically ill and disabled elderly in our society. Home health care is among these necessary services. Unfortunately, however, the Congress and the administration have not fostered the development of home health or other in-home services within Federal entitlement programs. They have been reluctant to make these services available without assurance that the public dollars needed to support such care would be well spent. As a consequence, Federal health care aid to the elderly relies almost excusively on costly institutional care, which is often inappropriate to treat the chronic conditions of the elderly and contrary to the wishes of the elderly themselves who want to remain independent in their own homes.

Two Government reports illustrate this point. The General Accounting Office has just released a report entitled, "Home Health—The Need for a National Policy to Better Provide for the Elderly." In that report, statistics indicate that approximately 17 percent of those 65 and older are considered greatly or extremely impaired. For these impaired older Americans, the costs of home care services exceed those of services provided by institutions. However, only a fraction of greatly impaired older citizens are in fact, institutionalized. Many of those not institutionalized prefer to remain at home, despite the additional costs. On the other hand, of the 5 percent of the elderly who are institutionalized, not all of them are severely impaired. A study done by HEW revealed that between 14 and 25 percent of those in institutions did not need that intensive level of care. These individuals have been placed in institutions, not because the institution is the best mode of care, but because, when financial alternatives to such care are not available, it becomes expedient.

The growing demand for quality, cost-effective home health services is begining to be heeded. HEW held hearings in the fall of 1976 which documented the need for a more coherent Federal policy on home health care. The hearings suggested that the issue of agency sponsorship would become less important if quality standards and appropriate cost controls were in force.

The issue of quality standards was addressed by the Congress in the recently enacted Medicare/Medicaid Anti-Fraud and Abuse Act. Section 18 of that act is based on legislation I introduced to insure quality care and effective utilization of the Federal Government's home health programs. We need standards for participation in Federal programs which are uniform, adequate, enforceable, and open to all providers who can meet them.

With these standards, which should be forthcoming later this year, we will be in a position to liberalize our Federal home health care benefits without fear that the Government will be forced to intervene in crisis situations, such as recent instances of fraud and abuse within the nursing home industry.

At present, home health benefits under medicare have been minimal because of requirements that confine beneficiaries to their homes and require that they be in need of skilled care, that limit the number of home visits and services which could be offered, and that require the beneficiaries to be hospitalized prior to receiving home health care. These barriers to home health care encourage overuse of institutional care. Clearly, present controls are misdirected, both in terms of patient need and suitable care.

Added to this is the proliferation and fragmentation in those long-term care and social service programs that now exist. At least eight programs, including medicare, medicaid, Title XX Social Services, and the Older Americans Act, provide supportive services for the elderly in their own homes. Each of these programs has a different set of eligibility requirements and income limits, and often they are governed by conflicting regulations. Until or order can be brought to this disarray, the elderly will be frustrated in their quest for the limited assistance to which they are now entitled.

Mr. PEPPER's bills are now sorely needed to move us toward a more rational, coordinated, and cost-effective approach to the Federal financing of home health care.

The first bill the Medicare Home Health Amendments of 1978—draws from the findings of the previously cited GAO report in determining how Federal home health benefits can be liberalized, taking into account budget limitations. Briefly, the bill would amend the medicare law to:

Remove the requirement of prior hospitalization as a qualification for receiving home health care;

Remove the requirement that a patient be confined to home;

Remove the limits on visit under both the hospital insurance and medical insurance programs; and

Add services to help maintain persons at home, such as periodic performance of household tasks, transportation for doctor visits, essential shopping and simple household repairs.

In GAO's view, the costs associated with these changes would not be prohibitive and could provide disincentives to institutionalization.

The second bill—the Home Health Clearinghouse Act—would provide for the establishment within the Department of Health, Education, and Welfare of a "Home Health Clearinghouse" to promote effective coordination and delivery of home health care by collecting and disseminating concise, understandable information regarding the availability of in-home services under Federal, State, local, and private agencies. The elderly need a place where they can obtain information on the health programs available to them.

The health care needs of the elderly are beyond the scope of the traditional health programs we have for them. We have the opportunity to establish a system which is not only cost-effective, but which allows the chronically ill and disabled elderly the dignity of a choice between care options. These bills deserve the thoughtful consideration of my colleagues, and I commend them to their attention.

SOCIAL JUSTICE IN SOUTH AFRICA: ECONOMIC JUSTICE IN THE UNITED STATES

HON. ANDREW MAGUIRE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. MAGUIRE. Mr. Speaker, I have introduced a resolution today which would overturn the decision of the President to reject the recommendation of the International Trade Commission that import relief be granted to U.S. producers of high-carbon ferrochromium (HCF).

Increased imports of HCF are causing serious injury to the domestic industry and threaten its future survival. Much of the increased penetration of imports comes from South Africa. Since 1974, South African production has quadrupled, now approaching half the total requirement of ferrochrome worldwide and twice the maximum American demand for ferrochrome. This ambitious expansion has been undergirded by a pervasive system of production and export subsidies and benefits afforded the South African companies by their Government. The most objectionable, indeed immoral, aspect of this system of support is the governmental policy of apartheid, which enables the South African companies to exploit black labor at wage rates well below American wages. Further social repression and economic exploitation of that country's majority must not be condoned by the United States; nor should American labor and industry suffer because of the importation of goods produced cheaply under apartheid.

As a matter of economic and social justice, I urge quick and favorable consideration of this legislation by my colleagues.

THE BWCA: A SUMMARY OF THE CENTRAL ISSUES

HON. DONALD M. FRASER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. FRASER. Mr. Speaker, as the debate over the future of the Boundary Waters Canoe Area continues, it is important that we not lose sight of the central issues. Miron Heinselman, chairman of the Friends of the Boundary Waters Wilderness, recently wrote a guest editorial for the Minneapolis Star outlining clearly and concisely the problems on which we need to focus our attention. I think the statement is worth reading.

The article follows:

[From the Minneapolis Star, Jan. 5, 1978]

BWCA: RESOLUTION OF ISSUES SIGHTED

(By M. L. Heinselman)

Congress has now discussed the Boundary Waters Canoe Area problems of wilderness boundaries, logging, mining, snowmobiles and motorboats for two years, and a resolution of the issues is in sight. There is much feeling that no areas in the BWCA should be eliminated from the National Wilderness Preservation System, but that instead a few key areas should be added. Reps. Oberstar and Fraser agree on several additions, and the Carter administration has proposed boundaries similar to Fraser's. Oberstar still maintains that certain areas should be removed from the wilderness and made national recreation areas, but it is very unlikely that Congress will buy that.

A consensus has virtually been reached on ending BWCA logging, the cutoff to be offset by assistance to the timber industry. That approach has been endorsed by Reps. Fraser, Nolan, Quie and Vento, Sen. Anderson, Gov. Perpich, and the Carter administration. The key House committee chairmen, Reps. Phillip Burton and Morris Udall, urged the current logging moratorium, and Rep. Oberstar was very helpful in arranging it with the logging companies. The discussion now has shifted to ways to eliminate any economic impact by compensating the firms for contract terminations, finding alternative timber to offset the BWCA withdrawals, and accelerating the management of pine, spruce and balsam on better lands outside the BWCA.

Almost everyone supports a mining ban. The only question now is the precise bill language. (Copper-nickel) mining outside the BWCA is not involved.)

Snowmobile use remains controversial, but only a few thousand former BWCA users are affected. This is the second winter these machines have been banned, and it would be foolish to reintroduce them.

Motorboat use and the impact of a motorboat ban on resorts on the edge of the BWCA remain the toughest issues. Canoeists seeking solitude are the major watercraft users and they have no alternative wilderness to go to. Five independent studies commissioned by the U.S. Forest Service show that motorboats do mar canoeists' wilderness experiences, and the problem is worsening. In spite of this, present regulations and Rep. Oberstar's bill give canoeists only a small fraction of the water area in our nation's only

canoeing wilderness. Paddlers account for 72 percent of the visitor days of use and 85 percent of all camping groups, but current rules allow motorboaters to use 60 percent of the water area and 63 percent of the campsites.

Many motorboaters come from northeastern Minnesota, but even from there 45 percent of all BWCA watercraft users are paddlers and their percentage is growing. And, while most resort guests come from distant areas, many more canoeists come from afar. But even locally in Cook, Lake and St. Louis Counties there is 2½ times as much water area outside the BWCA as inside, almost all of it available to motorboaters, and some 30,000 lakes are available for such use throughout Minnesota, Wisconsin and Michigan. Congress simply must correct this misallocation of wilderness resources.

There are only 18 or 20 resorts on the edge of the BWCA that are heavily dependent on motorized BWCA fishing, and they serve only a tiny fraction of the resort guests in northeastern Minnesota. Only two are located inside proposed additions, and none remain inside the BWCA. In fact, some 45 resorts and 115 cabins formerly inside the area were acquired with public tax dollars under the 1948 Thye-Blatnik Act, to restore the wilderness and eliminate motorboats and aircraft. This gave resorts on the edge of the BWCA a new advantage, and modern high-speed motors and lightweight boats now allow fishermen from those resorts to penetrate far into the wilderness. Ontario recognized this problem in adjacent Quetico Park and all motors will be banned after 1978.

Fraser's bill has a five-year motor phase-out similar to that for Quetico, but Fraser understands the problems of certain resorts, and has suggested nine new measures to Chairman Burton to soften the impact:

(1) Extend the phase-out to 10 or 15 years on certain peripheral lakes.

(2) Allow permanent motor use on a few peripheral lakes, coupled with horsepower limits and other rules to limit motor impact.

(3) Provide a motorboat corridor to the Canadian side of Saganaga Lake to give Canadian resorts and cabins access from the Gunflint Trail.

(4) Provide funds for Small Business Administration loans to resorts to change their facilities to appeal to a wilderness-seeking clientele.

(5) Provide funds for Extension Service assistance to resorts and communities to help attract guests seeking quiet, motor-free vacations.

(6) Provide funds so that resort owners on certain lakes could voluntarily sell to the government during the phase-out without losses due to value changes, and with the right to retain a residence.

(7) Provide funds for new hiking trails in the BWCA to expand recreational opportunities for resort guests and others.

(8) Provide funds for the completion of some 110 miles of snowmobile trails outside the BWCA.

(9) Provide funds for new accesses and campsites on some 29 lakes suitable for motorboat recreation outside the BWCA.

Our nation has debated the fate of this unique lakeland wilderness for 75 years, and each discussion in the Congress, the Legislature, the courts, or the agencies has moved public policy closer to full protection. If any of those efforts had failed, there would be no wilderness to debate today. Now, at last, it is time to close off these endless debates by giving our only canoe country wilderness the full wilderness status it merits.

BOOK REVIEW

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. BROWN of California. Mr. Speaker, I have recently been privileged to review portions of a new book entitled "The Prospect For Presidential-Congressional Government" by Cohen, Hughes, Lepawsky, Moos, Vile and published by the Institute of Governmental Studies at the University of California, Berkeley. The book is a short one, consisting of four lectures delivered by four of the outstanding scholars of government in our time, with a fifth chapter by Prof. Albert Lepawsky of Berkeley, also an internationally respected political scientist. This last chapter seeks to assess the impact of the Nixon-Watergate years on the role of Congress, and should be of great interest to every Member of this body. The conclusions of the book may be summarized briefly as implying that for the foreseeable future American Government may be one of powers shared between President and Congress rather than powers separated. The book also contains a specific action recommendation, in the light of the numerous changes in Presidential-Congressional relationships which have already taken place or are in prospect. I quote a few lines which contain this recommendation:

Approximately, the present process of institutional revision and constitutional amendment is an experimental and flexible one. But it is unduly sporadic and, worse still, it is crisis-oriented. We need a more regular, continuing, systematic oversight of evolving constitutional arrangements. For this purpose, the appointment of a joint presidential-congressional commission on legislative-executive relations might be advisable, to evaluate, to facilitate, and possibly to monitor the process of change. My fellow authors share my views on the possible value of such a joint undertaking.

Mr. Speaker, in the expectation that many Members will have substantial interest in the content of this book, I am taking the liberty of quoting its foreword and material from Professor Lepawsky's last chapter rather extensively. The quotations follow in two parts. Below is part I.

PART I FOREWORD

Assuming that the incipient tendency toward Congressionalism becomes a more pronounced trend, it will not be the first alteration in the balance of governmental power between Congress and President. The last pronounced oscillation of this kind spanned the political life of Woodrow Wilson, when he was Professor of Government and President of Princeton University, finally becoming President of the United States. From the time of Wilson's basic essay of 1879 on "Cabinet Government" and of his classic 1885 book on *Congressional Government*, in which he then correctly characterized Congress as "the dominant, nay the irresistible, party of the Federal system," and the President as "merely the executor of the sovereign legislative will," to his own dynamic administration and aggrandizement of the Presidency from 1913 and 1920, Wilson presided over a total transformation in the constitutional balance of power.

Are we now witnessing another, milder swing of the pendulum between the Presidency and Congress, this time in favor of the latter? Whatever the answer may turn out to be, the authors of these essays anticipate emergence of a reciprocal set of shared Presidential-Congressional power relationships, as outlined in point number 3 above. Moreover, as documented in the fifth and final chapter, "Reconstituted Presidency and Resurgent Congress," this is the approximate degree to which Congress has actually enhanced its position in relation to the Presidency during the immediate post Nixon period.

The prescience of our four Royer lecturers derives from their comprehension of and commitment to the art and science of politics. Three have been professors and the fourth a university lecturer of political science. All have been senior civil servants or governmental consultants. Three have served in the post of Assistant to the President.

Malcolm C. Moos, who introduces the series with his lecture on "The American Presidency in Contemporary Statesmanship," is a prominent Republican party member as well as a leading educator. In his capacity as an Assistant to the President, he drafted President Dwight Eisenhower's famous farewell address warning the country against the rise of its "military-industrial complex." Moreover, at the earliest stage of the Watergate episode Moos courageously accused his own political party of attempting a *coup detat* against the American voter during the 1972 election. Moos' published works include *"A Grammar of American Politics"* (1949) and *"Politics, Presidents, and Coattails"* (1952).

Benjamin V. Cohen, author of the second lecture, entitled "Presidential Responsibility and American Democracy," is the renowned member of the Franklin Roosevelt Administration's famed team of "Braintrusters," Cohen-and-Corcoran. In that capacity, Cohen was the architect of some of the New Deal's major policies and basic legislation. He has been admired and beloved by both his adversaries and associates. Historian Arthur Schlesinger accurately rates Cohen as the New Deal's "brilliant draftsman and sagacious counselor."

Emmet J. Hughes, who contributes the third lecture on "The Presidency in the American Power Structure," is one of the nation's most versatile publicists and political scientists. His "Living Presidency" was one of the best sellers of the dramatic 1970s.

The fourth and final lecture in the series is by Maurice J. C. Vile on the subject of "Presidential and Parliamentary Systems." Professor Vile has focused his scholarship on the study of Anglo-American constitutionalism, a distinctly relevant specialty today for both the U.S.A. and Great Britain, and he has prepared the report on federalism—"Federalism in the United States, Canada and Australia" (1973)—for Britain's recent Royal Commission on the Constitution.

RECONSTITUTED PRESIDENCY AND RESURGENT CONGRESS

In the wake of the Nixon Administration, it is hard to contemplate the restoration of the powers of the Presidency without taking into account the enhanced role of Congress as a coordinate branch of the American political system. The Presidency still is and is likely to remain this country's pre-eminent governing institution. But if there has been any consequence of the demi-decade of the 1970's, it is a trend away from a pure Presidential government to more of a Presidential-Congressional form.

We are now beginning to reconsider our constitutional doctrine of checks and balances and of the separation of powers between branches of government. This was an

18th Century concept originally enunciated by the French Baron Montesquieu in his somewhat inaccurate description of the British Constitution. It was reiterated by our own James Madison in his Federalist dictum: "If there is a principle in our constitution, indeed in any free constitution, more sacred than another, it is that which separates the legislative, executive, and judicial powers." Today, however, we may with more assurance cite Madison's neglected but countervailing view of the separation of powers doctrine. Neither in Montesquieu's theory nor in British practice, Madison admitted, was it intended that the legislative, executive and judicial branches be "totally separate and distinct from each other" or that "these departments ought to have no partial agency in, or no control over, the acts of each other." On the contrary, asserted Madison, "unless these departments be so far connected and blended, as to give to each constitutional control over the others, the degree of separation which the maxim requires, as essential to a free government, can never in practice be duly maintained.

It is no wonder that in 1974, in weighing the historical evidence compiled by its Subcommittee on the Separation of Powers, the Senate Judiciary Committee concluded, "Our constitution reflects a commitment to shared, not concentrated, power." As we now proceed, in a chastened mood, with reconstitution of the Presidency, we find ourselves involved in recouping for Congress some measure of its historic status in the American system of government.

CONSTITUTIONAL CONTROLS OVER THE PRESIDENCY

At the time of the Watergate exposure, the most positive sanction against a future recurrence of such Presidential malconduct would have been the impeachment of President Nixon under the procedures laid down in the American Constitution. Since 1868, when the impeachment process was instituted against President Andrew Johnson in the House of Representatives but failed to carry in his trial before the Senate, impeachment has been regarded as a moribund institutional device in American government. In 1898, political scientist Henry Jones Ford called it "a rusted blunderbuss, that will probably never be taken in hand again."

Nevertheless in 1974 impeachment proceedings were duly initiated against President Nixon, and successfully cleared the crucial Judiciary Committee of the House of Representatives in July of that year. Although the proceedings were soon interrupted by Nixon's resignation, the impeachment process had had its effect. The Judiciary Committee's articles of impeachment against President Nixon were tightly and masterfully drawn; the facts it marshalled as evidence of his malfeasance were painstakingly presented and persuasive, the committee's deliberations—dramatically televised—were punctilious and awe-inspiring; its debates were statemanlike and transcended political party lines. Its final report was likewise non-partisan, receiving the incontestable support of its members. It was one of Congress' finest hours. There is little doubt that, had Nixon not resigned and had the proceedings continued, they would have been successfully and solemnly consummated by the full House and Senate.

Nevertheless, divergent schools of thought persist on the subject of President Nixon's resignation and "impeachment." Nixon himself and his supporters claim not only that impeachment would have failed in the Senate (where a two-thirds vote is required) but that he consented to resign, not because he was guilty of the impeachable charges, but because his "political base" in Congress and in the country at large had been eroded. In fact, in his televised exculpation of May 1977, Nixon perversely aserted, "I have impeached myself." The opposing school of thought holds that, precisely because Nixon's "political" resignation may be considered by some to have been tantamount to "judicial" impeachment, it was absolutely essential, for constitutional purposes, to consummate the formal impeachment process against him. In the first place, formal impeachment would have confirmed the fact that impeachment was a viable instrument for removing the President, instead of merely giving him the option of resigning. Secondly but more important, formal impeachment would have helped "to constitutionally redefine and to constitutionally limit the powers of the Presidency when those powers have been dangerously extended and abused."

This novel formula for dressing down the President and tidying up the Presidency was contributed by Congressman Jerome Waldie of California in the striking comments he appended to the House Judiciary Committee report on the Nixon impeachment. To emphasize that what he had in mind was a new constitutional sanction, and not a mere judicial precedent, Waldie added:

"It is therefore necessary to consider impeachment not in terms of its effects on Richard Nixon but in terms of its effects on the future occupants of the Presidency. . . . Impeachment for such activities is clearly warranted that we might redefine executive power and thereby limit it that future Presidents will not so abuse their powers—that future Presidents will understand theirs is a constitutionally limited office and an office as to which accountability is ever present."

On this particular point Congressman Waldie was simply the most explicit among the thirty-eight assiduous members of the House Judiciary Committee, most of whom were instinctively aware that they were laying down a binding, though unwritten, constitutional precedent in the Nixon case. Whether it be an actualized sanction or merely an enforceable threat, therefore, the impeachment power may be said to have been salvaged as an effectual as well as a potential instrument for a Presidential-Congressional system.

Now, as a consequence of the recent development unleashed by the Watergate-Nixon involvement, our slow historical pace of constitutional revision is accelerating. Moreover, the principal means is usually statutory enactment and political acquiescence rather than formal constitutional amendment. Above all, the current change taking place in the institution of the Presidency—some accomplished, others pending—transcend questions of structure and selection, and involve critical issues of executive-legislative decision-making and power sharing.

YEAR OF INCLUSION FOR CERTAIN DISASTER PAYMENTS

HON. AL ULLMAN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. ULLMAN. Mr. Speaker, I am introducing today a bill that would prevent the unintentional bunching of income for farmers who receive farm disaster payments in 1978 with respect to crops which, in the normal course of business, they would have harvested and sold in 1977.

Many farmers who are entitled to "prevented planting" disaster payments or other farm disaster payments for crops which they harvested (or would have harvested) in 1977 did not receive these payments from the Department of Agriculture until 1978. Under present law, in the case of farmers on the cash method of accounting, these payments would have to be included in income in 1978. Since income from crops sold in 1978 will also be reported in 1978, the crop income of these farmers will be bunched in 1978 rather than spread over 1977 and 1978 as would be the normal situation. The primary reason for this income bunching problem was the work backlog of the Department of Agriculture.

This bill would allow a farmer to elect to treat these disaster payments as 1977 income if he can establish that, under his usual business practice, income from his crops would have been reported in 1977.

ATTITUDE TOWARD TAIWAN

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. DERWINSKI. Mr. Speaker, Fred Reed is a regularly featured columnist in the Federal Times. In the January 30 edition of that publication, Mr. Reed comments on the attitude toward Taiwan in some segments of our society. I believe that his article is a very profound as well as timely commentary and certainly merits the attention of the Members. The article follows:

[From the Federal Times, Jan. 30, 1977]

PROSPERITY OF TAIWAN ENRAGES THE GURUS

(By Fred Reed)

Blank ignorance seems to be the only qualification for learned commentary on Nationalist China. If a man has never set foot on Taiwan, he is an authority. If he cannot name three of its cities, he is a pedigreed expert, registerable with the AKC.

If he can mispronounce T.V. Sung and H.H. Kung with an air of elephantine pedantry, there is no describing his respectability. He is a 24-carat, platinum-washed, ruby-studded guru, fit to eat granola with the Maharaj Ji.

Washington swims in gurus, with a few experts bobbing in the waves.

The guruish set believes, or says it believes, that Taiwan is a sort of oriental Leavenworth, dreadfully oppresed, whose inmates make calculators instead of license plates. Actually what Taiwan makes is money, and it infuriates the gurus. The dreadful-oppression view is terribly chic, a lot of fun for cocktail mynahs, and suffers only the minor defect of being wrong.

Untruth is a minor defect from a guru's point of view, because the public seldom goes to Taiwan. Truth in propaganda tends to vary inversely with ease of verification.

I am not a guru. My own ignorance of Taiwan was tainted by ten months of living in an alley off Tung An Jyeh in downtown Taipei—distinctly not a silk-stocking neighborhood. At no time was I trampled by liberal senators in search of facts, nor did I see Ted Kennedy lurking Holmeslike in an alley, peering at things with a magnifying glass. Although my own ignorance is sullied, fairness requires me to say that his is intact.

A FEW THOUGHTS

If a disinterested traveler flew into Taipei from California, he would find it drab, poor, and boring. By comparison to Los Angeles, it is.

But suppose he took six months to reach Taiwan by the instructive route—overland from Istanbul, down the peninsula to Indonesia, and then to Taiwan. He would gain astonishing insight into what we inaccurately call the developing world. In Calcutta he would see starving children naked in gutters, flies sucking at the drainage from their eyes.

In Indonesia he would see lepers patiently waiting in cardboard hutments, both dissolving in the monsoon. Cambodia is an abattoir, Laos is nothing, Burma is a pathetic backwash returning to the jungle. Generally speaking, the developing world is not developing.

But Taiwan is a bustling little Japan, developing at a rapid clip—not, incidentally, on American aid, which ceased long ago. Every third world colonel has a five-year plan and nothing else. Five years later, he still has a five-year plan and nothing else. Taiwan's development is visible, vertifiable: New reactors at Jin Shan, the longitudinal highway, the new port at Gao Syung. In remote farming villages our traveler would find well-dressed people with color TV, refrigeration, stereo, decent housing, schools.

Gurus scorn the merely material, which they have never lacked. The developing world craves material wealth so that its children won't grow up in the same stinking alleys, swatting the same droning roaches in the same sweltering slums.

In Taiwan, children will not grow up in stinking alleys. If Taiwan's existence weren't so damnably awkward—if it were only modishly to the left—gurus would love it. But alas . . .

Taiwan is a dictatorship, as are most countries. One might note that dictatorship is not an undifferentiated evil, there being considerable range between Marcus Aurelius and Khieu Samphan. Taiwan's people can associate freely with foreigners, marry them, buy stylish clothes which are widely available, listen to the Rolling Stones, buy a broad selection of western books, and buy somewhat censored copies of Newsweek.

These freedoms do not overwhelm someone from the U.S. with their extensiveness. The Russians and Chinese, one notes, allow almost none of them. Here we come to what irritates me about the gurus: Compartmen- * * * think, the insistence on judging dictatorships of the left and right by different standards.

I have an outrageous proposal. Let us judge all third-world countries by the same standards. If we break relations with Taiwan because it is a dictatorship, let us break relations with Moscow and Peking because they are worse dictatorships. If we writhe in ecstasy on learning that a few Mainlanders have wristwatches, we must surely expire of delight that Taiwan has television, stereo and, increasingly, automobiles. In short, let us attempt a modicum of integrity. I foresee the effects on our foreign policy, but let us bite the bullet.

BUT I DREAM

At my next cocktail party a guru will splash into the conversation like a Chesapeake retriever and emerge, dripping, with Chiang Kai Shek in his teeth. Chiang is currently a corpse. Chiang was a schnook in 1949, the retriever will gurgle triumphantly, and therefore Taiwan is the enemy. Confusing an island with a general would baffle an ordinary man, but a platinum-washed guru is not an ordinary man.

And I will slip off into the shadows, defeated, brooding over the future of thought.

HOUSING AND GROWTH POLICIES: THE PROBLEMS

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. DORNAN. Mr. Speaker, government at all levels is having an increasing impact on the American homeowner. Nowhere is that more apparent than in my own State, California. Regulations, commissions, zoning laws, and other considerations can create major delays in construction or repair of housing and thereby reduce viable competition in the housing market. The ultimate results are soaring land and construction prices and housing units that are inadequate in quality and quantity.

The impact of growth management policies on homebuilders and owners is explained in a current article by Ross M. Blakely, chairman and president of Coast Federal Savings & Loan Association of California. Mr. Blakely has considerable expertise in this area. His firm has assisted the housing industry in numerous ways: It lent $73 million to homebuilders in the first half of 1977, and has become one of the Nation's most active participants in the secondary mortgage market. I hope that his analysis will be of considerable interest to my colleagues:

[From the Coast News]

CHAIRMAN'S MESSAGE

In Time magazine several months ago there appeared a photograph of a Santa Monica house with this dramatic and very telling caption: Bought 1974, $61,000; Sold 1977, $131,500.

For families in California this kind of information was not news. Developers here tell a grim joke about how it takes four years to win approval on a subdivision, four months to build the subdivision, and four hours to sell the homes. That's how it's been in the state for some time now. The demand for housing has been phenomenal, and the level of new construction simply isn't able to keep pace with that demand. The result: Bought 1974, $61,000; Sold 1977, $131,500.

We've all read about the so-called "affordability gap" in housing; that more and more people are being priced out of housing because those prices have risen beyond the means of the average family.

Inflation, without a doubt, has a major bearing on this widening gap. But there also are other factors at work, factors which in California have served to drive up the price of housing faster than in any other part of the country.

Public policy influences in housing have added substantially to the price of both single family and rental housing throughout the state. These policies may deal with such factors as state coastal zoning laws, sewer moratoria, environmental impact statements and subdivision reviews. They translate into two major cost factors in housing: delay, and increasing land scarcity.

Many jurisdictions in the state have experimented in recent years with land use restrictions and other environmental controls—constraints which impact immediately in higher costs to the supplier of housing. That added cost has been passed along to the consumer. California's penchant for open space preservation, clean air and water and other environmental concerns, has not come without cost. It has added substantially to the price of the average house within the state. In Orange County, for instance, that average price is today at $85,000—and rising. Raw land has become increasingly costly and increasingly hard to find. Costly developmental delays have been uniformly passed along to the homebuyer.

According to a study by the Urban Land Institute (ULI) on the impact of growth management policies on two homebuilders in San Jose, it was found that total public policy related costs between 1967 and 1976 rose by 118 per cent for one builder and by 195 per cent for the other builder. Sales prices of housing built by these builders during that period rose in one instance by 80 per cent and for the second builder, more than 121 per cent.

That study shows dramatically how growth management in San Jose has added significantly to the cost of housing in that area. And, much the same could be said for many other areas in the state. Pointing to a political change within the city government in the mid-1960s, the ULI study says San Jose turned from pro-growth to greater developmental controls.

In 1970, San Jose adopted its first urban development policy (UDP)—with goals of orderly, planned, balanced development; maintenance or enhancement of the physical and social quality of urban life.

Added to the UDP of San Jose was an important State Supreme Court decision that extended the California Environmental Quality Act to require the preparation of an environmental impact report (EIR) for all projects requiring a government permit. The Urban Land Institute study says of this: "EIRs became instrumental in turning cities' attention to themselves, making them aware of their forms and futures. They also gave the city another tool for reviewing and, if desired, delaying or curtailing development."

Those delays and curtailments have heaped additional costs on both new and existing housing. With a growth management policy, raw, vacant land that can be developed for housing becomes increasingly scarce and more expensive. In the case of the two San Jose builders, between 1967 and 1976, the price of that land rose by 29 per cent for one builder and by 168 per cent in the case of the second builder. The price of housing as reflected by just those increases rose by 4.7 per cent in the first builder's case, and by 13.9 per cent in the case of the second builder.

Delays in development created by the various environmental reviews and impact studies, among other public policy considerations, also have added to the cost of the average single family and rental housing unit. According to the ULI study, "Interest paid on land and construction loans, and property taxes paid during the loan periods, are important components of public policy related costs. Property tax paid during the land-holding and construction periods is quite clearly a public policy related cost. The interest costs attributable to public policies are a function of the delays endured by the developer in obtaining final approval to build, the cost of the land (where the availability of land is restricted because of city development policies and land cost consequently rises), and the cost of city-imposed fees."

How much do these delays cost in terms of the average house? According to data of the Construction Industry Research Board, each month that the start of construction on a $60,000 house is delayed, the purchaser of that house will have to add an estimated $900 to the total cost.

In another study, prepared by the Orange County Cost of Housing Committee, which includes consumers as well as construction industry representatives, it is more conservatively estimated that prices increase 1.1 per cent for every month that a residential project is delayed beyond its planned construction start date. A six-month delay in a $40,000 home, in other words, would lift the price of that house by $2,640.

None of this is to suggest that land planning or concern for the environment is less than proper for any jurisdiction. Indeed, good land planning is essential to all of us if we are to avoid excesses and abuses of development. "Good land planning" is the key phrase, and "good" is the important word. "Bad" land planning, whether it goes too far one way or another is still bad.

The pendulum in California appears to have swung to the extreme in terms of the benefits that people can expect from environmental and land use restrictions as opposed to the costs that are mounting from those restrictions. We know a good deal about the cost impact of these restrictions, but we know very little in terms of the benefits resulting from those costs. Clearly, where home prices have climbed to incredible dimensions—forcing too many deserving families out of the housing market—the pendulum needs to swing towards fewer restrictions rather than toward ever-more-stringent ones.

Professor Fred E. Case of UCLA, in a recent study, summed up the situation well for California and, indeed, for the nation. He said, "However noble their purposes, land use and environmental controls are working in direct contravention to the adopted national goal of providing safe, sanitary housing for every American family within its financial means. Whether there will be equivalent individual and social benefits sufficient to modify this national goal still remains to be seen."

Perhaps it's time for state and local government officials to begin to find out if the benefits of these constraints are worth the price being paid by families in our state who have been priced out of the housing market.

AGUEDA IGLESIAS JOHNSTON FIRST LADY OF GUAM

HON. ANTONIO BORJA WON PAT

OF GUAM

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. WON PAT. Mr. Speaker, recently the Territory of Guam lost one of its most beloved citizens, Agueda Iglesias Johnston. Agueda Johnston was a very special person, an educator, a civic leader, an inspiration, an example. In her 85 years she touched more hearts and minds on Guam than anyone I know. I will miss her. Guam will miss her. Everyone who knew her will miss her.

Agueda Johnston and education were virtually synonymous on Guam. Born on Guam on December 12, 1892, she began her teaching career in 1910 at the age of 15. In 1936 she founded Guam's first high school and I had the privilege of working with her during some of those years before World War II as one of the teachers in that school. She was a source of great personal inspiration. She was dynamic and dedicated, and blended these qualities with an ever-present style of dignity and grace. I never knew her to lose her temper or raise her voice. She was a great example to us all, and when the histories of Guam and her people are written in the future, the name of Agueda Johnston is destined to appear over and over again. Her contributions to the human development of the island were immense, and will continue to be felt for generations to come through the influences and inspiration that she imparted to so many of Guam's current leaders.

It is an honor to offer for the RECORD excerpts from an account of the life of Agueda I. Johnston that appeared in the December 31, 1977, issue of the Pacific Daily News:

[From the Pacific Daily News, Dec. 31, 1977]

SHE WAS TEACHER, MOTHER, HEROINE TO ALL GUAM

Born on Dec. 12, 1892 in Agana, Agueda Johnston began teaching at age 15, "hardly bigger than her students," according to family spokesman Emilie Johnston, her daughter-in-law. Young Agueda taught at the school where she had just graduated, Almacen Grammar School, continuing her education at the same time by taking correspondence courses.

Two years later, according to a Baltimore Sun story, ". . . fate entered her life in the person of William Gautier Johnston." A graduate of Peabody College with two years of graduate study at Vanderbilt, he was serving in the Marines on Guam when he was delegated to instruct island teachers in English. "To Agueda Iglesias, his most brilliant student, he also gave lessons in a still older language and in 1911, the two were married."

William Johnston left the Marines and opened the first theater on Guam, the Gayety. He also operated a soap factory.

As the two raised their seven children, Mrs. Johnston continued teaching until 1925, when she became principal of Almacen, opened the first junior high school (Seaton Schroeder) and served as its principal until 1936.

She was also founder and principal of the first high school, George Washington High School and Teachers' Institute, from 1936 to 1946, when she became assistant superintendent of the Department of Education. She retired for the first time from that position in 1955.

Concurently with those positions, she instructed in the summer normal schools in psychology, English and pedagogy; was public relations officer for the Department of Education, coordinator of nurses at Guam Memorial Hospital, chairman of the scholarship board, a member of the teacher certification committee and the advisory committee for the Territorial College of Guam and a member of the board of education from 1965 to 1973, serving as its chairman in 1949.

Agueda Johnston's life was marked with soaring courage, heroism and suffering, tempered with laughter she generated herself.

In 1934, she helped organize the first troop of Girl Scouts on Guam. She continued taking extension courses to improve her professional qualifications.

William Johnston was arrested and taken to Japan, where he died a year later in a prison camp. His wife was notified of his death by letters in Japanese and Chamorro.

It was forbidden to possess American flags or money. A leader in the resistance here, Mrs. Johnston had two fine silk paintings of her daughter hanging in the living room. As the Japanese admired the paintings, they were not aware that she had hundreds of American dollars hidden behind them.

She knew George Tweed and helped him hide, supplying him with soap, magazines, algebra books and cigarettes she stole from her children.

At first, she told him never to give up.

But later, watching the torture of her friends and relatives, she sent him a message that maybe he should turn himself in, to stop the torture. She asked him not to try to contact her any more.

She sent a message telling him that the Japanese had threatened to kill B. J. Bordallo, and asked him to turn himself in. "One man is not worth the life of the father of 13 children," she said.

Tweed answered that the United States wouldn't hesitate to put a woman before a firing squad for treason if she told where he was hiding, she said.

Her feelings were hurt by that message, for she felt she had done her part. She had been arrested with her daughter Cynthia, her son Tom and her son-in-law Joe Torres. They were separated and Mrs. Johnston was flogged with a cat-o'-nine-tails to force her to tell Tweed's whereabouts. Jagged bits of flesh were torn from her frail body—she weighed only 100 pounds—until she was beaten to the floor. She refused to tell.

Taken before the "big chief," she resorted to flattery, telling him she would be happy to be investigated by "such intelligent gentlemen who were believers in justice."

"He fell for that," she wrote in a letter to her daughter Margaret Goetz, and he let her go after making her promise to tell him if she learned anything about Tweed.

"I'm happy he didn't get caught," she said later, "but I'm not happy about the lives that were lost because of him. We protected him, but not for himself, but because he was a symbol of America."

She created Liberation Day. She had to convince Army and Navy leaders it was worth doing, and a year after the reoccupation, the celebration was established.

"All I had to supply was the building," she said, "and it turned out to be a bamboo shack. When they jitterbugged, I thought they would be hurled through the walls."

She founded George Washington Senior High School. The schools had been closed and ransacked by the Japanese, who used them for barracks buildings and burned books and benches to heat their bath water

Most of the texts were gone. so the teachers mimeographed parts of books (diligently censored by the military) and bits of newspapers and magazines.

In 1946, she became assistant superintendent of the Department of Education, and retired for the first time in 1955.

She campaigned against and succeeded in having outlawed the taxi-dance halls that were thriving. It wasn't the dancing she objected to, it was the "after-hours activities."

It was at this time that she ran for the legislature and was defeated. Deeply hurt, because she felt that the people of Guam didn't want her, she went to the States and stayed with her children. Perhaps she may not have realized the people of Guam may have thought her to be "above politics." She stayed in the states until Typhoon Karen devastated the island. Then she came back, when the island needed her.

Even in sorrow, her sense of humor didn't desert her. When told that a granddaughter would be named Libby for Liberation Day, she quipped, "What's the matter with Del Monte?"

On her return, she helped build parks and schools, and she did so much for the community that Agueda I. Johnston Junior High School was named after her.

At the dedication ceremonies, she looked around at the judges, governors and dignitaries who were her former students and murmured to her daughter, "Some of my students look older than I do."

It was true. Youthful in spirit and appearance, she said in her speech that day, that

she was enormously proud of the tremendous growth of education here. She also admitted there were problems.

"Parents used to deliver their child and say 'He's yours now.' They gave you confidence and responsibility, and you had to treat each child as your own." The disappearance of that unity, she felt, is one reason for today's problems.

Her work with the elderly helped her keep up with the times. "Old folks here are very shy," she said. "They say nothing if you hurt their feelings." So she tried to make them feel wanted, a part of the community.

She was the guiding force behind the foundation of Servicio Para I Manamko. Petite, her dark eyes sparkling, she was in the forefront of the organization, acting as consultant and adviser and appointment director, finding suitable homes and supervising the arrangements.

Mrs. Johnston once received a postcard addressed to "The First Lady of Guam." It had been delivered to Government House, and Mrs. Eldredge, wife of the civilian governor, brought it straight to Mrs. Johnston, saying she knew immediately that Mrs. Johnston was the intended recipient.

Agueda Johnston suffered a stroke last week, and yesterday, she was getting low, Emilie Johnston said. All her children and grandchildren came in to say farewell and some tried to tell her how much she had done for them. Elaine Borja, an adopted granddaughter, said she had received the greatest gift an identity, for "mama" had arranged for her adoption.

THE SUBTERRANEAN ECONOMY IS SPAWNED BY HIGH TAXES AND GOVERNMENT REGULATIONS AND LOSING REVENUE FOR ALL OF US

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. KEMP. Mr. Speaker, at too high a tax rate, taxes do not produce more revenue to government, because ultimately people withdraw their services from the market economy if they do not receive an adequate aftertax reward. Prof. Peter Gutmann has recently produced some important evidence to substantiate this view.

According to Professor Gutmann's estimates, there is a $200 billion subterranean economy in this country which operates on cash in order to avoid the payment of taxes. We all know that this activity exists and on a large scale.

It is clear to me that if tax rates were reduced substantially that this subterranean economy would evaporate and the Government would be able to greatly increase its revenues. The Federal Government's share of this subterranean economy would amount to more than $40 billion at lower tax rates.

I hope that my colleagues will consider Professor Gutmann's evidence carefully before launching into another round of tax reform.

[From Financial Analysts Journal, November-December 1977]

THE SUBTERRANEAN ECONOMY

(By Peter M. Gutmann)

The amount of currency in circulation outside banks is incredibly, indeed suspiciously, large—$380.68 per capita in December 1976, or $1,522.72 for a family of four. Why do people need these amazing sums? The answer's not hard to find: This currency lubricates a vast amount of nonreported income and nonreported work and employment, a whole subterranean economy, untaxed and substantially ignored, whose GNP of almost $200 billion exceeds the entire legal GNP in the middle of World War II.

Who participates in the subterranean economy? Anyone who receives cash in a business transaction has the option of joining. Cash transactions are common in certain kinds of businesses—e.g., retailing, personal services and the classic illegal and quasi-legal activities. Restaurants, car washing establishments, garages, bars and small retail shops, in particular, lend themselves to tax avoidance through cash transactions. Certain types of transactions—payments to casual labor, payments for part-time work, payments of bribes—also commonly involve cash.

How does the subterranean economy affect employment? Obviously, employment is greater than official statistics indicate. Some of those supposedly unemployed, some so-called discouraged workers and even some supposedly not in the labor force at all, are evidently busily at work in unrecorded activities.

The subterranean economy, like black markets throughout the world, was created by government rules and restrictions. It is a creature of the income tax, of other taxes, of limitations on the legal employment of certain groups and of prohibitions on certain activities. It exists because it provides goods and services that are either unavailable elsewhere or obtainable only at higher prices. It also provides employment for those unemployable in the legal economy; employment for those—like the retired who draw social security, or illegal aliens without residence status—whose freedom to work is restricted; and incentive to do additional work for those who would not do it if they were taxed.

MEASURING THE SUBTERRANEAN ECONOMY

We can estimate the size of the subterranean economy by examining the composition of the stock of money, M_1. M_1 has two components—currency and demand deposits. As an economy develops, ever more transactions are typically carried out with checking accounts, and demand deposits grow more rapidly than currency. For years this held true for the United States. In 1892, there were $352 of currency per $1,000 of demand deposits; by 1941, there were only $219—a drop of two-fifths during half a century.

With the war came high income taxes, rationing and controls. As black markets and tax avoidance mushroomed, currency shot up faster than demand deposits. By 1945, currency reached $363 for each $1,000 in demand deposits, making up in four short years the decline of half a century. Never thereafter did the ratio of currency to demand deposits return to the prewar level. Tax avoidance was here to stay.

Still, there was some decline from wartime levels. Currency dropped to $282 by 1950 and reached its postwar low of $249 per $1,000 in demand deposits in 1961. From that point onward, however, currency again grew more rapidly. By 1976, currency reached $344 per $1,000 of demand deposits.

How much of the total money supply is used to lubricate the subterranean economy? We take the pre-World War II period, prior to steep income taxes, as normal. During the five years 1937–41, currency averaged $217 per $1,000 of demand deposits. The difference between this and recent values of the ratio may be taken as a measure of the amount of currency held for illegal purposes. In 1976, for example, the difference measured $127 of currency per $1,000 of demand deposits.

On this basis, of the average $77.8 billion in circulation outside banks in 1976, about $28.7 billion were held for illegal and $49.1 billion for legal purposes. Hence, of the total $304 billion money supply, $275.3 billion represented legal and $28.7 billion—or 9.4 per cent—illegal purposes. The $275.3 billion held for legal purposes were needed to produce the $1,693 billion legal GNP in 1976, while the $28.7 billion held for illegal purposes were needed to produce an estimated $176 billion illegal GNP. (See Exibit 1.)

EXHIBIT 1: MEASURING THE SUBTERRANEAN ECONOMY

	1937–41 (percent)	1976 (percent)	= M_1 (billions)	= Percent	= GNP (billions)
Currency:					
Illegal	0	12.7	$28.7	9.4	[2] $176
Legal	21.7	[1] 21.7	49.1	} 90.6	1,693
Demand deposits	100.0	100.0	226.2	}	
Total			304.0	100.0	1,869

[1] The amount of currency required for legal transactions in 1976 is assumed the same percentage of demand deposits as in 1937–41. The amount of currency required for subterranean transactions is obtained by subtraction.

[2] The amount of GNP lubricated by $1 of M_1—whether currency or demand deposits—is assumed the same for both legal and subterranean activities.

The $176 billion figure may well be conservative. First, the ratio of currency to demand deposits would have continued its decline after World War II, had it not been for tax avoidance; the proportion of currency actually devoted to illegal use is higher than 36.9 per cent, and the illegal income larger. Second, since the end of World War II demand deposits—which are non-interest bearing—have expanded greatly as business has turned to using such deposits to compensate banks for services rendered, rather than paying the banks directly. Since some of the total demand deposits were held, not for transactions purposes, but simply to pay the banks, less than the total $226.2 billion of demand deposits and $49.1 billion in currency calculated in Exhibit 1 was needed to produce the legal GNP of $1,693 billion. In other words, illegal use of currency exceeded $28.7 billion and illegal GNP exceeded $176 billion.

We should note two partially compensating factors. Some currency is held abroad. Further, some currency may be held, not to lubricate the subterranean economy, but to store ill-gotten income. This amount is probably limited, however, since it is expensive to store wealth in non-interest bearing, non-appreciating form during times of inflation.

KEYNESIANS AND MONETARISTS

Our theory fits in very well with monetarists' views, since they believe all money is used for transactions purposes. It sems to fit less well with Keynesian theory, since Keynesians believe money is held for speculative and precautionary uses as well as for transactions uses.

But no one holds any legal speculative or precautionary balances in the form of M_1 anymore, since such balances can be held in interest-yielding savings accounts or short-term money market instruments instead. Only those with illegal speculative or precautionary balances will hold them in the form of the currency component of M_1, and then only if they are deluded about the prospects for inflation.

SUBTERRANEAN EMPLOYMENT

How many people does the subterranean economy employ? The answer depends on the proportion of subterranean income produced by those employed elsewhere in legal, recorded activities and the proportion produced by those employed only in unrecorded activities. Unfortunately we cannot measure this proportion. We can, however, at least put the magnitude of clandestine employment into perspective.

The $176 billion in 1976 illegal GNP correspond to about 8.2 million nonagricultural jobs, using the job-GNP ratio from the legal 1976 GNP ($1,693 billion, distributed among

79 million nonagricultural jobs). Most illegal income is probably produced by those also employed in recorded jobs. But if even 10 per cent of the subterranean economy comes from those not otherwise employed, total employment exceeds official statistics by some 820,000. If 20 per cent comes from the officially unemployed, total employment is more than 1.6 million greater.

Do these figures seem unduly large? Then compare them with a recent Bureau of Labor Statistics announcement. The Bureau found nearly half a million jobholders previously missed through failure to record adequately hiring by new businesses. Then, too, the job total recorded by the states runs about 1.6 million below the national figure complied by the Bureau. No one will bat an eyelash if another million or two workers turn in unrecorded activities.

CONCLUSION

What can be done about the subterranean economy? First, we must stop sticking our heads in the sand, pretending it doesn't exist. Second, we should revise employment, unemployment and labor force figures to take into account reasonable estimates of those employed in unrecorded activities. Third, we should recognize that the subterranean economy is created by government. Fourth, we should admit that the increasing public contempt for the tax system and government regulation is causing the subterranean economy to grow more rapidly, as the rapid growth of currency relative to demand deposits shows.

We must take a long, hard look at the rules, regulations, restrictions and taxes that have spawned the subterranean economy. If we fail to do so, an ever larger part of the total economy will go underground.

CHILDREN: PART OF OUR COMMUNITY?

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. DORNAN. Mr. Speaker, Ohio residents were shocked recently when a U.S. district court judge overruled an obscenity indictment by the city of Cleveland, questioning "whether children should be considered part of the community." The indictment was against the Sovereign News Co. of Reuben Sturman, identified as the largest pornographic distributor in the Cleveland area, and the case has been appealed to the U.S. Supreme Court. In an open letter to District Judge John Manos and the Supreme Court Justices, directed to the Cleveland Plain Dealer, Mrs. Roy Vernon expressed the feelings of many citizens following Judge Manos' ruling. Virginia Vernon's words apply to all of us who would be part of a community—a community not only of peers, but of generations:

OPEN LETTER TO U.S. DISTRICT JUDGE JOHN MANOS (U.S. SUPREME COURT JUDGES)

To accommodate a convicted pornographer you raise the question "whether children should be considered part of the community." Are not all human beings part of a community, be they young or old, well or sick?

As a daughter, beloved by my parents, I was an integral part of a family, an essential being. I belonged! As an infant I belonged to my grandparents, aunts, uncles, cousins and they helped watch over me. I belonged to the church, I belonged to the school, I belonged to my neighbors. I belonged to my community . . . or did I?

As a young woman, I was loved, was married. My friends, my church, my neighbors shared my happiness. We, my husband and I belonged! . . . or did we?

As a mother, the children became persons so important that the church, the schools, the neighborhood became a part of their lives, the community cared! They thought they belonged! . . . did they?

As a grandmother, I share the happiness of my children, with their children. We zealously guard against stumbling blocks put in their path. We anticipate and fully expect the community to be a stepping stone, not a stumbling block. My grandchildren think they belong . . . do they?

Judge Manos, just when did I not belong to the community? Was it as an infant, needing all the help and love from adults surrounding me? Was it as a young wife striving earnestly to be a good partner? Was it as a mother praying that my children would become wholesome and productive individuals? Was it as a grandmother looking to the future in a world that would serve my grandchildren well so that they could in turn become good citizens?

Had my community permitted it I believe that I could have become corrupted at any of the above stages. I believe that a community that does not show concern with a desire to put forth good values and to permit law enforcers to do their job without judges making loopholes for criminals, that community deserves what it gets! All of us, you and I, must be aware of what affects the community, not only those to the left and right of us but those in front and behind us!

VIRGINIA (Mrs. Roy) VERNON.

COFFEE AND IDI AMIN OF UGANDA

HON. GLADYS NOON SPELLMAN

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mrs. SPELLMAN. Mr. Speaker, Ugandan dictator Idi Amin is not the person most of us would choose for company over that first bracing sip of morning coffee. But he is, nevertheless, an uninvited guest at many American breakfast tables.

Coffee, America's favorite breakfast drink, is also far and away Uganda's largest and most important export, accounting for 85.5 percent of the country's revenues last year. The United States is Uganda's largest importing market, buying nearly 40 percent of its annual coffee yield.

Today I submitted to the House of Representatives a resolution asking that coffee manufacturers list the percentage of Ugandan coffee on the cans or packages of their products. I did so in the belief that Americans should be able to choose to withhold economic support from a regime which continually abuses the human rights of its citizens.

My interest in this subject was first aroused by CBS newsman Mike Wallace in an interview on "Sixty Minutes." In the course of the interview, Mr. Henry Kyemba, formerly President Amin's Minister of Health, estimated that roughly 150,000 murders have been perpetrated by the Amin regime.

Mr. Kyemba said that Amin casually gives orders to kill and the orders are faithfully executed by his State Research Bureau, a euphemism for Amin's secret police. Membership in the bureau means having a license to kill, Mr. Kyemba said.

The former Health Minister said that these atrocities, as well as Amin's lavish personal lifestyle, are financed by national funds. And the vast majority of national funds come from coffee export revenues. The soaring world price of coffee has brought Uganda nearly $1 billion in just more than 2 years.

Uganda is the fifth leading source of coffee for the United States. We currently pay $300 million annually for Ugandan coffee. There can be little doubt that President Amin has used some of that money to eliminate thousands of Ugandans because they were a real or imagined threat to him.

The current issue of Newsweek contains still another chapter in the shocking and outrageous story of Idi Amin. My resolution would give Americans the opportunity of helping end the saga of atrocities through this refusal to purchase Ugandan coffee.

NEW TACKS AGAINST TERROR

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. DERWINSKI. Mr. Speaker, stronger international efforts to contain terrorism are long overdue. In this regard, I have joined in cosponsoring legislation toward this end. However, this is an international not simply a domestic issue.

I wish to call the attention of the Members to a very positive commentary in the Chicago Sun-Times of January 25, on the need to contain terrorist groups. The editorial follows:

NEW TACKS AGAINST TERROR

In Paris, terrorists kidnap a top industrialist. In Manitoba, a gunman with three hostages demands money and a flight from Canada. In Chicago, three men who refuse to help in a federal grand jury probe of terrorist bombings await release from jail next week.

Terrorist deeds not only remain an oftensenseless threat to innocent people (executives seem especially vulnerable) but world terrorism is rising after a lull. Without fresh steps to combat it, the outlook is grim.

Fortunately, some steps are under way.

A Senate committee holding hearings this week proposes a new anti-terrorism unit in the Justice Department; an array of sanctions—financial, travel and others—on countries that aid or abet terrorists, and new controls on explosives and nuclear materials.

The latter include "tagging" such materials in ways to help trace the source of terrorist bombs, even after detonation.

Though the State Department opposes mandatory sanctions that might hamper diplomats, safeguarding innocent lives may well demand some such steps. Of more concern is how to give anti-terrorist units the

tools they need without weakening constitutional liberties that safeguard basic freedoms—or a nation's right to grant political asylum.

The problems are sticky, but refusing refuge to those who take innocent hostages and denying skyjackers places to land are reasonable starting points—along with sanctions against countries that sit on their hands on the terrorist issue.

Some terrorists have been stopped by sharp commando responses. At times, that's the only way. But prevention is a surer cure.

MORGAN MURPHY POINTS OUT COCAINE DANGERS

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. SIMON. Mr. Speaker, one of our colleagues who contributes a great deal to the House on the Rules Committee has gained a special knowledge in the field of drug abuse because of his membership on the House Select Committee on Narcotic Abuse and Control.

An article he wrote recently appeared in the Chicago Tribune, and I am taking the liberty of inserting it into the RECORD at this time so my colleagues will have a chance to see it. It is the kind of article that we would do well to call to the attention of the people of our districts, particularly some of the young people who may not be aware of the dangers of cocaine.

COCAINE: THE NEW "FUN" DRUG HAS SOME UNFUNNY PERILS

(By Morgan Murphy)

In his 1930s song, "I Get a Kick Out of You," composer Cole Porter reflected: "I get no kick from cocaine." But, unlike Porter, increasing numbers of Americans clearly are getting a kick from cocaine.

Cocaine's popularity has been growing steadily since 1970, when the drug surfaced in suburbia after a nearly 60-year existence "underground." Formerly, cocaine was the pastime pleasure and pick-me-up of Hollywood and Broadway entertainers, jazz musicians, and the thrill-seeking rich. Now, cocaine, like marijuana a few years back, has gone middle-class.

Some recent signs of cocaine's increased usage:

In 1976, the federal government, with the cooperation of state and local police, seized 571 pounds of cocaine—almost twice the amount confiscated in 1972. [And this represents, at best, only 10 per cent of the supply.]

Last July, the National Institute on Drug Abuse [NIDA] reported that cocaine "has become a serious drug of abuse." NIDA estimated that some 8 million Americans have taken the drug at least once.

Cocaine has been making more and more headlines of late: Actress Linda Blair ["The Exorcist"] was arrested last October in Florida for allegedly conspiring to buy cocaine. Last May, Louise Lasser of "Mary Hartman, Mary Hartman" pleaded guilty to possession of cocaine.

Why is a drug that is illegal, expensive, and potentially dangerous becoming more popular? For one thing, cocaine is a stimulant, not a narcotic, so it does not cause true physical addiction. As Newsweek recently noted, the cocaine sniffer does not develop a "tolerance" for the drug—a condition that requires him to use larger and larger doses to get high. Nor does the "cokehead" suffer withdrawal symptoms, such as nausea or cramps, when he is unable to buy the drug. [Nevertheless, cocaine's stimulative and euphoric effects can create a strong psychological dependence.]

Another reason for cocaine's appeal: It gives its users a sudden surge of physical and mental energy. Because cocaine is nature's most powerful stimulant, it is valued by a number of people in high-pressure jobs.

Still another reason for cocaine's growing use: As the so-called "Cadillac" of drugs, it has snob appeal. Well-heeled connoisseurs of cocaine sport necklaces with gold or silver razor blades [used to divide the cocaine powder into lines for sniffing]; sniff "coke" through rolled-up $100 bills or from gold spoons, which they wear around their necks; and store it in $350 glass vessels. At some lavish Hollywood and New York parties, a host or hostess will put an ounce of cocaine on the coffee table for guests.

This conspicuous consumption of cocaine, as the Los Angeles Police Department has said, has given the drug the reputation "of being a fun, nonaddictive 'champagne' drug posing no real danger to the user or to society." But this image is deceptive. Cocaine is regularly diluted, or cut, with other substances to increase the cocaine dealer's profits. While the adulterants are usually innocous [such as baking soda and milk sugar], they can be harmful. Among the more risky: strychnine, novocaine, and lime. Even without dangerous cutting agents, cocaine can produce adverse side effects, such as postnasal drip, destruction of nasal tissue and nosebleed [caused by sniffing], as well as a "postcoke" depression. Chronic abusers are prone to fits of violence, paranoia, and psychotic episodes. Of course, those who take the drug intravenously may contract hepatitis from a contaminated hypodermic needle. An overdose can cause convulsions, paralysis of muscles, and respiratory or cardiovascular failure.

What can be done to stop the spread of cocaine abuse?

First, the federal government must strike the cocaine trade at its source of supply. This means the United States must develop an effective drug control program with South American countries, where cocaine smuggling originates. The control effort would call for the exchange of intelligence information on cocaine smugglers; crop substitution for coca shrubs [from which cocaine is extracted]; and treatment of peasant farmers who are dependent on coca leaves for energy and pleasure.

Second, federal and state laws must be tightened to prevent cocaine traffickers from jumping bail and getting light or suspended sentences.

Third, the dangers of cocaine must be publicized in our schools. Tragically, young people all too often find out the hard way that a drug can seriously endanger their health. The message must go out that things don't go better with this kind of "coke."

AMENDMENTS TO THE EDUCATION OF THE HANDICAPPED ACT

HON. DANIEL K. AKAKA

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. AKAKA. Mr. Speaker, in a recent article, the New York Times praised the Education of the Handicapped Act, however several questions were raised concerning its practical implementation. It is to this problem of practical implementation that I wish to address myself.

On October 26, I introduced a bill (H.R. 9761) which would amend the Education of the Handicapped Act in several areas. This legislation was prompted by my experience as an educator, as well as by communication I have had with educators and State officials directly affected by the act.

With the start of the new session of Congress, I have decided to contact you regarding cosponsorship of H.R. 9761. The bill would provide for immediate full-level Federal support by first eliminating the phasein of Federal contributions from 5 percent for fiscal year 1977 to 40 percent for fiscal year 1982, and instead authorizing 40 percent of the national average per pupil expenditures multiplied by the child count beginning for fiscal year 1978. The law at present (Public Law 94–142) requires immediate provision for services, and there is no educationally justifiable rationale for a phaseout of Federal support.

The present census method would be amended to provide for duplicated and cumulative count of all pupils receiving special education during the first full school week for the month of February. This census method retains the administrative simplicity of the present procedure, provides an incentive for high quality services, and will give at least partial recognition to special education programs which do not operate on a a daily basis.

The present general supervision method would be amended to specify that the State educational agency shall be assigned responsibility for the general supervision of special education unless State law requires otherwise. States which legally cannot grant the State education agency such authority may satisfy the general supervision requirement by enacting legislation which guarantees the following: First, common standards for special education and related services no matter what agency or jurisdiction provides them; second, a process for coordinating providers of special education and related services, and third, an "agency of last resort" with the power to resolve interagency disputes over responsibility for providing handicapped children special education and related services.

Finally, the value of the individualized education program can best be insured by amending Public Law 94–142 to specify that it is intended as an educational planning device rather than as a contract for services or a guarantee for education achievements. These amendments conform with selected resolutions recently adopted by the National Governors' Conference, and it is my belief that H.R. 9761 will further expedite the laudable services which pupils have been receiving

under the Education of the Handicapped Act.

Mr. Speaker, I would like to insert the bill in the RECORD at this point:

H.R. 9761

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. Section 611(a)(1) of the Education of the Handicapped Act is amended by striking out subparagraph (B) and inserting in lieu thereof the following:

"(B) 40 per centum, for the fiscal year ending September 30, 1978, and for each fiscal year thereafter, of the average per pupil expenditure in public elementary and secondary schools in the United States;".

SEC. 2. Paragraph (3) of section 611(a) of the Education of the Handicapped Act is amended to read as follows:

"(3) The number of handicapped children receiving special education and related services in any fiscal year shall be equal to the total number of such children receiving special education and related services during the first full school week of February of the fiscal year preceding the fiscal year for which the determination is made.".

SEC. 3. Paragraph (6) of section 612 is amended—

(1) by striking out "(6) The State" and inserting in lieu thereof "(6)(A) Except as provided in subparagraph (B), the State";

(2) by adding at the end thereof the following new subparagraph:

"(B) In any State in which State law prohibits the general supervision required by subparagraph (A), such subparagraph shall be deemed to be satisfied by the enactment of legislation by such State providing (i) for the establishment of statewide standards for special education and related services; (ii) for systematic and thorough coordination of providers of special education and related services; and (iii) for the establishment of responsibility in an agency of the State for the resolution of disputes between educational agencies over responsibility to provide special education and related services to particular handicapped children.".

SEC. 4. Section 614(a) is amended by adding at the end thereof the following: "No program established or revised pursuant to paragraph (5) of this subsection shall be deemed to be contract for services or a guarantee of educational achievement, but shall be regarded as a statement of objectives or goals for the purpose of planning.".

SEC. 5. The amendments made by this Act shall take effect October 1, 1977.

SOCIAL SECURITY

HON. BARBARA A. MIKULSKI

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Ms. MIKULSKI. Mr. Speaker, I wish to bring to your attention a poem written by one of my constituents, a retired woman who is trying to live on a social security pension. Clayre E. McCartle Whiteman has expressed the plight of our Nation's elderly, in this poignant poem:

SOCIAL SECURITY

(By Clayre E. McCartle Whiteman)

Oh, my life on social security,
Has really been a blast.
The prices keep on rising,
And the money doesn't last.

There isn't much that I can do,
I cannot work no more.
My health's not getting better,
And the wolf is at my door.

I get one fourth of what I earned,
And I cannot ask my kids,
I try to be independent,
While my life is on the skids.

We stand in line for food stamps,
Or anything else we need.
While the rich keep getting richer,
They forget the old folks need.

We fill out applications,
Complicated as they are.
They are afraid us older people,
Will get more than them by far.

Well, that is life at 69,
No help seems on the way.
They bring folks from other lands,
And them the welfare pays.

But we elders can't get any help,
Our medicines are dear.
I pray to God, gives me courage,
To get by another year.

THE GOOD SAMARITAN ACT

HON. CARL D. PURSELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. PURSELL. Mr. Speaker, several years ago, a constituent in my district, Dr. Melvin Reinhart, took an airline flight on which another passenger suffered a heart attack. Dr. Reinhart was very disturbed that basic medical equipment was not available to him and the other doctors on board, to assist the stewardess in caring for the heart patient. In the true spirit of the hippocratic oath, Dr. Reinhart promptly began efforts to require airlines to carry basic medical supplies on their planes.

Through contacts with the Federal Aviation Administration, it was learned that such equipment was not available on the airlines because their stewardesses and pilots, and doctors and nurses who were on board, could be held personally and legally liable in suits growing out of the emergency care. The whole question of malpractice insurance has received heightened attention in recent years and Dr. Reinhart's efforts certainly points to the need for fundamental changes in this field.

In response to Dr. Reinhart's efforts, my predecessor, Marvin Esch, introduced legislation to provide legal protection to doctors and nurses and aircraft personnel who assist passengers with medical difficulties. His legislation was supported by the Air Line Pilot Association and the Department of Transportation. Unfortunately, this bill did not see action by the House of Representatives.

However, I strongly believe in Dr. Reinhart's efforts and feel that we should continue to push for legislation which would lift the prohibitive costs of malpractice insurance for those on board airlines. It is frightening when one thinks of what the consequences might be if a person did not receive proper medical care while in flight. It is a fact that fatalities have occurred on airline flights. How many people might have been saved if medical equipment had been available to them? Certainly, better medical care would be available to those persons who become ill during a flight.

Therefore, I am introducing legislation today which will provide the legal protection necessary for doctors, nurses, and aircraft personnel to assist passengers who experience medical problems during a flight. The Good Samaritan Act is similar to the bill introduced by Mr. Esch during the 94th Congress. Hopefully, such a bill will lead the airlines to include basic medical supplies in their first aid supplies. I believe the past efforts of Dr. Reinhart must be recognized and continued in this area. Therefore, I would hope that my colleagues will assist me in supporting this bill and having it enacted promptly.

FALTERING PEACE PLAN

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. LAGOMARSINO. Mr. Speaker, I would like to bring to the attention of my colleagues the following editorial from the Washington Star entitled: "Spoiler's Role in Rhodesia."

[From the Washington Star, Jan. 31, 1978]

SPOILER'S ROLE IN RHODESIA

If the American people understood the spoiler's role which their government is playing in the current Rhodesian negotiations, how long would they tolerate it? Not long, we suspect. They would insist that Ambassador Andrew Young be summoned from the spoilers' conclave at Malta this week, where another attempt is being made to revive the faltering Anglo-American peace plan. And they would probably insist that the U.S. at long last wish godspeed to those who now seem on the verge of negotiating an internal peace in Rhodesia.

This, we say, is what would *probably* happen if the complexities of the issue were understood. Unfortunately, they are not. It is not widely understood that after years of international clamor, Prime Minister Ian Smith has conceded the principles of universal suffrage and majority rule. It is not widely understood that, in response to this, three moderate black leaders—who are thought by informed observers to represent a considerable majority of Rhodesian blacks—have negotiated with Mr. Smith a new constitution providing for assured "minority" representation (i.e., largely white) in parliament; a bill of rights; an independent judiciary; and other institutional arrangements that seem fair and workable. It is not widely understood that this "internal" breakthrough, proceeding from Mr. Smith's concession of universal suffrage, is on the verge of consummation if it is not derailed by the foot-dragging of U.S., British and UN officials, who seem to think the black negotiators should hold out for tougher terms.

Finally, it is not widely understood that the U.S. is closely identified with the unyielding terrorist-guerrilla "front" led by Joshua Nkomo and Robert Mugabe, which is armed by the communists and supported by the five neighboring "front-line" African states.

The peace terms of these "external" forces are extreme. Although Mr. Nkomo has made occasional noises of moderation, Mr. Mugabe recently threatened to "bash" all the "reactionary" participants in the internal nego-

tiations: a threat that may happily prove idle if peace comes to Rhodesia and his guerrilla troops begin to melt away.

Meanwhile, the Nkomo-Mugabe faction insists that Rhodesia's future must be settled between Great Britain (whose crown colony Rhodesia was before declaring its independence unilaterally in 1965) and their "Patriotic Front," whose "patriotic" activities consist largely of the ruthless murder of women, children and the elderly, mostly black. They insist that Ian Smith be deposed, and that they, the intruders and disturbers of the peace, be handed immediate control of the army and the police. In short, they demand capitulation by the Rhodesian moderates; and they indicate no willingness to compromise.

What is so perverse about the U.S. position is that the closer Ian Smith and the black moderates come to an agreement, the more cozily we seem to collaborate with the U.S.-British-UN cabal to undermine it. *The Economist's* Salisbury correspondent reported, on January 21: "There are signs that the (Patriotic Front) is speeding up the war and deliberately picking on black civilian targets in an effort to prevent a peaceful changeover to majority rule. From Salisbury, it appears as if the British foreign secretary, Dr. Owen, and the British commissioner-designate, Lord Carver, are actively discouraging an internal settlement."

In harsher language, the U.S. risks playing accomplice to further bloodshed by pursuing a Rhodesian settlement agreeable to radical outsiders and guerrillas. This is the actual, but we cannot imagine the calculated risk of U.S. policy Why, then, do we take so sour a view of the heartening chances of internal peacemaking?

The reasons must necessarily be a matter of speculation. In Washington, we suppose, it may be thought more important to appease the demands of Rhodesia's "front-line" neighbors than to bring internal peace to the country. The effect of that policy, intended or not, is to sacrifice the moderate majority in Rhodesia, black and white, to considerations of African *realpolitik*.

This is discreditable enough. It becomes unconscionable if one considers how close Mr. Smith and the black moderates are to a peace settlement and a new constitution. As noted by Morley Safer on the CBS program "60 Minutes" Sunday evening, Rhodesia is one of the few functioning biracial societies in Africa. It is not a police state. Its segregationist policies are disappearing. The army and police are predominantly black, and, so organized, can hardly be accounted dependable instruments of white tyranny.

In bitter truth, the Anglo-American policy on Rhodesia seems to be influenced not only by dubious strategic calculations, but also by an uncharacteristically petty-minded British resentment that Rhodesia has made a success of unauthorized independence. Against all odds and predictions, Rhodesia has become a country in being. It needs only the support of the outside world to make reasonable democratic terms with the black majority.

That the U.S. might not only neglect but actually undercut this success is an offense to sense and conscious. Let us call a halt to this foolish policy—now.

H.R. 10705

HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. WHITEHURST. Mr. Speaker, on February 1, I introduced H.R. 10705, to assist former spouses of Federal employees in obtaining court-ordered payments. I am introducing a revised version of that bill today, so that there will be no doubt that it is intended for the benefit only of former spouses, and/or children, and not for any other purpose.

Thank you, Mr. Speaker.

GOVERNMENT VERSUS WORKERS

HON. JOHN B. ANDERSON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. ANDERSON of Illinois. Mr. Speaker, a constituent from Richmond, Ill., recently forwarded to me a copy of a "guest editorial" from the November 18, 1977, Wall Street Journal, with the comment that, "to read such clear commonsense written by a union official is to restore one's faith in the future of our Republic." He was referring to a press release issued by President Joseph Trerotola and Legislative Aide Nicholas Kisburg of Council 16 of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America. The thesis of that statement was that "government is in active competition and conflict in two areas with the individual worker: in taxing the employer, the amount available for employee wages is reduced; in taxing employees, the amount available for food, clothing and shelter is reduced. This in turn forces escalating wage demands which result in reduced employment opportunities and even business relocations."

Mr. Speaker, while the Teamsters' release had specific reference to the plight of New York City and State and local tax policies, the editorial points out that it is just as applicable to Federal social security tax policies. I commend the editorial to the reading of my colleagues:

[From the Wall Street Journal, Nov. 18, 1977]

GUEST EDITORIAL

We wrote the other day that no one will be fooled by the Senate's tactic of levying more of the Social Security tax on employers, that "it won't take workers long to figure out that employers can only throw so much money into a wage pot, and that if the government takes more workers get less."

This sparked a call from Joint Council No. 16 of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America. The Teamsters wanted us to notice the press release just put out by Council 16 President Joseph Trerotola and Legislative Aide Nicholas Kisburg. Its thesis was that New York is going to the dogs because taxes are too high. Mr. Trerotola complained that "state and local government taxing policies can and do nullify private sector union power."

The Teamsters continued:

"There remains one irrefutable reality: government is in active competition and conflict in two areas with the individual worker.

"What government extracts from the individual employer irrevocably reduces the amount of money the employees of that employer will be able to secure through union collective bargaining of individual negotiation.

"What government extracts in the form of open and concealed taxes from the individual worker simply reduces the amount of money available to the family for food, clothing and shelter.

"Having only one source to turn to, the worker attempts to replace the monies expropriated by government by escalating his wage demands on the employer. Thus begins the chain reaction which frequently leads to reduced employment opportunities and, worse, relocation of the business.

"The simple and ironical fact is that the tax collector does not pay union dues, does not walk the picket line, but is nevertheless the first beneficiary of any wage increase secured by the worker. This perfect stranger gets his cut first, leaving a substantially reduced amount for the family."

We couldn't say it better ourselves.

1978 PRAYER FOR PEACE BY DR. BASIL J. VLAVIANOS INTERNATIONAL LAWYER, JOURNALIST, AND PUBLISHER

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. ROE. Mr. Speaker, pursuant to the request of one of my distinguished constituents, the Honorable Herbert M. Sorkin of Paterson, N.J., I insert at this point in our historical journal of Congress the following editorial which appeared in the Greek Daily Proini of New York on January 3, 1978. The author, Dr. Basil J. Vlavianos, is an international lawyer, journalist, and publisher and has taught diplomatic history for 14 years as an adjunct professor of public affairs and regional studies at New York University. He also served as a consultant to the Greek delegation at the United Nations, San Francisco Conference in 1945.

This editorial expresses a prayer for peace that all of us may well be inspired and guided by in our daily pursuits, as follows:

PRAYER FOR 1978

Omnipotent God of Goodness,

We salute you with love and humility today as we start once more to count the days and months from the beginning. We embark with good faith and good intention to accept the good and to do good—for ourselves, for our families, for our society, for the country in which we live, for the country of our origin, for the entire world. Help us to discern what is good and to avoid ill. Protect us from evil. Let the light of truth shine inside us and all over the world.

Many of the opportunities you offered us last year we lost. Our weaknesses prevailed. Show us new opportunities, and arm our hearts with the sensitivities to respond to them, our minds with the ability to recognize them, our souls and our wills with the power to use them.

Give us again the blessing of Peace this year. Disregard that we squandered last year, as well as those which preceded, by cultivating lies and violence, by organizing wars and other calamities; that we did not charge ourselves sincerely, tangibly and seriously with the task of securing peace; that we let the petty and temporary interests govern our lives.

Enlighten us to see and to say the truth with courage, thoughtfulness and love; to look high; to walk straight; to accept criticism; to recognise and accept our mistakes; to forgive others more easily than we forgive ourselves.

Without your assistance we are nothing.

Without your divine light we are blind.
Without your love we cannot know happiness.

XEROX PRESIDENT ADDRESSES ROCHESTER CHAMBER OF COMMERCE

HON. FRANK HORTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. HORTON. Mr. Speaker, on January 9, 1978, David T. Kearns, president of the Xerox Corp., addressed the Rochester Chamber of Commerce on the need to improve the economic climate in New York State, the Empire State. While presenting a very clear picture of our State's unemployment statistics, revenue in relation to expenditures, and the relative position of the snowbelt to the sunbelt States, Mr. Kearns eloquently demonstrates some of the ways in which New York can reverse an unhealthy economic trend. Numbering among his many sound and progressive recommendations is a proposal on tax reform, a key to a revitalized and fiscally sound recovery. I strongly recommend Mr. Kearns' address before the Rochester Chamber of Commerce to my colleagues. The text follows:

LET'S MAKE NEW YORK THE EMPIRE STATE AGAIN

The thoughts I want to share with you this evening have their origins, naturally enough, in my experience as a businessman. But believe me when I say that I am not thinking only of industry's needs. My concern is with the well-being of every resident of the state. New York can be a good place to live and work in only if it enjoys a healthy economy and its governmental structure at every level, has sound financial underpinnings.

Unfortunately, as well all know, the state's economy and its public finances have been in growing disarray for a long time. Many of you are painfully familiar with the litany of depressing statistics that spell out the state's problems.

Nevertheless, I think it is worth our while to review some of these facts in order to put the situation in proper perspective.

Let me share with you some significant information provided by Fritz Grasberger of Rochester's Center for Governmental Research.

One of the more important indicators of the state's economic health is what has been happening to the number of people in manufacturing jobs. In 1960 New York had 1.9 million people employed in manufacturing. By 1976 the number had dropped to 1.4 million, a decline approaching 25 percent This is particularly alarming because, during that same 16-year period, nationwide manufacturing employment increased by 13 percent.

While this industrial job erosion was going on, the number of state and local public employees increased by 50 percent. Fewer than 840,000 government workers managed our public affairs in 1960. By 1976 it took more than 1.2 million.

These were years of public expansion throughout the country, especially in urban areas. But New York State has consistently been in the forefront of public spenders. A look at the most recently available figures, for the 1976 fiscal year, offers a good picture of the situation.

In most categories, only Alaska and the District of Columbia spend more per individual resident. New York was 46 percent ahead of the national average for outlays per resident by the state and local governments.

Not surprisingly, a major problem area has been public welfare, where New York's per capita outlays were 92 percent above the average. In outlays for health services, New York led the country.

If taxes don't bring in all the money you plan to spend, you have to borrow, and New York's state and municipal governments are 128 percent above the national average.

The interest on that debt totaled $142 per resident, leading the national average by close to 200 percent.

Because industry is such a major source of both tax revenue and jobs, the decline of industry in New York State, combined with heavy increases in public spending, has created a near-impossible burden for the state's taxpayers.

The various state and local governments collected more than $11 hundred per New Yorker in taxes during 1976. That is 56 percent higher than the national average of $730 per individual.

The result of all this taxing is the classic vicious cycle. Tax increases cause industry to vote with their feet and leave the state, driving individual tax rates up and thereby increasing the stampede to greener tax pastures.

This vicious cycle must be broken, and it must be broken now. Fortunately, our public officials have become increasingly aware of the magnitude of the problem and have already begun to take steps toward a solution.

It has been especially heartening to see organized labor and business management putting aside their traditional roles as adversaries and joining forces. The New York State AFL–CIO threw its full support behind the Associated Industries organization in its efforts to sell a major business incentives package to Albany. This combined effort succeeded.

Among other things, the resulting law provides a temporary increase in the present investment tax credit, and it extends the job incentive program of state and local tax benefits for new or expanded industrial facilities.

We can also be grateful that New York's elected leaders of both parties recognize the need to cut taxes. As you know, last week Governor Carey proposed a program that would cut 1978 taxes by $750 million.

Another positive note. We have growing evidence that industry will invest in New York State if it is given the right kind of incentive. One of the most striking examples can be found right here in Rochester. I'm referring to the plant that General Motors is building in the Outer Loop/Industrial Park to make emission-control devices.

The plant means 450 new jobs. GM's move is the direct result of local teamwork. Your own chamber executive, Tom Mooney, and Jack Hostutler of IMC worked with Mayor Ryan and other city officials to develop an attractive land-purchase and tax incentive package.

Things are happening on a state-wide level, as well. Earlier I talked about the inflation of public-sector employment and the serious decline in industrial employment since 1960. But between 1975 and 1976, public-sector employment in the state actually decreased 5 percent. And, as important, manufacturing employment increased. Not by much, only a bare 1 percent. But after 15 years of steady decline, even 1 percent is a welcome change of direction.

Now I certainly don't mean to say that New York has its problems licked. The state has a long way to go. New York City is still in a very precarious situation, taxes and state debt obligations are still deadly, and there is hardly any indication of a stampede of industry back from the sun belt. Even the tax cuts that the governor and the state legislature are so determined to deliver are surrounded by uncertainties. It is all well and good to cut taxes, but unless spending is also cut, tax reductions are a formula for fiscal catastrophe.

If spending isn't kept in line with tax revenues, the most likely result is a flurry of wild budget cutting at the last minute to avert financial collapse.

The final prospect, of course, is bankruptcy.

No businessman in his right mind would permit himself to be lured by tax benefits into a state where such fiscal sandbagging was a strong possibility.

Permanent and significant tax reduction can be achieved only by permanent and significant reductions in public spending. Let's examine a few possibilities.

There are instances where state regulations impose unnecessarily harsh spending requirements on municipalities, on public institutions and on commerce and industry. State nursing-home standards, which directly affect medicaid outlays, are one example of outdoing the federal government. Such regulations and mandated standards must be revised.

Some of these state-mandated standards create burdens so large that municipalities must understandably ask the state for the money to carry them out. But, at the same time, perhaps too much dependence has been put on state aid. If you feel you can turn to a higher authority for financing, you tend to get perhaps a bit too expansive about what you want to do. So I think it is fair to ask local government to be more self-reliant and more realistic.

Realistic management is also very important for New York's public school districts. During the 1975–76 school year, New York led the nation in spending on its elementary and high schools—almost $2,200 per pupil. This was 57 percent greater than the national average.

These figures must raise some questions. Has there been too much wasteful experimentation with curricula? Are learning materials being purchased only to be discarded in one or two years? Is adequate thought and care being given to the procurement of school equipment? Is every headquarters staff position making a contribution adequate to justify its effect on the payroll?

Every board of education in the state should be seeking answers to such questions.

The level of social service benefits in New York State requires rethinking. New York has always prided itself on its generosity in caring for those who cannot care for themselves. This is admirable, but the fact remains that benefit levels in New York State are far higher than those in any other state.

A package of welfare reforms has been developed by your chamber, in conjunction with other upstate chambers. It is a comprehensive, well thought-out package that certainly merits very serious consideration.

However, there is a bottom line of social service expense that cannot be trimmed simply because it represents a very large number of legitimate welfare clients.

To a very real extent, this is an imported problem, the product of national forces beyond local control. People in need of jobs have migrated to the cities of New York, as well as other northeastern states, from all over the country. As they came into the cities, affluent residents and business concerns moved out, and there weren't nearly enough jobs available for the newcomers.

The supreme court ruled several years ago that municipalities cannot set up residence requirements for eligibility for social services. And so the cities found themselves strapped to provide these legally mandated services to an ever-increasing clientele even as their sources of revenue eroded.

I am convinced that welfare is a national problem and should be treated as one. The Coalition of Northeast Governors and New York's Congressional representatives are trying to make this happen.

But while they work to turn the federal

government around on welfare, local government cannot shirk its responsibility to administer welfare equitably and efficiently.

Improved management of all public programs and services is a necessity in every area and at every level of state and local government. The so-called sunset law approach makes a great deal of sense because it means that every activity, every project must be scrutinized when budget time rolls around. Ideally, nothing should be taken for granted, and the benefits of every program should be measured carefully—even painfully—against its costs.

Let me digress for a moment. It is all very well for those of us in industry to lecture government officials on the importance of effective management. But we have our own problems in this area. It is particularly evident where foreign trade is concerned.

It is no secret that our international balance of payments is a sorry spectacle. A good part of this is a function of the international oil situation, and lack of economic expansion in Japan and Europe. But the competitiveness of business in Japan and Western Europe is a major factor. That's why the Carter Administration has been conducting unusually tough negotiations with the Japanese Government to reduce exports to the United States and lower barriers to our imports.

Such government initiatives won't do the trick alone. I am afraid U.S. industry is losing its technology and business management leadership. We can meet foreign competition only if we pull up our socks and do a better job of product development and of operating efficiently. Ever increasing cost effectiveness is an equally urgent requirement for success against foreign competition, just as it is an urgent requirement for New York State's public sector.

It is very important for public administrators and legislators to adopt a "show-me-why" attitude toward every new proposal that would add to expenditures. By the same token, this attitude should be applied to excessive regulation of business and industry. Unrealistic environmental and safety standards have added unreasonably to the cost of doing business.

There should also be a major effort to overhaul the tax structure so that it will be not only less burdensome but more equitable. Property taxes offer one of the greatest opportunities for improvement. The New York Times, in an editorial on December 1, noted that New York City's assessors have been far from consistent in setting values, a problem that is hardly confined to New York. Recent state court decisions have required equality of treatment for all taxpayers.

This is a complex problem because fair market value is always changing. For industry it has been especially onerous because commercial and industrial properties are invariably assessed higher than residential properties, in relation to fair market value. It is both the legal and the moral responsibility of every community to address this problem. The appropriate solution would seem to be a periodic reappraisal of all taxable properties in each jurisdiction and the use of full market value to determine assessed valuation.

Associated Industries and the Empire State Chamber of Commerce have developed a number of additional tax-reform proposals that appear very sensible. One is the permanent elimination of the present so-called temporary 20 percent surcharge on the corporate franchise tax. Another would end discriminatory treatment of smaller New York companies in interstate commerce. At present, the franchise tax is allocated in such a way that credits are granted for places of business located out of state. But no such credit is granted to a company without such out-of-state facilities, even if a large proportion of its business is done beyond New York's borders. The net effect, or course, is to encourage out-of-state expansion. The Associated Industries/Empire State Chamber formula would provide franchise tax credits for out-of-state sales.

By the same token, I think serious thought should be given to eliminating the unincorporated business tax. This is a classic case of double taxation of the small businessman, since he must also pay personal income taxes on the same income.

Finally, New York's business groups agree on the need for a lowering of the upper brackets of New York State's personal income tax. This would certainly make the state a more attractive place to live and work in.

Now it's all very well and good for industry to tell government what to do. But we have to be willing to help. And we are, through the mechanism of advisory boards. It is a way business experts can provide the public sector with consultative services, and I would like to see more done along these lines.

We at Xerox have some experience with this kind of arrangement. A short time ago we loaned Tom Winter, now our corporate controller, to the state of Connecticut for a five-month stint as chairman of a special business task force to study the state's financial systems and administrative services.

More than two-thirds of the group's administrative recommendations have been adopted, and a major proposal for reorganization of some executive functions was enacted into law by the legislature.

Last year a bi-partisan proposal to establish a permanent state management advisory board was passed by the New York State Legislature only to be vetoed by the governor. I would like to urge Governor Carey to reconsider his position and support the establishment of such a board.

Business advisory boards work at the local level, too. About two years ago, Niagara Falls, New York, was in a real fix. Its 1975 deficit was $1.5 million, and it was on the verge of defaulting on its bonds. Local companies offered to help, and the city council established a city management advisory board. Participating companies provided a core group of top executives and made other executives available as functional consultants.

Working closely with the city manager and his department heads, the board did a thorough study of municipal operations and came up with a number of proposals that were adopted. The city ended 1976 in the black.

The Niagara Falls model can be used by city and county governments throughout the state, with the backing of local business enterprise. I would suggest going even further and establishing similar advisory groups in local school districts. There is no doubt in my mind that the net result would be a great improvement in government operations.

In the final analysis, though, advisory bodies can only advise. Public administrators and legislators are still the people who have to make the hard decisions, and this is a time when they must even be willing to risk unpopular decisions.

I think there is evidence that the public wants responsible government. For the past several years a number of school districts have seen their budget proposals voted down, and pledges of fiscal responsibility have helped a number of candidates to win office.

The message, I suspect, is that it may finally be more politically expedient to act responsibly than to create costly new programs.

The problems are tough but they are solvable. I have travelled all over the world in the past two and a half years. I feel stronger than ever that while the democratic/capitalist system is not perfect, there is none better.

This nation did not just happen. It was built by bright, tough, innovative people.

I am optimistic about the future because this room, this state and our country are filled with bright, tough, innovative people that I believe will take the actions to solve the problems that face us. Thank you.

SPOILER'S ROLE IN RHODESIA

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. McDONALD. Mr. Speaker, the Washington Star is to be congratulated for its lead editorial on Tuesday, January 31, 1978, on Rhodesia. It pointed out how wrong our policymakers are and how they are actively on the side of the terrorists in Africa, while professing to be for "one-man, one-vote." In actuality what they are pushing for is the creation of yet another African dictatorship with the population enjoying no freedom or civil rights. Our policymakers will not even permit Mr. Ian Smith to proceed with his plans for majority rule if they can help it, so committed are they to Africa. It would certainly be interesting if our policymakers submitted our Rhodesian policy to a vote of the American people, but the last thing in the world, they care about, if the subject can be avoided, is how the American people feel. The plain facts are, as the editorial makes clear, that neither Andrew Young, our policymakers, nor the United Kingdom wants Mr. Ian Smith to succeed in his plans for majority rule in Rhodesia, all for different reasons. The editorial follows:

SPOILER'S ROLE IN RHODESIA

If the American people understood the spoiler's role which their government is playing in the current Rhodesian negotiations, how long would they tolerate it? Not long, we suspect. They would insist that Ambassador Andrew Young be summoned from the spoilers' conclave at Malta this week, where another attempt is being made to revive the faltering Anglo-American peace plan. And they would probably insist that the U.S. at long last wish godspeed to those who now seem on the verge of negotiating an internal peace in Rhodesia.

This, we say, is what would probably happen if the complexities of the issue were understood. Unfortunately, they are not. It is not widely understood that after years of international clamor, Prime Minister Ian Smith has conceded the principles of universal suffrage and majority rule. It is not widely understood that, in response to this, three moderate black leaders—who are thought by informed observers to represent a considerable majority of Rhodesian blacks—have negotiated with Mr. Smith a new constitution providing for assured "minority" representation (i.e., largely white) in parliament; a bill of rights; an independent judiciary; and other institutional arrangements that seem fair and workable. It is not widely understood that this "internal" breakthrough, proceeding from Mr. Smith's concession of universal suffrage, is on the verge of consummation if it is not derailed by the foot-dragging of U.S., British and UN officials, who seem to think the black negotiators should hold out for tougher terms.

Finally, it is not widely understood that the U. S. is closly identified with the unyielding terrorist-guerrilla "front" led by Joshua Nkomo and Robert Mugabe, which is armed by the communists and supported by the five neighboring "front-line" African states.

The peace terms of these "external" forces are extreme. Although Mr. Nkomo has made

occasional noises of moderation, Mr. Mugabe recently threatened to "bash" all the "reactionary" participants in the internal negotiations: a threat that may happily prove idle if peace comes to Rhodesia and his guerrilla troops begin to melt away.

Meanwhile, the Nkomo-Mugabe faction insists that Rhodesia's future must be settled between Great Britain (whose crown colony Rhodesia was before declaring its independence unilaterally in 1965) and their "Patriotic Front," whose "patriotic" activities consist largely of the ruthless murder of women, children and the elderly, mostly black. They insist that Ian Smith be deposed, and that they, the intruders and disturbers of the peace, be handed immediate control of the army and the police. In short, they demand capitulation by the Rhodesian moderates; and they indicate no willingness to compromise.

What is perverse about the U.S. position is that the closer Ian Smith and the black moderates come to an agreement, the more cozily we seem to collaborate with the U.S.-British-UN cabal to undermine it. *The Economist's* Salisbury correspondent reported, on January 21: "There are signs that the (Patriotic Front) is speeding up the war and deliberately picking on black civilian targets in an effort to prevent a peaceful changeover to majority rule. From Salisbury, it appears as if the British foreign secretary, Dr. Owen, and the British commissioner-designate, Lord Carver, are actively discouraging an internal settlement."

In harsher language, the U.S. risks playing accomplice to further bloodshed by pursuing a Rhodesian settlement agreeable to radical outsiders and guerrillas. This is the actual, but we cannot imagine the calculated risk of U.S. policy. Why, then, do we take so sour a view of the heartening chances of internal peacemaking?

The reasons must necessarily be a matter of speculation. In Washington, we suppose, it may be thought more important to appease the demands of Rhodesia's "front-line" neighbors than to bring internal peace to the country. The effect of that policy, intended or not, is to sacrifice the moderate majority in Rhodesia, black and white, to considerations of African real-politik.

This is discreditable enough. It becomes unconscionable if one considers how close Mr. Smith and the black moderates are to a peace settlement and new constitution. As noted by Morley Safer on the CBS program "60 Minutes" Sunday evening, Rhodesia is one of the few functioning biracial societies in Africa. It is not a police state. Its segregationist policies are disappearing. The army and police are predominantly black, and, so organized, can hardly be accounted dependable instruments of white tyranny.

In bitter truth, the Anglo-American policy on Rhodesia seems to be influenced not only by dubious strategic calculations, but also by an uncharacteristically petty-minded British resentment that Rhodesia has made a success of unauthorized independence. Against all odds and predictions, Rhodesia has become a country in being. It needs only the support of the outside world to make reasonable democrtaic terms with the black majority.

That the U.S. might not only neglect but actually undercut this success is an offense to sense and conscience. Let us call a halt to this foolish policy—now.

A TRIBUTE TO ANNA PERRY-FISKE

HON. DANIEL K. AKAKA

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. AKAKA. Mr. Speaker, Hawaiian-born Anna Perry-Fiske has been designing a show for years which has become a magnet for mainland visitors and gala gatherings of islanders. Every 2 years, in Waimea, on the big island of Hawaii, Ms. Perry-Fiske produces "Old Hawaii on Horseback," an extravaganza which includes everything from island princesses to Hawaiian cowboys, from sea captains to missionaries, portrayed in a sweep of local history. Chronologically, the show begins with the arrival of Capt. George Vancouver who brought the first cattle to the islands, and Capt. Richard Cleveland who brought the first horses to Hawaii.

Anna Perry-Fiske is a woman of truly remarkable talents. This extraordinarily disciplined woman not only originated this show, she also wrote, directed, and produced it. In addition, she researched and designed every costume, matched the horses, drilled the riders, and made all the hats. When she is not involved with the plans for "Old Hawaii on Horseback," Ms. Perry-Fiske can be found tending the Anna Ranch (the site of the show) which was started by her New England grandfather, Thomas Lindsey.

There will be only one performance of "Old Hawaii on Horseback": May 21 at 1 p.m. All moneys collected for admission go to the Hawaii Heart Association or toward the purchase of cardiac equipment in big island hospitals. Additionally, there are "heart barrels" set up on the show grounds to receive contributions. All time, labor, materials, and equipment are donated, and numerous civic agencies, business firms, and individuals contribute invaluable services.

This amazing showpiece of Hawaiian history, set amidst gentle rising hills chartreuse-green pastures, lava-rock fences, eucalyptus trees, ti hedges, and tree ferns, is more than spectacular, more than fantastic. It is history come alive—a brilliant array of characters from the past. Anna Perry-Fiske deserves our praise and admiration for she creates an event which is enjoyed by thousands of spectators, and appreciated by countless heart patients unable to attend.

ABRAHAM LINCOLN

HON. NEWTON I. STEERS, JR.

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. STEERS. Mr. Speaker, Abraham Lincoln, the 16th President and first Republican leader of our Nation is undisputably one of the greatest men in the history of our country. He holds a unique place in the hearts of our people, for as George Washington is rightly celebrated for bringing this country into being, so Lincoln deserves a like recognition for saving it.

He led our Nation through the difficult ordeal of the Civil War, and under his leadership we came out stronger than before. His leadership throughout the war resolved, directly and indirectly, fundamental issues as to the nature of the federal system. His efforts in behalf of freedom and equality for all mankind ended the problem of slavery in our democratic Republic. It took a great man to lead this country through war and then reunite it in peace and Abraham Lincoln was such a man.

In designating his birthday as a national holiday, we would give official sanction to a widespread observance already celebrated in over 30 States. In that way we would pay long-due tribute to the sure instincts of our people.

Said Woodrow Wilson:

> Lincoln was a very normal man with very normal gifts, but all upon a great scale, all knit together in loose and natural form, like the great frame in which he moved and dwelt.

More than a gesture, such an act would encourage the study of his life, the thoughtful scutiny of his character, in the context of our history, past and present. While underlining Stanton's classic tribute—"Now he belongs to the ages"—it would emphasize that Lincoln also belongs in a special way to America and to the people whom he loved and for whose freedom and unity he gave his life.

I would hope that my colleagues would join me in paying tribute to one of the greatest of Americans by supporting this effort to designate February 12, Abraham Lincoln's birthday, as a national holiday.

SOUTH AFRICA AND THE IMF

HON. TOM HARKIN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. HARKIN. Mr. Speaker, on Christmas Eve, the Washington Post reported that the U.S. Government is continuing to provide financial support for the racial policies of South Africa through the International Monetary Fund. The article clearly points out the irreconcilable fact that although the U.S. officially denounces the South Africa Government's racial policies. $107 million of the IMF's total $463 million loan to South Africa came from the U.S. contribution to the IMF.

For over the last 2 years, Congress has struggled to make human rights a cornerstone of our foreign policy. Yet if the United States is to achieve any credibility in this area, it must attain at least some degree of consistency in its human rights policy. Either human rights is a valid consideration for all U.S. international funding, or it is valid for none. Last fall, in the face of dire predictions made by the World Bank, strong human rights language was incorporated into the authorization bill for the international financial institutions. None of these multilateral lending organizations have collapsed or ceased functioning.

Some will argue that the IMF is "unique" in its functions. That its loans are to relieve balance-of-payment problems and not to aid in development. But is uniqueness sufficient enough to outweigh human rights considerations? And is not money fungible, and once lent difficult to trace to a specific expenditure? Yet if a country receives $463 million from the IMF it has the ability to spend $463 million on something—and that some-

thing could be on its military as in South Africa.

As the debate and vote on the IMF supplementary financing facility nears, I urge all my colleagues to read the following Washington Post article. While some of us may not understand all the intricacies of the international financial systems, all of us should at least know and consider the ramifications of the decisions made there:

UNITED STATES HELPED VORSTER GET LOANS FROM IMF

(By John M. Goshko)

Despite its official criticism of South Africa's racial policies, the United States has helped Prime Minister John Vorster obtain $463 million from the International Monetary Fund to combat his country's economic problems.

Rooted in that action is a case study of the contradictory choices confronting U.S. officials who must work out a design for furthering U.S. interests and policy objectives on a global basis.

Specifically, U.S. support of South Africa in the IMF raises questions about whether there is a built-in clash between the political and economic goals of Washington's foreign policy.

On one side, there is the concern of the United States, which played the leading role in creating international lending agencies like the IMF, that the integrity and impartiality of these institutions be protected so they can perform the jobs for which they were designed.

In the case of the IMF, that job is to help 130 member countries overcome threats to their economies caused by adverse trade balances—imports outstripping exports—that seriously deplete gold and currency reserves.

The success of the IMF's bail-out operations, U.S. officials note, is important to every country engaged in international trade. If a country, particularly a large country like South Africa, runs into balance-of-payments problems that make it unable to sell products and pay its foreign debts, the resulting chain reactions could disrupt international trade and monetary systems.

For that reason, officials say, the United States must treat loans made by the IMF differently than U.S. aid granted on a direct, government-to-government basis.

Washington, they argue, must set an example for other members by ensuring that U.S. votes in the IMF are strictly in accordance with the agency's rules and economic objectives rather than allowing them to be influenced by political considerations.

However, that argument increasingly has been challenged by human-rights activitists, leaders of the American black community and other opponents of South Africa's white supremacy policies. They charge that international agencies like the IMF have become convenient, backdoor devices for quietly channeling aid to countries like South Africa, whose domestic policies are bitterly opposed by many Americans.

By helping South Africa bolster its slumping economy, these critics charge, the United States has thrown away one of its most effective potential weapons for putting pressure on the Vorster government. As long as the United States helps keep money coming through agencies like the IMF, they contend, Vorster will be justified in dismissing Washington's remonstrances as "totally irrelevant."

This dissenting viewpoint has been heard with growing frequency in the months since concern with human rights became a major element of U.S. foreign policy. For instance, it was the basis of a recent, unsuccessful attempt in Congress to restrict U.S. contributions to some international lending agencies by specifying they could not be used to assist seven countries charged with human rights violations.

South Africa wasn't among them. But, the size and importance of the aid it received from the IMF make it perhaps the best illustration of the problem.

The IMF's balance-of-payments assistance to South Africa the last two years was greater than the combined IMF assistance to all other African countries the same period. In those two years, only two other nations, Britain and Mexico, were bigger beneficiaries of IMF aid.

Of the total received by South Africa, an estimated $107 million came from the U.S. government's contribution to IMF funds. Even more important, the United States, as the IMF's largest contributor and most influential member, probably could have blocked the South Africa loans by objecting.

Instead, U.S. representatives on the IMF's executive board supported the South African requests during closed-door deliberations.

That is revealed by minutes of executive board meetings, obtained by writers James Morrell and David Gisselquist working on a South Africa study for the Center for International Policy, a private, Washington-based political research group.

The documents show the process began in January, 1976, when South Africa applied to the IMF for help in fighting problems it said had been caused by rising imports, a slump in exports and resulting drain on reserves.

During subsequent internal IMF discussions, according to the documents, Thomas Leddy, one of the U.S. delegates to the executive board, strongly endorsed the South African requests.

With this U.S. encouragement, the IMF gave South Africa loans totalling $366 million in 1976. That was during the Ford administration when U.S. policy, under Secretary of State Henry A. Kissinger, tended to emphasize the carrot rather than the stick in dealing with South Africa.

The documents do not cover IMF deliberations on South Africa in 1977. However, diplomatic sources say, U.S. delegates to the IMF have continued to support additional South African loan requests through the first year of the Carter administration.

As a result, by October, total IMF aid to South Africa had mounted to $463 million. These loans were made at the same time the Carter administration, in line with its much-advertised championing of human rights, was taking an outspokenly critical task toward the Vorster government.

When asked about the apparent contradictions, administration officials reply that Washington has no single yardstick by which economic decisions on South Africa are made.

Since 1964, for example, U.S. policy has prohibited the Export-Import Bank, a government-controlled and funded agency that provides financing for U.S. sales overseas, from making direct loans to South African purchasers of U.S. products.

However, the bank is permitted to guarantee financing of loans obtained from private U.S. banks by South African importers of U.S. goods. Another federal agency, the Commodity Credit Corp., administered by the Agriculture Department, is allowed to lend money to South Africa for purchase of U.S. farm products.

The State Department follows what it calls "a neutral policy" of neither opposing nor encouraging U.S. business investment in South Africa. Instead, department officials say, they try to ensure that potential investors are aware of South Africa's internal political problems and to urge them to follow "enlightened racial employment politics."

"Neutrality" is also the word used by administration officials when discussing the U.S. role in the IMF. U.S. representatives there, they say, are instructed to approach decisions on strictly economic grounds, taking into account IMF rules about whether the country in question has a balance-of-payments problem caused by external factors beyond its control.

However, those who oppose that policy point out that the United States frequently has used its votes and influence in other international lending agencies such as the World Bank, the Asian Development Fund and the Inter-American Development Bank for frankly political purposes.

The Carter administration has been especially active in applying human rights considerations to its votes in many of these institutions. Recently, for example, Washington blocked an IADB loan to El Salvador for a hydroelectric project because of human rights factors. Then, when U.S. officials detected improvements they wanted to encourage, Washington reversed itself and offered to put up roughly half the loan.

In the view of human rights activists South Africa has been treated more favorably by the United States and other industrial powers dominating the IMF. They point to the sizeable U.S. and European investments there, the high percentage of South Africans foreign debt held by American and European banks and the strategic importance to the West of South Africa's mineral exports.

In the study they are preparing, Gisselquist and Morrell cite these charges and argue that political considerations should not—indeed, cannot—be divorced from any assessment of South Africa's economic situation.

They contend that South Africa's economic problems primarily are due not to an externally caused trade imbalance, but to overspending rooted in the high cost of repressing the 83 per cent of the population that is black or colored.

To buttress this argument, they cite a confidential IMF study in April that lists South Africa's defense budget as "a major cause of the rapid increase in total current expenditure; it's share of total expenditure has risen from 14 per cent in 1973–74 to 20 per cent in 1976–77."

"As a grisly footnote to the IMFs aid to South Africa," Gisselquist and Morrell add, "the April, 1977, IMF study said that the increase in military spending in 1976–77 came to $450 million—almost exactly the amount of IMF assistance."

The executive board minutes obtained by the two writers show that the only delegate to raise these points was Antoine W. Yameogo of Upper Volta, representing 17 black African countries.

The only doubts voiced by delegates from industrial nations involved questions about whether South Africa had caused its problems by keeping sizeable gold stocks off the export market in anticipation of higher world prices.

Even that objection was dismissed by U.S. delegate Leddy. The documents quote him as saying that "South Africa's export shortfall was probably due to factors largely beyond its control." Accordingly, he found the assistance request reasonable and worthy of support.

In summing up, Gisselquist and Morrell state: "Each of the IMF meetings covered in the minutes was held behind closed doors. Thus while South Africa was earning world condemnation for its racist policies, it was receiving a more tangible measure of support from the IMF. It is difficult to imagine any other international forum in which support would be forthcoming."

SMALL TOWN SAFE DRINKING WATER ASSISTANCE ACT

HON. JOHN B. ANDERSON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. ANDERSON of Illinois. Mr. Speaker, I am today introducing the

Small Town Safe Drinking Water Assistance Act of 1978. The purpose of this bill is to provide Federal grant assistance to communities which cannot otherwise find necessary financial assistance to comply with national primary drinking water regulations.

Under the terms of my bill, Federal grants of up to 75 percent of the total costs of constructing or modifying a small public water system in order to bring it into compliance with Federal safe drinking water standards would be made available through the Environmental Protection Agency. To qualify for such a grant, a small community, commonly defined as one having a population of 10,000 or less people, would have to show that it could not "reasonably obtain financial assistance necessary to comply with such regulations from any other source." EPA in turn would have to determine that the proposed system "is not likely to be made obsolete by subsequent changes in primary regulations." The project would have to be approved by the State agency with jurisdiction over safe drinking water since in most States the State agencies have primary enforcement responsibilities. And, finally, the grant could only be used for construction or modification of a facility, and not for planning or operating expenses.

The bill authorizes a total of $100 million in grant assistance over 3 years; as follows: $20 million in fiscal year 1979; $30 million in fiscal year 1980; and $50 million in fiscal year 1981.

Mr. Speaker, the Congress enacted the Safe Drinking Water Act back in 1974 as a joint, Federal-State regulatory system under which the Federal Environmental Protection Agency was charged with setting national safe drinking water standards, and the States were given primary enforcement responsibility. While the act included grants to the States to assist them in carrying out their public water supervision programs, it did not contain any funds for assisting local communities in complying with the new standards. It was apparently felt that the users should absorb any additional costs that might be involved in coming into compliance, and that these costs would not be substantial.

Last year we renewed the Safe Drinking Water Act and extended the grant assistance program for State public water supervision programs. The 1977 amendments also called on the EPA Administrator to submit a report to Congress within 18 months identifying and analyzing the costs to States and local jurisdictions of complying with the new drinking water regulations, and alternative means of compliance and financing the costs of compliance, "including user charges, State or local taxes or subsidies, Federal grants, loans, et cetera." (H. Rept. 95–338, page 7). The 1977 amendments went on to require that the Administrator's report should analyze separately the compliance and financing problems of "public water systems serving small communities."

Mr. Speaker, while the Administrator's report is not due until spring of the new year, I do not think it is too early to begin consideration in this Congress of the special problems which will confront small communities in complying with the safe drinking water regulations. In my own 16th Congressional District of Illinois, for example, the town of Rochelle, which has fewer than 5,000 families, is faced with a $1.5 million price tag on converting its drinking water system to comply with the iron content standards promulgated by the State EPA. It is obvious that this cost burden on such a small community is extremely difficult if not impossible to bear. no matter how you stretch it out. While the crunch for most other small communities in the United States has yet to be felt since the current focus is on communities with populations of 75,000 or more, I predict we will eventually hear the anguished cries of thousands of villages and hamlets when presented with their new water bill, compliments of the U.S. Government.

I do not say any of this in derogation of the Safe Drinking Water Act. I happen to support national safe drinking water standards, because I think they will make a substantial contribution to the improved public health of our citizens. But I fear this is another case in which we did not give adequate prior consideration to the costs as well as the benefits of such regulations and make adequate provision for meeting those costs, particularly in the smaller communities. This is apparent when you consider that we passed the Safe Drinking Water Act in 1974, and then, in 1977, when it was up for renewal, we commissioned a study of whether there might be alternative means of complying with the standards and whether the existing means of financing compliance were sufficient. In the meantime, while this study is going on, communities will be expected to go forward with their compliance efforts, regardless of what the results of that study might show. Now obviously, if some imminent danger to the public health is found, immediate corrective action must be taken. But if the health hazards in the drinking water are less than substantial, communities should have the benefits of this study of compliance and financing alternatives before they are forced to proceed with changing their systems.

The Small Town Safe Drinking Water Assistance Act which I am introducing today recognizes that the Federal Government cannot and should not be expected to pay all the costs of all the water systems which will have to make changes in order to comply with the new regulations. The water users in most communities will have to bear this burden, for the most part and, for the most part, the average increase in costs is estimated to be between $6 and $10 a year per family. But there will be small towns which will be forced to make changes beyond their meager means to pay. My bill confines the grant assistance to such small communities which cannot obtain the financial assistance needed to comply from any other source. Thus, not all small towns would be eligible for a safe drinking water grant. These would be available only to the neediest cases—the most hard-hit hardship communities. I think this is the least we can do now, and I think we should do it now, even before the EPA study is completed.

FARMERS TELL GOVERNOR "WE'RE TIRED OF BEING FIRE PLUGS FOR THE STATE DEPARTMENT DOG"

HON. STEVEN D. SYMMS

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. SYMMS. Mr. Speaker, I would like to voice my great disappointment in the testimony delivered by Secretary of Agriculture Robert Bergland this week in the House Agriculture Committee hearings. Secretary Bergland's statement to the committee can be summed up to say that he is unwilling to stand up and fight for America's farmers because he does not want to start a fight he does not think he can win. The Secretary of Defense stands up for defense programs, and the Secretary of Labor supports labor interests. So why do we have a Secretary of Agriculture who is more interested in not offending the State Department than in standing up for fair market price for farmers.

Projections for 1978 show that farm income is expected to be comparable to what farmers earned 38 years ago, in 1940, and we have a Secretary of Agriculture who concedes the battle for fair prices before it has even begun. The only hope America's farmers have is to identify the cheap food boys in Congress and then throw the rascals out in the next election.

To illustrate the seriousness of the situation, I am commending to my colleagues a letter written by two Idaho farmers, Chris Yamamoto and Lon Klahr, to Idaho Governor John Evans, one of 38 Democratic Governors in the United States. The farmers ask Evans to come to Washington to stand up for the interests of Idaho's farmers. In their words "farmers are tired of being used as a fire plug for the U.S. State Department Dog."

JANUARY 20, 1978.

Governor John Evans must take a stand for the government or for the farmers, because the two are clearly in conflict. The people of this great state deserves to know the truth. Which is more important the Democratic Party, rubber-stamping one another for party unity or the economy of the state of Idaho. This cannot be done through local channels, but it must be done on the federal level.

"We want Gov. Evans to go to Washington, D.C. and demand to talk to President Carter, and then demand that something be done immediately to protect the farmers in Idaho and farmers in the rest of the nation."

"It will take some courage for Gov. Evans to do this, but those are his people in Washington and they should listen to a fellow Democrat and a governor of a sovereign farming state."

American people are being eaten up by a cancer, through regulations, high taxes, unemployment and anything else that can be shoved down their throats. This cancer for some reason is promoted by our government. American people need someone that will say this and mean it.

It seems like all of our politicians are panty-waists, afraid to say anything for fear

of hurting their careers or insulting their political parties.

Americans need men not puppets on a string, and it is time for Gov. Evans to be a man or a political puppet.

If Gov. Evans will tell President Carter to take his farm policies and shove them, farmers will stand and applaud, and probably other governors will do the same.

Farmers are tired of being used as a fire plug for the U.S. State Dept. dog and it should be so stated.

If Gov. Evans cannot see that the U.S. State Depts. bureaucrats in striped pants is what's making a mess out of American Agriculture maybe the people of Idaho need a new governor, who is more enthusiastic for Idaho's largest industry.

Sincerely,

CHRIS YAMAMOTO.
LON KLAHR.

REED LARSON AND THE RIGHT TO WORK

HON. ROBERT E. BAUMAN

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. BAUMAN. Mr. Speaker, among the most sacred rights of every American is the right to work without being forced to pay anyone tribute as a condition of employment. One man has done more to protect and expand this right for the working men and women of America than any other single individual. That man is Reed Larson, the executive director of the National Right to Work Committee, and he deserves the thanks and commendation of every Member of Congress for his dedication to the preservation of right principles in labor relations.

Mr. Larson was recently the subject of an outstanding profile published in the New York Times and written by Jerry Flint. After reading this article, it becomes quite clear why the committee has expanded its membership from barely 40,000 12 years ago to the more than 1.25 million now enrolled. Reed Larson cares about the rights of the working men and women of America and he has dedicated himself and his organization to the preservation of those rights. I commend this article to the attention of my colleagues for the insights it provides about a man we will all be hearing a great deal more from in the future:

[From the New York Times, Dec. 4, 1977]

REED LARSON VERSUS THE UNION SHOP

(By Jerry Flint)

(NOTE.—(b) *Nothing in this Act shall be construed as authorizing the execution or application of agreements requiring membership in a labor organization as a condition of employment in any State or Territory in which such execution or application is prohibited by State or Territorial law.*—Section 14(b) of the Taft-Hartley Act.)

Reed Larson. The name won't have a familiar ring. But Reed Larson can mobilize a right-wing army of hundreds of thousands, make Presidents change their minds and frustrate the best laid plans of organized labor. He even has his own zip code number.

As the leader of the right-to-work movement—its symbol is the Liberty Bell—Mr. Larson this year issued the call that brought thousands of letters pouring into Congress to defeat the common situs picketing bill (which would have let a union picket a single contractor to shut down an entire construction site). The defeat forced the American Federation of Labor and Congress of Industrial Organizations to abandon plans for repeal of 14(b); this section of the Taft-Hartley Act, allowing states to pass laws banning the union shop, is central to Mr. Larson's mission. Twenty states now have such laws.

His letters are rolling out—25 million this year—from the Fairfax, Va., base (near Washington, D.C.) of his organization, the National Right to Work Committee, and its legal and fund-raising arms. And the contributions are rolling in: $8.5 million this year. In behalf of 1.25 million members, he is bringing dozens of lawsuits around the country, placing ads in publications, commissioning national opinion polls. And looking for new victories.

In electoral politics: "We're looking at the Senate races next year and the seats that will be changing," he said softly, a touch of Kansas still in his speech.

In the states: "When we get 24 or 25 states, a few more members of Congress," he said, "one of these days they'll pass a law banning compulsory unionism." He is preparing to put right-to-work bills before legislatures next year in Idaho, New Mexico, Maine, New Hampshire, Vermont, Colorado and possibly Montana or Missouri.

In Congress, where the labor reform bill is the A.F.L.-C.I.O.'s most important pending legislation. "We'll stop it in the Senate."

Mr. Larson looks to other battlefronts as well. Campaign funding, for example. "The biggest single issue is diversion of compulsory union dues into politics," he says, charging that union money finances a liberal political machine. He has also mounted an attack on public-employee unionism and has started investigations into pro-union materials reaching public schools.

Some of this activity has led to suggestions that Mr. Larson is moving beyond his concentration on a single issue, the right-to-work campaign, into broader anti-union and conservative areas. He denies it.

"Right to Work," a phrase invented by a Dallas newspaperman in 1941, is the conservative answer to organized labor's battle for the union shop. Under Federal law, a union must represent all the workers in its recognized bargaining unit, including any who do not join the union and do not pay dues. Unions call such workers "free riders" and seek to negotiate the union shop, in which every worker must join and pay dues or lose his job. A variant, the agency shop, allows workers to stay out of the union but requires them to pay dues. "Everybody benefits," says Albert Zack, director of public relations for the A.F.L.-C.I.O., "so everybody ought to share the costs."

On one level, the right-to-work battle is philosophical. Mr. Larson insists that he is not anti-union, that the issue is one of civil and human rights and that he is only against compulsory unionism.

Union supporters dispute that. Said Joseph Rauh Jr., a lawyer heading a legal assault on the Right to Work Committee's legal defense fund to prevent it from collecting contributions from the public: "Reed Larson is devoted to the destruction of the trade union movement." Only such devotion, Mr. Rauh says, could have led to the sticker the Right to Work Committee was selling a few years ago with the words, "Eat California Grapes."

But the fight over the right-to-work issue is not a philosophical debate; it is about power.

If there is a strong anti-union faction in an organized plant, the union's solidarity and strike potential—thus its bargaining power—is weakened. Dues money and unionist zeal can be translated into power at election time through contributions of cash and manpower to get out the desired kind of vote.

The unions have not had much luck winning members in recent years. Union membership, totaling 19.4 million last year, was about the same as in 1967, but organized labor's share of the growing work force fell from 22.7 percent to 20.1 percent in the decade.

However, Mr. Larson and his movement's influence may be easily overestimated. The last election saw Democrats sweep Congress and the White House. Legislation being passed or considered generally calls for more Government action on the side of unions as well as more Federal intervention in the job market, in business and in the general environment.

There has been speculation about a conservative reaction in the nation. But some people see Mr. Larson as the effect of such a public shift, not the cause.

Mr. Rauh reads the right-to-work successes this way: "Whether Larson goes up or down is a function of what the labor movement does. If you continue to have scandals like the Teamsters and the Mine Workers, if the labor movement continues to go down in public esteem, he will go up."

But Mr. Larson's techniques can make trouble. His legal arm, for example, has about 60 cases going. Union lawyers may sneer at them, but the cases take time and money that could be used elsewhere.

A similar effect is felt at the state legislative level. "Even when we win it, we lose it," said one A.F.L.-C.I.O. man, back from beating away a right-to-work law. In Idaho, for example, the unions spent all their time on such a battle while a vocational education program they wanted went by the board.

Mr. Larson was born on a farm in Smith County, Kansas, 55 years ago. He studied electrical engineering at Kansas State Univerity, then worked at a Wichita lamp company for eight years and slid into Junior Chamber of Commerce activities, eventually being named state chairman. His career crystallized two decades ago when he took over the 1958 campaign for a Kansas right-to-work law.

That year the right-to-work forces were conducting a major push in six states, including a bruising referendum battle in Ohio. The unions beat the right-to-work forces in five states. Only in Kansas, where Mr. Larson ran the show, was such a law passed.

"We built Reed Larson because we lost," said Mr. Zack of the A.F.L.-C.I.O. "And he didn't win—we lost." The union official recalled that the grain millers in Kansas went on strike two weeks before the vote, and grain piled up around the state. "It infuriated Kansans to see that a union could destroy the state's one cash crop. We've had him ever since," Mr. Zack said.

Mr. Larson and his wife, Jeanne, who have three grown daughters, left Kansas when he became head of the National Right to Work Committee, where he earns about $50,000 a year. Since then the war at the state level has been largely a draw, with the right-to-workers winning few new states but beating back union efforts to kill the laws where they are already in effect.

In 1965 Mr. Larson was credited with persuading the Senate Republican leader, Everett Dirksen of Illinois, to personally lead the filibuster attack on a major Democratic effort to kill Section 14(b) of the Taft-Hartley Act. The late Senator's prestige and mighty voice carried the day.

In 1970 Mr. Larson mobilized his forces again and was credited with keeping the union shop out of the postal reform bill.

Victories have been coming a bit faster of late. Last year President Ford was ready to sign the common situs bill, passed by Congress, until Mr. Larson turned on his letter spigot. Mr. Ford vetoed the bill.

This year the A.F.L.-C.I.O. put up common situs again. A friendly President Car-

ter was ready to sign; common situs had merely to roll through Congress as it did in 1976.

"We were lulled into a sense of false security," said Mr. Zack. "We were so sure [about the result] that nobody counted" the votes in the House again. Mr. Larson, too, concedes he didn't think he could stop common situs in the House and, like the A.F.L.–C.I.O., had shifted his efforts to the Senate. But first he sent out his letters, urging citizens to write to their Congressmen.

Common situs was beaten in the House, a stunning blow to the unions. "We realized we weren't going to get 14(b) out of this session, so we put it on the back burner," Mr. Zack said. "Reed Larson was the key to the thing."

Opponents credit Mr. Larson and his assistants with dissociating the movement from the right wing generally and with appealing to liberals, too. Right-to-work ads featured women and blacks who had had union trouble. Publicity releases, inundating newsmen, were mostly temperate.

Case histories triggered thousands of sympathetic editorials. Repeated again and again in the Right to Work Committee's publications, for example, is the story of the murder of Joe Hooper, a non-A.F.L.–C.I.O. construction worker in Louisiana. Union crowds stormed the work site, and shooting began. "Little Joe Hooper had paid the ultimate price for exercising his freedom of choice," says the Committee's story.

"Hugh Newton [a former consultant to the Committee] worked 13 years and I worked five to establish credibility," said Herb Berkowitz, former Committee director of public relations. "You could go into the New Republic or the Arkansas Gazette in Little Rock and be welcome, not be regarded as some right winger that had to be frisked."

Mr. Larson is also credited with the discovery that mail (the committee spends close to $2 million a year on postage) could be used to mobilize hundreds of thousands of conservatives to write letters and give, give, give. Thanks to computer technology, mail could be pinpointed to produce thousands of letters aimed at a single legislator.

"We finally have union bosses on the run," said one letter, adding a page later: "Our legal experts tell me it will take another six months and $68,000 to finish the job." Some $215,000 came in.

"Congressman Mendel J. Davis [a Democrat] will be casting a critical vote on this issue. I hope you'll let him know," said another letter, signed by Mr. Larson. The packet included a call for money, copies of articles from The Washington Post and The Atlanta Constitution and already-addressed protest postcards. It was sent to 1,714 persons in Representative Davis' district in South Carolina.

Some people believe Mr. Larson has built a machine that can serve the conservative philosophy but is trapped with his single issue—the right-to-work issue. That has been broadened a bit, of course, to include the fight against common situs, the labor reform bill and the campaign funding laws.

"I believe there is a great war going on in the soul of Reed Larson," said one observer. "He's a very important part of the right-wing establishment, but he is champing at the bit. He wants to have more than the narrow issue."

Mr. Larson vows that his right-to-work movement will not coalesce with other groups on the right "to the extent that we support them," though there might be some "overlap" among causes and members."

And what about that war in the soul?

"You have to face that every day," Mr. Larson said. "It goes with the job."

CROWN OF ST. STEPHEN: A "GIFT" THE PEOPLE NEVER KNEW ABOUT

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. DORNAN. Mr. Speaker, yesterday, I read into the CONGRESSIONAL RECORD an editorial and sworn testimony concerning the facts surrounding the Crown of St. Stephen, the U.S. possession of it and its surrender to the Communist regime of Janos Kadar.

On January 5, the day before the crown was so ignominiously returned to the Hungarian people's oppressors, the Crown of St. Stephen Protection Committee held a press conference deploring the actions of the administration.

Radio Free Europe transmitted the entire text of this press conference to the people of Hungary on the day and the hour that the crown was returned to the Communist regime.

The remarkable thing about this press conference is that this is the way the Hungarian people found out about the return of the crown. The Kadar regime had not told them. The Carter administration had not told them. The controlled Hungarian press had not told them.

And yet the Carter administration is still adamant in its assertion that the crown was returned to the "people" and not to the Soviet-controlled government of Janos Kadar.

So that the American people can learn how the Hungarian people really found out about the administration's wondrous gift to them, I ask that the text of the January 5 press conference be printed in the CONGRESSIONAL RECORD.

STATEMENT BY JOHN M. SZOSTAK

As one of the officials of the St. Stephen Crown Protection Committee, I would like to share with the American people a statement that I prepared and delivered on January 5, 1978 at a press conference in Washington, D.C. This statement was transmitted by Radio Free Europe (RFE) to the people of Hungary on the day and the hour that the Holy Crown of St. Stephen was being handed over to captivity by the Executive Branch of our Federal Government.

STATEMENT

The issue confronting America today is not the Crown of St. Stephen, the issue is the Constitution of the United States. The Executive Branch, of our Federal Government through deceit and intimidation of the Judiciary Branch have violated the constitutional prerogative of the Legislative Branch, The United States Senate, under Article II, Section 2 of the United States Constitution regarding the Senate's right to ratify treaties. The exchange of letters by the U.S. and Hungarian Governments on December 13, 1977 and the final act of handing over the Crown of St. Stephen to the Hungarian Communist Government is tantamount to entering into a treaty between the United States and Hungary, without proper advice and consent of the United States Senate.

Through deceitful tactics, the Department of State has gone to great length in secret to formulate plans of how and when the Crown is to be returned. Fortunately on November 4, 1977 this action was uncovered and leaked to the press via The New York Times.

Since November 4, 1977, the White House and the Department of State still conducted their policy of deceit with greater intensification and boldness. The unethical conduct of outright lies and denial on the part of the Executive Branch was not only limited to the American people but also to the Legislative Branch who have the privilege of obtaining classified information.

Since the official public announcement for the return of the Crown was made on December 15, 1977, the issue was brought to the attention of the U.S. Federal courts to seek a temporary injunction until the matter could be resolved in a Constitutional manner. At that moment, the Executive Branch directed their deceptive tactics to the Judiciary Branch where the American people thought that "equal justice under law" would prevail.

The conduct of justice in this matter has been violated as a result of pressure from the Executive Branch. The premise of justice was to do everything possible not to embarrass the President by delaying his plans to return the Crown. In essense the Executive Branch is under the opinion that the office of the President comes before the law, meaning the United States Constitution and its sacred tribunals.

The Executive Branch claims that the Crown of St. Stephen is the property of the Hungarian people, then why not let the American people via their elected representatives decide on this matter in a fully constitutional manner.

We as Americans grew up with the creed: "the government of the people by the people and for the people". As a result of the deceptive actions by the Executive Branch this sacred creed that is guaranteed to us by the signatories of our Declaration of Independence was severely tarnished. The late J. Edgar Hoover termed Communists as "Masters of Deceit", I never dreamed that the same term could be applied to our own Executive Branch of the Federal government, especially under the leadership of one who calls himself a "Born again Christian".

The conduct of the Executive Branch in this matter will signal the beginning of an "Imperial Presidency". Human rights which are claimed to be the cornerstone of this administration's foreign policy is nothing more than empty rhetoric and a rebirth of the Sonnenfeldt Doctrine—give lip service to human rights and give the communists what they want. The conduct of the trustees of our liberties are not only in question but proven beyond doubt that they have violated the Constitution and obstructed justice.

January 6, 1978 will go down in the annals of American History as a day of infamy, where we who are the last fortress of freedom have betrayed a sacred trust, by returning a sacred symbol of religious and political freedom to a government that is opposed to what it symbolizes. This hideous act against human rights was committed at the risk of violating the Constitution of the United States. This is nothing more than the making of an American Tragedy.

Quo Vadis America—your reputation as a moral leader in the world is severely damaged by this hideous act. The responsible media and the concerned voices of the American people are now the only trustees left for the preservation of freedom in America and in the rest of the free world today.

POSTSCRIPT

The media reports showed only gloomy, tense expressions on the faces of the carefully selected individuals who attended the ceremony. The Hungarian "people" were

conspicously absent. In fact it was Radio Free Europe that first announced the news of the Crown's return to the Hungarian people, which forced the Hungarian government to announce the return as well, but this was done in a low key manner.

"PREVENTIVE DETENTION" WILL GIVE PEACE OF MIND AND PEACE IN FACT TO LAW-ABIDING CITIZENS

HON. KEITH G. SEBELIUS

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. SEBELIUS. Mr. Speaker, some years ago in a dissent filed in a criminal case on appeal to the United States Court of Appeals for the District of Columbia, Judge Miller took a position that was not in the mainstream of the criminal law at that time because of the general concern expressed for criminal defendants. Judge Miller stated that "law abiding citizens have some rights too."

My colleague from Kansas, Senator DOLE illustrated that times do change by offering a pretrial detention amendment to the omnibus revision of the U.S. criminal code, which the Senate accepted by a 2 to 1 margin.

My sentiments follow those of the editorial page of the Washington Star, which is "underwhelmed" by some of the arguments against pretrial detention. I commend to your reading the editorial from the Washington Star for February 1, 1978, and I wish to commend Senator DOLE for taking the action he did in amending this legislation.

[From the Washington Star, Feb. 1, 1978]

"PREVENTIVE DETENTION" AGAIN

It is a milestone of some sort, whether for good or ill one cannot immediately say. In voting last week on the omnibus revision of the U.S. criminal code, the Senate accepted (62–29) Sen. Robert Dole's amendment permitting "preventive detention" of accused rapists, kidnapers, armed robbers and anyone who seizes a hostage.

Sen. Edward Kennedy, the floor manager, mildly demurred; but few even among the Senate liberals rallied to his banner.

This event suggests that something has happened to the mood of the Senate since the fierce 1970 battle over the District of Columbia crime bill, or that something has happened to pluck the nettle from the concept of "preventive detention." Or both.

One thing that has happened in the Senate is that Sen. Sam Ervin Jr. is gone; and it was he whose thunder rallied the opposition eight years ago. One thing that has happened to "preventive detention" is that it seems, in fact, to have fulfilled neither the worries of its foes nor the hopes of its advocates. And that is not unusual in highly technical issues of criminal procedure.

We ourselves rather felt the force, eight years ago, of Senator Ervin's witty argument against preventive detention. Judges, he often observed, are sufficiently taxed to discover what happened in the past, and *a fortiori* unlikely to use prophetic powers wisely: prophetic powers, that is, as to the probable future behavior of accused criminals when out on bail. Indeed, predicting future human behavior from past example is an unmastered science.

But worries about the "presumption of innocence," which some critics profess, underwhelm us. A person previously convicted of serious crime, or several serious crimes, is "presumed" innocent. Quite properly, that is to say, it is for the state to prove its case, not for the accused to prove his innocence. Yet the formal delicacies of legal procedure aside, the fact is that most of us put the accused with a long criminal record into a sort of limbo; it is a strain to presume innocence, except in the formal sense.

Senator Dole offered his amendment as a deadly swat at the "ever-increasing rate" of crime, even though in the last two years the incidence of murder, rape, kidnapping, armed robbery and aggravated assault has shown a gratifying drop. It is anybody's guess why. It certainly was not because, in this jurisdiction at least, judges were stingy in tendering bail to arguably dangerous arrestees. Indeed, our guess is that "preventive detention," if incorporated in the pending consolidation of the criminal code, will of itself affect the crime rate very slightly if at all. It may, however, give some peace of mind to the law abiding citizens who are frequently appalled by some bizarre bail decision.

We have argued before in this space that judges need greater *discretion* to detain suspects, when they are accused of dangerous crimes and have lengthy criminal records. Discretion, let us observe, is not a mandate to lock everyone up, regardless of circumstances.

We still feel that way.

Senator Dole's amendment does violence only to the quite sweeping view of "the presumption of innocence." It could conceivably do some good—somewhere, sometime.

1977 GRADUATE IS ECKERD COLLEGE'S FIRST RHODES SCHOLAR

HON. C. W. BILL YOUNG

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. YOUNG of Florida. Eckerd College of St. Petersburg, Fla., located in my congressional district, has built a distinguished record as a liberal arts college. Founded in 1958 as Florida Presbyterian College, Eckerd College is a private school serving 918 students. The college and its faculty of 74 are proud of the fine work of its graduates begun after completion of their studies at Eckerd College.

In this regard, a 1977 Eckerd graduate, Miss Susan E. Russ, has been awarded a Rhodes Scholarship for 1978. Miss Russ of Kingsport, Tenn., is the first graduate of Eckerd College to be so honored, and she will begin her studies at Oxford University after completing graduate work in literature at the University of Virginia.

I congratulate Miss Russ and Eckerd College for being honored by the Rhodes Scholarship Committee, and it is a special privilege for me to bring the following story on Miss Russ and Eckerd Collebe to the attention of my colleagues:

[From the St. Petersburg Times, Dec. 19, 1977]

1977 GRADUATE IS ECKERD COLLEGE'S FIRST RHODES SCHOLAR

(By Johnnie Roberts)

Susan E. Russ, a 1977 graduate of Eckerd College, was named Sunday as one of 32 winners of the prestigious Rhodes Scholarship. It is the first time an Eckerd student has earned the award.

The scholarship, which was established 75 years ago in the will of British colonial pioneer Cecil Rhodes, will earn Miss Russ the honor of studying for two years at England's Oxford University, one of the world's oldest and most respected universities.

Miss Russ, who graduated from Eckerd with a BA in English Literature, was among 12 women to receive the coveted scholarship. This year is only the second year women have been eligible for the award.

"I'm just a little bit stunned," Miss Russ said from her home in Kingsport, Tenn. "I'm happy, of course, but it's so hard for something like this to sink in."

Miss Russ, 20, was nominated for the stiff competition that precedes selection of the scholarship by the University of Virginia, where she is doing graduate work in literature. Although her current school selected her for the scholarship, she praised Eckerd College for preparing her for the competition.

"I so much wanted to do this for Eckerd (College)," she said. "Too few people know about it (Eckerd College)."

The young woman, the fourth in her family to graduate from Eckerd College, said there is really no way to prepare for the competition. However, she added, "four years of college is preparation to some extent."

Although she obviously held her own against students from Harvard, Yale and other Ivy League schools, Miss Russ said she was still a bit intimidated by the prospect of competing with products of some of the nation's best colleges and universities.

Besides her academic work at Eckerd, for which she graduated with honors, Miss Russ' extracurricular activities included writing speeches for former Eckerd president Dr. Billy O. Wireman, editing the college newspaper and helping to spur interest in women's sports at the small liberal arts college.

Her honors and awards included Eckerd's Thomas Presidential Scholarship, worth $2,500 per academic year at Eckerd, and a national merit scholarship.

Miss Russ said she will continue studying literature at Oxford, probably specializing in Medieval and Renaissance literature.

Her selection "speaks very highly of the rigor and quality of our academic program," said Eckerd College provost Richard Hallin, who served on the Rhodes selection committee. "It will make us even more competitive for this scholarship in the future."

He noted that Miss Russ had to compete against students from Ivy League schools as well as other prestigious southern colleges.

"It's great when your youngest works as hard as she did," said Mrs. Erwin Russ of her daughter. "We're still recovering. We think it's wonderful.

"She (her daughter) said that it was Eckerd that got her here."

TRIBUTE TO EISENHOWER

HON. LAWRENCE COUGHLIN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 25, 1978

Mr. COUGHLIN. Mr. Speaker, in commemorating the 25th anniversary this past January 20 of the inauguration of Dwight D. Eisenhower as the 34th President of the United States, we pay tribute to a man who served in our Nation's highest elective office at a time when our country greatly needed his remarkable

blend of commonsense, warmth, conciliation, and understanding.

A native of Texas who traced his ancestry to a small Mennonite colony in Abilene, Kans., Eisenhower was graduated from West Point in 1915 as a member of a class that was to produce 59 generals. In the struggles of those early years, he displayed the same steadiness of composure and strength of character that marked his service in World War II.

Eisenhower married Mamie Doud when he was assigned to duty in Texas. The couple lost their first child to scarlet fever in 1921. A year later, John Eisenhower was born.

In the early 1930's, Eisenhower served as an aide to Chief of Staff Gen. Douglas MacArthur and accompanied him to the Philippines. By 1941, he had gained a reputation as a knowledgeable strategist, a good mediator, and a constant optimist.

When the United States entered World War II, Eisenhower assumed his first major command for the invasion of North Africa. These were followed by the Sicily and Italy invasions. Not only did Eisenhower display outstanding military abilities, but he revealed his diplomatic flare in working out differences among the competing and sometimes jealous general officers of the varied units in the allied command.

Thus, Eisenhower was tapped as supreme Allied commander for the world's largest amphibian operation—the D-Day invasion of France on June 6, 1944. Combining his unique talents as a soldier and a diplomat, Eisenhower directed the overall operations that eventuallly were to lead to victory.

When Eisenhower returned home, he was eagerly sought as a Presidential candidate. He declined and accepted the post of president of Columbia University in 1948. But he returned to military life in 1950 when President Truman asked him to assume the role of commander of NATO.

By 1952, Eisenhower—his personal reputation untarnished and his abilities as a leader widely recognized—finally accepted an invitation to become a candidate for President as a Republican. He was nominated after a convention battle with the forces of Senator Robert Taft.

The Eisenhower ticket won overwhelmingly in the election, polling more than 33 million votes.

Although historians tend to view the Eisenhower years as President as a time of subdued and relaxed Presidential government, we should remember that there were the usual share of crises. Eisenhower handled these as skillfully and adeptly as his difficult war assignments. He exhibited moral courage and forceful judgment when the times demanded.

The McCarthy hearings, the dispatch of U.S. troops to enforce desegregation in Little Rock, Ark., troubles in Lebanon, East Germany, and the Suez, the creation of NASA in response to the launching of Sputnik I, and the aborted summit meeting with the Soviets when a U–2 spy plane was shot down over Russia.

Throughout the crises and everyday problems of Government, the American people never lost their faith and confidence in Dwight D. Eisenhower. Whether his ready smile or calm demeanor, he touched a sympathetic chord in the hearts of the citizens. He led without forcing, he spoke without lecturing, and he remained a friend of every American without ever knowing each personally.

With his death on March 28, 1969, an era of World War II and postwar giants ended for many of us.

Eisenhower's record as a soldier, a President, and a citizen stand as a testament to the qualities we revere in decent and honorable men. He was an American through and through, and made us proud that we were his countrymen.

The ultimate tribute lies with the people who preferred to call our 34th President, "Ike." He is remembered with affection and with respect. Regardless of high honors or notable achievements, we remember him as an individual who made our lives happier and brighter for his presence.

DWIGHT DAVID EISENHOWER

HON. JOHN B. ANDERSON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 25, 1978

Mr. ANDERSON of Illinois. Mr. Speaker, on the occasion of the 15th anniversary of the inauguration of Dwight David Eisenhower, I wish to recall his accomplishments as a great American patriot and statesman.

Dwight Eisenhower served his country in ways that most men and women can only dream about: both in peace and war his steady hand and clear eye guided the Nation. He served with distinction in two world wars—a feat not shared by any other American President. As Supreme Commander of the Allied Expeditionary Forces, General Eisenhower demonstrated the quiet strength under duress which would later serve him well—and us—as President of the United States.

As a soldier, however, he never sought political office. His statement—"the necessary and wise subordination of the military to civil power will be best sustained when lifelong professional soldiers abstain from seeking high political office"—exemplified the strong ethical code he adhered to and which the American people respected. In 1948, he forestalled the burgeoning grassroots support for his nomination by announcing that he could not accept it. General Eisenhower was a man who knew his duty and did not shirk from it. He returned to Europe as Supreme Commander of NATO because he recognized the importance of reestablishing order on a continent devastated by war.

After conferring with President Truman in 1951, though, General Eisenhower realized his duty lay in returning to the country which needed him. His triumphal first ballot nomination at the Republican National Convention of 1952 was an indication of the love and respect the American people had for him. It was a personal tribute to the man who knew that:

> Freedom from fear and injustice and oppression will be ours only in the measure that men who value such freedom are ready to sustain its possession—to defend it against every thrust from within and without.

Mr. Speaker, I regret that I did not serve in Congress during Dwight Eisenhower's two terms. Some people today belittle the complacency of the 1950's and point to its leader as an example. My feeling is that the American people needed this calm, dignified man to lead them from the chaos of World War II, through the peril and uncertainty of the early cold war years. This Nation witnessed not a period of dullness, but of development, firmly grounded in President Eisenhower's unshakable, personal belief in America:

> Without exhaustive debate, even heated debate, of ideas and programs, free government would weaken and wither. But if we allow ourselves to be persuaded that every individual or party that takes issue with our own convictions is necessarily wicked or treasonous, then, indeed, we are approaching the end of freedom's road.

Ike's accomplishments as president rate him among our greatest leaders: as the second man to serve as President during the nuclear era, he was the first to call for international controls of atomic power; he created the Department of Health, Education, and Welfare; he established equality of rights during his administration; he stressed the elimination of a dominant Federal role in private enterprise and declared that the economy should be allowed to steer its own course because "the Federal Government—(is) not the most important factor in those dips and upturns of the economy." With great foresight, he recognized the impact of television upon the American public and authorized the first telecast of a Cabinet meeting, demonstrating his sincere desire to keep the voters informed—a harbinger of our current drive to restore confidence in our Government.

The strength of President Eisenhower's stewardship, however, lay not only in the measurable achievements of his administration, but in the faith that he and the American people shared in the Constitution:

> If we are going to continue to be proud that we are Americans there must be no weakening of the codes by which we have lived; by the right to meet your accuser face to face, if you have one; by your right to go to church or the synagogue or even the mosque of your own choosing; by your right to speak your mind and be protected in it.

These sentiments form the very foundation of our Government. As we steer our course through the complex issues of today, it would be wise for us to remember the fundamentals of democracy that were spelled out with such elegant simplicity during the Presidency of this great man, Dwight David Eisenhower.

BUCKLEY ON PANAMA

HON. GERRY E. STUDDS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. STUDDS. Mr. Speaker, the following column by Mr. William Buckley deals—very effectively, I believe—with several of the myths and pieces of misinformation which have been distorting the debate on the Panama Canal treaties in recent months. I believe that this column will be of great interest to my colleagues:

REAGAN IS ALL WET ON THE CANAL ISSUE

(By William F. Buckley)

In his opening remarks opposing the passage of the Panama treaties, Governor Ronald Reagan gave voice to a number of specific criticisms which turn up in much of the anti-treaties literature. They are of general interest, to the extent that 51 percent of the people opposed to the treaties rely on these criticisms in passing judgment.

Said Reagan: "[We would place] the over a $10 billion investment" to the Panamanians.

Really, there is no reason to exaggerate our generosity, though it is legendary. The original cost of all non-military property, equipment, facilities, and other improvements contemplated to be turned over to Panama by the year 2000 is $1.6 billion; and by the year 2000, the estimated book value will be down to approximately $62 billion.

The estimated cost of the military installations in Panama (including improvements) scheduled to be turned over by the year 2000 is $398.4 million. The total, in other words, is about $1.02 billion, or a modest one-tenth of the cited figure.

Said Reagan: "[We would place] the American military under the jurisdiction of a government not elected by the Panamanian people . . ."

In fact, the American military will of course remain under the command of the President of the U.S. and, under his direction, can act unilaterally, on the assumption that Anthony Lewis and Senator Church will, by the year 2000, have grown wiser.

Said Reagan: "We will pay the Panamanian government about a billion and a half dollars to take the canal off our hands."

Not exactly: the payments to Panama will be paid by users of the canal out of operating revenues. That is different from tax dollars.

Said Reagan: "We're dealing with a Panamanian government that has accumulated the highest per capita debt in the nine years of any nation in the world."

Would that were so. The total Panamanian government debt is about $1.2 billion (the IMF figure for June, 1976). With a population in Panama of 1.6 million, Panama has then a per capita debt of about $720. Ours, per capita, is $3,330. Torrijos may be a spendthrift, but he can't match our Congress.

Said Reagan: "We bought in fee simple all the privately owned land in the Canal Zone, and I've seen the figure of those purchases set at $163 million."

In fact, the total payment to private persons for interest in real property was less than that. Namely about four million dollars.

Said Reagan: "Panama derives one-fourth of its gross national product from the canal."

The correct figure is about 12 per cent.

Said Reagan: "In the neutrality treaty, in the event of war, our enemies have the same right of access to the canal that we have."

Technically, that's right. But the treaty's neutrality extends to an area three or four miles out from the actual opening of the canal. If our enemies are so dumb as to head for the canal, our navy or our air force will sink them—just like that!

Our only commitment is not to sink them while they are inside the canal. This presumably we would not want to do in any case, as it would make it extremely messy for our ships to move by theirs. A historical note: during the past two world wars, no enemy ship used the Panama Canal. No feature of the proposed treaties impinges on U.S. rights outside the mile or two that leads into the Canal.

On the whole, Reagan used perfectly defensible arguments and figures, and the above corrections may not weigh decisively in the mind of anybody, but it's a crazy world.

There are people going around—I mean grown people—saying the whole Panama Canal treaty revision is a plot comprehending Presidents Eisenhower, Kennedy, Johnson, Nixon, Ford and Carter, the State Dept., the Joint Chiefs of Staff, and the majority of the Senate to bail out a couple of U.S. banks that lent too much money to Panama. That's the right wing's Grassy Knoll.

CONGRESS FACES KEY DECISIONS ON STEEL POLICY

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. MURTHA. Mr. Speaker, I would like to insert into the RECORD testimony I submitted recently to the Trade Subcommittee of the U.S. House Ways and Means Committee on the question of America's steel policy:

STATEMENT BY CONGRESSMAN JOHN P. MURTHA

In 1977 Congress helped draw the nation's attention to the problems of the steel producers. In 1978 Congress must translate that attention into positive steps that will stimulate the American steel industry, and provide jobs and economic stability for the nation.

I would like to congratulate you, Chairman Vanik, for the active role you and this Subcommittee have taken in this debate. The role of this Subcommittee and the Steel Caucus proved essential catalysts to recognizing steel problems.

I would also like to congratulate the Carter Administration. This is the first Administration that has taken an interest, that has been responsive to the problems of imports. Every other Administration in the past has always said this is a problem for that particular industry, and we are not willing to interfere. We are for free trade, they said. This Administration says they are for fair trade, and are going to restrict imports from foreign countries, if those countries subsidize the products being manufactured.

As a member of the Executive Board of the House Steel Caucus, I would like to outline briefly the key steps I believe Congress should take on steel in 1978.

1. *Imports*—the first goal must remain to control imports. The end of 1977 showed signs of progress as imports for October dropped 15 percent. But this comes after imports for the first three quarters of 1977 had risen 34 percent above 1976. In fact, 1976 was the third highest year for domestic steel consumption, but virtually all the growth went to foreign producers.

I believe the Administration's "trigger pricing" system to control the flow of imports deserves to be tried. But Congress must make it clear that if this system fails, we will not hesitate to impose stricter import laws. The problems we address of unemployment and community help would never have occurred if we had controlled imports.

2. *Environment*—the steel industry is one of the largest contributors to air and water pollution in the nation. In 1975, 20 percent of all U.S. man-made particulate pollution came from the steel industry. America should not abandon its goal of clean air and water. Neither can the nation sacrifice jobs for pollution goals that can be temporarily delayed without affecting citizens or workers health.

Three steps are needed on the environment. First, a tax incentive for pollution control equipment. I sponsored a bill to provide this last year. In his tax package President Carter recommends pollution abatement facilities placed in service after 1977 be allowed to qualify for a full 10 percent credit under all circumstances. This would provide significant tax relief on forced pollution control changes. Presently, money for pollution control uses capital that could otherwise be used for plant modernization. The steel industry spent $600 million on pollution abatement equipment in 1977 and estimates of capital costs for pollution control over the next 6 years range from $6.8 billion to $14 billion.

Second, we need coordination of environmental policy and quick decisions so industry is not caught between conflicting laws and long delays. Third, and most important, the nation needs a rational philosophy that rejects the extremes of those who would sacrifice economic growth to the environment and those who would halt all environmental progress in the name of the economy. With a rational approach, this nation can progress on both concerns.

3. *Modernization*—steel mills in the United States need to be modernized to compete successfully with foreign countries. With demand reduced in recent years the industry cannot develop the money needed to improve those plants (and create more jobs) without help. I support the Administration's recommendations on reducing the guideline life for depreciation of new steel industry machinery and equipment, plus any type of economic development partnership between government and industry that is satisfactory to both sides.

4. *Communities and Jobs*—Pennsylvania produces 24 percent of the nation's steel and 19 percent of our citizens are employed in steel production. When Johnstown, Pennsylvania, was hit by the twin blows of a flood and Bethlehem Steel's decision to cut their workforce by 2,500 jobs, the area's unemployment rate jumped from under 6 percent to 19.4 percent, and the area lost an estimated $69.1 million in wages. Even after the flood impact receded, unemployment remains above 9.8 percent, largely because of steel lay-offs.

The government needs more complete programs to protect local economies, insure every effort is made to preserve jobs, and improve the program of training for out-of-work individuals.

5. *Government*—we have a "Buy American" policy in the U.S. Government, but I have found that money from the Urban Mass Transit Administration has gone to purchasing transit cars from other countries, and the Steel Caucus is investigating the buying practices of the Defense Department. The

government must cooperate in the steel effort. I support the strongest possible "Buy American" law.

Mr. Chairman, some people ask me if the steel industry can come back. I know it can. The reason I am sure is that I know so many of the men and women who work in the steel industry. They work hard. They are proud Americans. They care about their country and its future. With the help of the U.S. Congress, and cooperation between the government, industry, and the steelworkers of this great country, we will succeed in putting Americans back to work, stabilizing the economy, and saving steel communities. We have started that process in 1977. We must continue it in 1978. I believe Congress will provide the guidance and stimulus for that action.

PARTISAN IMPLICATIONS OF PROPOSED CENSUS REFORM LEGISLATION

HON. JIM LEACH

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. LEACH. Mr. Speaker, in the near future the House Post Office and Civil Service Committee is expected to consider census reform legislation. I should like to bring to the attention of my colleagues the impact this legislation could have on reapportionment and the distribution of Federal funds, as well as the potential damage it may do to the integrity and confidentiality of U.S. Government census taking.

The traditional census pretests undertaken by the Census Bureau 3 years before each decennial census make it clear that the 1980 census faces real difficulties. All indications are that the American public is fed up with Government and one reflection of citizen ire is an increasing unwillingness to cooperate in census taking.

Because of concern over the 1977 pretest results and the substantial reduction in the voluntary rate of return of census forms, the Census and Population Subcommittee of the House Post Office and Civil Service Committee held oversight hearings last summer and fall. Unfortunately the resultant legislative initiative (H.R. 8871 and its amended version H.R. 9623) specified radical changes in census methodolgy and called for the creation of a so-called Division of Evaluation located outside the Census Bureau to establish census standards and adjudicate challenges to census data.

Clearly the concerns raised by the 1977 pretest need to be addressed. But there is real question whether new legislation is the appropriate vehicle to deal with census problems. Too easily, whether by legislative intent or legislative slight, the Census Bureau can be subjected to politicization. Under H.R. 8871 and H.R. 9623 a new Division of Evaluation is created with a mandate to perform more than an evaluation function. Everyone in the census community recognizes the need for ongoing internal evaluation and input from outside experts in long range planning. But the vast majority would prefer to see the Census Bureau contract with an outside independent agency or group such as the National Academy of Sciences to conduct long range evaluations.

As far as internal evaluation is concerned, the integrity of current procedures are above reproach. With the creation of a Division of Evaluation as proposed in H.R. 8871 and H.R. 9623 unknown political appointees are authorized to interject procedural changes in census taking and adjudicated contested census results. Unfortunately, it should be clear that politicizing census procedures jeopardizes the confidentiality of census returns and brings seriously into question the impartiality and integrity of census results.

It should also be clear that legislation, unless carefully and restrictively drawn, can produce dramatic changes in the perception as well as the quality of census taking. In such a sensitive endeavor as revising census procedures the perception of what a particular bill attempts to do is as important as the results. The parts of H.R. 8871 and H.R. 9623 which give extraordinary new authorities to a politically appointed group outside Census Bureau control raise grave problems of perception. In addition, the sections of H.R. 8871 which would have established a detailed two stage census methodology raises a serious question as to whether Congress should mandate specific census procedures. Census operations should be immune to political pressures. They also should be protected from the well-intentioned, but excessively detailed directives of legislators. Defining the specifics of census methodology is properly the domain of statistical experts in the executive branch, not the policymakers of the legislative branch.

The legislation that the full Post Office and Civil Service Committee is finally expected to consider this month (H.R. 10386) represents a vast methodological improvement over H.R. 8871 and H.R. 9623. Specific procedural directives are largely abandoned. Unfortunately, however, H.R. 10386 provides unprecedented authority for an administration to execute a political takeover of the Census Bureau.

Central to the new legislation is the creation of a Census Review Committee in place of the proposed Division of Evaluation in the earlier bills. The committee is clearly not designed to be advisory in nature. It has a staff of undefined magnitude and has complete discretion to define for itself the parameters of its jurisdiction. The bill requires the Census Bureau to operate under the standards the review committee establishes. In other words, a newly established authority outside the Census Bureau will control census operations and activities.

Under this legislation, the prospect also exists that the Census Review Committee will control more than the decennial census. The committee has a broad enough mandate to delve into every census effort, including those projects performed under reimbursement for other Government departments.

With regard to the membership on the Census Review Committee, those who currently hold policy positions in the executive branch will be nonvoting members, but those who, by definition, are hand picked political appointees will be voting members. The committee and its staff appear to be independent, responsible only to themselves rather than the Secretary of Commerce.

Over the years the Census Bureau has established an impressive record of scrupulously insuring confidentially of census information. Only sworn Census Bureau staff have been allowed access to census data. Under this legislation, however, Federal, State and local employees, as well as employees of private organizations, could well be encouraged to seek access to this confidential material. Thus, the opportunity for abuse is greatly magnified.

Also, for the first time, H.R. 10386 involves Congress directly in census projections. The legislation stipulates that an official report must be submitted to Congress not later than September 30, 1978, indicating a methodology for estimating undercounts for each State. This requirement opens estimation of undercounts on a State-by-State basis to congressional appeal and influence and could easily provide a basis for demands that the next congressional apportionment decision take undercounts into consideration. This would be a stark departure from past policy and represents a severe challenge to rural areas, especially of the Midwest and West. Should the majority party attempt to slant statistics to benefit areas in which it holds dominant political sway, the viability of the two-party system could be significantly weakened. Using adulterated statistics, Eastern urban centers could all too easily be given additional representation at the expense of rural States like Iowa. In this regard it should be stressed that undercounts are not today considered in apportionment decisions, although they are in applying Federal funding allocations. The statistical community is deeply divided in its assessment of the magnitude of the illegal alien problem and undercounts in inner city areas. The potential mischief that could be wrought by an arbitrary political decision to substantially increase undercount projections in New York City or a one-party section of the South cannot be exaggerated. The allocation of congressional seats to a number of States could be effected as could the amount of Federal funds apportioned to all States.

Certainly a number of the provisions of H.R. 10386 are well motivated and represent a legitimate congressional response—albeit, a controversial one—to the problems that have developed in the 1977 pretests. However, there is no doubt whatsoever that the Census Review Committee—and in the previous legislation, a Division of Evaluation—is designed above all to serve as a political mechanism to control congressional apportionment as well as the distribution of Federal funding based on formulae using census data.

In closing, Mr. Speaker, I would like to reemphasize the very serious problems attendant to this census reform legislation. It is my hope that all involved will be able to reach agreement on more modest legislation which will not undermine the objectivity of the Census Bureau, compromise the integrity of census

statistics, nor infringe upon the confidentiality of the census returns of individual American citizens.

THE BIG BOARD AND THE NATIONAL MARKET SYSTEM

HON. JOHN W. WYDLER
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. WYDLER. Mr. Speaker, in 1975 the Congress completed and sent to the President a comprehensive revision of the Securities Exchange Act of 1934 which was hailed at the time as the most important securities legislation in some 40 years. The centerpiece of this legislation was the direction to the Securities and Exchange Commission that it "facilitate the establishment of a national market system for securities . . . in accordance with the findings and to carry out the objectives" set forth in the act.

The Securities and Exchange Commission has not followed this directive but rather has tried to place the responsibility for the lack of progress on the development of a national market system on the Nation's stock exchanges, especially the New York Stock Exchange.

To exacerbate the situation, the Commission recently proposed repeal of the off-board trading rules of the various exchanges, including New York Stock Exchange rule 390, citing as a reason for such a drastic proposal that the exchanges had not moved fast enough to implement a national market system. One irony of this situation is that the Commission has not given anyone the benefit of its views as to what it thinks ought to be done. The Midwest Stock Exchange so noted in testimony before the Commission last August 4:

> Moreover, we do not know, and we do not believe anyone else in the industry knows, what the Commission's assumptions and objectives concerning a national market system really are.

Despite the lack of direction by the Securities and Exchange Commission, the New York Stock Exchange and the other exchanges are making significant changes in response to the will of Congress as expressed in the 1975 legislation.

A good explanation of the developments and changes taking place at the New York Stock Exchange was recently made by John J. Phelan, Jr., vice-chairman of the board of directors of the New York Stock Exchange and a neighbor of mine in Garden City, N.Y. I know John Phelan to be a sincere and dedicated individual who occupies a position of high leadership at the New York Stock Exchange.

I therefore recommend to other Members of the House interested in the developments which are currently underway at the New York Stock Exchange to read the following article authored by Mr. Phelan which appeared in Dun's Review of November 1977.

[From Dun's Review, November 1977]

THE BIG BOARD AND THE NATIONAL MARKET SYSTEM

(By John J. Phelan, Jr.)

Wall Street is a changing neighborhood. While its physical appearance is likely to remain the same in coming years, the structure of its major industry—the securities business—is about to undergo a dramatic transformation. Sweeping changes are about to take place in the way equities are traded as the Congressionally mandated National Market System becomes operational.

One of the major changes in connection with the development of the National Market System concerns so-called offboard trading rules. The possible repeal of these rules, which generally require member brokerage firms to buy or sell listed stocks on a stock exchange, has been the subject of vigorous debate during the summer and fall. The New York Stock Exchange believes that repeal of these rules would result in fragmentation of order flow, concentration in the securities industry and a threat to public confidence in the stability and efficiency of our nation's capital-raising mechanism. But whatever the resolution of the off-board issue, it is certain we will see a National Market System.

How will this system work? In what ways will it differ from the existing system of stock trading?

Currently, of course, stock trading takes place on the New York Stock Exchange, the American Stock Exchange, regional exchanges and in the over-the-counter market. Every day, exchanges handle more than $800 million in purchases and sales of equities.

In 1975, Congress directed the Securities and Exchange Commission to "facilitate the development" of a National Market System with the objective of introducing greater competition in the securities industry. Congress stated that, among its other attributes, such a system should assure an opportunity for investors' orders to be executed without the participation of a dealer. In other words, Congress has declared that it is in the public interest to retain the best elements of the present auction stock market system, and to build upon these elements in a way that would foster competition and efficiency.

The New York Stock Exchange strongly supports the concept of a National Market System and in August presented a plan for such a system to the Securities and Exchange Commission.

ELECTRONIC LINK

The structure envisioned by the Exchange would electronically link exchange specialists and qualified over-the-counter market-makers to form a national trading arena in which there would be an optimum balance between competition among orders to buy and sell listed stocks and protecting the interests of public investors.

The National Market System structure put forward by the NYSE would require five key elements—one of which, the Consolidated Tape for all securities that would be traded in the system, is already in place and functioning smoothly.

The four other elements are:

A composite quotation system for displaying both bid and asked quotations in all reported stocks—and the number of shares bid for or offered.

A system of equal rules and regulations applying to all qualified market-makers within the system, with a provision that each market center would be free to establish higher—but not lower—standards within its own market.

Appropriate trading surveillance requirements, established and monitored by each market center.

Electronic communication among all the competing market centers to assure the all-important centralization of orders flow in reported stocks. This linkage will permit direct interaction among customers' orders without the intervention of a dealer, whenever that is possible. It will also maximize competition among market-makers to narrow price spreads and give any customer the benefit of the best quotation anywhere in the system whenever there is no other offsetting customer interest.

Following up on this concept, the New York Stock Exchange and the Pacific Stock Txchange jointly announced in August an agreement to create an electronic linkage between their trading floors. Subject to SEC approval, the link would accommodate trades between the exchanges and would provide a vehicle allowing for the interchange of market information prior to each day's opening.

While discussions about the shape and structure of the National Market System continue, the Exchange itself has been making some significant changes in the way it maintains markets for the stocks of more than 1,500 of the nation's leading corporations.

Oversight of our markets is now vested in a Quality of Markets Committee, made up entirely of members of the NYSE Board of Directors and chaired by one of our public directors, Gavin MacBain, a former chairman of Bristol-Myers Co.

The committee's charter is to maintain a constant surveillance of the quality of the NYSE marketplace and seek ways of improving the market.

Many of the committee's suggestions already have been implemented. For example, the Exchange has established highly visible new procedures for allocating stocks to specialists—based on levels of performance. Stocks may now be reallocated if a specialist turns in a substandard performance.

COMPETING SPECIALISTS

Other aspects of the specialist system—the unique feature of the New York Stock Exchange—have been changed. We are now taking steps to make it easier for qualified people to become specialists—and to compete as specialists. There already are 38 issues in which there are competing specialists.

In a related area, we have established a new category of competitive traders on our trading floor. These people are also closely regulated professionals who both buy and sell stock in competition with specialists. They bring an additional element of competition and liquidity to the auction trading crowds that are such an essential component of the unique pricing mechanism that determines the market value of listed stocks.

At present, the Quality of Markets Commitee is examining the possibility of changing the mechanics of the trading process. The committee's charter makes clear that nothing—no matter how time honored—need the considered as sacred or untouchable.

Another element of competition: Our membership last summer agreed to establish new forms of annual membership on the Exchange that would broaden broker-dealer access to our marketplace. Thus, the number of people who can be members and trade on the NYSE floor is no longer limited to a fixed number of seat-holders.

This change, clearly, should dispel—once and for all—the "private club" image that the Exchange has for too long had to carry.

Perhaps the most persuasive judgments on the success of the Quality of Markets Committee in fulfilling its mandate have been made by others. In particular, some major U.S. corporations in the past have made it no secret that they had satisfactory markets elsewhere and that there was no need for them to list their shares on the Big Board.

But over the last year or so, a number of these corporations—Bank America Corp.

and American Express Co. are two of them—decided that the market-making and other advantages of listing tens of millions of shares are now worth the expense that such listings entail. And the are now traded on the NYSE.

These substantive changes in the quality of NYSE markets have gone hand-in-hand with important changes in management style, aimed at assuring that the Exchange is operated efficiently and in a manner that reflects the needs of its constituents. Philosophically, the Big Board recognizes it belongs to all its constituents—listed companies, institutional investors, the small investor, members—and, more broadly, to America.

Listed companies have an intimate business relationship with the Exchange. They pay an important slice of Exchange revenues. They provide the products—the listed stocks—that are traded in our marketplace. In return, they require from us continuous, liquid markets. By providing a high-quality secondary market for listed securities, the Exchange plays a key role in enabling listed companies to tap fresh sources of capital.

THE LISTED COMPANIES

In short, it has become increasingly clear that listed companies have as great a stake in the viability of the New York Stock Exchange as do Big Board member firms. It follows, logically, that listed companies should have a direct line into the decision-making processes at the Exchange that intimately affect their own businesses.

One major channel of input, of course, is our Board of Directors. In addition to William M. Batten, the NYSE's chairman and chief executive officer, the Board consists of ten directors who are principals of member securities firms, and an equal number from outside the industry. Our public directors include seven present or former chief executive or senior officers of major U.S. corporations.

We also have added to our roster a new Listed Company Advisory Committee reporting to the Board that will be able to make a major contribution to Exchange decision-making. And we now circulate drafts of relevant policy proposals to all listed company chief executive officers for review and comment—early in the policy formulation process, so that their best ideas can be incorporated.

More than ever, the New York Stock Exchange is aware of its dual identity as a publicly oriented national institution and an integral part of the larger American business community.

Because of its commitment to quality and to improving upon the strengths of the auction market mechanism, the Exchange believes it will have a vital role to play in the emerging National Market System. It believes it has—and shares with others in the government, in the Exchange community and in the wider corporate world—a profound public obligation to help assure the maintenance of strong, healthy capital markets.

RESTRUCTURING FEDERAL CRIMINAL JUSTICE ASSISTANCE

HON. ELIZABETH HOLTZMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Ms. HOLTZMAN. Mr. Speaker, on December 20, more than two dozen of the Nation's most prominent State and local criminal justice leaders met in Columbia, Md., to discuss the various executive branch proposals for restructuring Federal criminal justice assistance. The participants in this meeting issued a consensus statement which was forwarded to the President and the Attorney General in January. Given both the professional reputations of the individuals involved in the meeting and the cross-section of criminal justice disciplines which they represent, I believe the statement merits careful consideration.

The text of the statement and a list of participants follows:

CONSENSUS STATEMENT RESULTING FROM CRIMINAL JUSTICE LEADERS' MEETING

The need to further reduce crime and delinquency and the need to further improve the efficiency, effectiveness and fairness of our criminal justice systems are two of our nation's top domestic priorities. The importance of these issues is no less today than when they were first identified as major national concerns by the President's Commission on Law Enforcement and the Administration of Justice in 1967 or by the Congress when it enacted the Omnibus Crime Control and Safe Streets Act in 1968. These objectives can only be met by the states and units of local government with continued Federal technical assistance, financial support and a stable, dependable Federal assistance program structure that is compatible with the fact that the states and localities are the governmental levels primarily responsible for the provision of crime control and criminal justice services.

We are aware that several proposals for restructuring the current Federal crime control program have been submitted or are now being formulated by Executive Branch agencies for the President's consideration. If the President decides to proceed with the reorganization of the Law Enforcement Assistance Administration and the legislative modification of the Crime Control Act at this time, we strongly recommend that the following basic concepts be incorporated into any new plan for the program submitted for the consideration of Congress:

1. The Federal Government should continue to provide encouragement and financial support for a required state-wide, system-wide, total-resource-oriented comprehensive criminal justice planning process in each state. Adequate Federal funding should be provided to state and local planning programs necessary to support such a process.

2. The crime control program should continue to employ the block grant system which delegates maximum authority to the states and localities for identifying their criminal justice improvement needs and for establishing priorities for the allocation of available program support funds. We do not advocate the use of the revenue-sharing grant approach for criminal justice because we fear that available action funds would be used to supplant state or local revenues in existing projects.

3. The essence of the crime control program should continue to be directed at eliminating this nation's crime control and criminal justice problems. We do not oppose the funding of civil justice projects that are inseparable from criminal justice improvement efforts nor do we question the need for Federal funding to support such activities. However, we are opposed to the expansion of the crime control program to accommodate civil justice projects not directly tied to criminal justice activities or any other program improvement initiatives which would further dissipate the limited funds available for crime control and criminal justice reform programs.

4. While we do not oppose the expansion of long-range Federal criminal justice research activities, we feel that any expansion should not take place at the expense of the Crime Control Act's action grant program which provides financial assistance to the states and localities to implement new programs that are already known to be worthwhile and urgently needed. Funds appropriated for financial assistance to the states and localities should be clearly earmarked so that they cannot be diverted to Federal research activities.

In addition since crime control and the administration of criminal justice are primarily responsibilities of the states and local units of government and since the states and localities will be most affected by any major changes in the Federal crime control program, we urge that elected state and local policy-makers, members of the judiciary, criminal justice program administrators and criminal justice planners be directly involved in the formulation of any legislative proposals to modify the existing program.

We believe that the Crime Control Act should receive greater attention in the Federal budget process in the future. In recent years, the budget priority of the crime control program has declined in relationship to other major Federal program improvement efforts. Since 1975, there has been an inflation-adjusted cut of 57 percent in anticrime action program funds available to the states and localities. Federal budget authorizations and appropriations for the program must be increased to a level more in keeping with the national concern for reducing crime and improving our nation's criminal justice systems. A thorough review of the programs true funding needs should be a major component of any restructuring effort.

During the past year, while various Federal departments and agencies have been examining alternative ways for modifying the Federal crime control program, the effectiveness of the program has suffered from a lack of stability and the absence of strong Federal leadership. The Law Enforcement Assistance Administration has been without a permanent Presidentially appointed Administrator for over 10 months. We recommend that the Administration quickly recruit and appoint a qualified LEAA Administrator so that a sense of direction can be restored to the Federal crime control program.

LISTING OF INDIVIDUALS PARTICIPATING IN FORMULATION OF THE CONSENSUS STATEMENT

The Honorable Brendan T. Byrne, Governor of New Jersey/Chairman, National Advisory Committee on Criminal Justice Standards and Goals.

Mr. Allen Breed, Special Master, U.S. District Court, Rhode Island/Chairman, Task Force on Juvenile Justice, National Advisory Committee on Criminal Justice Standards and Goals.

Dr. Noel Bufe, Administrator, Michigan Office of Criminal Justice Programs/Chairman, National Conference of State Criminal Justice Planning Administrators.

Mr. Norman Darwick, Director, Bureau of Operations and Research, International Association of Chiefs of Police.

Mr. Grady Decell, Director, South Carolina Division of Youth Services/President, National Association of State Juvenile Delinquency Program Administrators.

Mr. Peter Edelman, Director, New York State Division for Youth.

Professor William W. Greenhalgh, Professor of Criminal Law, Georgetown University Law Center.

Mr. Richard N. Harris, Director, Virginia Division of Justice and Crime Prevention/Immediate Past Chairman, National Conference of State Criminal Justice Planning Administrators.

The Honorable Charles S. House, Chief Justice, Connecticut Supreme Court/Vice-Chairman, National Advisory Committee on Criminal Justice Standards and Goals.

Mr. Frank Jasmine, Criminal Justice Program Associate, Office of the Governor of New York/Member, National Minority Advisory Council on Criminal Justice.

Mr. Perry Johnson, Director, Michigan Department of Corrections.

Mr. James F. Kelly, Prosecuting Attorney for the 19th Judicial Circuit of Indiana (Indianapolis).

Mr. John Lagomarcino, General Council and Staff Director, Committee on Crime Reduction and Public Protection, National Governor's Association.

Mr. William D. Leeke, Commissioner, South Carolina Department of Correction/President, American Correctional Association.

Dr. Peter Lejins, Director, Institute of Criminal Justice and Criminology, University of Maryland/Chairman, Task Force on Research and Development, National Advisory Committee on Criminal Justice Standards and Goals.

Mr. Mario Merola, District Attorney, Bronx County, New York.

Mr. Glenn Murphy, Director, Bureau of Governmental Relations and Legal Counsel, International Association of Chiefs of Police.

Mr. Thomas Parker, Executive Director, National Conference of State Criminal Justice Planning Administrators.

Mr. Thomas Peddicord, Jr., Chief Legislative Officer for the Governor of Maryland.

Mr. Henry Ruth, General Counsel, United Mine Workers Health and Retirement Fund.

Mr. Charles Schinitsky, Attorney-in-Charge, Juvenile Rights Division, New York Legal Aid Society.

Mr. Michael S. Silver, Chairman, Maryland Governor's Commission on Law Enforcement and the Administration of Justice.

Mr. Anthony P. Travisono, Executive Director, American Correctional Association.

Mr. Richard Velde, Attorney-at-Law, Bier, Bower and Rockefeller/Former Administrator, Law Enforcement Assistance Administration.

Mr. Benjamin Ward, Commissioner, New York State Department of Correctional Services.

Mr. Richard C. Wertz, Special Assistant for Criminal Justice Matters, Governor of Maryland/Executive Director, Governor's Commission on Law Enforcement and the Administration of Justice.

Mr. Charles Work, Attorney-at-Law, Peabody, Riblin, Lambert and Meyers/Former Deputy Administrator, Law Enforcement Assistance Administration.

Mr. Paul Wormeli, Vice-President, Operational Systems, Inc. Former Deputy Administrator, Law Enforcement Assistance Administrator.

MAJORITY OF PEOPLE SUPPORT CONSUMER PROTECTION AGENCY

HON. BOB ECKHARDT

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. ECKHARDT. Mr. Speaker, according to noted pollster Lou Harris, the majority of people favor the consumer protection agency bill and this support is growing. In remarks prepared for delivery to Consumer Federation's Consumer Assembly on January 20, Harris said that support for the legislation has increased so that the public is now 55 to 28 percent in favor of the bill. Unfortunately, Mr. Harris was snowed in up in New York so he was unable to actually deliver his remarks to the consumer assembly.

I think Mr. Harris' prepared remarks will be of great interest to the Members, and I am inserting them in today's RECORD:

THE CONSUMER PHENOMENA IN AMERICA

(By Lou Harris)

Let me say at the outset that I am deeply sorry that the snows and acts of God kept me from coming to appear before you in person, but it's a great privilege to report to you today anyway, and especially on the incredible movement of which you are all a much visible part. In our recent Sentry study, "Consumerism at the Crossroads", (I might say commissioned by the Sentry people with absolutely no strings attached) we uncovered a nerve cord that is close to the center of where the American people are and where they want to go. That study has become a best seller. By now over 100,000 copies have been requested, and over 4,000 separate news stories or broadcasts have been made about it.

The reason for this wide and abiding interest in this study is not hard to find, for in that study we documented a major social, economic and political phenomenon that has grown up in America and appears destined to affect what happens in this country for the rest of the century and beyond. In its most basic terms, consumers in America decided that things are not well nor right in the marketplace and they have decided in turn that in the future, their interests will be protected. The standards of quality of products and services they want to obtain, the quality of human experience they aspire to, all will be only achieved if they make their desires and their weight felt through their own purchasing power.

The consumer movement is broad and it is deep. It parallels historically the populist movement among small farmers who protested against entrenched business and banking privileges in the 1880's which gave rise to organized farm power in this country. It parallels a dramatic movement of the 1930's when the mass of industrial workers organized farm labor unions to bargain with their employers. It parallels the efforts on the part of blacks in the 1960's to cry out for equal justice after 300 years of active and benign neglect. But there is a critical difference between the consumer movement and the rest.

Farmers have now shrunk to a minority of less than 4 percent of the population; even though they have been visible just today and last month as they ride their tractors in protest. Union members are no more than 23 percent of the adult population. Blacks and other racial minorities are no more than 17 percent of the adult population. Another recent and significant movement is that of women who are a 53 percent majority. Yet the consumer movement dwarfs them all. By definition it encompasses the entire population. Even stripping away all those who would be businessmen first and consumers second, union members first and consumers second, farmers first and consumers second, minority group members first and consumers second. The consumer movement, made up of the who have placed a higher priority in making their consumer voices heard, still make up a potential of well over seven of every ten Americans 18 years of age and over.

The singular mark of this movement is the distrust of leaving the work of looking after their interests to the major institutions of political and economic power. Instinctively, they do not believe industry will reform by itself, but at the same time, they do not see big government as their savior either. Instead, they want an opening up of the bargaining and regulatory process to allow citizen participation at a scale never before witnessed in the history of this world, or this country. They are instinctively distrustful of nearly all other organized economic self-interest groups and will fight them tooth and nail in the ultimate arena of politics if need be. Over the past decade, consumers feel they have been hit in the blind side by a whole litany of violations against the public interest.

Soaring prices of products in short supply such as meat, energy, sugar, coffee, and others; questionable products with even more questionable quality and safety; alleged false claims in advertising; misleading packaging and labeling; grossly inadequate service of new products and even more shoddy repairs; lack of redress to handle their complaints; warranties and guarantees filled with gobbledygook words and empty promises; extreme difficulties in receiving common justice in the common marketplace. Our study, as you know, covered in depth the broad spectrum of the problems which are besetting the American consumer today. But we also obtained a reading of what the public top government people concerned with the consumer affairs, thought business representatives and what consumer activists such at you in this room think of your movement.

Here are some of the major findings in that part of the study. The charge that "the consumer movement is a threat to our free enterprise system" is violently rejected by a 60 to 13 percent majority among the public, by 85 to 9 percent by government consumer affairs people, and by 92 to 6 percent by you consumer activists. Most interesting of all, this charge is also rejected by 62 to 26 percent by top businessmen themselves. So let there be no doubt about it, the nearly unanimous feeling is that the consumer movement is simply not seen as some strange, foreign, wild movement whose basic tenet is to overthrow the system of private enterprise. Another claim is that "the consumer movement seems to be running out of steam." Of course you all know the answer to that, but by a 3 to 1 margin, most of the American people know it too. Significantly, by 3 to 1 top business leaders also know that the consumer movement has not run out of steam and is not about to go away.

Another charge is that "the consumer movement makes a lot of charges against companies which aren't justified." Well, that one is rejected by a clear 40 to 29 percent by the public, by 58 to 33 percent by government people, and not surprisingly by consumer activists by an even more sizable 5 to 1. But, alas, the first sign of a break in the ranks—top business leaders believe it by a massive 84 to 9 percent.

Another charge is that "the activities of the consumer movement will inevitably lead to too much government control over our lives." That one meets with a 42 to 26 percent rejection by the public, by 58 to 33 percent among government officials, and by 82 to 15 percent among consumer activists. However, top businessmen believe this by 63 to 25 percent. Another familiar charge is that the consumer movement "gives a one-sided and unfair picture of what industry and business do." This is rejected by the public by 49 to 21 percent, by key government people by 60 to 29 percent, and by yourselves—consumer activists—by 83 to 9 percent. But business leaders believe it by 79 to 15 percent.

Yet another charge is that "most people in the consumer movement are more interested in attacking the free enterprise system than in helping the consumer." The public again turns this charge away by a decisive 47 to 24 percent margin, public government

people by 72 to 12 percent, consumer activists by 90 to 5 percent. Top businessmen are less certain of the truth of that one, but they still believe it by 49 to 31 percent. But on two key positive attributes to your movement, there is agreement among all the groups we surveyed. The claim that the consumer movement has "kept industry and business on their toes" is believed by a 77 to 8 percent majority of the American people, by 84 to 8 percent among consumer activists, by an even 93 to 4 percent among government officials, and most significantly of all by a 77 to 9 percent majority among top business leaders. I might add, they said that standing on their collective toes.

Finally, the claim that "the consumer movement has helped a great deal to improve the quality and standards of the products and services people buy is believed by a 69 to 10 percent majority of the public, by 79 to 10 percent by consumer activists, by 79 to 7 percent among government officials, and by a 54 to 31 percent majority of the top business people.

Clearly, by any measure, your movement is widely respected and praised by the public and in some key instances, albeit perhaps grudgingly, by top business leaders themselves. A kind of bottom line on the movement came when we asked people if the consumer movement has done more good or more harm. By a massive, nearly unanimous 83 to 4 percent, the public thinks you have done more good than harm. It's no surprise that you activists were a 100 to 0 percent that you're only doing good, but government people also agree by almost as much—98 to 2 percent. The most fascinating result is that by 79 to 18 percent, top business people admit that you're doing more good than harm too.

Unless you think you've got it made, however, there are important pieces of advice which the leadership group we surveyed would like to give you. At the top of the list is to enroll more grassroots level involvement—get deeper into the local level at every community in this land. Another is that the leadership in the movement ought to be more professional. Because of the importance of your cause, you owe it to yourselves and your constituents to be top professionals in the field you have chosen to pursue. There is nothing less effective than well-meaning amateurs, especially in such subtle fields as legislation, which I shall get to in a moment.

Another is that better communications be established between the consumer movement and the business community. Let business know in detail both the logic and the facts about what you want from business.

Now let me get down o the matter that I am sure will absorb a major part of your attention right here in the Nation's capital in 1978—the question of whether Congress is going to pass a consumer protection agency bill. At the time we did our "Consumerism at the Crossroads" study, sentiment nationwide among the public was 52 to 34 percent in favor of that bill, but in the last study we did on the subject, we find that support has gone up to 55 to 28 percent, and in a brand new study just completed this month, we find that 76 to 15 percent majority say one of the top priorities of Congress in 1978 is "to begin to represent the consumer more and big business and big labor less." It is obvious that there is a consumer consciousness out among the public, and in 1978, I don't think the public is going to once again take "no" as an answer.

Now I must also report to you that there are some genuine doubts and worries people have about setting up a new consumer protection agency in the Federal Government. By 55 to 25 percent a majority worries that "adding another government bureaucracy—no matter how well intentioned—will lead to more red tape, spending more tax money and won't really give the consumer that much more protection. And by 49 to 31 percent, a plurality feels "business is tied up now by mountains of red tape from government regulations and a consumer protection agency would just add more red tape and keep business from doing its job." But these two concerns about the consumer protection agency are heavily outweighed by two other arguments that come through loud and clear. By 65 to 21 percent, a sizable majority feels that "Such an agency is long overdue."

The individual consumer needs help in making his complaints heard and in getting better quality and safer products and services. This sentiment, I might add, is growing with each passing year. By an even larger 67 to 16 percent the majority also feels that "big business has so much power with government that unless the consumer has someone in government to argue his case and make business give better quality, then the consumer will continue to be short-changed on products and services. It is apparent that people are convinced that a new consumer agency must be established as a counter-weight to what is seen as the excessive influence and power of business and government.

Now, having reported to you the result of public opinion on the consumer protection bill, let me add, that if it had come up diametrically opposite, I would have reported that to you without the slightest hesitation, here today. Having reported it, I would like to comment, if I may on the history of this bill before Congress. It's an open secret that the reason the bill did not come to a vote early in the 1977 session of Congress and again late in the session is that the business lobby against it had corralled too many votes in opposition to it. The leadership of Congress and the White House, both committed to it, were convinced the division would be too close to risk having it voted down.

I know there are some disagreements over the accuracy of the counts of heads on the bill. Now in this new year and this election year of 1978, when every Member of the House must face re-election, I understand a major effort will be made by the White House and the leadership of Congress to get the bill passed. Business, you can count on it, will once again mount a massive campaign against the bill. You consumer activists will be here in force pressing for its passage. I don't know how the bill will end up. If the bill does not pass, it will not be the first time that the majority of the American people have had their will thwarted by the legislative branch of government.

I feel I must make one comment about the business effort which is being revived up again to keep this legislation from passing. Let me say, I make a considerable part of my livelihood doing surveys for business and telling them straight the implications of what we find, but I have no evidence to say publicly and to give unsolicitated advice to American business. I think major elements of American business are putting themselves in a no win position by their vehement opposition to this bill; for if the bill passes, it will be seen as a singular victory for the consumers over entrenched business opposition. Ironically, the bill will then be seen as if it were a new Consumer Bill of Rights which it emphatically, as you all know, is not. And if the bill loses, the bitterness against business will mount and mount. Business knows that it is in the dog house these days with the public and with the voters and with some of their best customers. And such activity as this, against the Consumer Protection Agency is a typical reason why the public thinks business wants to buy and sell government and not keep the consumer clearly in mind.

I want to thank you for your indulgence in letting me talk to you today. As you can see, as one who analyzes the public mood, I find it irresistible to draw my conclusions to their ultimate significance. Thank you for letting me do that.

I'm sorry I'm not there in person today. It was an act of God that kept me away. I just wish I were there. But God speed you in your work, for it is among the most significant efforts this country has seen. Millions upon millions of people out there are pinning their hopes on you. Please wear that mantle well.

"GEN. OMAR BRADLEY DAY"

HON. HAROLD L. VOLKMER

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. VOLKMER. Mr. Speaker, 6 months after Omar Nelson Bradley was commissioned as an infantry second lieutenant, he calculated that he would have to wait 16 years and 3 months for his first promotion. Fortunately for the country, his calculations were slightly off.

He made first lieutenant within 7 months, just over a year after his graduation from West Point (44th in the 164-man class of 1915). He moved up quickly to the rank of captain and then major. He was the first member of his class to make brigadier general, 9½ months before Pearl Harbor.

And as war raged over Europe, he was in command of the 12th Army Group, which at its peak consisted of 4 Armies and numbered more than 1.3 million troops in combat. It was the largest number of American soldiers ever to serve under one field commander. On September 20, 1950, he became the Army's fifth five-star general.

On February 6, the Nation's only surviving five-star general will be honored when Missouri Governor Teasdale signs a proclamation declaring February 12 as "Gen. Omar Bradley Day." February 12 is the 85th birthday of this distinguished American.

This is a fitting honor for the former Missourian, the man known as the "G.I.'s General." I am proud because General Bradley spent his early years in Randolph County, Mo., an area that I have the honor to represent in the U.S. House of Representatives.

He was born on a farm in Clark, Mo. When his father, John Bradley, a schoolteacher, died, Omar and his mother moved from the Clark-Higbee area to Moberly, Mo., a town then of about 10,000 people. After graduation in 1910 from the local high school, he went to work to help save for college.

He had thoughts about attending the University of Missouri and possibly law school, but instead he applied to West Point. He did so because his Sunday school teacher, Jim Crewson, pointed out that not only could he get a good education at the military academy, but he could also play baseball.

Those who love the game of baseball like I do, may not know that General

Bradley was deeply involved in the game at one time. He was good enough of a baseball player to be considered for a tryout with a minor league club. Partly because of his love for the sport, he decided to attend West Point, where he graduated in a class that included Dwight Eisenhower.

After a distinguished career in World War II, General Bradley assumed the head post at the Veterans' Administration. In that position in the years after the war, he led the fight to make the GI bill work. He called it an "investment in human beings."

In carrying out his responsibilities, he was known as one who would not mince words; the kind of man to make a decision and make it stick. Once as VA head, he selected a site for an Illinois veterans' hospital based on the research that showed where it ought to be located.

But a local Congressman was pushing for another site. He went to Bradley, but the general would not budge. "What will I tell my constituents," the Congressman wailed The general answered: "Tell them Bradley said no soap."

He is known to be simple, direct, unassuming, and amiable. Those persons who know him best will tell you that General Bradley's success represents the triumph of simple, absolute honesty, and good will. He has never lost faith in his belief in America's best qualities or in the teachings of the Sunday school teacher who set him on the course to West Point.

But of all that has been said and written about this man, it may be best summed up by the words of a Moberly seventh-grader, who in a 1962 school essay wrote:

He was a Missouri boy from our very own community. His rise to military fame was spectacular, even in our country of great opportunities. His plainness and his human touch have protected him from enemies that often destroy good men.

BOB BAUMAN—WATCHDOG OF THE HOUSE

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. HYDE. Mr. Speaker, during the Christmas recess the Washington Post printed a most interesting article on one of our colleagues that deserves to be shared.

If any Member of this body can be called indispensable, it is BOB BAUMAN. He brings a keen intelligence and a fierce commitment to fair play to his legislative duties. Although he holds no formal party office, in fact he is our floor leader on an enormous number of important issues.

We Republicans take BOB too much for granted. We rely on him to understand and articulate our point of view on every single procedural issue, and on many substantive ones as well.

He possesses a rare combination of idealism and toughness that serves his district and his country most admirably. That even the Washington Post recognizes this is indeed gratifying.

The article follows:

MARYLAND CONSERVATIVE IS WATCHDOG OF THE HOUSE

(By Donald P. Baker)

The big blue Mercury gas-guzzler wheeled into its assigned parking space in the Cannon Office Building garage at 9:45 a.m. Thursday. The driver, Rep. Robert E. Bauman (R-Md.) hopped out buttoning his vest, and barely breaking stride, puffed off on the five-minute hike to the floor of the U.S. House of Representatives. Although he has the longest regular commute in Congress, making the 154-mile round trip from Easton on the Eastern Shore every day, Bauman was in his accustomed spot, near the minority table when the Rev. Edward G. Latch intoned the prayer opening the session at 10 a.m.

A House doorkeeper observed that "virtually every day" Bauman is the first member to enter the cloakroom.

Bauman explains his mission in the words of John Stuart Mill, the 19th century British philosopher, who wrote that "the proper office of a representative assembly is to watch and control the government."

Or as Bauman puts it, "Anytime the House is in session, America is in danger."

At age 40, the third-term member from the First Congressional District is Maryland's youngest, most conservative and probably most widely-quoted member of the House, a self-appointed parliamentary watchdog.

"He's the most valuable member of Congress," said Rep. Phillip Crane (R-Ill.) "He sees that they (Democrats) play by the rules of fair play."

Speaker Thomas P. (Tip) O'Neill is less enthusiastic, saying, "Every legislative body has a Bauman. He's tough and he certainly irks the leadership when we're trying to get things done."

The retirement in 1974 of Iowa's indomitable "no" man, H. R. Gross, catapulted Bauman from the obscurity of a freshman in the minority party to a position of informal leadership on the House floor.

"It was the consensus among conservatives that someone had to watch the store," Bauman said.

"With H. R. retired," recalled Rep. John H. Rousselot of California, "a few of us got together and asked 'who's willing?' Bauman was." Rousselot and Reps. John M. Ashbrook of Ohio, Steven D. Symms of Ohio and Chalmers Wylie of Ohio took Bauman up on the offer and that was it. "It's not an elective office, you know," Rousselot said.

House Minority Leader John J. Rhodes of Arizona said Bauman quickly proved to be "a successor in the line of Gross and Doc Hall."

If Bauman appears at home on the House floor, it is because he has spent nearly half his life in and around it, beginning at age 15 as a page. For the next 15 years, he worked in various capacities for the Republican side, going to Georgetown University and its law school at night.

Walter B. Little, a 35-year House employee, has known Bauman since he was a page. "He earmarked himself to be a member since he was a kid," Little said. "His attitude never changed. He was always conservative, but not against the little man. Just standing up for what he thinks is right."

And stand up he does, time and time again interrupting proceedings on technical points of which he is the House's acknowledged master.

"Mr. Speaker, reserving the right to object, I would like to propound a parliamentary inquiry to the chair." Or, "Further reserving the right to object, Mr. Speaker," and "Mr. Speaker, I would like to move a call of the House," and then, "Mr. Speaker, on that I demand the yeas and nays."

Rep. Robert Dornan (R-Calif.), a fellow conservative has "this picture of Bauman at the mike, feet apart, chest up, chin out, getting off one of his best line, such as, 'Mr. Speaker, has it come to this, that the Speaker would sweep off his feet a minority member because he disagrees with his viewpoint?' Tip sputtered, and then went into a platitudinous speech about the rights of all . . ." laughed Dornan.

Bauman has parlayed his diligence on the floor—(he missed only six of 745 votes taken this year through Monday)—and an articulation of the conservative philosophy into a national reputation. He is widely sought out for his reaction, by correspondents who have learned they can count on him for a concise, sarcastic and often witty view of events.

One moderate Republican complains that Bauman "wants to be a darling of the conservative cause. He's on TV all the damned time."

Human Events, the weekly newspaper of the intellectual right, rates Bauman as one of 35 leading American conservatives.

Bauman clearly takes delight in expressing what liberals view as simplistic solutions to complex issues. Some examples:

The Panama Canal—"It's as much a part of America as Talbot County (where he lives). We're in control of Talbot County in perpetuity, except during hunting season, when we need a little help from the fed."

Abortion—"It's murder. I know that disturbs the emotions of some," said Bauman, who converted to Catholicism as a teenager, "but children are being killed by the use of federally funded abortions and that must be faced. It's the ultimate child abuse."

Detente—"I don't say 'nuke them' by lobbing one into the john at the Kremlin, but communism is evil, always was and always will be."

Junkets—"I've never taken one, in or out of the country."

Liberal Republicans—"Democrats in drag."

Within the Maryland delegation, his closest associates are Republican Marjorie Holt of Severna Park and Democrat Goodloe E. Byron of Frederick.

"Marjorie and I confer daily," Bauman said. "We try to work together on state politics because we're not on the same wave length with Steers." (Rep. Newton I. Steers, a liberal Republican of Bethesda, is the only other Republican in the Maryland House delegation.)

Since Steers and Bauman have gone to Congress, Steers said he believes "both of us have mellowed. We differ sharply philosophically, but I like him personally. He is a most effective parliamentary gadfly. I just wish he voted differently."

Bauman gets some grudging praise from some of the Democrats in the Maryland delegation.

"Even Bauman comes on the side of the angels occasionally," said Rep. Barbara Mikulski of Baltimore. "On issues of mutual interest to Maryland, such as ocean dumping, preservation of the bay and economic development, we put ideology on the hold button."

Mikulski and Bauman serve on the Maritime and Fisheries Subcommittee, and when he is absent (which is any time the committee meets when the House also is in session), "I watch out for his interest and defend the Eastern Shore," Mikulski said.

Rep. Gladys Noon Spellman of Prince George's County said that if she has a problem with a constituent, "I can write a letter to the President or (Cabinet) secretary and know that Bob Bauman will be one of the people I can count on to back me up."

While he has gained a national following as the result of his frequent network television appearances and comments in leading conservative journals, Bauman has been tending to the home folks too.

For years, the First Congressional District of Maryland was composed of the nine coun-

ties east of the Chesapeake Bay, the Eastern Shore. But one-man, one-vote resulted in adding four counties west of the bay: Harford, near Baltimore, and Calvert, Charles and St. Mary's south of Washington.

"It's like representing three islands," said Bauman, whose secret in winning re-election has been to "keep at least two of them happy." (He lost Harford in 1974 and Southern Maryland in 1976.)

While his own polls show that his constituents are "uniformly conservative," his ideology is sometimes less apparent in positions he has taken in behalf of the First District.

He has proposed consolidating federal research on the bay (and is supported by Mikulski); rail service for the Delmarva Peninsula, and funding of the D.C. Retirement Act, because many current and former District police officers, firemen, teachers and judges live in Charles and Calvert counties.

Bauman, who acknowledges that he acquired a "smart-ass image" as an overly combative state legislator (perhaps a reflection of his admiration for his columnist friend, William F. Buckley Jr.), honed his parliamentary nit-picking skills as a state senator in Annapolis.

He always read the fine print, and was credited with discovering a printing error in one of 102 amendments offered to a 19-page land use bill that was highly desired by then Gov. Marvin Mandel. Bauman suggested the mistake might make the bill unconstitutional, forcing postponement of the vote, and a two-year delay in its passage. Bauman admitted recently that he hadn't found the error, but had benefited from a tipster who admired his careful reading of legislation.

The publicity that Bauman got enraged Bauman's fellow senator from the Shore, Democrat Frederick C. Malkus, Jr., himself a symbol of Eastern Shore conservatism and independence.

They wound up running against each other for Congress in a special election in 1973, after the shotgun suicide of Rep. William O. Mills. The ensuing defeat crushed Malkus, a 22-year legislator, who said last week he has "no intention" of ever challenging Bauman again, and therefore had "nothing to say about him."

Mills had beaten Bauman in the GOP primary in 1971, as they sought to succeed Rogers C. B. Morton, who had been appointed Secretary of the Interior by Nixon.

In 1974, Bauman was one of 47 congressmen targeted for defeat by the AFL-CIO's political action committee (COPE). At a rally that October in Bel Air, then-Georgia Gov. Jimmy Carter denounced Bauman as someone who "exemplifies all that's wrong with the Republican Party."

Although Bauman denies having ambitions beyond his House role, Laurence E. Hulbert, executive director of the Republican Party in Maryland, believes that "Bob is very interested in running for the Senate in 1980 against Mac (Mathias)."

Bauman permits himself a sly grin and adds, "All my experience has been in the House except for the McCarthy censure hearings in 1954, when John Marshall Butler was in the Senate. (Butler named Bauman a Senate page). He was the last good senator Maryland had."

THE LEGISLATIVE OVERSIGHT ACT OF 1978

HON. BUTLER DERRICK

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 2, 1978

Mr. DERRICK. Mr. Speaker, I introduced on January 19 and again on January 26, for myself and others, The Legislative Oversight Act of 1978 (H.R. 10421 and H.R. 10574).

As Members know, the need for improved congressional review and evaluation of Federal programs has long been widely recognized. At the same time, the delay in enacting a sunset law testifies to the tremendous problems that are involved in developing a truly workable approach, one that would not produce a massive additional workload for the Congress, with only marginal benefits in return.

I believe this bill proposes a workable approach to this very difficult subject. It would take effect with the beginning of the 96th Congress and has several important advantages. It does not impose a substantial new workload, which would result from an arbitrary schedule for reviewing all Federal programs on specified dates. It does not permit committees to avoid the review and evaluation process. And, it differs from sunset bills in that it would apply to tax expenditures, as well as authorizations for direct spending. Tax expenditures comprise a growing burden on the Federal budget, a major area of uncontrollable spending. This bill will help to insure that the public gets full value for the billions of dollars of lost revenues that result from these provisions of the tax law.

My bill would focus on the Congress' efforts on the front end of the legislative process where we are most often deficient. At the time a new program is to be authorized, the program's objectives and planned annual accomplishments would have to be more carefully and precisely set out in the bill itself, in quantifiable terms to the extent practicable. Then, through the annual agency reports, the Congress would be in a better position to evaluate a program's success against its own carefully stated objectives. And, finally, when a program is to be reauthorized, the committee of jurisdiction would be required to make an overall assessment of how well or badly the program had achieved its original objectives and planned accomplishments. This proposal should substantially improve the quality of legislation, on the one hand, and make the program oversight more meaningful and useful, on the other.

I believe we can pass this important oversight legislation during this session of the 95th Congress and, by doing so, we would demonstrate to our constituents that we are ready to make a real effort to end ineffective and wasteful Federal programs so that our scarce budget resources may be devoted to higher priority activities.

The text of the bill is as follows:

THE LEGISLATIVE OVERSIGHT ACT OF 1978

To improve Congressional oversight of Federal programs and activities by requiring greater specificity in setting program objectives, by requiring continuing information on the extent to which programs are achieving their stated objectives, by requiring periodic review of new authorizations of budget authority and tax expenditures, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act shall be cited as the "Legislative Oversight Act of 1978".

FINDINGS AND PURPOSES

SEC. 2. The Congress finds that there is a recognized need for more effective oversight of Federal programs and activities in order to conserve and use more efficiently increasingly scarce Federal budget resources; that a major barrier to effective oversight is the lack of adequate specificity in the statement of objectives in the laws authorizing numerous Federal programs and activities; and that the Congress lacks continuing information on the extent to which programs and activities are achieving their stated objectives.

The purpose of this Act is to improve Congressional oversight of Federal programs and activities by—

(1) requiring greater specificity in establishing the objectives of Federal programs and activities;

(2) providing for continuing information from agencies administering such programs and activities on the extent to which they are achieving their specific objectives; and

(3) requiring periodic review of programs and activities to assure that budget resources are used efficiently in meeting national needs.

TITLE I—REQUIREMENTS FOR AUTHORIZATION BILLS

REQUIREMENT THAT BILLS INCLUDE STATEMENTS OF OBJECTIVES AND REQUIREMENTS FOR PRODUCTION OF CERTAIN INFORMATION

SEC. 101. It shall not be in order in either the House of Representatives or the Senate to consider any bill or resolution which, directly or indirectly, authorizes the enactment of new budget authority, or provides new or increased tax expenditures, as defined in section 3(a) of the Congressional Budget Act of 1974, or which provides new spending authority, as defined in section 401(c) of the Congressional Budget Act of 1974, unless such bill or resolution includes—

(1) a statement of the specific objectives and planned annual accomplishments of the program to be authorized or established; and

(2) a requirement that the agency or agencies administering the program report annually to the Congress information designed to assist the Congress in determining the extent to which the program is meeting the specific objectives and planned accomplishments set forth in the bill or resolution.

The objectives and planned accomplishments set forth pursuant to this section shall be stated in such terms as to enable the agency or agencies administering the program to be authorized to provide, in the required annual reports, information which makes it possible to compare the costs and accomplishments of the activities comprising such program, and the costs and accomplishments of the program to other governmental and non-governmental programs having similar or related objectives.

AGENCY REPORTS

SEC. 102. On October 15 of each year, each agency administering a program established under legislation enacted pursuant to section 101 shall submit, through the Director of the Office of Management and Budget, a brief report to the Congress on the extent to which the program, including the activity or activities comprising such program, is meeting the specific objectives and planned annual accomplishments set forth in the authorizing law. Such reports shall emphasize, to the extent practicable, quantitative measures of program costs and accomplishments, including comparisons of costs and accomplishments between the program set forth in the authority legislation and other governmental and non-governmental programs having similar or related objec-

tives. Reports may also contain such additional information on costs, accomplishments, and deficiencies as the head of the administering agency may deem appropriate. In order to assist the Congress in determining whether programs should be reauthorized, modified, or discontinued, the agency report submitted in the year preceding the expiration of a multi-year program authorization shall summarize significant findings in each annual report submitted since the authorization was enacted.

TITLE II—REQUIREMENTS FOR REPORTS ACCOMPANYING AUTHORIZATION BILLS

STATEMENT TO BE INCLUDED IN AUTHORIZATION BILLS

SEC. 201. (a) It shall not be in order in either the House of Representatives or the Senate to consider any bill or resolution which, directly or indirectly, authorizes the enactment of new budget authority or provides new or increased tax expenditures, as defined in section 3(a) of the Congressional Budget Act of 1974, or which provides new spending authority, as defined in section 401 (c) of the Congressional Budget Act of 1974, unless the report accompanying such bill or resolution contains a statement which—

(1) sets forth the specific objectives and planned annual accomplishments of the program to be authorized or established, its expected social and economic impact on individuals or groups intended to be served, the relationship of the expected costs of the program to such planned annual accomplishments and to other governmental and nongovernmental programs and activities having similar or related objectives, and the necessity for, appropriate extent of, and anticipated duration of Federal support of the program;

(2) identifies potentially or actually conflicting, overlapping, or duplicative programs and activities in other governmental and non-governmental programs, and explains the relationship of such programs and activities to the program to be authorized.

(3) identifies previous efforts to accomplish the objectives of the program, and compares the costs and accomplishments of such efforts to the expected costs and accomplishments of the activities to be authorized; and

(4) where provisions of Federal law conflict with the objectives of the program to be authorized or are obsolete in relation to the objectives of such program, sets forth recommendations for eliminating such conflicting or obsolete provisions.

(b) When an existing authorization of budget authority or tax expenditure is to be continued under a new authorization, the report submitted pursuant to this section shall contain, in addition to the statement required by this section, an assessment of the degree to which such program or tax expenditure has met previously stated objectives.

CATALOG OF INTERRELATED FEDERAL ACTIVITIES

SEC. 202. In order to assist the Congress in preparing statements required by Section 201 of this Act, within six months after the date of enactment of this Act, the Comptroller General of the United States, in consultation with the Director of the Office of Management and Budget, shall publish a descriptive catalog of interrelated Federal activities, including tax expenditures, organized according to such classification scheme or schemes as deemed appropriate to the requirements of Section 201 of this Act. Such catalog shall include—

(1) comparisons of program costs (including, to the extent practicable, the costs per unit) and accomplishments among programs having similar or related objectives using, insofar as possible, information developed by agencies in reports submitted pursuant to Section 102 of this Act;

(2) description of program interrelationships, including identification of duplicative or overlapping programs and activities, and identification of provisions of law which authorize activities for which funds were not provided in the most recently concluded fiscal year and which may be obsolete; and

(3) descriptions of State and local government programs and private activities having similar or related objectives, including information on program costs and, to the extent practicable, costs per unit.

The Comptroller General shall periodically update the catalog, or sections thereof, with due consideration for the legislative programs of the committees; emphasize in the initial version of the catalog those activity areas expected to receive earliest consideration by the Congress; and provide such assistance to the committees of the Congress as may be necessary for fulfilling the requirements of sections 101 and 201 of this Act.

TITLE III—PRESIDENTIAL BUDGET RECOMMENDATIONS

SEC. 301. The annual budget submitted by the President in accord with section 201 of the Budget and Accounting Act, 1921, shall describe the relationship between his recommendations on program budgets and the program accomplishments reported pursuant to section 102 of this Act.

TITLE IV—AUTHORIZATION TIME LIMIT, CERTAIN OBLIGATIONS NOT IMPAIRED

AUTHORIZATION TIME LIMIT

SEC. 401. It shall not be in order in either the House of Representatives or the Senate to consider any bill or resolution which, directly or indirectly, authorizes the enactment of new budget authority, or provides new or increased tax expenditures, as defined in section 3(a) of the Congressional Budget Act of 1974, or which provides new spending authority, as defined in section 401(c) of the Congressional Budget Act of 1974, for a time period exceeding five years.

CERTAIN OBLIGATIONS NOT IMPAIRED

SEC. 402. Nothing in section 401 of this Act shall be construed to impair or prevent—

(1) the payment of interest or the repayment of principal due lenders on debt instruments of the United States Government or its agencies irrespective of the date the obligations involved were incurred or the date such payment or repayment may be due; or

(2) the payment to individuals of benefits to which they are entitled by virtue of payments made by them and deposited into Federal trust funds.

TITLE V—MISCELLANEOUS PROVISIONS; EFFECTIVE DATE

EXERCISE OF RULEMAKING POWERS

SEC. 501. The provisions of this Act (except sections 102, 301, and 502) are enacted by the Congress—

(1) as an exercise of the rulemaking power of the House of Representatives and the Senate, respectively, and as such they shall be considered as part of the rules of each House, respectively, and such rules shall supersede other rules only to the extent that they are inconsistent therewith; and

(2) with full recognition of the constitutional right of either House to change such rules (so far as relating to such House) at any time, in the same manner, and to the same extent as in the case of any other rule of such House.

EFFECTIVE DATE

SEC. 502. Except as provided in section 202 of this Act, the provisions of this Act shall take effect on the first day of the first session of the Ninety-Sixth Congress.

SENATE—*Monday, February 6, 1978*

(Legislative day of Monday, January 30, 1978)

The Senate met at 10:45 a.m., on the expiration of the recess, and was called to order by Hon. QUENTIN N. BURDICK, a Senator from the State of North Dakota.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

I heard the voice of the Lord saying, Whom shall I send, and who will go for us? Then said I, Here am I; send me.
—Isaiah 6:8

O Thou Creator Spirit, Light of the world, and Revealer of truth, we thank Thee for moments of quiet reverence when all other voices are stilled and we are ready to receive Thy message. Give us ears to hear Thy voice above the din of many voices and grant us eyes to see the guideposts of history. Help us to discern the things of the spirit whether or not they are of Thee. And when we have heard Thy voice and read Thy signs on the horizon of history may we obey Thee and with the prophet say "Here am I; send me."

We pray in Thy Holy Name. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., February 6, 1978.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable QUENTIN N. BURDICK, a Senator from the State of North Dakota, to perform the duties of the Chair.

JAMES O. EASTLAND,
President pro tempore.

Mr. BURDICK thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. The Senator from West Virginia.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Journal of the proceedings of Thursday, February 2, Groundhog Day, 1978, be approved.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. The Senator from Tennessee.

Mr. BAKER addressed the Chair.

Mr. ALLEN. Mr. President, will the Senator yield or will he yield after the distinguished majority leader has completed his remarks?

Mr. ROBERT C. BYRD. Yes.

THE DAVID MARSTON MATTER

Mr. BAKER. Mr. President, over the past weekend, a number of very thoughtful editorial pieces were published regarding the ramifications of the David Marston matter.

As the various authors indicate, it is difficult, if not impossible, to reconcile the administration's handling of this situation with the President's campaign promise to remove politics from the selection of U.S. attorneys.

In the event that all of my colleagues did not have a chance to read the articles mentioned, I commend them to their attention and ask unanimous consent that they be included in the RECORD at this point.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Washington Post, Feb. 4, 1978]

THE MARSTON ISSUE

A BROKEN PROMISE—A BROKEN LAW?

(By Henry T. Roth)

When a presidential candidate makes campaign promises and then, when elected, breaks them, that is a moral and political issue that can be settled at the ballot box. But if a candidate for appointed public office adopts those promises as his intended policies in sworn public testimony at his confirmation hearing, knowing that he does not intend to carry them out—and can't, because of a prior secret political deal—that is not only a moral and political issue but also a serious legal one:

The moral and political issue is whether the country will stomach such devious conduct by the appointed public official.

The legal issue is whether the law has been broken—for it is clear that if a candidate for appointive public office willfully gives false testimony to a "competent tribunal," such as a duly convened confirmation hearing, that has been held to be a criminal offense designated in law as perjury.

Once the dust settles on the obstruction-of-justice charges concerning President Carter and Attorney General Griffin Bell on the Marston issue, the question of false testimony before the Congress by the attorney general will have to be resolved either by the courts, the Congress, the President or the court of last resort: public opinion.

Regrettably, the current quest for sensational news, in what probably will be an abortive effort to prove obstruction of justice, has diverted the spotlight of public concern from other, more lasting and significant aspects of the Martson affair that strike at the very core of the integrity of our political and justice systems.

The extraordinary public outcry over the Marston matter goes far deeper than mere disgust over a temporary delay in rooting out political corruption in eastern Pennsylvania. It reveals a frustrated and indignant public demanding that their politicians keep their campaign promises and keep politics out of our justice system.

The sorry story of lofty promises and secret wheeling and dealing involving the justice system is all spread on the public record:

First, President Carter, in his campaign platform of June 19, 1976, stated, "All federal judges and prosecutors should be appointed strictly on the basis of merit without any consideration of political aspects or influence."

Second, those promises were reiterated on Jan. 11, 1977, by Bell, under oath, as policies that would be carried out and implemented by him if he were confirmed by the Senate: ". . . If I am to be the attorney general, we want to professionalize the Department of Justice. We want to depoliticize it to the extent possible. Otherwise, I would not care to be the attorney general; he [Carter] would not care for me to be the attorney general.

". . . If we are really serious about doing something about crime in this country, then we must go into some career service in the prosecutorial forces.

". . . I intend for the Justice Department to be operated within the strictures of its being a law department, which would have nothing to do with politics. Of course, you touch politics because you are advising people, but it will not be a medium of politics, and it will not be used for political purposes."

Third, at his hearing before the confirmation committee, Bell was specifically questioned about his policies on retaining a hold-over U.S. attorney appointed by President Ford (such as David Marston in the Eastern District of Pennsylvania) who had made a "competent and meritorious record" and "wishes to be retained." His reply: ". . . They will have an opportunity to be considered for retention on the merit system. . . . Otherwise we would not be putting in a merit system."

Fourth, the above testimony is in stark contrast to what surfaced and transpired after Bell's confirmation:

On June 22, 1977, at a hearing convened by Rep. Robert Drinan (D-Mass.) Bell was asked to give Justice Department support to a bill being pushed by the congressman. Bell declined because, as he testified at that time, of an "agreement" with the Senate whereby in return for taking appointments to the federal circuit courts (but not the district courts) out of the patronage system, U.S. attorneys would continue under the politics-as-usual patronage system. Although the attorney general's office first denied the existence of such an agreement, it later admitted in a letter dated Dec. 20, 1977, that it was made during "an oral exchange between Judge Bell and Senator Eastland which took place in Atlanta in late December of 1976 or early January of 1977." This meeting has generally been reported to have been held on Dec. 13, 1976 (one week before Carter announced Bell's selection and three weeks before Bell gave the testimony above—testimony that not only made no mention of this secret arrangement, but was squarely contrary to it).

Fifth, on Jan. 9, 1977, Bell was quoted as having stated at the National Press Club that Marston's "job is to be replaced by a Democrat. . . . The 'ins' are the Democrats. . . . They can get in easier to complain. . . . I have nothing against Mr. Marston. He is a fine young man—but this is the political system in this country."

Finally, on Jan. 20, 1978, when Marston was fired, Bell complimented Marston on his performance and on the conduct of the office of the U.S. attorney in Philadelphia. At that time he reiterated that Marston was being removed "not because of lack of merit qualifications, but solely because of political considerations."

David Marston has now been fired—and he has now become a national folk hero. In due course, Philadelphia will get a new U.S. attorney, who will undoubtedly press, with equal vigor, to root out crime and political corruption.

But what about the promises to the nation to keep politics out of the justice system?

And what about the continued tenure of the attorney general? Whether, after all the evidence is in, it is found that he committed a criminal act at his confirmation hearing or aided and abetted in the obstruction of justice, is a complex factual and legal matter best left to the Congress, through impeachment proceedings, or to the due process of law in the courts.

But as the nation's chief law-enforcement officer, whose first duty is to search after truth, can Bell, in light of the gap between his word and deeds, continue to merit the respect and confidence of the nation, let alone the staff and subordinates, including the 94 U.S. attorneys, who report to him? This writer believes not.

And what about President Carter? Does he not have an obligation to square with the American people where he and we stand on his promise to take politics out of the justice system? Has he, or his attorney general, used the justice system as a pawn in a partisan political struggle?

[From the Washington Star, Feb. 3, 1978]

"PEOPLE'S WHITE HOUSE" TUNES OUT ON MARSTON FIRING CRITICS

(By Mary McGrory)

David Marston, the young ex-U.S. attorney from Eastern Pennsylvania, may be political. But he's not political enough to do the administration any good.

The storm-center came to Washington again to give his side of the story to a press breakfast. He has a fine opinion of himself and his performance. He has large brown eyes, a receding chin and a marmoset-like intensity of manner, and he wants to be sure that the world understands how he lost his job.

His version: "I am convinced that I would not have been dismissed if Eilberg had not called the president."

Rep. Joshua Eilberg, D-Pa., who was under investigation by Marston's office, telephoned Carter on Nov. 4 and told him, in Marston's phrase, to get the cop off the beat."

Senior loyalists, Tip O'Neill and Robert Strauss, tried to help out by painting Marston as brash and opportunistic, "viciously" pursuing Democrats. But these Goliaths did nothing to young David in the eyes of Pennsylvania voters.

The issue for them is not Marston's personality or his palpable ambition; it is his strenuous attack on the permanent, free-floating corruption in Pennsylvania politics.

"People know he is political, but they don't care," said Karen John, a Democratic town commiteewoman from Phoenixville, who testified in behalf of some 50 irate Pennsylvanians who came to Washington for an ad hoc, more or less bipartisan House hearing on the Marston affair.

She called the firing "the final rape of the judicial system," which may sound strong in pussyfooting Washington, but which seems to reflect the general feeling of the folks back home.

Marston was too smart to attend the rally. He said that he is "not trying to keep the issue alive," and he went back to Philadelphia immediately after his press breakfast.

Republican leader John J. Rhodes, who did attend, made somber and pointed reference to Watergate, and praised, for the first time, the impeachment contribution of Rep. Robert F. Drinan, D-Mass., who came to plump for a bill that would mandate merit selection of U.S. attorneys.

Another impeachment committee veteran, Rep. Tom Railsback, R-Ill., said he was on

hand to represent an incensed Democratic nephew in Valley Forge.

"They better," he rasped, referring to the stonewallers in the White House and Justice Department, "just come out and start telling us what happened."

Democrats may be able to turn back Republican demands for an investigation of the Marston firing, but the real political damage has already been done.

It isn't just that the campaign pledge of "Why Not the Best" in U.S. attorneys has been shredded—Marston is not so brilliant a lawyer that no Democratic counterpart can be found. Voters may, in time, recover from Carter's grating assertion that he would do it all over again—cornered politicians often bare their teeth.

But what comes out more strongly every day is of a more subtle and corroding nature. It is the howling discrepancy between the kind of open "people's" White House Jimmy Carter promised to run and the kind of impenetrable old-style bastion that he operates.

One of the Pennsylvanians, Brian P. Bowie, a well-tailored employee relations manager from Philadelphia, put his finger on it. Eilberg, he noted, got through to the Oval Office without any trouble and got an immediate response to his SOS. The people of Pennsylvania, who are up in arms, are getting the brushoff.

The dimensions of the run-around were detailed by the principal spokesperson for the protesters, a small, spirited gray-haired woman named Jean Irvin, who is not entirely clear on the difference between district attorneys and U.S. attorneys but knows what she likes. She told of her efforts to persuade the president to have a "town meeting" with the irate "Citizens United to Retain Marston," who, she says, will soon number 10,000.

She called appointments secretary Tim Kraft for two straight days beginning Jan. 14.

"Each time I was told he was either out of the office, out of town, or on another line," she recounted.

Another aide, Scott Burnett, advised her to send a mailgram. She did and she is still waiting for an answer. A week later, someone from the White House called her. It was Doug Huron, and he is from the office of the president's legal counsel. Ms. Irvin sniffed that she thought it was meant to scare her.

The point about all this is that Jimmy Carter stood in a thousand living rooms in this country two years ago and told people he wanted an "intimate relationship" with them, wanted them to "stay close to me," and would rely on their "advice."

The people of Pennsylvania have been trying desperately to stay close to him on the Marston affair. To date, 11,530 telephone calls and 27,385 letters have come to the White House. All but 50 of them have advised the president that he was dead wrong to sack Marston.

By his unresponsiveness, he is telling them to drop dead.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I have a request for a portion of my time under the standing order. I will be happy to yield the floor at this time and reserve my time under the standing order, if the majority leader wishes to transact business on that side.

Mr. ROBERT C. BYRD. Mr. President, I yield to the distinguished Senator from Alabama first and then to the distinguished Senator from South Carolina. How much time does the Senator want?

Mr. President, I yield briefly to the distinguished Senator from South Carolina.

REGULATION OF UTILITY POLE ATTACHMENTS

Mr. HOLLINGS. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 7442.

The ACTING PRESIDENT, pro tempore laid before the Senate the following message from the House of Representatives:

Resolved, That the House agree to the amendment of the Senate to the bill (H.R. 7442) entitled "An Act to amend the Communications Act of 1934 to provide for the regulation of utility pole attachments", with the following amendments:

1. Page 1, strike out all after line 4 over to and including line 8 on page 7.

2. Page 7, line 9, strike out SEC. 5., and insert SEC. 2.

3. Page 7, line 13, strike out SEC. 6., and insert SEC. 3.

4. Page 10, strike out all after line 6 over to and including line 12 on page 11.

Mr. HOLLINGS. Mr. President, I move that the Senate disagree to the House amendments, en bloc, numbered (1), (2), and (3).

The ACTING PRESIDENT pro tempore. The question is on agreeing to the motion of the Senator from South Carolina.

The motion was agreed to.

UP AMENDMENT NO. 1175

Mr. HOLLINGS. Mr. President, I move to concur in House amendment No. (4) with an amendment which I send to the desk.

The ACTING PRESIDENT pro tempore. The clerk will report.

The legislative clerk read as follows:

The Senator from South Carolina (Mr. HOLLINGS) proposes an unprinted amendment numbered 1175:

Beginning on page 10, strike all after line 6 over to and including line 12 on page 11, and insert in lieu thereof the following:

SEC. 7. The amendments made by this Act shall take effect on the thirtieth day after the date of enactment of this Act; except that the provisions of sections 503(b) and 510 of the Communications Act of 1934, as in effect on such date of enactment, shall continue to constitute the applicable law with the respect to any act or omission which occurs prior to such thirtieth day.

Mr. HOLLINGS. I move concurrence in House Amendment No. (4), as amended.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the motion of the Senator from South Carolina.

The motion was agreed to.

Mr. HOLLINGS. I thank the Senator.

Mr. ROBERT C. BYRD. The Senator is welcome.

I yield to the distinguished Senator from Alabama (Mr. ALLEN).

PANAMA CANAL TREATIES

Mr. ALLEN. I thank the majority leader.

Mr. President, I would like to ask the distinguished majority leader when he plans to have laid before the Senate the Panama Canal treaties, for consideration by the Senate .

Mr. ROBERT C. BYRD. Under the rule, may I say to my distinguished friend from Alabama, Thursday would be the day on which the committee report would have been available 3 days. I would like to get unanimous consent, if I could, that we proceed on Wednesday. We had earlier planned to proceed on Wednesday, because all Senators had indicated that they could get their supplemental views, and so on, to the Foreign Relations Committee on time for the report to be printed and made available 3 days prior to Wednesday. That was not possible; Thursday is the earliest if there is objection, but if there is no objection, I would hope we could get to the consideration of the treaties on Wednesday.

Mr. ALLEN. I would say to the distinguished majority leader that I would have no objection to the matter coming up on Wednesday, or, if it were possible, today.

What does concern the Senator from Alabama, however, is that no unanimous-consent order with respect to the procedure on the treaties be made prior to the laying down of the treaties for consideration, because many of us would like to be here for the full proceedings, and would not like for unanimous-consent requests to be made prior to that time

I have absolutely no objection to the request that the treaties be considered, but they would be considered under the rule. We do not want to agree to short-circulating the Committee of the Whole's consideration.

Will the distinguished majority leader and the distinguished minority leader agree that no requests for unanimous consent with respect to the procedure on consideration of the treaties be made prior to the treaties being laid before the Senate for consideration?

Mr. ROBERT C. BYRD. Yes, that would be very agreeable to me.

Mr. BAKER. Mr. President, if the majority leader will yield to me for just a moment, so that I may respond to the inquiry of the Senator from Alabama, that is fine with me, too. I certainly have no desire to take anyone by surprise.

There are two matters I hoped we could take care of today, and I wonder how the Senator from Alabama would feel about them. Incidentally, the Senator from Michigan (Mr. GRIFFIN) is on his way to the floor. I have consulted with him about these matters, and he has no objection.

First, the majority leader has suggested that we abbreviate the 3-day rule by 1 day, so that the Senate could take up the matter Wednesday. I understand the Senator from Alabama has stated that he has no objection to that.

The second matter concerns controlled time. I have no desire to have a limitation of time, but this is such an emotional issue and the Senate and the country are so divided on it that I have suggested to the majority leader that possibility, and he suggested, I believe, that we put down a unanimous-consent order to control the time, that is, to allocate half of the time each day to Senators who could yield it to Members

who support their respective points of view.

I think that procedure would add to the orderly consideration of the matter, and I wonder how the Senator from Alabama would feel about it.

Mr. ALLEN. I feel that when the treaty is before the Senate, there should be no time restraints or orders for speeches, because we frequently have Senators who might be in line for speaking and not be on the floor. I think we have difficulty here in the Senate getting speeches made.

I feel that Senators should have an opportunity to be heard. I rather imagine that a procedure will be worked out, but I would not like to divide the time in any way. I think that will take care of itself, would be my judgment.

I have absolutely no objection to waiving the 3-day rule, or to waiving the 1-day requirement of having the treaty lie over for a day. I do not care about that; but I do not want to short-circuit the Committee of the Whole, because that is very important as an order of procedure; and also, the resolution of ratification could not be offered in the Committee of the Whole, whereas it could be in the full Senate, at any time, thereby cutting off amendments.

I am perfectly willing to abide by the statement of both leaders that unanimous-consent agreements will not be asked for other than those we have discussed. I would object to the second request, but not the first, on the matter being brought up.

I am hopeful that the committee report is in, and available to all Senators at this time.

Mr. ROBERT C. BYRD. The report has been printed, and is available.

Mr. ALLEN. At the time the matter is called up in executive session, at that time, if there are to be requests for immediate consideration, I would ask that that agreement be made now, rather than the request being made on Wednesday.

Mr. ROBERT C. BYRD. I have no objection.

Mr. BAKER. I have no objection to that. I thank the Senator from Alabama for his consideration.

Mr. ALLEN. I am happy to accommodate the Senator.

Mr. BAKER. And I have no objection to our proceeding on Wednesday.

Mr. ALLEN. I might, for the record, request that the distinguished majority leader alert the Vice President that his presence would be helpful as Presiding Officer at that time. I have a series of parliamentary inquiries that I would like to make concerning the procedure on the consideration of the treaties.

Mr. ROBERT C. BYRD. I may have some myself; so we will try to get the Vice President in the chair at that time.

Mr. ALLEN. I thank the distinguished Senator.

CONSIDERATION OF CERTAIN MEASURES ON THE CALENDAR

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of the following Calendar Orders: Nos. 570, 571, and 573, with the indulgence of the distinguished Senator from Rhode Island.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

PUBLIC AIR SPACE IN THE DISTRICT OF COLUMBIA

The bill (H.R. 7766) to authorize the Mayor of the District of Columbia to enter into an agreement with the U.S. Postal Service with respect to the use of certain public air space in the District of Columbia, was considered, ordered to a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

PARTICIPATION IN JUDICIAL PROCEEDINGS

The resolution (S. Res. 373) authorizing the Select Committee on Ethics to participate in judicial proceedings to obtain information regarding its Korean inquiry, was considered and agreed to, as follows:

Resolved, That the Select Committee on Ethics is authorized, on behalf of the Senate or on behalf of Members, officers or employees of the Senate who have been sued for actions taken in an official capacity, to participate in any judicial proceeding, whether initiated by the Select Committee or any other person, to obtain testimony, documents or other evidence concerning or relating in any way to its inquiry into or investigation of allegations that Members, officers, or employees of the Senate have been the object of efforts on behalf of the Republic of Korea, or of persons acting on behalf of or in connection with the Republic of Korea, to influence improperly the conduct of Members, officers or employees of the Senate.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ADDITIONAL EXPENDITURES BY THE COMMITTEE ON RULES AND ADMINISTRATION

The resolution (S. Res. 380) authorizing additional expenditures by the Committee on Rules and Administration for inquiries and investigations, was considered and agreed to, as follows:

Resolved, That, in holding hearings, reporting such hearings, and making investigations as authorized by sections 134(a) and 136 of the Legislative Reorganization Act of 1946, as amended, in accordance with its jurisdiction under rule XXV of the Standing Rules of the Senate, the Committee on Rules and Administration is authorized from March 1, 1978, through February 28, 1979, in its discretion (1) to make expenditures from the contingent fund of the Senate, (2) to employ personnel, and (3) with the prior consent of the Government department or agency concerned and the Committee on Rules and Administration, to use on a reimbursable basis the services of personnel of any such department or agency.

SEC. 2. The expenses of the committee under this resolution shall not exceed $793,000, of which amount not to exceed $76,000 may be expended for the procurement of the services of individual consultants, or organizations thereof (as authorized by section 202(i) of the Legislative Reorganization Act of 1946, as amended).

SEC. 3. The committee shall report its findings, together with such recommendations for legislation as it deems advisable, to the Senate at the earliest practicable date, but not later than February 28, 1979.

SEC. 4. Expenses of the committee under this resolution shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee, except that vouchers shall not be required for the disbursement of salaries of employees paid at an annual rate.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

RECOGNITION OF LEADERSHIP

Mr. ROBERT C. BYRD. Mr. President, I have no further need for my time.

The ACTING PRESIDENT pro tempore. The Senator from Tennessee.

THE PANAMA CANAL TREATIES

Mr. BAKER. Mr. President, I see that the distinguished Senator from Michigan is now in the Chamber, and the Senator from Alabama is here. I wonder if we might proceed now to make the unanimous-consent request with respect to the 3-day rule.

Mr. ROBERT C. BYRD. Mr. President, is my understanding correct that the eight Senators who wish to have a colloquy on tomorrow are willing to forgo that colloquy until Wednesday?

Mr. BAKER. That is my understanding. Mr. President, I would hope we might be able to substitute Wednesday on the order for tomorrow.

VACATION OF ORDER FOR RECOGNITION OF EIGHT SENATORS TOMORROW, AND ORDER FOR RECOGNITION OF THE SAME ON WEDNESDAY

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the orders for recognition of eight Senators on tomorrow be vacated, and that the orders for the same Senators be reinstated for Wednesday, beginning at 10 a.m.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

THE PANAMA CANAL TREATY

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that at the hour of 12 o'clock on Wednesday, the Senate go into executive session to consider the first treaty, Executive N, 95th Congress, First Session.

Mr. ALLEN. Reserving the right to object, and I do not plan to object, this request would cause the treaties automatically to be considered in the Committee of the Whole, would it not?

Mr. ROBERT C. BYRD. That is correct.

Mr. ALLEN. I thank the Senator.

Mr. GRIFFIN. Mr. President, reserving the right to object, and I shall not object, I urge all of my colleagues to agree to this unanimous-consent request. The only reason it is necessary is that the Committee on Foreign Relations accorded me the courtesy of having until Friday to file the views of the lone dissenter. I appreciate that courtesy. Except for that extension of an additional day until Friday, they would have been required to be filed on Thursday.

I would say that a printed copy of the report was available on Saturday, although in very limited numbers, and I hope that it will be available to all Senators today and to others beyond the Senate. This request, it seems to me, by the joint leadership is very much in order and appropriate. I join in the request.

Mr. BAKER. Mr. President, reserving the right to object, I thank my colleague from Michigan for his thoughtful handling of this matter. He, of course, was entirely within his rights to object had he chosen to do so, but I believe this is an appropriate method of handling it. I thank him for his statement.

Mr. ROBERT C. BYRD. Mr. President, I also thank the distinguished Senator from Michigan (Mr. GRIFFIN) and the distinguished Senator from Alabama (Mr. ALLEN). I misspoke earlier, when I said the report was available on Friday. It was not available on Friday; it was available on Saturday.

Mr. President, I express my appreciation, again, to my colleagues and to the distinguished minority leader for the assistance he has been able to render in making this consent request, hopefully, agreeable.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER FOR RECESS UNTIL 10 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that, when the Senate completes its business today, it stand in recess until the hour of 10 a.m. tomorrow instead of 8 a.m.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. ROBERT C. BYRD. Mr. President, the distinguished Senator from Rhode Island has been wanting recognition and the distinguished minority leader has suggested that his time be yielded to the distinguished Senator from Rhode Island. I ask unanimous consent that the minority leader's time be restored to the minority leader in full so that he make good on his promise to yield to the Senator from Rhode Island.

Mr. ALLEN. Reserving the right to object, and I shall not object, I wonder if the distinguished majority leader would have the morning business time ahead? I have two items that will not take more than 5 minutes.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER FOR PERIOD FOR ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. With the indulgence of the distinguished Senator from Ohio (Mr. GLENN), I ask unanimous consent that, following the 10 minutes or such time as is consumed normally allotted to the minority leader, there be a period for the transaction of routine morning business not to extend beyond 10 minutes, with statements therein limited to 5 minutes each.

Mr. ALLEN. Would the distinguished majority leader make it 15 minutes?

Mr. ROBERT C. BYRD. I ask unanimous consent that the period be 15 minutes and that, at the close of that morning business period, the Senate resume consideration of the unfinished business, with no time to begin running on the unfinished business until the morning hour has run out.

Mr. GLENN. This would not change our agreements on time this morning and debate on the bill today? I have no objection to what the distinguished majority leader has suggested, since the people proposing amendments are not on the floor. I should not want to see the time extended beyond that which we agreed to on Thursday last.

Mr. ROBERT C. BYRD. Very well. I do not think it will have any impact at all on today's debate, other than that it will delay the starting of it, and it will have no impact on the times set forth for tomorrow's debate.

Mr. GLENN. I was only concerned that, perhaps, when the people with amendments do show up, we not have an extended period of time that will prevent them from bringing their amendments to the floor.

Mr. ROBERT C. BYRD. We will not.

Mr. GRIFFIN. Reserving the right to object, while the two leaders are on the floor, I have no doubt in my mind that each of them would proceed in this manner, anyway, but I would formally like to make a request, since I feel a rather heavy responsibility in the position that I seem to have been thrust into to protect Senators. I should like to have the assurance that, in the event any unanimous-consent request is to be propounded with regard to the handling procedure for debate of the Panama Canal Treaties, of course, I would be notified in advance and have an opportunity to be on the floor.

Mr. BAKER. If the Senator will yield, of course, I shall make that representation. As the Senator knows, I have already consulted with him on the question of the 3-day rule and on the request of the possibility of an order for controlled time. It was my intention to recognize his status as a member of the Foreign Relations Committee who did not vote to support the treaties. I feel a personal obligation to consult in advance with him concerning any unanimous-consent request at all in this regard. For my part, I am happy to do that.

Mr. ROBERT C. BYRD. I think the distinguished minority leader's assurance fully protects the Senator from Michigan.

Mr. GRIFFIN. I thank both the leaders.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. The Senator from Tennessee.

Mr. BAKER. Mr. President, I yield my time under the standing order, or so much of it as remains, to the distinguished Senator from Rhode Island.

The ACTING PRESIDENT pro tempore. Five minutes remain.

Mr. CHAFEE. I thank the distinguished minority leader and distinguished majority leader for giving me this brief time. This statement deals with three bills I am going to introduce this afternoon to strengthen the investment and employment in our small business community.

INVESTMENT AND EMPLOYMENT IN THE SMALL BUSINESS COMMUNITY

Mr. CHAFEE. Mr. President, there is never a shortage of distinguished speakers who will rise to lament our high unemployment, the inability of our older industries to remain competitive, and the virtual impossibility of the newer ones to even get started. But today I am offering a legislative package that gives us a chance to do something about those problems.'

Hand in hand with this country's troublesome unemployment picture and sluggish economic performance has been an increasing inability of our smaller enterprises to raise money for new capital investments. The uncertain state of our economy in past years and other recent trends in the financial markets have combined to virtually cut off the small business community from outside financing. Both the individuals and banks who were once willing to risk lending money to new or smaller businesses have turned instead to bigger established corporations which offer more secure investments.

This alarming trend has accelerated to the point where small companies face a capital shortage estimated at $8 billion a year nationwide. Who can begin a business, much less expand one, when it cannot raise the money? In such a climate, is it any wonder why four out of five new businesses fail and go bankrupt in their first 10 years? Is it surprising to see so many older, antiquated factories in New England and elsewhere going out of business? When you think about it, it is sad but not surprising.

I am not just concerned, however, because small businesses are having trouble making a profit or getting money from the bank. I am concerned because it is the small businesses which provide most of the jobs in this country. There are over 2 million smaller enterprises in the

United States, and 36,000 in Rhode Island alone. We count on them for 56 percent of our national private sector employment, 48 percent of our total business output, 43 percent of the gross national product, and over half of our important industrial inventions and innovations.

The enormous potential of our small business community gives us a chance to tackle some of our most severe social and economic problems without setting up more top-heavy Government programs.

Last October, a New England Conference on Balanced National Growth and Economic Development was held so that our regional planners could prepare recommendations for the recent White House Conference on Balanced National Growth. The strong emphasis they placed on job creation was shared by every other delegate to the conference.

They said that Government policy must encourage jobs in the private sector. They said that Government policies to increase the availability of investment capital are crucial if the private sector is going to meet the problems of economic growth and development. And they said that revising national tax policy is the key to providing making this system work at its best.

In addition, Mr. President, a recent report of the Congressional Joint Economic Committee stressed that the percentage of GNP going to business investment over the next several years must be higher than in the past decade if the Nation's employment and productivity goals are to be fulfilled.

A strong flow of private investment back into smaller companies must be regained if we are to take advantage of their highly labor-intensive potential. This message is clear.

Each of the bills I shall introduce today take a different, yet coordinated, tack toward encouraging greater investment in smaller businesses.

My first bill will increase the $50,000 corporate surtax exemption. Under current law, this provision requires corporations to pay a tax rate of 20 percent on the first $25,000 profits and 22 percent on the second $25,000, but requires a 48-percent tax on everything above that. My bill raises the surtax exemption ceiling up to $150,000 of earnings, requiring a flat tax rate of only 20 percent on that amount.

The resulting tax saving will amount to as much as $28,500 for each company with taxable earnings of $150,000 or more. My formula gives smaller companies a substantially larger portion of the corporate tax cut pie proposed by President Carter last month. While $28,500 may not mean a lot to General Motors, it could be a lifesaver to a small firm in Pawtucket or Hoboken or Des Moines.

My second bill will permit investors to defer the tax on any capital gain as long as they reinvest their holdings in a small business within 2 years. This treatment is much the same as that allowed to homeowners who sell one house at a profit then buy another. This measure is essential to encouraging the flow of investor dollars back into small businesses.

My third bill will simplify depreciation rules and allow companies greater flexibility in depreciating the cost of their new investments. By making this provision, we will enable businesses to recover the cost of new buildings and equipment at a time and a rate which is most compatible with their financial situation.

While these bills may appear complex and technical, the real benefits will accrue to the employees and future employees of smaller companies, and I urge my colleagues in the Senate to give them prompt consideration.

I ask unanimous consent that the bills be printed in the RECORD.

There being no objection, the bills were ordered to be printed in the RECORD, as follows:

S. 2497

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Corporate Tax Reduction Act of 1977".

SEC. 2. (a) Subsection (b) of section 11 of the Internal Revenue Code of 1954 (relating to normal tax on corporations) is amended to read as follows:

"(b) NORMAL TAX.—The normal tax for a taxable year is equal to—

"(1) 20 percent of so much of the taxable income as does not exceed $50,000.".

(b) Subsection (d) of section 11 of such Code (relating to surtax exemption) is amended by striking out all that precedes "except that" and inserting in lieu thereof the following:

"(d) SURTAX EXEMPTION.—For purposes of this subtitle, the surtax exemption for any taxable year is $150,000;".

(c)(1) Paragraph (7) of section 12 of such Code (relating to cross references relating to tax on corporations) is amended by striking out "$50,000" and inserting in lieu thereof "$150,000".

(2) Subsection (f) of section 21 of such Code (relating to effect of changes in rates during a taxable year) is amended to read as follows:

"(f) CHANGE IN SURTAX EXEMPTION.—In applying subsection (a) to a taxable year of a taxpayer which is not a calendar year, the change made by section 2 of the Corporate Tax Reduction Act of 1977 in the surtax exemption shall be treated as a change in a rate of tax.".

(3) Paragraph (1) of section 821(a) of such Code (relating to tax on mutual insurance companies to which part II applies) is amended to read as follows:

"(1) NORMAL TAX.—A normal tax for a taxable year equal to—

"(A) 20 percent of so much of the mutual insurance company taxable income as does not exceed $150,000,

or 44 percent of the amount by which such taxable income exceeds $6,000 whichever is lesser; plus".

(4) Subparagraph (A) of section 821(c)(1) of such Code (relating to alternative tax for certain small companies) is amended to read as follows:

"(A) NORMAL TAX.—A normal tax for a taxable year equal to—

"(i) 20 percent of so much of the taxable investment income as does not exceed $150,000,

or 44 percent of the amount by which such taxable income exceeds $3,000, whichever is lesser; plus".

SEC. 3. The amendments made by this Act shall apply to taxable years ending after December 31, 1977.

S. 2498

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, that this Act may be cited as the "Small Business Reinvestment Act of 1978".

SEC. 2 (a) Part III of subchapter O of chapter 1 of subtitle A (relating to nontaxable exchanges) is amended by adding at the end thereof the following new section:

"SEC. 1040. SALES OF INTERESTS

"(a) NONRECOGNITION OF GAIN.—If an equity or proprietary interest is sold, gain (if any) from such sale shall, at the election of the taxpayer, be recognized only to the extent that the taxpayer's sale price exceeds the cost of replacement property in a small concern purchased by the taxpayer within 2 years from the date of such sale.

"(b) DEFINITIONS.—For purposes of this section:

"(1) The term 'small concern' means a small business as defined in the Small Business Act and in the regulations promulgated thereunder by the Small Business Administration.

"(2) The term 'replacement property' means an equity or proprietary interest in a small concern.

"(c) LIMITATIONS.—

"(1) Where the interest sold is evidenced by stock subsection (a) shall apply only to a sale of stock which, if such stock had been purchased by the issuing corporation, would have been treated as a redemption within the meaning of paragraphs (1), (2), and (3) of subsection 302(b).

"(d) BASIS OF REPLACEMENT PROPERTY.—The basis of replacement property shall be reduced by the amount of gain not recognized solely by reason of the application of subsection (a). If more than one item of replacement property is purchased, such reduction in the basis of the replacement property is purchased shall be applied to each such property in chronological order of purchase. The amount of the reduction applicable to each item of property shall be determined by multiplying the maximum gain not to be recognized pursuant to subsection (a) by a fraction the numerator of which is the cost of each replacement property and the denominator of which is the total cost of all replacement properties.

"(e) STATUTE OF LIMITATIONS.—If durable a taxable year a taxpayer sells an interest at a gain, then—

"(1) the statutory period for the assessment of any deficiency attributable to any part of such gain shall not expire before the expiration of 3 years from the date the Secretary or his delegate is notified by the taxpayer (in such manner as the Secretary or his delegate may by regulations prescribe) of—

"(A) the taxpayer's cost of purchasing replacement property which the taxpayer claims results in nonrecognition of any part of such gain,

"(B) the taxpayer's intention not to purchase property within the period specified in subsection (2), or

"(C) a failure to make such purchase within such period; and

"(2) such deficiency may be assessed before the expiration of such 3-year period notwithstanding the provisions of any other law or rule of law which would otherwise prevent such assessment.".

(b) Section 1223 shall be amended by designating paragraph (12) as paragraph (13) and by inserting a new paragraph (12) as follows:

"(12) In determining the period for which the taxpayer has held replacement property, the acquisition of which resulted under section 1040 in the nonrecognition of any part of the gain realized on the sale or exchange of an interest, there shall be included the period for which such interest had been held as of the date of such sale or exchange.".

(c) A taxpayer electing under subsection (a) shall so signify on his return for the taxable year in which the election is made.

S. 2499

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the Asset Depreciation Simplification Act of 1978.

ADJUSTMENT OF DEPRECIATION SCHEDULES

SEC. 2. (a) Subsection 167(b) (relating to use of certain methods and rates of depreciation) is amended—

(1) by striking the word "and" at the end of subparagraph (3),

(2) by redesignating subparagraph (4) as subparagraph (5), and

(3) by inserting after subparagraph (3) the following new subparagraph:

"(4) the practical cost recovery method, and".

(b) Subsection 167(c) (relating to limitations on use of certain methods and rates) is amended—

(1) by striking "and (4)" and by substituting in lieu thereof "(4), and (5)", and

(2) by striking "3 years or more" and substituting in lieu thereof "2 years or more".

(c) Subsection 167(m) (relating to class lives) is amended by adding at the end thereof the following new subparagraph:

"(4) SPECIAL RULES FOR PRACTICAL COST RECOVERY METHOD.—

"(A) IN GENERAL.—An election to utilize the practical cost recovery method under subparagraph (b)(4) shall entitle the taxpayer, notwithstanding any other provision of this section, to assign useful lives to depreciable assets at not less than the following:

"(i) in the case of highway transportation equipment, tools, and dies, 2 years;

"(ii) in the case of machinery, rail, water, and air transportation equipment, office furniture, equipment, and fixtures and leasehold improvements, 5 years; and

"(iii) in the case of real estate improvements and depreciable real estate, 10 years.

"(B) LIMITATION.—

"(i) The amount of property which shall qualify for the practical cost recovery method in any 1 year is limited as follows: (1) that in the case of assets described in subsection (A), the amount shall not exceed $200,000 in the aggregate.

"(ii) These limitations shall apply to each taxpayer and, in the case of married taxpayers, they shall be one-half of the amounts set forth in subparagraph (B)(i) for each spouse. For purposes of this limitation, controlled corporations, as defined by section 1536(a), will be treated as a single taxpayer.".

ROUTINE MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, there will now be a period for the transaction of routine morning business for not to exceed 15 minutes with statements therein limited to 3 minutes.

Is there morning business?

ADDITIONAL COSPONSOR—NEUTRALITY TREATY

Mr. ALLEN. Mr. President, late last week I received a letter from the joint leaders requesting—and I am sure the same letter went to all Members of the Senate—that I become a cosponsor of the Byrd-Baker amendment to articles 4 and 6 of the Neutrality Treaty. It is anticipated that will be offered during the consideration of the treaties.

Mr. President, I ask unanimous consent that my name be added as one of the cosponsors of this amendment at this time and, particularly, when it is offered here in the Senate. My making this request is in response to the invitation of the two leaders and of the Senators sponsoring the amendment that I become a cosponsor.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

COMMENDING TROY STATE UNIVERSITY ON BECOMING THE HOME OF THE NATIONAL BAND ASSOCIATION HALL OF FAME OF DISTINGUISHED PERSONS

Mr. ALLEN. Mr. President, I send a resolution to the desk and ask for its immediate consideration.

The ACTING PRESIDENT pro tempore. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 389) commending Troy State University on becoming the home of the National Band Association Hall of Fame of Distinguished Persons.

The ACTING PRESIDENT pro tempore. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

Mr. ALLEN. Mr. President, this commendatory resolution has been cleared with both leaders. There is no objection.

Mr. President, Troy State University, located at Troy, Ala., has added another achievement to its lengthening honor roll. Troy State will become the home of the National Band Association Hall of Fame of Distinguished Persons.

The National Band Association, the largest organization of its kind in the United States, voted at its December 15, 1977, meeting in Chicago to establish a National Band Association Hall of Fame.

The Hall of Fame was originally conceived by the honorary life president of NBA, Prof. Al G. Wright, of Purdue University. The matter was considered by the NBA Board over the last several years and an opportunity was made available for an interested institution or sponsoring group to present an invitation to host the Hall of Fame. Troy State was the ultimate selection.

A nonprofit corporation will be established to operate the Hall of Fame. Nominations will be limited to persons who are at least 65 years of age or deceased. Nominations may be received from any sources and will be voted on annually by a selection board to be appointed by the board of directors of the Band Hall of Fame Foundation.

Criteria for election to the Band Hall of Fame will include particularly distinguished service or contributions to the field of wind band music in the areas of conducting, performance, composition, arranging, musicology, public service, and other areas.

Mr. President, in my judgment, the National Band Association could not find a more suitable or desirable location than this outstanding university. I am happy today to extend congratulations to Dr. Ralph Adams, president of Troy State University and Dr. John M. Long, director of bands and dean of the College of Arts and Sciences, for their diligent efforts in bringing the National Band Hall of Fame to Troy State University.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the resolution.

The resolution (S. Res. 389) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 389

Whereas, the National Band Association voted at its December 15, 1977 meeting in Chicago to establish a "National Band Association Hall of Fame of Distinguished Persons;"

Whereas, this project will be located at Troy State University, Troy, Alabama, following the invitation from Troy President, Dr. Ralph W. Adams and Director of Bands and Dean of the College of Arts and Sciences, Dr. John M. Long;

Whereas, the Hall of Fame was originally conceived by the honorary life president of NBA, Professor Al G. Wright of Purdue University; and

Whereas, the matter was considered by the NBA Board over the last several years;

Whereas, a non-profit corporation will be established to operate the Hall of Fame. Nominations will be limited to persons who are 65 years of age or deceased. Nominations may be received from any sources and will be voted on annually by a Selection Board to be appointed by the Board of Directors of the Band Hall of Fame Foundations;

Whereas, criteria for election to the Band Hall of Fame will include particularly distinguished service or contributions to the field of wind band music in the areas of conducting, performance, composition, arranging, musicology, public service and other areas: Now, therefore, be it

Resolved, That the Senate of the United States congratulates and commends Troy State University and Dr. Ralph Adams for providing a home for the National Band Association Hall of Fame.

SEC. 2. The Secretary of the Senate is directed to transmit a copy of this resolution to Dr. Adams.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

At 4:16 p.m., a message from the House of Representatives delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the bill (S. 1509) to provide for the return to the United States of title to certain lands conveyed to certain Indian pueblos of New Mexico and for such land to be held in trust by the United States for such tribes; without amendment.

The message also announced that the House recedes from its amendments numbered 1, 2, and 3 to the amendment of the Senate to the bill (H.R. 7442) to amend the Communications Act of 1934 to provide for the regulation of utility pole attachments; and agrees to the amendment of the Senate to the amendment of the House numbered 4 to the aforesaid bill.

COMMUNICATIONS FROM EXECUTIVE DEPARTMENTS, ETC.

The ACTING PRESIDENT pro tempore laid before the Senate the following communications, together with accompanying reports, documents, and papers, which were referred as indicated:

EC–2712. A communication from the Administrator, Rural Electrification Administration, Department of Agriculture, reporting, pursuant to law, approval of a commitment to guarantee a non-REA loan in the amount of $362,160,000 to San Miguel Electric Cooperative, Inc., of Jourdanton, Texas, to finance certain generating facilities (with accompanying papers); to the Committee on Appropriations.

EC–2713. A communication from the Administrator, Rural Electrification Administration, Department of Agriculture, reporting, pursuant to law, approval of a commitment to guarantee a non-REA loan in the amount of $49,561,000 to Brazos Electric Power Cooperative, Inc., of Waco, Texas, to finance certain transmission facilities (with accompanying papers); to the Committee on Appropriations.

EC–2714. A communication from the Administrator, Rural Electrification Administration, Department of Agriculture, reporting, pursuant to law, approval of a commitment to guarantee a non-REA loan in the amount of $2,945,000 to Medina Electric Cooperative, Inc., of Hondo, Texas, to finance certain transmission facilities (with accompanying papers) to the Committee on Appropriations.

EC–2715. A communication from the Administrator, Rural Electrification Administration, Department of Agriculture, reporting, pursuant to law, approval of a commitment to guarantee a non-REA loan in the amount of $14,715,000 to South Texas Electric Cooperative, Inc., of Victoria, Texas, to finance certain transmission facilities (with accompanying papers); to the Committee on Appropriations.

EC–2716. A communication from the Secretary of the Air Force, transmitting, pursuant to law, reports concerning military construction contracts awarded by the Air Force without formal advertisement for the periods July 1, 1976, to September 30, 1976, and October 1, 1976, to September 30, 1977 (with accompanying reports); to the Committee on Armed Services.

EC–2717. A secret communication from the Assistant Secretary of the Army (Research, Development, and Acquisition), transmitting, pursuant to law, a plan for the incorporation of NBC protection for armored vehicles and crews (with an accompanying secret document); to the Committee on Armed Services.

EC–2718. A confidential communication from the Acting Director, Defense Security Assistance Agency, transmitting, pursuant to law, information concerning the Department of the Navy's proposed Letter of Offer to Germany for Defense Articles estimated to cost in excess of $25 million (with accompanying confidential papers); to the Committee on Armed Services.

EC–2719. A communication from the Secretary of Defense, transmitting, pursuant to law, the Annual Report of the Department of Defense for fiscal year 1979, February 2, 1978 (with an accompanying report); to the Committee on Armed Services.

EC–2720. A communication from the President and Chairman, Export-Import Bank, transmitting, pursuant to law, a statement with respect to a transaction involving U.S. exports to the Republic of China (with accompanying papers); to the Committee on Banking, Housing, and Urban Affairs.

EC–2721. A communication from the President, United States Railway Association, transmitting, pursuant to law, the first quarterly report of the United States Railway Association (with an accompanying report); to the Committee on Commerce, Science, and Transportation.

EC–2722. A communication from the Secretary of the Treasury, transmitting, pursuant to law, a report on the amounts of money paid to each State and local unit of government and a description of any action that the Secretary has taken under section 212 during the previous calendar quarter, January 9, 1978 (with an accompanying report); to the Committee on Finance.

EC–2723. A communication from the Acting Administrator, Agency for International Development, Department of State, transmitting, pursuant to law, a report entitled "Energy Organization Options, Report by a Panel of the National Academy of Public Administration," December 30, 1977 (with an accompanying report); to the Committee on Foreign Relations.

EC–2724. A communication from the Chairman, Council of the District of Columbia, transmitting, pursuant to law, an act adopted by the Council on October 25, 1977, which would protect certain property rights and interests created as a result of the closing of streets, minor streets, roads, highways, and alleys in the District of Columbia, pursuant to resolutions previously adopted by the Council of the District of Columbia (Act 2–134) (with accompanying papers); to the Committee on Governmental Affairs.

EC–2725. A communication from the Chairman, Council of the District of Columbia, transmitting, pursuant to law, an act adopted by the Council on October 25, 1977, which would require the District of Columbia council approval of all revisions of the District's Water Quality Standards, and for other purposes (Act 2–136) (with accompanying papers); to the Committee on Governmental Affairs.

EC–2726. A communication from the Chairman, Council of the District of Columbia, transmitting, pursuant to law, an act adopted by the Council on October 11, 1977, which would establish certain requirements for the licensure of Occupational Therapy or Occupational Therapy Assistants, and for other purposes (Act 2–137) (with accompanying papers); to the Committee on Government Affairs.

EC–2727. A communication from the Chairman, Council of the District of Columbia, transmitting, pursuant to law, an act adopted by the Council on October 11, 1977, which would license ambulatory surgical treatment centers (Act 2–138) (with accompanying papers); to the Committee on Governmental Affairs.

EC–2728. A communication from the Chairman, Council of the District of Columbia, transmitting, pursuant to law, an act adopted by the Council on October 27, 1977, which would amend the Solid Waste Regulations of the District of Columbia, and for other purposes (Act 2–135) (with accompanying papers); to the Committee on Governmental Affairs.

EC–2729. A communication from the Chairman, Advisory Commission on Intergovernmental Relations, transmitting, pursuant to law, the Nineteenth Annual Report of the Advisory Commission on Intergovernmental Relations, January 1978 (with an accompanying report); to the Committee on Governmental Affairs.

EC–2730. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "A Range of Cost Measuring Risk and Uncertainty in Major Programs—An Aid to Decisionmaking," February 2, 1978 (with an accompanying report); to the Committee on Governmental Affairs.

EC–2731. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Problems With Federal Equal Employment Opportunity Guidelines on Employee Selection Procedures Need to be Resolved," February 2, 1978 (with an accompanying report); to the Committee on Governmental Affairs.

EC–2732. A communication from the Chairman, Commission on Federal Paperwork, transmitting, pursuant to law, a report with recommendations concerning the paperwork and disclosure requirements of the Consumer Credit Protection Act (with an accompanying report); to the Committee on Governmental Affairs.

EC–2733. A communication from the General Counsel, Copyright Office, Library of Congress submitting the New Systems Report; to the Committee on Governmental Affairs.

PETITIONS

The ACTING PRESIDENT pro tempore laid before the Senate the following petitions, which were referred as indicated:

POM–450. A concurrent resolution adopted by the Legislature of the State of Minnesota; to the Committee on Agriculture, Nutrition, and Forestry:

"HOUSE CONCURRENT RESOLUTION No. 6

"Whereas, the family farm is the most efficient and dependable food producing unit in this nation; and

"Whereas, American farmers have lost equity and enormous sums of money in re-

cent years due to drought and depressed prices for agricultural products; and

"Whereas, unless some positive action is taken by the United States Government to bring net profit into the prices of agricultural products, family farms as we know them will cease to exist; and

"Whereas, the recent policy of the United States Government has been to encourage farmers to plant fence row to fence row and has consequently reduced market prices to dangerously low levels; and

"Whereas, the American people today pay considerably less of their total disposable income for food than people of other nations; and

"Whereas, parity pricing for American agricultural products would remove speculative profits for middleman and stabilize prices and profits for farmers and consumers; and

"Whereas, parity pricing means cost of production plus a reasonable profit on commodities produced, but does not protect against the natural risks including weather, insects, and all other calamities farmers face; now, therefore,

"Be it resolved, by the House of Representatives of the State of Minnesota, the Senate of Minnesota concurring, that the Minnesota Legislature support the goals and principles of the American Agriculture Movement.

"Be it further resolved, that Congress establish programs that result in 100 percent parity for all agricultural commodities except tobacco.

"Be it further resolved, that Congress adopt legislation comparable to the Minnesota Tax Loss Farming Act, and the Minnesota Corporate Farm Act (Minn. Statutes, Section 500.24).

"Be it further resolved, that Secretary of Agriculture Bergland establish loan rates at the highest level allowable by law.

"Be it further resolved, that the United States Government take an aggressive and positive position towards establishing international trade agreements with other exporting nations so as to establish a realistic level for farm commodities in world trade.

"Be it further resolved, that the Chief Clerk of the Minnesota House of Representatives transmit copies of this Resolution to President Carter, Vice President Mondale, Secretary of Agriculture Bergland, the congressional delegations of all fifty states, and the Secretary General of the United States."

POM–451. A joint resolution adopted by the Legislature of the State of Delaware; to the Committee on Energy and Natural Resources:

"HOUSE JOINT RESOLUTION No. 51

"Memorializing the President of the United States and the United States Congress to Enact Legislation Establishing a Fund for Dispersing Fifty Percent of Federal Outer Continental Shelf Revenues to Coastal State Governments and to Incorporate an Equitable Formula for the Allocation of Such Revenues.

"Whereas, Outer Continental Shelf oil and natural gas resources both discovered and undiscovered are expected to be an important means of satisfying future national energy needs; and

"Whereas, it is the policy of the federal government to develop such resources in the national interest; and

"Whereas, it is expected that in excess of 109 billion dollars may accrue to the federal government from lease purchase payments and royalties on undeveloped Outer Continental Shelf oil and natural gas resources; and

"Whereas, adjacent coastal states are likely to incur large economic and environmental costs as a consequence of Outer Continental Shelf oil and natural gas production; and

"Whereas, the major existing federal coastal state Outer Continental Shelf impact assistance program is inadequate for meeting coastal state responsibilities associated with such Outer Continental Shelf development; and

"Whereas, the continued preemption of financial resources by the federal government has dramatically shifted the balance of power in the federal system of the United States to the impairment of the ability of state governmens to meet emerging needs.

"Now, therefore:

"Be it resolved by the members of the 129th General Assembly of the State of Delaware, the Governor concurring therein, that the President of the United States and the 95th Congress of the United States are hereby memorialized to enact legislation which will endorse the concept of equitable coastal state government sharing of revenues derived by the federal government from Outer Continental Shelf oil and natural gas development and to enact a program establishing a fund for dispersing fifty percent of federal Outer Continental Shelf revenues to coastal state governments and to incorporate an equitable formula for the allocation of such revenues which entitles any coastal state within a given federal fiscal year to a minimum of two percent and a maximum of ten percent of such revenues and which is based upon the percentage of adjacent Outer Continental Shelf oil and natural gas acreage leased, the percentage of the volume of adjacent Outer Continental Shelf oil and natural gas production and the percentage of oil and natural gas first landed in such coastal state in a given federal fiscal year.

"Be it further resolved that upon enactment of this Joint Resolution, the Chief Clerk of the House of Representatives is hereby instructed to forward suitably prepared copies to the President of the United States, Jimmy Carter, to the Secretary of the Senate of the 95th Congress and to the Chief Clerk of the House of Representatives of the 95th Congress."

POM–452. A resolution adopted by the Legislature of the State of New York; laid on the table:

"RESOLUTION

"Whereas, Hubert Horatio Humphrey, United States Senator from Minnesota and former Vice President of the United States passed on to his eternal destiny on the thirteenth day of January, nineteen hundred seventy-eight bringing profound sadness to all people of this great Nation whose lives he has enriched and ennobled; and

"Whereas, A few days prior to his death this most joyous and ebullient of men advised his Pastor that his death was not to be mourned in the traditional manner, with dirge and lamentation, but to be observed as a time of celebration and in the words of President Carter, that is what we ought to do, 'as we mourn his death, we celebrate because such a man as Hubert Humphrey was among us'; and

"Whereas, This most virtuous of men, who knew neither rancor nor vindictiveness, who, in the words of Vice President Mondale spoken at the ceremonies at the rotunda of the United States Capitol on Sunday, January fifteenth, nineteen hundred seventy-eight, 'taught us all how to hope and how to love, how to win and how to lose; he taught us how to live, and, finally, he taught us how to die'; now, therefore, be it

"Resolved, That this Legislative Body respectfully pauses in its deliberations and, in the spirit of the entreaties of Hubert Horatio Humphrey to his Pastor, celebrates the triumphant life of this great United States Senator, and renowned Vice President who has, indeed, left us all, legacies of monuments more lasting than bronze, and jubilantly applauds the fact that such a man lived gloriously among us and was of us, to the enrichment and ennoblement of the lives of us all; and be it further

"Resolved, That copies of this resolution, suitably engrossed, be forthwith transmitted to Mrs. Hubert H. Humphrey, to Honorable Jimmy Carter, President of the United States, to Honorable Walter Mondale, Vice President of the United States and to the Secretary of the Senate of the United States over which Body Mr. Humphrey once presided."

POM–453. A concurrent resolution adopted by the Legislature of the State of Delaware; to the Committee on the Judiciary:

"SENATE CONCURRENT RESOLUTION No. 79

"Whereas, dissatisfaction among the citizenry about the decisions of the federal courts grows at an accelerated rate because the federal courts are far out of step with the people in such matters as education and criminal justice, among others; and

"Whereas, the situation is so critical that countless numbers of citizens boast they will not follow the mandates of the upper courts but will defy orders, especially in cases involving desegregation and forced busing; and

"Whereas, this growing public distrust of the judiciary augurs badly for the future of our nation; and

"Whereas, part of the problem lies in the lifetime appointments to the federal judiciary, making the judiciary disdainful of and deaf to the problems of the citizen majority.

"Now, therefore:

"Be it resolved by the Senate of the 129th General Assembly of Delaware, the House of Representatives concurring herein, that this resolution makes application to the Congress of the United States to call a convention for the purpose of amending the constitutional provision for the appointment of members of the federal judiciary so that the federal judiciary will no longer continue to ignore the citizenry.

"Be it further resolved that this application shall constitute a continuing application for such a convention pursuant to Article V of the Constitution of the United States until such time as the Legislatures of two-thirds of the States shall have made like applications and such convention shall have been called by the Congress of the United States.

"Be it further resolved that copies of this concurrent resolution be presented to the President of the Senate of the United States, the Secretary of the Senate of the United States, the Speaker of the House of Representatives of the United States, the Clerk of the House of Representatives of the United States, and to each member of the Congress from Delaware attesting the adoption of this concurrent resolution by the 129th General Assembly of the State of Delaware.'

POM–454. A resolution adopted by the Legislature of the Commonwealth of Massachusetts; laid on the table:

"RESOLUTIONS ON THE DEATH OF SENATOR HUBERT H. HUMPHREY

"Whereas, Senator Hubert H. Humphrey has touched the lives of every citizen of the commonwealth, as well as the entire nation with his concern for the well-being and advancement of all individuals wherever born; and

"Whereas, Hubert H. Humphrey constructed his political career as Mayor of Minneapolis, as United States Senator from Minnesota, as Vice President of the United States and as Ambassador to the United Nations around the universal dream of life, liberty, and the pursuit of happiness for all

persons regardless of economic status, race, sex, color, religion or place of origin; and

"Whereas, Hubert H. Humphrey uniquely possessed in such great measure the qualities of boundless energy, joy, compassion, dedication, hope and grace; and

"Whereas, Hubert H. Humphrey found it impossible to allow either defeat or bitterness or the ravages of illness to overcome his commitment toward his fellow man; and

"Whereas, The extraordinary legislative accomplishments of Hubert H. Humphrey, among which can be listed the civil rights act of nineteen hundred and sixty-four, the medicare program, the peace corps, the arms control and disarmament agency, reflected his belief that government can work to improve the quality of all human life here in the United States of America and throughout the world; now therefore, be it

"Resolved, That the Massachusetts Senate hereby recognizes the accomplishments, sacrifices and hard work of Hubert H. Humphrey as a most beautiful gift to the American people, and further recognizes and extends its deepest appreciation for the support and dedication on the part of his wife, Muriel Humphrey, and daughter, Nancy Humphrey Solomonson, and sons, Hubert Humphrey III, Robert Humphrey and Douglas Humphrey; and be it further

"Resolved, That a copy of these resolutions be transmitted forthwith by the Clerk of the Senate to the family of the late Hubert H. Humphrey, the President of the United States, the Vice President of the United States and to the Clerk of the United States Senate."

POM-455. A concurrent resolution adopted by the Legislature of the State of Michigan; to the Committee on Governmental Affairs:

"HOUSE CONCURRENT RESOLUTION No. 503

"Whereas, Since 1918, Americans have paid tribute one day each year to those who have fought to preserve our peace and our nationhood. The eleventh of November has been reestablished as the observance date for Veterans Day throughout the Nation; and

"Whereas, By collectively honoring the men and women who have fought to preserve our freedom, we reinforce America's strength as a free Nation; and

"Whereas, In honor of the reinstating of November the eleventh as Veterans Day, it would be fitting and proper for the U.S. Postal Service to issue a Veteran Day stamp for the 1978 observance; now, therefore, be it

"Resolved by the House of Representatives (the Senate concurring), That the Congress of the United States be hereby urged to have the United States Postal Service issue a Veterans Day stamp for the November 11, 1978, Veterans Day; and be it further

"Resolved, That a copy of this resolution be transmitted to the President of the United States Senate, the Speaker of the U.S. House of Representatives, and to each member of the Michigan delegation to the Congress of the United States."

POM—456. A resolution adopted by the Council of the City of Philadelphia, relating to human rights in Northern Ireland; to the Committee on Foreign Relations.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. CANNON, from the Committee on Commerce, Science, and Transportation, without amendment:

S. 2493. An original bill to amend the Federal Aviation Act of 1958, as amended, to encourage, develop, and attain an air transportation system which relies on competitive market forces to determine the quality, variety, and price of air services, and for other purposes (together with additional and minority views) (Rept. No. 95-631).

H.R. 8638—COMMITTEE DISCHARGED

Mr. GLENN. Mr. President, I ask unanimous consent that the Foreign Relations Committee be discharged from consideration of H.R. 8638, the Nuclear Antiproliferation Act of 1977, that the bill be placed on the calendar, and that the bill be eligible for consideration on February 7, 1978.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

EXECUTIVE REPORTS OF COMMITTEES SUBMITTED DURING RECESS

Under authority of the order of February 2, 1978, the following reports were submitted on February 3, 1978:

By Mr. SPARKMAN, from the Committee on Foreign Relations:

Ex. N, 95-1. Treaty Concerning the Permanent Neutrality and Operation of the Panama Canal; and The Panama Canal Treaty (Exec. Rept. No. 95-12, with minority and supplemental views).

By Mr. BAYH, from the Select Committee on Intelligence:

Frank C. Carlucci, of Pennsylvania, to be Deputy Director of Central Intelligence (Exec. Rept. No. 95-13).

(The above nomination from the Select Committee on Intelligence was reported with the recommendation that it be confirmed, subject to the nominee's committment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. DECONCINI (for himself, Mr. THURMOND, and Mr. ALLEN):

S. 2486. A bill to limit the standing of a foreign sovereign to sue under the antitrust laws of the United States; to the Committee on the Judiciary.

By Mr. CLARK (for himself, Mr. LEAHY, and Mr. ANDERSON):

S. 2487. A bill to amend the Public Health Service Act to provide for greater emphasis on rural health care needs in health planning; to the Committee on Human Resources.

By Mr. DOLE:

S. 2488. A bill to amend the Internal Revenue Code of 1954 to allow small businesses and certain farming operations to claim a credit against income tax in lieu of a deduction for social security taxes paid by such businesses and farming operations; to the Committee on Finance.

By Mr. ZORINSKY:

S. 2489. A bill to direct the Secretary of the Interior to convey certain property to Daniel Mahr and Thelma M. Mahr, and Nyel H. Moss and Janice L. Moss; to the Committee on Energy and Natural Resources.

By Mr. RIBICOFF (for himself, Mr. ABOUREZK, Mr. PERCY, Mr. JAVITS, Mr. MATHIAS, and Mr. NUNN):

S. 2490. A bill to improve administrative agency efficiency, reduce delay in administrative agency practice and procedure, and for other purposes; to the Committee on the Judiciary and the Committee on Governmental Affairs, jointly, by unanimous consent, that when one committee orders the measure reported, the other committee shall then have 45 days to report or be discharged from further consideration thereof.

By Mr. WILLIAMS:

S. 2491. A bill to permit the Secretary of Defense to authorize officers and employees of the Department of Defense who provide police or security functions, including individuals employed pursuant to contract with the Department of Defense, to have the power of arrest on military facilities and installations, and for other purposes; to the Committee on Armed Services.

By Mr. DOLE (for himself, Mr. THURMOND, and Mr. MCCLURE):

S. 2492. A bill to amend the Meat Import Quota Act of 1964; to the Committee on Finance.

By Mr. CANNON:

S. 2493. A bill to amend the Federal Aviation Act of 1958, as amended, to encourage develop, and attain an air transportation system which relies on competitive market forces to determine the quality, variety, and price of air services, and for other purposes; reported from the Committee on Commerce, Science, and Transportation, and placed on the calendar.

By Mr. CHURCH (by request):

S. 2494. A bill to protect the wildlands comprising the River of No Return Wilderness and the free-flowing Salmon River in the State of Idaho as an enduring resource of wilderness for the benefit of the people of Idaho and the nation pursuant to the Wilderness Act and the Wild and Scenic Rivers Act, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. SPARKMAN (by request):

S. 2495. A bill to authorize additional appropriations for the Department of State for fiscal year 1978; to the Committee on Foreign Relations.

S. 2496. A bill to authorize appropriations for the Department of State for fiscal years 1979, 1980, and for other purposes; to the Committee on Foreign Relations.

By Mr. CHAFEE:

S.J. Res. 110. A joint resolution establishing May 3, 1978, as "Sun Day"; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. DECONCINI (for himself, Mr. THURMOND, and Mr. ALLEN):

S. 2486. A bill to limit the standing of a foreign sovereign to sue under the antitrust laws of the United States; to the Committee on the Judiciary.

ANTITRUST RECIPROCITY ACT

Mr. DECONCINI. Mr. President, on January 11, 1978, the U.S. Supreme Court in Pfizer, Inc., against Government of India ruled that a foreign nation is a "person" within the meaning of section 4 of the Clayton Act and thus is entitled to recover treble damages for violations of our antitrust laws. The court acknowledged that it found no legislative history to guide its interpretation of section 4, noting that the question of a foreign government's right to sue was apparently never even considered at the time the Sherman and Clayton Acts were debated and passed. I believe the time has come for Congress to consider the question and to make its intent clear. For this reason, I am introducing a bill which would limit the right of a foreign sovereign to sue under our antitrust laws.

This bill is intended to address some of the inequities and distortions created by the Supreme Court's decision in Pfizer. In addressing these problems in his vigorous dissent, Chief Justice Burger stated:

> . . . (T)he result reached by the Court today confronts us with the anomaly that while the United States Government cannot sue for treble damages under our antitrust laws, other nations are free to engage in the most flagrant kinds of combinations for price fixing, totally at odds with our antitrust concepts, and nevertheless are given the right by the Court to sue American suppliers in American courts for treble damages plus attorneys' fees.

My bill would revise the Supreme Court decision by bestowing upon foreign nations the same status as the United States has under our antitrust laws—that is, they would be allowed to recover actual, but not treble damages. In addition, however, my bill provides that the right to sue for actual damages is conditional. In order to maintain a suit under our antitrust laws, a foreign sovereign must meet two criteria. First, the bill requires that the foreign sovereign recognize a general right of the United States to sue on a civil claim in the courts of that foreign country, just as we recognize the right of foreign sovereigns to prosecute civil claims in our courts. Second, the bill requires that the foreign sovereign have laws prohibiting restrictive trade practices. In developing this legislation we considered the alternative of making the right to sue strictly reciprocal—that is, contingent on the existence of antitrust laws in the foreign country and the right of the United States to sue under those laws in the courts of the foreign sovereign. This approach was rejected as too restrictive. Many nations which have antitrust laws simply do not have a provision for a private right of action comparable to section 4 of the Clayton Act. Enforcement is strictly by the Government.

I believe that for the purposes of equity and comparability, it is sufficient that the right of a foreign sovereign to sue be triggered by a demonstrated commitment to the concepts embodied by our own antitrust laws. As Chief Justice Burger stated in his Pfizer dissent, foreign sovereigns are free to enact and enforce comprehensive antitrust laws. Many nations have done so. In 1958, for example, the European Economic Community by the Treaty of Rome agreed to prohibit practices which would result in the elimination or restriction of competition within the Common Market countries. And, in fact, India and the Philipines who were respondents in the Pfizer case, as well as West Germany who appeared as amicus curiae, have enacted antitrust laws of some kind. However, many nations still have no laws comparable to our antitrust legislation. I see no reason to allow a foreign nation the right to sue an American company for practices which it does not attempt to condemn—and, at least, tacitly condones—under its own laws.

The bill is thus based on a general principle of reciprocity. It seeks to serve broader purposes than simply the compensation of foreign nations which are victims of anticompetitive practices under our laws. By its enactment we would demonstrate our intent to encourage other nations to recognize the right of the United States to sue in their courts, thus providing an opportunity for the United States to vindicate any claims it might have under foreign laws in the courts of that country. But it would also signal our commitment to encourage other nations to adopt standards of fairness in the marketplace which are consistent with those reflected in our antitrust laws.

Let me add, Mr. President, that the puropse of this bill is not to penalize any nation. Each country remains free to accept or reject anticompetitive trade practices. But the United States ought to utilize its own courts to promote healthy competition and not to reward nations which, on the one hand, allow and sometimes encourage monopoly and price-fixing but, on the other, demand to sue when they are the victims of such practices. Justice requires that those nations who do make an honest effort should be afforded the same consideration under the same circumstances as the United States. Those which do not, however, should be excluded from suing under section 4 of the Sherman Act.

Let me also make it quite clear that this legislation in no way condones anticompetitive trade practices by American firms. These firms should be prosecuted to the fullest extent possible. What I am attempting to deal with is the dual standard implicit in the Supreme Court's decision.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2486

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Antitrust Reciprocity Act".

SEC. 2. (a) Section 4 of the Clayton Act is amended by inserting immediately after "per-

son" the following: ", except a foreign sovereign,".

(b) Section 4A of the Clayton Act is amended—

(a) by inserting "(a)" immediately before "Whenever";

(b) by inserting "or a foreign sovereign" immediately after "United States" the first place it appears therein; and,

(3) by adding at the end thereof the following new subsection:

"(b) No foreign sovereign may bring an action in any court of the United States under the authority of this section unless the Attorney General of the United States certifies to the relevant court that—

"(1) the United States is entitled to sue in its own name and on its own behalf on a civil claim in the courts of such foreign sovereign; and

"(2) such foreign sovereign by its laws prohibits restrictive trade practices.".

By Mr. CLARK (for himself, Mr. LEAHY, and Mr. ANDERSON):

S. 2487. A bill to amend the Public Health Service Act to provide for greater emphasis on rural health care needs in health planning; to the Committee on Human Resources.

RURAL HEALTH NEEDS PLANNING ACT OF 1978

Mr. CLARK. Mr. President, the issue of health planning is of great concern to me, to the people of Iowa, and to all rural Americans. In the past 2 years, the Senate Rural Development Subcommittee—which I chair—has held extensive hearings on rural health care in various parts of the country. These hearings have led me to the conclusion that health planning can and should have a critical impact upon the medically underserved.

Equal access to health care is the top priority of the Health Planning Act. It is essential, then, that we structure the planning process to accomplish that goal—especially as it relates to the unique health needs of rural people.

Because I have a deep sense that the process is not working adequately to meet these needs, I come before you today with proposals to strengthen the Health Planning Act.

The recent controversy over the national health planning guidelines demonstrates that the act is not operating as it should. The rural community perceived them to be a direct threat to the existence of their hospitals. These guidelines were seen as a lack of good faith on the part of the Federal Government, because rural Americans felt that their needs and desires had been neglected.

This kind of situation must not occur again. Until we restore the faith of rural Americans in the health planning process, the process itself cannot possibly succeed. Now is the time to make the Planning Act more relevant and more responsive.

The health planning process must recognize the distinct differences between urban and rural communities. The conditions of rural America are very special. For example:

Metropolitan areas have 150 patient-care physicians per 100,000; nonmetropolitan areas have only 70.

Almost 50 percent of our Nation's poor people are rural residents.

Four of every ten older Americans live outside of metropolitan areas.

These examples underscore how rural communities differ in terms of the availability of physician care, access to health services, and the level of care required.

Thirty million Americans live in rural, medically underserved areas, we must no longer allow the health planning process to ignore these people.

I am introducing today, with Senators LEAHY and ANDERSON as cosponsors, a package of six rural amendments to the Health Planning Act. These are intended to build upon the efforts you have begun, and I ask for your support.

The amendments focus upon:

National health planning guidelines;

Adequate representation of rural interests; and

Financial support for health planning in medically underserved areas.

First, national health planning guidelines must deal with issues unique to rural areas. Our amendment mandates special attention within the overall guidelines to the needs and concerns of rural people.

This amendment precludes the imposition of inflexible national standards on rural and medically underserved communities. In fact, if this amendment had been law, I am convinced we could have completely avoided the recent small hospital controversy.

Second, rural consumers of health care should be assured of representation on the National Council on Health Planning and development—the body that advises and consults with the Secretary of HEW. Our amendment requires broader representation of population groups, including residents of nonmetropolitan areas, on the National Council, much as is required of HSA's.

Since the Department of Agriculture has major responsibility for rural development, this amendment also adds the Department's Assistant Secretary for rural development as an ex officio member of the National Council.

Third, our next amendment would assure adequate representation of the same groups on statewide health coordinating councils—which advise State health planning agencies.

Fourth, the amendment that I consider most significant encourages the development of subarea councils—which are smaller divisions of HSA's. The Secretary of HEW would be authorized to make grants to HSA's for the development and operation of subarea councils. The size of the grant would be related to both the square mileage and geographical barriers within a particular health services area.

This amendment would make sure that geographic isolation and barriers do not restrict active citizen participation in the health planning process. Subarea councils especially promote the involvement of rural people who have, up until now, been discouraged from participating.

This amendment also requires HSA's to consider subarea views in the planning process. It insures that interests at the local level will not be lost.

Fifth, the funding mechanism for HSA grants should include extra assistance for those areas with medically underserved populations. We feel another increase is needed to accommodate the special planing requirements of medically underserved populations. Specifically, the amount of any grant should be increased by 10 cents per medically underserved person in the health service area.

Finally, our sixth amendment would require centers for health planning to develop consumer education packages. Under our amendment, these centers, which provide technical assistance to HSA boards and there staffs, would emphasize the needs of the medically underserved.

These six amendments embody the views of several organizations active in the cause of rural health care. I have received valuable input from:

The Appalachian Regional Commission;

The Health Planning Council of the Midlands;

The Iowa Health Systems Agency, Inc.;

The National Farmers Union;

The National Rural Center;

The National Rural Electric Cooperatives Association;

Rural America, Inc., and

The U.S. Department of Agriculture.

I look forward to the day when access to high-quality health services is a fact for all Americans—rural and urban alike—rather than a hollow promise. I believe the adoption of these amendments will bring that day closer.

Mr. LEAHY. Mr. President, the health of rural America is not good. Sixty percent of the medically underserved persons in this country live in rural areas. Nearly one-half of the poor and a disproportionate share of the elderly live in nonmetropolitan America. In addition, special characteristics such as the acute health needs of migrant farmworkers and native Americans, and the high number of hazardous occupations like mining, logging, and farming, compound the ills of this section of the United States. Despite these facts, rural America receives a disproportionately small share of the Federal health dollars. It is time for rural America to receive its fair share. A fair share means funding which recognizes the special and unique needs of rural America and means adequate representation in the decisionmaking process.

To help insure rural America receives its fair share in health planning, Senator CLARK and I are introducing a package of amendments to the National Health Planning and Resources Development Act.

The Health Planning Act was designed to combine and revise Federal health planning programs into a single program of State and areawide health planning under title XV of the Public Health Service Act. This act's authorization expires at the end of this fiscal year. Senator Kennedy has introduced a bill,

S. 2410, to extend authorization of the act and to change some aspects of the program.

In general, I support S. 2410 and this package of amendments is meant to build on the proposal.

S. 2140 demonstrates an understanding of some of the present inequities in the federally supported planning program. I would like to strongly endorse his proposal for changing the funding mechanism of HSA's. Greater per capita funding for less populated HSA's recognizes the increased efficiencies of economies of scale—that is, it recognizes that there are certain basic costs in establishing and operating a health systems agency whether the service area includes 3 million or 300,000 people. In addition, this funding proposal acknowledges that the smaller HSA's, which are generally more rural and geographically dispersed, may incur extra costs due to their unique needs, for example, the greater costs for transportation.

I also support the efforts to broaden the representation and educational functions on the various boards established by the act.

However, I must say that S. 2410 does not go far enough to remove the bias against rural areas. The amendments which Senator CLARK and I are introducing go a few steps further in reducing the inequities of the present system. Our amendments focus on providng a fair share of funding, adequate representation, and program administration which considers the special circumstances of rural areas.

As I mentioned, I strongly support the funding proposal of S. 2410. However, I feel that special consideration should be given to HSA's with difficult planning problems posed by medically underserved areas. Therefore, we propose bonus funding be given to HSA's based on the number of persons in medically underserved areas in their service areas.

In any program which directly affects the decisions of local residents and communities, such as this program, it is very important that all affected groups be adequately represented. Moreover, a special attempt should be made to receive input from groups traditionally dfficult to reach or excluded, such as minorities and rural residents. Therefore, we have included a series of amendments which provide for greater consumer and rural representation on all levels.

I would like to concentrate on one of these provisions—the encouragement of subarea councils in HSA's covering large land areas. At present, the act authorizes but provides no funds for subarea councils. These subarea councils expand participation through location in different places in the HSA. A subarea council is especially important because it allows for input by various residents who previously may have found the location of the Agency inaccessible. This is definitely true for rural residents.

I would like to discuss some examples of the present problems. Montana has a single HSA for the whole State, 145,000 square miles, yet it receives approximately the same funding as nearby Montgomery County which encompasses only 495 square miles. Similarly, Mississippi with only one HSA is 50 times larger than the HSA in Oakland, Calif., but both have the same size budget. Another example is that the State of Vermont covering almost 10,000 square miles is 200 times the size of Hudson County, N.J. Yet both have one HSA and Hudson County has a budget six times the sze of Vermont's health planning budget. I think it would be fair to say that it costs more to establish and effectively run a HSA with large geographic size than with a single county or city. In fact, transportation costs alone make a significant difference.

For example, in Wyoming, a whole State HSA, staff and board members of the HSA must use air travel as a primary means to conduct business and consequently uses a large portion of their budget merely for these transportation costs.

Therefore, not only does a large geographic size mean less accessibility for the people who might want to participate in the planning process, but it also means higher costs for the HSA to provide subarea councils because they do not have adequate funds. Because of this situation, those in geographically isolated areas—mostly the rural residents—are totally left out of the decisionmaking process.

Therefore, we suggest a grant program for assisting in the establishment, development and support of the subarea councils. The funds appropriated would be divided on the basis of HSA geographic size with flexibility to take into account other geographical barriers, such as mountain ranges. We think that such a program would allow for much greater participation in the planning process and consequently better health planning.

Finally, we believe that the administration of the program through guidelines and plans must allow for the unique characteristics in certain areas of the country, such as rural America. Unfortunately we saw in this past year a total disregard for the special needs of rural areas when HEW published their first set of guidelines on hospitals. It was only after 55,000 letters from all across the country, and cajoling from Members of Congress that HEW became sensitive to the problem. Therefore, to insure that such a situation will not be repeated and to sensitize HEW to rural America, we propose an amendment which would require the Secretary of HEW to include separate guidelines for rural areas when it was determined that the needs of the rural areas are not adequately addressed by national guidelines.

These amendments have been developed in response to the concern of many involved in rural health care. We believe that the passage of these will better orient health planning to the needs of rural America. I am sure that the Human Resources Committee and the Senate will give these amendments full consideration.

By Mr. DOLE:

S. 2488. A bill to amend the Internal Revenue Code of 1954 to allow small businesses and certain farming operations to claim a credit against income tax in lieu of a deduciton for social security taxes paid by such businesses and farming operations; to the Committee on Finance.

SOCIAL SECURITY TAX CREDITS FOR SMALL BUSINESSES AND FARMS

Mr. DOLE. Mr. President, the Congress in the recently enacted Social Security Financing Amendments of 1977 has inflicted $227 billion tax increase upon the American people. Because the new taxes impose a serious threat to small businesses and small farms, I am introducing today legislation to provide tax relief for these enterprises.

TAX BURDEN

There is no question that the social security trust fund needs shoring up. However, the bill passed by the Congress is likely to force many Americans out of business. An increase in the employer portion of the payroll tax will place an upward pressure on prices. Since many small businesses are only marginally operating, an increase in price will reduce their ability to compete with larger firms.

Mr. President, the increase in social security taxes is likey to increase unemployment. Many small businessmen have told me that they will be unable to hire new workers because of the new expense involved.

TAX CREDIT

Under current law, an employer may take as a current deduction, the amount of social security taxes paid. My proposal provides a tax credit to small businesses and small farming operations equal to 40 percent of the social security employer tax liability in order to qualify for the credit, the small business or farming operation must have gross income of less than $500,000 per year.

Mr. President, the American public is disgruntled over the new social security tax increase. The social security system has experienced financial difficulty. But, unless we take action, the system will face a more severe problem and that is the loss of confidence by the American people. The Congress can avoid this dilemma by taking necessary steps to relieve the tax burden we have imposed upon small business.

By Mr. RIBICOFF (for himself, Mr. ABOUREZK, Mr. PERCY, Mr. JAVITS, Mr. MATHIAS, and Mr. NUNN):

S. 2490. A bill to improve administrative agency efficiency reduce delay in administrative agency practice and procedure, and for other purposes; to the Committee on the Judiciary and the

Committee on Governmental Affairs, jointly, by unanimous consent, that when one committee orders the measure reported, the other committee shall then have 45 days to report or be discharged from further consideration thereof.

REGULATORY PROCEDURES REFORM ACT

Mr. RIBICOFF. Mr. President, today I am introducing a bill to remedy the serious delay that now plagues the regulatory process The bill is entitled "The Regulatory Procedures Reform Act."

This legislation is cosponsored by Senator ABOUREZK, chairman of the Subcommittee on Administrative Practice and Procedure, of the Judiciary Committee, and by Senators PERCY, JAVITS, MATHIAS, and NUNN.

In July 1977, the Committee on Governmental Affairs issued a detailed study of delay in the regulatory process as part of its comprehensive study of Federal regulation. The study concluded that delay was a fundamental problem in the regulatory process.

This bill implements the recommendations the study made for legislation to end regulatory delay.

The committee study found that the regulatory process takes far too long to accomplish too little.

It is plagued by inefficiency.

It steers a rudderless course unassisted by plan or priority.

It leads to unnecessary delay which imposes significant costs on Government, consumers, and industry alike.

Those familiar with the regulatory process agree that delay is a very serious problem.

Delay was the most frequently cited major problem of Federal regulation in a committee study of about 1,000 regulatory lawyers. Similarly, 67 percent of the administrative lawyers responding to the committee survey listed delay as one of the top three problems. Only 4 percent of the Federal Trade Commission's own lawyers believe the Commission handles its cases in a timely fashion.

The committee study calculated that the Interstate Commerce Commission takes on the average 1,377 days, almost 4 years, to hear and act on proposed abandonments of rail service. On the average, it takes a regulatory agency over 1½ years to complete each licensing or ratemaking proceeding. Each enforcement action is likely to drag on for over 3 years before the agency makes a final decision.

A recent GAO study found that the three safety standards the Consumer Product Safety Commission has issued to date took an average of 834 days to develop and issue. The Consumer Product Safety Act specifies such proceedings should be completed in 330 days.

Unnecessary delay imposes real economic costs. The committee study concluded that costs directly traceable to regulatory backlog amount at least to tens-of-millions of dollars annually.

Undue delay costs the government added expense by wasting personnel and resources in unproductive ways. It prevents the agency from attacking other pressing problems. It has a demoralizing effect on agency personnel.

Delay causes added expense to private parties trying to do business with the Government. High legal fees account for some of the cost. In 1976, eight major airlines alone expended $2.5 million to retain outside law firms to represent them before just one agency, the Civil Aeronautics Board.

Companies lose money when they cannot undertake new projects because the Government is slow in granting the necessary approval.

Delay hurts the economy generally when continued uncertainty about the nature of the Government's regulatory policies discourages business initiative.

Unnecessary delay in the end costs every member of the public in the form of added costs for goods and services. It increases the risks that the goods the public buys will be a danger to their health or safety.

The committee study found that delay occurs at many stages of the agency process, and for many different reasons. It also found, however, that undue delay is not inevitable. Agencies can take practical steps to make the regulatory process more efficient.

The committee study identified the following agency practices as among the most serious causes of needless delay:

Planning, priority setting, and leadership by top agency management is often inadequate. Too often agencies respond on a case-by-case basis to outside initiative. As a result, the staff and the agency heads spend their time on the wrong issues. Or the agency spreads its resources so thin that nothing can be conducted in an expeditious manner.

Widespread failure of agencies to set and enforce deadlines and follow other good management practices results in needless delays. The committee study found that many agencies do not set timetables for completing action on proceedings. Yet this and other management procedures can reduce delay dramatically. By establishing deadlines and related management procedures, the National Labor Relations Board cut from 116 days to 50 days the median time required to process a case.

Excessive reliance on formal, trial-type hearings is one of the most important causes of delay. Among proceedings which travel the full route of hearing and agency review, informal rulemaking is at least 1½ to 3 times faster than adjudicative proceedings featuring full trial-type proceedings.

The Federal Power Commission found that setting rates by informal rulemaking was over four times faster than setting rates by formal trial-type proceedings.

Even if formal trial-type hearings are necessary, agencies fail to follow procedures that could significantly reduce unnecessary delays. For example, agencies fail to rely as much as they could on written procedures, and to limit unnecessary oral cross-examination. By using a modified procedure which relies more on written presentation than oral trial procedures, the Interstate Commerce Commission reduced by over 25 percent the time it took to complete one type of proceeding.

Cumbersome review provisions are another major cause of unnecessary delay. They add extra and unnecessary layers of review before agency actions become final. At the Civil Aeronautics Board in 1975, the Board took on the average a year and a half just to issue a final decision in cases before it on appeal. This delay occurred after the case had been fully briefed, and the Board had heard the arguments.

Substantial delay occurs at the prehearing stage.

The committee study calculated that on the average it takes 160 days to complete the prehearing stage in each ratemaking and licensing proceeding. In 1973 the Federal Trade Commission brought an antitrust action against the Exxon Corp. The agency may not be able to complete even the discovery phase of the case until the 1980's.

When a party resists a discovery request the entire progress of the proceeding slows while the agency enforces the discovery. It now takes the Federal Trade Commission an average of 178 days after issuance of a subpena to secure a court order upholding its validity.

The bill carries out the specific proposals the committee study makes for reducing delay at each stage in the process. At the same time, the bill respects the principles of due process. It preserves for all parties to a proceeding a full opportunity to be heard before the agency acts.

Title I of the bill seeks to reduce delay by encouraging better agency planning and management. Each year the agency will have to establish specific regulatory priorities and describe them in an annual report to Congress. The bill requires an agency to adopt at the start of each proceeding a deadline for completing the proceeding. Each agency will report annually to Congress on how well it has met its deadlines. It will have to describe what it is doing to complete action on the proceedings that have been delayed the longest. Any agency that does not already have a special office to oversee the planning and management of its regulatory activities must create one.

Title II amends portions of the Administrative Procedure Act to reduce the procedural delays that plague all stages of the proceeding.

The Administrative Procedure Act now requires the use of long trial-type proceedings in all formal proceedings. The bill would change this for all formal rulemaking, including ratemaking, all initial licensing proceedings, and all subsidy proceedings where any of these proceedings must now be decided in trial-type proceedings. The bill requires the

use of more informal procedures to decide these cases. In other kinds of formal proceedings the agency could, at its discretion, use the new procedures instead of holding trial-type proceedings. Under the new procedures the agency must give persons a chance to submit briefs and present oral arguments on the relevant facts and law. There would be no formal witnesses at the hearing to present evidence, however, and no cross-examination.

Formal trial-type hearings could subsequently be held only if the initial proceedings highlight the need to resolve specific factual disputes. Before the agency may convene a formal, trial-type hearing, the parties must demonstrate that there is a genuine dispute about the facts. Resolution of the dispute must be essential to the outcome of the proceedings.

Even where formal, trial-type hearings are required, the bill will reduce delay by clarifying the authority of each agency to use expedited procedures. It authorizes the agency to eliminate oral testimony and oral cross-examination, and to rely instead on written testimony. It specifically states that an agency may require the person bringing the action to submit his entire case for the record at the beginning of the proceeding.

The bill specifically charges the administrative law judge with general responsibility for controlling the course of the hearing so it is completed expeditiously. It authorizes him to set deadlines for the completion of the hearing. It encourages him to rule on questions before the conclusion of the hearing when additional, evidentiary hearings would be pointless.

To speed the agency review process, the bill allows each agency to establish intermediate review panels of agency employees. It authorizes the agency to place final authority for a proceeding in these boards, or in the employee who presides over the initial hearing.

At the discovery stage, the bill gives agencies greater subpena authority. It authorizes agencies to seek penalties against anyone who resists a subpena. As in Federal court, it allows an agency to make rulings against the interests of persons who fail to cooperate in discovery requests. It allows an agency, for example, to draw inferences about facts in dispute which are adverse to a party who refuses to comply with discovery requests.

At the same time the bill seeks to assure the objectivity of the agency's final decision. It preserves the principle that the same agency employee who advocates the agency position before the administrative law judge should not also act as a decisionmaker in the proceeding, or consult with those who make the final agency decision. The Administrative Procedure Act now applies these separation of functions principles to all types of formal, on-the-record proceedings except rulemaking and initial licensing. The bill would apply these same principles to formal rulemaking and initial licensing as well.

Title III of the bill gives the agencies greater flexibility in hiring administrative law judges. It will help assure the hiring of those best qualified to assure expeditious hearings.

The bill authorizes an agency to select as an administrative law judge any individual who passes a written Civil Service Commission examination, and has the required number of years of relevant work experience. No longer will the agency's choice be limited to just the three names which the Civil Service Commission places at the top of the list of eligible candidates.

The bill reflects our initial thinking and research on the subject of regulatory delay. Undoubtedly the various agencies, with their differing experiences, will be able to provide us with additional information and ideas to perfect the bill. I hope that each agency will carefully examine its current procedures and needs in light of those proposed in this bill. I hope they will provide us with their comments and suggested changes at an early date.

Mr. PERCY. Mr. President, today I join my distinguished colleague Senator RIBICOFF in sponsoring legislation designed to help alleviate delay in the regulatory process.

Regulatory delay is a fundamental impediment to the timely and effective functioning of this Government. It hurts consumers by denying them the protection and redress they seek and deserve. It hurts businessmen by putting a monkey wrench into their investments and sales plans for the future. It hurts the regulators themselves by making them appear unresponsive and callous. And, it hurts government in general by eroding public confidence in its ability to govern our society.

This legislation stems from the recommendations of the Committee on Governmental Affairs study on Federal regulation. Volume IV, entitled "Delay in the Regulatory Process," attributes agency delays to five key factors. First, agency procedures are excessively judicial—there is far too much emphasis on trial-type procedures. Second, planning, priority setting, and leadership by top agency management are often inadequate. Third, agencies have demonstrated too little effort in setting deadlines for the various stages of proceedings, and too little effort at enforcing deadlines. Fourth, many agencies provide unnecessary and excessive layers of review before actions become final. And, finally, agencies fail to effectively speed up regulatory proceedings.

Such delay in the proper functioning of government exacts a steep toll in economic costs. The committee study determined that costs directly traceable to regulatory delay may range in the tens-of-millions of dollars each year. There are indications that the real figure may be much greater. Resources are wasted and important programs designed to aid the Nation's poor and needy get lost in the shuffle. Mounting costs feed inflation. And all the while, agencies are prevented from confronting the genuine tasks for which they were created as the bureaucracy slowly bogs down.

There are countless illustrations which show just how costly regulatory delay can be to this Nation. I am reminded of a recent example.

Dow U.S.A., the American branch of the Dow Chemical Co. planned to spend $300 to $500 million to build a chemical processing complex in California's Sacramento Valley. The Dow project would create an estimated 1,000 construction jobs and an additional 1,000 permanent jobs.

Dow began preparation for the project in 1974. Federal, State, and local regulatory agencies required 65 permits before approving the project. By January 1977, Dow spent over $4 million and acquired only 4 permits. A Dow official recalls, "We were not turned down on most of these permits—only one out of 65—we simply couldn't get an answer." Finally, in January 1977, Dow had had enough. It simply cancelled its plans: no "maybe in future," no "perhaps we can negotiate further," just cancelled. Economist Eliot Janeway called the cancellation "The 1977 equivalent of the Boston Tea Party."

In seeking to cut down on delay in the Federal regulatory process, however, we do not want to force Government agencies to act so hastily as to violate legitimate due process rights of persons or businesses affected by agency decisions. Nor should we encourage too-hasty decisionmaking. Finding an appropriate length for very different kinds of regulatory proceedings requires a delicate balancing of these important considerations.

This legislation approaches that delicate balance through well-conceived proposals for reform. It would prevent the excessive delay that characterizes so many decisionmaking aspects. It would force agencies to focus on better planning and management by requiring them to establish priorities and reasonable deadlines for proceedings. It would help reduce the procedural delays that slow all stages of agency proceedings. And it would direct judges and agency officials to act expeditiously on hearings and rulemaking matters.

Mr. President, the purposes of this bill are part and parcel of the goal of regulatory reform. Together with S. 600, the Regulatory Reform Act introduced by Majority Leader ROBERT BYRD, Senator RIBICOFF and myself, it will redirect the Federal bureaucracy toward the tasks it should rightfully consider.

I commend the staff of the Governmental Affairs Committee that assisted in writing the study "Delay in the Regulatory Process" for their superlative work. They have pinpointed the primary causes of delay in the Federal bureaucracy and offered useful recommendations for reform.

I believe that it is time the Congress reversed the present trend toward an overgoverned society. Let us, instead, make Government operate the way Congress originally planned. To this end, I am pleased to join in introducing this important measure.

Mr. ABOUREZK. Mr. President, as chairman of the Subcommittee on Administrative Practice and Procedure I am delighted to join the distinguished chairman of the Governmental Affairs Committee in cosponsoring this bill to eliminate delay in the regulatory process. The subcommittee has legislative jurisdiction over amendments to the Administrative Procedure Act and title II of this bill sets forth some of the most innovative amendments to the APA ever proposed.

Two years ago, the Senate authorized the Governmental Affairs Committee to conduct a comprehensive study of the Federal regulatory process. That review was recently concluded and the results published in a six-volume report entitled "Study on Federal Regulation." The first five volumes of the study are currently available. They cover "The Regulatory Agencies," "Public Participation in Regulatory Agency Proceedings," "Delay in the Regulatory Process" and "Regulatory Organization and Coordination." The remaining volume, "The Substantive Framework for Agency Regulations," should be completed shortly. I commend the Governmental Affairs Committee study as perhaps the most scholarly, responsible, and indepth study of the regulatory process ever undertaken. This study will no doubt be the standard reference work on the subject of regulatory reform for years to come and will form the basis for numerous agency and legislative initiatives. I commend Chairman RIBICOFF for the high quality of these reports.

Let me briefly describe the major findings and recommendations of volume IV of the study, "Delay in the Regulatory Process." Recognizing that some delay is both necessary and proper in administrative proceedings, the study attempts to distinguish between "delay occasioned by careful consideration and delay that results from inertia, inability or dalliance."

In a survey of about a thousand lawyers who regularly practice before the eight major commissions, the committee found that "undue delay" was the most frequently cited major problem of Federal regulation. In the case of four agencies—the Civil Aeronautic Board, the Federal Communications Commission, the Federal Power Commission, and the Interstate Commerce Commission—undue delay was cited as a problem by 75 percent or more of those responding. At the Federal Trade Commission, only 4 percent of its own lawyers believe that cases are handled in a timely fashion.

Statistics compiled by the Administrative Conference of the United States show that administrative agency proceedings average more than 19 months for licensing, 21 months for ratemaking, and over 36 months for enforcement actions. In licensing and ratemaking proceedings, it takes an average of over 5 months for matters to even reach the hearing stage. For enforcement actions, it averages well over a year before a hearing is even convened.

Agency review of the decisions of administrative law judges in adjudications was also slow. It requires an average of 1,377 days for the ICC to review and act on rail abandonments, and an average of 1,315 days for the CAB to review and act on merger cases.

What these figures indicate is that as time consuming as rulemaking proceedings are, they are clearly faster than adjudicatory proceedings at most of the agencies. At two agencies, rulemaking was more than twice as fast as adjudications. At the FPC, setting area rates by rulemaking for gas sold by independent producers to pipelines was more than four times as fast as setting them by adjudication.

The cost of this delay is staggering. In one year—1975—A.T. & T. paid more than $2 million to lawyers for FCC work involving several major rate matters. A 7-year licensing process at the FPC cost one power company about $300,000 in legal fees to a single firm. In 1976 eight major airlines gave $2.5 million to eight law firms for CAB work. In fact in this CAB work a single month of needless delay costs almost $200,000.

I will not assign the blame for undue delay to any one group of individuals involved in the administrative process. The responsibility rests with all the agency commissioners, agency staff attorneys, the firms regulated by the agency, their lawyers, and the administrative law judges. I am certainly aware that some agencies use delay as a way to avoid taking positions on controversial subjects. I am equally aware that every day of delay in an FTC proceeding, for example, is profitable both to the attorneys representing the respondent and to the respondent.

I also know that one person's delay is another's due process. But I believe it is generally in the interest of the public, the agencies, the regulated parties, and all the attorneys involved to expedite agency proceedings in any way which is consistent with the public interest and constitutional due process requirements.

The principal recommendations of the study to remedy undue delay are for agencies to resolve as many issues as possible through informal rulemaking procedures and to eliminate as many trial-type adjudications as possible. The purpose of these proposals is to reverse the excessive reliance on adjudicatory proceedings during the administrative process. In the words of the Study,

> Agencies must show greater ingenuity and resourcefulness in adopting new forms of proceedings which escape the rigid bounds of traditional formal proceedings.

The distinction in the Administrative Procedure Act between the procedural requirements in adjudications and in rulemakings makes little sense according to the committee.

The APA presently provides that in an adjudication "a party is entitled to present his case or defense by oral or documentary evidence, to submit rebuttal evidence, and to conduct such cross-examination as may be required for a full and true disclosure of the facts." In contrast, no oral fact finding is now required in informal rulemakings under the APA.

However, contrary to the theoretical basis for this distinction, policy issues can arise in the course of an adjudication and specific factual issues can arise in a rulemaking. There is no more reason to assume that oral trials are always necessary in adjudications than there is to assume that oral trials are never necessary in rulemakings.

Indeed, on a number of occasions courts too have stated that the APA's distinction between adjudication and rulemaking is irrelevant to determining whether agency decisions should be upheld, *Appalachian Power Co.* v. *EPA*, 477 F. 2d 495, 500 (4th Cir. 1973); *City of Chicago* v. *FPC*, 458 F. 2d 731, 739 (D.C. Cir. 1971). The point is that the focus should not be on a metaphysical analysis of whether or not a decision must be made by adjudication or by rulemaking. What is important is whether the procedures used are fair in a particular case.

As a general proposition the study argues that an oral trial is necessary only to resolve specific factual issues on which the case may turn. Similarly oral direct and cross examination should only be allowed when the perceptions, memory, or honesty of the witness is at issue. Except under these two circumstances, the study concludes agencies should not be obligated to hold oral hearings nor should they permit oral direct or cross examination of witnesses.

Several agencies have already implemented this basic recommendations of the study. As some of you may know, about a year ago the Food and Drug Administration adopted rules of practice under the APA which substantially reduce the number and extent of oral trials. These rules were adopted on November 23, 1976 and appear as subpart B of part 2 of FDA's rules.

Under these new rules "a request for a formal evidentiary public hearing shall be granted" only if there is a "genuine and substantial issue of fact for resolution at a hearing" and "the factual issue is capable of being resolved by available and specifically identified reliable evidence" and the factual issue is dispositive of the agency action to result from the trial. 21 CFR 2.113(b).

If an oral trial is granted the FDA rules provide that "evidence * * * shall be developed to the maximum feasible extent through written submissions." 21 CFR 2.154(b). Finally the rules provide that "oral cross-examination of witnesses shall be permitted only upon a showing that cross-examination requested is necessary because alternative means of developing relevant evidentiary facts are insufficient." 21 CFR 1.154(b)(1)(ii).

To date there has been no court challenge and the FDA does not expect there to be one. Although their regulations have been in effect only a short while, I understand that most of the direct examination of witnesses is now in written form and the amount of oral cross-examination of witnesses has been substantially reduced.

As I mentioned, the new FDA rules were issued under the authority of the existing provisions of the Administrative Procedure Act. The Administrative Practice and Procedure Subcommittee commissioned a study of whether there is, in fact, sufficient authority under the APA for the new FDA regulations. Our study concludes that there is ample authority under the existing APA provisions to restrict oral trials and oral cross-examination as was done by the FDA.

Yet, no other Federal agency has shown as much interest as the FDA in streamlining its adjudicatory procedures. The question then becomes how to encourage agencies to utilize the authority they already have to streamline their procedures.

Congress can always use oversight hearings, letters, and other pressures to encourage agencies to review and revise their procedures. Failing that, Congress can amend the APA to make it absolutely clear that agencies have authority and must streamline their adjudicatory proceedings.

There are a number of areas where amendments to the APA may be particularly useful.

First, agencies should be required to set firm time schedules and deadlines for the proceedings they conduct.

Second, the power of agencies to limit oral direct and cross-examination should be made clear.

Third, the APA should directly authorize administrative law judges to grant summary judgment motions.

Fourth, all agencies should be given subpena power to expedite discovery.

Fifth, all agencies should be given power to enforce their subpenas in court and to impose civil fines in cases where a subpenaed party fails to comply with a subpena.

Sixth, as a further penalty for failing to comply with subpenas, agency power to strike pleadings and motions or draw adverse inferences should be strengthened.

Seventh and finally, all agencies should be authorized to establish appeal boards. Agencies could then limit appeals on a certiorari type basis.

This bill attempts to clarify the APA on these points. I am sure that the bill can be improved by agency and public comments. But, it is an excellent draft to begin a dialog on the important subject of undue regulatory delay.

The alienation which is caused by Government inefficiency hurts all of us. Those who oppose reforms designed to improve Government efficiency have no right later to criticize the Government for its inefficiency. We all have a responsibility to attempt to remedy the delay which has become the common denominator of Government regulatory proceedings.

Again, I commend Senator RIBICOFF and his committee for their initiative on regulatory reform. It is my understanding that—by unanimous consent—this bill will be jointly referred to the Governmental Affairs and Judiciary Committees.

Mr. RIBICOFF. Mr. President, I ask unanimous consent that an annotated version of the bill showing specifically where the bill amends existing law be printed in the RECORD, together with a section-by-section analysis of the bill.

There being no objection, the bill and analysis were ordered to be printed in the RECORD, as follows:

THE REGULATORY PROCEDURES REFORM ACT

TITLE I—PLANNING AND MANAGEMENT

OFFICE OF PLANNING AND MANAGEMENT

SEC. 101. (a) Each agency shall establish or designate a single office or other organizational unit whose principal function shall be to exercise, under the direct guidance and supervision of the head of the agency, primary responsibility for the planning and management of the regulatory activities of the agency. The office shall be headed by an individual compensated at the rate of GS–18 or above.

(b) Each agency shall, through the office established by subsection (a) of this section—

(1) establish the deadlines required by section 102(a) of this Act in accordance with such criteria that the agency shall adopt;

(2) assure agency compliance with such deadlines;

(3) monitor the activities of the agency to assure prompt action on all regulatory matters;

(4) establish the regulatory priorities of the agency after consultation with interested members of the public;

(5) monitor the regulatory activities of the agency to assure the fullest and most efficient use of its resources possible consistent with the priorities of the agency;

(6) monitor the regulatory activities of the agency to assure that the agency employs, to the greatest extent possible, rulemaking or other procedures that will enable the agency to achieve its goals in the most efficient and expeditious manner possible;

(7) promote the use of any other appropriate means, including providing appropriate incentives to all participants, which will help avoid unnecessary delay in the regulatory process;

(8) review on a periodic basis existing rules and regulations of the agency in order to eliminate or amend any rules or regulations which are conflicting, inconsistent, redundant or inactive; and

(9) comply with the provisions of section 103 of this Act.

ESTABLISHMENT OF DEADLINES

SEC. 102. (a)(1) Whenever an agency provides notice of a proposed action on a matter pursuant to sections 553(b) or 554(b) of title 5, United States Code, the agency shall include in such notice an announcement of the date by which it intends to complete final agency action on the matter. Whenever the agency announcement indicates that the proceeding relating to such matter will require more than one year to complete, the agency shall also indicate the date by which it intends to complete each major portion of that proceeding. In carrying out the requirements of this subsection, the agency shall select those dates for completing agency action which will assure the most expeditious consideration of the matter possible, consistent with the interests of fairness and other agency priorities.

(2) The requirements of this subsection shall not apply to any matter in which the agency intends to complete action within three months of providing notice of the proposed action.

(b) In the event an agency fails to complete action on a matter by the date announced, or, in the case of a matter described in subsection (a)(2) of this section, an agency fails to complete action within three months of providing notice of such proposed action, the agency shall provide announcement of the new date by which the agency intends to complete action on such matter, if the expected delay in completing action exceeds 30 days.

(c) Each agency shall by rule indicate any other category of significant agency action which the agency determines should be subject to the provisions of this section in whole or in part.

ANNUAL REPORT ON REGULATORY ACTIVITIES

SEC. 103. (a) Not later than March 1st of each year each agency shall prepare and submit to the Congress an annual report on the regulatory activities of the agency in the prior calendar year. The report shall include with respect to proceedings in which the agency provided notice of the proposed action pursuant to sections 553(b) or 554(b) of title 5, United States Code—

(1) the number of such proceedings initiated by the agency during the prior year;

(2) the number of such proceedings concluded by the agency during the prior year;

(3) the number of instances during the prior year in which the agency failed to conclude a proceeding by the deadline originally announced for the completion of such proceeding, and an explanation of the reasons therefor; and

(4) an analysis of the 10 per cent of all pending proceedings which have been under consideration by the agency for the longest period of time, including an identification of each such proceeding, and the subject matter involved; the reason for the length of the proceedings; and what steps the agency has taken to expedite a conclusion of the proceedings.

Each agency shall arrange the information required by this subsection by categories according to the type of procedures involved. Each agency shall adopt only such categories as the Administrative Conference of the United States approves.

(b) The annual report required by this section shall also describe, with specificity—

(1) the regulatory priorities and goals of the agency for the succeeding 12 months, including the specific areas where substantive regulations or generic standards should be developed, where enforcement efforts should be pursued, and where other action is needed, together with the steps it has taken or intends to take, or procedures it has adopted or intends to adopt, to assure that the agency achieves such priorities and goals within the time proposed;

(2) the extent to which the regulatory activities of the agency in the prior year conformed with the previously announced priorities and goals of the agency;

(3) any changes the agency has made in the prior year in its organization, management, or procedures to expedite its regulatory actions; and

(4) any recommendations the agency has for legislative changes to improve the ability

of the agency to act in an expeditious manner.

ADMINISTRATIVE CONFERENCE ANALYSIS

SEC. 104. (a) The Administrative Conference of the United States shall review the annual reports submitted to the Congress by each agency pursuant to section 103 of this Act and shall, not later than June 1 of each year, prepare and submit to the Congress an analysis of such reports, together with any recommendations the Conference deems appropriate.

(b) The Administrative Conference of the United States shall study possible means for providing additional incentives to all participants in proceedings conducted pursuant to sections 553 or 554 of title 5, United States Code, to expedite the conduct of such proceedings. Within one year after enactment of this Act, and at such subsequent occasions as the Administrative Conference of the United States determines appropriate, the Conference shall report to the Congress on the initial findings and conclusions of such study, together with such recommendations as the Conference may have for legislation or amendments in agency procedures or practices.

(c) The Administrative Conference of the United States is authorized to examine such records in the possession of agencies, and require the agencies to provide to the Conference such records, information, and analysis as the Conference deems necessary to carry out its functions under this Act.

(d) There are authorized to be appropriated such sums as the Administrative Conference of the United States may require to carry out its functions under this Act.

APPLICABILITY AND DEFINITIONS

SEC. 105. (a) This title shall apply to each agency responsible for a regulatory function.

(b) For the purpose of this title, the term—

(1) "regulatory function" includes each function which involves protection of the public interest and the determination of rights, privileges, and obligations of private persons through rulemaking or adjudicative proceedings conducted pursuant to section 553 or section 554 of title 5, United States Code, or through similar proceedings conducted pursuant to other law, except that it does not include a military or foreign affairs function of the United States; and

(2) "agency" includes each authority as defined by section 551(1) of title 5, United States Code.

TITLE II—ADMINISTRATIVE PROCEDURE

FORMAL HEARINGS

SEC. 201. Amend section 554 of title 5, United States Code to read as follows: (Deletions are enclosed in brackets and additions are set in italic.)

SEC. 554 [Adjudications] *Proceedings Determined in the Record After an Agency Hearing*

(a) *Applicability*—This section applies, according to the provisions thereof, in every case [of adjudication] required by [statute] *law* to be determined on the record after opportunity for an agency hearing, except to the extent that there is involved—

(1) a matter subject to a subsequent trial of the law and to facts de novo in a court;

(2) the selection or tenure of an employee, except a hearing examiner appointed under section 3105 of this title;

(3) proceedings in which decisions rest solely on inspections, tests, or elections;

(4) the conduct of military or foreign affairs functions;

(5) cases in which an agency is acting as an agent for a court; or

(6) the certification of worker representatives.

[556b] This subchapter does not supersede the [conduct of] *manner in which* specified classes of proceedings *are conducted*, in whole or in part, by or before boards or other employees specifically provided [for] *by*, or designated under, statute.

(b) *Notification; Initial Submissions*—Persons entitled to notice of an agency hearing shall be timely informed of—

(1) the time, place, and nature of the hearings;

(2) the legal authority and jurisdiction under which the hearing is to be held; and

(3) the matters of fact and law asserted. When private persons are the moving parties, other parties to the proceeding shall give prompt notice of issues controverted in fact or law; and in other instances agencies may by rule require responsive pleadings. *Each agency shall, to the extent practicable, require the moving party, including the agency, to submit in written form at the time the proceeding is initiated all the facts and arguments upon which that party proposes to rely.* In fixing the time and place for hearings, due regard shall be had for the convenience and necessity of the parties or their representatives.

[556b] (c) *Authority of Presiding Employee—(1)* There shall preside at [the taking of evidence] *hearings conducted pursuant to this section a presiding employee. For purposes of this section, and section 556 and 557 of this title, the presiding employee may be—*

(A) the agency;

(B) one or more members of the body which comprises the agency;

(C) one or more *administrative law judges* [hearing examiners] appointed under section 3105 of this title; *or*

(D) *in the case of a hearing conducted pursuant to subsection (e) of this section, a board of appropriate agency employees described in section 557 of this title.*

[554d] The employee who presides *over a hearing held pursuant to this section* [at the reception of evidence pursuant to section 556 of this title] shall *comply with the requirements of section 557* [make the recommended decision or initial decision required by section 557 of this title] unless he becomes unavailable to the agency *in which case another employee qualified to preside at the hearings pursuant to this subsection shall preside.*

[556b] The functions of presiding employees participating in decisions in accordance with section 557 of this title, shall be conducted in an impartial manner. A presiding or participating employee may at any time disqualify himself. On the filing in good faith of a timely and sufficient affidavit of personal bias or other disqualification of a presiding or participating employee, the agency shall determine the matter as a part of the record and decision in the case.

[556c](2) Subject to published rules of the agency and within its powers, employees presiding at hearings conducted pursuant to this section may—

(A) administer oaths and affirmations;

(B) issue subpenas [authorized by law, rule on offers of proof and receive relevant evidence];

(C) take depositions or have depositions taken when the ends of justice would be served;

(D) regulate the course of the hearing;

(E) hold conferences for the settlement or simplification of the issues by consent of the parties;

(F) dispose of procedural requests or similar matters;

(G) make or recommend decisions or findings in accordance with section 557 of this title; and

(H) take other action authorized by agency rule consistent with this subchapter.

(3) The employee presiding over a hearing pursuant to this section shall act to—

(A) assure that discovery, and all other prehearing and hearing stages of the proceeding, are completed in an expeditious manner;

(B) provide a record of the proceeding that contains in a concise form only those matters that are relevant and material to a decision in the case, and not unduly repetitious;

(C) establish whenever appropriate deadlines for the completion of the hearing, or any other portion of the proceeding;

(D) rule on questions of fact or law in such a manner as to define the issues in as narrow and specific a manner as possible; and

(E) take any other appropriate action authorized by this subchapter or any other applicable law designed to assure prompt agency disposition of the matter.

(d) *Separation of Functions—(1)* [The employee who presides at the reception of evidence pursuant to section 556 of this title shall make the recommended decision or initial decision required by section 557 of this title unless he becomes unavailable to the agency.] Except to the extent required for the disposition of ex parte matters as authorized by law, [such an employee may not] *neither the employee who presides over a proceeding conducted in accordance with this section, nor any person participating or advising in any decision or review of a decision pursuant to section 557 of this title, including any member of an employee board, or any other responsible employee, may*

(A) consult a person or party on a fact in issue, unless on notice and opportunity for all parties to participate; or

(B) be responsible to or subject to the supervision or direction of an employee or agent engaged in the performance of investigative or [prosecuting] *litigating* functions for an agency.

(2) An employee or agent engaged in the performance of investigative or [prosecuting] *litigating* functions for an agency in a case may not, in that or a factually related case, participate or advise in [the decision, recommended decision or agency review] *making or reviewing any agency decision* pursuant to section 557 of this title, except as a *participant* [witness] or counsel in public proceedings.

(3) For purposes of this subsection, the term "litigating function" does not include participation in a proceeding for judicial review of agency action.

(4) Nothing in paragraph 2 of of this subsection shall apply [this subsection does not apply (A) in determining applications for initial licenses, (B) to proceedings involving the validity or application of rates, facilities, or practices of public utilities or carriers; or (C)] to the agency or *any member* [a member or members] of the body comprising the agency.

(e) General Hearing Process—(1) This subsection applies to any rulemaking or licensing proceeding subject to subsection (a) of this section, other than a proceeding to withdraw, suspend, revoke, or annul a license, and to any proceeding subject to subsection (a) of this section to determine initial claims for subsidies or other benefits.

(2) This subsection shall also apply to any other agency proceeding subject to subsection (a) of this section which the agency determines should be conducted in accordance with the provisions of this subsection. In determining which such proceedings shall be conducted pursuant to this subsection, the agency shall consider, among

other factors, the extent to which the decision is likely to depend on the resolution of genuine and substantial disputes of facts; the number of persons interested in participating in the proceedings; and whether conducting the proceeding solely in accordance with subsection (f) of this section is essential to a full and fair disclosure of all the facts.

(3) In any proceeding subject to this subsection, the agency shall conduct a hearing to afford parties an opportunity to submit for the record written data, views, or arguments and, at the request of any party in the proceeding, an opportunity for oral argument with respect to such written submissions. To the extent authorized by section 555 of this title or other law, the hearing shall be preceded by such discovery procedures as the presiding employee determines necessary. At the conclusion of such hearing the presiding employee shall, subject to the provisions of section 557 of this title, rule on all questions of law and fact and make all related findings, except to the extent that a ruling or finding is dependent upon the resolution of a factual dispute subject to paragraph 4 of this subsection. For purposes of section 557 of this title any rulings and related findings made in a proceeding conducted pursuant to this subsection, together with any additional rulings or findings in the proceeding made pursuant to subsection (f), shall be reviewable at the same time, and as part of the same record.

(4) At the conclusion of any hearing held pursuant to paragraph 3 of this subsection, the presiding employee shall designate any disputed question of fact, together with any remaining questions of law, for resolution in an adjudicative hearing conducted in accordance with subsection (f) of this section, except that the presiding employee may make such a designation only if he determines—

(A) there is a genuine and substantial dispute of fact which can be resolved with sufficient accuracy only by the introduction of reliable and specifically identified evidence in an adjudicative hearing) and

(B) the decision of the agency in the case is likely to depend on the resolution of such dispute.

In making any such finding the presiding employee shall, in writing, designate the specific facts which are in genuine and substantial dispute, and the reason why the decision of the agency is likely to depend on the resolution of such facts.

(f) Adjudicative Hearings—(1) This subsection shall apply to all proceedings subject to this section except proceedings or portions of such proceedings conducted pursuant to subsection (e) of this section.

[554c] (2) The agency shall give all interested parties opportunity for—

(A) the submission and consideration of facts, arguments, offers of settlement, or proposals of adjustment when time, the nature of the proceeding, and the public interest permit; and

(B) to the extent that the parties are unable so to determine a controversy by consent, *an adjudicative* hearing and decision on notice and in accordance with *this section and* sections 556 and 557 of this title.

[556e](g) *Record as Basis of Decision*—The transcript of testimoy and exhibits, together with all papers and requests filed in the proceeding *conducted pursuant to this section* constitutes the exclusive record for decision in accordance with section 557 of this title and, on payment of lawfully prescribed costs, shall be made available to the parties. When an agency decision rests on official notice of a material fact not appearing [in the evidence] in the record, a party is entitled, on timely request, to an opportunity to show the contrary.

SUBPENA POWER AND OTHER ANCILLARY MATTERS

SEC. 202. Amend section 555 of title 5, United States Code, to read as follows: (Deletions are enclosed in brackets and additions are set in italic.)

SEC. 555. Ancillary Matters

(a) This section applies, according to the provisions thereof, except as otherwise provided by this subchapter.

(b) A person compelled to appear in person before an agency or representative thereof is entitled to be accompanied, represented, and advised by counsel or, if permitted by the agency, by other qualified representative. A party is entitled to appear in person or by or with counsel or other duly qualified representative in an agency proceeding. So far as the orderly conduct of public business permits, an interested person may appear before an agency or its responsible employees for the presentation, adjustment, or determination of an issue, request, or controversy in a proceeding, whether interlocutory, summary, or otherwise, or in connection with an agency function. *Each agency may prohibit any individual from appearing before the agency or its responsible employees whenever such individual refuses to adhere to reasonable standards of orderly and ethical conduct or engages in a continued use of dilatory tactics.* With due regard for the convenience and necessity of the parties or their representatives and within a reasonable time, each agency shall proceed to conclude a matter presented to it. This subsection does not grant or deny a person who is not a lawyer the right to appear for or represent others before an agency or in an agency proceeding.

(c) Process, requirement of a report, inspection, or other investigative act or demand may not be issued, made, or enforced except as authorized by law. A person compelled to submit data or evidence is entitled to retain or, on payment of lawfully prescribed costs, procure a copy or transcript thereof, except that in a nonpublic investigatory proceeding the witness may for good cause be limited to inspection of the official transcript of his testimony.

(d) In any proceeding subject to section 554 of this title the agency is authorized to require by subpena any person to appear and testify or to appear and produce books, papers, documents, or tangible things, or both, at a hearing or deposition at any designated place. Any subpenas authorized by law shall be issued to a party on request and, when required by rules of procedure, on a statement or showing of general relevance and reasonable scope of the evidence sought. On contest, the court shall sustain the subpena or similar process or demand to the extent that it is found to be in accordance with law. *Each agency shall designate by rule the officers, who shall include the presiding employee in all proceedings subject to section 554 of this title, authorized to sign and issue subpenas.*

(e)(1) In case of failure or refusal of any person to obey a subpena, the agency may invoke the aid of the district court of the United States for any district in which such person is found or resides or transacts business to enforce the subpena. [555d] In a proceeding for enforcement *of a subpena or similar process or demand found to be in accordance with law,* the court shall issue an order requiring the appearance of the witness or the production of the evidence or data within a reasonable time under penalty of punishment for contempt in case of contumacious failure to comply.

(2) Any person who fails to comply with any subpena or similar process or demand issued by the agency, where such failure continues for 30 days after service by the agency on such person of a notice of such default, shall be liable to the United States for a civil penalty of not more than $5,000, as the court may determine, for each day that such failure continues after such 30th day. The amount of such civil penalty shall be payable into the Treasury of the United States, and shall be recoverable in a civil action brought in the district court of the United States for any district in which such person is found or resides or transacts business.

(3) In lieu of any action brought pursuant to paragraph (1) or paragraph (2) of this subsection, or in addition to any such action, the employee presiding at a hearing conducted pursuant to section 554 may issue an order whenever a person fails to comply with an agency subpena or similar process or demand—

(A) refusing to allow such person to support or oppose designated claims or defenses, or prohibiting him from introducing designated matters into the record;

(B) inferring that the testimony, documents, or evidence concerning which the subpena was issued would have been adverse to such person; or

(C) striking out pleadings or motions or parts thereof, or staying further proceedings until the order is obeyed, or dismissing the action or any part thereof, or rendering a decision by default against such person.

(f) The authority granted by subsections (d) and (e) of this section is in addition to, and not in limitation of, any other statutory authority for the issuance of agency subpenas or the judicial enforcement thereof.

[555e] (g) Prompt notice shall be given of the denial in whole or in part of a written application, petition, or other request of an interested person made in connection with any agency proceeding. Except in affirming a prior denial or when the denial is self-explanatory, the notice shall be accompanied by a brief statement of the grounds for denial.

[554e] (h) The agency, with like effect as in the case of other orders, and in its sound discretion, may issue a declaratory order to terminate a controversy or remove uncertainty.

(i) Each agency shall compile and maintain in a file a record of significant agency actions likely to be of particular interest to the agency or other persons participating in subsequent agency proceedings, together with a detailed subject matter index to such file. The agency shall include in such file motions, briefs, and other legal arguments or pleadings filed with the agency relating to each such action and the action the agency took in connection with such filings. The agency shall make the file and index required by this subsection readily accessible to the public, and shall take any additional steps the agency deems appropriate to provide for the dissemination of such material to interested members of the public.

THE CONDUCT OF TRIAL-TYPE PROCEEDINGS

SEC. 203. Amend section 556 of title 5, United States Code, to read as follows: (Deletions are enclosed in brackets and additions are set in italic.)

556. *Adjudicative* hearings; presiding employees; power and duties; burden of proof; evidence; [record as basis of decision.]

(a) This section applies, according to the provisions thereof, to *adjudicative* hearings required by [section 553 or 554] *section 554 (f)* of this title to be conducted in accordance with this section.

[556(c)](b) Subject to published rules of the agency and within its powers, employees presiding at *adjudicative* hearings may rule on offers of proof, receive relevant evidence, *and conduct such cross-examina-*

tion as the presiding employee determines appropriate.

[556(d)] (c) Except as otherwise provided by statute, the proponent of a rule or order has the burden of proof. Any oral or documentary evidence may be received, but the agency as a matter of policy shall provide for the exclusion of irrelevant, immaterial or unduly repetitious evidence. A sanction may not be imposed or rule or order issued except on consideration of the whole record or those parts thereof cited by a party and supported by and in accordance with the reliable, probative, and substantial evidence. A party is entitled to present his case or defense, [by oral or documentary evidence] to submit rebuttal evidence, and to conduct such cross-examination as may be required for a full and true disclosure of the facts. [In rulemaking or determining claims for money or benefits or applications for initial licenses an agency may, where a party will not be prejudiced thereby, adopt procedures for the submission of all or part of the evidence in written form.] *An agency shall by rule authorize the presiding employee to require the submission of evidence in written form, or the conduct of cross-examination in written form, unless oral presentation of testimony or oral cross-examination is required for a full and true disclosure of relevant evidentiary facts and a denial of such opportunity for oral proceedings would materially prejudice such party. Upon the motion of any party, the presiding employee may, prior to the completion of the adjudicative hearing, issue a decision in the case when there is no genuine and substantial dispute as to any material fact and the moving party is entitled to a judgment as a matter of law.*

AGENCY REVIEW OF DECISIONS

SEC. 204. Amend section 557 of title 5, United States Code, to read as follows: (Deletions are enclosed in brackets and additions are set in italic.)

557. Initial decisions; conclusiveness; review by agency; submission by parties; contents of decisions; record

(a) This section applies, according to the provisions thereof, when a hearing is required to be conducted in accordance with section [556] *554* of this title.

(b) *(1)* When the agency did not preside at the *hearing* [reception of the evidence] the presiding employee [or, in cases not subject to section 554(d) of this title, an employee qualified to preside at hearings pursuant to section 556 of this title,] shall initially decide the case unless the agency requires, either in specific cases or by general rule, the entire record to be certified to it for decision, *in accordance with paragraph (2) of this subsection.* When the presiding employee makes an initial decision, that decision then becomes the decision of the agency without further proceedings unless there is an appeal to, or review on motion of, the agency within time provided by rule. On appeal from or review of the initial decision, the agency has all the powers which it would have in making the initial decision except as it may limit the issues on notice or by rule.

(2) When the agency makes the decision without having presided at the [reception of the evidence,] *hearing, the agency may require the entire record to be certified to it for decision without an initial decision by the presiding employee. In any such case,* the presiding employee [or an employee qualified to preside at hearings pursuant to section 556 of this title] shall first recommend a decision, [except that in rulemaking or determining applications for initial license instead thereof the agency may] *or the agency may, except for any portion of a case conducted pursuant to section 554(f) of this title, require the presiding employee to submit the record without a recommended decision, but with such analysis of the record as the agency may specify. Whenever the presiding employee submits the record without an initial or recommended decision, the agency shall* issue a tentative decision or [one of its responsible employees may recommend a decision] *the agency shall designate one of its responsible employees to recommend a decision, except that such tentative or recommended decision* [or this procedure] may be omitted in a case in which the agency finds on the record that due and timely execution of its functions imperatively and unavoidably so requires.

(c) Before a recommended, initial, or tentative decision, or a decision on agency review of the decision of subordinate employees, the parties are entitled to a reasonable opportunity to submit for the consideration of the employees participating in the decisions—

(1) proposed findings and conclusions; or

(2) exceptions to the decisions or recommended decisions of subordinate employees or to tentative agency decisions; and

(3) supporting reasons for the exceptions or proposed findings or conclusions.

The record shall show the ruling on each finding, conclusion or exception presented. All decisions, including initial, recommended, and tentative decisions, are a part of the record and shall include a statement of—

(A) findings and conclusions, and the reasons or basis therefor, on all the material issues of fact, law, or discretion presented on the record; and

(B) the appropriate rule, order, sanction, relief, or denial thereof.

(d)(1) Each agency may establish by rule one or more employee boards to review decisions of presiding employees in accordance with the provisions of this section. Each such board shall be composed of one or more employees of the agency, including any member of the body comprising the agency, any administrative law judge, or any other appropriate agency employee (other than the presiding employee in the proceeding on appeal). Subject to paragraph (2) of this subsection, any agency may provide by rule that—

(A) any decision or category of decisions by the presiding employee shall become final unless reviewed by an employee board or by the agency; and

(B) any decision or any category of decisions made by an employee board on review shall become final unless reviewed by the agency.

Each agency shall specify by rule the circumstances and conditions, if any, under which the agency will entertain and consider appeals from the decision of the employee board or presiding employee. Such rules shall also specify the circumstances and conditions under which the agency shall exclude from the jurisdiction of the employee board responsibility for reviewing a decision or category of decisions.

(2) The agency may exercise its discretionary right to review a decision pursuant to paragraph (1) of this subsection only upon a public finding specifying the particular issues to be reviewed and the reasons requiring agency review of such issues.

(3) Nothing in this subsection shall be construed to supersede—

(A) any provision of law specifically governing in a particular agency the composition and organization of any employee board or the right of any agency members to direct review of decisions, or

(B) any authority otherwise possessed by an agency to delegate the final decision to any agency members or other employees.

[557(d)] *(e)* (1) In any agency proceeding which is subject to subsection (a) of this section, except to the extent required for the disposition of ex parte matters as authorized by law—

(A) no interested person outside the agency shall make or knowlingly cause to be made to any member of the body comprising the agency, administrative law judge, or other employee who is or may reasonably be expected to be involved in the decisional process of the proceeding, an ex parte communication relevant to the merits of the proceeding;

(B) no member of the body comprising the agency, administrative law judge, or other employee who is or may reasonably be expected to be involved in the decisional process of the proceeding, shall make or knowingly cause to be made to any interested person outside the agency an ex parte communication relevant to the merits of the proceeding;

(C) a member of the body comprising the agency, administrative law judge, or other employee who is or may reasonably be expected to be involved in the decisional process of such proceeding who receives, or who makes or knowingly causes to be made, a communication prohibited by this subsection shall place on the public record of the proceeding:

(i) all such written communications;

(ii) memoranda stating the substance of all such oral communications; and

(iii) all written responses, and memoranda stating the substance of all oral responses, to the materials described in clauses (i) and (ii) of this subparagraph;

(D) upon receipt of a communication knowingly made or knowingly caused to be made by a party in violation of this subsection, the agency, administrative law judge, or other employee presiding at the hearing may, to the extent consistent with the interests of justice and the policy of the underlying statutes, require the party to show cause why his claim or interest in the proceeding should not be dismissed, denied, disregarded, or otherwise adversely affected on account of such violation; and

(E) the prohibitions of this subsection shall apply beginning at such time as the agency may designate, but in no case shall they begin to apply later than the time at which a proceeding is noticed for hearing unless the person responsible for the communication has knowledge that it will be noticed, in which case the prohibitions shall apply beginning at the time of his acquisition of such knowledge.

[556d] (2) The agency may, to the extent consistent with the interests of justice and the policy of the underlying statutes administered by the agency, consider a violation of [section 557(d) of this title] *this subsection* sufficient grounds for a decision adverse to a party who has knowingly committed such violation or knowingly caused such violation to occur.

[557(d)(2)] *(3)* This subsection does not constitute authority to withhold information from Congress.

SCOPE OF JUDICIAL REVIEW

SEC. 205. Amend section 706 of title 5, United States Code, to read as follows: (Deletions are enclosed in brackets and additions are set in italic.)

SEC. 706. *(a)* To the extent necessary to decision and when presented, the reviewing court shall decide all relevant questions of law, interpret constitutional and statutory provisions, and determine the meaning or applicability of the terms of an agency action. The reviewing court shall—

(1) compel agency action unlawfully withheld or unreasonably delayed; and

(2) hold unlawful and set aside agency action, findings, and conclusions found to be—

(A) arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with law;

(B) contrary to constitutional right, power, privilege, or immunity;

(C) in excess of statutory jurisdiction, authority, or limitations, or short of statutory right;

(D) without observance of procedure required by law;

(E) unsupported by substantial evidence in a case subject to [sections 556 and 557] *section 554* of this title or otherwise reviewed on the record of an agency hearing provided by statute; or

(F) unwarranted by the facts to the extent that the facts are subject to trial de novo by the reviewing court.

In making the foregoing determinations, the court shall review the whole record or those parts of it cited by a party, and due account shall be taken of the rule of prejudicial error.

(b) In determining whether to compel agency action unreasonably delayed pursuant to subsection (a)(1) of this section, the reviewing court shall consider the extent to which the agency has failed to complete the action or a portion of the action by any date announced by the agency for completion of such action.

CONFORMING AMENDMENTS

SEC. 206. (a) Amend section 553(c) of title 5, United States Code, by amending the last sentence of the subsection to read as follows: (Deletions are enclosed in brackets and additions are set in italic.)

"When rules are required by [statute] *law* to be made on the record after opportunity for an agency hearing, section *554* [556 and 557] of this title applies instead of this subsection."

(b) Amend section 558(c) of title 5, United States Code, by amending the first sentence to read: (Deletions are enclosed in brackets and additions are set in italic.)

"(c) When application is made for a license required by law, the agency, with due regard to the rights and privileges of all the interested parties or adversely affected persons and within a reasonable time, shall set and complete proceedings required to be conducted in accordance with *section 554* [sections 556 and 557] of this title or other proceedings required by law and shall make its decision."

TITLE III—ADMINISTRATIVE LAW JUDGES

APPOINTMENT OF ADMINISTRATIVE LAW JUDGES

SEC. 301. Amend section 3105 of title 5, United States Code, to read as follows: (Deletions are enclosed in brackets and additions are set in italic.)

Sec. 3105. Appointment of [Hearing Examiners] *Administrative Law Judges*

3105(a). Each agency shall appoint as many [hearing-examiners] *administrative law judges* as are necessary for proceedings required to be conducted in accordance with section [556 and 557] *554* of this title. [Hearing-examiners] *Administrative law judges* shall be assigned to cases in rotation so far as practicable, and may not perform duties inconsistent with their duties and responsibilities as [hearing examiners] *administrative law judges*.

(b) Subject to the provisions of subsection (c), each agency is authorized, without regard to any provision of this title governing appointments or promotions in the competitive service, to appoint as administrative law judges, or to promote to any position as administrative law judge, any individual listed on a register of qualified candidates prepared by the Civil Service Commission. An individual shall be placed on such register if the individual—

(1) completes an appropriate written examination prepared and administered by the Civil Service Commission, and the individual achieves or exceeds on the examination a minimum score established by the Civil Service Commission; and

(2) possesses the necessary minimum qualifying experience as determined by the Civil Service Commission.

(c) Each agency appointing administrative law judges shall establish a panel to review the qualifications of candidates and to advise the agency on the selection of candidates. Such panel shall contain at least one attorney who is not an employee of the United States Government, and at least one individual who is not an attorney.

REFERENCES TO HEARING EXAMINERS

SEC. 302. Any reference in title 5 of the United States Code or in any other provision of law to "hearing examiners appointed pursuant to section 3105 of title 5, United States Code," shall hereafter constitute a reference to administrative law judges appointed pursuant to section 3105 of title 5, United States Code.

TITLE IV—GENERAL PROVISIONS

EFFECTIVE DATE

SEC. 401. (a) Except as provided in subsection (b) of this section, this Act shall become effective 180 days after the date of its enactment. The initial report filed by each agency pursuant to section 103 of this Act shall concern only activities of the agency during the prior year occurring after the effective date of this Act.

(b) Each agency subject to the provisions of this Act shall, within 150 days after the date of enactment of this Act, issue such agency rules as are required to conform the procedures and organization of the agency to the requirements of this Act.

THE REGULATORY PROCEDURES REFORM ACT—SECTION-BY-SECTION ANALYSIS

TITLE I—PLANNING AND MANAGEMENT

The study of the Senate Governmental Affairs Committee found that much of the present delay in the regulatory process could be reduced by careful management and adequate planning. Title I of the bill is designed to encourage each agency to adopt management and planning procedures that effectively eliminate regulatory delay wherever possible. It also provides for periodic reports to Congress by each regulatory agency and the Administrative Conference on the agency's planning and management efforts.

Office of Planning and Management

Section 101. This section requires each Federal agency to charge a single high-level office with primary responsibility for the planning and management of the agency's regulatory activities. Those agencies which do not have such an office now would be required to create one. The requirement applies to each agency responsible for one or more regulatory programs, as defined in Section 105 of the bill.

Acting under the direct guidance and supervision of the agency heads, the office would be responsible for implementing those planning and management procedures which can help reduce delay in the agency. This will include the following:

(1) Adopting deadlines and tracking the progress of proceedings. The office is charged with responsibility for seeing that each agency fulfills the requirement, established in section 102, to announce deadlines for the completion of agency actions. The office will work with the operational divisions of the agency to establish general criteria for determining deadlines for each type of proceeding. It will assure that reasonable deadlines are adopted in the case of particular proceedings. The office will be responsible for tracking the course of each proceeding through appropriate management techniques to make sure that the proceeding complies with the announced deadlines. This may mean in some agencies with a heavy regulatory workload a sophisticated computer tracking system. In other agencies less elaborate systems may be necessary. Where proceedings fall behind schedule, the office can work with the heads of the agency to assign extra resources, implement new procedures, or take whatever action is necessary to eliminate the delay. In addition the agency will have general responsibility for monitoring the activities of the agency to assure prompt action on all regulatory matters.

(2) Establishing Priorities. It will be the responsibility of the office to assist the agency heads in establishing regulatory priorities for the agency and then in assuring that the agency's resources are committed in a way that is consistent with these priorities. By establishing and following priorities, an agency should be able to expedite agency actions by avoiding instances where the agency initiates a large number of proceedings without the resources necessary to complete all of them in an expeditious manner. And it can avoid instances where an agency commits a large proportion of its resources to a proceeding which is of relatively low importance, while ignoring a number of other long-delayed proceedings of greater importance.

(3) Improving Administrative Procedures. The Office will also be responsible for assuring that the agency employs, to the greatest extent possible, the type of procedures that are likely to enable the agency to complete action as quickly as possible consistent with the requirements of due process.

It will be one responsibility of this office, for example, to see that the agency relies on informal rulemaking as much as possible. Informal rulemaking proceedings often take less time to complete than more formal agency adjudications. In addition, reliance on informal rulemaking encourages agencies to consider and adopt clear standards and interpretations of law of general applicability. The adoption of such standards and legal interpretations means that subsequent cases can be quickly decided without the need of considering all over again the basic policies relevant to a decision in the case. The adoption of such standards discourage parties in subsequent cases from filing petitions, or making arguments that clearly have no chance of prevailing in light of established agency policies.

It will also be the responsibility of the office to see to it that the agency does whatever else it can to assure expeditious agency action. This will include, for example, developing ways to provide financial or other incentives to encourage parties to seek an expeditious conclusion to the proceedings. In fulfilling this function each office can work closely with the Administrative Conference as it studies the question of incentives and other procedural reforms pursuant to their responsibilities under section 104 of this bill.

(4) Review of Regulations. Another responsibility of the office will be to review selected rules and regulations of the agency on a periodic basis. It will be expected to draw to the attention of the agency heads those rules and regulations which are inconsistent, or no longer necessary. The elimination of inconsistent or unnecessary rules will allow the agency to devote its resources to implementing other regulations, or drafting regulations that are needed. It will protect the public from the burden of having to comply with unnecessary regulations.

(5) Preparing Reports. Finally, the office will coordinate preparation of the annual reports to Congress required by section 103. This report will outline the agency's record in the prior year in completing action on proceedings in a timely fashion. It will describe the agency's priorities and goals for the succeeding year. It will review how well the agency succeeded in meeting its goals for the prior year.

In addition to these functions, the office will carry out such related functions as the agency assigns.

To be effective the office will have to be in frequent and direct contact with the agency heads. In order to give the office a stature equal to the importance of its responsibilities, the bill requires that the head of the office should be compensated at a rate at least equal to a GS–18. The bill specifies the

head or the office will report directly to the agency head.

The establishment of deadlines

Section 102(a) specifically requires the agency to announce the date when it expects to complete action on particular agency proceedings. In those cases where the proceeding is expected to take more than one year to complete, the notice will also indicate the date the agency intends to complete each major portion of the proceeding.

Section 102(a) applies to any informal rulemaking or formal on the record proceedings where the agency must already provide notice of the proceeding under the provisions of section 553(b) or section 554(b) of the Administrative Procedure Act. Other statutes may impose on particular agencies further, more detailed notice requirements in addition to those in sections 553 or 554. Or statutes may follow section 553(b) or section 554(b), but require particular agencies to conduct other aspects of the proceedings in a way that is not entirely consistent with sections 553 or 554. Nevertheless, the requirement in section 102(a) that the agency establish a date for completing the proceeding would still apply in each of these instances.

Where an agency proceeding is exempt from the notice requirement of section 553 of the Administrative Procedure Act, however, because it involves the issuance of rules of agency organization, procedure, or practice, the requirements of this subsection would not apply.

The agency will have to adopt a specific deadline for each proceeding. In many cases, however, the agency will find it useful to adopt general guidelines establishing how long each type of proceeding should take on the basis of its past experience. With these guidelines to assist it, the agency can with relative ease and consistency adopt deadlines for the completion of each individual proceeding. In any event, the bill specifies that the schedule adopted in any particular proceeding should be designed to assure the most expeditious conclusion to the proceeding possible, consistent with other requirements. The schedule must, of course, still make it possible for all due process requirements to be met and for full disclosure of all relevant facts. The schedule should also reflect the relative priority of the proceeding, and the extent that agency resources can be devoted to the proceeding consistent with the overall priorities of the agency.

The subsection does not require that the notice of the expected completion date be in any particular form. Presumably, it would be included in whatever type of announcement the agency already employs to meet the existing notice requirements in the Administrative Procedure Act.

The section does not apply to agency proceedings that will take less than three months to complete. Proceedings of this type are sufficiently short to make the establishment of precise deadlines unnecessary.

Deadlines should help avoid unnecessary delays. Deadlines will alert the agency to the need to take corrective action when a proceeding is unduly delayed. In any particular proceeding, deadlines will inform participants in advance when they must be ready to meet filing dates, participate in hearings, or the like. This should help prevent delays due to scheduling problems. Deadlines will make agency officials more accountable to agency heads and to the public for their record of success or failure in completing proceedings in an expeditious manner. They will provide further incentives for agency officials to complete on time the stage of the proceeding for which they are directly responsible. Finally, deadlines will enable agencies to follow schedules which reflect their priorities.

The Civil Aeronautics Board announces a target date for the completion of each of the hundreds of items that come before it. The Federal Communications Commission has in the past followed the practice of announcing publicly a month or more in advance when agency heads expect to consider the staff's conclusions and recommendations on a particular item. The Committee study reports that agency managers at the Federal Communications Commission have found that public knowledge of when the staff has agreed to complete its work on a particular matter creates a strong incentive to live up to that schedule.

Section 102(b) requires the agency, if it fails to complete final action within 30 days of its original estimate, to announce publicly a new target date for completion. This includes a proceeding for which no date was originally announced because the agency expected to complete it in less than three months. When such a proceeding becomes so delayed that it will still not be completed after four months of consideration, the agency will have to adopt a schedule and announce it.

Subsection (c) provides that the agency may, in its discretion, adopt rules requiring the use of deadlines for other types of agency actions, such as policy statements or investigations, that are not subject to the mandatory requirements of this section.

Annual reports on regulatory activities

Section 103. This section requires each regulatory agency to report to Congress by March 1 of each year. Subsection (a) requires statistical information about agency proceedings. It applies to each informal rulemaking or formal adjudicative proceeding subject to the notice provisions of the Administrative Procedure Act. The agency is required to provide the information according to procedural categories so that separate statistics are available for each type of agency proceeding.

The bill specifically requires the following information: the number of proceedings initiated in the prior year; the number of proceedings concluded in the prior year; the number of times when the agency failed to meet one of the deadlines established pursuant to section 102; and an explanation why the agency failed to meet its deadline in a particular instance or in a general category of cases.

The section also requires the agency each year to examine the 10 percent of all its pending informal rulemaking and formal adjudicative cases combined that have been under consideration for the longest period of time. The agency must identify the proceedings singled out in this fashion, and indicate to Congress what it intends to do to expedite a conclusion to them.

It is essential, for comparative purposes, that each agency provide its statistical information according to categories that are as comparable as possible. To assure this comparability the subsection requires the Administrative Conference of the United States to approve the categories of each agency adopts.

In 1969, the Administrative Conference recommended that each agency compile statistics on their current case load and the length of time proceedings take to complete. Yet in 1974 the Conference concluded that only five agencies were collecting such statistics on a regular basis. This subsection will assure that in the future each agency collects and reports the necessary data. This will allow Congress to exercise its oversight responsibilities in the area. It will also provide additional assurance that each agency has management procedures which adequately track, on a regular basis, the progress of proceedings under consideration in the agency.

Section 103(b) requires each agency to describe in the annual report, with as much specificity as possible, what the priorities and goals of the agency will be for the succeeding year. In addition to describing areas where generic standards will be developed or clarified, or new enforcement efforts made, the report will describe what steps it intends to take to assure that the agency achieves its goals. For example, whether it will rely on informal rulemaking or more formal adjudicative proceedings, when it expects to complete action on the proceeding, and the relative priority the effort will receive. Each year the report will also review the agency's record during the prior year in achieving its previously announced priorities and goals.

The annual report will also provide each agency an opportunity to report on what steps it has taken to expedite its regulatory actions by changing its organization, management, or administrative procedures. It will be expected to inform Congress of any legislation which it believes would be helpful in increasing the efficiency of the agency's regulatory process.

Administrative conference analysis

Section 104 imposes additional responsibilities on the Administrative Conference to monitor the efforts of the agencies to comply with the provisions of this bill. It will measure the extent that agencies succeed in expediting their regulatory procedures. The Administrative Conference has already begun on its own initiative a 3- to 5-year pilot program to obtain in a uniform manner statistical information from agencies on their case loads. The Administrative Conference will, consequently, be in a good position to monitor the collection system each agency adopts pursuant to this bill. It will be qualified to approve the categories the agencies use for statistical reporting purposes to make sure they are comparable.

Each year the Administrative Conference will review the reports submitted by the agencies pursuant to section 103 and by June 1 of each year provide Congress with an analysis of such reports. In its annual report the Administrative Conference will provide any recommendations it determines appropriate for additional legislation, for changes in agency practices and procedures that may be implemented without legislation, or any other steps it thinks Congress or the agencies should take to carry out the purposes of this bill.

Section 104(b) charges the Administrative conference with specific responsibility for studying possible ways to increase the incentives that all participants in a proceeding have to complete the proceeding in an expeditious way. This could include, for example, increasing the benefits accruing to parties that complete a proceeding quickly, as well as imposing costs of various kinds on participants that delay proceedings. While the bill contains a number of changes to increase the speed of agency proceedings, further experience under the new proceedings and further study should provide suggestions for additional ways to improve the process through the greater use of incentives. The Administrative Conference will submit its first report within one year of enactment of the bill, and additional reports from time to time as it determines appropriate.

Subsection (c) authorizes the Administrative Conference to gain access to such records and information and analysis that the Conference requires to carry out its functions under this Act. Currently, the Administrative Conference does not possess such specific statutory authority. Subsection (d) authorizes such additional sums as the Administrative Conference may need to carry out its functions under the Act.

Applicability and definitions

Section 105. This section describes the agencies which will be subject to the re-

quirements of title I. Any agency or department which engages in regulatory activities would be subject to title I unless the activities involve a military or foreign affairs function. The bill defines regulatory activities broadly to include any functions that protect the public interest and determine the rights, privileges and obligations of private persons by conducting informal rulemaking proceedings or formal on the record proceedings under sections 553 or 554 of the Administrative Procedure Act, or through similar types of proceedings conducted pursuant to other law.

TITLE II—ADMINISTRATIVE PROCEDURES

Title II amends the Administrative Procedure Act to encourage the use of a variety of procedures best designed to assure expeditious agency action consistent with the requirements of due process. This is achieved by a number of important, but limited, amendments to the Administrative Procedure Act. Most of the proposed amendments are to the provisions in sections 554 through 557 of the current Act which primarily deal with the more formal kind of agency proceedings. The general effect of many of the amendments to these procedures is to make them more closely resemble the procedures that govern informal rulemaking and to give the agency greater flexibility generally in conducting such proceedings. Since informal rulemaking on the whole takes less time, this change should help expedite the regulatory process. Other amendments are designed to avoid unnecessary delay at the discovery or review stage of a proceeding.

Title II does not amend in any significant way the current provisions in section 553 of the Administrative Procedure Act already governing informal rulemaking. One of the major recommendations of the Committee study was that agencies should make greater use of section 553 of the Administrative Procedure Act. Section 553 already provides agencies, however, with great flexibility in adopting procedures best calculated to assure speedy agency action. Major amendments to this section are therefore unnecessary in order to make possible expeditious agency consideration of proposed rules. Other provisions in title I of this Act are intended to encourage agencies, however, to make greater, use of informal rulemaking procedures.

Formal hearings

Section 201. This section amends section 554 in the Administrative Procedure Act governing proceedings now conducted as formal, on the record proceedings.

The amendments require the use of a more expedited procedure in the case of all formal rulemaking, including ratemaking, all initial licensing proceedings, and all proceedings involving the initial grant of a subsidy or other benefit wherever the law now requires that proceedings of these types be conducted as formal, trial-type proceedings. The bill requires the agency in such cases to substitute procedures more like those used in informal rulemaking procedures. Formal trial-type hearings may only be conducted after more informal hearings are first conducted, and then only if a participant can convince the presiding employee there remains a factual dispute in a matter on which a decision on the case is likely to depend.

Some agencies in their own have begun to use such hybrid procedures, especially in the many economic and technical areas that often determine agency action in licensing and ratemaking.

The Food and Drug Administration enacted rules of procedures in 1977 adopting this basic approach.

Similarly, several recent statutes have required an agency to combine informal rulemaking with limited use of procedural protections, such as cross-examination, more typical of formal adjudication. Examples include the Magnuson-Moss Warranty-Federal Trade Commission Improvement Act (P.L. 93–637), and section 6 of the Toxic Substance Act administered by the Environmental Protection Agency. (P.L. 94–469). The 1975 amendments to the laws administered by the Securities and Exchange Commission provide another example (P.L. 94–29). The thrust of this bill is different, however, from acts which force informal rulemaking into more formal procedures. This amendment converts proceedings which are now considered formal trial-type proceedings into largely informal rulemaking proceedings. Furthermore, in the Magnuson-Moss Act, the presiding employee designates at the beginning of the proceeding which facts must be decided in a trial-type proceeding. Issues are therefore designated for a full trial before any record is made showing which questions are key to a decision, and which of these really involve disputes of fact. The procedures proposed by section 201 reserve the designation of certain factual disputes for a trial-type proceeding until after a more informal hearing has in fact demonstrated the need of resolving a particular question in a factual trial-type hearing.

The amendment is also consistent with a growing number of statements by courts and commentators endorsing agency procedures which seek to combine features of both formal and informal proceedings in a way that functionally makes the most sense in each case. Commenting on the best procedural means for establishing rates for natural gas before the Federal Power Commission, the Court of Appeals for the District of Columbia noted:

"As we stated in Mobil, 483 F. 2d at 1251, the informal procedures of Section 553 of the APA and the more formal requirements of §§ 556 and 557, are not mutually exclusive. Moreover, they are not pre-emptive of available procedures. There may be occasions when rulemaking by notice, comment and reply, essentially as now before us, is all that is required insofar as the proceedings as a whole are concerned, but in particular parts a more formal procedure should be followed. As an example, the unsatisfactory state of the evidence on productivity could no doubt have been clarified one way or the other had the Commission subjected the submissions on reserves and reserve additions, so vital in arriving at the important productivity factor, to some method of testing their reliability and adequacy." Second Natural Gas Rate Case D.C. Cir. No. 76-2000 et al. (June 16, 1977).

The respective subsections of section 201 amend particular portions of section 554 of the Administrative Procedure Act. The changes to each subsection of section 554 are described below.

Applicability

Section 554(a). This section of the Administrative Procedure Act specifies which types of agency proceedings will be subject to the requirements of the section. It currently applies to "every case of adjudication required by statute to be determined on the record opportunity for an agency hearing."

The bill makes only two technical amendments in the wording of this subsection. The use of the word adjudication is deleted as no longer appropriate, since the thrust of the bill's amendments to section 554 is to provide more flexible procedures which resemble informal rulemaking in some cases as much as formal agency adjudication. Other amendments in section 201 of the bill delete similar references to evidence in section 554(c), 554(g), and 447(b) of the Administrative Procedure Act, as amended, as similarly inappropriate.

The bill also substitutes the word law for statute in section 554(a) since there may be instances where constitutional principles of due process rather than the specific words in a statute require that an agency conduct formal proceedings before taking certain action. The amendment does not change current law, for the Supreme Court has ruled that the word statute includes the due process requirements of the Constitution in such instances. (See *Wong Yang Sun* v. *McGrath*, 339 U.S. (1950)).

Under the current Act a number of the procedures applicable to formal proceedings are described in section 556 rather than section 554. The bill rearranges the order of provisions so that any requirement applicable to all types of formal proceedings are placed in section 554. At the same time, section 556 is reserved for those procedures which will apply only if the proceeding requires a trial-type hearing. Accordingly, the bill amends section 554(a) by adding to it, with only technical changes in the wording, the provision presently contained in the second sentence of section 556. This sentence specifies that nothing in the subchapter supersedes any special requirements contained in other statutes applicable to a specific class of proceedings.

Initial submissions

Section 554(b). Section 201 of the bill makes one addition to section 554(b) of the current Act. The new sentence makes it clear that the agency may require the party that initiates a proceeding to submit, at the time the proceeding is initiated, all the facts and arguments on which it proposes to rely. Since this procedure will help make agency proceedings more efficient, the bill specifies that the agency should adopt this approach wherever practicable. If a private party requests a license from an agency, the requirement could apply to the private party when the license application is filed. When an agency is the one that initiates the action, the procedure could apply equally to it. By requiring that the moving party disclose all his facts and arguments at the outset of the proceeding, other interested persons can more quickly discover the nature of the moving party's case. The procedure will also allow the other interested parties to prepare their own case more rapidly, and to decide whether there is any reason to contest the proposed action.

Selection of presiding employee

Section 554(c). Provisions now in subsections 556(b), 556(c), and 556(d) of the current Act, specifying who should preside over a hearing conducted pursuant to this section, and the general procedures applicable to the hearing, will continue to apply to all proceedings conducted under section 554. The bill transfers most of this wording from section 565 to section 554(c)(1) and (2), or a new section 554(g), with the following amendments. In addition to those people who may now preside over formal agency proceedings, the bill states that an employee board authorized by section 204 of this bill may preside over any part of the proceeding except any formal trial-type hearing conducted pursuant to subsection (f). The employee board may consist of any appropriate agency employee designated by the agency heads. Since these hearings will not involve formal trial-type proceedings, it will not be necessary to have an administrative law judge preside over them in each case. At the same time, amendments to other sections will assure the continued objectivity of the decision-making procsess by prohibiting the employee board from discussing the case with other agency employees responsible for advocating the agency's case in the proceeding.

Section 554(d) of the current Act contains the requirement that the employee who presides at the reception of evidence should make the recommended or initial

decision required by section 557 of this title, unless he becomes unavailable to the agency. For purposes of clarity, this sentence has been moved to this subsection. The bill amends current wording in one respect. It states that if the presiding employee becomes unavailable to the agency, another employee qualified pursuant to this section may be appointed to take his place and conclude the proceeding. The current Act fails to specify what happens when the presiding employee becomes no longer available.

The proposed change, recommended by the Administrative Law Conference, eliminates this oversight. The amendment should help assure that most proceedings will not have to be begun all over again if the presiding employees becomes unavailable in the middle of the proceeding. Current case law, however, that requires a new hearing where the credibility of witnesses is a key to the outcome of the case would not be changed by this amendment.

The present section 554(c) describes some of the trial-type procedures that must be provided in all cases subject to this section. Under the procedures proposed by this bill, such formal trial-type procedures will only be applicable in some cases, and for limited purposes. This wording has been separated, therefore, from the remainder of the section in a new subsection (f).

Authority of presiding employee

Section 554(c)(3). Paragraph (3) of section 554(c) of the Act as amended by the bill would contain new provisions not found in the current Act. This paragraph emphasizes that the presiding employee is under an affirmative duty to see that the proceeding is conducted in an expeditious manner. This new wording will require the presiding employee to take an active part in shaping the nature and extent of the record. It will be his affirmative duty to see that both the prehearing stage and the hearing itself is completed in an expeditious manner. It will be his affirmative duty to see that the record is a concise one that contains only those matters that are relevant and material to a decision. It will be his affirmative duty to exclude repetitious material from the record. The employee is authorized to establish deadlines for the completion of the hearing, or any other portion of the proceeding, in accordance with overall deadlines established by the agency pursuant to title I of this bill. The presiding employee is encouraged to rule on any questions of law or fact where by doing so, the official can help narrow and define the issues, and thus control the scope and length of the proceeding. The presiding employee will also be authorized to take any other appropriate action authorized by this subchapter, or any other applicable law, to assure prompt agency disposition of the matter.

Separation of functions

Subsection 554(d). This subsection of the current Act limits whom the presiding employee and other agency decision-makers may consult during the course of formal adjudicative proceedings. It prohibits, in general terms, agency employees engaged in the decision-making process from consulting off the record with those engaged in an investigative or prosecuting function in the same or factually related case.

Section 201 of the bill broadens the present provision in the following ways:

(1) The current subsection does not apply to formal rulemaking, including ratemaking, and requests for initial licenses which must be decided in formal on the record proceedings. The bill makes these provisions applicable to all formal on the record proceedings.

As a practical matter, agencies have in most cases voluntarily applied the rules on separation of functions to formal licensing and ratemaking procedures without unduly restricting their flexibility. Both the Administrative Conference and the American Bar Association have studied this matter for a number of years. They both support the general principle that these procedural protections should apply in some form to all formal on the record proceedings. A similar provision in somewhat different form was passed by the Senate in 1976 as section 1 of S. 798. Applying these procedural protections in all types of formal agency proceedings will make it easier for the agency to rely on a range of agency officials in addition to administrative law judges to preside over the hearing, to review the initial decision, or to recommend a decision The agency may rely on a range of such officials without fear it would be seen as undermining the integrity of the resulting decision. This added flexibility should help expedite agency proceedings.

(2) A portion of the current wording applies only to the employee who presides at the reception of evidence. The bill amends this portion of the subsection to specifically extend to an employee board created pursuant to this bill. The kinds of employees covered by the prohibitions of the subsection is further broadened to include any other employee, except an agency head, who participates or advises in any decision or review of a decision whether or not the individual has presided over the original decision. The current Act, however, exempts agency heads from the prohibitions of this subsection, and the bill does not amend this exemption

(3) The current Act prohibits the presiding employee from consulting with any other employee who is engaged in prosecuting, as well as investigative functions. Since the term prosecuting fails to accurately describe all the kinds of formal proceedings which may now be subject to the prohibition of this subsection, the term litigating has been substituted for the term prosecuting. Similarly, the exemption for a witness in public proceedings has been amended to refer to a participant in proceedings since, under the new procedures, on the record comments may come in a number of different forms in addition to the testimony of a witness. The wording of the bill specifically provides that the term litigating does not include participation in a judicial review proceeding. An agency official involved in a court appeal of a case would not be barred from subsequent agency consideration of the matter if the court remanded the proceeding to the agency with instructions to reconsider the matter.

These word changes are not intended to change the substantive nature of the prohibition. As now, an agency employee who acts as an investigator, or who participates as an advocate, in connection with any formal on the record proceeding should not be able to turn around and, off the record, act as a decision-maker or confidential adviser to the decision-maker in the same matter. The wording does not affect an agency employee whose only involvement with a case is to act as a confidential adviser to a decision-maker, such as a law clerk to any administrative law judge or an expert adviser to a commissioner.

General hearing process

Section 554(e). Section 201 adds a new subsection (e) to section 554 of the Administrative Procedure Act. It provides for more informal hearings in proceedings that currently must be conducted in their entirety as formal trial-type hearings.

Paragraphs (1) and (2) specify which kinds of proceedings must be conducted in accordance with this new subsection. Any rulemaking, including ratemaking, and most licensing now required by law to be conducted as formal on the record proceedings must be conducted in accordance with the procedures of this subsection. Licensing proceedings to withdraw, suspend, revocate or annul a license are exempted from the otherwise mandatory application of the subsection to formal licensing proceedings. The procedures of this new subsection must also be followed in the case of any matter involving an initial grant of a subsidy or other benefit which must by law be conducted as a formal on the record proceeding. For example, the Civil Aeronautics Board or Maritime Administration may, on occasion, conduct such proceedings.

In addition to those rulemaking, licensing, or other proceedings that must follow the procedures of this subsection, an agency may, in its discretion, utilize these new procedures in the case of any other matter which must be considered in a formal on the record proceeding. It is expected the agency would choose to follow these more informal procedures where questions of policy or law predominate over factual disputes of the specific kind most appropriately resolved by a more formal trial-type proceeding. Another factor an agency should consider is whether the large number of participants make it unduly cumbersome and unnecessary to consider the entire matter in a formal, trial-type proceeding. In each case the agency should consider whether a full trial-type hearing is essential to a full and fair disclosure of all the facts.

Paragraph (3) describes the procedures applicable to all hearings conducted under this subsection. The paragraph requires the presiding employee to first conduct a general hearing that addresses all questions of law and fact the agency or a participant believes relevant. Prior to such hearing, there would be such discovery as the presiding employee determines necessary. The extent and nature of discovery would be under the control of the presiding employee. It would also have to be consistent, of course, with the provisions of whatever other law authorizes such discovery.

The hearing will provide an opportunity for persons participating to submit such data, views, or arguments on the facts and law relevant to the case as it wishes. This may include affidavits, interrogatories or other written material. Whenever a participant in the proceeding requests, the hearing will include an opportunity for participants to argue their views orally in a manner similar to the opportunity the agencies may provide in informal rulemaking procedures for the oral presentation of views. The presiding employee could ask questions of any person appearing before it. Participants in the oral hearing could not call witnesses to testify, however, or cross-examine other participants.

Following the opportunity for the presentation of views, the presiding employee will rule on all questions of law and fact except for any that are dependent on the resolution of a factual dispute which the presiding employee rules requires a trial-type hearing. Where there are factual disputes which must be decided by a trial-type hearing, the rulings by the presiding employee in the initial hearing, plus any rulings arising from the subsequent trial-type hearing, will together constitute the decision in the case. All the decisions in the case will be reviewable at the same time in accordance with the review provisions of the Administrative Procedure Act. Interlocutory appeals on particular points would only be available to the extent agencies now allow them in order to reduce the overall length of the proceedings.

Paragraph (4) specifies when a particular issue may be designated for a trial-type hearing. The standards are intended to limit trial-type hearings to only those questions where a hearing of this type is really essential. The presiding employee must find there is "a genuine and substantial dispute of fact which can be resolved with sufficient accuracy only by the introduction of reliable and specifically identified evidence in an adjudicative hearing." In addition, the issue in dispute must be one on which the resolution

of the case is likely to depend in whole or in part.

When the presiding employee designates a dispute for a trial-type hearing, the official must specifically state which factual disputes will be the subject of the hearing, and why the decision of the agency is likely to depend on the resolution of such facts. The hearing will be limited to only those specific factual disputes specified by the presiding employee and any questions of law which depend for their resolution on an unresolved question of fact.

Courts should only reverse the agency's exercise of discretion under this paragraph in rare instances. Unless an agency's action is a clearly arbitrary or capricious one which materially prejudices the rights of participants, the agency's choice of procedures should not be disturbed. Otherwise the value of the new procedures as a way to expedite matters will be undermined, and the experience and judgment of the agency concerning the conduct of its own proceedings ignored.

The Governmental Affairs study concluded that use of this hybrid type procedure would contribute in a significant way to more expeditious proceedings. Many issues which arise in licensing, ratemaking, and other, often technically oriented proceedings are more appropriately resolved by an informal hearing. Often these proceedings feature a battle between experts on technical, scientific, or economic matters. The decision may rest in large measure on policy choices, on weighing acknowledged costs versus acknowledged benefits. The litigious atmosphere of a full trial-type proceeding is often not the best atmosphere in which to explore and weigh, in light of agency policy, differing interpretations of scientific, technical, or economic data. The opportunity of participants to conduct oral cross-examination does not add significantly to the record on most points since the demeanor or credibility of the witnesses will not often be at stake.

In these types of situations the views and arguments may be presented more quickly, and the disagreement highlighted more easily, in a more informal hearing. Where the hearing does serve to isolate and sharpen a genuine issue of fact, trial-type proceedings are always available to resolve them.

The procedures described in subsection (e) will thus save time by reducing or eliminating the need for oral, trial-type hearings. It will also assure the existence on review of a clear record which highlights the issues and the positions which each participant takes on these issues. This in turn should save time at the review stage of the proceeding.

The procedures described in this subsection have already been adopted by some agencies where particular statutory authority permits it. For example, the Food and Drug Administration rules bar referral of certain matters for a formal trial-type hearing unless the participants requesting it can demonstrate the need for such a hearing. Among meeting other criteria, the participant must show there is a genuine and substantial issue of fact capable of resolution by available, sepcifically identified, and reliable evidence. The factual issues must be determinative or controlling with respect to the action requested.

Adjudicative hearings

Section 554(f). Section 201 retains in a new section 555(f) procedures applicable to the conduct of any trial-type hearing. Paragraph (1) specifies the circumstances in which the subsection will apply to formal proceedings required by law to be conducted pursuant to section 554. The subsection will apply to entire proceedings when the agency determines the general hearing procedures in subsection (e) are not applicable in any way. The subsection will also apply to portions of a proceeding involving a factual dispute which the presiding employee under subsection (e) determines must be resolved in a formal, trial-type hearing. At the conclusion of a hearing conducted pursuant to this subsection the presiding employee must resolve all remaining questions of law or fact, and make all necessary rulings in the case, not already resolved in a prior hearing held pursuant to subsection (e).

Subpena authority and other ancillary powers

Section 202. Section 555(d) of the current Act governs agency use of subpenas where such use is authorized by other statutes.

The amendment authorizes the agency to take a number of steps to encourage prompt compliance with any agency subpena. The delays that now occur in proceedings while the agency obtains compliance with the subpena will be reduced by these provisions. This section of the bill also adds for the first time a general grant of subpena authority to the Administrative Procedure Act. Finally, it increases an agency's ancillary power in other ways to make it easier for the agency to avoid unnecessary delay.

Regulating the conduct of individuals before the agency

Section 555(b). The bill adds to this subsection of the Administrative Procedure Act a new sentence specifically authorizing the agency to bar individuals from appearing before the agency. The amendment provides that an attorney representing a party to a proceeding, or any other individual, may be barred from appearing "where such individual refuses to adhere to reasonable standards of orderly and ethical conduct or engages in a continued use of dilatory tactics." Individuals who continually seek to obstruct the course of proceedings should be held personally responsible for their conduct. Agencies probably have this inherent authority now. Specific reference to it should make it easier for agencies to act in those relatively rare cases when it is necessary.

Grant of subpena authority

Section 555(d) and section 555(e). The bill adds to section 555 a general grant of authority to all agencies to issue subpenas. The subpena authority conferred by this bill is in addition to, rather than in place of, the preexisting authority most agencies have under other statutes to issue subpenas.

The provision authorizes the grant of subpena authority by an agency only in connection with proceedings that are required by law to be conducted in accordance with the proceedings of section 554. The authority to issue subpenas under this general authority will be available to agencies only after the initiation of formal proceedings. An agency may not invoke this new authority during the preliminary investigative stage. These limitations on the use of the subpena contained in this subsection will not apply, of course, to the agency's use of subpenas under its preexisting authority.

The Administrative Procedure Act does not now grant agencies any subpena authority. While most agencies operate under statutes which give the agency this authority, there are a few instances where this authority is lacking or the grant of authority is adequate. This includes the Food and Drug Administration, the Postal Service, and the Department of the Interior. The Administrative Conference favors including a general grant of subpena authority in the Administrative Procedure Act. The amendment will eliminate any possibility that the discovery stage is slowed because the agency lacks adequate subpena authority. It will help eliminate the possibility that parties to a proceeding before an agency lacking subpena authority will slow the actual hearing by engaging in extensive cross-examination, and by otherwise using the hearing process itself, to accomplish the discovery it was unable to obtain before the hearing.

The amendment to section 555(d) also adds to the end of the subsection a new sentence specifying that the agency shall authorize the presiding employee to issue subpenas, as well as any other official the agency may wish to designate. Although section 556 of the present Act implies such an automatic delegation of authority to the presiding employee, nowhere in the Act is the delegation specifically required. Obvious savings in time occur when requests for subpenas may be acted upon by the presiding employee without requiring the action of agency heads.

The bill also amends subsection (e) of section 555 by adding at the beginning of the subsection a sentence specifically authorizing agencies to obtain enforcement of any subpenas issued by it through actions brought in the District Court of the United States, for any district in which the person is found or resides, or transacts business. The action would be brought by either agency lawyers or the Department of Justice, in accordance with current law.

Imposition of civil penalties for noncompliance with subpena

Section 555(e). Section 555(e), as amended by the bill, provides that an agency may obtain from the United States District Court the imposition of a penalty upon any person who violates any subpena issued by the agency. Enforcement suits would be brought either by the agency through its own attorneys, or by the Department of Justice, depending upon what current law provides.

Any person in violation of an agency subpena would accrue penalities for each day that he continues to refuse to comply with it after the agency has notified him of his non-compliance and provide him thirty days to comply. This thirty day period also gives a person time to seek an injunction from a court staying the imposition of a penalty, but to do so he will have to convince the court of the likelihood that the court will sustain his objections to the subpena.

The civil penalty shall not exceed more than $5,000 for each day the violation continues. The court will be able to fashion the exact size of the penalty after review of all the circumstances. Where any person's refusal to obey a subpena is frivolous the penalty can be accordingly high. At the same time the court will have the flexibility to avoid harsh penalties against a losing litigant who, in the view of the court, had a substantial argument.

The Federal Trade Commission has found by experience that enforcement of its subpenas where no penalties are available for noncompliance takes considerably longer than enforcement of certain other orders for annual or special economic or business reports where penalties are available for noncompliance.

This amendment should help expedite the discovery stage of proceedings by making such penalties available to all agencies operating under the Administrative Procedure Act.

Agency rulings against persons in noncompliance with discovery order

Section 555(e)(3). The bill provides an additional means to avoid the delay that may otherwise result from any person's failure to cooperate in a discovery request. In addition to bringing action in District Court to enforce a subpena, and in addition to any proceeding to penalize an individual who continues to refuse a subpena, paragraph (3) provides that the presiding employee may make certain rulings against a party who fails to cooperate. The presiding employee

may refuse to allow a person to support or oppose designated claims or defenses, or prohibit him from introducing designated matters into the record. He may infer that the testimony, documents, or evidence concerning which the subpena was issued would have been adverse to the person refusing to comply with the subpena. He may strike out pleadings or motions, or dismiss the action, or render a decision by default, against any person who declines to comply with an agency subpena. Or the presiding employee may stay further proceedings until the order is obeyed. This final option would be particularly appropriate where the noncompliance is by the moving party in the proceeding.

These provisions are analogous to Rule 37(b) of the Federal Rules of Civil Procedure and provisions in the current procedural rules of the Federal Trade Commission.

Conforming amendments

Section 555(f). The bill also adds a new section 555(f) to the Administrative Procedure Act. It specifically provides that the authority provided an agency pursuant to this bill to issue subpenas and to take certain actions when the subpenas are not complied with are in addition to, and not in limitation of, any other statutory authority for the issuance of subpenas or their enforcement.

Section 555(h). The Administrative Procedure Act in section 554(e) currently authorizes the agency to issue a declaratory order to terminate a controversy or remove uncertainty. This could be an important device to expedite agency action, and end uncertainty in the private sector about agency intentions. However, the wording appears in section 554, which governs procedures for the conduct of formal, on-the-record proceedings only. In order to make it clear that the agency should be able to employ this procedure, whether or not a formal on-the-record proceeding is involved, the provision has been moved to section 555. The actual wording of the provision has not been changed.

Other conforming changes to section 555 rearrange the order of some of the provisions governing the enforcement of subpenas.

Maintenance of public files

Section 555(i). Finally, section 202 adds a new section 555(i) to the Administrative Procedure Act. The purpose of the new subsection is to require each agency to maintain a public file of significant agency actions as well as an index to such file. The agency must include in its files those motions, briefs, and other legal arguments or pleadings, and the action of the agency on such filings, that the agency considers of significance and which it thinks could be of particular interest to the agency or other persons participating in subsequent agency proceedings. The agency would be expected to make it possible for the public to have ready access to the file and to copy material from it. Each agency is also encouraged to consider other ways to make the material available to the public. This could include, for example, cooperating with any company that wished to publish in a series of volumes opinions or other material from the file.

Some agencies do not now have such a public file to assist agency staff or outside parties in preparing arguments or motions. The file will enable agency attorneys and participants to readily determine how agency officials have ruled on similar issues in the past, and why. This should in turn help reduce the length of time proceedings are slowed while participants research and prepare anew legal arguments. It will provide a repository of practical experience which all presiding employees may readily consult when considering what practices and procedures may appropriately be used to assure the most expeditious conduct of the proceedings.

The conduct of trial-type proceedings

Section 203 amends provisions in section 556 of the Administrative Procedure Act further governing the conduct of formal trial-type hearings. As a result of the bill's amendments to section 554, only hearings conducted under section 554(f) will be subject to these procedures. The purpose of the amendments is to provide the agency with greater flexibility to conduct the proceedings in the most expeditious manner possible.

Procedures generally

Section 556(b). The bill transfers to section 554(c)(2) most of the procedures that now appear in section 556(b) since they are procedures equally applicable to all types of proceedings conducted under section 554. The bill does retain in section 556 the provisions governing offers of proof and receipt of evidence, since they are uniquely applicable to trial-type hearings. The amendment also adds new wording specifically authorizing the presiding employee to conduct his own cross-examination of witnesses. By inference the Act already confers this authority on presiding employees. By making it explicit the bill encourages presiding employees to control the course and extent of cross-examination. It is consistent with the new provision the bill adds to section 554(c)(3) specifically charging the presiding employee with responsibility for affirmatively controlling the course of the proceeding.

The use of written testimony and summary judgment to expedite hearings

Section 556(c). The bill's amendment to this subsection is intended to encourage reliance on written material rather than oral hearings. It requires each agency to issue rules authorizing the presiding employee to require the introduction of evidence in written form and the use of written interrogatories unless an oral presentation of testimony, or oral cross-examination, is necessary for a full and true disclosure of relevant evidentiary facts, and denial of such opportunity would materially prejudice a party. The amendment removes any present uncertainty about the authority of an agency to require the submission of evidence in written form regardless of the type of formal proceeding involved.

The last sentence of section 556(d) of the current Act already authorizes an agency to rely on written presentations in considering initial licensing, rulemaking, or claims for money or benefits. The amendment simply makes this option available in all formal proceedings. It is consistent with recent court decisions upholding the agency's reliance on written procedures. The case of *Shell Oil Co.* v. *FPC* (520 F.2d 1061, 5th Cir. 1975), for example, upheld a denial of oral cross-examination where such oral cross-examination was not necessary for a full and true disclosure of the facts, and the party's rights were not prejudiced by having to rely on written procedures. The bill adopts a similar standard.

The reliance on written material will reduce the length of the oral hearing. It eliminates the time at the oral hearing that must be devoted to receiving direct testimony orally or to conducting oral cross-examination. It also saves time in other ways. Even if oral cross-examination follows the submission of direct testimony in written form, the cross-examination will be better organized and more precise because the parties have had ample time to study the direct testimony. Since scheduling problems can often be the cause of delays in completing oral trials, greater reliance on written testimony also avoids instances where an oral hearing has to be postponed until the presiding employee, all the attorneys, and the witnesses can be available. At the Interstate Commerce Commission, for example, a case scheduled for an oral hearing must wait an average of 207 days before it is heard. A proceeding conducted solely in written form is subject to a wait that is only about one-half as long before an agency official can begin to consider the testimony.

Material submitted in written form is likely to be more concise and relevant, and better organized than evidence submitted orally. Greater use of written evidence should therefore reduce the time it takes during each subsequent step to analyze the record.

An analogous provision was recently adopted by the Food and Drug Administration. These rules specify, for example, that oral direct testimony and cross-examination shall be permitted only where other means are insufficient for a full and true disclosure of all relevant facts. The Interstate Commerce Commission and the Civil Aeronautics Board have also enjoyed considerable success reducing the length of proceedings by requiring proceedings to be conducted in written form.

The bill's amendment to section 556(c) also specifies that the presiding employee may issue a decision prior to the completion of the evidentiary portion of the hearing if the official believes that the facts and law in the case require a decision for one party or the other. This may occur, for example, after the prehearing conference, or after one side has submitted its case. In such instance, the development of a further evidentiary record only delays the final agency disposition in the matter. The agency, through its presiding employee, should be free to conclude the evidentiary stage of the hearing at that point, just as a court may issue a summary judgment to avoid further unnecessary proceedings.

Agency review of decisions

Section 204. This section contains amendments to section 557 of the Administrative Procedure Act governing procedures for making initial decisions and for agency review of initial decisions in formal proceedings governed by section 554. By authorizing agencies to reduce the number of steps in the agency decision-making process, it will help eliminate unnecessary delay.

Authorizing the issuance of recommended decisions by employees who have not presided at the hearings

Section 557(b). The Administrative Procedure Act provides that an agency may request the presiding employee to make an initial decision. This initial decision then becomes the agency's final decision if the agency heads do not review it. Or the agency may have the presiding employee simply recommend a decision to the agency heads who then must make the actual decision.

Section 557(b) of the current Act further provides that in the case of rulemaking or initial licensing the agency may elect to eliminate the formality of an initial or recommended decision altogether. Instead the agency may have someone other than the presiding employee recommend a decision, or it may issue a tentative decision of its own.

The bill amends section 557(b) to conform these provisions to the changes made in section 554. The amendment allows the agency to use some agency official other than the presiding employee to prepare a recommended decision, or issue a tentative decision of its own, in any proceeding or portion of a proceeding considered under the more informal procedures established by the new section 554(e). The matter would not have to involve rulemaking or initial licensing. The amendments in section 201 of this bill, enlarging the scope of the Act's separation

of function provisions, will mean, of course, that whoever does prepare the recommended decision will not be able to confer with agency employees who advocated the agency position at the hearing.

The amendment retains the provisions in the present law permitting the agency to omit entirely either an initial, tentative or recommended decision where the agency finds that "due and timely execution of its functions imperatively and unavoidably so requires." The current law permits this exception in the case of rulemaking or initial licensing. Consistent with the bill's other changes, the amendment has the effect of making this exception available in any matter heard pursuant to section 554(e). The exception would not apply as to any matter that became the subject of a formal trial-type hearing under section 554(f).

Where the agency heads intend to review the record thoroughly, reach their own decision, and prepare their own opinion, it may be faster for the agency heads to have an employee familiar with their thinking and policies, rather than the presiding employee, recommend a decision or draft a tentative decision, and then work with the agency heads in issuing the final decision. The recommended or tentative decision in such circumstances would be of more use to the agency heads, and be less likely to require substantial revision before a final decision. It also gives interested persons more accurate indication of the tentative thinking of the agency heads themselves.

Such expedited procedures will not reduce the quality of the decision. In any matter subject just to the informal procedures of section 554(e) policy questions will prevail over factual questions. Any factual findings will not rest on the demeanor or credibility of witnesses as they may in a trial-type proceeding under section 554(f). Consequently it will not be essential in these cases to have the official who presided over the hearing make an initial or recommended decision.

Furthermore, section 557(c) of the current Act requires the agency to give parties an opportunity to file exceptions to tentative or recommended agency decisions where the agency does not have the presiding employee issue the initial or recommended decision. The bill retains this provision. Consequently, parties are still assured the opportunity to learn the agency's tentative thinking. They will still have the opportunity to file comments on such thinking.

Finally, the amendment adds a new provision specifying that when the presiding employee does not issue a recommended or initial decision, the agency may require the presiding employee to submit, along with the record, such analysis of the record (and such findings) as the agency may require. Requiring the presiding employee to provide such analysis of the record may be another way to obtain the insights and conclusions of the presiding employee while at the same time expediting the time it takes to reach a final decision.

Vesting final authority in presiding employees or employee boards

Section 557(d). Section 204 adds a new section 557(d) to the Administrative Procedure Act authorizing agencies to establish employee boards to review initial or recommended decisions by the presiding employee. At the same time, the subsection authorizes the agency to rest final agency decision-making authority either in the employee who presides over the hearing, or in the employee board. When the agency delegates authority under this subsection to the presiding employee or the employee board, review by the agency heads would be at the discretion of the agency.

Currently there is uncertainty whether under section 557 agency heads can refuse to review an initial decision by lower level agency officials where review is requested by one of the participants. A report of the Administrative Conference has concluded that amendments to the Administrative Procedure Act are also required for some agencies to establish employee review boards. Both the American Bar Association and the Administrative Conference have recommended authorizing each agency to establish employee boards and to vest final authority for final decisions in such boards or in the official who presides over the hearing.

Delegatng final decision-making authority to the presiding employee will only expedite proceedings if the agency exercises its discretionary right of review in just those few cases where further review is clearly necessary. The provision therefore specifies certain procedures the agency must follow if the agency heads exercise their discretionary right of review. If the agency decides to review decisions of employee boards or presiding employees after delegating authority under this section, it must first publicly specify which issues will be reviewed and why review is necessary. For example, specified findings of fact may constitute reversible error, other specified findings may be contrary to law or agency rules or decisions, or certain findings of law may present especially important or novel issues. Review would be limited to those findings of fact or law specified by the agency when it agrees to review the decision.

In some cases the importance or complexity of the issues will make review by the agency itself inevitable. In those cases the agency should directly review the decision without waiting for an employee board to review it first. Otherwise, the matter will be subjected to an unnecessary layer of agency review, and inevitable delay. The provision therefore requires each agency to specify the conditions and circumstances under which it will act to take immediate jurisdiction over the review of an initial decision. The rule should indicate the category of decisions, if any, which will be subject to agency review without any intermediate review by an employee board. It should also indicate what procedures the agency will follow, on a case by case basis, to remove from board jurisdiction cases that would otherwise be subject to board review.

If an employee board is to reduce the number of decisions the agency heads review, review board members must be in tune with the thinking of the agency leadership, and be trusted by them. To assure this, the amendment gives the agency broad discretion in specifying the manner of selection and removal of the members of employee boards, and in selecting the type of employees chosen to serve on the board.

Finally, the amendment specifies that it does not supersede any preexisting provision of law governing a particular agency's ability to create review boards or to delegate final decision to one or more of its members or other employees. For example, several agencies such as the Interstate Commerce Commission, the Federal Communication Commission, and the Nuclear Regulatory Commission already have specific authority to create such boards. The Federal Mine Safety and Health Amendments Act of 1977 provided that review by the Federal Mine Safety and Health Review Commission of decisions by the Administrative Law Judge would be entirely at the discretion of the Commission. Similarly, some departments already have the authority to delegate final decision-making authority to a board or judicial officers. This saving provision is intended to preserve any such existing authority.

Reliance on employee boards should help reduce the delay now commonly experienced when action on the appeal of a large number of initial decisions is deferred until agency heads and their staff have time to review each one. The amendment will give agency heads more time to concentrate on establishing general policies and reviewing cases of special importance. Residing greater authority in the presiding employee to make the final decision in the case will also have the effect of increasing his authority and stature generally. This should make it easier for him to control and direct the course of the proceeding.

Conforming amendments

Section 557(e). Additional amendments to section 557 have been made to conform the section to the amendments in prior sections, and to further clarify the procedures available to the agency. The bill renumbers as subsection (e) the current subsection (d) prohibiting ex parte contacts during the course of the proceeding. It includes in the subsection the provision now in section 556 which authorizes an agency to consider a violation of the ex parte prohibitions when ruling on the merits of the case. The amendment is necessary as a technical matter since section 556, as amended, will not include all the types of formal proceedings to which these ex parte prohibitions apply under present law.

Scope of judicial review

Section 205. This section contains an amendment to the provisions in section 706 of the Administrative Procedure Act governing the review of agency action by a court. Section 706 of the current law authorizes the court to compel agency action unreasonably delayed. It complements the provision in Section 555(b) directing the agencies to conclude each matter presented to it within a reasonable time. The amendment specifies that in considering whether agency action has been unreasonably delayed, the court should consider the extent to which the agency has failed to meet any date announced for the completion of agency action pursuant to the requirements established in title I of this bill. Failure of an agency to meet its announced deadline will not be conclusive evidence that it has delayed action unreasonably. It will be one significant piece of evidence which the court shall consider, however, in considering a request to compel agency action.

Conforming amendments

Section 206. This section contains conforming amendments to section 553. 558, and 706 of the Administrative Procedure Act. Reference in those sections to sections 556 and 557 are amended so as to refer to section 554 in conformity with the bill's reorganization of those provisions.

The amendment to section 706 makes it clear that upon judicial review the substantial evidence test will continue to apply to all proceedings decided on the record after an opportunity for a hearing under section 554. Present law is not changed. The current standard will continue to apply in the case of proceedings considered pursuant to section 554(e), as well as proceedings considered in a trial type hearing under section 554(f).

The reference in subsection 553(c) to instances where rules are required by *statute* to be made on the record after an opportunity for an agency hearing is amended to refer instead to *law* in conformity with the previously described amendment to section 554(a).

TITLE III—ADMINISTRATIVE LAW JUDGES

Appointment of administrative law judges

Section 301. This section alters the provisions in section 3105 of title V of the United States Code governing the appointment of administrative law judges. The bill anticipates that administrative law judges will play an increasingly important role. Section 554, as amended by this bill, will require administrative law judges to play an active leadership role in shaping the record of the hearing, clarifying the issues, and bringing the hearing to a speedy conclusion. The bill's

amendment to section 557 encourages the agency to rest final decision-making authority in the presiding employees. It is therefore very important that agencies have the greatest flexibility possible to select individuals most able to fulfill this role anticipated for administrative law judges.

The Governmental Affairs Committee study found that under the present procedure an agency's choice of individuals to serve as administrative law judges is restricted in many instances to three people who have been ranked the highest on a list compiled by the Civil Service Commission. Selection of these three candidates are based on examinations, work experience, education, interviews, and preferences based on length of service with the government, status as a veteran, and other factors.

In order to increase the range of candidates from which it may choose, an agency often requests the Civil Service Commission to find that a particular administrative law judge position requires special experience in the regulatory field of concern to the agency. This permits an agency to select individuals on the list of qualified candidates even if they are not at the top of the list. It often results, however, in the agency selecting individuals who already work for the agency as attorneys, because they are most apt to possess the special expertise indicated. For example, a past study by the Administrative Law Conference reported that between 1964 and 1969, 52 of 66 administrative law judges appointed by this method had been previously employed on the staffs of the selecting agency. The selection of agency employees does not encourage public acceptance of the administrative law judges as impartial, independent decision-makers.

The Administrative Conference of the United States has recommended that the agency be allowed greater flexibility in selecting individuals to serve as administrative law judges.

Section 301 requires the Civil Service Commission to continue to maintain a list of eligible candidates. The Commission would continue to have responsibility for administering an appropriate written exam which an individual would have to pass in order to have his name appear on the list of eligible candidates. To appear on the list of eligible candidates an individual would also have to complete a specific number of years of relevant work experience. The extent or relevant work experience required would be determined by the Commission in the same manner as it does now. Any individual who achieves a minimum score established by the Civil Service Commission on the written exam, and who meets the minimum experience requirements, would be placed on the list of eligible candidates without having to meet additional qualifications. An agency which wishes to employ an administrative law judge would be free to select any individual appearing on the register regardless of the individual's relative place on that list.

The amendment further requires the agency to establish a panel to advise it on the selection process. The panel must contain at least one individual who is an attorney not employed by the United States government, and at least one individual who is not an attorney. This should assure that the perspective of non-lawyers, such as economists and others familiar with the work of the agency, will be considered. It also means members of the legal profession outside the agency will be consulted. The resulting cross-section of opinion should help assure the selection of the best possible candidates.

Reference to hearing examiners

Section 302. This section amends the references in title V to hearing examiners. The bill provides that henceforth they will be considered references to "administrative law judges." The latter term has for some time been the preferred way to describe such officials. Civil Service Commission regulations encourage use of the term "administrative law judge". 5 CFR § 930.203a. In light of the increased responsibilities anticipated by this bill's amendments, it is desirable that their actual status be recognized by statute.

TITLE IV—GENERAL PROVISIONS

Effective date

Section 401. This section establishes the effective date of the bill. The bill will become effective 180 days after the date of enactment. This will give each agency time to review its present procedures, consult with interested persons outside the agency, and issue the required amendments to its rules. The section requires each agency to adopt and announce its new rules no later than thirty days prior to the bill's effective date in order to give the public adequate opportunity to become familiar with them.

The section further provides that the agency need not include in the first annual reports required by section 103 any statistics on agency actions occurring prior to the effective date of the bill.

Mr. RIBICOFF. Mr. President, I ask unanimous consent that the Regulatory Procedures Reform Act be jointly referred to the Committees on the Judiciary and Governmental Affairs and that when one of the committees orders the measure reported the other committee shall then have 45 days to report or be discharged from further consideration of the matter.

Mr. LUGAR. Mr. President, reserving the right to object, has this been cleared?

Mr. RIBICOFF. Yes; this was cleared with Senator ABOUREZK and Senator EASTLAND. It is a bill being referred to both committees. There has been considerable discussion.

Mr. LUGAR. Has it been considered by the minority?

Mr. RIBICOFF. This is a matter so pro forma that I have not discussed it with the leadership on either side.

I will be glad to discuss it with Senator BAKER when he comes.

It is such a pro forma matter I did not think I had to clear a procedural thing like this with the minority leader.

Mr. LUGAR. I shall not object.

The PRESIDING OFFICER. Without objection, it is so ordered.

By Mr. WILLIAMS:

S. 2491. A bill to permit the Secretary of Defense to authorize officers and employees of the Department of Defense who provide police or security functions, including individuals employed pursuant to contract with the Department of Defense, to have the power of arrest on military facilities and installations, and for other purposes; to the Committee on Armed Services.

PEACE OFFICER STATUS FOR CIVILIAN EMPLOYEES OF THE DEPARTMENT OF DEFENSE

Mr. WILLIAMS. Mr. President, I would like to take a few minutes to bring to the attention of my esteemed colleagues a problem which has resulted from the Army's increased use of civilian employees to perform functions formerly handled by military personnel. I was first made aware of this problem by Mr. Frank McGuffin, president of Local 1550 of the National Federation of Federal Employees.

Although all law enforcement and security functions on military installations have historically been handled by the military police, the Department of Defense now employs a number of civilians in a law enforcement capacity. These civilians perform all the functions formerly performed by the military police, yet they possess no arrest powers beyond that of an ordinary citizen's arrest. The resultant situation has seriously undermined both the morale of these employees, whose lack of status as peace officers leaves them vulnerable to legal action on grounds of false arrest and their effectiveness as law enforcement officers since the people with whom these employees deal are well aware of their lack of warrantless arrest powers.

The Department of Defense perceives the need to grant these civilian employees arrest powers. Since this need has arisen only recently, however, the Secretary of Defense lacks the statutory authority to appoint civilian employees as special police empowered to make warrantless arrests. I, therefore, am introducing a bill to permit the Secretary of Defense to grant arrest powers to civilian employees who perform law enforcement or security functions on military facilities and installations.

Mr. President, at this point I ask unanimous consent that the text of my bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2491

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding any other provision of law, the Secretary of Defense is authorized to invest officers and employees of the Department of Defense, including individuals employed pursuant to a contract, who provide police or security services to the Department of Defense, with the power to arrest individuals on military facilities and installations.

By Mr. DOLE (for himself, Mr. THURMOND, and Mr. MCCLURE):

S. 2492. A bill to amend the Meat Import Quota Act of 1964; to the Committee on Finance.

AMENDMENT TO THE MEAT IMPORT QUOTA ACT OF 1964

Mr. DOLE. Mr. President, the American livestock industry is unique among other commodities in that there is a law on the books dealing with the question of fresh-chilled and frozen meat imports, the Meat Import Quota Act. This law passed in 1964. It is a unique law in that it not only provides a degree of reasonable protection for the domestic livestock industry, but also provides guaranteed access to the United States on the part of exporting nations.

There is a major flaw needing correction and several clarifying amendments in order to make the law more equitable and workable. For that reason I am introducing a bill to amend the law. The prime thrust is designed to build into the Meat Import Act what is referred to as a countercyclical formula. As now structured the law permits more meat to be imported in those years when U.S. beef production is high and less when pro-

duction is down. It should be just the opposite.

Under the suggested formula, yearly import quotas would be adjusted in inverse proportion to changes in per capita U.S. production of cow beef. At present, import quotas rise or fall along with the same trends in total U.S. beef output. The suggested formula would have imports decreasing when U.S. production of cow beef increased cyclically, and vice versa. This would help provide more stability of supplies and prices.

Cattle industry spokesmen and others have recommended the countercyclical approach.

As previously noted, the quota formula change is one of a number of changes in the law which are needed.

Other proposed changes are, first, all beef and veal, regardless of form or origin should be covered. (The law now covers fresh, frozen, or chilled.) These amendments also are needed to prevent any further circumvention of the law. Second, quarterly rather than annual quota determination—so that we will not have a disproportionate share of a year's quota crowded into a single quarter, causing an abnormal impact in a short period. Third, a study of past imports and recommendations to assist in the prevention of disproportionate shipments through limited numbers of ports of entry.

In developing a countercyclical formula, it was concluded that cow slaughter and per capita cow beef production are the best indicators of a specific stage of cattle cycle. Also, the formula addresses itself to the fact that boneless beef imports are more competitive with cow beef than with other types of domestic beef.

The suggested new formula is shown in table 1. As you can see, the adjusted base quota as currently determined under the law would be further adjusted to reflect the cyclical changes in per capita cow beef production.

The numerator of the modifying fraction is a 10-year moving average of per capita cow beef output. A 10-year moving average is used, because this is the approximate length of a cattle cycle; it introduces the cyclical factor in domestic production. The denominator of the fraction is an average of 2 years' per capita output-production in the year prior to the year under consideration and estimated production in the year for which the quota is being determined. Using these 2 years as part of the formula updates the adjusted base quota.

The figures in the ratio fraction in table 1 represent per capita cow beef production on a carcass weight basis. The adjusted base quota and proposed new quota are on a product weight basis.

Table 2 shows how the suggested change would have worked in the past and how it would work in the future in determining quotas. The second column in the table is the ratio which is obtained by dividing as shown in table 1. When this ratio is multipled by the adjusted base quota under the current formula, one comes up with the proposed new quota.

The final column in table 2 shows the amount by which the new quota would vary up or down from the quota as determined under the present law. During the last 4 years—the liquidation period of the current cycle—the quota would have been less each year.

I ask unanimous consent that the tables together with a history of the meat import law be included in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

TABLE 1.—PROPOSED FORMULA TO AMEND MEAL IMPORT LAW OF 1964

$$A \times \frac{B}{C} = Q \text{ (New Proposed Quota)}$$

A = Adjusted base quota as calculated under the 1964 meat import law.

B = Base period—This is a 10-yr moving average of per capita production of commercial cow beef. It is the 10 yr prior to year under consideration.

C = Average of 2-yr per capita cow beef production—including the year previous to and an estimate of the year under consideration.

Example for 1977

$$\underset{(A)}{1{,}165{,}400{,}000 \text{ lb}} \times \frac{\underset{(B)}{17.98 \text{ lb}}}{\underset{(C)}{23.25 \text{ lb}}} = \underset{(Q)}{897{,}400{,}000 \text{ lb}}{}^{1}$$

[1] New quota would equal 1,229,400,000 lb. on carcass weight equivalent basis or 5.7 lb per capita).

TABLE 2.—HOW THE PROPOSED CHANGE WOULD HAVE WORKED AND WILL WORK

Year	Adjusted base quota (from meal import law of 1964)	Ratio—base period divided by 2-yr average	New proposed quota	Differences from adjusted base quota
	Million pounds		Million pounds	Million pounds
1965	848.7	1.03	874.2	+25.5
1966	890.1	.96	854.5	−35.6
1967	904.6	.98	886.5	−18.1
1968	950.3	.98	931.3	−29.6
1970	998.8	1.03	1,028.8	+30.0
1971	1,025.0	1.07	1,096.7	+71.7
1972	1,042.4	1.10	1,146.6	+104.2
1973	1,046.8	1.11	1,161.9	+115.1
1974	1,027.9	1.03	1,058.7	+30.8
1975	1,074.3	.78	837.9	−236.4
1976	1,120.9	.70	784.6	−336.3
1977	1,165.4	.77	897.4	−268.0
1978 [1]	1,180.0	.89	1,050.2	−128.7
1979 [1]		1.02		
1980 [1]		1.09		
1981 [1]		1.13		

Note: All figures product weight.

[1] Estimates.

HISTORY OF THE MEAT IMPORT LAW (PUBLIC LAW 88–482) AND PROGRAM FOR 1977

Following a ten-year rise in imports and a sharp decline in U.S. cattle prices, Congress passed an Act on August 22, 1964 (P.L. 88–482), hereinafter referred to as "the Law") to maintain control over the growth of imports so as not to place undue stress on domestic cattle prices. Under the Law, imports of fresh, chilled or frozen beef, veal, mutton and goat meats are allowed to grow, from a base of 725.4 million pounds, at the same rate as domestic commercial production of these meats in the 1959–63 base period compared to the most recent three-year average (including an estimate of production in that year). A 10 percent overage is allowed, so that only when imports are expected to exceed the adjusted base quota level by 10 percent are those quotas triggered. Each year the Secretary of Agriculture is required to publish in the Federal Register the estimated quantity that would trigger the imposition of quotas under the Law, and quarterly, the quantity of meat that, but for the Law, would enter the United States in such calendar year.

If the Secretary's estimate of imports exceeds the trigger level, the President is required by law to invoke quotas on imports of meats subject to the Law. Quotas may be suspended or the total quantity increased if the President determines and proclaims that,

"(1) such action is required by overriding economic or national security interests of the United States, giving special weight to the importance to the nation of the economic well-being of the domestic livestock industry;

"(2) the supply of articles of the kind described . . . will be inadequate to meet domestic demand at reasonable prices; or

"(3) trade agreements entered into after the date of the enactment of this Act ensure that policy set forth will be carried out."

In the first three years after the Law was passed, imports were below the trigger point for quota imposition. But by mid-1968 it was apparent that the year's imports would exceed the trigger quantity, and in August Australia and New Zealand were asked to restrain shipments voluntarily in order to avoid quotas. The other 11 supplying countries (eligible because they also were certified to be free of foot-and-mouth disease and met U.S. meat inspection standards) were asked to hold to shipments already scheduled. Imports in 1968 were above the quota level but below the trigger point.

For 1969 all supplying countries, except Canada and the United Kingdom, agreed to a restraint level below the trigger quantity. The program worked fairly well, although imports exceeded the restraint level somewhat and imports from one country—Honduras—had to be embargoed. The authority to negotiate "voluntary" agreements and restrict imports to the agreed quantity is provided by Section 204 of the Agricultural Act of 1956.

For 1970 a restraint program was negotiated with a target below the trigger point as was the case in previous restraint programs. Imports were extremely heavy, however, and at mid-year two actions were taken:

(1) The President proclaimed and then suspended quotas, and a new restraint level was authorized at a higher level than the trigger quantity, and (2) Section 204 was used to embargo transshipments through Canada, thus closing a serious loophole in the program. Section 204 also was used to hold five supplying countries to their restraint agreements.

For 1971 the restraint program continued at the level established in late 1970. This was higher than the trigger quantity for 1971 and required Presidential action to proclaim and suspend quotas as was done the year before. Actual 1971 imports were 48 million pounds below the restraint level, largely because of U.S. dock strikes.

For 1972 a restraint program 7 percent higher than the 1971 program was agreed to by the principal supplying countries. At mid-year the voluntary restraint program was suspended by the President in order to encourage greater shipments of beef to the United States at a time when retail prices were high and other major importing countries had removed import duties and levies or issued larger quotas to compete for limited world supplies.

Quotas under the Law were invoked by the President in both 1973 and 1974 but simultaneously suspended because of overriding economic interests. As the year 1974 progressed, domestic cattle slaughter increased significantly with a large part of the increase coming from greater slaughter of culled cows and non-fed steers and heifers. Imported beef competes principally with this type of domes-

tic production. As a consequence of this larger domestic production, prices for manufacturing grade beef fell and imports slowed so that by year's end they were below the point which would permit the imposition of quotas:

In 1975 and 1976 the Department of State negotiated programs of export restraint with supplying countries to keep imports below the trigger level. In 1976, larger than anticipated imports from Canada who was not a participant in the voluntary restraint program caused the Secretary of Agriculture to estimate in October that imports would exceed the trigger level.

This estimate caused the President to invoke formal quotas under the Meat Import Law. The Secretary of Agriculture in setting the individual country allocations took into consideration the voluntary restraint program that had been previously negotiated with 11 of the 15 supplying countries.

For 1977, a similar program of voluntary restraints is in place. Imports from Canada who has not formally participated in earlier programs will be covered by the 1977 arrangements and entries of meats processed in foreign-trade zones, trust territories, or possessions after January 1, 1977 will be counted against the individual country limitations.

[1] Summation of individual country commitments and/or the voluntary restraint program.
[2] New restraint program following suspension of quotas under Public Law 88-482.
[3] Revision in estimated imports from Canada.
[4] No voluntary restraint program after suspension of quotas.
[5] Revision in estimated imports.
[6] New restraint program implemented for calendar year 1975 following suspension of quotas under Public Law 88-482 since June 26, 1972.
[7] Restraint program implemented below trigger level under Public Law 88-482 since June 26, 1972.
[8] Less than 110 percent of adjusted base quantity.
[9] Quotas imposed and increased to trigger level.

[35 F.R. 10733, July —, 1970, the President, Executive Order 11539]

DELEGATIONS OF AUTHORITY TO NEGOTIATE AGREEMENTS AND ISSUE REGULATIONS LIMITING IMPORTS OF CERTAIN MEATS

By virtue of the authority vested in me by section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and section 301 of title 3 of the United States Code, and as President of the United States, it is ordered as follows:

SECTION 1. The Secretary of State, with the concurrence of the Secretary of Agriculture and Special Representative for Trade Negotiations, is authorized to negotiate bilateral agreements with representatives of governments of foreign countries limiting the export from the respective countries and the importation into the United States of fresh, chilled, or frozen cattle meat (item 106.10 of the Tariff Schedules of the United States) and fresh, chilled, or frozen meat of goats and sheep, except lambs (item 106.20 of the Tariff Schedules of the United States) which are the products of such countries.

SEC. 2. The Secretary of Agriculture, with the concurrence of the Secretary of State and the Special Representative for Trade Negotiations, is authorized to issue regulations governing the entry or withdrawal from warehouse for consumption in the United States of any such meats to carry out any such agreement.

SEC. 3. The Commissioner of Customs shall take such actions and supply such information to the Secretary of Agriculture with respect to entry or withdrawal from warehouse for consumption in the United States of such meats as the Secretary of Agriculture, with the concurrence of the Secretary of State and the Special Representative for Trade Negotiations, may request to carry out any such agreements or regulations.

SEC. 4. Heads of departments and heads of agencies are hereby authorized to redelegate within their respective departments or agencies the functions herein assigned to them, except that the function of negotiating agreements delegated to the Secretary of State by section 1 and the function of issuing regulations delegated to the Secretary of Agriculture by section 2 of this order may be redelegated only to officials required to be appointed by and with the advice and consent of the Senate, as provided by 3 U.S.C. 301.

RICHARD NIXON.

THE WHITE HOUSE, *June 30, 1970.*

[F.R. Doc 70-8539; Filed, July 1, 1970; 11:23 a.m.]

[Public Law 88-482, 88th Congress, H.R. 1839, August 22, 1964]

An act to provide for the free importation of certain wild animals, and to provide for the imposition of quotas on certain meat and meat products

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) item 852.20 of title I of the Tariff Act of 1930 (Tariff Schedules of the United States; 28 F.R., part II, August 17, 1963) is amended to read as follows:

"852.20. Wild animals (including birds and fish) imported for use, or for sale for use, in any scientific public collection for exhibition for scientific or educational purposes: Free."

(b) Headnote 1 of part 4 of schedule 8 of such title I is amended by striking out "item 850.50," and inserting in lieu thereof "items 850.50 and 852.20,".

(c) The amendments made by this section shall take effect on the tenth day after the date of the enactment of this Act.

SEC. 2. (a) It is the policy of the Congress that the aggregate quantity of the articles specified in items 106.10 (relating to fresh, chilled, or frozen cattle meat) and 106.20 (relating to fresh, chilled, or frozen meat of goats and sheep (except lambs)) of the Tariff Schedules of the United States which may be imported into the United States in any calendar year beginning after December 31, 1964, should not exceed 725,400,000 pounds; except that this quantity shall be increased or decreased for any calendar year by the same percentage that estimated average annual domestic commercial production of these articles in that calendar year and the two preceding calendar years increases or decreases in comparison with the average annual domestic commercial production of these articles during the years 1959 through 1963, inclusive.

(b) The Secretary of Agriculture, for each calendar year after 1964 shall estimate and publish—

(1) before the beginning of such calendar year, the aggregate quantity prescribed for such calendar year by subsection (a), and

(2) before the first day of each calendar quarter in such calendar year, the aggregate quantity of the articles described in subsection (a) which (but for this section) would be imported in such calendar year.

In applying paragraph (2) for the second or any succeeding calendar quarter in any calendar year, actual imports for the preceding calendar quarter or quarters in such calendar year shall be taken into account to the extent data is available.

(c) (1) If the aggregate quantity estimated before any calendar quarter by the Secretary of Agriculture pursuant to subsection (b) (2) equals or exceeds 110 percent of the aggregate quantity estimated by him pursuant to subsection (b) (1), and if there is no limitation in effect under this section with respect to such calendar year, the President shall by proclamation limit the total quantity of the articles described in subsection (a) which may be entered, or withdrawn from warehouse, for consumption, during such calendar year, to the aggregate quantity estimated for such calendar year by the Secretary of Agriculture pursuant to subsection (b) (1).

(2) If the aggregate quantity estimated before any calendar quarter by the Secretary of Agriculture pursuant to subsection (b) (2) does not equal or exceed 110 percent of the aggregate quantity estimated by him pursuant to subsection (b) (1), and if a limitation is in effect under this section with respect to such calendar year, such limitation shall cease to apply as of the first day of such calendar quarter; except that any calendar year shall continue in effect for the fourth calendar quarter of such year unless the proclamation is suspended or the total quantity is increased pursuant to subsection (d).

(3) The Secretary of Agriculture shall allocate the total quantity proclaimed under paragraph (1), and any increase in such quantity pursuant to subsection (d), among supplying countries on the basis of the shares such countries supplied to the United States market during a representative period of the articles described in subsection (a), except that due account may be given to special factors which have affected or may affect the trade in such articles. The Secretary of Agriculture shall certify such allocations to the Secretary of the Treasury.

(d) The President may suspend any proclamation made under subsection (c), or increase the total quantity proclaimed under such subsection, if he determines and proclaims that—

(1) such action is required by overriding economic or national security interests of the United States, giving special weight to the importance to the nation of the economic well-being of the domestic livestock industry;

(2) the supply of articles of the kind described in subsection (a) will be inadequate to meet domestic demand at reasonable prices; or

(3) trade agreements entered into after the date of the enactment of this Act ensure that the policy set forth in subsection (a) will be carried out.

Any such suspension shall be for such period, and any such increase shall be in such amount, as the President determines and proclaims to be necessary to carry out the purposes of this subsection.

(e) The Secretary of Agriculture shall issue such regulations as he determines to be necessary to prevent circumvention of the purposes of this section.

(f) All determinations by the President and the Secretary of Agriculture under this section shall be final.

Approved August 22, 1964.

Legislative History:

House reports: No. 25 (Comm. on Ways & Means) and No. 1824 (Comm. of Conference).

Senate report No. 1167 (Comm. on Finance).

Congressional record:

Vol. 109 (1963): Feb. 26, considered and passed House.

Vol. 110 (1964): July 27, considered in Senate.

July 28, considered and passed Senate, amended.

Aug. 11, House disagreed to Senate amendments and requested conference.

Aug. 18, House and Senate agreed to conference report.

The formula for deriving the quota and trigger point under the Meat Import Law is:

1. b/a=C×725,400,000 lbs.=Quota
2. Quota×1.10=Trigger Point

a=average U.S. production of beef, veal, mutton and goat meat for the period 1959 to 1963.

b=3 year moving average of U.S. production of beef, veal, mutton and goat

The following data for 1977 is provided: U.S. production of beef, veal, mutton and goatmeat:

Million pounds—carcass weight equivalent

1959	14,211
1960	15,461
1961	15,954
1962	15,935
1963	16,952
Average 1959-63	15,703

Million pounds—carcass weight equivalent

1975	24,541
1976 [1]	26,386
1977 [2]	24,757
Average 1974-76	25,228

[1] Estimate.

[2] Forecast.

25,228/15,703=1.6066

1.6066×725,400,000=1,165,400,000

Quota level is 1,165.4 million lbs of product weight imports, and 1,165.4 million × 1.10=1,281.9 million lbs of product weight imports is the trigger point for 1977.

Things to keep in mind about the 1964 Meat Import Law:

(1) The Law applies only to imports of fresh, chilled or frozen beef, veal, mutton and goat meat. Imports of pork, lamb and prepared or preserved beef and veal are not subject to the law.

(2) The Law permits imports to grow at the same rate as domestic production grows from a base period.

(3) For 1977 the level of permissable imports is 1,165.4 million pounds. The Law makes no provision for reducing imports below this quantity.

(4) If the Secretary of Agriculture's quarterly estimate of animal imports exceeds 110 percent of 1,120.9 million pounds in 1977, (1,281.9 million pounds) the President is required to invoke import quotas. He may suspend or increase the quotas. The quota level for 1977 would be 1,165.4 million pounds.

By Mr. CHURCH (by request):

S. 2494. A bill to protect the wildlands comprising the River of No Return Wilderness and the free-flowing Salmon River in the State of Idaho as an enduring resource of wilderness for the benefit of the people of Idaho and the Nation pursuant to the Wilderness Act and the Wild and Scenic Rivers Act, and for other purposes; to the Committee on Energy and Natural Resources.

RIVER OF NO RETURN WILDERNESS ACT OF 1978

Mr. CHURCH. Mr. President, today I am introducing, by request, a citizen-proposed bill for the preservation of the unique wilderness of central Idaho. This proposal, prepared by the River of No Return Wilderness Council, calls for the designation of a 2,320,688-acre River of No Return Wilderness and for the protection of the full 237 miles of the main Salmon River under the Wild and Scenic Rivers Act.

In coming weeks, other proposals for the reclassification as wilderness of the Idaho and Salmon River breaks primitive areas and surrounding lands may also be introduced. For example, the administration is soon expected to come forward with the proposal promised in President Carter's May 23, 1977, environmental message. At that time, the President said he intended to submit to Congress "an enlarged and expanded" proposal on behalf of the administration for reclassification of the primitive areas. Other alternative plans for this area of Idaho may also be introduced.

Public hearings, held by the Senate Energy and Natural Resources Committee, both in Idaho and in Washington, will provide the forum for comparison of alternative proposals and for developing additional information to assist Congress in reaching a wise and well-balanced decision.

Mr. President, the River of No Return Wilderness Council—an Idaho-based, nonprofit organization of conservationists, hunters, fishermen, and other outdoor enthusiasts—has prepared a statement of explanation in support of this bill. This statement was prepared in great part by one of Idaho's long-time

conservationists, and best known outdoor writers, Ted Trueblood. I ask unanimous consent that the statement be printed in the RECORD at this point, together with the text of the bill.

There being no objection, the statement and bill were ordered to be printed in the RECORD, as follows:

RIVER OF NO RETURN WILDERNESS COUNCIL

This bill proposes to extend permanent protection under the Wilderness Act to a unique and spectacular area of rivers and lakes rugged peaks and deep canyons that lies near the heart of Idaho. The area is bisected by the main Salmon River, whose deep canyon turned back Lewis and Clark and is today still unpenetrated by roads. The bill also extends Wild and Scenic River protection to the main Salmon River.

It is significant that in 1931, when Idaho had but 445,000 people in all its 83,000 square miles, the value of the central Idaho wilderness was already recognized and the first steps were taken to protect it by administrative classification. The core of this area has been managed as wilderness by the Forest Service for almost 47 years.

The "Idaho Primitive Area", created by executive order in 1931, is south of the Salmon River; the "Salmon River Breaks Primitive Area" slopes down to the Salmon from the north and was set aside in the same manner in 1936. These two administratively-established primitive areas, of 1,224,576 and 216,870 acres respectively, are the heart of the proposed "River of No Return Wilderness." The Middle Fork of the Salmon River, one of the original wild river segments designated by the 1968 Wild and Scenic Rivers Act, flows north through the Idaho Primitive Area.

THE FOREST SERVICE STUDY

The 1964 Wilderness Act required that adminstratively-established primitive areas would undergo special study, as the first step in upgrading those areas (with appropriate boundary modifications) to the stronger protection available as a statutorily-designated unit of our National Wilderness Preservation System. The Forest Service has made these studies, as well as the study of the main Salmon River required by the 1968 Wild and Scenic Rivers Act.

While the Forest Service study was underway, a broad-based group of Idaho citizens came together to conduct their own "citizen studies" of this very special area. The group included conservationists, representatives of wildlife clubs, outing groups, hunters, fishermen, and many others. Ultimately the group was formalized as the River of No Return Wilderness Council, and it produced a full scale citizen proposal for the "River of No Return Wilderness." That proposal embraces the two established primitive areas, together with key contiguous tracts vital to an ecologically-sensitive and well-rounded wilderness boundary.

In November 1973 the Forest Service conducted day-long public hearings to receive public comment on their study and proposal, and on alternative proposals put forward by others. These hearings, which are part of the process required by the Wilderness Act, were held in Boise, Lewiston, and Pocatello, Idaho,

The Forest Service has prepared a detailed summary and analysis of the public responses it received at the hearings and in written form during the post-hearing period.

WHAT THE PEOPLE WANT

This public involvement process for the central Idaho wilderness was one of the most extensive ever conducted by the Forest Service for a specific area, and certainly the most extensive ever conducted in Idaho. The message was loud and clear: the majority of public support favored not only the modest proposal of the Forest Service, but the full 2.3 million acre citizen proposal for the "River of No Return Wilderness." That same proposal, so strongly endorsed by the people, is now embodied in the legislation being introduced today.

In summarizing the results of those public hearings and all the written input received, it is useful to compare the responses to the three main plans offered as alternatives to the Forest Service recommendation. In addition to the 2.3 million acre "River of No Return Wilderness" proposal, two others were suggested. The Boise-Cascade Corporation plan called for no wilderness at all, with a small area of "roadless recreation" land along the rivers to be left under administrative designation, and a million acres of the existing primitive areas to be thrown open to "graduated multiple use." The alternative plan put forward by then-Governor Cecil Andrus called for a wildnerness area of at least 1.8 million acres, centered on key protection for the watershed of the Middle Fork of the Salmon River.

As summarized by the Forest Service, the public choice among these alternatives was overwhelmingly for the full 2.3 million acre "River of No Return Wilderness" proposal.

In total, 4,883 "inputs (oral and written) were received commenting on these three alternatives. Of those, 3,543, favored the River of No Return Wilderness Council's alternative, and an additional 935 favored the Governor's proposal. Only 124 "inputs" supported the Boise-Cascade Corporation plan. Significantly, 257 specifically expressed their opposition to the Boise-Cascade Corporation plan, while only 14 stated specific opposition to the River of No Return Wilderness Council's alternative and only 10 specifically opposed the Governor's plan.

Looking at these results by type of input, the oral testimony in the three Idaho hearings was overwhelmingly in support of the proposal of the River of No Return Wilderness Council. 184 witnesses endosed this citizen proposal, as against 6 who spoke in favor of the Boise-Cascade Corporation plan: a ratio of 30 to 1. The citizen proposal was preferred to the 1.8 million acre Governor's plan by a ratio of 4 to 1. Counting personal letters submitted for the hearing record (but excluding form letters), the Forest Service found again that support was overwhelmingly for the citizen proposal. Of nearly 4,000 personal letters, the ratio was 55 to 1 against the Boise-Cascade Corporation plan, and the citizen proposal was preferred 4 to 1 over the somewhat smaller Governor's proposal.

These results speak for themselves. The people favored the "River of No Return Wilderness" as now proposed in this legislation, by 4 to 1 over the next largest alternative.

These results are entirely consistent with other polls which have found that the people of Idaho want wildnerness as a part of their future. This is Idaho's greatest wilderness. With the future of the most precious jewel of Idaho's remarkable wilderness heritage at stake, the people of Idaho were overwhelmingly in support of the carefully-developed "River of No Return Wilderness" proposal.

THE IDAHO CITIZEN'S PROPOSAL

The plan prepared by the River of No Return Wilderness Council, and now embodied in this legislation for consideration by the Congress, is based upon the protection of the existing primitive areas, and on additional lands which are absolutely vital to fully preserve the unique scenic, recreational, fishery, archaeological, and wildlife values of this area.

To accomplish this, the River of No Return Wilderness Council believes that 14 areas of wilderness quality contiguous to the original primitive areas should be included as integral parts of the proposed wilderness.

The first purpose is to maintain the high water quality of the Middle Fork of the Salmon River. This is a big river, a tributary contributing nearly a million acre-feet of crystal-clear water per year to the Salmon River and, ultimately, to the Columbia. Not only is this water vital to the maintenance of the anadromous fish in the Columbia, the unsurpassed spawning riffles of the Middle Fork and its tributaries produce a major portion of the spring and summer Chinook salmon and steelhead smolts that eventually find their way to the Pacific.

In addition, the west-slope cutthroat trout, which was native to the Middle Fork and its tributaries, still thrives there. It requires clear, pure water and it has disappeared from other western rivers where roads and logging have hastened erosion and degraded the streams.

Among the 190-some kinds of wildlife that have been identified in the proposed wilderness are Rocky Mountain goats and bighorn sheep. Both have critical habitat requirements. They are not compatible with roads and logging, and the good ranges that remain are extremely limited. Some of the contiguous tracts proposed by the River of No Return Wilderness Council are important for sheep or goats; others provide moose habitat, which is also limited.

Still others of these contiguous tracts have been proposed for inclusion because of their recreational and scenic values. Their high Alpine terrain, with jagged peaks, sparkling lakes, and flower-dotted meadows, is not productive timber land, but it is an inspiring land to visit and valuable as watershed.

The proposed wilderness has a great range in elevation—from 2,000 to 10,000 feet above sea level. This is responsible for the wonderful variety of plant, bird, and animal life. At the lower elevations where the first Americans once spent their winters and the deer, elk, and sheep still do, the summer days are hot, but the south slopes are often bare in January. The high country is lush in summer but buried under deep snow in winter, and some of that snow remains the year around under the peaks.

THE KEY CONTIGUOUS TRACTS

The existing two primitive areas comprise the heart of this great wilderness. Full protection for the watersheds, the wildlife, and the recreational values of the area require the addition of 14 contiguous tracts. Each is briefly described here:

1. Clear Creek. The Forest Service proposal included only 8,020 acres. An additional 72,000 should be included to take in the Clear Creek drainage. This area is important to elk and bighorn sheep and is a buffer for the Bighorn Crags to the West.

2. Yellowjacket. Adjacent to the Bighorn Crags, this important fragile-soils area varies from 5,500 to 9,000 feet and includes several lakes and gentle alpine basins.

3. Camas Creek. An important anadromous fish spawning stream and a major drainage of the Middle Fork. Upper Camas Creek is a summer range and part of the migratory route for bighorn sheep wintering in Morgan Creek.

4. Warm Springs. The Forest Service proposal excluded a major portion of the Loon Creek drainage that is unroaded. This is another Middle Fork tributary, an important salmon spawning stream. There are numerous alpine lakes in the Sleeping Deer Mountains area.

5. Vanity Lakes. An alpine area with outstanding mountain lake fishing and scenery.

6. Soldier and Cutthroat Lakes. The most extensive lake system, other than the Bighorn Crags, is the Middle Fork drainage. An area of exceptional beauty, drained by Rapid River, a major Middle Fork tributary.

7. Sulphur Creek. Lying about four miles east of Deadwood Summit, this area contains Sulphur Creek which meanders

through a broad valley for eight miles including deciduous thickets and beaver dams. This is the second most important chinook salmon spawning water on the west side of the Middle Fork drainage (second only to Big Creek.) All but a small portion of the drainage is intact.

8. Chilcoot. Deep glacial troughs with marshes and meadows behind moraines provide a unique ecological system.

9. Pinnacles. A spectacular alpine lake area in the upper reaches of the Big Creek drainage. This area provides habitat for cougar, bear, elk, goats, deer and sheep, with numerous lakes, streams and beaver dams. A key summering area for elk.

10. South Fork Salmon. The Forest Service included an area on the east side. An area is also needed on the west side of the South Fork to protect the lower 14 miles, an outstanding stretch of this river. This is critical big game winter range.

11. Dixie Tall. The Dixie Tall of the Salmon River Breaks Primitive Area is important bighorn sheep range, a stronghold for sheep on the lower Salmon River. Without this area, there would be only a one-fourth mile wild river corridor on the west side of the main Salmon River in this area.

12. Big Mallard Creek. A 24,487-acre north of the Salmon River important to the Salmon watershed. This is an elk calving area and a valuable summer range for both elk and moose. Moose habitat is not abundant in Idaho. (Logging is proposed for this area).

13. Upper Bargamin Creek. Also a valuable moose summer range area and important to the Salmon River watershed. (Logging is proposed).

14. Upper Reynolds Creek. This is an area of highly unstable soils. Five alpine lakes and a summer area for elk.

THE BILL SUMMARIZED

The text of the River of No Return Wilderness bill is self-explanatory. All who are concerned with this issue should read it carefully.

Briefly, the objective of this proposal is to secure an adequate wilderness in the Salmon River country, in the heart of Idaho. Other proposals, calling for less of the critical contiguous tracts to be protected, are simply inadequate. The full 2.3 million acre area is vital; any reduction from it will result in a loss that cannot be replaced.

The opening sections of the bill spell out its objectives, recognizing that this is a wilderness and wildlife resource of truly national significance. The waters it protects are critical to the greatest runs of anadromous fish we have, and those waters could easily be defiled by road building, logging, or other land disturbance. In its present natural condition, this magnificent area represents perhaps our best sample of the wilderness heritage of Idaho and the Mountain West. We can preserve it all in a way which enhances its many values, without conflicting with established uses (such as hunting, existing patterns of access, and guide and outfitter services). The River of No Return Wilderness Council favors continuation of such existing uses, including the backcountry air strips, existing power boat use on the main Salmon River, and the management facilities associated with outfitter and guide services.

This legislation proposes a comprehensive statutory framework to guide the future protection and management of the area. Wilderness designation and wild river classification are embodied in a single bill. Full provision is made to protect the area and its waters and wildlife against their principal threats: logging, roadbuilding, and location of new mining claims. Existing rights—including valid existing mining claims—will be fully protected. As the Wilderness Act provides, recurring mineral surveys will be conducted by our expert government mineral agencies to assure an up-to-date assessment of mineral values should an emergency arise that might require Congress to consider opening up some part of the area.

Section 5 of the bill is included to stress that established uses may continue, just as is already specified in the provisions of the 1964 Wilderness Act. Each of those provisions—concerning established aircraft and motorboat use, established grazing of livestock, commercial services (such as guide and outfitter services), State water law, and fish and wildlife jurisdiction—are restated verbatim from the Wilderness Act, for emphasis.

THE HEART OF IDAHO

The debate over wilderness is often heated. Confusion and misunderstanding can blur the real issues. A frequent misunderstanding likely to be heard again in this debate was singled out in the Forest Service's analysis of the earlier public hearings. It is worth quoting here:

"Many of those opposing classification of the Primitive Areas or the Salmon River stated they favored "multiple use management" instead. The fact that wilderness is itself a resource which embodies several of the multiple uses of the National Forests and is consistent with the Multiple Use-Sustained Yield Act is not readily understood by the public.

This misunderstanding requires a broader perspective, and a better understanding. Both are provided by those two excerpts from a speech about this area made in 1975 by then-Governor of Idaho Cecil Andrus:

"To me, and from my viewpoint, Idaho's wilderness is its heart.

"In Idaho, as in the rest of the Northwest, we have branded our great natural inheritance with various signs of our civilization. We have built dams and logged forests; mined and dredged.

"We have turned plains into pasture and sloping valleys or flat river bottoms into irrigated farms that look from the air like green, gold and brown sections of a giant patchwork quilt.

"By domesticating much of our wild country, we have, in many cases, made it uninhabitable for fish and wildlife. In the wake of development then, we have traded some of our inheritance.

"Of Idaho's 53 million acres, approximately 11,000,000 acres remains much like it always was. The question currently before all of us is, how much of it can and will be wilderness in the future?

"In the context of mining, logging, and motorized recreation, the words multiple use refer only to people—not to wild life and (the) green plant base that is so important to the fragile granite soils of Idaho's primitive areas.

"On the other hand, the concept of Wilderness enables use and enjoyment of an area by hunters, backpackers, photographers, fishermen, boaters, floaters, researchers, outfitters, guides, and pilots—all on a renewable basis that does minimum damage to the environment and creates minimum interference with the natural fish and game cycles."

This is the essential perspective: to see wilderness as land which does indeed serve many needs for people, as land truly devoted to multiple use.

The "River of No Return Wilderness" will preserve this heartland of Idaho. Its clear waters will still flow free. Its native wildlife, in unsurpassed abundance, will roam free, protected in a wilderness area encompassing the whole ecological system. Here will remain, as it has always been, a wilderness paradise to be treasured by all Idahoans and all Americans, for this and for future generations.

S. 2494

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "River of No Return Wilderness Act of 1978".

STATEMENT OF FINDINGS AND POLICY

SEC. 2. (a) The Congress hereby finds that—

(1) The Salmon River of Idaho—the famous "River of No Return"—and its wildland environment constitute a wilderness resource of national significance;

(2) The pure, high quality waters of the Salmon River provide the critical spawning and rearing habitat for runs of Chinook salmon, steelhead, and other anadromous and resident fish species of vital importance to commercial and sports fishermen and, therefore, to the commerce of Idaho and the entire Columbia-Snake River basin;

(3) The purity of the waters of the Salmon River depends upon rigorous protection of the land and fragile soils within the watershed from road building, logging, and other land disturbances, as does the future well-being of nationally significant populations of wilderness-dependent wildlife species, including elk, bighorn sheep, and cougar;

(4) Protection of these wildlands and free-flowing waters has been a long-standing objective of public policy, exemplified by the establishment of the Idaho Primitive Area in 1931 and the classification of the Middle Fork of the Salmon River as a wild river by the Congress in 1968;

(5) These wildlands and free-flowing waters comprise a precious sample of the vanishing wilderness heritage of Idaho and the Mountain West which can endure as a resource of wilderness and as an undisturbed control area for ecological research, without conflict with established uses, including hunting, grazing, ranching, and commercial guide and outfitter services; and

(6) Pursuant to the mandate of Congress, comprehensive studies, reviews, and public hearings have been completed, demonstrating that the people of Idaho, the West, and the United States overwhelmingly support the continued and expanded protection of the free-flowing Salmon River and two million three hundred thousand acres of its wilderness watershed.

(b) Therefore, it is hereby declared to be the policy of Congress that, in furtherance of the purposes of the Wilderness Act and the Wild and Scenic Rivers Act, the national interest will be served by the continuation of the established protection for the Idaho and Salmon River Breaks Primitive Areas, the strengthening of that protection as a matter of law, and the extension of such strengthened protection to additional endangered wildlands and to the main Salmon River. It is the purpose of this Act to provide a comprehensive statutory framework for the protection, administration, and management of these nationally significant wildlands and free-flowing waters through—

(1) classification of the 237-mile main Salmon River in the highest categories possible within the National Wild and Scenic Rivers System, and

(2) designation of some two million three hundred thousand acres of federal lands as the River of No Return Wilderness within the National Wilderness Preservation System.

CLASSIFICATION OF SALMON RIVER

SEC. 3. Section 3(a) of the Wild and Scenic Rivers Act, as amended (82 Stat. 906; 16 U.S.C. 1271 *et seq.*) is further amended by adding at the end thereof the following new paragraph:

(A) Salmon, Idaho.—The segment of the main river from the mouth of the North Fork Salmon River downstream to its confluence with the Snake River, in the following classes:

(1) the 46-mile segment from the mouth of the North Fork Salmon River to Corn Creek as a recreational river area;

(ii) the 79-mile segment from Corn Creek to Long Tom Bar as a wild river area;

(iii) the 59-mile segment from Long Tom Bar to Hammer Creek as a recreational river area; and

(iv) the 53-mile segment from Hammer Creek to its confluence with the Snake River as a scenic river area;

all as generally depicted on a map entitled "Proposed Classification, Main Salmon River, Idaho", dated March 1975.

(B) The portion of this river segment within the Hells Canyon National Recreation Area and the portion upstream from the boundary of the Nezperce National Forest shall be administered by the Secretary of Agriculture and the remainder shall be administered by the Secretary of the Interior. Action required to be taken under subsection (b) of this section shall be taken within one year from the date of enactment of this paragraph.

(C) Notwithstanding any other provision of law, but subject to valid existing rights, the minerals in federal lands within the boundary of this river segment are hereby withdrawn from all forms of appropriation under the mining laws, from disposition under all laws pertaining to mineral leasing and all amendments thereto, and from leasing or other disposition under the Geothermal Steam Act of 1970.

(D) For the purposes of this river segment there are hereby authorized to be appropriated not more than $6,211,000 for acquisition of lands and interests therein.

DESIGNATION OF WILDERNESS AREA

SEC. 4. (a) In accordance with subsection 3(b) of the Wilderness Act (78 Stat, 890; 16 U.S.C. 1131), the areas in the Boise, Challis, Payette, Salmon, Bitterroot, and Nezperce National Forests, Idaho, situated north and south of the Salmon River and which comprise about two million three hundred and twenty thousand six hundred and eighty-eight acres, as generally depicted on a map entitled "River of No Return Wilderness, Proposed", dated February 1978, are hereby designated as wilderness and, therefore, as a component of the National Wilderness Preservation System. The previous classification of the Idaho and Salmon River Breaks Primitive Areas is hereby abolished.

(b) As soon as practicable after this Act takes effect, the Secretary of Agriculture shall file a map and a legal description of the River of No Return Wilderness with the Interior and Insular Affairs Committees of the United States Senate and House of Representatives and such map and description shall have the same force and effect as if included in this Act: *Provided, however,* That correction of clerical and typographical errors in such description and map may be made.

(c) The wilderness area designated by this section shall be known as the "River of No Return Wilderness" and, except as otherwise provided by this section, shall be administered by the Secretary of Agriculture in accordance with the provisions of the Wilderness Act governing areas designated by that Act as wilderness areas, except that any reference in such provisions to the effective date of that Act shall be deemed to be a reference to the effective date of this Act.

(d) Notwithstanding any other provision of law, but subject to valid existing rights, the minerals in federal lands within the wilderness area designated by this act are hereby withdrawn from all forms of appropriation under the mining laws, from disposition under all laws pertaining to mineral leasing and all amendments thereto, and from leasing or other disposition under the Geothermal Steam Act of 1970.

CONTINUATION OF ESTABLISHED USES

SEC. 5. (a) Within the River of No Return Wilderness the use of aircraft or motorboats, where these uses have already become established, may be permitted to continue subject to such restrictions as the Secretary of Agriculture deems desirable.

(b) Within the River of No Return Wilderness the grazing of livestock, where established prior to the effective date of this Act, shall be permitted to continue subject to such reasonable regulations as are deemed necessary by the Secretary of Agriculture.

(c) Commercial services may be performed within the River of No Return Wilderness to the extent necessary for activities which are proper for realizing the recreational or other wilderness purposes of the area.

(d) Nothing in this Act shall constitute an express or implied claim or denial on the part of the Federal Government as to exemption from State water law.

(e) Nothing in this Act shall be construed as affecting the jurisdiction or responsibilities of the Department of Fish and Game of the State of Idaho with respect to wildlife and fish within the lands and waters subject to this Act.

By Mr. SPARKMAN (by request):

S. 2495. A bill to authorize additional appropriations for the Department of State for fiscal year 1978; to the Committee on Foreign Relations.

Mr. SPARKMAN. Mr. President, by request, I introduce for appropriate reference a bill authorizing additional appropriations for the Department of State for fiscal year 1978.

The bill has been requested by the Department of State and I am introducing it in order that there may be a specific bill to which Members of the Senate and the public may direct their attention and comments.

I reserve my right to support or oppose this bill, as well as any suggested amendments to it, when the matter is considered by the Committee on Foreign Relations.

I ask unanimous consent that the bill be printed in the RECORD at this point, together with the letter from the Assistant Secretary of State for Congressional Relations to the President of the Senate dated January 26, 1978, together with the section-by-section analysis.

There being no objection, the bill and material were ordered to be printed in the RECORD, as follows:

S. 2495

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

ADDITIONAL AUTHORIZATION FOR THE CATEGORY INTERNATIONAL ORGANIZATIONS AND CONFERENCES

SECTION 1. Section 101(a) of the Foreign Relations Authorization Act, Fiscal Year 1978, is amended in paragraph (2) by striking out "$389,412,000", and inserting in lieu thereof "$426,687,000".

DEPARTMENT OF STATE,
Washington, D.C., January 25, 1978.

Hon. WALTER F. MONDALE,
President of the Senate,
U.S. Senate.

DEAR MR. PRESIDENT: There is transmitted herewith a proposed amendment to existing legislation that authorizes additional appropriations during fiscal year 1978 for the Department of State to carry out authorities, functions, duties and responsibilities in the conduct of the foreign affairs of the United States, including trade negotiations and other purposes authorized by law.

The amendment provides for an increase of $37,275,000 in the amount for authorization of appropriations for "International Organizations and Conferences". An analysis further explaining the proposed legislation is enclosed.

The Department has been informed by the Office of Management and Budget that there is no objection to the presentation of this proposed legislation to the Congress and that its enactment would be in accord with the program of the President.

Respectfully,
DOUGLAS J. BENNET, Jr.,
Assistant Secretary
for Congressional Relations.

ANALYSIS

Sec. 1. The proposed amendment would provide an additional $37,275,000 in authorization to meet the United States assessed share of the UNESCO budget for the last part of calendar year 1977 and all of calendar year 1978.

By Mr. SPARKMAN (by request):

S. 2496. A bill to authorize appropriations for the Department of State for fiscal years 1979, 1980, and for other purposes; to the Committee on Foreign Relations.

Mr. SPARKMAN. Mr. President, by request, I introduce for appropriate reference a bill authorizing appropriations for the Department of State for fiscal years 1979 and 1980, and for other purposes.

The bill has been requested by the Department of State and I am introducing it in order that there may be a specific bill to which Members of the Senate and the public may direct their attention and comments.

I reserve my right to support or oppose this bill, as well as any suggested amendments to it, when the matter is considered by the Committee on Foreign Relations.

I ask unanimous consent that the bill be printed in the RECORD at this point, together with the letter from the Assistant Secretary of State for Congressional Relations to the President of the Senate dated January 26, 1978, together with the section-by-section analysis.

There being no objection, the bill and material were ordered to be printed in the RECORD, as follows:

S. 2496

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "State Department Authorization Act, Fiscal Years 1979 and 1980".

AUTHORIZATION OF APPROPRIATIONS—FISCAL YEAR 1979

SEC. 2. (a) There are authorized to be appropriated for the Department of State for fiscal year 1979, to carry out the authorities, functions, duties, and responsibilities in the conduct of the foreign affairs of the United States, including trade negotiations, and other purposes authorized by law, the following amounts:

(1) For the "Administration of Foreign Affairs", $830,143,000

(2) For "International Organizations and Conferences", $412,781,000

(3) For "International Commissions", $19,973,000

(4) For "Migration and Refugee Assistance", $56,336,000

(5) For increases in salary, pay, retirement, and other employee benefits author-

ized by law, and for other nondiscretionary costs, such amounts as may be necessary.

(b) Amounts appropriated under this section are authorized to remain available until expended.

AUTHORIZATION OF APPROPRIATIONS—FISCAL YEAR 1980

SEC. 3. There are authorized to be appropriated to the Department of State for fiscal year 1980 such amounts as may be necessary to carry out the authorities, functions, duties, and responsibilities in the conduct of the foreign affairs of the United States, including trade negotiations, and other purposes authorized by law.

TRANSFER AUTHORITY

SEC. 4. Funds authorized to be appropriated for fiscal year 1979 by paragraphs (1)–(4) of section 2 may be appropriated for fiscal year 1979 for a purpose for which appropriations are authorized by any other of these paragraphs, except that the total amount appropriated for a purpose described in any of paragraphs (1)–(4) may not exceed the amount specifically authorized for such purpose by section 2 by more than 10 per centum.

INTERNATIONAL COMMISSIONS—AMERICAN SECTIONS

SEC. 5. Section 19 of "An Act to provide certain basic authority for the Department of State", approved August 1, 1956, is amended by deleting the phrase "not to exceed $1,500 of the".

AID TO DESTITUTE AMERICANS ABROAD

SEC. 6. Section 3 of "An Act to provide certain basic authority for the Department of State", approved August 1, 1956, as amended by Section 2 of P.L. 95–45, is amended by inserting the phrase "or destitute United States citizens abroad," immediately after the word "abroad".

WORKING CAPITAL FUND

SEC. 7. Section 13 of "An Act to provide certain basic authority for the Department of State", approved August 1, 1956, is amended by:

(1) deleting the word "supply" in the clause numbered (2) in the first sentence thereof;

(2) deleting ", and" following the term "repairs" in the clause numbered (2) in the first sentence thereof and inserting a semicolon in lieu thereof;

(3) inserting the following before the period at the end of the first sentence:

"; and (4) medical and health care services";

(4) deleting the third sentence; and

(5) adding the following new paragraph (b):

"(b) The current value of supplies returned to the working capital fund by a post, activity or agency may be charged to the fund. The proceeds thereof shall, if otherwise authorized, be credited to current applicable appropriations and shall remain available for expenditures for the same purposes for which those appropriations are available. Credits may not be made to appropriations under this subsection as the result of capitalization of inventories."

POST EMPLOYEE SERVICES

SEC. 8. The Foreign Service Act of 1946, 22 USC 801 et seq., is hereby amended by:

(1) substituting "Post Employee Services" for "Commissary Services" as the title of Part C of Title IX thereof;

(2) amending section 921 (b) and (c) thereof to read as follows:

"(b) The Secretary, under such regulations as he may prescribe, may authorize and assist in the establishment, maintenance, and operation, by officers and employees of the Service, of non-Government-operated non-appropriated fund activities at posts abroad, including the furnishing of space, utilities, and properties owned or leased by the United States for use by its diplomatic and consular missions. The provisions of the Foreign Service Buildings Act, 1926, as amended (22 U.S.C. 292–300), and section 13 of the Act to provide certain basic authority for the Department of State, approved August 1, 1956, as amended, may be utilized by the Secretary in providing such assistance. Non-appropriated fund activities established pursuant pursuant to this subsection shall be made available, insofar as practicable, to officers and employees of other Government agencies and their dependents who are stationed abroad. Such activities shall not be established in localities where another United States agency operates similar activities unless the Secretary determines that such additional activities are necessary.

"(c) Notwithstanding the last paragraph under the heading "Subsistence Department" in the Act of March 3, 1911 (10 U.S.C. 1253), or the provisions of any other law, charges at any post abroad for a non-appropriated fund activity authorized or assisted under this section shall be at the same rate for all civilian personnel of the Government serviced thereby, and all charges for supplies furnished to such activity abroad by any Government agency shall be at the same rate as that charged by the furnishing agency to its civilian non-appropriated fund activities.

MEDICAL SERVICES

SEC. 9. Section 942(b) of the Foreign Service Act of 1946, 22 USC 801 et seq., is hereby amended to read as follows:

"(b) The Secretary may establish medical treatment and health care facilities and provide for the services of physicians, nurses, or other medical or health care personnel at a post at which, in his opinion, sufficient personnel are employed to warrant such facilities or services."

DEPARTMENT OF STATE,
Washington, D.C., January 26, 1978.

Hon. WALTER F. MONDALE,
President of the Senate,
U.S. Senate.

DEAR MR. PRESIDENT: In accordance with Section 16 of the Act of August 1, 1956 as amended (22 U.S.C. 2680), there is transmitted herewith proposed legislation that would authorize appropriations for the Department of State to carry out its authorities and responsibilities in the conduct of foreign affairs during fiscal years 1979 and 1980.

The prime purpose of the bill is to provide for authorization of appropriations for (a) "Administration of Foreign Affairs", which supports the operation of the United States diplomatic and consular posts abroad and the Department of State in the United States; (b) "International Organizations and Conferences" including contributions to meet obligations of the United States to international organizations pursuant to treaties, conventions or specific acts of Congress; (c) "International Commissions" which enables the United States to fulfill treaty and other international obligations; and (d) "Migration and Refugee Assistance" which includes the United States annual contribution to the International Committee of the Red Cross and refugee assistance programs. A section-by-section analysis further explaining the proposed legislation is enclosed.

The Department has been informed by the Office of Management and Budget that there is no objection to the presentation of this proposed legislation to the Congress and that its enactment would be in accord with the program of the President.

Respectfully,

DOUGLAS J. BENNET, Jr.,
Assistant Secretary
for Congressional Relations.

SECTION-BY-SECTION ANALYSIS—AUTHORIZATION OF FISCAL YEAR 1979 APPROPRIATIONS

Sec. (2)—Subsection (a)—This subsection provides an authorization of appropriations for the Department of State in accordance with the provisions of Section 407(b) of the Foreign Assistance Act of 1971. The proposed amendment authorizes funds to be appropriated under this legislation for the fiscal year 1979 by category.

Category (1)—Authorizes appropriations under the heading "Administration of Foreign Affairs" for fiscal year 1979. This category provides the necessary funds for the salaries, expenses and allowances of the officers and employees of the Department, both in the United States and abroad. It includes funds for executive direction and policy formulation, conduct of diplomatic and consular relations with foreign countries, conduct of diplomatic relations with international organizations, domestic public information activities, central program services, and administrative and staff activities. This category also provides for representational expenses in accordance with Section 901 of the Foreign Service Act of 1946, as amended. Further, it provides funds for such activities as the acquisition, operation and maintenance of office space and living quarters for American staff abroad; funds for relief and repatriation loans to United States citizens abroad and for other emergencies of the Department; and payments to the Foreign Service Retirement and Disability Fund.

Category (2)—Authorizes appropriations for fiscal year 1979 under the heading "International Organizations and Conferences". This category provides the necessary funds for United States contributions of its assessed share of the expenses of the United Nations and other international organizations of which we are a member. Also included are the necessary funds for the missions which represent the United States at the headquarters of certain international organizations in which the United States has membership or participates pursuant to treaties, conventions or specific Acts of Congress. In addition, provision is made for funding of official United States Government participation in regularly scheduled or planned multilateral intergovernmental conferences, meetings and related activities, including international trade negotiations, and for contributions to international peacekeeping activities in accordance with international multilateral agreements.

Category (3)—Authorizes appropriations for fiscal year 1979 under the heading "International Commissions". This category provides funds necessary to enable the United States to meet its obligations as a participant in International Commissions and includes expenses of the American Sections and the International Boundary and Water Commission. Also, expenses for the United States participation in International Fisheries Commissions are under this category.

Category (4)—Authorizes appropriations for fiscal year 1979 under the heading "Migration and Refugee Assistance" to enable the Secretary of State to provide assistance to migrants and refugees, both on a multilateral basis through contributions to organizations such as the Inter-governmental Committee for European Migration and the United Nations High Commissioner for Refugees, and on a unilateral basis through assistance to refugees designated by the President, as authorized by law.

Category (5)—Provides authorization of appropriations for increases in salary, pay, retirement and other employee benefits as authorized by law and for other nondiscretionary costs, such sums as may be necessary. This provides authorization of appropriations to meet mandatory items which were unanticipated and which have a material impact upon the operations and fiscal resources of the Department.

Subsection (b)—This section provides the customary extension of availability of funds beyond the end of the fiscal year. This authority is required to enable the Department to retain funds appropriated for construction projects, the completion of which extends beyond a single fiscal year, and to fund international conferences.

Sec. (3).—Authorization of Appropriations—FY 1980. This section provides for such amounts as may be necessary for the Department of State to meet its obligations in fiscal year 1980 in accordance with section 607 of the Congressional Budget Act of 1974 (P.L. 93-344). The phrase "such amounts as may be necessary" is used because exact dollars amounts are presently undeterminable.

Sec. (4).—Transfer Authority. This section provides the State Department a limited transfer authority between line-item authorizations, such that any unappropriated portion of one budget item be considered an authorization for another of the Department's budget items, provided that no item is increased by more than 10 percent.

Sec. (5).—International Commissions—American Sections. Section 5 removes the dollar limitation on representation and official entertainment expenses for the American Sections, International Joint Commission, U.S. and Canada. This change will bring the authorization legislation for representation and official entertainment expenses of the American Sections, International Joint Commission into conformity with similar legislation for other Departmental appropriations having language to cover official representation costs.

Sec. (6).—Aid to Destitute Americans Abroad. This legislation will provide the necessary authority to expand the Department's Emergency Medical and Dietary Assistance Program abroad by developing and maintaining a program to provide funds for emergencies and medical care on a reimbursable basis to those U.S. nationals who become destitute abroad, and for whom immediate repatriation is not a viable solution. For example, there are numerous incidents of Americans who become ill or injured while traveling or residing abroad and who have no financial resources to meet medical costs. At present, even if repatriation loans are granted to these individuals when they are able to return to the U.S., loans cannot be made to pay hospital or other medical costs.

Sec. (7).—Working Capital Fund. Legislation is proposed to clarify the authority of the Secretary of State to use the Working Capital Fund for certain centralized services performed by the Department for itself and other agencies overseas; to provide new authority for medical and health care services through the Working Capital Fund; and to remove the $750,000 capitalization limitation for the fund.

A technical amendment is requested to delete the term "supply" to clarify the Department's authority to provide services as well as supplies and equipment, such as related installation, maintenance and transportation.

Authority to include medical and health care services in the Working Capital Fund is required to comply with a decision by OMB to restrict the use of consolidated working funds. Funding for the Kabul Hospital in Afghanistan is handled by a consolidated working fund, and therefore, a new means of funding is necessary. Since medical and health care services are not "administrative" services, additional authority is required to allow these medical and health care services to be funded under the Working Capital Fund. Services will include equipment, facilities and services.

Deletion of the third sentence of the existing authority for the Working Capital Fund would remove the limitation of $750,000 on the capital of the Fund. This restriction was based on original inventories transferred to the fund in 1956. Due to increased price levels, that limitation no longer permits new services or programs or continuation of existing program levels. Equally, overseas programs could not be capitalized without this legislative change.

New authority is requested to permit the Working Capital Fund to repurchase and resell supplies excess to the needs of serviced agencies. A need for such authority often arises when an agency ceases operation at a specific location overseas.

Sec. (8).—Post Employee Services. Amendments are proposed to take account of increased post requirements for employee non-appropriated fund activities necessitated by the establishment of United States Government missions in many areas of the world, including the lesser developed areas. These requirements extend beyond the commissary, mess and recreational activities explicitly authorized to receive assistance and include, for example, central supply and procurement for these activities, temporary transfer quarters, dependent educational assistance, family counseling and day care services and related services which are needed for employee support and morale and cannot be obtained under local conditions. Accordingly, it is proposed that the term "non-appropriated fund activities" be used to cover this full range of requirements.

Additionally, it is proposed that the Working Capital Fund be authorized to assist non-appropriated fund activities, primarily through the sale and transportation of supplies and equipment. This would be accomplished by citing the authority for the Working Capital Fund (section 13 of the Act to Provide Certain Basic Authority for the Department of State).

Sec. (9).—Medical Services. Overseas requirements for employee medical and health care, particularly in areas of the world where such care is not available or is inadequate, have necessitated the estblishment of a small hospital in Kabul, Afghanistan and could require the establishment of medical facilities elsewhere. Although the term "first-aid station" has been interpreted as providing sufficient authority for such activities, it is desirable to provide more explicit authority for the operation of a wider range of medical and health care facilities.

By Mr. CHAFEE:

S. 2497. A bill to amend the Internal Revenue Code of 1954 to provide certain corporate income tax reductions and to increase the amount of the surtax exemption; to the Committee on Finance.

S. 2498. A bill to amend the Internal Revenue Code of 1954 to encourage greater investment in independent small businesses; to the Committee on Finance.

S. 2499. A bill to amend the Internal Revenue Code of 1954 to give businesses more flexibility in depreciating the cost of new capital investments; to the Committee on Finance.

(The remarks of Mr. CHAFEE when he introduced the above bills appear earlier in today's proceedings.)

By Mr. BUMPERS:

S. 2500. A bill to amend the Federal Water Pollution Control Act in order to limit the information which may be obtained pursuant to such act; to the Committee on Environment and Public Works.

Mr. BUMPERS. Mr. President, last month every Member of this body welcomed the enlightened decision of OSHA, the Occupational Safety and Health Administration, to cast aside scores of picky, ridiculous requirements that served to hamper, not help, the well intentioned goals of that agency. These actions were taken, however, only after a long and anguished effort on the part of our aggrieved constituents to get the Congress mad enough to threaten the very existence of OSHA. Were it not for the fact that we are ultimately the only lobby for our constituents, I doubt very much that OSHA would have sobered up without the drying-out power of the Congress.

While we are heartened that OSHA is beginning to emerge from dipsomania, all of us can cite a number of other Federal agencies that are drunk with arbitrary power, particularly with the power to crush the only living remnant of free enterprise in our country. I am talking about the small independent businessman. I am talking about the fact that we are fast approaching the point in this country when these business men and women have a great deal of difficulty in characterizing this as a free country. I am, today, talking about some specific requests of the Environmental Protection Agency, requests which are indeed "police state" procedures, requests which I want to dry out along with the wrongs of OSHA's recent binge.

I hope you will join me in eliminating the particularly oppressive elements of an extensive questionnaire served on all members of the wood-preserving industry by the Environmental Protection Agency. I ask unanimous consent that certain correspondence relating to this questionnaire follow my remarks. This correspondence includes a letter written to me by John W. Elrod, a constituent in Rison, Ark., my reply to Mr. Elrod, letters from me to the Honorable Douglas Costle, Administrator of the Environmental Protection Agency and the Honorable James T. McIntyre, Jr., now the Director of the Office of Management and Budget, and finally a letter from the office of Mr. Costle signed illegibly by someone, presumably from Mr. Costle's office. Apparently in the EPA, like other large regulatory agencies, you never sign the letter you write, and never write the letter you sign. I also ask unanimous consent that the questionnaire itself, styled "308 Questionnaire—Wood Preserving," and section 308 of the Water Pollution Control Act be printed along with the letters and the bill at the conclusion of my remarks in the RECORD.

Mr. President, section 308 of the Water Pollution Control Act, 33 U.S.C. 1318, authorizes and directs EPA to gather extensive information to enable it to carry out its responsibility of preserving water quality. In what I would like to believe has been a well-meaning effort to comply with this command of the Congress, EPA has formulated and served upon some 600 businesses a voluminous questionnaire. In addition to inquiring about discharges of effluent, pollution-control equipment, and related matters, the questionnaire goes on to seek disclosure of almost every kind of confidential financial information with respect to the general business operations

of the respondents, including all of their costs, what method of depreciation they use for accounting and tax purposes, what their profits are before and after taxes, what the value of their accounts receivable is, and what internal investment criteria they use in deciding whether their business is meeting a desired level of profitability. I direct your attention to questionnaire Nos. 19, 20, 21, 22, 24, 25 and 26, questions which my constituent John Elrod justly characterized as wholly beyond the scope of section 308 of the Water Pollution Control Act.

These questions are, indeed, intrusive and unreasonable. They are not information that the Administrator of the EPA may "reasonably require" to carry out his statutory responsibilities, as required by section 308. Even if they are within the outer limits of statutory authority, a proper exercise of discretion should have led EPA not to go so far.

In addition, the questionnaire appears to violate the Federal Reports Act, 44 U.S.C. 3501–11. The form was never approved by the Office of Management and Budget. In fact, it was never even submitted for approval, although 44 U.S.C. 3509, enacted in 1968, appears to require such submission unequivocally.

In brief, Mr. President, EPA's questionnaire itself is a violation of the law, and, second, it is practically irrelevant to the question of pollution control.

Let us look into the legality of the questionnaire. If the EPA has indeed violated the Federal Reports Act, it is in the anomalous position of threatening citizens with dire penalties, including imprisonment, for failure to answer a questionnaire whose very circulation by the Environmental Protection Agency is itself a violation of law. We can save the Supreme Court a lot of time by striking down EPA's intrusive requests. We can preserve the confidence of hundreds of small businessmen who, if they do not answer the questions, are under the threat of severe penalties up to $2,500 per day and a prison sentence for failure to provide the demanded data from an agency that may well be running the way OSHA used to operate. We can declare once again to the regulatory bureaucracies that the foundation of any kind of respect for law must be scrupulous adherence to the commands of the Congress by officials of the Federal Government.

Let us now look into the practical effect of the questionable questionnaire. Even if the form were legal, it would still be ill-advised to inquire into intimate financial details of a business when these details have at best only peripheral relevance to the importance of the Federal Water Pollution Control Act. This kind of imposition is especially burdensome to small businesses, many of which are among the 600 firms to which the questionnaire was directed. Government agencies should realize that small businessmen have neither the time nor the money to employ squads of lawyers, accountants, and clerks to fill out forms containing every conceivable piece of information that might be of interest. Common horse sense should limit such governmental inquiries, and I am hopeful that the bill I am now introducing and the exchange of correspondence will bring about the realism and humanism so frequently ignored when our administrators are told to write up some rules.

There being no objection, the bill and material were ordered to be printed in the RECORD, as follows:

S. 2500

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 308(b) of the Federal Water Pollution Control Act is amended by striking out "and (2)" and inserting in lieu thereof "(2) shall relate only to such matters as are necessarily and directly involved in carrying out the provisions of this Act and shall not include financial statements or other similar comprehensive financial information, investment data, tax information, or general production costs, and (3)".

ELROD CO.,
Rison, Ark., October 13, 1977.

Senator JOHN L. MCCLELLAN,
Senator DALE BUMPERS,
Congressman RAY THORNTON,
Congressman BILL ALEXANDER,
Congressman JIM GUY TUCKER,
Congressman JOHN PAUL HAMMERSCHMIDT.

GENTLEMEN: I am enclosing a copy of the questionnaire sent me by the Environmental Protection Agency which I consider to be representative of the outrageous results of well intended but poorly administered legislation. Typically, the law provides for severe penalties up to $2,500.00 per day and a prison sentence for failure to provide the requested information. I direct your attention to questionnaires nos. 19, 20, 21, 22, 24, 25 and 26 and ask if you conceive of any legitimate reason why the agency should be entitled to such detailed information in regard to our finances. I would genuinely appreciate your efforts to eliminate this kind of "police state" procedure in regard to this agency and any others with similar inclination.

We are fast approaching the point in this country when small independent businessmen have a great deal of difficulty in characterizing this as a free country. The enclosed questionnaire is a good illustration of the reason why.

Yours very truly,

JOHN W. ELROD.

U.S. SENATE,
COMMITTEE ON
ENERGY AND NATURAL RESOURCES,
Washington, D.C., October 28, 1977.

JOHN W. ELROD, Esq.,
Elrod Co.,
Rison, Ark.

DEAR JOHN: I have your letter of October 13, and Richard has told me about your telephone conversations with respect to the "308 Questionnaire Wood Preserving" that you received from EPA.

You are quite right, of course, that the detailed financial data requested are wholly beyond the scope of Section 308 of the Water Pollution Control Act, 33 U.S.C. § 1318. Incidentally, I enclose a copy of that statute. The authority given by Congress to the Administrator of EPA to demand certain reports and information is limited to what "he may reasonably require" to carry out his statutory responsibilities. In addition, under section 308(b), any records, reports, or information obtained "shall, in the case of effluent data, be related to any applicable effluent limitations, toxic, pretreatment, or new source performance standards. . . ." I cannot for the life of me understand how question 19–22 and 24–26, listed in your letter, can meet either of these requirements.

A preliminary informal contact with EPA indicates that it may try to justify its action, at least in part, on the ground that the questionnaire was reviewed in advance at a meeting with a trade association known as the American Wood Preserving Institute. Do you know anything about this Association? I am told that the questionnaire was reviewed by this Institute and by unspecified "representatives of industry firms" on May 5 and June 22. Any trade association worth its salt would have objected strenuously to the intrusive questions included in this form, and perhaps such an objection was in fact registered.

In addition, the form was never approved by the Office of Management and Budget. In fact, it was never even submitted for approval. This omission is probably a violation of the Federal Reports Act, 44 U.S.C. §§ 3501–11. Specifically, 44 U.S.C. § 3509, added in 1968, provides that "a federal agency may not conduct or sponsor the collection of information upon identical terms, from 10 or more persons . . . unless . . . (1) the agency has submitted to the Director the plans or forms . . .; and (2) the Director has stated that he does not disapprove the proposed collection of information." The term "Director" refers to the Director of the Bureau of the Budget, which is now, of course, the Office of Management and Budget. A copy of this statute is also enclosed.

It is particularly irksome for a federal agency to threaten citizens with dire penalties when the agency itself may well be acting in violation of the law.

I take this incident seriously, and perhaps some good will come from it if we can get the attention of the agency heads involved. I have therefore directed letters to the Administrator of the Environmental Protection Agency and to the Acting Director of the Office of Management and Budget. Copies of these letters are enclosed. Copies are going also to Senator Jennings Randolph, Chairman of the Committee on Environment and Public Works, and Senator Abraham Ribicoff, Chairman of the Committee on Governmental Affairs. These Committees have oversight jurisdiction, respectively, over EPA and OMB.

When I have answers to any of these letters, I will share them with you. I appreciate your calling this troublesome situation to my attention. It is exactly the kind of thing that causes citizens to lose faith in their government.

Sincerely yours,

DALE BUMPERS.

U.S. SENATE,
COMMITTEE ON
ENERGY AND NATURAL RESOURCES,
Washington, D.C., October 28, 1977.

Hon. DOUGLAS COSTLE,
Administrator, Environmental Protection Agency, Washington, D.C.

DEAR MR. COSTLE: John W. Elrod of Rison, Arkansas, a friend and constituent of mine in the wood-preserving business, has called my attention to a disturbing questionnaire issued by your Agency. The form is styled "308 Questionnaire—Wood Preserving" and includes 25 detailed questions with respect to Mr. Elrod's business of wood preserving. Section 308 of the Water Pollution Control Act, 33 U.S.C. § 1318, is cited as authority for the right to demand answers to these questions. There is no doubt that Section 308 authorizes your Agency to gather extensive information, and you must do the job thoroughly in order to carry out the command of Congress. If you would take the time, though, to look at the individual questions posed. I think you will agree that a number of them, specifically questions 19–22 and 24–26, go beyond any conceivable scope of EPA's authority. These questions seek disclosure of almost every kind of confidential

financial information with respect to the general business operations of the respondent, including all of his costs, what method of depreciation is used for accounting and tax purposes, what his profits are before and after tax, what the value of his accounts receivable is, and what internal investment criteria he uses in deciding whether his business is meeting a desired level of profitability.

If you are of the opinion that judicial interpretations of § 308 authorize these questions, would you please give me citations to the reported opinions?

Mr. Elrod has discussed the questionnaire with personnel of your Agency and has returned it, so the issue is not his individual case. The question is much broader than that and goes to the heart of public discontent with government. It seems to me that the interest of the public at large, as well as of EPA itself, would be well served if you would examine this questionnaire closely and make an effort in the future to limit this kind of imposition on private citizens.

In addition, I understand that the questionnaire was not cleared by OMB, as required by the Federal Reports Act, 44 U.S.C. §§ 3501–11. In fact, it was not even submitted for clearance. Your Agency's covering letter to Mr. Elrod threatens severe penalties, including possible imprisonment, if he should fail to answer the questionnaire fully. Such penalties are of course provided for by law and no doubt should be imposed in appropriate cases. It is especially important, on the other hand, that government agencies and officials themselves abide by the law, and this instance is a case in point. I can see no reason why the form should not have been submitted to OMB under U.S.C. § 3509. If it had been, I cannot help believing that the Agency would have disapproved the form, reduced its size considerably, or at least made a number of helpful suggestions.

Would it be your intention to submit future similar forms for clearance?

You might also consider whether it would have been a good idea to consult with the Commission on Federal Paperwork, created by P. L. 93–556, 88 Stat. 1789, 44 U.S.C. § 3501 note.

I appreciate the many courtesies shown me by your Agency and look forward to your answer.

Sincerely yours,

DALE BUMPERS.

COMMITTEE ON
ENERGY AND NATURAL RESOURCES,
Washington, D.C., October 28, 1978.

Hon. JAMES T. MCINTYRE, Jr.,
Acting Director of the Office of Management and Budget, Washington, D.C.

DEAR MR. MCINTYRE: Enclosed is a copy of a questionnaire served by EPA on several hundred businesses engaged in wood preserving. It was brought to my attention by John Elrod of Rison, Arkansas, a friend and constituent of mine.

You will notice that the questionnaire contains no OMB clearance number. It is my information that it was never submitted for clearance. This omission appears to be a violation of the Federal Reports Act, 44 U.S.C. § 3509. If you would take the time to look at the form in some detail, you will probably conclude, as I have, that it leaves a great deal to be desired. Specifically, many of the questions on financial subjects seem clearly to go beyond the authority of Section 308 of the Water Pollution Control Act, 33 U.S.C. § 1318. Beyond that, and even if the questions are within the outer limits of legal authority, it seems to me that some discretion should have been exercised in an effort to limit the intrusiveness of the form. It also seems that future similar forms should be submitted to your Agency for approval.

If you could consider these points and advise me, I would be most grateful.

Sincerely yours,

DALE BUMPERS.

U.S. ENVIRONMENTAL PROTECTION AGENCY,
Washington, D.C., December 6, 1977.

Hon. DALE BUMPERS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR BUMPERS: This will thank you for and respond to your letter of October 28, 1977 on behalf of Mr. John F. Elrod of Rison, Arkansas, concerning the Agency's request for financial data from wood preserving companies pursuant to Section 308 of the Federal Water Pollution Control Act.

Section 301 of the Federal Water Pollution Control Act mandates that EPA develop uniform, national effluent standards for major industrial categories covering waste waters discharged into streams and rivers or to municipal treatment facilities. In June 1976 this basic mandate was reinforced as a result of a judgment in the U.S. District Court for the District of Columbia in NRDC et. al. *v.* Train. Under the court order EPA is required to develop or revise "best available technology economically achievable" (1983) effluent limitations, new source performance standards (NSPS) and pretreatment standards for 21 major industrial categories covering 65 classes of potentially toxic pollutants. The timber products processing industry is one of the major industrial categories included in the U.S. District Court's order.

To ensure that the information needed to develop these regulations is both thorough and timely, EPA must engage in a wide range of information gathering, monitoring, sampling, and inspection activities. Section 308 of P.L. 92–500 authorizes EPA to require owners or operators of any point source to maintain records, submit any information necessary to develop a regulation, sample effluents, and install and maintain monitoring equipment. This authority includes requests for financial information pursuant to the regulatory process.

The Agency shares your concern over the confidentiality of financial information being requested from Mr. Elrod and other firms within this industry. Rules and regulations concerning the confidentiality of business information of this type have been promulgated and can be reviewed in full in the Federal Register of September 1, 1976. Enclosed for your information is a reprint of this regulation. The Agency is fully aware of the sensitive nature of the financial information being requested and every precaution allowed by law has been taken to maintain confidentiality of the information received.

It should be emphasized that the Agency's request for this information is to assure that regulations ultimately promulgated are both fair and economically achievable by the industry. Without an accurate assessment of industry's financial capabilities to meet potential pollution control requirements, there remains a risk that the technology based limitations ultimately recommended could place an unreasonable hardship on industry members. The Agency is concerned that hardship to the industry may result from the closure of facilities that find it impossible to expend funds to comply with effluent regulations.

The most accurate method of determining "affordability" at the plant level is to evaluate historical financial data, including data on sales, costs and profits, in order to determine what level of technology is economically achievable. Therefore, questions such as those specifically referenced in your letter are an integral part of the quantitative economic analysis required to meet the Court's requirements. Much of this data is not available to the Agency from any source except the firms within the industry. Industry members have the best information on the needs and capabilities of firms affected by EPA regulations.

To the extent possible, we have tried to simplify the survey to reduce the burden placed on the respondent. We have also made every effort to avoid unnecessary duplication of questions asked in other information requests or otherwise available data sources. To this end EPA met with several trade associations for the purpose of seeking their aid and advice on the collection of data and information from the wood preserving industry. Their suggestions for improving the data collection mechanism and reducing the time and technical efforts required to supply the needed information were incorporated into the questionnaire ultimately sent to industry members.

Your letter also noted that this questionnaire was not submitted to the Office of Management and Budget for clearance under the Federal Reports Act. The Agency believes that requests for the information described above are outside the scope of the Federal Reports Act. The Federal Reports Act was intended to apply to the gathering of general statistical information and not to circumstances in which the Agency's data collection activities are specifically required by Congress. Moreover, Section 308 of the Federal Water Pollution Control Act may be viewed as an explicit statement of this Agency's duties in gathering information, which has the effect of modifying the broader mandates of the Federal Reports Act.

However, even if information requests pursuant to Section 308 were subject to the Federal Reports Act, all requests done pursuant to the court order are clearly exempt from those requirements under section 9(e) of OMB Circular A–40, Attachment A. The circumstances under which we are proceeding with this project are precisely those for which the exception in paragraph 9(e) of the OMB Circular was created. The NRDC v. Train court order dictates that EPA take certain action by specific, stringent deadlines. In particular, before June 30, 1979, EPA must complete all aspects of its study of the entire timber products processing industry, which covers a dozen separate industry guidelines, and approximately 27,000 individual plant facilities. The "judicial action" exception in the Circular A–40 is intended specifically to allow agencies to meet their judicially imposed obligations.

I hope this response is helpful to you and gives you a clearer picture of the Agency's activities. If I can be of any further service please do not hesitate to contact me again.

Sincerely yours,

BARBARA BLUM,
Acting Director,
(For Douglas M. Costle).

---

308 QUESTIONNAIRE: WOOD PRESERVING

A. General information:

1. What is the form of business organization of this plant?

Proprietorship or Partnership—.
Co-op—.
Privately-held Corporation—.
Publicly-held Corporation.—

2. Is this wood treating plant a stand-alone operations or part of a multi-plant complex at this location?

Stand-alone—.
Multi-plant complex—.

3. Approximately what percent of total sales at this complex or plant was from wood treating in FY 1976?—%.

4. Is this plant at an urban, suburban, or rural location?

Urban—, Suburban—, Rural—.

5. What year did the wood treating plant begin operation?

B. Effluent information:

6. How does this plant dispose of liquid process waste?

a. Discharge into navigable water—.
b. Dicharge into municipal sewer—.
c. Disposed on plant site—.
d. Disposed off plant site—.
e. Process waste is recycled (no discharge—.
f. This plant does not generate liquid process waste—.
g. Other— Please specify—.

If the answer to question 6 is (c), (d), (e), or (f), you may omit answers to the following questions: 7, 10, 20, 21b, 22, 25.

7.a If you do not discharge liquid *process waste* into a municipal sewer, do you have the option to connect? Yes—, No—, Don't Know—.

b. If you do have the option to connect to a municipal sewer, what is the initial capital investment cost? $—, Don't Know—.

c. If you discharge any wood treating *process waste* into a sewer system, on what basis are your sewer charges made? Flat annual fee—, Gallon of effluent—, Other, please specify—.

d. If you discharge into a municipal sewer, what were your total sewer charges in 1976? $—.

e. If you discharge liquid process waste into navigable waters, do you have an *NPDES permit*? Yes—, No—, Don't know—.

f. Do you own or have available for purchase about one acre of land at or adjacent to this facility that could be used for an effluent treatment system? Yes—, No.

If yes, what is the current market value per acre? $—.

C. Sales and product mix:

8. Fiscal year 1976 wood treating plant sales (thousands of dollars).

Under 70—, 71–155—, 156–300—, 301–700—, 701–1,200—, 1,201–1,800—, 1,801–2,400—, 2,401–3,200—, 3,201–4,800—, 4,801–7,200—, 7,201–11,500—, More than 11,500—.

9. Which of the following product types are treated at this plant:

Treated Wood Products
Treated at Plant.

As a percent of Plant Sales: Under 10; 11–30; 31–50; 51–70; 71–90; Over 90.

a. Organic (Oil or Dual Oil and Salt Treatment):
(1) Railroad Ties—.
(2) Pilings, Poles.—
(3) Timber, Lumber, and Other—.
b. Inorganic (Salt Based):
(1) Pilings, Poles—.
(2) Timber, Lumber, and Other—.

10.a. Are any changes (other than normal business fluctuations) planned in production process or product mix? Yes—, No—, (If No, Go to Part D).

b. Process change towards:
More Organic—, Less Organic—, More Inorganic—, Less Inorganic—.

c. Product Mix Change:
More Ties—, Less Ties—, More Poles—, Less Poles—, More Other—, Less Other—.

d. Other, please specify nature of change—.

D. Plant capacity and production:

11. What is your *peak design capacity* (or *peak capacity as modified*)? cu. ft.—. Cubic Feet/24 hour period [1]

12.a. What region of the country is the origin of *most* of the wood treated at this facility?

Northeast—, Northwest—, Southeast—, Southwest—, Midwest—, Other.

b. Is the wood mostly:
Hardwood—, or Softwood—.

13. Typical number of production days per week?

1–4—, 5—, 6—, 7—.

[1] If unable to calculate peak (design) capacity by the formula shown in "DEFINITIONS" attach a separate sheet describing the radius and length of each cylinder.

14. Number of weeks at each shift level (total should add to 52 weeks):

No. of Weeks
a. at 0 shifts (shut down or no wood preserving).
b. at 1 shift.
c. at 2 shifts.
d. at 3 shifts.
e. at 4 shifts.

52 weeks total of (a) plus (b) plus (c) plus (d) and plus (e).

15. 1976 Production (Thousands of cubic feet)—.

16. Typical number of production workers in 1976: 1–3, 4–6, 7–9, 10–19, 20–34, 35–48, 49–75, 76–99, 100–125, over 125.

17. This facility is primarily engaged in (a) treating service only (TSO), and or (b) treating owned wood products for sale to others:

Approximate Percent of Sales:
Under 10, 10–25, 26–50, 51–75, over 75;
a. Treating Service Only—.
b. Treating Owned Wood Products—.

18. What proportion of owned wood is from company-owned timberland?

Approximate Percent of Owned Wood Supply:
None, 1–24, 25–49, 50–74, 75–100.

E. Financial statement:

19. Revenue and Expenses. Check the box for each item which most closely approximates your 1976 fiscal year expense percent of sales.

Cost as a Percent of Plant Sales:
a. Wood Cost, Under 10, 10–15, 16–21, 22–28, 29–38, 39–48, 49–60, over —.
b. Other Materials Cost, Under 10, 10–15, 16–21, 22–28, 29–38, 39–48, 49–60, over —.
c. Payroll Cost, Under 10, 10–15, 16–21, 22–28, 29–38, 39–48, 49–60, over —.
d. Depreciation, Under 1, 1–2, 3–5, 6–8, Over —.
e. Gross Margin, Under 10, 11–15, 16–25, 26–30, Over 30.
f. General and Administrative Cost, Under 1, 1–5, 6–10, 11–15, Over 15.
G. Interest Expense, Under 1, 1–4, 5–8, 9–12, Over 12.
h. Profit Before Tax, Under 1, 1–4, 5–8, 9–12, Over 12.
i. Profit After Tax, Under 1, 1–2, 3–4, 5–7, Over 7.

20. How representative was this plant's 1976 profit before tax experience versus the average for 1971–1975?

About the same—Better than Average—, Worse than Average—.

21. Factors related to Revenues and Expenses.

a. Fixed Costs: If the plant faces lease, rental or mortgage commitments beyond 1976 (for buildings or equipment), indicate the average annual charges and the year the commitments expire.

(1) Average Annual Charge: Leases/Rental, Wood Contracts, Debt Payment, Other [2].

(2) Commitment Expires: Leases/Rental, 19—, Wood Contracts, 19—, Debt Payment 19—, Other 19—.

b. What Depreciation Method is Used: Equipment—Buildings?

(1) Book Basis: Straight-Line—, Double-Declining Balance—, Sum of Year's Digits—, Other: (Please Specify)—.

(2) Tax Basis: Straight Line—, Double-Declining Balance—, Sum of Year's Digits—, Other: (Please Specify)—.

(3) Pollution Control Equipment Amortization: Accelerated Over 5 Years—, Same method as other equipment—.

22. Unusual Production Costs. Are there any circumstances peculiar to this plant which result in unusual production costs? Yes—, No—.

If Yes, please describe:—.

[2] If other commitments attach separate sheet.

23. Historical/Annual Cost of Pollution Control and Other Environmental Regulations:

Don't Know; None; Fiscal Year Ending 1975, 1976:

(1) Water Pollution Regulations: (a) Annual Operating Costs—, (b) Annual Depreciation Charges—.

(2) Solid Waste Disposal (including waste water sludge and wood waste, contract hauling): (a) Annual Operating Costs—, (b) Annual Depreciation Charges—.

(3) Other Environmental Regulations Affecting Production Processes and Production Costs, Air—, OSHA—.

(Please Specify):—.

(a) Annual Operating Costs—, (b) Annual Depreciation Charges—.

(4) Other Administrative Costs: Environmental department, research, litigation, consultants, additional administrative costs—.

24. Value of wood treating plant Assets and Liabilities (as of the end of the most recent fiscal year).

a. Net Fixed Assets (Gross Fixed Assets less cumulative depreciation)—, Don't Know—.

b. Total Assets: (Net Fixed Assets, Cash receivables, inventory, other assets)—, Don't Know—.

c. What was the value of this wood treating plant's accounts receivable?—.

d. What was the value of this wood treating plant's accounts payable?—.

e. Current Plant Debt (i.e., debt maturing in current year or payable on demand).—.

f. Long-Term Plant Debt (debt maturing beyond the current year [1977])—.

g. Total Plant Liabilities (long-term debt, accounts payable, deferred taxes, other debt, etc.)—.

25. Capital Investment Criteria for the Plant.

a. What investment criteria do you use? Return on Investment (ROI)—, Payback—, Discounted Cash Flow—, Other—.

b. If you use return on investment criteria: (1) What is the target internal pre-tax rate of return on capital required for investment in this plant?—. (2) At what ROI would you consider plant shutdown?—.

c. If you use payback period criteria, what is the required payback period for investment? years—.

d. What is the current term interest rate you must pay for new capital? Percent per year—.

26. Capital Investment for the Plant (not including capitalized operating or maintenance expenses).

(Actual 1971–76: Total Capital Investment—, Water Pollution Control—, Other Environmental Regulation (State or Federal) Impacting Production Processes—.

(Planned) 1977 Total Capital Investment—, Water Pollution Control—, Other Environmental Regulation (State or Federal) Impacting Production Processes—.

PUBLIC LAW 92-500, 86 STAT. 859, 62 STAT. 791, OCTOBER 18, 1972

"INSPECTIONS, MONITORING AND ENTRY

"SEC. 308. (a) Whenever required to carry out the objective of this Act, including but not limited to (1) developing or assisting in the development of any effluent limitation, or other limitation, prohibition, or effluent standard, pretreatment standard, or standard of performance under this Act; (2) determining whether any person is in violation of any such effluent limitation, or other limitation, prohibition or effluent standard, pretreatment standard, or standard of performance; (3) any requirement established under this section; or (4) carrying out sections 305, 311, 402, and 504 of this Act—

"(A) the Administrator shall require the owner or operator of any point source to (i) establish and maintain such records, (ii) make such reports, (iii) install, use, and

maintain such monitoring equipment or methods (including where appropriate, biological monitoring methods), (iv) sample such effluents (in accordance with such methods, at such locations, at such intervals, and in such manner as the Administrator shall prescribe), and (v) provide such other information as he may reasonably require; and

"(B) the Administrator or his authorized representative, upon presentation of his credentials—

"(i) shall have a right of entry to, upon, or through any premises in which an effluent source is located or in which any records required to be maintained under clause (A) of this subsection are located, and

"(ii) may at reasonable times have access to and copy any records, inspect any monitoring equipment or method required under clause (A), and sample any effluents which the owner or operator of such source is required to sample under such clause.

"(b) Any records, reports, or information obtained under this section (1) shall, in the case of effluent data, be related to any applicable effluent limitations, toxic, pretreatment, or new source performance standards, and (2) shall be available to the public, except that upon a showing satisfactory to the Administrator by any person that records, reports, or information, or particular part thereof (other than effluent data), to which the Administrator has access under this section, if made public would divulge methods or processes entitled to protection as trade secrets of such person, the Administrator shall consider such record, report, or information, or particular portion thereof confidential in accordance with the purposes of section 1905 of title 18 of the United States Code, except that such record, report, or information may be disclosed to other officers, employees, or authorized representatives of the United States concerned with carrying out this Act or when relevant in any proceeding under this Act.

"(c) Each State may develop and submit to the Administrator procedures under State law for inspection, monitoring, and entry with respect to point sources located in such State. If the Administrator finds that the procedures and the law of any State relating to inspection, monitoring, and entry are applicable to at least the same extent as those required by this section, such State is authorized to apply and enforce its procedures for inspection, monitoring, and entry with respect to point sources located in such State (except with respect to point sources owned or operated by the United States)."

By Mr. HATHAWAY (for himself, Mr. RIEGLE, and Mr. EAGLETON):

S. 2501. A bill to amend the Social Security Act and the Internal Revenue Code of 1954 to provide for Federal participation in the costs of the old-age, survivors, and disability insurance program and the medicare program, with appropriate reductions in social security taxes to reflect such participation, and with a substantial increase in the amount of an individual's annual earnings which may be counted for benefit and tax purposes; to the Committee on Finance.

SOCIAL SECURITY FINANCING AMENDMENTS OF 1978

Mr. HATHAWAY. Mr. President, on behalf of Senators RIEGLE, EAGLETON, and myself, I am introducing legislation to revise the financing of the Social Security System. A similar bill has been introduced by Congressman JAMES BURKE of Massachusetts, the distinguished chairman of the Ways and Means Subcommittee on Social Security.

My bill provides for a reduction in the payroll tax rates for both employers and employees. It provides that one-third of the Social Security System shall be financed by Treasury general revenues. There is also an expansion in the taxable wage base.

This legislation parallels recommendations of the Social Security Advisory Council as far back as 1939. It is also responsive to comments received during the 1976 debate on the social security bill that employer/employee parity be retained and that the system retain a measure of payroll contribution along with general revenue funding.

I believe this legislation contains the basic programs to reduce employer payroll costs, thereby stimulating hiring and reducing our high unemployment rates. This could also strengthen international competitiveness of American business.

This concept of general revenue financing for social security has been endorsed by the following organizations:

American Federation of Labor and Congress of Industrial Organizations (AFL–CIO);

American Retail Federation;

American Society for Personnel Administration;

Citizens Against Confiscation of taxes in U.S.;

Council of State Chambers of Commerce;

International Brotherhood of Teamsters;

International Ladies Garment Workers Union;

National Association of Social Workers;

National Coal Association;

National Conference of Catholic Charities;

National Council on Aging, Inc.;

National Council of Senior Citizens;

National Farmers Union;

National Senior Citizens Law Center;

National Retired Teachers Association/American Association of Retired Persons; and

United Auto Workers.

Mr. President, Congressman REUSS has made an excellent statement on the use of general revenues to finance the social security system. I ask unanimous consent that the text of Mr. REUSS's remarks be included in the RECORD, together with the text of the bill.

There being no objections, the statement and bill were ordered to be printed in the RECORD, as follows:

REMARKS OF REP. REUSS

Mr. Speaker, we are faced with a desperate need to overhaul the financing of our social security system. For more than 2 years, the media have pointed out the financial difficulties facing the social security trust fund. There is no question that the system is in trouble. A sharp decline in the birth rate, steady increases in the level of benefits, and a severe recession, coupled with a slow recovery, threaten to push the trust fund deep into deficit over the next decade.

The financial health of the social security system is of immediate importance to millions of retired people and provides the retirement base for almost the entire American work force. There is not a man or woman in this Chamber who has not felt hometown concern about secure retirement income.

In meeting the future needs of the social security system the Congress could move in a number of directions. Tax rates could be increased as could the amount of income subject to the social security tax. Benefits could be readjusted. The system could be broadened to bring in more affluent workers Or the Congress could turn to general revenues and the progressive income tax to bear part of the retirement burden.

In fact, the Congress considered moving in almost all these directions at once. The House-passed version of the social security financing bill included small increases in social security tax rates, coupled with sharp increases in the amount of income subject to the tax. The so-called "double indexing" problem was also eliminated, so that benefits would no longer rise more rapidly than the cost of living.

The Senate approach also relied largely on the traditional payroll tax. Compared to the House bill, the Senate put somewhat more weight on higher tax rates, and somewhat less emphasis on a rising tax base. The Senate did depart from an historical pattern. From the inception of the social security program, employees and employers have paid social security taxes in equal proportion. The Senate broke with that practice by proposing to put more of the new tax burden on the employer.

Mr. Speaker, I know well that the bill now in conference has not been the product of a hasty process. Demographic studies and statistical analyses preceded congressional action. But if we accept the conference report as now being written, we will be asking the country to pay a needlessly high price for retirement security.

By continuing to rely on the payroll tax, we are exacerbating an already serious unemployment problem, threatening an often anemic recovery, courting more inflation, and doing little to alleviate the inequities of a regressive tax. Worse—the obvious alternative of general revenue financing has been shunted aside, only to reappear as a backdoor salvation for expected economic difficulties. It is time we walked directly to the right solution, rather than engaging in this social policy two-step.

There are almost 7 million Americans still looking for work they cannot find. Despite that staggering figure, we have persisted in using payroll taxes to finance unemployment compensation as well as social security. Higher costs for labor discourage hiring, accelerate the adoption of laborsaving machinery, and even influence the future course of technological innovation.

Nor can we ignore the inflationary implications of higher payroll taxes. Not only will the impact of higher payroll taxes ripple through an increasingly indexed economy. Worse, the future schedule of increases will be part of the public record for all to see and incorporate in their future pricing decisions.

Dare we ignore the future course of the recovery? An expected slowing in early calendar 1978 could turn into recession by 1979 unless corrective action is taken next year. In any case, a tax increase is not indicated. With one eye on the recovery and another on the prospect of sharply rising social security taxes, the administration has already begun to talk about a $20 billion tax cut next year to keep the workingman whole and the economy running smoothly.

What is so striking about all this is that general revenues are kept hovering in the background to ameliorate the bad effects of rising payroll taxes. In a very real sense, the Senate approach has already brought general revenues into the social security system through the side door. Putting a greater burden on corporate employers, the Senate has

indirectly increased business deductions, and therefore, reduced the corporate tax liability of most corporations. Social security trust funds go up and general revenues go down. It looks like general revenue financing, but apparently the indirect rise has a sweeter smell for the Senate.

The administration proposal for a 1973 tax cut is basically more of the same. Social security trust funds are to be increased with payroll taxes, while general revenues are to go down in order to repair some of the inequities of payroll taxes and to avoid any fiscal drag on the economy. The effect will be a general mismatch of benefits and losses. And even if this economic balancing act manages to offset some of the worst effects of the payroll tax rise, the burden that the rise places on workers and their employers will not so easily be lifted. Payroll costs will still go up, and the proinflation, antiemployment effects of that increase will still be with us.

What we should have done, and should still do, is to turn direcly to general revenues to help finance the social security system. If we turn to the progressive income tax, we lessen the dependence on regressive payroll taxes, avoid inflationary pressures, encourage employment, and pose no threat to the recovery.

There are, however, two arguments raised against the use of general revenues. The first suggests that without the discipline of the payroll tax-trust fund approach, there would be no limit on the amount of general revenues allocated to retirement income. Not at all. Trust funds and special taxes are the exception, not the rule, in the Federal budget. We do not rely on a defense trust fund or space trust fund to restrain expenditures. With the advent of the Budget Control Act and a new sense of congressional power and responsibility, the Congress has never been better prepared to talk intelligently about how much money should go where.

The second argument stirkes deeper and sounds a responsive chord in most of us. If we turn to general revenues, are we formally admitting that social security has become another welfare program? I have wrestled with this thought myself—but I have decided no.

What social securiy has become for people is their basic retirement plan. I see it more and more as society's version of the gold watch for a lifetime of work and service. The program was never designed to get you rich, but rather to get you by. Social security payments already ignore differences in an individual's lifetime earnings. And in breaking the direct link between past earnings and retirement income, society also ignores the vagaries of bad luck, the unexpected illness, the crippling accident, as well as good fortune and health. The past generation carried other burdens, including part of the retirement costs of those that preceded them. We can and should talk about how much children and grandchildren should pay for their parents and grandparents. But to say that society will see that every elderly person has a certain minimum retirement income just does not sound like welfare to me.

Mr. Speaker, I realize that the political pressures for the proposed payroll taxes are great. And we must take some action quickly. But if, in the face of the augury of inflation and unemployment, we enact in haste a payroll tax increase, we will almost surely repent at leisure. We should postpone final action on social security until the new session. And before we consider the social security system again, I ask my colleagues to take a long and hard look at general revenue financing.

The great industrial countries of Europe have for almost a century used general revenues for this purpose. It is time that we did, too. To parapharse the old hymn:

"It was good enough for Bismark,
"It was good for old Disraeli,
"It was good for Georges Clemenccau,
"And it's good for you and me!"

S. 2501

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

REDUCTIONS IN SOCIAL SECURITY TAXES

SECTION 1. (a)(1) Section 1401(a) of the Internal Revenue Code of 1954 (relating to rate of tax on self-employment income for purposes of old-age survivors, and disability insurance) is amended by striking out paragraphs (2) through (7) and inserting in lieu thereof the following:

"(2) in the case of any taxable year beginning after December 31, 1977, and before January 1, 1979, the tax shall be equal to 7.10 percent of the amount of the self-employment income for such taxable year;

"(3) in the case of any taxable year beginning after December 31, 1978, and before January 1, 1981, the tax shall be equal to 4.80 percent of the amount of the self-employment income for such taxable year;

"(4) in the case of any taxable year beginning after December 31, 1980, and before January 1, 1985, the tax shall be equal to 4.875 percent of the amount of the self-employment income for such taxable year;

"(5) in the case of any taxable year beginning after December 31, 1984, and before January 1, 1990, the tax shall be equal to 5.275 percent of the amount of the self-employment income for such taxable year;

"(6) in the case of any taxable year beginning after December 31, 1989, and before January 1, 2010, the tax shall be equal to 6.00 percent of the amount of the self-employment income for such taxable year; and

"(7) in the case of any taxable year beginning after December 31, 2009, the tax shall be equal to 7.20 percent of the amount of the self-employment income for such taxable year.".

(2) Section 3101(a) of such Code (relating to rate of tax on employees for purposes of old-age, survivors, and disability insurance) is amended by striking out paragraphs (2) through (7) and inserting in lieu thereof the following:

"(2) with respect to wages received during the calendar year 1978, the rate shall be 5.05 percent;

"(3) with respect to wages received during the calendar years 1979 and 1980, the rate shall be 3.20 percent;

"(4) with respect to wages received during the calendar years 1981 through 1984, the rate shall be 3.25 percent;

"(5) with respect to wages received during the calendar years 1985 through 1989, the rate shall be 3.55 percent;

"(6) with respect to wages received during the calendar years 1990 through 2009, the rate shall be 4.00 percent; and

"(7) with respect to wages received after December 31, 2009, the rate shall be 4.80 percent.".

(3) Section 3111(a) of such Code (relating to rate of tax on employers for purposes of old-age, survivors, and disability insurance) is amended by striikng out paragraphs (2) through (7) and inserting in lieu thereof the following:

"(2) with respect to wages paid during the calendar year 1978, the rate shall be 5.05 percent;

"(3) with respect to wages paid during the calendar years 1979 and 1980, the rate shall be 3.20 percent;

"(4) with respect to wages paid during the calendar years 1981 through 1984, the rate shall be 3.25 percent;

"(5) with respect to wages paid during the calendar years 1985 through 1989, the rate shall be 3.55 percent;

"(6) with respect to wages paid during the calendar years 1990 through 2009, the rate shall be 4.00 percent; and

"(7) with respect to wages paid after December 31, 2009, the rate shall be 4.80.".

(b)(1) Section 1401(b) of such Code (relating to rate of tax on self-employment income for purposes of hospital insurance) is amended by striking out paragraphs (2) through (6) and inserting in lieu thereof the following:

"(2) in the case of any taxable year beginning December 31, 1977, and before January 1, 1979, the tax shall be equal to 1.00 percent of the amount of the self-employment income for such taxable year;

"(3) in the case of any taxable year beginning after December 31, 1978, and before January 1, 1981, the tax shall be equal to 0.70 percent of the amount of the self-employment income for such taxable year;

"(4) in the case of any taxable year; beginning after December 31, 1980, and before January 1, 1985, the tax shall be equal to 0.75 percent of the amount of the self-employment income for such taxable year; and

"(5) in the case of any taxable year beginning after December 31, 1984, the tax shall be equal to 0.90 percent of the amount of the self-employment income for such taxable year.".

(2) Section 3101(b) of such Code (relating to rate of tax on employees for purposes of hospital insurance) is amended by striking out paragraphs (2) through (6) and inserting in lieu thereof the following:

"(2) with respect to wages received during the calendar year 1978, the rate shall be 1.00 percent;

"(3) with respect to wages received during the calendar years 1979 and 1980, the rate shall be 0.70 percent;

"(4) with respect to wages received during the calendar years 1981 through 1984, the rate shall be 0.75 percent; and

"(5) with respect to wages received after December 31, 1984, the rate shall be 0.90 percent.".

(3) Section 3111(b) of such Code (relating to rate of tax on employers for purposes of hospital insurance) is amended by striking out paragraphs (2) through (6) and inserting in lieu thereof the following:

"(2) with respect to wages paid during the calendar year 1982, the rate shall be 1.00 percent;

"(3) with respect to wages paid during the calendar years 1979 and 1980, the rate shall be 0.70 percent;

"(4) with respect to wages paid during the calendar years 1981 through 1984, the rate shall be 0.75 percent; and

"(5) with respect to wages paid after December 31, 1984, the rate shall be 0.90 percent.".

(c)(1) Section 201(b)(1) of the Social Security Act is amended by striking out clauses (G) through (K) and inserting in lieu thereof the following: "(G) 1.55 per centum of the wages (as so defined) paid after December 31, 1977, and before January 1, 1979, and so reported, (H) 1.00 per centum of the wages (as so defined) paid after December 31, 1978, and before January 1, 1981, and so reported, (I) 0.96 per centum of the wages (as so defined) paid after December 31, 1980, and before January 1, 1983, and so reported, (J) 1.01 per centum of the wages (as so defined) paid after December 31, 1982, and before January 1, 1985, and so reported, (K) 1.18 per centum of the wages (as so defined) paid after December 31, 1989, and before January 1, 1990, and so reported, and (L) 1.80 per centum of the wages (as

so defined paid after December 31, 1989, and so reported,".

(2) Section 201(b)(2) of such Act is amended by striking out clauses (G) through (K) and inserting in lieu thereof the following: "(G) 1.090 per centum of the amount of self-employment income (as so defined) so reported for any taxable year beginning after December 31, 1977, and before January 1, 1979, (H) 0.750 per centum of the amount of self-employment income (as so defined) so reported for any taxable year beginning after December 31, 1978, and before January 1, 1981, (I) 0.720 per centum of the amount of self-employment income (as so defined) so reported for any taxable year beginning after December 31, 1980, and before January 1, 1983, (J) 0.7575 per centum of the amount of self-employment income (as so defined) so reported for any taxable year beginning after December 31, 1982, and before January 1, 1985, (K) 0.885 per centum of the amount of self-employment income (as so defined) so reported for any taxable year beginning after December 31, 1984, and before January 1, 1990, and (L) 1.350 per centum of the amount of self-employment income (as so defined) so reported for any taxable year beginning after December 31, 1989,".

(d) The amendments made by this section shall apply in the case of taxes imposed with respect to self-employment income for taxable years beginning after December 31, 1978, and with respect to wages paid or received during calendar years after 1978.

FEDERAL PARTICIPATION IN COST OF OLD-AGE, SURVIVORS, AND DISABILITY INSURANCE PROGRAM

SEC. 2. (a) In order to provide that one-third of the costs of the old-age, survivors, and disability insurance program under title II of the Social Security Act, and one-third of the costs of the hospital insurance program under part A of title XVIII of such Act, shall hereafter be borne by the Federal Government (with the remainder of such costs being financed from taxes imposed (as at present) on employees, employers, and the self-employed but at substantially reduced rates as provided by section 1 of this Act)—

(1) section 201(a) of the Social Security Act is amended by striking out "100 per centum" in the matter preceding paragraph (1) and inserting in lieu thereof "150 per centum";

(2) Section 201(b) of such Act is amended by striking out "100 per centum" in the matter preceding paragraph (1) and inserting in lieu thereof "150 per centum"; and

(3) section 1817(a) of such Act is amended by striking out "100 per centum" in the matter preceding paragraph (1) and inserting in lieu thereof "150 per centum".

(b) The amendments made by subsection (a) shall apply in the case of taxes imposed with respect to self-employment income for taxable years beginning after December 31, 1978, and wages paid or received during calendar years after 1978.

INCREASE IN CEILING ON AMOUNT OF ANNUAL EARNINGS COUNTED FOR BENEFIT AND TAX PURPOSES

SEC. 3. (a) Section 230(c) of the Social Security Act is amended—

(1) by striking out "and (2)" and all that follows in the first sentence and inserting in lieu thereof "and (2) the 'contribution and benefit base' with respect to remuneration paid (and taxable years beginning) in 1979 shall be $100,000.";

(2) by striking out "in 1982 and subsequent years, the dollar amounts" in the second sentence and inserting in lieu thereof "in 1980 and subsequent years, the dollar amount"; and

(3) by striking out "the years involved" in the second sentence and inserting in lieu thereof "the year 1979".

(b) The amendments made by subsection (a) shall apply with respect to remuneration paid (and self-employment income for taxable years beginning) after December 1978.

(c) As soon as practicable after the date of the enactment of this Act, the Secretary of Health, Education, and Welfare, in consultation with the Secretary of the Treasury, shall prepare and submit to the House of Representatives and the Senate a draft of any technical, conforming, or other changes in the Social Security Act, the Internal Revenue Code of 1954, and other laws which may be necessary to take account of or reflect the amendments made by subsection (a).

By Mr. NELSON (for himself, Mr. EAGLETON, Mr. DANFORTH, Mr. RIBICOFF, Mr. BENTSEN, Mr. HATHAWAY, Mr. JAVITS, Mr. HASKELL, Mr. MOYNIHAN, Mr. MATSUNAGA, Mr. CHILES, Mr. HOLLINGS, Mr. HART, Mr. HUDDLESTON, and Mr. HEINZ):

S. 2503. A bill to amend the Social Security Act and the Internal Revenue Code of 1954 to provide that disability insurance benefits and the medicare program shall be financed from general revenues (pursuant to annual authorizations) rather than through the imposition of employment and self-employment taxes as at present, and to adjust the rates of such taxes (for purposes of financing the OASI program) accordingly; to the Committee on Finance.

SOCIAL SECURITY REFINANCING ACT

Mr. NELSON. Mr. President, today I am introducing legislation with Senators DANFORTH, RIBICOFF, BENTSEN, HATHAWAY, JAVITS, HASKELL, MOYNIHAN, MATSUNAGA, CHILES, HOLLINGS, HART, HUDDLESTON, and HEINZ to redesign and refinance the social security programs. Entitled the Social Security Refinancing Act, this bill would remove the disability insurance (DI) and hospital insurance (HI) programs from payroll tax financing and, instead, provide financing for these programs from Federal general revenues.

A companion bill is being introduced in the House of Representatives today by Congressmen MIKVA, GEPHARDT, BRODHEAD, TUCKER, and WIRTH.

Last December, Congress enacted legislation to put the old age and survivors (OASI) and disability insurance trust funds on a sound financial basis using current economic and demographic projections through the years 2032, and 2008 respectively. The HI trust fund was provided with sufficient funding through the year 1988, at which time additional funding will be needed to keep that trust fund solvent. In order to provide enough income and adequate trust fund reserves to finance these three social security programs, substantial new social security tax revenues had to be raised in addition to those which were provided under prior law.

As a result, the combination of the new social security taxes with those already provided under prior existing law increased the social security tax liability for all workers, employers and self-employed persons to very high levels. However, the impact of the new taxes will be especially harsh on small businessmen, individuals earning the maximum amount of wages subject to the social security tax, and upon the self-employed.

Consequently, many individuals and employers have begun to examine the social security programs more closely, with a view toward a fundamental structural change in the way in which the social security programs are financed.

This legislation would provide for such a fundamental change. It would continue to rely upon the payroll tax to provide financing for the OASI retirement program. But it would eliminate financing the DI and HI program through the social security payroll tax and provide financing for these programs from Federal general revenues.

The original designers of the social security program did not intend the payroll tax to support all three programs. Indeed, when the social security program was enacted some 40 years ago, the payroll tax supported only the OASI retirement program. The disability insurance program was not created until 1957 and the hospital insurance program was not enacted into law until 1964. While each of these programs provide important insurance coverage to workers, retirees and their families—and this particular legislation would not alter this coverage—the payroll taxes needed to finance these programs have become too burdensome.

Right now, the social security payroll tax has two particularly distinguishing features. First, over one-half of Americans pay more social security taxes than Federal income taxes. And second, payroll taxes have been documented by liberal, moderate and conservative economists alike to be a regressive form of taxation.

By detaching the financing of the DI and HI programs from the social security payroll tax, every worker's social security tax liability projected under current law would be reduced. Moreover, using general revenues to finance these programs would lead to a more progressive tax system without sacrificing the integrity of these two social security programs.

Under the provisions of this legislation, the reduction in social security payroll taxes would begin in calendar year 1979 and continue throughout the next 75 years. This change would have such a profound impact that social security payroll tax rates for the next 42 years would be below those now in effect. And the tax rate in the year 2051 under this legislation would be about the same as the tax rate schedule to be in effect in 1982 under the provisions of current law.

The following charts demonstrate the impact of this legislation on social security tax liability for employers, employees and the self-employed.

CHART 1.—SOCIAL SECURITY TAX RATES AND WAGE BASE UNDER PRESENT LAW AND THIS PROPOSAL

Year	Employee/employer tax rate		Self-employed tax rate		Wage base	
	Present law [1] (percent)	This proposal [2] (percent)	Present law [1] (percent)	This proposal [2] (percent)	Present law	This proposal
1978	6.05	6.05	8.1	----------	$17,700	[3]

The concept of using general revenues for financing part of the social security programs is long overdue, in my opinion. During consideration of the social security bill last year, I proposed in the Senate Finance Committee to use part of the payroll taxes that support the HI program for financing the OASI and DI programs so that payroll tax rate increases could be kept to a minimum. The Finance Committee, however, rejected this course of action.

The OASI retirement benefits are a fairly accurate reflection of the contributions made by a worker, and these contributions reflect the wages upon which the social security tax is levied over the period of a worker's life. The OASI retirement benefits, in my opinion, should continue to be financed by the payroll tax. The DI and HI benefit payments, however, do not bear the same close relationship to a worker's payroll contributions, and therefore, need not continue to be financed by the payroll tax to maintain equity on an individual basis in social security. The HI program is the most obvious example of this phenomenon.

Whether a person gets sick, is admitted to a hospital and uses social security hospital insurance benefits is strictly an incidence of an individual's good health or lack of it, and not of the payroll taxes that have been paid over their working years. Yet, everyone covered by social security, whether healthy or not, is obligated to contribute payroll taxes in proportion to their annual earnings.

Under the provisions of the legislation, the OASI program would be actuarially sound throughout the next 75 years. The reserve levels in this trust fund would remain at a level consistent with the standards established by the actuaries of the social security system. The following charts show the status of the fund from now until 2051, and also show the general revenue payments necessary to support the DI and HI programs.

CHART 3.—TRUST FUND RESERVE RATIOS

Year	Present law			This proposal		
	OASI	DI	HI	OASI	DI	HI

CHART 4.—GENERAL REVENUES NEEDED TO SUPPORT DISABILITY INSURANCE AND HOSPITAL INSURANCE BENEFIT LEVELS IN YEARS 1979–81.

[In billions of dollars]

Year	DI [1]	HI [1]
1979	15.3	22
1980	16.5	26
1981	17.5	26

[1] Estimates based on estimated operations of the trust funds under current law.

Mr. President, the passage of last year's social security legislation insured the 18 million Americans contributing social security taxes and the 33 million Americans receiving social security benefits that the social security trust funds would not go broke and that the necessary funds would be there to finance future benefits.

The passage of last year's bill need not be seen as the final word on financing social security benefits. As chairman of the Senate Social Security Subcommittee, I intend to hold hearings later this year on alternative mechanisms to finance social security. At that time, this legislation and other bills seeking to reform financing social security benefits will be considered.

Mr. CHILES. Mr. President, I am pleased to join Senator NELSON in cosponsoring the legislation he is introducing today, designated as the Social Security Refinancing Act. This proposal represents a significant initiative in addressing an issue that remains of vital importance to all Americans; namely, how best to finance our social security programs. It is an issue that demands the renewed attention of the Congress and I believe this bill will serve as the catalyst for such a continued focus.

At the end of the last year, the Congress completed work on legislation which had the stated aim of correcting the problems in financing social security. I am not at all convinced that this new law will succeed in its aim and I could not support its passage. It was considered in the pressure of the end of the session for the Senate. It was not reform but merely a way out of the dilemma. It represents the biggest peacetime tax increase in decades and involves major budget changes that will affect future year budget deficits by millions of dollars. Practically, all workers, all businesses, all families have their present and future livelihood affected.

As an end result of the new law the social security tax liability for workers, employers, and self-employed persons will be at record high levels. Such high levels for payroll taxes cannot fail to incur adverse economic effects. The increase in payroll taxes can only serve to drive up inflation and depress employment rates. At this juncture in our economic recovery such effects are indeed untimely.

The proposal we are introducing today is an important departure from the approach taken last December. While it would continue reliance on the payroll tax for financing of the old age and survivors insurance retirement program, it separates out the disability insurance and hospital insurance programs to be financed from Federal general revenues.

This action does not threaten the original and still viable concept of social security as a retirement insurance program. The disability insurance program and hospital insurance program are later additions to the social security system. These programs provide important coverage for workers, retirees, and their families and must be continued. However, they have bloated the burden on the average worker and the businessman to an unacceptable point. It is undisputed that the social security payroll tax is a most regressive form of taxation. To increase that tax in order to meet the growing costs of expanded coverage is merely to aggravate the tax burden of those least able to pay.

The time is long overdue to seriously consider the financing of these important social security programs out of general revenue which is based on a more progressive tax structure. I think the Congress is now in a much better position to exercise the control that will be necessary if general revenue is used to finance these benefits. The recently implemented but already successful congressional budget process now provides the Congress with an orderly means of considering and evaluating major changes in taxes and expenditures. The Senate and House must now live with the limits imposed in the concurrent budget resolution and can cope with the pressures to increase expenditures beyond what we can afford.

Mr. President, I seriously doubt that the American people want to consider the social security legislation of 1977 as the final word on how to finance this system. If we are to achieve a fair and reasonable means of supporting this program we must look at alternative mechanisms. I understand that Senator NELSON will initiate hearings on this subject to consider this legislation and other proposals. I congratulate him for his efforts and I look forward to working with him to develop a financing structure that insures the integrity of these vital programs while levying a fair tax burden on the American people.

By Mr. DOLE:

S. 2504. A bill to amend the Commodity Credit Corporation Act to direct the Secretary of Agriculture to establish a program for expanding exports of farm commodities by making available CCC financing to exporters who extend deferred payment terms to foreign buyers; to the Committee on Agriculture, Nutrition, and Forestry.

EXPORT STIMULATION ACT OF 1978

Mr. DOLE. Mr. President, I believe the best way to overcome the effects of the vicious cost price squeeze that is currently dragging the farm economy down to depression levels is:

First. Take judicious and timely action to realine production with anticipated demand; and

Second. Step up efforts to stimulate U.S. exports of farm commodities so that production adjustments will be minimal.

The first of these measures to help improve the farm economy has been addressed in my bill, Flexible Parity Act of 1978, which I introduced with 10 cosponsors on February 2, 1978.

Today, I am introducing a bill to stimulate exports of farm commodities. I call this bill the Export Stimulation Act of 1978. This bill will forge a partnership between the Commodity Credit Corporation and commodity exporters to seek out additional export opportunities for American farm products. In developing and expanding markets for farm products, cooperation between private exporters, farmer-owned cooperatives, and Government is essential to realize to the fullest extent the existing export potential. My bill will help realize this potential.

We need to increase our share of world trade in agricultural commodities. To do this we must use to the fullest extent every export tool at our disposal along with a good dose of innovation. I regret the fact that our farmers have not shared one iota in the 9-million ton grain purchases by the People's Republic of China this marketing year. We have been "out sold" in other markets also.

The Secretary of Agriculture needs to establish a program that will provide Commodity Credit Corporation financing to exporters of agricultural commodities who will extend deferred payment terms to foreign buyers in those situation that will result in additional export sales. Commodity exporters have the capability of quickly spotting sales opportunities for U.S. farm commodities and assessing competition in foreign markets.

My bill would permit them to present their plan for realizing increased exports to the Commodity Credit Corporation for approval. Upon Commodity Credit Corporation approval of the export sales plan and upon proof of export, the Commodity Credit Corporation would provide the exporters with the necessary financing. Repayment to the Commodity Credit Corporation would be made in dollars by the exporter in accordance with the terms and at the interest rate approved by the Commodity Credit Corporation in the exporter's plans.

Regarding the cost of this program, there would be no adverse impact on the Federal budget since the interest rates charged would be higher than the cost of money to CCC from the U.S. Treasury. As a matter of fact, Secretary Bergland has testified in hearings that "We make money on the CCC credit program."

I ask for the support of my colleagues in obtaining this legislation which could help substantially facilitate agricultural exports.

Mr. President, I ask unanimous consent that this bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2504

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled. That the Commodity Credit Corporation Charter Act (15 U.S.C. 714 et seq.) is amended by adding at the end thereof the following new section:

"AGRICULTURAL EXPORT STIMULATION

"SEC. 20. (a) To increase the U.S. share of agricultural commodities in world trade, and to develop, maintain and expand foreign markets for such commodities and products thereof, the Secretary of Agriculture, notwithstanding any other provision of law, shall provide CCC financing to exporters of such commodities who wish to extend deferred payment terms to foreign buyers in order to meet foreign competition and to make additional export sales.

"(b) Exporters who are willing to sell U.S. agricultural commodities to foreign buyers on deferred payment terms not to exceed three years may apply to the Commodity Credit Corporation for financing of such commodities. Upon CCC aproval of the export sales plan and upon proof of export in accordance with the approved plan, the CCC shall provide the necessary financing.

"(c) Repayment to CCC shall be made in dollars by the exporter in accordance with the terms and at interest rates approved by CCC in the exporter's plan. Interest rates on such financing shall be no higher than those charged for similar terms under CCC country lines of credit.

"(d) The Secretary may, if he deems such action appropriate to protect the interest of the United States, require a performance bond from the exporter at the time of the sale.

"(e) Financing agreements with exporters entered into by the CCC under this act shall be subject to such other terms and conditions as the Secretary may deem necessary or appropriate and shall be subject only to review by the National Advisory Council on International Monetary and Financial Policies.

"(f) The authority provided under this section shall be in addition to and not in place of any authority granted the Secretary or the Commodity Credit Corporation under this or any other Act.

"(g) This section may be cited as the 'Export Stimulation Act of 1978'.".

By Mr. JAVITS (for himself, Mr. DOLE, Mr. MOYNIHAN, Mr. STAFFORD, Mr. RANDOLPH, Mr. EAGLETON, Mr. BROOKE, and Mr. HATHAWAY):

S. 2505. A bill to amend title XIX of the Social Security Act to provide that certain handicapped individuals shall be eligible for medical assistance; to the Committee on Finance.

Mr. JAVITS. Mr. President, I am pleased to introduce for myself, Senators DOLE, MOYNIHAN, STAFFORD, RANDOLPH, EAGLETON, BROOKE, and HATHAWAY, a bill which will enable severely disabled persons who are capable of gainful employment to receive medicaid assistance.

Employable disabled persons in our country are victims of a most egregious situation: The medicaid program, designed to help people, instead may place severely handicapped individuals in very real "life-or-death" dilemmas, which virtually require them to go on public assistance.

Under title XIX of the Social Security Act, a disabled person's eligibility for medicaid depends not only upon financial eligibility under State-established

standards; but also upon meeting the requirements of the definition of "disabled" used for purposes of the supplemental security income (SSI) program under title XMI of the act. Section 1614(a)(3)(D) states in part:

The Secretary shall by regulations prescribe the criteria for determining when services performed or earnings derived from services demonstrate an individual's ability to engage in substantial gainful activity. Notwithstanding . . . [an individual otherwise meeting the SSI medical definition of disability], an individual whose services or earnings meet such criteria . . . *shall be found not to be disabled.*

Mr. President, "substantial gainful activity" under current Federal regulations is defined by a $200 monthly gross earnings limitation. This means that most disabled persons earning more than $200 monthly are considered legally not disabled, and hence, are ineligible for any medicaid services.

There are only two exceptions to this "substantial gainful activity" limitation. First, any disabled person may receive medicaid services if he or she engages in a trial work period of up to 9 months per disability regardless of monthly gross earnings over this period. Second, any disabled person eligible for medicaid services in December 1973 is still eligible, provided that his or her State's approved medicaid plan did not at that time include a "substantial gainful activity" test. Despite these exceptions, many severely disabled workers are eliminated from eligibility for required services.

Mr. President, severely disabled workers in this Nation frequently need home health aides, prescription drugs, and other services covered under State medicaid plans to assist them in meeting their daily personal requirements. The cost of these services may be quite high depending upon the individual's needs. Many disabled persons who are employed earn incomes above the $200 monthly gross earnings limitation—incomes too high for medicaid eligibility but often unquestionably too low to cover the cost of life-sustaining care. Thus, the employable disabled person who wishes to work may be forced by this limitation upon his or her earnings to remain unemployed (or underemployed), since his or her earnings cannot cover the cost of necessary personal services.

To force an individual to choose between employment and personal attendant care, for example, is unacceptable. Our employable disabled citizens should have the opportunity for both, so that they may lead productive, independent lives.

The case of a woman in New York is instructive of the devastating effect of this situation faced by disabled workers. She was forced to make the untenable choice between work or life. When she first wrote me, the earnings limitation for purposes of defining her as "disabled" was $140 per month, but the precise figure is less relevant to the issue than the very clear fact that, regardless of employment, a disabled person is still disabled, and still may require life-sustaining services such as a home health aide. I should like to read into the RECORD a part of her original letter to me:

I am a 26-year-old severely disabled woman who was put through school by the Division of Vocational Rehabilitation. I graduated Hofstra University in 1969 and sought work. In 1971 I began work for the Department of Social Services as a caseworker aide. I lived with my family; mother took care of my personal needs, such as bathing, dressing, toileting, as well as those of my disabled younger sister. In 1973 I moved into my own apartment as I realized that as my sister grew older it was increasingly more difficult for my mother to care for us (my sister is now 14).

I wanted to try to live independently, now, before I had to. My parent would someday be unable to care for me. I shared my apartment with a disabled roommate on public assistance. She had an aide paid for by medicaid. I supplemented the aide and she took care of me too. In June, my roommate moved. I used my savings to pay an aide and tried several "arrangements" where I offered free room and board in exchange for service. I had my life jeopardized by an alcoholic, a drug addict, and a mentally ill woman.

I applied for medicaid and was told I could not qualify as anyone between the ages of 21 to 64 who earns more than $140.00 per month cannot be considered disabled. I earned $9400 per year; took home $133.00 per week; paid $241.00 per month for utilities and rent and an aide costs from $25.00—$35.00 per day. I applied for public assistance on the grounds that the Home Health Aide was a necessary expenditure to my working. I was denied because if I needed a Home Health Aide I was disabled and should apply for S.S.I. Social Security said I would not be eligible for S.S.I. because if I worked full time I was not disabled.

The emotional strain and lack of proper care brought about by this catch-22 situation caused my condition to worsen. I resigned from my job with a Doctor's note. My case was opened for welfare and medicaid, and a Home Health Aide provided.

I can work, but I cannot live without a Home Health Aide. If I return to work, I lose my medicaid, my Aide, and therefore, my life. I do not want to remain on welfare or SSI. I want to be considered disabled because I cannot independently provide for my own personal activities of daily living (toileting, bathing, turning in bed, dressing, etc.)

Mr. President, this is a tragic situation, unfortunately not an uncommon one, which we must not allow to continue.

I have asked officials of the Department of Health, Education, and Welfare and their counterparts in State government whether this unintended result can be remedied by regulation. After much discussion and correspondence over a period of time, it has become apparent that the most feasible remedy to this highly inequitable situation is for the Congress to amend the Social Security Act.

The legislation which I introduce today will correct this intolerable situation by amending title XIX of the Social Security Act to permit any disabled individual who is unable to care for his or her own personal needs, even though employable, to receive the services of a home health aide, and other medicaid services, under applicable State plans. The bill will extend attendant care and medical assistance covered by medicaid to disabled individuals who would not otherwise qualify because their incomes, while low, nevertheless are presently deemed too high solely because of the substantial gainful activity test of current law which is applied only to disabled persons.

This bill establishes eligibility for medical assistance under medicaid programs for handicapped persons who presently are barred from eligibility by the "substantial gainful activity test" of present law which prohibits eligibility regardless of severity of need. Severely handicapped persons are no less in need of medical assistance, and no less deserving of such assistance, than, for example, are blind persons, the very young, or the elderly.

Under our proposal, disabled persons would be subject to the same State-determined financial eligibility requirements for medicaid as are, for example, blind and elderly persons. This bill simply removes the "substantial gainful activity" test, currently applicable only to the disabled, for purposes of receiving medicaid. The test will continue to apply for eligibility of disabled persons for title XVI, SSI assistance.

Under the provisions of this bill, disabled workers would be required to meet State medical and financial eligibility standards for receipt of medicaid. Thus, under most State medicaid eligibility formulae, disabled individuals with substantial annual incomes would not be eligible for any such assistance unless their personal medical expenses were astronomical.

This legislation could be, in fact, cost-saving, for part of the expenses incurred would be recoverable through the taxes of disabled citizens who now would be enabled to work and pay taxes. Most of our severely disabled workers do not wish to be on public assistance; we should not require them to be so.

Mr. President, this measure will provide severely disabled workers with the opportunity for full and productive lives, and will remedy an injustice which has for too long precluded our disabled citizens from exercising their right to live and work.

To present the disabled worker with a choice of either working and losing all assistance, or not working to retain eligibility for needed daily assistance is, in effect, no choice at all.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2505

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the first sentence of section 1905(a) of the Social Security Act is amended—

(1) by striking out "or" at the end of clause (vi);

(2) by inserting "or" at the end of clause (vii); and

(3) by inserting after clause (vii) the following new clause:

"(viii) unable without assistance to get in or out of bed, dress, bathe, or otherwise meet their daily personal needs by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be ex-

pected to last for a continuous period of not less than twelve months."

(b) The amendments made by this Act shall apply with respect to services furnished in calendar quarters beginning on or after the date of the enactment of this Act.

MEDICAID ELIGIBILITY FOR CERTAIN HANDICAPPED WORKERS

Mr. DOLE. Mr. President, in recent years, the thrust of Federal legislation has been aimed toward integrating handicapped individuals into contemporary American society. We are attempting to tear down various types of barriers which have been needlessly erected over the years. Barriers in architecture, transportation vehicles, educational opportunities—and most restrictive of all, barriers in attitudes—have kept disabled individuals from developing to their full potential.

As educational and job opportunities begin to open up for the handicapped, we are encountering new barriers that need to be removed. I am pleased to join Senator JAVITS in introducing a bill designed to eliminate a barrier handicapped persons have run into once they enter the labor force. The barrier results from the termination of medical assistance. Our bill amends title XIX of the Social Security Act to make handicapped workers eligible for medicaid coverage in instances where their medical expenses are high enough to classify them as medically needy.

BENEFITS END

Under current law, when a disabled person accepts employment, his supplemental security income and medicaid benefits continue through a 9-month trial work period. After that time, a person remains eligible for benefits only if his income is less than $200 monthly. If income exceeds $200, the worker is considered to be engaging in substantial gainful activity, which means that by definition, the person is no longer "disabled," and thus does not qualify for either SSI or medicaid. (This example is based on the handicapped worker who is not otherwise eligible for medicaid as an elderly person, a blind person, or an AFDC recipient.)

MISCONCEPTION IN THE LAW

The conflict is readily apparent. Many handicapped persons want to work, but on their salaries, they cannot finance the total cost of their medical expenses. Few persons with a severe handicap jump into a job that pays sufficiently to make up for lost medicaid benefits. The present law is based on the misconception that handicapped people are confined to their homes. It assumes that if a person works, he is not handicapped. If a person is handicapped, he does not work. We have got to recognize that handicapped people are often perfectly able to hold a job and earn a sufficient amount to cover daily living expenses. Often, though, they may not earn enough to offset the cost of their medical care.

When medical expenses outweigh income, the disabled person has no viable alternative but to leave the job and become totally dependent once again on public assistance. Our bill would allow handicapped persons to work and at the same time, apply for medicaid in the 32 States which have a "medically needy" spend-down provision in their medicaid programs. The spend-down provision allows a person to subtract his medical expenses from income, and if the adjusted income places him within income levels set by the State, the individual could receive medicaid assistance.

ELIMINATES WORK DISINCENTIVE

This bill eliminates a major work disincentive that handicapped persons face. Frequently, accepting employment for handicapped persons means going into debt over medical bills. The working individual who cannot afford to lose his medicaid coverage must lose his job instead. This is far from acceptable—a handicapped person should not be forced to choose between employment and medical services. We need to encourage employment; working should always be more attractive than not working. Our bill authorizes medicaid coverage as long as the individual's medical needs consume a disproportionate amount of his income.

I am not complaining because we have encountered this work barrier. It indicates that gradually even severely handicapped persons are finding their way into the job market. Some of these new workers will always have costly medical bills, but we must not let that fact interfere with their opportunity to work.

COST

It is difficult to estimate the cost of this bill, for there are no good figures on how many persons would be covered by this provision. I am hopeful it will prove cost efficient. Many members of this target population are presently receiving both SSI and medicaid. After termination of the trial work period, persons affected by this bill would be cut from SSI once their income exceeds $200 monthly, and they are no longer "disabled" as defined under SSI.

The situation is graphically explained in a letter I received last fall from a young woman caught in this predicament. I would like to read you her letter:

DEAR SENATOR DOLE: My name is Carol Ann Doyle. I was born on September 27, 1941 with a congenital disease called Arthrogryposis. This disease caused stiffening of the joints with incomplete muscle development resulting in deformity of all the extremities. I walk with a brace and crutches and also use a wheelchair for fuller mobility. My wrists are in a fixed position with limited motion in the elbows resulting in extreme hardships in manual dexterity.

To give you a more complete picture of my limitations, I would like to cite specific ways which I am able to do things. I can often reach the same goal as you but my means of getting there may differ. It is necessary for me to arise at 5:20 A.M. each morning so that I will be ready to leave for work by 7:00 A.M. Although my speed in getting myself dressed has improved over the years, I still require this amount of time. I am not able to get into a shower or bath tub but I am able to give myself a partial bath. I place a soapy facecloth over the top part of my crutch and I am able to reach most parts of my body. My health aide comes in five days a week to assist me with bathing my legs and feet and also washing my hair. It is not possible for me to change my nylons each day myself so it is necessary for me to sleep with them on and she changes them when she arrives. I can put my brace on and dress myself using a long stick with a hook on the end. I again utilize my crutch by placing my clothing over the top of it and then over my head. I use the stick to pull my clothing off. It is necessary for me to buy certain types of clothing and tops that have a wide neckline and pants with elasticized waist bands and no zippers or buttons can be used. Because of the lack of motion in my elbows I have to use a comb that is attached to a long stick; by maneuvering my head around I can reach all sides. Just before going out of the door in the morning I put my coat on one arm and carry out my school bag. My driver helps me get my other arm in. I have been able to walk since I was seven years old. Before that I used to crawl around. Because of the constant use of crutches for the past twenty-nine years, I am experiencing constant aggravation under my arms in the form of sores. They often open and it is necessary for me to have them bandaged. Again, my health aide is of utmost importance as I am not able to do this myself. I also have a problem with chronic swelling in my legs and feet. This is a mechanical problem brought on by the lack of muscle development which normally would act as a pump to assist in propelling the blood upward. Because the blood pools in my legs; fluids seep out and fill the surrounding tissue. Fluid pills and low sodium diet do not effectively alter this as it is more of a mechanical than a chemical condition.

I am able to clean my apartment on a limited basis. My health aide changes the bed and does my laundry, she also dusts and sweeps the floor. I also have assistance from my sister who does the heavier housework such as washing the floors and walls, etc. I am able to make my bed each day and wash the dishes. I cook my own supper. My health aide puts out the necessary pans and utensils I will need. I am not able to raise my hand to my mouth so I lower my head to my hand when eating. I was doing my own grocery shopping with my sister; but, because of the problems with sores under my arms, my health aide has taken over the task.

When teaching, I use a wheelchair to get around the building with the assistance of students. I am able to plan and implement educational programs for the Learning Disabilities students I work with as a teacher aide. It is necessary for me to cross my right arm over my left cupping one hand in the other to write.

The above instances are a few examples of my daily routine. I often take for granted the way in which I do things.

I have had extensive hospitalizations in my earlier years for the purposes of corrective surgery and rehabilitation. To my knowledge, the expense of these stays were paid for by The Crippled Childrens' Association and during my four years of high school, at the Massachusetts Hospital in Canton, I believe part of the expense was paid for by the veterans and my parents.

When I finished high school I started working at the Anna Jaques Hospital in Newburyport, MA as a switchboard operator. I lived at home and paid my own medical bills such as dentist, eye doctor, etc. I was covered under a Blue Cross plan and Massachusetts Rehabilitation Commission paid for corrective shoes, braces and other necessary appliances relating to my disability.

In 1968, my mother passed away and I was no longer able to live at home and I needed a certain amount of attendant care such as dressing and personal needs.

A social worker at the local welfare office assisted me in applying for Disability Assistance and also in finding a private home where I could live in as normal a family situation as possible. A very costly alterna-

tive to this placement was a nursing home. I was granted Disability Assistance because I did not earn enough money a week to pay for my living arrangement and personal care needs. I did, however, pay for what I could out of my limited income.

I continued to work at the hospital and almost completed eleven years there. I strongly felt that I was meant to do something different with my life than being a switchboard operator and I also had hopes of becoming financially independent. So, I pursued a career in education.

To this end, I was accepted at Boston College and attended classes on campus for four years. I earned my Bachelor of Arts degree in Elementary Education, with certification in Special Education. Massachusetts Rehabilitation Commission paid for my education and because I no longer worked while attending college, I was put on full disability assistance to pay for my living expenses and health needs.

Encouraged and motivated by the idea of a new career, my life took a new meaning. I was determined to become more self-sufficient and by using different gadgets and techniques, I learned to dress myself and take care of my personal needs. I decided to try and live on my own and four years ago, at age 31, I was accepted into an apartment for handicapped persons at a local elderly housing project. Because I was now living on my own, my disability assistance was decreased considerably. Consequently, disability assistance paid the people I formerly lived with over $400.00 a month but was now reduced to approximately $265.00 a month for me to take care of myself.

Upon graduating from college, I was hired as a teacher aide in a public school program for handicapped children. I earned $3.50 per hour for 30 hours a week. As a teacher's aide, I was paid only for the hours I worked. When holidays, sick days or vacations came I was not paid. Because of this irregular pay pattern, I asked if Supplement Security Income supplement my income until I got a full teaching position.

S.S.I. agreed to pay me $131.00 per month for the period from September 1975 to September 1977. During this time, I was also covered under Medicaid for my medical needs.

Presently, I am still a teacher aide, in a different school system, earning $3.50 an hour for 30 hours per week with no fringe benefits for 10 months a year.

On August 18th, 1977, I received a letter from S.S.I. informing me that I was be longer eligible for supplemental income as of October 1, 1977, because I was earning more than $200.00 a month and that my status for receiving Medicaid assistance is questionable because if I earn more than $200.00 a month, I am no longer considered disabled. This change was due to the fact that S.S.I. assistance was merely a transition period until it was shown that I was able to continue working.

Last winter, from January through May, I was hospitalized for three months with a deep rooted infection and bedridden at home for the remainder of the time. Because my job offers no benefits, I was totally dependent on S.S.I. income and Medicaid benefits.

Just prior to this hospital stay, I depended on friends and relatives to come when they could. At present, Medicaid pays for this aide at the cost of $7.25 per hour, $56.25 per week. If I am not able to maintain Medicaid support I will have to forfeit the health aide as my annual income of $3,780.00 as a teacher aide could not support the yearly cost of $2,925.00 for a health aide.

Not only am I alarmed by this unexpected change in supportive assistance, but I am fearful of what lies ahead for me, both physically and mentally. Considering the amount of income I presently earn, and the established and unexpected expenses ahead of me, I may be forced to stay at home, because of the financial feasibility rather than to continue working.

Please consider the following figures:

Monthly Income, Sept. 1977–June 1978 (excluding non paid holidays and vacation periods):

September, 18 days at $21.00 a day, $378.
October, 20 days at $21.00 a day, $420.
November, 19 days, $399.
December, 16 days, $336.
January, 20 days, $420.
February, 15 days, $315.
March, 22 days, $462.
April, 15 days, $315.
May, 22 days, $462.
June, 13 days, $273.
$3,780.00 (10 month year).
$315.00 average monthlly income.

My gross annual income of $3,780.00 over a 10 month period would be reduced by $21.00 per day for every day I was absent due to illness.

My annual deductions from this gross annual amount is as follows:

Federal Taxes, $23.40 bi-weekly, $321.20 yearly.
State Taxes, 10.37 bi-weekly, 186.66 yearly.
Retirement based on 7 percent of gross, 14.70 bi-weekly, 264.60 yearly.
Life Insurance, .28 bi-weekly, 7.20 yearly.
Total, $48.75 bi-weekly, $799.66 yearly deductions.
Gross Income, $3,780.00.
Deductions, 779.66.
Net Yearly Income, $3,000.34.

According to the monthly standards of eligibility for S.S.I. recipients in Massachusetts as of September 1977, a disabled individual paying the full cost of living expenses will receive $285.12 clear, per month, without any deductions.

On a yearly basis, if I were on S.S.I., I would receive $3,421.44 which comes to $421.44 more than my net annual income working as a teacher's aide for ten months.

In evaluating these figures, the financial incentive for me to continue working is definitely not there. The road to rehabilitation has been a long and tedious one for me and I am proud to say that I indeed have made it. Psychologically, I am healthier and happier when I can be involved in a work experience, as I am now, by teaching the handicapped.

Daily, I am meeting my own needs and I am enriching my own life as well as sharing my experiences and offering encouragement and perspective to the handicapped children I work with.

However, finances and medical insurance coverage for someone as myself with a chronic disease are of major consideration and importance.

As it is now, my annual income is far below the national poverty level.

Since graduating from college, I have been in constant search for a full time teaching position. I am hopeful that someday this will become a reality. However, even if I were to become a full time teacher, and in light of any additional medical and health care assistance being denied me, that, too, would become financially unfeasible.

Consider my income and expenditures if I were on a full time teacher's salary without Medicaid assistance.

Gross Annual Income, $9,862.00.
Net Annual Income, $6,966.90.
Withholding Deductions:

Fed. Tax bi-weekly	$56.60
State Tax bi-weekly	18.72
Retirement	26.55
Insurance	.28
Teacher Dues	5.61
Blue Cross	3.59
Total	111.35

$111.35 × 26 pay period = $2,895.10 total deduction yearly.

Gross salary	$9,862.00
Deductions yearly	2,895.10
Net Income yearly	$6,966.90
Annual living expenses:	
Health Aide	$2,925.00
Rent	2,275.80
Transportation	225.00
Orthopedic Shoes Brace adjustments	180.00
Food	1,300.00
Clothing (Specially fitted)	550.00
Doctors Visits	100.00
Dentist Visits	100.00
Prescriptions	50.00
Telephone	180.00
Miscellaneous	200.00
Total	8,085.80
Annual Income	$6,966.90
Living Expenses	8,085.80
Deficit	1,118.90

Because I am still disabled, my medical expenses are somewhat out of the ordinary. It is necessary for me to have a health aide; it is necessary to be outfitted with orthopedic shoes; it is necessary that I have the proper health care and medical treatment; and it is necessary that I have sufficient income to support my varied needs. Will it become necessary for me to turn down the opportunity for professional employment?

I find it difficult to believe that financially I may be forced to pass up a teaching position.

The question arises in my mind as to what other severely handicapped individuals are doing who are attempting to live independently as possible, but are prevented from doing so because of financial burdens that are incurred because of health aid and medical support services required because of their physical handicaps.

Could the handicapped, in situations such as mine, be covered under group insurance, such as Blue Cross-Blue Shield, for routine medical needs? Could the out of the ordinary expenses relating to the chronic conditions of some handicapped persons, not covered by general health insurance, be met by a State or Federal Health Plan?

Such coverage could and would give handicapped individuals the incentive to pursue careers, which they possibly have been trained for through rehabilitation programs, without being financially penalized because of their handicaps.

My fears are real. I fear being forced to give up my job; I fear the loss of motivation which has enabled me to attempt life at its fullest in spite of my handicap. I want to continue maintaining my apartment; I want to teach and to continue to share the hope of rehabilitation with the handicapped children I work with; I want to be productive and to have a feeling of self worth; and lastly, I want to continue to work towards becoming all that I can be.

I greatly appreciate that you have taken the time to listen to and evaluate my situation. My only hope is that I will not be forced into stagnation after the long trying years.

In November 1976, the Massachusetts Division of Employment Security awarded me a citation recognizing my success in employment and making note of my achievements as a handicapped person.

My handicap is not what is going to prevent me from continuing to be employed, but rather it is the system that is making the public acknowledgment of my success become a mockery by not allowing me to continue to be employed.

I need your help! I want to remain employed and to become as independent as I can become. Will you please help me?

Sincerely,

CAROL ANN DOYLE.

CONCLUSION

The impact of Ms. Doyle's letter is clear. The fear of losing. Medicaid is not idle speculation, but a real possibility to some handicapped persons who venture into the work force, often at great personal risk. The loss of medicaid in reward for employment hardly constitutes a work incentive. I think the bill introduced today recognizes and resolves this work disincentive.

I hope that my colleagues will also see the need for this legislation, and that it will be promptly considered and approved. It can have nothing but a positive effect on handicapped individuals who want to work, but who cannot afford to financially. This is a deplorable situation which could be corrected, and I am pleased to offer this bill as a solution to that problem.

Mr. HATHAWAY. Mr. President, it is my pleasure to join with my colleagues in introducing this bill to facilitate medicaid benefits for the severely disabled. The intention of this bill is to remove another obstacle confronting severely disabled individuals.

Severely disabled persons who are employable are currently faced with an unfortunate dilemma. If they work and earn over $200 a month, they lose their eligibility for medicaid. This results in great hardship because many of these individuals are dependent upon medicaid for assistance in performing the routines of daily life which enable them to work in the first place. Consequently, many severely handicapped individuals are forced to choose between remaining unemployed and thus, dependent on public assistance to qualify for medicaid, or engaging in work at the expense of critically needed medical assistance.

This situation is the unintended result of the present law which defines medicaid eligibility not only on the basis of State-determined financial status, but also under the definition of an individual's ability to engage in "substantial gainful activity." This phrase has been interpreted by Federal regulation to mean an income of over $200 per month.

Many severely disabled individuals have worked to overcome their handicaps, to develop the skills to surmount many barriers and become independent and self-supporting. However, the medical and related needs of the disabled are often extremely costly, and due to the ongoing nature of a disability, are a continuous expense.

An income of over $200 per month is often insufficient to meet these ongoing health needs which can include not only medical care, but also prescription drugs, home health care, and other life-sustaining services.

As a result of the present medicaid eligibility requirements, a disabled person is forced to forfeit the opportunity for a self-supporting existence in order to insure receiving the benefits which allow for his very survival. This situation is in contradiction with efforts at rehabilitation and with the belief that all citizens, regardless of any disability, should have open access to our society: to transportation, to building, and to employment. It is another obstacle to a disabled person's independence.

This bill substitutes an operational definition for eligibility for medicaid to be used in conjunction with the individual State's financial criteria which apply to other groups such as the blind and the elderly. This will allow those disabled individuals who wish to work and who are able to be self-supporting to do so without losing the medicaid benefits which are necessary for both their health and survival.

Those disabled who earn enough income to provide for their own medical and related care will continue to do so under the existing financial eligibility requirements for medicaid. Those disabled who are able to be self-supporting but cannot afford the ongoing cost of medical care will be able to work and receive medicaid benefits. Beyond returning the option to work to the disabled, this legislation may ultimately be cost-saving as the income of the employable disabled will be taxable. Furthermore, instead of receiving public assistance such as unemployment compensation and welfare, they will be productive members of society. Most severely disabled individuals wish to maintain as much independence as possible. The opportunity to participate more fully in our society is welcome.

This bill removes the contradiction between the requirements of the law and efforts at rehabilitation. It allows those disabled who are able to work, who have overcome the obstacles and constraints of their handicap, the opportunity to lead full and productive lives.

S.J. Res. 110. A joint resolution establishing May 3, 1978, as "Sun Day"; to the Committee on the Judiciary.

SUN DAY

Mr. PERCY. Mr. President, Wednesday, May 3, 1978, is no longer just Wednesday. It is also Sun Day. Sun Day will be a nationwide celebration of solar energy. Citizens all across the country are organizing solar fairs, demonstrations of solar technologies, conferences, educational programs and the like to take place on and around May 3. There programs will demonstrate solar energy in all its forms: wind, crop-drying, and fast-growing plants, as well as direct solar heating and cooling, and electricity generation. Sun Day will be a widely celebrated, and very important, event.

Though Sun Day has been designed as a grassroots effort, it needs and deserves all the support we in Congress can give it. As a first step, Mr. President, I am today introducing a resolution which does three things: It proclaims May 3 Sun Day; it authorizes and requests the President to urge the general public, industry and labor to celebrate the day; and it further urges the President to direct all appropriate Federal agencies to participate. It gives me great pleasure, Mr. President, to be joined by 53 of my colleagues in submitting this resolution. Already, a majority of the Senate endorses the efforts of Sun Day to focus national attention on solar energy's potential ability to meet substantial portions of our energy needs.

Sun Day has found strong support in the House of Representatives also. This same resolution is being introduced on the House side today, by Congressmen RYAN, OTTINGER, JEFFORDS and with considerable bipartisan support. A majority of Representatives are cosponsoring it.

The Department of Energy, too, I am pleased to report, sanctions Sun Day. On January 25 of this year, Secretary Schlesinger circulated a memorandum among his principal staff underscoring DOE support of Sun Day. Secretary Schlesinger asserted that the broad objectives of Sun Day are consistent with the major objectives set forth in the national energy plan. The Department of Energy/Sun Day cooperation procedures detailed in the memorandum are excellent. Mr. President, I ask unanimous consent that Dr. Schlesinger's memorandum be inserted in the RECORD at the end of my speech.

Sun Day supports a good cause. So many of the problems that plague conventional energy sources do not afflict solar energy. It cannot be embargoed. Supplies will never run out. The price will never go up. The environment will not be fouled. There is no danger of catastrophe. Solar energy offers reduced dependence on imported oil, a stronger dollar, and a healthier balance of payments. Proliferation of solar technologies to less developed countries would be a development to celebrate.

Some solar technologies offer the advantage of being small and simple. When energy devices are family-, factory-, or community-oriented, they are understandable by those using the energy. Such comprehension and involvement fosters an appreciation for energy use and conservation. It gives one a little more control over his or her own life.

A look into the not-so-distant future reveals that solar energy must satisfy a much greater portion of our energy needs than it does today. We can and should begin now to look to the advancement of solar energy. The diverse back-

grounds of the cosponsors of this resolution demonstrates the broad base of solar energy's support. But it is one thing for U.S. Senators, surfeited with information, to support solar energy. The citizens of this country are not so well informed.

Sun Day will prove to a largely unaware general public that many solar technologies are not "exotic." Some of them predate the oil, gas, and nuclear technologies that surround us today. Now they are just waiting to be put to widespread use. In this respect, Sun Day will be crucial. By reaching hundreds of thousands of previously unconvinced people Sun Day can help foster massive support for solar energy. From massive support can follow increased demand for solar technologies, mass production, lower costs, widespread use, and all the advantages of solar energy I mentioned earlier.

It will not, of course, be so simple. But none of it can happen without the kind of commitment to solar energy Sun Day will encourage.

I hope this resolution is only the beginning of a Senate commitment to a successful Sun Day. Sun Day's value is beyond question. I urge all my colleagues to support Sun Day with their votes for this resolution, and in whatever other manner they choose.

Mr. President, I ask unanimous consent that the text of the resolution establishing May 3, 1978, as Sun Day be printed in the RECORD at this point, followed by the text of Dr. Schlesinger's Sun Day memorandum.

There being no objection, the resolution and memorandum were ordered to be printed in the RECORD, as follows:

S.J. RES. 110

Whereas the realization and the promise of solar energy will be observed and celebrated throughout the nation on the 3rd of May, 1978; and

Whereas the development of solar technologies will provide an abundant, economical, safe, and environmentally compatible energy supply; and

Whereas a day devoted to a celebration of all solar technologies should help inform the general public, industry and labor, and demonstrate the potential of the sun in meeting the nation's energy needs; and

Whereas Federal, state and local governments should foster and encourage the further development, refinement, and utilization of solar energy technologies: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, that May 3, 1978 is proclaimed "Sun Day," and the President is authorized and requested (a) to issue a proclamation calling upon the general public, industry and labor of the United States to observe such day with appropriate activities and ceremonies, and (b) to direct all appropriate Federal agencies to cooperate with, and participate in, the celebration of "Sun Day."

DEPARTMENT OF ENERGY,
Washington, D.C., January 25, 1978.

From: James Schlesinger, Secretary.
Subject: DOE support of "Sun Day (May 3) activities."

MEMORANDUM FOR PRINCIPAL STAFF—HEADQUARTERS AND FIELD

Sun Day, *May 3, 1978,* is being planned by a broad coalition of consumer, labor, church, environmental, and university groups—as a community based focus on the Sun as the source of renewable energy supplies (sun, wind, biomass, ocean program, etc.). It seeks to:

A. Generate citizen interest in solving the Nation's energy problems; and

B. Increase community energy self-sufficiency through conservation and the use of renewable resources.

Comment received from the public during the preparation of the National Energy Plan (NEP) placed strong emphasis on the development of solar energy and other renewable or essentially inexhaustible resources. Chapter VII of the NEP encourages government promotion of efforts to develop renewable sources of energy. Chapter VIII states . . . "meeting the Nation's energy goals should be a great national cooperative effort that enlists the imagination and talents of all Americans. At home, on the road, at work, and elsewhere, all Americans can do their part to help solve the energy problem."

The broad objectives of Sun Day are consistent with major objectives set forth in the NEP. The Department of Energy (DOE), therefore, supports the concept of Sun Day and those activities associated with Sun Day which are compatible with the NEP.

I have designated the Assistant Secretary for Intergovernmental and Institutional Relations (IR) as the focal point for Sun Day policy guidance. IR, if circumstances indicate the necessity, may establish a steering committee to coordinate our liaison with "Sun Day" representatives throughout the DOE structure. Any proposals for direct funding of activities connected with Sun Day will be reviewed by Assistant Secretary Hughes in advance of commitments.

Each DOE office and employee should consider how they can assist the NEP supported activities of Sun Day. Consider offering kinds of assistance such as:

Technical assistance from program offices and laboratories;

Hosting "open houses" of our facilities and renewable energy demonstration projects;

Provide direct support in terms of energy outreach programs—prepare information packages or exhibits for all DOE and government facilities hosting the public during Sun Day "Week" and for Sun Day offices, community based energy information centers and public interest groups;

Provide or fund radio and TV spots on NEP-supported issues;

Assist communities in determining their energy vulnerabilities and how to deal with the problem;

Provide "speaker's bureau" support and make its availability known in advance to local government and civil groups;

Prepare DOE articles and reports on renewable energy resources for the full range of general public publications;

Encourage examination at the community level of problems associated with the introduction of renewable resources including shortages of skilled experts and potential consumer fraud;

Establish feedback mechanisms to ensure our responsiveness to the concerns citizens express during Sun Day.

Sun Day offers a unique opportunity for the nation and the Department to encourage public participation in the development of energy policy, to secure valid information on energy concerns at the community level, and to support the NEP goals related to renewable energy sources.

ADDITIONAL COSPONSORS

S. 2354

At the request of Mr. NELSON, the Senator from Vermont (Mr. STAFFORD) was added as a cosponsor of S. 2354, the Equal Access to the Courts Act.

S. 2453

At the request of Mr. YOUNG, the Senator from North Dakota (Mr. BURDICK) was added as a cosponsor of S. 2453, a bill to provide that optional State coverage for medically needy individuals may be limited to those individuals under age 18.

S. 2478

At the request of Mr. ROBERT C. BYRD, the Senator from Indiana (Mr. BAYH) was added as a cosponsor of S. 2478, the National Rail Passenger Corporation Authorization Act of 1978.

SENATE JOINT RESOLUTION 99

At the request of Mr. MATSUNAGA, the Senator from Vermont (Mr. LEAHY) was added as a cosponsor of Senate Joint Resolution 99, to require improvement and expansion in the collection, analysis, and publication of data relating to women in the professional, technical, and managerial fields.

SENATE JOINT RESOLUTION 105

At the request of Mr. MATSUNAGA, the Senator from Ohio (Mr. METZENBAUM) was added as a consponsor of Senate Joint Resolution 105, requesting the President to designate the Sunday following Fire Service Recognition Day as a memorial Sunday for firefighters disabled or killed in the line of duty.

AMENDMENTS SUBMITTED FOR PRINTING

NAVIGATION DEVELOPMENT ACT—H.R. 8309

AMENDMENT NO. 1690

(Ordered to be printed and to lie on the table.)

Mr. DOLE submitted an amendment intended to be proposed by him to the bill (H.R. 8309) authorizing certain public works on rivers for navigation, and for other purposes.

Mr. DOLE. Mr. President, farmers all across our Nation are experiencing a severe cost-price freeze. Farm indebtedness in the last 5 years has increased about 63 percent and now stands at almost $119 billion. In terms of current dollars, farm income, on the other hand, has declined from $33 billion in 1973 to around $20 billion for 1977.

The ripple effect of the economic problems facing the American farmer is spreading to the dealers and manufacturers of farm machinery, farm supplies, and to others that serve farmers.

H.R. 8309, a bill which authorizes a new lock and dam 26 at Alton, Ill., on the Mississippi River, is of great importance to the farmers of this Nation. At the same time the bill provides for a fuel tax of 6 cents per gallon on the fuel burned by the barge lines. Make no mistake about it, that increased cost will have to immediately be passed on to the shipper and that means a corresponding reduction in the price paid to the farmer for his grain.

What is being done is a basic change in the U.S. policy—unchanged since the beginning of this Republic—a fee for the use of our navigable waters. The tech-

nique that is being used is to withhold approval of the lock and dam—through which more tonnage moves than the Panama Canal, unless a user fee is approved.

What we are really looking at, for the first time in the history of this Nation, is an export tax on farm products. This legislation merely puts the barge lines in the position of a Federal tax collector on farm products. Also, obviously, there will be an increase in the cost of barging fertilizer and fuel. The cost-price squeeze will increase its pressure on farmers and reduce their net farm income.

This shift in national policy would bring added hardship to our Nation's farmers. The effects would not only lower their net returns for the production from their farms, but would also increase even further the prices that they pay for production inputs.

In view of this, I am today offering an amendment which would preclude this fuel tax from being levied against shipments of any agricultural commodity or product thereof until the price received by farmers for that commodity shall equal or exceed the parity price thereof.

Mr. President, I ask unanimous consent that the amendment as submitted be printed at this point in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

On page 12, line 12, insert the following: "(3) Provided, however, that this fuel tax shall not be levied against shipments of any agricultural commodity or product thereof until the price received by farmers for that commodity shall equal or exceed the parity price thereof.

AMENDMENT NO. 1691

(Ordered to be printed and to lie on the table.)

Mr. DANFORTH (for himself and Mr. EAGLETON) submitted an amendment intended to be proposed to the bill (H.R. 8309), supra.

AMENDMENT NO. 1692

(Ordered to be printed and to lie on the table.)

Mr. WILLIAMS submitted an amendment intended to be proposed to the bill (H.R. 8309), supra.

PANAMA CANAL TREATIES—EXECUTIVE N, 95–2

AMENDMENT NO. 19

(Ordered to be printed and to lie on the table.)

Mr. HATCH, as in executive session, submitted an amendment intended to be proposed by him to the Panama Canal Treaty, executive N, 95–2.

Mr. HATCH. Mr. President, the Panama Canal Treaty contains a number of provisions which provide for substantial payments to the Republic of Panama. Article III, section 5 of the treaty provides that the newly formed Panama Canal Commission shall pay the Republic of Panama $10 million per year to reimburse it for providing certain public services in the canal operating area, such as police and fire protection, garbage collection, and street maintenance. Likewise, article XIII, section 4 of the treaty provides that the Republic of Panama shall receive from the Commission certain additional payments "to be paid out of canal operating revenues." Three separate payments are contemplated under this provision: First, an unspecified annual payment computed at a rate of thirty hundredths of a U.S. dollar ($0.30) per Panama Canal net ton, or its equivalency, for each vessel transiting the Canal for which tolls are charged, such payment to be adjusted upwards to reflect changes in the U.S. wholesale price index; second, a fixed annuity of $10 million; and third, a supplemental annual payment up to $10 million, the exact amount to be determined by the amount of surplus revenues of the Commission. It is estimated that these payments to Panama will total more than $60 million in the first year of operation, excluding the supplemental payment drawn from surplus revenues.

The language of the treaty does not indicate whether these payments to Panama shall be made in accordance with the legislative processes of Congress. Indeed, representatives of the State Department testifying before Congress have emphasized that the canal will be self-supporting under the treaty, and that all payments to Panama will be derived from operating revenues. In other words, the impression we have been given is that legislative appropriations will not be necessary because these payments will be made directly to Panama by the Commission.

Mr. President, this scheme, on its face, is constitutionally and financially defective. In the first place, it violates the Constitution. In the second place, it seems certain that there will not be sufficient revenue to cover all of these payments, in addition to the cost of the operation of the canal, and that Congress will have to make up the difference through appropriations anyway.

Article I, section 9 of the Constitution provides that—

No money shall be drawn from the Treasury but in Consequence of Appropriations made by Law.

Moreover, article I, section 7 provides that all bills for raising revenue shall originate in the House of Representatives. It is a well-established principle of our Constitution that the treatymaking power of the Chief Executive is limited by Congress power over the purse. Simply stated—and even State Department representatives acknowledge this rule—a treaty cannot appropriate funds.

TREATIES AND THE EXPENDITURES OF FUNDS

The Panama Canal Commission, according to article III, section 3 of the treaty, will "carry out its responsibilities" as "a U.S. Government agency," that "shall be constituted by and in conformity with the laws of the United States of America." Thus the treaty contemplates that a U.S. Government agency will be making payments to a foreign government for the remainder of this century without the consent of the House of Representatives and in derogation of the appropriations processes of the House and Senate. This clearly raises an important constitutional issue. The administration's view is that this is a self-executing treaty, meaning that it takes effect as domestic law without further action by Congress. But are these provisions of the treaty providing for payments by a U.S. Government agency self-executing in light of article I, section 9, clause 7 of the Constitution, which gives Congress the exclusive power to make appropriations? The answer, I believe, is that they are not self-executing.

It is not disputed that the President's treatymaking power extends to bilateral agreements by which the United States undertakes to make payments of money. The first treaty made by the United States after the adoption of the Constitution, the Jay Treaty of 1794 with Great Britain, provided for payments of debts owed by American citizens to British creditors. The treaties with France for the acquisition of Louisiana provided for a payment of 60 million francs. Countless other examples could be cited to illustrate the principle that the Chief Executive has the authority to make treaties which obligate the United States to make payments to a foreign government. But I am not aware that any President has ever made a self-executing treaty providing for such payments.

EARLIER PRECEDENTS

Debate over the provisions of the Jay Treaty requiring the expenditure of funds is instructive in this regard. The Members of the House of Representatives did not question the right of the President to enter into such a treaty. Instead, they debated the issue of whether the House was entitled to obtain copies of the instructions given by the President to the negotiators, and whether the Congress was required to appropriate the funds necessary to carry the treaty into effect. President Washington rejected the demand of the House for copies of the instructions, but the House adopted a resolution, vigorously supported by James Madison, which provided that—

When a treaty stipulates regulations on any of the subjects submitted by the Constitution to the power of the Congress, it must depend for its execution, as to such stipulations, on a law or laws to be passed by Congress. And it is the Constitutional right and duty of the House of Representatives, in all such cases, to deliberate on the expediency or inexpediency of carrying such a treaty in effect, and to determine and act thereon, as, in their judgment, may be most conducive to the public good.

Congress subsequently enacted a law making the necessary appropriations. The same principles were recognized and the same procedure was followed regarding subsequent treaties where payments were required.

In the case of Turner against Baptist Missionary Union, a Federal circuit court considered the effect of an 1863 treaty with an Indian tribe, which provided for payment of the net proceeds of the sale of 160 acres of land to the owner of the buildings situated on the land. The court said:

A treaty under the Federal Constitution is declared to be the supreme law of the land. This, unquestionably, applies to all treaties, where the treaty-making power, without the aid of Congress, can carry it into effect. It is not, however, and cannot be the Supreme Law of the Land, where the concurrence of Congress is necessary to give it effect. Un-

til this power is exercised, as where the appropriation of money is required, the treaty is not perfect. It is not operative, in the sense of the Constitution, as money cannot be appropriated by the treaty-making power. This results from the limitations of our government. . . . As well might it be contended that an ordinary act of Congress, without the signature of the President, was a law, as that a treaty which engages to pay money, is in itself a law. . . . It [the treaty-making power] cannot bind or control the legislative action in this respect, and every foreign government may be presumed to know that as far as the treaty stipulates to pay money, the legislative action is required. (Fed. Cas. No. 14251 (1852), 24 Fed. Cas. 345, 346.).

In brief, the precedents, both political and constitutional, are well established that a treaty provision for the payment of money is not self-executing but requires an appropriation by Congress.

PAYMENT PROVISIONS OF THE NEW TREATY

This principle has been confirmed and duly respected in all previous treaties between the United States and the Republic of Panama. The treaty of 1903 provided under article XIV for an initial payment of $10 million and an annual payment of $250 thousand. Article VII of the 1936 treaty increased the amount of the annuity to 430,000 Balboas (B/430,000). A third treaty between the United States and the Republic of Panama in 1955 increased the annuity once again to 1,930,000 Balboas (B/1930,000). In each case, the payments were made under appropriations enacted by Congress; and it was never suggested that any of these treaties was self-executing. The current annual payment, $2,328,000, is shown as one of three permanent appropriations in the Department of State budget for fiscal year 1978.

The present treaty, of course, calls for payments by the Commission and it would thus appear that appropriations will not be necessary because no funds will be drawn from the U.S. Treasury. This understanding of the method of payment, however, ignores a number of important considerations. As I have previously noted, article III of the proposed treaty specifies that the Panama Canal Commission, a U.S. Government agency, "shall be constituted by and in conformity with the laws of the United States." The laws of the United States governing the fiscal management of Government agencies in general are contained in title 31 of the United States Code. Executive departments and noncorporate Federal agencies are subject generally to the provisions of title 31, except the provisions of the Government Corporation Control Act. Wholly owned government corporations are subject to the provisions of the Government Corporation Control Act and to many of the other provisions of title 31 as well.

Turning to title 31, we observe that it clearly delineates the fiscal responsibilities of Government agencies generally and their dependence on appropriations to authorize the expenditure of funds. The Budget and Accounting Act of 1921, which has been incorporated into title 31, defines "department or establishment" to include "any executive department, independent commission, board, bureau, office, agency, or other establishment of the Government," and the term "appropriations" to include funds and authorizations to create obligations by contract in advance of appropriations or "any other authority making funds available for obligation or expenditure." All moneys received from whatever source for the use of the United States are required to be paid into the Treasury (31 U.S.C. 484). Detailed provisions are made for submission of estimates for appropriations for expenditure by Government agencies (31 U.S.C. 581–752Z). Expenditures in excess of appropriations are prohibited, and all appropriations or funds made available for obligation are required to be apportioned to avoid the necessity for deficiency or supplemental appropriations (31 U.S.C. 665).

In light of these requirements, the provision of the new treaty that the payments to Panama are to be made by the Panama Canal Commission is wholly contrary to article I of the Constitution and Federal law, unless it is assumed—and the language of the treaties does not seem to support such an assumption—that such funds must first be appropriated by Congress. Presumably no one would seriously contend that the effect of the constitutional provision limiting to Congress the power to make appropriations can be circumvented by the device of providing in the treaty that a payment without appropriations is to be made by a named Government agency instead of the United States.

With respect to article III of the proposed treaty, then, it is abundantly clear, that the Panama Canal Commission cannot pay the Republic of Panama $10 million per annum in advance of legislative appropriations authorizing such expenditures. This is also true of the additional payments made by the Commission "out of canal operating revenues" under article XIII of the treaty. Why article III provides simply for payments and article XIII provides for payments "out of canal operating revenues" is a distinction that apparently has no significance regarding constitutional and statutory requirements. The "canal operating revenues" referred to in article XIII are presumably the "tolls for the use of the Panama Canal, and other charges" which the United States—not the Panama Canal Commission—is authorized to "establish, modify, collect, and retain" by article III, section 2(c) of the treaty. These revenues, of course, are the same in kind as those that have been derived by the United States from the Panama Canal since it was first opened to commerce and which have been expended under appropriations by Congress since that time.

It may be that the purpose of making the payments "out of canal operating revenues" was to identify such payments as part of the cost of operation, in order to establish rates of tolls. Such a construction necessarily assumes, however, that revenues will be sufficient to cover both the payments to Panama and operating expenses over and above such payments. But this leaves unanswered the obvious question: What if there is a disparity between the amount of revenues and the total of such expenses? Is this deficiency to be absorbed by the U.S. Government by appropriations to cover losses, or by Panama through acceptance of less than the amount of payment stipulated by the treaty? In either case, the provision for payment out of revenues does not appear to affect the constitutional requirement for appropriations to carry these provisions into effect.

Section 4(c) of article XIII, which provides for payment of $10 million "out of canal operating revenues to the extent that such revenues exceed expenditures of the Panama Canal Commission" not only runs headlong into present law requiring the agency operating the canal to pay surplus funds into the Treasury, but also substitutes Panama for the United States as the beneficiary of surplus funds. This would effectively preclude further reduction of the U.S. Government's investment in the canal. Like the provision of article XIII for annual payments based on the aggregate measurement tonnage of ships using the canal during the year, the qualifications introduced by section 4(c) relate solely to the determination of the amount of the payment. Neither provision recognizes nor makes mention of the need for congressional appropriations to authorize payment. To be sure, the payment provisions of the treaty seemingly attempt to provide permanent appropriations for the treaty payments, an objective prohibited by the constitutional rule that only Congress has the power to make appropriations.

In sum, the provisions of the proposed treaty for payment of money cannot become effective as domestic law unless Congress has, in accordance with article I, section 9 of the Constitution, appropriated the necessary funds. Under the treaties with Panama now in effect, which also provide for annual payments to Panama, revenues derived from operation of the canal are treated as public moneys and expenditures of those funds are limited to those authorized by appropriation acts of the Congress.

Neither the language of the treaties nor the testimony of State Department representatives, however, offers us any concrete, specific assurances that all of the payment provisions of the treaty will be implemented by appropriations of Congress. Although administration witnesses appearing before congressional committees have freely acknowledged that a treaty cannot appropriate funds, they have continued to insist that this is a self-executing treaty. Herbert Hansell, legal adviser to the State Department, has stated that there is "no ground" for the concern expressed by House Members that the treaty "could be regarded as a means of circumventing that constitutional provision with respect to the payments to be made to Panama under the treaty." Why? Because, he says:

It is intended that the payments to be made to Panama be financed wholly from projected revenues, so as to avoid any need to resort to general revenues.

Mr. President, in all of the testimony that I have examined in connection with

this treaty, I have nowhere seen a flat assertion by any representative of the State Department or the Department of Justice that this is a non-self-executing treaty that will require congressional appropriations in order to implement the payment provisions of the treaty; and the treaty itself is silent on this subject.

For these reasons, I am submitting an amendment to the treaty which would obviate this difficulty and eliminate all uncertainty and ambiguity about the method of payment to Panama. This amendment provides simply that all revenues of the Panama Canal Commission shall be deposited in the U.S. Treasury, and that all payments to Panama shall be based on legislative appropriations. It is wholly consistent with established constitutional precedents and laws governing Federal agencies.

PROJECTED DEFICIENCIES IN THE CANAL OPERATING COSTS UNDER THE NEW TREATY

Mr. President, it should further be noted, as I have previously indicated, that the future of the Panama Canal under this treaty, insofar as its financial structure is concerned, is rather bleak. In a recent study by Mr. W. M. Whitman, special consultant to the House Committee on Merchant Marine and Fisheries, it is estimated that the cost of operating the canal during the first year of operation under the treaty will exceed revenues by approximately $99 million, not counting additional costs to the U.S. Treasury of $7.7 million. Mr. Whitman's analysis is based on a tabulation provided by the Panama Canal Company, and is adjusted to reflect the same elements of cost as those shown in the 1978 budget. It also includes additional treaty costs that are not part of the Company's tabulation.

This study shows, Mr. President, it is illusory to think that the Panama Canal will be operating on a self-supporting basis, as the representatives of the State Department have insisted. Additional appropriations have to be made to make up the deficit, and cover the hidden costs of this treaty—this is not to mention the added economic burden, after the tolls increase, that the American people will have to bear under this treaty as a result of higher prices for materials, including Alaskan crude oil, that will be transiting the canal.

Whitman concludes:

If financial viability of the canal is equated to operation as a self-sustaining enterprise, the venture appears to be doomed from the first year after the treaty goes into effect. This was the thrust of the testimony of all the witnesses who urged or suggested the necessity for absorption of elements of the cost of operation by the Treasury through elimination of interest and depreciation or abandonment of the concept of recovery of the investment of the Government in the canal. There may be reasons to support adoption of such expedients, but the policy of operating the canal on a self-sustaining basis is not one of them.

Mr. President, I urge all Senators to read this perceptive study with care, and ask unanimous consent that it be printed in the RECORD, together with my amendment, at the conclusion of my remarks.

There being no objection, the statement and amendment were ordered to be printed in the RECORD, as follows:

PANAMA CANAL TREATY PROBLEMS

The written statements and testimony presented by the various witnesses appearing at the hearing of the Panama Canal Subcommittee on November 30 and December 1, 1977, disclosed several clearly identifiable problems of some concern to the Committee and the Congress in the consideration of the Panama Canal treaties and legislation to carry them into effect, assuming they are ratified. Those problems fall into five general categories, namely:

1. The projected deficiency in canal revenues to cover operating costs;
2. The sources of funds to cover the deficiency in canal revenues;
3. The form of the Government agency to be established to operate the canal;
4. Ambiguities in treaty provisions; and
5. Constitutional issues.

1. Canal revenue deficiency.

The negotiators and other proponents of the treaty repeatedly have stressed the proposition that under the treaty the operations of the canal are to be self-supporting and that canal revenues are to be used exclusively for payment of costs of the operation without cost to the U.S. taxpayer.

The treaty provides for annual payments to Panama totalling some $62 million in the first year of operation, exclusive of a contingent payment of an additional $10 million to be paid to the extent canal revenues exceed expenditures. Other provisions of the treaty transferring income-producing property to Panama will reduce the revenues of the Panama Canal by some $130 million, partially offset by a reduction of about $50 million in canal operating costs.

An analysis of Panama Canal revenues and costs in the first year of operation under the treaty in comparison to the estimate provided in the 1978 budget program, which does not include provision for the effect of the treaty, is attached. This analysis is based on a tabulation provided by the Panama Canal Company, adjusted to reflect the same elements of cost as those shown in the 1978 budget and to include additional treaty costs, so far identified, not included in the Company's tabulation.

The analysis shows that in the first year of operation under the treaty, Panama Canal revenues will fail to cover costs of operation of the canal and related treaty costs by about $99 million, exclusive of additional cost to the U.S. Treasury of $7.7 million. The recovery from canal revenues of operating expenses and all other treaty related costs would require an increase in rates of tolls of more than 60 percent. If the additional costs to the Treasury of $7.7 million, referred to above, are excluded from the calculation, the increase in rates of tolls required would be reduced to 56 percent.

Although the calculations of the insufficiency in Panama Canal revenues to cover expenses summarized above relate to the first year of operation, there is no basis for optimism that the financial results of operation will improve with the passage of time. No detailed analysis of costs and expenses for future years similar to that provided for the first year of operation under the treaty is presently available, but the conclusion to be drawn from the data so far available is that costs will rise at a rate higher than any foreseeable increase in revenues over the period of operation of the canal by the United States under the treaty.

If financial viability of the canal is equated to operation as a self-sustaining enterprise, the venture appears to be doomed from the first year after the treaty goes into effect. This was the thrust of the testimony of all the witnesses who urged or suggested the necessity for absorption of elements of the cost of operation by the Treasury through elimination of interest and depreciation or abandonment of the concept of recovery of the investment of the Government in the canal. There may be reasons to support adoption of such expedients, but the policy of operating the canal on a self-sustaining basis is not one of them.

2. Sources of funds to cover expenses of operation.

The ability of the canal to generate additional revenues required to cover canal operating expenses under the treaty lies in (1) possible increases in traffic, and (2) increases in rates of tolls.

a. Traffic increases. The factor cited most frequently as a partial solution to the financial problems of the Panama Canal under the treaty, is the anticipated increase in canal revenues from shipment through the canal of North Slope crude oil enroute from Alaska to the East Coast of the United States. The increase in Panama Canal revenue from this source has been estimated as high as $30 million a year, but for 1978 the estimate by the Panama Canal Company is $4 million. On the basis of the latter estimate, the deficiency of revenue in relation to costs would be reduced to $95 million or $103 million depending on whether the additional costs to the Treasury, noted above, are considered.

There is general agreement that the increase in revenues resulting from the movement of North Slope oil through the canal will be temporary because of the probability of use of less expensive alternatives such as pipelines. In the near time, the movement of this commodity through the canal will unquestionably improve the financial results of operation of the canal for two or three years, but it will neither eliminate the revenue deficiency in those years nor affect the long-term outlook.

The only other suggestion that canal revenues may increase to offset costs increases, even in part, is based on a presumption that historical growth of the canal will continue at the same rate or at a modified rate in the future. This logic has been rejected by most economists who insist that analysis of future individual commodity movements on established trade routes is the only sound basis for projections of future canal traffic.

b. Tolls increases. As previously indicated, on the basis of the Panama Canal revenue figure projected in the 1978 budget, the increased operating costs resulting from the treaty would require a toll increase of from 56 percent to 60 percent to put the canal on a self-sustaining basis.

Assuming an increase in revenue of $4 million from the movement through the canal of North Slope oil in the first year of operation under the treaty, the tolls increase would be reduced to the range of 52 percent to 57 percent.

Representatives of the shipping industry have indicated that increases in rates of tolls in the amount necessary to make the Panama Canal completely self-sustaining under the treaty are unrealistic and will price the canal out of the market because of the availability of less expensive alternatives.

Apparently, during the negotiation of the treaty there was no attempt at a systematic analysis of the potential canal revenues available for funding the cost of the various provisions eventually agreed to. The draft environmental impact statement, published by the Department of State in August 1977 (42 F.R. 43466) suggested that the assessment of the economic impact of the treaty was then impossible because of lack of data as to the costs of operation of the Panama Canal after the treaty became effective. The final EIS dated December 1977, states that "An initial toll increase in the neighborhood of 30 percent will be necessary to cover the operating costs . . . of the Canal during the

new Treaty period. The exact level of toll increases will depend on such factors as:

The structure of the canal operation under the new Treaty, especially its operating cost requirements, and

The short-term impact on Canal traffic of Alaskan oil shipments." (pages 33, 34)

c. Appropriations or absorption of costs by U.S. If tolls revenues cannot be increased in an amount sufficient to make the canal self-supporting, it appears to be obvious that the deficiency in revenues will have to be made up from the U.S. Treasury, either through absorption of part of the costs or by direct appropriations.

While the proponents of the treaty have consistently adhered to the position that one of the objectives of the treaty is that the canal continue to be self-supporting, they have also simultaneously proposed that substantial costs of operation of the canal be absorbed by the U.S. Treasury through discontinuance of payment of interest on the investment of the United States in the canal, writing off the investment entirely, and treatment of various costs arising from the treaty as obligations of the Treasury rather than of the Panama Canal. Representatives of the shipping industry and others go further and also propose elimination of depreciation as a cost of operation recoverable from tolls, and payment of interest by the United States on Government funds derived from operation of the canal and deposited in the Treasury.

Interest on U.S. investment. At the Panama Canal Subcommittee hearings on November 30, 1977, the testimony of Administration witnesses indicated general unfamiliarity with the history and purpose of payment from canal revenues of interest on the investment of the United States Government in the canal. Interest was described by those witnesses as "profit" and it was suggested that elimination of the interest payment is necessary to keep the Panama Canal Commission "self-sustaining." The Deputy Assistant Secretary of the Treasury described the background of the requirement of interest payments as follows:

"One reason that payment was required in 1951 when the Canal Company was established as a self-sustaining business enterprise was to avoid allowing the users to have a subsidized toll or exclusively subsidized toll by requiring that the cost of capital be included in the toll base. That requirement will no longer be necessary because under the new arrangements, the toll will increase in order to meet the costs and requirements under the new treaty arrangements.

"Tolls will approach a more economic level and a need for interest payment as a device in effect to avoid subsidy will no longer be necessary."

The requirement that the Panama Canal Company pay interest to the Treasury on the net direct investment of the U.S. Government in the Company is found in section 62 of title 2 of the Canal Zone Code. (76A Stat. 8). This provision was originally enacted in 1948 in the legislation incorporating the Panama Railroad Company (62 Stat. 1076) pursuant to the Government Corporation Control Act (31 U.S.C. 841 et seq.), and of course applied to that corporation which had been operated as an adjunct of the Panama Canal since the time of construction of the canal. See State ex rel Rogers. v. Graves, 299 U.S. 401 (1937).

In 1950, when responsibility for the operation of the Panama Canal was transferred to the Panama Railroad Company, which was renamed the Panama Canal Company, the requirement for payment of interest on the Government's investment in the corporation was continued. (Act. Sept. 26, 1950 (64 Stat. 1041)). The 1950 legislation was based on recommendations of the then Bureau of the Budget, approved and forwarded to the Congress by President Truman. In reference to the requirement that the corporation pay interest to the Treasury, the report of the Bureau of the Budget stated:

"The principle that Federal business enterprises should pay a rate of return on the Government's investment equal to the cost of the money to the Treasury is now well settled. The President recommended in his 1948 budget message that corporations should be required to reimburse the Treasury for the full cost of money advanced to the corporation. There is no reason why the Panama Canal and its adjuncts should be exempted from payment of interest since they are essentially Federal business enterprises." H. Doc. 460, 81st Cong., 2d Sess., p. 8.

At the Panama Canal Subcommittee hearing on December 1, 1977, Leonard Kujawa, a partner in Arthur Andersen & Co., testifying as an export on Panama Canal finances, confirmed that interest, as the cost of capital invested in a business, is part of the cost of operation of that business. As such, if a business operation such as the Panama Canal is to be self-sustaining, the revenues derived from the operation must be sufficient to cover interest payments on invested capital.

Conversely, as pointed out in the testimony of Comptroller General Staats, if annual interest payments are not made into the Treasury, the cash position of the Panama Canal Commission would be improved "but it would also reduce Treasury receipts and impact on the overall U.S. budget."

The amount of the interest payment to the Treasury in fiscal year 1978, shown in the 1978 budget program, is $19.7 million.

Depreciation. The statutory formula for establishing rates of tolls for use of the canal now includes depreciation as one of the elements of costs to be recovered from tolls.

The discontinuance of depreciation on part of the assets of the canal was another expedient suggested at the hearings for reducing the upward pressure on rates of tolls brought about by the treaty. On the other hand, the Comptroller General pointed out that the property transfers provided by the treaty would necessitate increased depreciation to make possible recovery of the U.S. investment in the canal over the life of the treaty and that "For the proposed Commission to be financially self-sufficient, toll rates would have to be raised to cover these increases in depreciation costs." The Comptroller General also noted that these actions "may not be economically sound, because of the impact on toll rates and possible adverse effect on traffic and revenues." In other words, under the treaty it may no longer be possible for the Panama Canal to be self-sustaining.

The property of the United States in the Canal Zone, to be transferred to Panama under the terms of the treaty, was acquired at an original cost of about $1 billion. The book value of the property associated with the Panama Canal, exclusive of military property, is currently $752 million.

Other treaty costs. Costs to the U.S. Treasury resulting from the treaty that are not directly and immediately associated with operation of the canal probably could not be included in the tolls formula for payment out of revenues of the canal. These costs have not been completely identified but they appear to include appropriations required to fund part of the economic assistance program under the separate agreement accompanying the treaty, the cost of the joint study for the need for and feasibility of a sea level canal for which the treaty provides, the loss to the Treasury of the payment now being made in reimbursement of capital appropriations to the Canal Zone Government, and possibly the cost to the Civil Service Commission and military departments of employee assistance programs contemplated by the treaty.

3. Form of Government agency to be established to operate the Panama Canal.

Legislation to be enacted by the Congress must establish the Government agency to operate the canal and provide the ground rules for its operation.

Article III of the Panama Canal treaty provides that the United States will carry out its responsibilities by means of a U.S. Government agency called the Panama Canal Commission "which shall be constituted by and in conformity with the laws of the United States of America." The treaty also provides that the Panama Canal Commission "shall be supervised" by a Board composed of nine members, five of whom are to be U.S. nationals and four nationals of Panama.

From the time of completion of the canal in 1914 until 1951, the canal was operated by an independent agency called *The Panama Canal*. The Panama Canal was established and functioned in accordance with the laws of the United States generally applicable to all Government agencies, including the various laws governing the financial management of such agencies now largely incorporated in title 31 of the U.S. Code. Under those laws revenues derived from operation of the canal were paid into the Treasury, and costs of operations were paid from direct appropriations for that purpose.

In 1950, Congress transferred responsibility for operation of the canal to the Panama Railroad Company, a government agency in corporate form that had been used by the United States Government as an adjunct to the operation of the canal from the time of construction of the canal.

The corporation was renamed the Panama Canal Company and its operations were subject to the provisions of the Government Corporation Control Act as well as other applicable provisions of title 31 of the U.S. Code. Revenues from the operation of the canal and related activities are deposited in the Treasury or depository banks approved by the Secretary of the Treasury, and expenditures are authorized by the Congress in appropriation acts authorizing the use of such revenues for the purposes set out in the corporation's budget program, as modified by the Congress in the appropriation act.

The 1950 legislation transferring operation of the canal to the Panama Canal Company changed the name of the agency known as The Panama Canal to Canal Zone Government with the responsibility of providing the various services incident to the civil government of the Canal Zone. No basic change was made in the form of organization of that agency. A brief summary of the history and laws applicable to the operation of the two agencies now responsible for operation of the canal and the government of the Canal Zone is included in the separate study of the relationship of the treaty provisions to the Constitutional power of Congress to make appropriations.

In establishing the government agency for operation of the canal under the new treaty, the Congress could select either the corporate form along the lines of the Panama Canal Company, the non-corporate form, following the prototype of the original Panama Canal agency, or some combination of the two. Some of the advantageous features of the corporate form, such as business-type budgeting and audit by the General Accounting Office, have been referred to by the Comptroller General. On the other hand, the corporate form is particularly useful for business operations that are truly self-sustaining, and if a substantial amount of direct or indirect subsidy is involved, the conventional unincorporated government agency offers the advantages of closer control by the Congress. Of course, if the unincorporated form of agency is selected, the

legislation could incorporate provision for business-type budgets and audit by the General Accounting Office.

A related matter of concern is that of providing for the qualifications and method of appointment of members of the Board to be appointed to surpervise the Panama Canal Commission. This feature of the legislation will be especially important in view of the provisions of the treaty for division of the membership between nationals of the United States and Panama.

4. Ambiguity of treaty provisions.

a. General considerations. Ambiguities in the language of the two treaties pose serious problems of interpretation that are virtually certain to become the subject of future controversy. Although the U.S. treaty negotiators have offered their explanations of the ambiguous language, those interpretations have often been at direct variance with those published by the Panamanian negotiators. In considering the significance of these diverse interpretations, the United States Government should keep in mind the enumeration of the causes of conflict between the United States and Panama, published by the Government of Panama on the occasion of the rejection by Panama of the new treaties negotiated in 1967. The concluding paragraph of Part I of the document read as follows:

"7. Last, so as not to make the list of causes of conflict interminable, we mention the greatest cause, the constant cause, the cause that has daily contributed to keep alive the resentment of Panamanians and feeds a sentiment of rebellion against the offensive presence in part of the national territory of a foreign Government which acts in an arbitrary, totalitarian and absolute manner, contemptuous toward the presence of the territorial sovereign. We refer to the invariable conduct of the Government of the United States of America of interpreting the clauses of the existing treaties in the manner most convenient to their interests and contrary to Panama's rights and imposing their arbitrary and unfair interpretations with the power in their hands, and that Panama has not been able to counteract to date, of excluding and throwing out of the Canal Zone the official presence of Panama and the enforcement of our laws." Reprinted in *Report on the Problems Concerning the Panama Canal*, Committee on Merchant Marine & Fisheries, 91st Cong., 2d Sess., p. 87.

As the quoted statement implies, the diplomatic relations of the United States and Panama have been characterized by almost continuous controversy over the construction of the language of treaties and agreements that the United States usually has regarded as plain and unambiguous. To cite only one example, Article V of the 1942 Agreement for the Lease of Defense Sites in the Republic of Panama (57 Stat. 1232) provided that the defense sites would be vacated "within one year after the date on which the definitive treaty of peace which brings about the cessation of the present war, shall have entered into effect." In 1947, Panama asserted that the surrender of Japan constituted a "definitive treaty of peace" ending the war. The United States did not accept that interpretation, but eventually yielded to pressure and vacated the sites before the peace treaty was signed. The history of this particular disagreement is set out at length in the Department of State's publication *Foreign Relations of the United States* for the years 1946 (pp. 1095, et seq.) and 1947 (pp. 881, et seq.).

b. *Payments to Panama.* Paragraph 4(a) of Article XIII of the treaty provides for payment to Panama of an annual amount of 30 cents "per Panama Canal net ton, *or its equivalent*, for each vessel transiting the Canal for which tolls are charged." (Emphasis supplied.) A Panama Canal net ton is clearly defined in existing laws and regulations as the basis for establishing rates of tolls for use of the canal. However, not all vessels are susceptible of measurement in Panama Canal net tons; some ships and other craft, such as warships, floating drydocks, etc., pay tolls on a displacement basis. Whether or not he phrase "or its equivalent" relates to the payment to Panama for ships that pay tolls on displacement rather than "Panama Canal" tonnage is not clear from the treaty provisions. If that is the intent of the provision, there is no criterion provided for determining what is the equivalent of a Panama Canal net ton in computing the payment to Panama. This could obviously become a matter of controversy and should be clarified before the treaty is ratified.

Paragraph 4(c) of Article XIII provides for a payment to Panama, in addition to other payments, of $10 million per year "to be paid out of canal operating revenues to the extent that such revenues exceed expenditures of the Panama Canal Commission including amounts paid pursuant to the treaty."

This provision apparently contemplates determination of whether or not the payment is due on a cash basis. If so, and if "expenditures" are limited to payments actually made, excluding unpaid obligations, it could create a serious problem for the financial administration of the canal. The theory of the treaty provisions seems to have derived from the statutory provision that now requires the Panama Canal Company to pay into the Treasury annually the amount of funds in excess of the Company's requirements for working capital and for authorized plant replacement and expansion. (2 C.Z. Code 70). However, there are obvious differences between the language of the two provisions, and it is questionable whether the treaty provision would permit retention by the Panama Canal Commission of funds for working capital or plant replacement and expansion.

The precise meaning of this paragraph of the treaty would become a matter of considerable importance to the financial management of the canal under the new treaty, and its meaning should be clarified before legislation is enacted to carry it into effect.

A third ambiguity appears in paragraph 5 of Article III of the treaty which, after providing for payment to Panama of $10 million in reimbursement for certain services, goes on to provide that at three year intervals "the costs involved in furnishing said services shall be reexamined to determine whether an adjustment of the annual payment should be made because of inflation *and other relevant factors affecting the cost of such services*." (Emphasis supplied.) There is nothing in the treaty or other documents accompanying the treaty that defines what other relevant factors are for consideration in the adjustment of the amount of this payment. It was suggested at the hearing that the actual cost of services provided might be one such factor, but it would appear to be desirable to reach a firm understanding, with appropriate documentation, defining the meaning of the phrase in question.

Implicit in all the provisions for payments to Panama is an ambiguity arising from the absence of any language referring to the indebtedness of the Government of Panama to the Panama Canal Company and Canal Zone Government, now aggregating some $8.5 million. In normal business transactions provision would be made either for set-off of this amount against the payments to Panama or for outright cancellation of the debt. Whichever result is intended, it should be clearly understood by both parties and incorporated in the legislation to carry the treaty into effect.

c. Property transfers. Paragraph I of Article XIII of the treaty provides that on termination of the treaty, Panama will assume total responsibility for operation of the Panama Canal which shall be turned over in operating condition and "free of liens and debts, except as the two parties may otherwise agree."

At the end of any year of operation of the canal as a continuing business enterprise, there remain and are carried forward obligations incurred in completed periods of operation, such as unpaid employee compensation, liability for unused leave, and other accounts payable, which aggregated $80 million in 1976, and are estimated at $87 million in 1978.

Whether or not the quoted provision of Article XIII requires the liquidation of these liabilities before the canal is turned over to Panama is not clear, but the ambiguity should be resolved to permit orderly financial planning and management in the period intervening between the effective date and termination of the treaty.

d. Use of the canal by U.S. Government vessels. Paragraph I of Article VI of the neutrality treaty provides that vessels of war and auxiliary vessels of the United States and of Panama "will be entitled to transit the Canal expeditiously." At the hearings on the treaties this provision has been referred to as providing that warships of the United States are entitled to priority in transit in case of emergency, but other statements in Panama by the treaty negotiators have indicated that no priority of passage is involved.

The statement issued by the White House after the meeting between President Carter and General Torrijos on October 14, 1977, discussed below, confirms that the provision in question "is intended, and shall be interpreted to assure the transit of such vessels through the canal as quickly as possible, without any impediment, with expedited treatment, and in case of need or emergency, to go to the head of the line of vessels in order to transit the canal rapidly."

e. Defense of the canal. Article IV of the Panama Canal treaty provides that "Each party shall act, in accordance with its constitutional processes, to meet the danger resulting from an armed attack, or other action which threatens the security of the Panama Canal or of ships transiting it." Article V provides specifically against intervention in the internal affairs of Panama by U.S. nationals employed by the Commission. Article II of the Treaty Concerning the Permanent Neutrality and Operation of the Panama Canal provides that Panama declares the "neutrality" of the canal in order that it shall remain open to peaceful transit of vessels of all nations on terms of entire equality, and Article IV provides that the United States and Panama agree to maintain the "regime of neutrality" established by the treaty "in order that the canal shall remain permanently neutral."

In the light of all these provisions the question has been raised as to whether the United States would be authorized to take appropriate action to keep the canal open if the threat to the operation of the canal originates in Panama. The statement issued by the White House after the meeting between President Carter and General Torrijos on October 14, 1977, states that under the neutrality treaty Panama and the United States have the responsibility to assure that the Panama Canal shall be open and secure to ships of all nations and that each country "shall, in accordance with its constitutional processes, defend the canal against any threat to the regime of neutrality, and consequently shall have the right to act against any aggression or threat directed against the canal

or against the peaceful transit of vessels through the canal." The statement goes on to say, however, that this does not mean nor shall it be interpreted as a right of intervention of the United States in the internal affairs of Panama. Any U.S. action will be directed at insuring that the canal "will remain open, secure, and accessible, and it shall never be directed against the territorial integrity or political independence of Panama." Administration witnesses at the subcommittee hearing expressed the view that the treaty gives the United States the right to take whatever steps the United States deems necessary to maintain the neutrality of the canal, no matter what the threat may be.

f. Joint statement of October 1977. The statements issued by President Carter on October 14, and General Torrijos on October 18, for the purpose of elminating the ambiguities in the neutrality treaty are intrinsically ambiguous in themselves.

Apparently the statements were entirely informal. On his return to Panama following his meeting with President Carter, the press reported that General Torrijos emphasized that he had not signed anything on his visit to Washington. Granting that the statement represents the personal interpretation of the treaty provisions discussed on the part of President Carter and General Torrijos, the effect of the informal unsigned statements as amplifications of the language of the treaty is at least open to question.

5. Constitutional issues.

In addition to the financial problems in operation of the Panama Canal under the new treaties, the treaty language poses two fundamental constitutional problems that are of even greater significance to the United States Government, namely, the requirement for action by the Congress to dispose of property of the United States and to make appropriations of public funds. The treaty language purports to convey property of the United States to Panama and to provide for payments to Panama without action by the Congress as the Constitution requires. These issues are addressed at length in a memorandum on the necessity for appropriations to authorize the payments to Panama presented at the subcommittee hearings on December 1, 1977, and in extensive hearings and briefings conducted by the Committee on Merchant Marine and Fisheries in the first session of the 95th Congress. A further hearing by the Committee on the constitutional issues is scheduled in January, 1978.

W. M. WHITMAN.

Attachment.

Panama Canal Costs: First Year Operation under 1977 Treaty compared to 1978 Budget

[In thousands of dollars]

	Budget 1978	First year Treaty costs
Operating Costs, the Panama Canal:		
Revenues:		
Tolls:		
Commercial vessels	176,083	176,083
Government tolls credits	1,554	1,554
Total tolls revenues	177,637	177,637
Revenues other than tolls:		
Navigation service and control	29,962	26,247
General repair, storehouse, engineering and maintenance service	6,062	3,155
Marine terminals	24,151	1,645
Transportation and utilities	23,950	26,521
Retail and and housing	47,169	5,866
Government activities	63,132	115
Other	2,351	3,068
Total revenues other than tolls	196,777	66,617
Total revenues	374,414	244,254
Costs:		
Maintenance of channels and harbors	22,563	22,603
Navigation service and control	40,732	38,316
Locks	24,759	24,759
General repair, storehouse, engineering and maintenance services	8,966	9,108
Marine terminals	19,801	1,659
Transportation and utilities	22,137	25,353
Retail and housing	51,504	6,303
Other	44,367	41,383
General and administrative	26,231	25,662
Governmental activities	85,968	22,097
Repayment of prior year's interest costs	5,273	5,273
Interest	19,706	19,706
Fixed annuity to Panama	519	10,000
Annuity based on PC net tonnage	----------	42,471
Public service payments to Panama	----------	10,000
Severance pay	----------	6,093
Repatriation	----------	1,350
Plant relocation	----------	2,236
Early retirement of employees	----------	8,400
Training programs	----------	320
Elimination of tax factor in employee pay	----------	463
Rotation of employees	----------	509
Total operating costs	372,526	323,555
Net operating revenue (loss)	1,888	(79,301)
Capital costs, the Panama Canal	22,000	19,992
Total operating revenue (loss) and capital cost	(20,631)	(99,293)
Additional costs to Treasury:		
Depreciation on Canal Zone Government assets	----------	2,681
Military assistance loans to Panama	----------	5,000
Total additional costs to Treasury	----------	7,681
First Year costs of treaty in excess of Panama Canal revenues:		
Panama Canal Commission	----------	99,293
Treasury	----------	7,681
Total	----------	106,974

AMENDMENT NO. 19

In paragraph 3 of article III, at the end of the text immediately above subparagraph (a), add the following: "The operating revenues of the Panama Canal Commission shall be deposited in the Treasury of the United States of America.".

In the first sentence of paragraph 5 of article III, strike out "Panama Canal Commission shall reimburse" and insert in lieu thereof "United States of America shall reimburse, only after the amount of such reimbursement has been appropriated,".

In the text of paragraph 4 of article XIII immediately above subparagraph (a), strike out "Panama Canal Commission" and insert in lieu thereof "United States of America, only after such amount has been appropriated,".

In paragraph 4(a) of article XIII, strike out "Canal operating revenues" and insert in lieu thereof "the Treasury of the United States of America".

In paragraph 4(b) of article XIII, strike out "Canal operating revenues" and insert in lieu thereof "the Treasury of the United States of America".

In paragraph 4(b) of article XIII, strike out the last sentence.

In paragraph 4(c) of article XIII, strike out "Canal operating revenues to the extent that such revenues" and insert in lieu thereof "the Treasury of the United States of America, if its receipts from the Panama Canal Commission".

In the last sentence of paragraph 4(c) of article XIII, strike out "Canal operating revenues" and insert in lieu thereof "such receipts".

NOTICES OF HEARINGS

SUBCOMMITTEE ON IMMIGRATION

Mr. EASTLAND. Mr. President, I wish to announce that the Subcommittee on Immigration will conduct hearings on S. 2252, the administration's proposal concerning amnesty for undocumented aliens.

The hearings will be held on March 14, 16, 21, and 23 commencing at 10:30 a.m. in room 2228 Dirksen Senate Office Building.

SELECT COMMITTEE ON SMALL BUSINESS

Mr. NELSON. Mr. President, I wish to announce that the Select Small Business Committee will hold a hearing on February 7, 1978, on the procurement assistance program of the Small Business Administration. The purpose of this hearing will be to aid the committee's evaluation of the effectiveness of these programs in helping small businesses to obtain opportunities to bid on government contracts. The hearing will be chaired by Senator HATHAWAY and will begin at 10 a.m. in room 1318 of the Dirksen Senate Office Building. Witnesses will be representatives of the Small Business Administration. Further information on the hearing is available from the Small Business Committee office at 424 Russell Senate Office Building at extension 4–5175.

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. TALMADGE. Mr. President, at its organization meeting on Wednesday, the

Senate Committee on Agriculture, Nutrition, and Forestry, which I have the honor to chair, scheduled as its first priority of business of the session a series of hearings on the critical financial condition of American agriculture.

Working within a tight and urgent time frame, our committee will seek to determine through these hearings the extent of the farm crisis and consider various proposals and approaches for coming to grips with the problem.

Make no mistake about it. The problem is real and it is urgent. Many farmers throughout this Nation are literally being driven into bankruptcy. There is a limit to how much longer they can continue to produce the food and fiber which this Nation and much of the world must have while going broke.

We must find ways and means—and find them quickly—to bolster farm prices and farm income, and bring production into balance with need. Unless we do so, the economic disaster that farmers face will soon spread throughout the entire economy of the Nation.

The committee will begin the hearings at 9 a.m., February 23, 1978, with representatives of the American Agriculture Movement, the organization that has played a major part in bringing the farmers' plight to the attention of the public, the Congress and the administration. We want to provide the leaders of this movement full opportunity to spell out in detail their plan for providing 100 percent of parity for prices of all agriculture commodities and products. We will be prepared to devote the full first day of hearings, if necessary, to representatives of the American Agriculture Movement to discuss their plan.

Hearings will resume on Monday, February 28, and will continue until we have heard from other general farm organizations; specific commodity groups; livestock, poultry, and dairy organizations; fruit and vegetable groups; economic research and forecast authorities; Federal budgetary agencies; and consumer groups.

I recognize this is a full agenda. But we will move as expeditiously as possible. It is my hope that the hearings can be completed within 10 days.

Because of the large number of witnesses we expect to hear, oral testimony will be limited to 10 minutes, but written statements may be of any length and will be included in full in the hearing record. Anyone wishing to testify should contact Denise Love, hearing clerk, U.S. Senate Committee on Agriculture, Nutrition, and Forestry, 322 Russell Senate Office Building, Washington, D.C. 20510, telephone 202/224–2035.

Mr. President, I ask unanimous consent to insert in the RECORD as part of my remarks a news release of the Committee on Agriculture, Nutrition, and Forestry announcing the hearings and other action taken by the committee at its meeting on Wednesday.

There being no objection, the release was ordered to be printed in the RECORD, as follows:

SENATE AGRICULTURE COMMITTEE SETS FARM HEARINGS; PRODS ADMINISTRATION TO IMPLEMENT EMERGENCY PLAN

WASHINGTON, February 1.—Chairman Herman E. Talmadge of the Senate Agriculture Committee today announced a full-scale inquiry into current farm problems with spokesmen for the American Agriculture Movement scheduled as lead-off witnesses on February 23.

Talmadge said the hearings will afford representatives of the Agriculture Movement an opportunity to spell out details of their key proposal of 100 percent of parity for all farm products.

He said the Committee will hear also from representatives of existing farmer organizations, livestock and other commodity groups, government and consumers on the impact of 100 percent of parity and other aspects of the farm problem.

The far-ranging hearings proposed by Talmadge were approved by the Senate Committee at its first regular meeting of the new session of Congress.

In a related action, the Committee approved a resolution sponsored by Talmadge expressing "the sense of the Senate that emergency action be taken by the President and the Secretary of Agriculture to bolster the farm economy."

The resolution calls on the Carter Administration to use authority it has under the new farm law to implement a voluntary land diversion program to pay farmers to take cropland out of production and to raise price support loan levels on wheat, feed grains, soybeans and non-quota peanuts.

The emergency action called for in the Committee resolution was proposed by Talmadge last week to Secretary of Agriculture Bob Bergland. Bergland said in an appearance before the Senate Committee that the Talmadge proposals would be considered, but gave little hope at that time that they would be implemented.

The resolution is an effort to bring Committee and possibly full Senate influence on the Administration to implement the Talmadge proposals.

During Committee discussion of the resolution, Senators Bob Dole of Kansas, ranking Republican member, and Walter D. Huddleston of Kentucky indicated they would push for legislation to increase target prices if the Administration does not act promptly under authority contained in the new farm law.

In proposing hearings on agriculture problems, Talmadge noted that many protesting farmers contend that the Food and Agriculture Act of 1977 is inadequate to meet "their urgent financial problems."

"As Chairman of this Committee, I believe we have an obligation to consider carefully the complaints lodged against the new farm law and to consider the various proposals that have been advanced to change it or to move in other directions," Talmadge said.

"I believe we should properly begin by hearing from representatives of the American Agriculture Movement, the catalyst group largely responsible for bringing the plight of the farmer to the attention of the nation," Talmadge said.

"As a broad objective, 100 percent of parity is something we all understand," Talmadge continued. "But what we need to know—and what I will ask the representatives of the Movement to present to this Committee—are the specific details of their proposal.

"We need to know what legislation and what administrative mechanisms will be required to achieve 100 percent of parity," Talmadge added.

Following the American Agriculture Movement witnesses, Talmadge said the Committee will hear from representatives of existing farm organizations, livestock and poultry groups, dairymen and consumers.

"It will be neecssary to look at the impact of 100 percent of parity on all agriculture commodities, on consumer prices, on exports, and on the total national economy," Talmade said. "The Committee also will consider the cost aspects involved. We will be looking at this question as seen by the Congressional Budget Office, USDA, and established academic and private economic analysts."

Talmadge said the hearings scheduled and witnesses to follow the American Agriculture Movement would be announced by the Committee within the next several days. He indicated that the hearings may be lengthy.

NOMINATION HEARING

Mr. WILLIAMS. Mr. President, I wish to announce that the Committee on Human Resources has scheduled a hearing on Tuesday, February 7, 1978, at 9 a.m. in room 4232, Dirksen Senate Office Building, on the nominations of:

Robert Clyde Benedict, of Pennsylvania, to be Commissioner on Aging;

Cecelia Denogean Esquer, of Arizona; Steven L. Ebgelberg, of Maryland; Hillary Diane Rodham, of Arkansas; Richard Allan Trudell, of California; and Josephine Marie Worthy, of Massachusetts, to be Members of the Board of Directors of the Legal Services Corporation for terms expiring July 13, 1980;

Robert B. Lagather, of Virginia, to be Assistant Secretary of Labor for Mine Safety and Health;

William P. Adams, of Virginia, to be a Member of the Railroad Retirement Board for the term of 5 years from August 29, 1977;

Howard Howe II, of New York, and Frederick Henry Schultz, of Florida, to be Members of the National Council on Educational Research for terms expiring September 30, 1980;

John W. Snyder, of the District of Columbia, to be a Member of the Board of Trustees of the Harry S. Truman Scholarship Foundation for a term expiring December 14, 1983.

INTERSTATE TAXATION ACT—S. 2173

Mr. MATHIAS. Mr. President, I wish to announce that public hearings will be held by the Committee on the Judiciary on S. 2173, the interstate taxation bill of 1977. This legislation provides for Federal judicial review of the application of jurisdictional guidelines for State taxation of interstate commerce and for apportionment among the States of income received from interstate commerce. The hearings will be held on February 13–14, 1978, in room 333 of the L. Mendel Rivers Federal Office Building in Charleston, S.C.

Those who wish to testify or submit a statement for inclusion in the record should communicate as soon as possible with the committee office. 2226 Dirksen Senate Office Building, telephone (202) 224–5225.

SUBCOMMITTEE ON EDUCATION, ARTS, AND HUMANITIES

Mr. PELL. Mr. President, I wish to announce that the Subcommittee on Education, Arts, and Humanities of the

Committee on Human Resources will hold a hearing on February 8, 1978, at 10:30 a.m., in room 318, Russell Senate Office Building. The purpose of the hearing is to receive testimony concerning S. 2473, the College Opportunity Act of 1978.

Any person requesting information concerning this hearing should contact Mrs. Jean Frohlicher, counsel, Subcommittee on Education, Arts, and Humanities, at 224–7666.

ADDITIONAL STATEMENTS

TRIBUTE TO SENATOR HOWARD CANNON FOR HIS SERVICE

Mr. ROBERT C. BYRD. Mr. President, the first month of the new year marked the close of the distinguished leadership of a highly respected colleague and warm, personal friend here in this body as the chairman of an important standing committee of the Senate and his ascendancy to the leadership of a prestigious committee where the challenges for his innovative progress in this rapidly changing world will again be put to the test.

I refer to the distinguished senior Senator from Nevada, the Honorable HOWARD CANNON, and his movement from the chairmanship of the Committee on Rules and Administration to the chairmanship of the Committee on Commerce, Science and Transportation.

Nineteen years ago last January 3, both of us walked down the middle aisle of this Chamber to take the oath for the first time as Members of this body. Over those years the Senate, this Nation, and this world have seen tremendous change and the senior Senator from Nevada has had a participation in some of these changes.

Five years ago and after 14 years service as a member of the Committee on Rules and Administration, Senator CANNON assumed its chairmanship. The 93d and 94th Congresses and the 1st session of the 95th Congress saw that committee probably handle more major legislative responsibilities than at any time in the Senate's history.

In 1973 and 1974, that committee, under Senator CANNON's chairmanship, met its jurisdictional responsibilities by responding to the 25th amendment to the Constitution by conducting hearings and recommending within the span of a single year the confirmation of two Vice Presidents of the United States—one ascending to the Presidency. The first was that of Representative Gerald R. Ford who became Vice President and then President, and the second that of Gov. Nelson A. Rockefeller who became Vice President.

The leadership qualities of the distinguished Senator from Nevada were demonstrated again when his committee moved into broadened jurisdictional responsibilities by seeing enacted into law its recommendations contained in the landmark elections' monitoring statute, the Federal Election Campaign Act Amendments of 1974 and the 1976 amendments thereto necessitated by the U.S. Supreme Court decision in the historic case of Buckley against Valeo. These two enactments probably represented the most comprehensive election-reform legislation in this country's history.

Its jurisdiction over the Federal elections area was further highlighted by that committee holding protracted hearings in 1973 in the closest U.S. Senate race in history, a two-vote margin, involving Senator Louis Wyman and the present distinguished junior Senator from New Hampshire (Mr. DURKIN), with the voters of that State finally settling the matter at the polls of that State.

Additionally, that committee cleared an Overseas Citizens Voting Rights Act of 1975 and currently pending legislation establishing a universal voter registration program and another for the public financing of primary and general elections for the Senate.

Additionally, it was the Committee on Rules and Administration in 1974 that provided the forum for revising important provisions of the Congressional Budget and Impoundment Control Act of 1974 that led to the final enactment of a new congressional budget process that should assist in accomplishing, first, a reversal of the accelerating erosion of the congressional power over the Federal Government's "purse strings"; second, a reassertion of the correct role of the Congress in the American plan of government; and, third, more responsible and businesslike guidelines and control for the Federal revenue-raising and expenditure procedures than ever carried out in the Government's 200-year history.

Because one of that committee's responsibilities is supervising the day-to-day housekeeping chores of the Senate, that complex and knotty job was capably carried out betwixt and between its major legislative role to help make the Senate as a body operate more smoothly and efficiently.

For example, enactment of the Government in the Sunshine Act in 1976 prompted the Committee on Rules and Administration to recommend more openness with respect to Senate committees by the passage of such a resolution in 1975.

To meet the general public's demands for speedier and more efficient responses to letter inquiries to senatorial offices, Senator CANNON's committee moved another step into computer technology by authorizing establishment of a computerized correspondence management system to permit Senators to reply to inquiries of a maximum of 1 million persons per month. With improved communications between the electorate and their Senators here, our legislative efforts for the country's benefit should be enhanced.

And for the sake of statistics and to demonstrate in another manner the amount of effort, energy, and work hours taken by an active Senate committee, Senator CANNON's leadership over his 5 years as chairman saw the Committee on Rules and Administration consider 755 legislative measures, of which 563 were reported to the Senate and 546 approved by the Senate, including 324 simple Senate resolutions, 111 Senate-House concurrent resolutions, and 66 House and Senate bills and joint resolutions, of which 35 became public law.

Mr. President, we believe the record speaks adequately for itself of the great contribution the senior Senator from Nevada has made to this body and to this country. We wish for him many more years of a productive and continuingly successful leadership career in the Senate.

HOSPITAL COST CONTAINMENT

Mr. SCHMITT. Mr. President, last August I introduced into the RECORD several letters from New Mexico hospitals detailing suggestions by the medical profession in New Mexico for alternatives to hospital cost containment.

Mr. President, as another example of an innovative and modern management technique which helps reduce actual increasing hospital costs, I ask unanimous consent that the letter from Thomas Spencer of the New Mexico Hospital Consortium be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

ALBUQUERQUE, N. MEX.,
October 21, 1977.

Hon. HARRISON "JACK" SCHMITT,
Senator from New Mexico,
Dirksen Senate Office Building,
Washington, D.C.

DEAR SENATOR SCHMITT: I heard of your interest in learning about voluntary cost containment efforts by hospitals in New Mexico from Jim LaCombe of the New Mexico Hospital Association. I would like to take this opportunity to tell you about the New Mexico Hospital Consortium.

The New Mexico Hospital Consortium is an organization that provides a variety of services to member hospitals throughout the State of New Mexico. The Consortium is incorporated under the laws of the State of New Mexico as a not-for-profit cooperative association. The organization was founded by the chief executive officers of six hospitals in June of 1976, and now includes eleven hospitals as members and provides services to two hospitals and a clinic that are not members. The individuals involved recognize the advantages of pooling resources and sharing services to contain cost and to improve the quality and scope of the services that their institutions provide. They also are committed to maintaining the local autonomy of their institutions. The organization serves as a vehicle for accomplishing these purposes. The objectives of the NMHC are:

1. To foster and maintain autonomous operation of member hospitals.
2. To enhance the delivery of health care throughout New Mexico.
3. To help contain cost of operation by achieving economies of scale.
4. To help coordinate state wide planning.
5. To provide additional management and technical expertise to rural hospitals.
6. To improve continuing education among administrators and health professionals.

The Consortium is governed by a board of directors consisting of the chief executive officer of each member hospital. The board exerts no control over member hospitals but rather formulates policy and implements programs for the purpose of achieving the goals of the organization. The board employs an executive director and holds him responsible for planning, organizing, staffing, directing and controlling the programs, and activities of the organization.

Financial support for the Consortium is derived from monthly dues assessed members by bed size and fees for services rendered. The hospitals are not required to participate in Consortium programs. Each administrator determines what services are applicable to the situation at his/her hospital and pays only for the services the institution uses. At the present time the Consortium provides the following services:

A. GROUP PURCHASING

The cooperative group purchasing program of the Consortium has been in existence for one year. More than two hundred purchasing contracts have been made available to hospitals through the Consortium program. Consolidation of purchasing has not only resulted in price reductions, but has also resulted in agreements with distributors that improve representation, increase flexibility of shipping, shorten delivery time, and reduce freight costs. The purchasing program of the NMHC is a dynamic, ever-changing program and it is difficult to arrive at an exact figure of the savings involved. I feel, however, that a few examples might give you an idea of the magnitude of the savings involved.

1. I–V solutions. Espanola Hospital determined that its savings on the purchasing of I–V solutions under Consortium contracts is in excess of $1,000 per month. Studies in other hospitals have shown that their experience is similar to Espanola's. For the eleven hospitals participating in the program the savings on the purchase of I–V solutions alone is in excess of $11,000 per month, or $132,000 per year.

2. Needles and syringes. Consortium member hospitals were buying needles and syringes at $77.35 per thousand previous to the establishment of the Consortium contracts. The NMHC negotiated price is $48.30 per thousand. The savings is $29.05 per thousand. Using an estimated monthly volume of use for the total group the savings is $3,000 per month or $36,000 per year.

3. Disposable linen packs. The average list price for disposable linen packs prior to the negotiation of the Consortium was $9.90. The Consortium contract price is $8.42. The savings is $1.48 per pack. Using an estimated volume figure for the entire group the savings comes to $740 per month or $8,888 per year.

4. Underpads. Previous to the Consortium contract member hospitals were paying an average of $20 per case for underpads. The NMHC price is $15 per case, or a savings of $5 per case. Using an estimated usage figure for eleven member hospitals the savings per month comes to $550, or $6,600 per year.

The examples given relate to four contracts out of a total of 200 contracts covering many items—drugs, supply and equipment items. The savings from these four contracts alone is in excess of $15,000 per month or $182,000 per year.

B. EDUCATION PROGRAM

The NMHC provides continuing education for hospital personnel. The program includes courses in intensive care nursing, coronary care nursing, respiratory care, neonatal care, supervisory skills, communication skills, emergency room nursing, care of stroke victims, cancer detection and treatment, and needs of unwed mothers. These courses are available for presentation at each hospital. Prior to the inception of the NMHC education program continuing education was costing member hospitals $12 per person per hour. Education provided under the NMHC program, is costing member hospitals an average of $2 per person per hour. Since the beginning of the program 2800 person hours of education have been provided to member hospitals. This amount of education would have cost member hospitals $33,600 per year. The cost under the NMHC education program has been $4,857. The savings over the first six months is $28,743. In addition to monetary advantages there are other advantages to member hospitals resulting from the NMHC education program.

The presentation of courses at the local hospital minimizes problems related to coverage and family responsibilities that are associated with traveling to courses in distant areas. The effectiveness of the education is improved because more people are exposed to the information presented. The instructors involved in the education program are familiar with the hospital environment and are available for consultation on a continuing basis.

C. BIO-MEDICAL ENGINEERING PROGRAM

The Bio-Medical Engineering Program provides electrical safety assurance, preventive maintenance, and repair of medical equipment to the participating hospitals. The charge for this service is $16.50 per hour with no travel charges. The program involves an average of ten hours per month at each hospital and the average cost per hospital is $165.00 per month. Commercial firms offering similar service charge $25–$35 per hour, portal to portal. The same service to participating hospitals at these prices would be $350–$475 per month. The savings to participating hospitals averages $250 per hospital. With eight hospitals participating the savings related to the total program averages $2,000 per month or $24,000 per year.

The Bio-Medical Engineering Program has not only reduced cost for repairs of equipment, but it has had a beneficial effect on the quality of patient care provided in the hospitals. Insurance carriers have recognized this improvement in quality and has reflected this recognition in their rating structures. In one hospital this consideration amounted to $6,000, and in another it amounted to a $12,000 reduction in insurance premiums from what the insurance company had originally projected.

D. PROVIDER REPRESENTATIVE PROGRAM

The Provider Representative Program provides a liaison between the hospitals and the organization responsible for processing claims in the Medicaid program. In one member hospital the receivables relating to the Medicaid program have been reduced from an average of $80,000 to an average of $20,000 over a three months period.

E. PHYSICIAN RECRUITMENT

The Physician Recruitment Program provides recruiting services to member hospitals through a contract with a professional recruiting firm. The normal fee charged by the firm is $4,000 per physician placement. By combining contracts and negotiating the Consortium has been able to reduce this fee to $2,500 per physician placement for member hospital. Two hospitals are conducting searches for physicians using this program at the present time.

F. CONSULTATION SERVICES

1. Medical records

One hospital has contracted with the Consortium to provide a Medical Records consultation on a one visit per month basis. This arrangement has proved adequate for the hospitals and is costing approximately $110.00 per month. Without the Consortium the hospital would have hired an RRT at a cost of $800 per month.

2. Maintenance

One hospital contracted with the Consortium for maintenance consultation for repair of a roof. As a result of the consultation the problem was solved and the cost was $9,000 less than the cost of the solution arrived at by the hospital previous to consultation.

New programs are limited only by the imagination and creativity of those involved. Future plans include development of programs to provide transmission and automated interpretation of EKG's and pulmonary functions. Physical Therapy, continuing education for physicians in rural practice, consultation service in the area of long range planning, systems design in financial management, materials management, pharmaceutical distribution, education for hospital trustees and community health education.

The New Mexico Hospital Consortium was created by health care managers in the State of New Mexico in an effort to contain costs and improve service. The savings achieved by hospitals through Consortium participation are returned to the communities they serve in the form of reduction in rate increases and improvements in quality and scope of services available. The Consortium was founded voluntarily with no outside funding encouragement. Those involved in the Consortium feel that the problem of controlling health care costs can be addressed more effectively from inside the industry through efforts like this rather than through government mandated controls. The results to date are evidence of the validity of this position.

I hope the information I have provided will be of value to you. If you need more information or desire clarification please contact me.

Sincerely yours,

THOMAS E. SPENCER,
Executive Director.

SAVINGS SYNOPSIS—NEW MEXICO HOSPITAL CONSORTIUM

I–V: 11,000 per month.
I–V: 132,000 per year.
Needles and syringes: 3,600 per month.
Needles and syringes: 36,000 per year.
Disposable linen packs: 740 per month.
Disposable linen packs: 8,800 per year.
Underpads: 550 per month.
Underpads: 6,600 per year.

Total savings on examples given: $15,290 per month.

Total savings on examples given: $183,480 per year.

Education program. Savings of $28,743 for six months.

Bio-medical engineering program: Direct savings: $2,000 per month.

Direct savings: $24,000 per year.

Savings due to reduction in insurance: $22,000 per year.

Provider representative program: The program has not been operational long enough to measure savings.

Physician recruitment: 2 contracts signed and savings of $1,500 per contract equal $3,000 total.

Medical records consultation: $690 per month and $8,200 per year.

Maintenance consultation: $9,000 per year.

The estimated net savings to member hospitals resulting from all Consortium programs in the first year of operation of the New Mexico Hospital Consortium (using only four examples out of 200 contracts in the purchasing program).

Gross	$307,246
Less dues	45,615
Less purchasing fee	2,600
Net	268,031

ADDRESS BY HENRY FORD II TO THE WHITE HOUSE CONFERENCE ON BALANCED NATIONAL GROWTH AND ECONOMIC DEVELOPMENT

Mr. TALMADGE. Mr. President, I recently had an opportunity to read a very

forthright and meaningful address by Henry Ford II, chairman of the Ford Motor Co., at the White House Conference on Balanced National Growth and Economic Development in which Mr. Ford issues a very strong warning against the growing dangers of runaway Federal regulation of private business and industry.

Mr. Ford quite correctly points out that Government regulation that "goes too far and too fast" does more than just retard industrial growth and expansion. "It falls inevitably on the society at large, including many who do not share in the benefits of regulation. If regulation is not to become an even more serious constraint on economic growth, we must find the best balance between benefits to people as citizens and costs to people as consumers," Mr. Ford says, and I wholeheartedly agree.

Mr. Ford calls for a "sunset law" for regulations and regulatory agencies and a reassessment of national priorities that will lead to business and industrial expansion, increased productivity, and more jobs, instead of Government regulatory pressures which close plants down, stymie economic growth, and put people out of work.

I bring Mr. Ford's address to the attention of the Senate and urge that Congress heed his warning. If we continue much further in the direction we are now going, I fear for the future of the free enterprise system and the economic security of our Nation.

I ask unanimous consent that Mr. Ford's address be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

REMARKS BY HENRY FORD II

I am honored to be one of your Conference speakers, and I welcome this chance to take a stand in favor of vigorous, sustained national growth.

You will note that I didn't say "balanced" national growth. I have no quarrel with the concept of balanced growth, but I am strongly opposed to many of the measures that have been adopted thus far in an effort to achieve that goal.

In my view, "balanced growth" is a euphemism often employed by those who argue that economic growth must be sacrificed to environmental quality. I realize that "balanced growth" means different things to different people. But to me, it suggests government regulation, industrial disruption and wholesale abandonment of our marketplace economy. If the term has no other meaning, it is an invitation to disaster.

There is no reason, in my opinion, why we can't have both vigorous economic growth and a high level of environmental quality at one and the same time. They need not be incompatible. But we will not have either, in the long run, if we do not give first priority to economic growth.

My primary concern today is whether there will be growth at all, given our government's increasing preoccupation with national policies that effectively impede growth.

As I look at our country today, I see a powerful but uncertain and unsteady giant being trussed up in a growing web of rules and regulations to the point where it can no longer exert its strength freely and effectively. I am reminded of the story of Gulliver in the land of the Lilliputians.

Maybe it's only a coincidence that the recent period of rapidly rising government spending and roughshod regulation also has been a period of high unemployment, slow productivity improvement, slow growth in personal income, soaring government deficits and unprecedented peacetime inflation. But I don't believe it's a coincidence at all, and I hope you don't either. Despite a mounting record of failure and frustration, our leaders have failed to grasp the fact that too much government inevitably leads to economic decay.

It is obvious to everyone—or should be—that the more government spends, the less wealth is left for productive investment as well as for private consumption. What is not so obvious—and our lawmakers and regulators apparently choose to ignore it—is that private spending to meet government requirements has very much the same consequences.

How do we provide more jobs for American workers? How will we create the resources needed to end poverty, disease, illiteracy, the decay of our cities and other chronic social ills? How do we develop new sources and forms of energy to meet our growing needs? How do we pay for the good things we want—clean air and water, improved health and safety, less noise, more leisure and so on—without cutting deeply into the things we must have, like jobs and homes and schools and efficient transportation?

We do it by maintaining the growth of our economy and increasing productivity to the maximum, by encouraging American business to take risks, to invest in new plants, products and services, to develop new processes, to become more efficient—and to generate enough capital to be able to repeat that process over and over again.

Some weeks ago, the National Association for the Advancement of Colored People spoke out in opposition to some provisions of the Administration's pending energy plan. The Executive Director of the NAACP explained his organization's concern in these words: "If there is no adequate energy supply available, then industry will not expand, new jobs will not be created and we'll end up with joblessness of epidemic proportions in the black community . . . we are saying to the President . . . that there must be greater effort put on expanding sources for energy. We cannot live in a no-growth economy; we cannot live in a situation where . . . jobs are not being created."

A very simliar warning, but in a different context, was sounded in another country not long ago—and from a totally unexpected source. All of us know what has happened in England over the past quarter-century or more. Speaking from bitter experience, the British Minister and Labor Party leader, James Callaghan, offered these words of advice to Labor Party members in September, 1976:

"The willingness of industry to invest in new plant and machinery," said Mr. Callaghan, "requires not only that we overcome inflation but that industry is left with sufficient funds and sufficient confidence to make the new investment. . . . If industry cannot generate sufficient funds to buy its new plant and machinery then you will not get the investment and we shall continue to go downhill. There are elementary facts of life. . . . "

I wonder how many people in our own government have read that remarkable statement, or have admitted its relevance to our situation here in the United States. Very few appear to recognize that every new law or regulation that siphons off capital for non-productive purposes leaves that much less for growth, jobs and improved efficiency. And every new law and regulation that undermines business confidence in the prospects for growth pushes us in the direction of economic decline and recession.

Is that a price worth paying for double-quick rules and regulations that too often deny industry a chance to work toward the same goals at a pace that would involve far less cost and far less disruption to the economy?

Let me make clear that I am not arguing with the need for government action to conserve energy, reduce harmful pollution and protect the health and safety of all of us. But I am arguing with the tendency to sanctify each goal—to seek instant perfection with little regard for costs and consequences. In our national effort to solve common problems caused by our private choices, we have spent too much time on moralistic and ideological disputes and too little time looking for practical compromises.

When regulation goes too far and too fast, the burden does not fall on business alone. It falls inevitably on the society at large, including many who do not share in the benefits of regulation. If regulation is not to become an even more serious constraint on economic growth, we must find the best balance between benefits to people as citizens and costs to people as consumers.

How much have the regulators learned, for example, from the situation of the U.S. steel industry? For many years, foresighted firms in that industry tried to increase their prices and thus accumulate capital to modernize facilities and introduce more efficient processes. In many cases, those price increases were denied or rolled back by government pressure. Now the industry has been told that its facilities, of whatever age and condition, must meet strict environmental standards—in fast order and at today's highly inflated costs—or there will be severe penalties. At least one company has chosen instead to close its older plants and lay off thousands of workers. Does this serve the people of America?

For at least five years, a group of Utah utilities has been trying to build a huge coal-fired power plant that would provide needed electricity to a million homes in California and Utah. The plant's output would reduce demand for oil by 35 million barrels a year and thus reduce our foreign trade deficit by some $500 million annually. But environmentalists have blocked its construction on grounds that it would invade the national park system and forests in that part of the country. The fact that $600 million worth of pollution-control equipment would be installed in the plant apparently makes no difference.

That kind of problem is not easy to resolve, obviously. But again I ask, what would best serve the people of America? And who will decide what is truly in the interest of the people?

In the course of developing these remarks, I saw a newspaper report in which the National Wildlife Federation and the Environmental Action Foundation were quoted as saying in a joint statement: "Since the 1930's, when the automobile replaced indoor plumbing as the most desired household item, this nation has operated under assumptions about auto transportation that have largely lost their validity. (We need) national priorities that move us away from total dependence on the automobile. . . ."

I wonder what year in the 1930's those organizations would like to see us go back to—1935, when there were fewer than four million vehicles produced in this country and the national unemployment rate was 20.3 per cent? Or maybe 1932, when only 1,331,000 vehicles were produced and the unemployment rate reached 24.1 per cent?

It is no secret that the automobile industry has been the prime target of those who have presumed to tell the American people, through single-minded and hastily drawn regulation, what is best for them. With

little apparent concern for costs and long-range economic consequences, they have set themselves up as key arbiters of automotive design and utility. And they have made it clear that they intend to keep at it until they—not the 130-million-plus vehicle owners in this country—are satisfied with the results.

I am not at all reluctant to say that some automotive regulations have been needed. The industry simply did not respond quickly and effectively enough to the harmful side-effects of vastly increased automotive usage in highly populated areas. And some obviously desirable goals such as reduced emission of pollutants and increased passenger protection in the event of accidents could not have been achieved as readily without uniform, across-the-board government mandates. In retrospect, I think it is fair to say also that the law requiring greater fuel economy in motor vehicle usage has moved us faster toward energy conservation goals than competitive, free-market forces would have done.

The automobile industry disputed some of the provisions of those laws, primarily the timing of certain standards, but it has stepped up to the task of meeting established goals as quickly and efficiently as resources will permit. The Congress has made clear what is wanted, and we and the other automobile companies are making a mighty effort to respond.

But the effect of even the most desirable law can be unnecessarily costly and disruptive to both manufacturers and consumers if it is interpreted in a narrow or punitive way by those who carry out the law. Regulatory decisions can have far greater impact than was intended or foreseen by those who enacted the basic legislation. To the extent that those decisions are biased or overzealous, there can be no hope of seeing the law carried out objectively.

Last month, to take just one recent example, the National Highway Traffic Safety Administration issued a proposal requiring that our 1980-model light and medium trucks achieve a fuel economy level more than 33 percent greater than will be obtained in our 1979 models. We would be given only 14 months in which to bring off that small miracle. Not only does the proposal ignore technological limitations, but it does not take account of the extent to which our financial, technical and human resources are already being strained to meet fuel economy and emission standards for passenger cars.

This is not the place to spell out all of the other things that are wrong with the National Highway Traffic Safety Administration's proposal, but I think it illustrates very clearly the unreasonable time restrictions that are so often imposed by those who regulate automotive products. An equally serious problem for an industry that must plan its products well in advance of production is the constant uncertainty as to what will be required of us next. We can never be sure that the standards toward which we are working today will not be made unattainable by arbitrary regulatory action or overturned by new and unanticipated requirements.

There is a very real danger that regulation will continue to feed upon regulation and become not so much a means to an end as an end in itself. It is a happy hunting ground for many in Washington and elsewhere who find themselves possessed of a power that is greater in some respects than that of the Congress or state legislators.

It is an insidious kind of power. It lacks accountability to the people, has few real restraints and avoids any immediate public outcry because it does not make any direct or substantial demands upon the U.S. Treasury. The staggering cost of meeting regulations falls first upon the affected industry and its customers, and only later does the impact begin to be felt by the society at large in terms of general price rises, slower economic growth and fewer jobs. One of our critical needs today is a "sunset law" for regulations and regulatory agencies.

President Carter has made a move in that direction through his proposed issuance of an executive order requiring each government agency to give advance notice of its agenda, to offer an analysis of the impact of its major regulatory proposals and to conduct periodic reviews of existing regulations. The question at issue is whether that order will apply also to the so-called independent regulatory agencies, who prefer not to see their power restricted in any way. I applaud the Presidents' action, and I hope that the order can be given effect at an early date—with all regulatory agencies included.

One question we should be asking is how much more regulation all of us can afford, either directly in product costs or indirectly through lost opportunities for economic growth. For every significant federal or state regulation there is a trade-off of one kind or another that often goes unrecognized because the impact is delayed. We as individuals make trade-offs every day, but many find it difficult to view government actions in the same way. Most of us, given a choice, would undoubtedly choose clean air, clean water, safety and fuel economy measures over some equally expensive but less beneficial alternative. But I believe there should always—and particularly in the case of regulatory actions—be a clear understanding of the trade-offs involved.

Some people might ask why the automobile industry and others cannot pay for the immediate costs of regulation out of profits. One answer is that the short-term costs of meeting government regulations are pretty well fixed year after year. Profits are not.

Ford Motor Company will spend nearly $2 billion a year over the next four years to re-engineer its cars and trucks and build the facilities needed for compliance with U.S. fuel-economy, emissions and safety requirements. On the basis of our own costs and share of industry, we estimate that the entire industry could spend as much as $40 billion in the next four or five years to meet product standards established by government. Add to that the cost of other kinds of government regulations and the many other costs of doing business in a competitive industry.

There have been estimates, for example, that the cost of meeting noise standards in industrial plants of all kinds will range from $10 to $15 billion.

A current study being done at the Brookings Institution indicates that the cost to business of meeting environmental requirements is now more than $10 billion a year and the cumulative capital investment for that purpose over the past ten years is approaching something like $100 billion.

The total before-tax profits of all U.S. non-financial corporations in 1976 amounted to $102 billion. But the comparable figure for 1975 was $78 billion and for 1974, $60 billion. And of course there are many other claims on profits, like taxes for the government, dividends to stockholders, pension reserves, competitive actions and more.

Fortunately, Ford Motor Company's earnings in 1977 were enough to enable us to meet both government and other normal business demands, and we look for another good year in 1978. But because of the cyclical nature of our business, there will be some not-so-good years ahead when earnings will fall far short of our needs. By then we will have lost much of our freedom to adjust spending accordingly. We will have no choice but to maintain expenditures at the levels needed to meet government requirements within the time frame demanded by law.

What the regulators evidently do not recognize in all of this is that they are forcing some fundamental changes in the structure of our economy. To the extent that some companies are unable to sustain the level of spending required by government regulation, they could find it necessary to cut back operations, reduce product lines or—at the extreme—simply go out of business. One automobile company has already dropped out of the heavy truck business because, by its own account, it "could not keep pace with the growing list of government standards." Despite efforts by government throughout the years to prevent concentration in industry, the regulators are fast bringing us to a point where only the largest companies can survive.

Again I ask, does this serve the people of America?

What troubles me most about all of this is our apparent inability or unwillingness to recognize that there is something wrong about the way we look at our national problems and the way we try to solve them. We want clean, sparkling rivers and streams wherever we go. But must we close down all the industrial plants along their borders in order to achieve that goal? We want clean air. But is 90 per cent clean much worse than 99.9 per cent clean? We want safe motor vehicles. But can the vehicle alone guarantee absolute protection from accidents and injuries?

Several years ago, I came down to Washington at the invitation of the late Senator Humphrey to testify before the Joint Economic Committee. I suggested that this country would be well served if we introduced into the conduct of our national economy some of the planning concepts that are common in business.

My words had different meaning for different groups. Conservative elements in the business community and elsewhere were sure I'd become a Socialist who wanted government to control everything. Liberals, on the other hand, sought to embrace me as a repentant sinner who finally had seen the light. What I really said and meant never quite surfaced.

I was trying to suggest that we in this country had better know and understand all the factors that must be taken into account when we size up the economy and lay out our course for the future. We cannot have economic growth, balanced or otherwise, if we go at our problems with tunnel vision. We must know how each action affects another, and be willing to change or eliminate those that are counter-productive. I'm going to repeat that suggestion today—not only because it should be a lot more palatable to the business community now, but because the development of some such approach to national growth could be the most important outcome of the Conference.

It seems to me also that we have made too little use of incentives in attempting to resolve many of our most difficult social and environmental problems. That's the essence of this economic system that has served our country so well for so many years. Even a donkey will respond to a carrot as well as a stick. The more we can encourage people—manufacturers and consumers alike—to want to do what should be done because it is demonstrably in their best interest to do so, the less damage will be done to our economy and to the society at large.

That assumes, of course, that we can arrive at some better way of deciding—by consensus—what our national priorities should be. To paraphrase Winston Churchill, never before have so few attempted to speak for so many with such devastating results.

I hope that this Conference will help point the way to a clear and objective understanding of what truly serves our national interest and that it will reaffirm the right of all

of us to have a voice in what our national priorities will be.

WESTERN GOVERNORS URGE AID TO ENERGY-IMPACTED COMMUNITIES

Mr. STEVENS. Mr. President, the development of domestic energy resources to meet our national energy needs will cause major impacts on nearby communities. The influx of personnel and their families to these areas to work on these energy projects will necessitate the expansion of public services and facilities in these communities. In many cases the communities will need financial and planning assistance.

By and large, Western States and communities are willing to see the development of their resources, if assistance is provided to meet the increased demands on public services and facilities and if compensation is provided for other adverse environmental and social impacts.

The Western Governors' Conference, meeting in Anchorage in September, adopted a resolution expressing the need for impact assistance and some of the considerations for implementing such a program.

In 1976, Congress enacted the coastal energy impact program, to provide impact assistance to energy-related development in the coastal zone. This program needs to be expanded to accommodate inland energy development. This is important to my State, Alaska, because we have vast energy resources and numerous communities of varying sizes which will be impacted when these resources are developed.

Mr. President, I ask unanimous consent that the text of this resolution be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

AID TO ENERGY-IMPACTED COMMUNITIES

The Western Governors recognize the national need for the development of our national resources in the Western United States. This development however had failed to recognize the social burden it carries with it, the disruption of lives and communities and the resultant requirements for a national impact assessment policy.

We strongly urge Congress and the Administration to provide for examinations of the social, economic, and cultural effects of projected extensive resource development projects which will induce rapid community development and change. These analyses should lead to the design of an impact assessment policy within the States and communities to be affected. We urge Congress and the Administration to:

1. Establish a policy which considers the social environment of our citizens to be as important as the physical environment.

2. Develop, in liason with the states, a formal method whereby social factors are considered when decisions are made regarding location, the nature and extent of major on-and-off-shore resources development projects. This may include provisions for conducting functional social impact analyses. Such analyses will: (a) be conducted in a manner which will provide both short and long-term projections of the effects of the projects on the impacted States and communities; (b) specify actions necessary to strengthen positive effects and alter neutral or negative effects of the exploration, development, production, and post-project phases; and (c) include a monitoring system to insure that the development project adheres to the stipulations designed to achieve the social, cultural, and economic goals addressed by the impacted citizens.

3. Restructure and reorganize federal energy-related agencies to reflect the need for better coordination and utilization of impact assessment and mitigation programs.

Specifically, the newly created Department of Energy (DOE) should have the capacity to identify and assure the reasonable mitigation of impact that is likely to be precipitated by federal energy programs and policies.

The federal government should utilize existing agencies and programs where possible for the delivery of impact assistance rather than create new agencies.

However, in doing so, an interagency mechanism and the designation of a lead energy impact assistance agency must be forthcoming for the better coordination of these federal activities.

4. All levels of government, federal, state and local, must share the responsibilities of assessing and mitigating the impacts of energy development.

State and local governments offer the most reasonable level for the actual delivery of impact funds, whether those be federal, state, or locally originated.

Residents of producing states and communities should not have to bear the costs of mitigating net adverse impacts. Those net costs that cannot be internationalized are recognized as a responsibility of the federal government.

State governments and local governments must be in a position to understand the impacts of energy programs before they are initiated and to influence the resource commitment decisions.

Working with the states, the federal government has the responsibility to fully and expeditiously assess the impacts of their energy policies and programs before a decision to proceed is made.

In those cases where impacts are a result of federal policies and programs, regardless of whether they occur on federal or private land, the federal government must assume the ultimate risk of providing impact mitigation.

Federal assistance programs should be automatically triggered by the federal policy or programs which precipitated the impact.

5. *The use of existing federal assistance programs to solve the new set of problems caused by accelerated energy development is of concern to the Governors.*

The better coordination of existing programs that are appropriate for use in energy impact situations is needed and would lead to a better ultilization of federal funds. In the same manner, the lessening of restrictions which prevent states and local governments from using existing categorical programs for solving energy-related impacts would be beneficial.

A substantial utilization of existing federal programs will warrant an increase in funding levels within these programs to address the new costs of energy development associated with an impact assessment policy.

6. *Any new comprehensive federal impact assistance program must be designed in a manner that will allow maximum utilization by state and local governments.*

Such a program should emphasize automatic grants for planning, management, and infrastructure needs, along with other funding mechanisms.

Federal loans and loan guarantees could be utilized if properly designed, but should not be the sole form of federal assistance. Loans and loan guarantee programs should take into account state constitution and usury law constratins.

Federal impact assistance programs must identify actual needs and costs and not rely only upon stringent formula allocations.

Any comprehensive federal program should apply to the mitigation of energy impacts regardless of whether they occur as a result of development of public or private resources.

ENERGY-EFFICIENT HOME DESIGN

Mr. CLARK. Mr. President, last month I toured an energy-efficient house belonging to Dave Sparks, who is a television broadcaster in Waterloo, Iowa. I was much impressed by the house and very pleased also that Dave had put together a description of some of the problems he had run into in trying to have his house designed so that it would be both energy efficient and moderately priced. He pointed out very clearly that there is a need for further Federal Government innovation in encouraging the development of housing which is designed for energy efficiency. As he learned, the usefulness of solar energy in some kinds of residential situations is not yet economical, but homes designed to make the best possible use of the Sun in a more passive way are.

I think Dave made some excellent points about what we could be doing to encourage energy-efficient design and I would like to share his experience with the rest of the Senate. Mr. President, I ask unanimous consent that Dave's description, "Efficiency: Energy's Ugly Duckling," be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

EFFICIENCY: ENERGY'S UGLY DUCKLING

Howard Hunt, the planner of the Watergate burglary, told Barbara Walters that he prefers to avoid personal examples when undertaking to persuade. His reason was that such examples appear self-serving, and weaken the attempt.

Unfortunately, that being the case, this narrative may have a flaw. A citizen who asks for an hour of a Senator's time must have a point he wishes to make, and so we have. But our point was made first to us by our own experience. Our experience remains the basis and sole example we can cite of our point. In any event, the use of personal example here will not be the first time Mr. Hunt and I have disagreed on the means to an end. We do not pretend to be experts in any building problems except our own. But even as the world's best swordsman fears not the second best, but the unpredictable novice, so the amateur builder may hope to thrust his point into the energy fray.

We are not wealthy. Middle class by background, our young income still barely qualifies us as such economically. We are among that marginal 2½ million Americans whom the Department of Labor feels could benefit by mechanisms that would lower the monthly outlay for home ownership. Our personal mechanism was to design for economy, pare down that design, then contract only enough to make the place habitable.

We knew at the outset that we could not afford a typical heating bill. We were also impressed by the proceedings of Earth Day back in 1970, when so many of us discovered the notion that oil is not forever. An old fascination with geodesic domes,

and all the Buckminster Fuller philosophy on space and resources that comes with them, brought us to the door of an architect we knew slightly.

Darrell Andersen counselled against domes as inefficient when compared with partially-buried conventional structures. This was our first clear conflict between the glamorous (dome) and the plain. We elected the plain, but insisted that it incorporate solar heating.

At that time, in 1976, Chamberlain Manufacturing Company of Waterloo was testing flat plate collectors on its roof. Yet, surprisingly, even as this firm was preparing to market its devices, it advised us to consider efficient design first.

Here was our second encounter with the Ugly Duckling. But simple economics forced us to accept it again. Chamberlain's price for a system to provide 75% of the 80,000 BTU's a conventional house would need was $5,000 to $7,000. On the other hand, argued Bill Sims of Chamberlain, modifications in conventional building could cut that heat loss by 75% virtually for free.

The truth is that energy efficiency costs money to design, and more money to build. But walls and roofs must be designed and built anyway. The difference in cost added by efficiency comes mostly from added insulation, and the price of professional inexperience.

There was no designer in the area who felt prepared to design an efficient house. It is our personal belief that the payoff, under the architect's contingency fee, was not high enough. Parenthetically, I note that ERDA has finally decided its earlier solar grants do not provide answers to the problems of large-scale application, because the individual projects have been expensive. In each case, an architect has been paid by percentage of total cost, which on its face appears to conflict with economic efficiency in such projects.

We finally worked out an arrangement to get a certain number of architect hours for a flat fee. Much of the time went into research. The design of our house was determined by the results of that research. Joel Lakin deserves credit for both, the research and the resulting design.

The point has already been made: existing materials and construction techniques can be employed at, ultimately, no additional cost, to provide energy efficient buildings. But some adjustments in thinking are needed. And some plain, basic education has to happen.

We paid for the education of one designer. How many more must learn on the job, at the expense of government programs or (more dearly) of individuals? This also applies to builders, one of whom admitted he had padded his bid because, "I ain't gonna stand the cost of my men learning how to do that."

There is the more difficult job of educating the home buyer. Our house does not look like a typical tract home. Some of that results from custom-building and what I call "architect-fancy." But the design imposes fundamental aesthetic requirements.

Energy efficiency requires two design criteria, one much less obvious than the other, but perhaps more important. First, there is the obvious requirement of limiting heat loss. More subtle is the second requirement of passive heat gain.

We limit loss by insulation, wind protection, and partial burial. The last item provides sure wind protection, and also means part of the outside wall never gets below freezing. As heat loss varies directly with inside-outside temperature difference, reducing the difference through partial burial reduces the loss. A similar effect helps cool the house in the summer.

The heat gain features are the fireplaces, which are designed in a particular way, and the windows. The fireplaces are contained in a central, masonry mass. They are sealed from the rooms by fireglass doors, and are provided outside combustion air. This design eliminates heat loss through the flue, alleviates the danger of gas intrusion that tightly-built houses present, and enables what heat is absorbed by the chimney to radiate into the house, instead of to the outside as a conventional exterior chimney does.

Paul Sidles, the solar information specialist with ERDA's Ames Lab, says the best, cheapest solar collector is a south window. All of our windows face south. They are designed with overhangs to block the sun's rays in summer, but allow full penetration in cooler seasons. The downstairs is done in masonry, insulated on the outside. Even the floor is concrete poured over 2" styrofoam. The passive principle applies here: the sun warms the masonry directly, and indirectly by its warming effect on the air. The masonry is protected, and so retains this heat for a time. Most masonry walls are insulated on the inside, which would block off the passive principle. A simple change, moving the insulation outside, has profound energy implications.

Partial burial, windows on one side only, southward orientation, interior chimneys, open spaces inside for air circulation, and other features demanded by energy efficiency can all be accomplished by inexpensive modifications in present methods and materials. But the inertia is astonishing.

Our greatest problems were with building inspectors who had "never seen anything like this." In a good-faith effort to make the building fit traditional appearances, they almost forced us to compromise the energy efficient design. As it was, partially to get the inspector off our backs, we made several hundred dollars' worth of modifications in our roof. The Uniform Building Code is silent on the features we employed. Faced with deciding in unfamiliar territory, without benefit of UBC guidance, the inspectors excercised understandable, if frustrating caution. Here, again, some education is in order. So might HUD seriously consider an addendum to the UBC, giving guidance to inspectors across the country.

The final point goes to the title of this soliloquy, and carries the taint of cynicism. To the public official who senses the shortness of his term, his budget year, or what-have-you; to the public official who senses the public's desire to see progress being made; to the public official anxious to display some hardware at the end of an expenditure, such things as solar collectors are a godsend.

Solar technology is for real. We accept that, and designed a house to which it can be fitted later at minimum cost. But it is also glamorous, shining there in the sunlight, almost statuesque in its clean, visual simplicity. Nevermind that underneath there is an economic paradox, *it looks good.* It is tricky, scientific, and full of the allure of something-for-nothing. It is futuristic, with a flavor of wide open spaces. No wonder Americans are thrilled with the notion of it.

Like ducklings, who hatch cute, and delight the eye with their bobbing and scooting, solar energy is a newborn beauty with some promise for tomorrow.

But efficient design is another matter, awkward to describe, a bit ungainly to behold. It does no glamorous tricks. It lurches when it moves. But it has the promise of becoming a beautiful swan, that accomplishes more by using what is already used, in a different way.

Here, by the way, is the economic paradox referred to earlier. The cost of a solar system varies with the collector area required. The fixed costs of plumbing, ducting, controls, pumps, fans, and other hardware for distribution and storage change but little. The collector area varies with the BTU demand of the structure. Make the structure more energy efficient, and the collector area is reduced. This raises the cost-per-BTU of a solar system, since the constant, fixed costs must now be borne by a smaller yield. Energy efficiency actually contravenes in a homeowner's evaluation of solar heating. The answer, for us, lies in those passive, masonry walls. Simple, air-type flat plate collectors will heat the interior air, warming those walls. The building then becomes its own storage system, and simple re-radiation of the stored heat provides a direct distribution for the stored heat. All of this is already in the cost of the basic structure. But such relationships result from efficient design of buildings, and not from government-funded research by solar manufacturers.

We do not suggest that government should cease funding research and even manufacture of solar technology. Ours is a more modest, positive proposal. It recognizes that people by themselves, even people exhorted by their leaders, probably lack the drive to curb energy use. Here is a way to bring that about quietly, without costing them much or expending large public sums. Simply (as if such a thing could be as simple to do as to say) apply the attention of government to the ugly duckling of efficient design, even as it is presently applied to energy's more glamorous creatures.

MIDDLE EAST CONFLICTS

Mr. CASE. Mr. President, Senator PAUL LAXALT of Nevada spoke recently at a meeting of the Northern California American Israel Public Affairs Committee on political developments in the Middle East. His thoughts on the subject reflect, I believe, a good understanding of the dynamics of the situation in that region.

In particular, I want to point out a key point in Senator LAXALT's speech. He suggests that our primary objective "must be to isolate the radical elements (in the Middle East) and to avoid giving them a veto over any peace conference policy proceedings."

Indeed, the radical elements, affecting even some of the moderate Arab States such as Jordan and Saudi Arabia, already have harmed the peace talks. Of all the "obstacles to peace" cited recently, the threats to moderate Arab governments, and the murder and terror attacks being carried out on the West Bank and in the Arab world and in Europe, are the biggest danger to a solution of the Middle Eastern conflict.

Mr. President, I ask unanimous consent that his remarks be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

REMARKS BY HONORABLE PAUL LAXALT

First, let me say that I am delighted to address you today as a United States Senator, as a neighboring Nevadan, and as a conservative Republican. Some of you may know that one of the nicer things that has happened to me in my public career was to have had the honor of being Governor Reagan's National Chairman for the Presidency, and of nominating him at the Republican National Convention in Kansas City. It may also interest you to know that I happened to mention my invitation to come here in the Senate cloakroom before leaving and a number of my

Republican colleagues commented that a new dialogue is taking place between Republicans and the Jewish community throughout the country. They thought it exceedingly healthy. I believe that it is long overdue. I think that we conservatives who stand for stability and strength in foreign relations and particularly for standing firm with our friends are particularly valuable political allies for you.

I am not here to pose as an expert on the Middle East. But, I will tell you that I think I am as conversant as most Senators with foreign relations and with the problems in the Mideast. I have had occasion to follow them for a long while—during the time I was Governor of Nevada, thereafter in private life, and more particularly since I have been in the Senate. Last year, I went to the Mideast as part of a delegation headed by Senators Baker and Ribicoff. I must say that this trip was an invaluable experience.

Although we traveled through most of the Middle East, I think the two most significant meetings we had were in Cairo and Jerusalem. In Cairo, we saw first-hand the tremendous problems besetting Anwar Sadat. Never had I conceived of the problems that this man has in governing. Difficulties were everywhere, tremendously serious political, economic and social problems. In talking with the man, as all of us did for a long while, I acquired a considerable respect for him. I saw the strength, the fierce determination and evident ability made manifest by his recent trip to Jerusalem.

In Israel I had similarly favorable impressions of Yitzhak Rabin, Defense Minister Peres and Foreign Minister Allon. During the course of one of the meetings, I also had a chance to meet with a relatively obscure conservative leader of the opposition by the name of Begin—with whom I related very quickly. But, the thing that struck me in all these various conversations with all these people, Egyptian as well as Israeli, was a common thread of an unquenchable thirst for peace.

I came back from that visit feeling I had a strong commitment as a United States Senator to protect Israel's vital security interests, to honor the commitment we have had since its creation in 1948, and to do whatever I could to assist in attaining peace in the region. With that in mind, I became both more avid a student of the Middle Eastern question and increasingly concerned by the actions of the new Administration in Washington.

During the campaign, I felt generally that if Mr. Carter were elected, our foreign policy would be in fairly good hands. But, I soon began to wonder. The first disquieting event was an almost off-hand remark to the effect that Israel should withdraw to its 1967 borders with only minor adjustments. I thought to myself how serious it was for off-hand statements to be made on such important subjects. But, I soon dismissed it as coming from one who was new and unfamiliar with the terms of all concerning the Mideast.

Then, it happened again when Prime Minister Rabin came to Washington. In March there were press leaks—Washington is a great place for leaks—to the effect that Rabin's meetings with the President were unproductive, which I thought was unfair to Mr. Rabin, particularly with an election coming up.

After this, I grew increasingly concerned. When I observed what appeared to me to be an overly friendly posture toward the Palestinians by way of press statements and attitudes emanating from the White House I was most disturbed. Still, I think that most of us gave the new Administration the benefit of the doubt, acknowledging that they were feeling their way and Washington is a long ways from Plains, Georgia.

But, then came the joint U.S./Soviet statement. I think that for many of us this was the end of our illusions. However you wanted to characterize it for Republicans and conservatives, that communique was absolutely disastrous because a good deal of previous effort in Middle Eastern diplomacy had been directed toward putting the Soviets on the sidelines, it was senseless without prior consultation with the parties immediately involved to bring them right back to stage center. The joint statement gave the Soviets credibility they could not achieve otherwise. And, within the framework of the joint statement for the first time, we hear reference to the "legitimate rights" of the Palestinians. "Rights?" This was an exceedingly serious statement by the Administration because it can be translated in terms of calling for an end to Israel.

What I see of this Administration in this and other areas is the same syndrome. The President goes for the home run. This is all well and good, but home run hitters strike out a lot too. This is just what we have been doing in energy where we have to have an energy bill—at any price. The same type of syndrome is in effect with reference to a Geneva Conference. We have to have a Geneva Conference at any price. And, we have to have it before the first of the year. I think that probably this was the stimulus for the joint U.S./Soviet statement.

This Administration, with little support in Congress, has nonetheless gone ahead with its Mideast policies. It was hell-bent for Geneva without giving real consideration to what would happen once we got there and, perhaps the most disastrous thing of all when it comes to foreign affairs, they let events run ahead of them.

I think both Israel and Egypt came to the conclusion that they could not permit the destiny of their respective countries be placed in the hands of what they perceived to be an incompetent, bungling Administration. When Sadat's statement came as it did in almost a throw-away fashion, I can remember the comments around town to the effect that there was no way, absolutely no way, that there would ever be a personal meeting between Sadat and Begin. I did not share that view because a year ago I felt that Sadat was the kind of man who would have the courage to follow through. And, of course, as it developed that is precisely what happened.

Sadat really had no choice. As I indicated before, he is having desperate internal problems. He has 39 million people, many of whom are suffering from poverty and disease. When we were there, he indicated that by the year 2000 Egypt's population would double with no prospect of relief.

I think Sadat's decision to go to Jerusalem was to his great credit and that of Mr. Begin's. They took control. They decided among themselves that the time had come to push the Americans and the Soviets aside and approach their differences on a bilateral basis and start talking face-to-face. This was the most memorable thing that's happened in years. Sadat coming to Tel Aviv Airport and later Jerusalem was among the most exciting public events I can remember. The day that Sadat set foot as he did on Israeli soil—everybody watched. Particularly in Israel. Before then the Arabs treated Israel as if it just plain didn't exist. The day that Sadat set foot on Israeli soil, he told the Mideast, he told the Arabs, he told the world, Israel exists. This was the unstated, but obvious, consequence of the visit.

There are going to be other benefits from that meeting. Communications first of all. How invaluable it is now for them to be able to pick up a phone to talk to one another directly. How invaluable it is going to be in the future if there are difficulties to be able to meet and sort them out.

I was struck too by the symbolism of Mrs. Golda Meir's exchange with Mr. Sadat. That did more good, as far as I was concerned, than all of the State Department's efforts for years. Here were two people exchanging stories like friends. I think that probably did as much good in transmitting a message to the world as anything and I have seen in a long time.

So, it has gone well so far. As Morrie Amitay and, I am sure, the other speakers have indicated, we have only finished the first inning and this could all be terribly counterproductive if we lose momentum. Momentum must be continued and it is imperative, I think, that we in the United States encourage both sides. Unfortunately, the Administration, for reasons best known to itself, seems to be dragging its feet on encouraging Begin and Sadat so it is imperative that the Congress do all that it can to encourage a peaceful settlement. Congress at this time needs to be encouraged itself. It needs to be prodded and the type of effort that Morrie was referring to by way of mail is exceedingly important to stimulate it on a continuing basis.

Egypt and Israel have to know that they are not alone, because I have a suspicion that the days ahead could be lonely at times. They have to know it is not the policy of this country to stall. I think we have to be realistic as we look to the future. Surely, two heads of state meeting as they did in Israel could only state their respective positions in the beginning of negotiations.

I think that among our primary objectives must be to isolate the radical elements and to avoid giving them a veto over any peace conference policy proceedings. Of course, Administration policy of supporting a unified delegation representing all the Arab states in one bloc works in the opposite direction. All you really do in that circumstance is give additional credibility to radical elements. I think that if we go ahead along those lines suggested by the Carter Administration there cannot be a successful Geneva. We must understand what former Secretary Kissinger and many others have recently said in connection with these negotiations—that they can only be the culmination of a long, gradual process. It is going to take patience and perseverance, beacuse we are eventually going to have to have meaningful provisions relating to security. We are going to have to have meaningful guarantees. And these cannot be achieved overnight.

Let me close with making these observations. I am greatly concerned about where our foreign policy is going. It is almost impossible to discern any adherent themes in our foreign policy. Signals change almost by the day. I think, for example, that we have repudiated good friends for human rights reasons while ignoring more heinous crimes in places like Cuba and Panama. In my judgment, too often we have treated our friends like enemies and our enemies like friends. Our credibility is also in doubt. This particularly affects Israel because if you are going to have this kind of uncertainty in relations, in backing up our other friends and allies when they need help, what source of comfort is there for a little country like Israel?

I think that we have too many people at the State Department who are pursuing an illusion of peace. I think we have to have consistency, I think we have to indicate to one and all throughout this world that our allies are with us, and we are with them. It is not a one-way street. Particularly during the course of this coming year we have to take positive steps with a realistic energy program to release and reduce our dependence upon Mideast oil. Because as long as that type of economic servitude exists, we are going to be in serious trouble, and Israel particularly is going to be in serious difficulty. The greatest contribution that all of us can make in these very difficult days is to make certain that in the days ahead you can continue to be as active as you have been.

I hope that you continue to have functions of this kind so that those of us in Washington have an opportunity to communicate with you and understand that with this kind of activity all of us in our own ways can insure the security and future of Israel.

ELECTRICAL POWER—A CLEAR AND PRESENT DANGER

Mr. METZENBAUM. Mr. President, the Congress, in its wisdom in 1920 provided in the Federal Power Act that whenever the Commission determines that an emergency exists by reason of a sudden increase in the demand for electric energy, or a shortage of electric energy, the Commission shall have authority to require temporary connections of facilities and interchange or transmission of electric energy.

There is just one catch to that in 1978—we cannot do it. As all the world knows, the State of Ohio is struggling with the aftereffect of the worst blizzard in years. Voluntary conservation efforts for electrical power are now in effect with a possibility of mandatory requirements and cutbacks affecting industry if the situation does not abate.

I am advised Ohio uses 18,000 megawatts of electricity daily. The best we can hope for in bringing outside power into Ohio is less than 8,000 megawatts and that to be shared among five other States.

I get an uncomfortable feeling, Mr. President, that we are not capable of emergency preparedness with regard to exchange of electricity as envisioned by the Congress in the 1920 Power Act.

I have written to Secretary Schlesinger asking that he activate the Department of Energy to provide whatever immediate help we can get. I have also asked the Secretary to expedite a study he promised to make before March 31 for Lee Metcalf.

Senator Metcalf, in his wisdom, saw the need for a national power grid and introduced Senate bill S. 1991 in August of last year which I cosponsored.

To guarantee the availability of electricity, local power distribution systems must be fully integrated into large regional or national grids in which power is controlled and dispatched from a central point that has knowledge of the energy situation in every part of the region.

On July 18, President Carter also asked his Cabinet and the FPC to investigate a possible national grid system that would allow a more orderly and structured transfer of power to an imperiled system on an emergency basis.

I look forward to early hearings on this legislation and, Mr. President, ask that my letter to Secretary Schlesinger be printed in the RECORD for the benefit of the Senate.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., January 31, 1978.

Hon. JAMES R. SCHLESINGER,
Secretary, Department of Energy,
The White House, Washington, D.C.

DEAR MR. SECRETARY: The problems of the State of Ohio related to meeting critical energy needs have been intensified by the unprecedented storms of recent days. The state is now faced with voluntary and mandatory cutbacks in energy consistent with the plans presented to your department by utility company officials representing an eight state region last week.

The current situation intensifies the need for prompt action on legislation to establish a national electrical power grid and bulk distribution system which Senator Lee Metcalf introduced last August.

This critical electric power supply problem in Ohio and neighboring states underscores the necessity of a national power grid capable of transmitting large blocks of power from one region of the country to another to meet such emergency conditions.

I recall the President's direction to you, following Con Ed's major blackout last year, to address the issue of a national power grid. I am one of the co-sponsors of S. 1991, the National Electrical Energy Reliability and Conservation Act of 1977, which is before the Committee on Energy and Natural Resources. As a member of that committee, I want to have hearings on the bill promptly, so this grid legislation can be considered by both the Senate and House in the 95th Congress.

Last September the late Senator Metcalf asked you to submit a Department of Energy study of a national power grid, with recommendations, no later than March 31, 1978. I urge that this proposed timetable be accelerated, so the committee will have the benefit of your considered views as soon as possible.

In the interim it is imperative that your agency take the lead to assure the maximum available power from existing non-coal sources for Ohio and other states in such need.

I urge you immediately to take whatever measures are necessary to wheel power from those areas with a surplus to the most critically affected areas in the Midwest. It is my understanding that mandatory wheeling to the State of Ohio alone could provide a significant amount of additional power.

Very sincerely yours,

HOWARD M. METZENBAUM,
U.S. Senator.

USER FEES ON DEEP-DRAFT PORTS

Mr. DANFORTH. Mr. President, I have introduced an amendment (No. 1682) to Senator DOMENICI's amendment to H.R. 8309 which would extend Senator DOMENICI's inland waterway user fee concept to deep-draft harbors and ports. The Department of Transportation has studied the applicability of user fees to deep-draft navigation and has found that there is no meaningful distinction between the inland waterways and deep-draft harbors and ports as far as the user fee theory is concerned.

In August 1977, the Department of Transportation issued a report entitled "Deep-Draft Navigation User Charges: Recovery Options and Impacts" (Rept. No. DOT-TSC-OST-77-45). I quote from pages 1-2 and 1-3 of the Department of Transportation report:

> The distinction between the inland waterway and deep-draft systems is somewhat arbitrary and cannot be made in terms of depth or purpose or location alone. The Mississippi River at and below Baton Rouge has a project depth of 40 feet and is one of the busiest oceans ports in the United States, and yet is at the same time a link in the Mississippi River-GIWW barge system. Conversely, many coastal rivers (e.g., the Connecticut River below Hartford or the Thames River, CT.) serve either as "elongated ports", shipping and receiving foreign and coastwise traffic, or as appendages to ports interacting with a coastal port at the mouth, but not with the rest of the "inland system".
>
> Nor is depth itself an adequate metric for classifying projects. A draft criterion would place many coastal harbors (Commercial cargo, fishing, and recreation) together with the inland waterway system, even though they functionally resemble the deeper-draft harbors—i.e., they are generally "point" projects (not system links) which interact with other ports, but whose commerce may involve significant movement in open waters beyond Government-maintained channels.
>
> Earlier TSC studies have dealt with the issue of inland waterway user charges, concentrating on the contiguous river system consisting of the Mississippi River and tributaries, GIWW, and Warrior River systems. The present study deals with the remaining commercial navigation projects, with special emphasis on ports and connecting waterways whose major channels exceed 20 feet. As noted above, the divisions imposed by the analysis are artificial, and the decision whether to implement user charges and what collection option to utilize requires examination of how the alternatives affect each "system", since it is impossible to segregate traffic operations. For example, a fuel tax on diesel bunker fuel would fall on harbor and coastwise tugs burning this fuel as well as river towboats. It would be extremely difficult to institute an inland waterway fuel tax without extending that option to the rest of the system. Therefore, this study will also examine issues of shallow-and-deep-draft systems interactions.

One sentence in the above quoted language deserves special attention:

> It would be extremely difficult to institute an inland waterway fuel tax without extending that option to the rest of the system.

Thus it appears that the position of the Department of Transportation is that a fee for the use of the inland waterway system is phase 1 in a two-phase approach. Phase 2 would be the imposition of a system of user fees on deep-draft harbors and ports. The administration's intent to seek recovery of all Federal expenditures on deep-draft harbors and ports is again clearly stated in the executive summary section of the report, page vii:

> The development of a consistent and equitable approach to recovery of all Federal deep-draft costs was mandated by Section 80(c) of the Water Resource Development Act of 1979.

The 1974 act, Public Law 93-251, covers all "federally financed water and related resources projects." The amendment I have introduced will allow the Senate to consider both phases at the same time so as to avoid the divide and conquer strategy of the administration on this issue.

The following table extrapolates from the Department of Transportation study quoted above, 1971 through 1975 Army Corps of Engineers expenditures by States for operations and maintenance for selected deep-draft harbors and ports. These ports and harbors accounted for approximately 98 percent of total foreign and domestic traffic during this period:

TABLE

Maine: $88,000, Portland harbor.

Massachusetts: $10,893,000, Boston harbor Cape Cod canal.

Connecticut: $2,263,000, New Haven harbor.

New York: $54,417,000. Hudson River, New York, and Buffalo harbors.

Pennsylvania/Delaware: $39,052,000, Philadelphia/Wilmington harbors.

Maryland: $3,778,000, Baltimore harbor.

Virginia: $13,431,000, Hampton Roads harbor.

Florida: $11,608,000, Jacksonville, Tampa, Port Everglades and Canaveral harbors.

Alabama: $8,700,000, Mobile harbor.

Louisiana: $74,522,000, New Orleans and Baton Rouge harbors.

Texas: $38,640,000, Houston ship channel, Galveston harbor, Texas City channels, Sabine Neches waterway and Corpus Christi ship channel.

California: $28,686,000, San Francisco Bay ports.

Oregon: $32,615,000, Columbia River, Coos Bay.

North Carolina: $6,769,000, Wilmington harbor.

South Carolina: $32,143,000, Charleston and Savannah harbors, Shipyard River.

Washington: $10,363,000, Seattle and Tacoma harbors, Lake Washington canal.

Minnesota: $5,097,000, Duluth, Superior harbors, Two harbors.

Michigan: $30,511,000, St. Mary, St. Clair and Detroit Rivers, and channels in Lake St. Clair.

Ohio: $33,196,000, Cleveland, Toledo, Ashtabula, Lorain, Conneaut and Sandusky harbors.

Illinois: $2,130,000, Chicago harbor and Calumet River and harbor (Indiana).

Indiana: $463,000, Indiana harbor.

PANAMÁ CANAL OPERATION

Mr. SPARKMAN. Mr. President, I ask unanimous consent to have printed in the RECORD a letter and enclosure which I received from the Department of State on February 3 in reply to a request by the Committee on Foreign Relations for additional economic and financial data concerning the operation of the Panama Canal.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF STATE,
February 3, 1978.

HON. JOHN SPARKMAN,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Attached to this letter you will find some additional economic and financial data concerning the operation of the Panama Canal. We are supplying this data in response to the request made by the Committee as a result of the hearing held on January 20, 1978.

We hope that this material helps to clarify some of the questions which arose during the hearing and stand ready to supply any additional information the Committee may need.

Sincerely yours,

DOUGLAS J. BENNETT, Jr.,
Assistant Secretary of State for Congressional Relations.

ECONOMIC AND FINANCIAL IMPLICATIONS OF THE NEW PANAMA CANAL TREATIES

This paper summarizes research on the ability of the Panama Canal to be operationally self-sustaining until the end of the century and examines the implications of the Panama Canal Treaty on domestic and world commerce.

Research performed by the U.S. treaty negotiating team, by independent consultants and by various U.S. Government departments indicates that:

1. The Canal enterprise can generate sufficient revenue under the basic treaty to cover all its costs.

2. Opportunities for toll increases substantially exceed the revenues which will be required.

3. Cost savings opportunities are substantial.

4. The impact of likely toll increases on domestic and world commerce will be minimal, if not negligible.

CAN THE CANAL PRODUCE SUFFICIENT REVENUE UNDER THE NEW TREATY TO COVER COSTS?

Since 1915 toll revenues have risen from $4 million to $165 million in fiscal year 1977. At current toll levels they will increase to $210 milion in 1985 and to $224 million in 1990. With a modest 25 percent toll increase, revenues would increase to $251 million in 1985 and to $268 million in 1990.

At the same time various estimates have been made of the Panama Canal Commission's operating costs. An exhaustive study on Panama Commission cost projects has just been prepared by Arthur Anderson & Company for the 1979–83 period. These projections conclude that Canal costs, including payments to Panama and including an inflation factor, will range between $241 million and $249 million in 1979 to between $237 million and $262 million in 1983.

The most significant impact of the new Treaties on future Canal financial operations will be the several annual payments to Panama which will be funded out of Canal operating revenues as operating Canal expenditures of the new Panama Canal Commission.

Article XIII of the Treaty specifies three annual payments to Panama from Canal revenues as an equitable return to Panama on the national resources it has provided the Canal. The first payment is calculated on the basis of 30 cents per Panama Canal ton for each vessel transiting the Canal. Five years after the Treaty goes into effect, this payment will be adjusted every two years to reflect changes in the wholesale price index. This payment should cost the Panama Canal Commission about $45 million in fiscal year 1979. This payment is a direct result of Canal traffic and would not, of course, be paid if the Canal were not operating.

The Panama Canal Commission will also pay Panama a fixed annuity of $10 million out of Canal operating revenues. This payment is a fixed expense of the Company and is not a function of traffic.

The Commission will also pay Panama a third annuity of up to $10 million only to the extent the Commission has a surplus. Should the Canal's revenues not produce a surplus sufficient to cover this contingent payment, the unpaid balance would be paid from future year surpluses.

Any unpaid balance remaining at the expiration of the Treaty would not represent a liability to the United States. Since this payment is only a contingent obligation, the Panama Canal Commission is not required to reflect it in its budget or the toll base.

In addition, Article III of the Treaty which is discussed in greater detail below requires an annual payment of $10 million for specified public services furnished by Panama in Commission operating and housing areas. This reimbursement is for public services which currently cost the U.S. Government approximately $18 million to perform.

Governor Parfitt, speaking for the Panama Canal Company, has suggested that an initial toll increase of 19.6 percent over existing rates would be required to meet these costs. However, the Governor pointed out a similar toll increase would be necessary by 1981 even without the treaties. American Management Services Commission has suggested an initial toll increase of 25 percent. The State Department in its initial estimates and testimony had suggested a toll increase in the neighborhood of 30 to 40 percent which subsequent study indicates was excessively conservative.

A study on Canal traffic and revenue forecasts recently completed by International Research Associates offers estimates that are more optimistic than those developed by our negotiating staff during the actual treaty negotiations. The study concludes that:

(*a*) Tolls could be increased up to slightly over 100 percent before revenues would begin to decline.

(*b*) Toll rate increases ranging from 15 percent to 50 percent would result in losses of traffic, on a tonnage basis, ranging from 2.4 percent for a 15 percent increase to 11.8 percent for a 50 percent increase.

Various studies concur in the finding that an initial toll increase is well within the ability of the Canal to generate revenue through tolls.

This was our judgment during the negotiations. It is a judgment which has been supported by all subsequent analyses with which we are familiar, including the IRA study, a study of Commission costs by Arthur Anderson, and the findings of the Armed Services Committee consultant whose report was issued by the Armed Services Committee on February 1.

WHAT COST SAVINGS WILL BE AFFECTED?

Since 1951, the Panama Canal Company has been administered as a self-sustaining U.S. Government corporation. Currently, in addition to the Canal, annual costs funded by Canal revenues include the Canal Zone Government, Canal Company retail and commercial operations, an "interest" payment to the Treasury of $18 to $20 million and approximately $500,000 of the $2.3 million annuity paid to Panama under the 1903 treaty.

In addition to the requirement to provide payments to Panama, the cost structure of the Panama Canal operation will be changed significantly by the new treaty.

The costs of the Canal Zone Government (about $25 million per year) will disappear after a 30 month transition period. In addition, all commercial and retail facilities will no longer be part of the Canal operation. Costs of providing schools and hospitals for Canal Zone employees will be reimbursed from toll revenues, as is now the case.

The new treaty provides that the Commission pay Panama $10 million per year in return for public services provided by Panama in the Canal operating and housing areas. This cost will be in contrast to the costs currently paid of approximately $18 million.

The Executive Branch will specifically recommend to Congress that the legislation organizing the Panama Canal Commission not charge it with an annual "interest" payment to the Treasury of $18 to $20 million. Congress, however, can decide to include an interest payment in the cost base to be covered by increased tolls. The Congress should recognize that it has always been the policy of the United States to operate the Canal as a public service and that this interest charge is in some ways a departure from this concept.

Beyond these cost savings, American Management Services has reviewed planning budgets for the Panama Canal operation and has considered reductions proposed in connection with the reduced scope of activity of the Panama Canal Commission versus the Panama Canal Company. The American Management Study reported that cost reductions, even larger than those envisioned by the Company, could be made.

WHAT WILL BE THE IMPACT OF THE TREATIES ON DOMESTIC AND WORLD COMMERCE?

Since 1914, the Panama Canal has served world commerce as an important transportation route. Canal traffic has risen from 5 mil-

lion Panama tons in 1915 to 123 million Panama Canal tons in fiscal year 1977. The IRA study indicates that traffic will further increase to 201.9 million tons by the year 2000.

Canal toll rates, however, have remained at low levels. They have changed very little over the years despite mammoth price changes for just about everything else. In 1914, tolls were set at $1.20 per laden Panama Canal ton, and changed to 90 cents per laden ton in 1937. Since 1974, there have been increases in toll rates of 50 percent. Tolls today are set at $1.29 per laden ton.

A toll increase of 20 to 30 percent over existing levels will have a minimum, if not negligible, impact on our trade and economy. A toll increase of about 30 percent will involve a transportation cost increase of less than one percent. Users of the Canal would pay only about $50 million more in tolls per year on cargoes that have a value in excess of roughly $50 billion, or one-tenth of one percent. In most instances, it will be the foreign buyer of U.S. commodities transiting the Canal who is the ultimate payer of Canal tolls and not the seller or shipper. Therefore, of the $50 million, U.S. businesses and consumers will be the ultimate payers of only about $15 million. The overall impact of this on a $1.7 trillion economy is negligible on either our business or the purchasing power of the consumer.

Obviously, there are uncertainties with respect to Panama Canal traffic and revenue, especially after 1990. The same is true of any projection of world or national economic conditions. These uncertainties would exist whether or not we undertake a new treaty relationship with Panama. The new treaty will provide a stable environment, while the alternative of continuing the present relationship could almost certainly involve greater costs and uncertainty for shippers.

BREAKING THE TAX BARRIERS TO ECONOMIC GROWTH

Mr. SCHMITT. Mr. President, the issue of tax reform is very much on the minds of my colleagues this session. One of the chief goals of any tax reform considered by the Congress should be the removal of barriers to economic growth which are built into the Internal Revenue Code. Our present level of capital formation is so low that productivity increases for the United States are among the lowest of the industrialized world.

With this thought in mind, I would like to call attention to an article which I read recently on the issue of barriers to economic growth in our tax law. It was written by a distinguished scholar of macroeconomic policy, Dr. David Meiselman. I commend this informative piece to my colleagues and ask that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

BREAKING THE TAX BARRIERS TO ECONOMIC GROWTH

(By David I. Meiselman)

In the past few years we have all seen many reports describing and analyzing the slow and faltering growth of the American economy over the past decade. After two and a half years of the current business cycle expansion, the performance of the American economy is still highly unsatisfactory, a record which cannot be explained or excused by the temporary adversities of the business cycle or the weather, or even the serious and not so temporary adversity of the OPEC oil cartel. Inflation and unemployment are simply too high; productivity and growth are too low. Moreover, I believe that poor and ill-advised public policy, especially in the tax area, is the major factor causing our dismal performance.

There are many mysteries about economic growth, but the lack of complete knowledge should not blind us to what we do know. We do know that in recent years, since at least 1960, growth in American productivity and output has been the slowest of any of the Western world's major industrial economies! Indeed, despite all her many serious problems, even Great Britain has experienced more per capita growth than the United States. Between 1960 and 1973, real output per employed person increased by an average of only 2.1 percent per year in the United States, while in the U.K. it increased by about 2.8 percent per year or about a third more. Since 1974, per capita output in the United States and the U.K. have increased at an average of about 1 percent per year, partly reflecting sharp recessions in both countries. These differences in growth may appear small in any one year, but they accumulate over the years like compound interest so that during the 13 year period the overall increase in output per employed person was about 43 percent in the United Kingdom compared with about 31 percent in the United States. Other countries grew still more rapidly.

One of the main reasons for our slow growth is that the American economy has been devoting too many resources to consumption and to government and not enough resources to the capital formation which makes growth possible. In fact, of all the Western industrial countries, the United States has devoted the smallest fraction of its Gross National Product since 1960 to private capital formation. Between 1960 and 1973, total fixed investments, which includes housing, has been 17.5 percent of real output, compared with 22 percent in Canada, about 25 percent in France and Germany, and over 35 percent in Japan. Even the British have devoted a large proportion of output to capital formation than we have. Furthermore, the differences between American and foreign capital formation would be even greater if we excluded housing from the comparisons and examined only investment in plant and equipment, inventories and the like.

It is not merely coincidental that the United States has been lowest in both capital formation and economic growth. Output can increase only when technology improves or, with a given level of technology, when either more capital or more labor is used. Technical progress itself depends on capital formation. Technological improvements do not occur automatically; instead, they are typically the consequence of deliberate and planned research and development, a form of capital investment. And for a given level of technology, if there is little additional fixed capital, output can increase only when there are more labor inputs—from more people working, or from people working longer hours. The only dependable way to increase labor productivity, output per man-hour, is to increase the amount of capital per worker. Alternatively, a decrease in the amount of capital per worker tends to decrease labor productivity. These regularities depend on the operation of perhaps the oldest and best established principle in all of economics, known either as the Law of Diminishing Returns or the Law of Variable Proportions. Economists of diverse persuasions from Karl Marx or Paul Samuelson or Milton Friedman to Friedrich von Hayek may differ on many matters, but all agree that labor productivity depends on the amount of capital per worker.

PRODUCTIVITY DETERMINES WAGES

Thus, one factor making for slow growth per worker has been a sharp rise in the labor forces in recent years unmatched by any speedup in the rate of capital formation.

In the 1950–1955 period, the growth of capital per worker increased at the rate of 3.6 percent per year, and slowed in the decade thereafter. From 1965 to 1970 capital per worker increased at the rate of 2.6 percent per year. In the 1970's there has been a sharp decline in the growth of capital per worker. The Congressional Budget Office estimates that it grew at the rate of about 1.6 percent per year between 1970 and 1975 and only 1 percent per year since 1975. In fact, during the current business cycle expansion since early 1975, real gross non-residential fixed capital formation has increased only slightly and has actually declined as a fraction of Gross National Product. This is hardly the basis for the economic growth and the expansion of opportunity which the nation can and should achieve.

It turns out that real wage rates, and, to some extent, employment as well, depend on labor productivity—not because employers are guided by ethical reasons to reward workers for their productivity, but because market forces compel employers to do so. When, as the result of capital investment, employees become more productive, it will pay at least some employers to add to their work forces. As the demand for labor goes up, the result will be some combination of more employment and higher real wages as employers in general are forced to offer higher wages both to attract workers and to keep them from quitting. The maximum each employer is willing to pay is determined by the productivity of labor, and hence by the ratio of capital to labor. Competition among employers tends to drive wage rates to this point. Therefore, wages and employment opportunities will be held down if capital investment is slow.

If capital formation is so crucial for economic growth and rising real wage rates, why is the United States doing such a bad job of it? I contend that a number of public policy measures, by unduly penalizing saving and investment, have diverted resources that individuals would prefer to devote to capital formation and future consumption towards present consumption by households and by government. And one of the worst sets of policies, resulting in this wasteful distortion, is our Federal tax system.

TAXATION ON CURRENT CONSUMPTION

The fundamental bias against capital formation in our tax system results from the multiple taxation of income which is saved and invested. Individuals must pay taxes on essentially all income they earn, whether they spend it immediately or save it. The same holds true for corporations and their profits. This means that a dollar of current income is taxed only once when spent for consumer goods. However, the same dollar of current income devoted to saving is subject to multiple taxation because taxes must also be paid on the interest, dividends, capital gains, and the like that result from saving and investing. The use of income for saving is thereby taxed at substantially higher rates than the use of income for consumption. People naturally respond by saving and investing less. This distortion by multiple taxation is particularly great in the case of dividends, for the return on equity is also subject to an initial corporate profits tax of 48 percent. To be sure, so-called capital gains are taxed at lower rates than ordinary income, but this only moderates the distortion; it does not eliminate it.

For full tax equality between saving and consumption, all private sector saving should be deductible from the income tax base, whether invested in a savings account, the purchase of machine tools, the education of one's children, or the building of a shopping center. Only current consumption would be taxed. This would mean that businesses could, in effect, write off 100 percent of the cost of production facilities in the year they acquire them, thereby eliminating depreciation and other recovery allowances. Canada and England already essentially have this

system, and other countries generally permit substantially faster write-offs of depreciating capital assets than the United States does.

To be sure, some savings, especially in pension funds, do receive a partial tax break partly because under some circumstances taxes can be deferred and partly because some or all of employer contributions may not be taxed at all. But this route has its own dangers and shortcomings because it further bureaucratizes yet another important feature of American life by separating people from control of their own assets. Instead, control is vested in the hands of faceless caretakers and institutions who are required to act "prudently," which means they tend to provide funds to safe, established and large enterprises and activities. The system offers little to new, to risky or to small enterprises, cr to individuals and families who wish to start new businesses. This is yet another sad example of how government keeps people out and protects those who have already made it. Indeed, much of the tax system seems like an evil contrivance designed to keep people from becoming rich rather than striking at the rich themselves.

The damage wrought by our Federal tax system has been aggravated by inflation. Taxable profits have traditionally been calculated on the basis of historic rather than replacement costs. When prices increase, the cost of replacing inventories also increases, and depreciation, based on historic costs, becomes insufficient to replace machines being used. During inflation, therefore, recorded profits are overstated. Inflation thereby levies a special and additional tax on business capital under our current tax laws. Shifting from FIFO to LIFO accounting for inventories moderates but does not eliminate these problems for the inventory component. By itself, the extra inflation tax on business capital would result in a reduced rate of capital formation relative to periods such as the first half of the 1960's when there was little or no inflation. Because post-tax rates of return depend crucially on inflation, capital formation depends on anticipations of future inflation as well as on actual and anticipated public policies affecting future inflation.

INDEXATION RECOMMENDED

Thus, one important and needed reform would be to permit indexation of depreciation allowances to permit depreciation charges to cover current replacement costs rather than historic costs. Of course, if saving were exempt from income taxation there would be full write-offs of capital expenditures and no such adjustments would be necessary. However, if saving is not made deductible, indexation of depreciation would help mitigate some of the bad effects in inflation. Indexation is also desirable because it avoids creating erroneous capital gains when capital gains are subject to tax. Under present arrangements, the combination of inflation and capital gains taxation essentially amounts to a capital levy. Indexation of the entire tax code, including personal and corporate tax rates, are also desirable second-best solutions because indexation avoids the problems caused when the inflation process effectively alters real tax rates by putting individuals into higher tax brackets even when their real incomes remain the same. Tacitly raising tax rates and imposing capital levies by inflation rather than by explicit debate and legislation are not among the Congress's more forthright and honorable actions.

I may add that, even without inflation, taxing capital gains suffers from the basic fault of the tax system as a whole, which is that it tends to cause multiple taxation of income which is saved and invested rather than consumed. When people save they add to their wealth. Multiple taxation results when *both* income and the wealth generating the income are taxed. Because the capital gains tax is levied only when assets are sold and capital gains are realized, the capital gains tax is a peculiar kind of transactions tax, not even a systematic or uniform tax on increases in value. As such, the capital gains tax is yet another form of capital levy which not only reduces saving and investment, but seriously interferes with the efficiency of capital markets.

I regret that some Administration spokesmen and others seem to be suggesting a further blurring of the fundamental distinction between capital and income, including an increase in the capital gains tax. I find it hard to see how an increase in the multiple taxation of capital would help to achieve the Administration's stated goal of spurring capital formation.

INFLATION INCREASES TAX BIAS

The combination of inflation, capital gains taxation and other features of the present tax code also bear heavily on saving as well as capital formation, both because the effects of inflation are far from uniform and because the pace of future inflation is uncertain and, in many respects, subject to the erratic twists and turns of public policies, especially Federal Reserve monetary policy, which are themselves highly uncertain and unpredictable. Markets try to reflect future inflation, but large errors are unavoidable. Under current inflationary circumstances, there is no effective way an ordinary faimly can attain or depend on future real income and real wealth by accumulating real assets for emergencies or for planned future needs such as retirement or sending children to college.

In addition, inflation increases the tax bias against saving because inflation causes still higher taxes on saving relative to other uses of income for several reasons. First, inflation-induced nominal capital gains are subject to tax, even if the assets lose real value because their nominal values increase less than the inflation rate. The result is a capital levy. Second, historic cost accounting for depreciation and various other business costs mean that reported profits are overstated, effectively causing an increase in real tax rates, resulting in still another capital levy. Third, because some payments, such as interest rates, reflect inflation, classifying them as income and subjecting them to taxation is yet another form of capital levy. For some years the small saver has not only suffered a loss in the real value of his deposit, but he has also paid a tax on his interest "earnings," even though the real interest rate has been negative! The same has been true for large investors who hold Treasury bills. Indeed, the puzzle is why so many people continue to hold assets in these and similar forms when overall real rates of returns are negative. One answer may well be that large numbers of people are so fearful of alternative investments that they are effectively willing to pay something to be able to hold on to their existing assets. In view of poor business earnings, reflected in the poor performance of the stock market, and the lack of progress on the inflation front as well as the growing web of burdensome, irksome and costly regulation, who is to say that they are wrong?

Indeed, I believe that the problem of trying to save and to accumulate or conserve real assets is one of the most pressing and pervasive economic and social problems in America today, seriously affecting all of our citizens as well as all of our private institutions. As an economist, the question I am most frequently asked is, "How can I save and protect myself from inflation?" I regret that I have no good answer under present circumstances, even for myself or my family. The tragedy is compounded by the fact that on the other side of the coin there is a growing short-fall of capital formation.

FULL DEDUCTIBILITY OF SAVING

Where do we go from here? First, I believe that the long-standing bias in the Federal tax system against saving and investment should be corrected. For full tax equality between the consumption and saving uses of after-tax income, savings should be deductible from the income tax base so that only consumption is taxed. Progressivity can be built into such a tax and I would favor a mild degree of progressivity with appropriate deduction for human capital outlays such as health care and education. I would also favor an indexing arrangement to keep "real" tax rates intact. With the full deductibility of saving, taxes on corporate income and on capital gains can be eliminated. In addition, taxes such as the estate and gift taxes that yield little revenue and create much mischief can be reduced or eliminated.

A roughly equivalent alternative would be a value added tax with appropriate deductions for capital outlays.

Second, as an inferior alternative to the full deductibility of saving, other steps can be taken to moderate the bias against saving and investment, including a partial deductibility of saving. Major elements of the tax code can and should be indexed. The corporate tax should be eliminated, with corporate income attributed to stockholders. Instead of increasing capital gains taxes, present rates should be reduced or, preferably, capital gains and losses should not be included in the tax base, especially since the corporation could no longer be used as a device for keeping earnings out of the personal income tax base.

For other desirable tax changes I would urge the Congress to review the record and follow the examples of the Kennedy Administration and of the Congress during the early 1960's, actions which set the stage for a surge of economic growth as well as for the elimination of inflation. Then, the distortions of the tax system were moderated by effectively reducing the tax biases against saving and investment by means of a combination of policies that included more rapid depreciation and the investment credit as well as the reduction in both corporate and personal tax rates. The Kennedy tax cuts have been more than offset by inflation moving people and businesses into higher tax brackets. We would need tax cuts to get us back to the Kennedy tax rates.

Third, it is essential to abandon the deliberate use of inflation as an instrument of public policy, even for short periods of time. To avoid an abrupt shock to the economy, the inflation should be slowed gradually and eliminated over a four-to-five year period. The maintenance of general price stability will require steady, non-inflationary courses for monetary and for fiscal policies. For monetary policy this means a long-term growth of money in the neighborhood of 1 percent per year for M_1 and 4.0 percent for M_2; for fiscal policy, relatively stable taxes and expenditures close to or at a balanced budget. The staggering deficit of the federal government must be eliminated, primarily through expenditure control, partly to avoid having the deficit crowd out private capital formation. I see no need and much danger in setting out to achieve a budget surplus in order to facilitate capital formation, a negative crowding-out effect, as it were. Paying the additional taxes to provide the surpluses results in undesirable distortions and I find it difficult to believe that any surplus, once achieved, can long be protected against the expenditure bias of governments and of special interests. There are better and more dependable ways to eliminate the bias against saving and investment, and to get the country moving again.

PANAMA CANAL TREATY

Mr. CANNON. Mr. President, during the past several years the question of the Panama Canal Treaty has assumed greater and greater importance. In recent months it has become an emotional

issue to the extent that my constituent mail is now almost totally against ratification. I have consistently told my correspondents that I prefer to wait until we held hearings in the Senate Armed Services Committee before making up my mind. I thought it was in our national interest to review the subject objectively so that whatever we do would be in the best interest of the United States. So you might say I am uncommitted and therefore this subject has considerable significance to me. In reviewing the material on the proposed treaties I am struck by the lopsided concessions being proposed in an attempt to obtain an agreement. I am not opposed to a new treaty if sufficient safeguards are included, but do feel some amendments are in order and am glad to see that the majority and minority leaders feel the same way.

Panama is seeking to take on vast responsibilities, in fact to take the place of the United States in running the Panama Canal which has great importance to the United States and the entire world. Accordingly, it appears proper to look at her capability to do so. The basic economy of Panama without the canal appears badly shaken. The Torrijos government seized power in 1968 when the Panamanian economy was riding the crest of a wave that began in the early 1960's. The rate of growth was an astounding 8 percent. Then in 1974 a recession started. By 1975 things started picking up elsewhere in Latin America but not in Panama. By 1977 Panama's economic growth rate had sunk from 8 percent to less than 1 percent. The national debt had risen from $167 million in 1968 to $1.5 billion in 1977. Almost a 1,000-percent increase in 8 years. The per capita debt had become the largest in all of Latin America. The annual interest payment on the national debt alone has reached $150 million, almost half of the current revenue taken in by the government. The balance of payments stands at a staggering minus $500 million, about half of their gross national product.

Financed for the past several years by loans from abroad, most of them short term, Panama has just about run out of credit. Three-fourths of the current debt will come due within the next 10 years. If it were not for the stability provided from the income of the canal, Panama would be broke. With that background I would like to highlight what we found out in recent hearings in the Senate Armed Services Committee.

We consistently hear the statement that the new treaty will cost the taxpayers nothing. That all expenses will be paid out of revenue generated by canal tolls. Well, that doesn't tell the whole story. It was my privilege to chair the Senate Armed Services Committee hearings when we looked into the financial aspects of the treaties.

The first 2 days of our hearings were principally concerned with the military implications of the proposed changes in our relationship with Panama. During the last 2 days we moved into the financial and economic aspects.

While a great deal of attention in the Senate and in public discussion has been given the neutralitly treaty and to the other broad issues raised by the treaties, not enough attention has been focused on the finanical arrangements. Major changes are to be made in the structure and operations of the canal enterprise, including adding large payments to Panama onto the costs of operating the waterway. We need to satisfy ourselves that these provisions are sound and that they will not lead to trouble later if the treaties are ratified.

Before delving into the question, however, I would like to bring the subject into focus. A major reason for building the canal was to promote ocean commerce for the United States. A major importance of the canal to the United States and I might add to the entire world. If it is going to continue to be important from an economic standpoint, much is at stake in the proposed new treaties, particularly in relation to the canal's future operational control.

The true economic significance of the canal has always been in the distance and time savings it affords interocean shipping. The canal cuts 7800 miles off the distance between New York and San Francisco. The days saved are also impressive. For example, a ship traveling at 15 knots can reach Los Angeles from New York in 13 days by way of the Canal. It takes more than a month around South America, through the Straits of Magellan. Savings in miles and days mean fewer ships are required for the movement of the same amount of cargo. Hence it also means reduced fuel consumption and lowered crewing costs, which is a big economic factor. So the big question is, what does the Canal mean to the United States from an economic viewpoint?

About 66 percent of all cargo that moves through the canal comes or goes to U.S. ports. Of that amount, about 34 percent is exports from the United States, 23 percent is imports into the United States, and about 9 percent is U.S. coastal trade. This will increase with the shipment of Alaskan oil to our east coast.

The canal is of great importance to South America and also we cannot overlook its importance to the Far East. A lot of westbound cargo going through the canal is headed for Japan, Australia, and New Zealand. Generally speaking the number of ships transiting the canal has increased steadily over the years reaching a peak of 14,000 in 1971. This dropped off for the next 2 years but went back up over 14,000 in 1974. Since then there has been a decline. During the period 1973 to 1976 the number of ships transiting the canal each day dropped from 39 to 33. In the meantime, operating costs increased. In 1973 the Canal Company sustained a loss for the first time in the canal's history. It has lost money every year since except for last year despite a hike in toll rates in 1974 and another in 1976. I would like to examine why this is so. Probably for the foreseeable future, foreign trade in bulk commodities like coal, oil, ore, and agricultural products will continue to be transported by ship. But there is a change going on in the technology of transportation. One need only look at the constantly increasing volume of air transportation to appreciate what is happening. We have already seen the end of express passenger ships. They have been replaced by the airplane. With the use of jumbo jets, air freight is growing at a rapid rate.

Also a development that could in time have an effect on canal traffic is the minibridge system being advanced by the U.S. railroads. This involves the movement of goods in containers across the United States on fast unitized trains operating on schedules synchronized with ship arrivals and departures at east and west coast ports. If the nation's railroads become viable again which is an AMTRAC goal, the effect of the minibridge concept on the canal's economic value to United States foreign trade could be substantial.

Then too, we have the era of oversized ships unable to transit the canal, like the huge oil tankers. Already there are over 1,000 vessels in the world's mercantile fleet that cannot go through the canal because of their size. In addition to oil, some carry large quantities of dry bulk commodities such as ore, coal, and grain. In total, these oversized vessels are bound to have an economic impact on the canal. Also the reopening of the Suez Canal several years back has had some effect.

So we have a problem of rising costs and no assurance of steady canal traffic. I have some concern that this issue is not being faced squarely in our treaty considerations. It does appear that unless the canal is subsidized, tolls will have to be increased further to make ends meet. We have had two increases totaling over 40 percent, one in 1974, and the other in 1976; so the question is really how much in the way of increases will the traffic bear? What is the likelihood that the Panama Canal Commission, when viewed as a business enterprise, will be self-sustaining and under what conditions can this be achieved? These are some of the issues the Armed Services Committee looked at.

Because of the committee's special concern over the financial impact of these treaties, it engaged its own outside financial consultant to make an independent appraisal. Though the time to accomplish an undertaking of this scope was extremely short, the consultant did an excellent job, and produced an interesting and provocative report.

The committee had four principal areas of interest.

First, we felt it was necessary to explore the details of the treaties' financial workings because the administration has stressed from the beginning that the treaties involve no cost to the taxpayer and no appropriated funds. It is vitally important that the Senate understand before it votes on these treaties whether that is true or not. What are the direct costs of implementing these treaties, and what are the risks that appropriated funds will be necessary to support the Panama Canal Commission during the

next 22 years? What burdens will the taxpayers actually assume? In order to answer these questions we need to understand how the treaties work and what the prospects for profitable operation of the canal really are.

Second, we need to analyze more closely than has been the case thus far the provisions of the treaties relating to payments to Panama. There are ambiguities in those provisions which need to be cleared up so that the Senate can determine whether modifications of the financial provisions are necessary.

Third, is the closely related question whether these financial arrangements have the potential for increasing rather than decreasing the friction between the United States and Panama in the years to come. If the financial provisions have serious ambiguities, or if they create an operational structure that will lead to disputes about how much money the Panamanians are supposed to receive, we need to know about it. One of the major arguments in favor of the treaties has been that they will create a friendly and cooperative attitude which is crucial to canal defense and efficient operation. If that friendly and cooperative attitude will be undermined by continuing financial problems and deficits, we will have gained little or nothing in this effort to reformulate United States-Panamanian relations.

Finally, the financial problems have a direct bearing on our ability to keep the canal open and keep it operating efficiently. If we have constructed through these treaties a financial structure that is doomed to failure then we must act now, before the treaties are approved, to prevent that structure from affecting our vital interest in free and open access to the canal.

The committee had expert witnesses to assist them in reviewing these matters. They were Maj. Gen. Harold Parfitt, Governor of the Canal Zone and President of the Panama Canal Company; Mr. Frank Nicolai of American Management Systems, who supervised the work AMS did on these problems for the Armed Services Committee; and the Honorable Elmer B. Staats, the Comptroller General of the United States.

Before reviewing what these witnesses told us I would like to itemize what we have agreed to provide to Panama in a financial way.

Panama will receive 30 cents per ton transiting the canal. Also a fixed sum of $10 million per annum and an additional $10 million per year if canal traffic revenue permits. In addition the United States pledges to arrange for an economic program of loans under existing statutory programs. Up to $200 million in Export-Import Bank credits; up to $75 million in AID housing guarantees; and $200 million in Overseas Private Investment Corporation loan guarantees. This totals some $300 million. Also, Panama will receive up to $50 million in foreign military sales credits over a period of 10 years to assist in the canal's defense. The current annual payments by the United States to Panama is $2.3 million.

Now to discuss specifics.

General Parfitt, Governor of the Panama Canal Zone, warned that the canal operation may not be self-sustaining after 1984 under the terms of the treaties being considered. He said in answer to questions from committee members that the United States would be obliged to turn over the canal to Panama in the year 2000 free of liens and debts.

If there are outstanding debts the U.S. Government will have to pay them when the canal passes into Panama's hands. The Governor said that after 1984 canal revenue probably will not support the operation of the canal or meet the U.S. obligation to pay Panama large sums of money from toll revenues.

In his estimation, this means there is a high probability that the United States will have to make up the differences between 1984 and 2000 from appropriated funds. And since the treaties require that the canal pass to Panama debt free, his testimony means that the United States would have to write off the millions of dollars owed to it by the Panama Canal Commission.

There is another item that is not clearly understood which relates to the public service fund of $10 million a year. This amount is given to Panama for police and other services and is calculated at what it would cost the United States at American wage scales. The cost to Panama is less than half that amount a year because of their lower wages. Consequently there appears to be a $5 million annual Panamanian profit on the public service fund payment at U.S. expense.

In reference to canal tolls, the long period of toll rate stability in the words of Governor Parfitt has lulled many into the illusion that there was some special magic at work on the isthmus that sheltered the Panama Canal from economic pressures. To the contrary, toll rates and stability are dependent, as are prices in most businesses, on the volume of business and the rate of inflation. He said periodic increases in tolls will be required even without taking into account the impact of the new treaties. He estimated these increases would begin early in the 1980's and be necessary about every 3 years with average increases of about 10 or 11 percent.

He also warned that canal traffic is sensitive to toll increases and that there is a point of diminishing return on how high tolls can be raised to increase revenues. Increases of 50 percent would result in little additional revenue and that the maximum amount of additional revenue obtainable is about 40 percent which would require toll increases of between 75 to 100 percent to obtain.

The implication is that toll increases beyond a certain point would force traffice to use other routes like going around the cape. He foresaw no problem between 1978 through 1984 because North Slope oil from Alaska would generate enough tolls to cover all operations. But after that when oil pipelines will be traversing the United States, it appears periodic toll increases will be required.

Comptroller General Elmer B. Staats warned the committee of another potential problem in the treaties pertaining to the payment of $10 million a year to Panama. Some Panamanians contend that the $10 million carries over into the next year if canal receipts are insufficient to pay it the first year. This means the United States might owe Panama $220 million at the end of the treaties if the canal does not break even or make a profit during the life of the treaties. The Department of State feels that the Canal Commission will be obligated to make the payment only to the extent that operating surpluses exist and that there will be no obligation to pay Panama any unpaid cumulative balance after December 31, 1999. There are of course other monetary implications which when considered in their totality could cost the American taxpayers well over $2 billion.

Mr. Staats and Governor Parfitt both recommend that State's interpretation be spelled out in implementing legislation. In that regard it would help considerably if the administration presented the Senate with the information to accommodate the Senate's understanding of how the treaties are to be implemented. To date the Senate has not even been privileged to see an outline.

However, the Senate Armed Services Committee has written a report on its hearings as has the Foreign Relations Committee. The report by the Armed Services Committee is a summary of the testimony I have just commented on. It is indexed by subject matter for easy reference and makes no conclusions or recommendations, leaving that up to the judgment of each individual Senator. I commend it to my colleagues as necessary reading before making up their minds on the financial aspects of these treaties.

"PUSHBUTTON UNIONISM"—A MISSTATEMENT

Mr. JAVITS. Mr. President, the debate over the Labor Law Reform Act of 1978, recently reported by the Human Resources Committee as S. 2467 by a vote of 13 to 2, has escalated to rhetorical excess beyond the bounds of reason. In my judgment, the Labor Reform Act does not embody a change in Federal policy toward collective bargaining—rather, it represents the reaffirmation of this country's long-established national labor policy in favor of free and democratic employee choice as to union representation. The opponents of S. 2467 who characterize it as establishing "pushbutton unionism" are seriously misstating the facts.

In this regard, I would like to call attention to an article appearing in the February 3, 1978, Washington Post editorial pages. I believe that the article correctly summarizes the need for S. 2467 and the true nature of the bill. I hope that this and similar disinterested calls to reason will prevail over the recent tide of rhetoric and code-word emotional appeals by the bill's opponents.

Mr. President, I ask unanimous consent that the February 3, Washington Post article, "Labor Law Reform: Just a Matter of Fine Tuning," be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

LABOR-LAW REFORM; JUST A MATTER OF FINE TUNING

(By Michael Kerper and Austin Raney)

Rational political discussion always suffers when a relatively innocuous issue becomes the symbolic focal point of a broader debate. Such is the case with the current controversy over President Carter's proposed reforms of the National Labor Relations Act. The opponents have, quite simply, created a mountain out of a molehill. Just recently, the Chamber of Commerce—the leading antagonist of the reform package—suggested that the measures were formulated with one purpose in mind: to "strong-arm" 60 percent of America's work force into joining trade unions.

Strident rhetoric, such as the chamber's, is hardly surprising. Although political discussion in America has never been overtly "class-oriented," few domestic issues have been more inflamatory than those involving the proper role and regulation of labor organizations. The furious legal and political battles that accompanied the adoption of the Wagner Act in 1935 and the Taft-Hartley Act in 1947 serve as ample reminders that Americans have widely different viewpoints on what was once known as the "labor question."

It is also important to remember that the attitudes and policies of America's two major political parties toward organized labor have, to a very large extent, helped shape and define their respective public images. But those images were formed during debates over broad principles and long-term policy direction rather than administrative and procedural adjustments. At the most, President Carter's legislation is a short appendage to the Wagner Act, a slight tinkering with an already well-functioning and reliable mechanism. It is not, as some opponents have argued, "a push-button unionism" bill that will "push hundreds of thousands of workers [into] Big Unions, even though they may not want to join unions."

Compared with the Wagner and Taft-Hartley Acts, the bill currently before Congress is of slight historical significance. Rather than enunciating a new labor policy for the nation, the bill does little more than reaffirm longstanding policy and practice. But all of this is not meant to imply that the issues at hand are unimportant and lacking in consequence. Quite the contrary, America needs to preserve a fair, efficient and representative system of collective bargaining: and the proposed reforms do just that.

Why are reforms needed now? Simply put, the present system can no longer withstand the strains of a steadily mounting caseload and the growing disregard for the law. Since 1958, the number of representation elections and cases involving unfair labor practices has more than doubled. At the end of fiscal year 1966, the National Labor Relations Board had a little under 10,000 pending cases. But at the close of fiscal year 1977, slightly over 20,000 cases waited for final adjudication by the board. In many instances, employees who have petitioned for NLRB-sponsored representation elections have waited for nearly a full year before casting their ballots. Such delays are intolerable and undermine the very foundation of America's labor-relations framework. Without a system of quick, precise and legally binding decisions, labor-management relations will be governed more by sheer power than by the rule of law.

As President Carter pointed out in his message to Congress on labor-law reform, these delays "are the most serious problem. . . . Workers are often denied a fair chance to decide in an NLRB election whether they want union representation. The same problems often deny employers the predictability they, too, need from the labor laws."

Under President Carter's reforms, a definite election timetable would be established. Except for elections that involve issues of "exceptional novelty or complexity," all elections would be held not less than 45 days after a sufficient number of employees had petitioned for an election. To further speed the representation process, the NLRB would be required to formulate more precise definitions of "appropriate bargaining units"—that is, specific groups of employees with shared job skills and responsibilities.

In recent years, the number of labor-law violations—especially on the part of a small number of employers—has risen at a disturbing pace. In 1966 the NLRB dealt with slightly over 7,000 cases involving employer discrimination against pro-union employees (i.e., firings and other less drastic reprisals). By 1976, cases of this type had grown to over 15,000. "Bad-faith bargaining" cases have grown at similar rates.

All this reflects an unfortunate, indeed alarming, erosion of the rule of law. Although it is difficult to explain completely this rapid increase in lawlessness, one contributory factor can be said to be the weakness of penalties included in the National Labor Relations Act. One important feature of the labor-law reform bill is the establishment of stronger penalties for lawbreakers. In the future, employers who consistently break the nation's labor laws would be barred from receiving government contracts. Such "contract bars" have worked exceptionally well in the past, especially in enforcing federal laws forbidding racial, religious and sex discrimination. It is to be hoped such a harsh penalty would reinforce compliance with the basic tenets of the nation's labor law as well.

Finally, the National Labor Relations Board desperately needs expansion. Under Carter's bill, the NLRB would be increased from five members to seven members. With the addition of two members, the board would have another three-member panel with authority to act on behalf of the full board. Two operating NLRB panels would be able to reduce the administrative backlog over the next few years, and otherwise enhance the efficiency of the agency.

America's industrial-relations system, as embodied in the National Labor Relations Act, reflects many of the basic political and social values that molded the nation's system of government. It is broadly representative. It recognizes the diversity of employee groups as well as entrepreneurs. It is flexible and open to change. But above all it has been extraordinarily successful in reconciling the frequently conflicting interests of labor and management. Our industrial-relations system is well worth preserving; indeed, it is an essential part of our society. And Carter's proposed reforms would go a long way in ensuring its survival.

IOWA SENATOR CHAMPIONS THE CAUSE OF RURAL AMERICA

Mr. LEAHY. Mr. President, during the past few years I have had the pleasure of working with Senator DICK CLARK in several efforts related to rural health care. His leadership in this issue comes at a time when advocates for rural Americans are scarce and when health services for these citizens are increasingly threatened.

Field hearings we conducted in 1976 for the Senate Rural Development Subcommittee, which is chaired by Senator CLARK, directly led to congressional consideration and passage of the Rural Health Clinic Act, Public Law 95–210. This important law authorizes payments under medicare and medicaid for medical services furnished by rural health clinics. The Department of Health, Education, and Welfare is currently writing the regulations for the act, so that it can take effect on March 1.

Senator CLARK also led the Senate effort to clarify the National Guidelines for Health Planning as they would relate to rural areas. He was joined by 48 Senators in a letter to Secretary of HEW Califano asking that the initial guidelines be revised. The Department complied with this request, and I believe we all would agree that the new guidelines represent a marked improvement.

These topics and others, including hospital cost containment, national health insurance, and the role of rural hospitals, are discussed by Senator CLARK in a recent interview that appeared in hospitals, the Journal of the American Hospital Association. His perspective on these crucial issues is a special one that reflects his concern for rural Americans' access to health services.

Since the interview is timely—given that Congress will consider this year legislation for hospital cost containment, health planning, and other health services programs—I ask unanimous consent that it be printed in the RECORD.

There being no objection, the interview was ordered to be printed in the RECORD, as follows:

IOWA SENATOR CHAMPIONS THE CAUSE OF RURAL AMERICA

(By Michael Lesparre)

As senior United States Senator from Iowa, Democrat Dick Clark emerged during the first session of the 95th Congress as a leading spokesman for rural America. Before the session came to its sluggish end, bogged down in congressional disputes over President Carter's voluminous program to conserve energy, Senator Clark had mustered strong support for his Rural Health Clinic bill, which became law this past November; he succeeded in mobilizing his colleagues in urging HEW Secretary Joseph A. Califano Jr. to redraft and clarify the controversial Health Planning Guidelines for P.L. 93–641 and to extend the period for public comment on them.

The impact of the guidelines on small rural hospitals, the Senator said, "is not clear," and "if the Department is indeed sincere in wanting to preserve small, community hospitals, then it clearly has not yet communicated this intention to the public in an effective way." His chief concerns were that the guidelines prescribed a ratio of 4 hospital beds per 1,000 population and an average hospital occupancy rate of 80 percent.

A greater bed ratio "should be justified" in rural areas where residents have to travel more than 45 miles to the nearest hospital, he maintained, and lower average annual occupancy rates often are required by small hospitals to accommodate normal fluctuations in admissions.

Such seemingly moderate criticisms were expressed with characteristic firmness by Senator Clark, who also opposed the Administration's hospital cost containment proposal on the ground that it would create a hardship for a majority of small hospitals throughout the nation. He is expected to reinforce this view as Congress once again takes up the cost containment issue early in 1978. He is a low-key but tenacious legislator, who is known for keeping cool while

stating his case with assurance, secure in his knowledge of the facts.

Senator Clark was first elected to the U.S. Senate in 1972 following a 1,300-mile campaign walk across his state. He is a member of the Senate Agriculture, Foreign Relations, and Rules Committees, and he serves on the Democratic Steering Committee. In addition, he serves as chairman of the subcommittees on Rural Development and African Affairs.

Senator Clark also has been deeply committed to congressional reform, having played a key role in the movement for public financing of political campaigns. He is known for his efforts in working to overturn the old seniority system, under which senators used to become committee chairman; chairmanships now have to be won by election.

The 48-year-old Senator grew up in rural Iowa, served in the U.S. Army following World War II, and subsequently received his master's degree in history from the University of Iowa; he later completed course work for a doctorate and served on the university's faculty. Before becoming a U.S. Senator, he was administrative assistant to Representative John Culver who, by political paradox, is now Iowa's junior Senator.

Senator Clark, what do you consider to be
care?
the top priority problems in rural health

The first problem of families in rural areas is lacking access to adequate primary and emergency care, which is a direct result of there not being enough general practitioners available. We see this situation in Iowa, and it's characteristic throughout rural America where we don't have enough primary care physicians and where such physicians continue to move out rather than in.

The same problem exists with respect to hospitals. I'm very concerned that the small hospitals that are able to provide primary and emergency care might be lost as a result of policies being developed for health programs.

Quite frankly—and every hospital administrator and physician serving rural populations knows this—the small, rural hospital has its limitations. It can't provide tertiary or sophisticated or complex care, or even some types of secondary care, although it is critically important in the provision of primary and emergency services.

What do rural areas need to do first—attract more physicians?

Well, the problems go hand in hand. It's hard to have hospitals without having physicians, and it's difficult to attract physicians without having facilities.

On the other hand, some primary care, even care provided outside the hospital, can be provided through physician extenders of various kinds—nurse practitioners and physician's assistants for example. The rural health clinic bill passed in the first session of the 95th Congress (P.L. 95–210) makes rural health clinic services a mandatory Medicaid benefit and provides for payments and incentives for care provided by physician extenders to beneficiaries of both Medicare and Medicaid. This was a bill I introduced with Sen. Patrick Leahy (D-Vt) that was supported by many large health organizations, including the American Hospital Association.

The point is that care must be accessible. If it isn't, it doesn't matter much where it exists. We're aware of the limitations—that it isn't possible to provide the most sophisticated kind of care that is available only in large metropolitan areas, perhaps only in one or two places in some states. But primary and emergency care must be equally available to all Americans.

As a further step to deal with the problems of small hospitals, Congress needs to remove the obstacles to merging hospital and nursing home patients within the same facility. This "swing bed" concept would give small, rural hospitals a chance to reduce the number of underutilized beds and thereby reduce their costs.

Has Iowa concentrated on developing statewide emergency services and home health services?

A branch of our state health department is devoted solely to emergency care, but many of the facilities are still in the developmental stages, or their personnel are undergoing training.

Home health services are of tremendous importance in our state, and I have discussed them with many of my constituents. I have personally visited homes, particularly with the Meals on Wheels program. Again, the problem is that as soon as you leave the metropolitan areas, organized programs just are not very available. In some of our counties where there are fewer than 7,000 residents, it is very difficult to have available the kinds of home services people really need, and as a result they get short-changed. So a primary goal is to extend those services as much as possible. P.L. 95–210 should help considerably in that it enables rural clinics to become designated as home health agencies.

Some urban areas also are underserved, but we must remember that in largely rural states there is likely to be a greater proportion of poor and elderly people who need health care than there are in metropolitan areas. Of course, this is the case in many of the problem areas that characterize the rural sector, and not just in health care.

Is improved transportation between rural and metropolitan areas a partial answer?

Yes, if that transportation links primary and emergency care facilities with facilities that can provide more complex care. You would imagine that so simple a concept would be obvious, but this kind of programming is just beginning to reach the awareness of Congress. Legislation to help bring this movement about is just in its infancy, even though we've had some emergency care, usually through ambulance services, in rural areas for years.

To some degree, transportation is even a problem in getting patients to primary care centers. In our state, a patient may easily be 20 to 25 miles from that kind of care, and in some western states, the distances are often considerably greater.

Long distance travel to a center can be very disorienting for some patients, particularly rural patients, and it is a substitute only when adequate care can't be provided closer to home. So the first criterion always is accessibility to the appropriate level of care. That's the first test. But there are levels of care that can be provided in rural hospitals, and that's why we want to preserve them.

In trying to solve such problems, have you looked to national health insurance? Do you support one of the NHI proposals?

I certainly support the concept of NHI, and I have some opinions about the directions I would like to see for a national program; at the moment, however, I'm not married to any specific proposal.

For the record, I must say that I'm not an expert on health care or a member of a health subcommittee. So I see my role as one of watching very carefully any of the plans that may come along with respect to their application to rural areas. I'm Chairman of the Rural Development Subcommittee, and inasmuch as no one, as far as I know, is paying specific attention to NHI as it would apply to rural areas, I see that as my direct assignment.

What direction would I prefer to see the program take? A phased-in form of NHI, certainly, and one that eventually would be very comprehensive. But how quickly the phase-in is accomplished is a very serious question.

For beginners, some members of Congress would be content to enact catastrophic coverage; but others fear that if you choose catastrophic coverage as the first step, there's a danger of stopping there. Sen. Russell Long (D–LA), who is chairman of the Senate Finance Committee, favors catastrophic coverage as a goal, as does Sen. Abraham Ribicoff (D–CT), who is a prominent member of the committee. However, I'm not close enough to the situation to say whether the fear I've mentioned—that these senators would wish to go no further than catastrophic coverage—is justified.

You've come down hard on the Adminisals. How do you feel about some of the proposed modifications to that plan, especially broader delegation of authority for cost containment to the states?

I frankly think that the proposed nine percent limit on hospital revenues—or any flat limit—wouldn't work very well. We tried cost controls some five or six years ago, and, with some exceptions, they were largely a failure. It is very very difficult to impose such a program on a specific area of the economy such as the health care sector.

If in some way you could control the inputs, as economists call them, then a program might be feasible. But a flat cap applied to all hospitals regardless of their costs would have more adverse effects than one can even imagine, so I'm very much opposed to it. Small rural hospitals especially would be jeopardized because they already operate on slim financial margins. This is why I favor the exemption from such a program for small hospitals, as provided in S. 1391, which was approved this session by the Committee in Human Resources.

I do share the Administration's view that hospital costs have gone up faster than is good for the general interest of the country and that something has to be done about it. We have to find areas in which efficiencies and economies can be realized without significantly sacrificing the nation's health care. Again, admittedly as a novice. I think that probably through the health planning process we can find some reasonable solutions, as we can in almost every area of our economy.

I have seen in my own state—although this tends to be more true of metropolitan areas than it does of rural areas—duplicative services as a result of hospitals competing with each other, areas in which we would be much better off having systems in which the hospitals would provide different kinds of care. Their services should complement each other, not compete with each other. I feel that the planning agencies have the potential to come up with some answers.

Whether administration of the proposed cost containment program were at the federal or state level, I still feel that a flat cap would fail.

What is your assessment of the impact of the passing law (P.L. 93–641) in the state of Iowa?

It's really too early to tell. We've had regional health planning agencies during the past several years that covered parts of Iowa, but we're not at all sure of what the new law is going to produce. Rationalization of the system is really needed, for all of the reasons I've been talking about, but I feel it's difficult at this stage to say what that will mean.

One thing I find disconcerting is wondering—even if we have required consumer representation, even if we give the Health Systems Agencies the money to carry out the job, even if they do get solid public support—what will happen to their plans in terms of final authority? Eventually the workable ideas will have to be implemented in some way, by someone, or all of the planning will have meant very little. To understand the situation, we have to develop better ways to implement planning.

At the moment, the entire question of whether national planning guidelines are merely guidelines or whether they are or could be absolutes is a highly controversial one. For example, if the bed-population ratio of 4.0 per thousand were rigidly adhered to, it would jeopardize existence of some 78 hospitals in my state alone. So, if such guidelines become more than rules of thumb, we immediately get into trouble. The system needed in Los Angeles is quite different from what is needed just 100 miles away, in Nevada. The same standards can't be applied.

Rarely can legislation have universal application without creating inequities, so we have to ensure reasonable application of the law while allowing for many variables. That's the hard part.

On the other hand, some critics of planning feel that too many options make the process impossible. Will you comment?

It's a very real fear. If you have two hospital boards in the same small metropolitan area, they may each want to provide similar services even though they're only four blocks apart. The question becomes one of finding the mean between such facts, and—to broaden the scope of the example—to push for a national health plan that serves people but at the same time doesn't mandate rules that are impossible to live by. We may never know precisely where that mean really is, but I feel it's what we have to continue to work for.

The whole dilemma is hardly new, but economic pressures are increasing to the point that a degree of federal intervention is inevitable in health care. We have some already, but the questions are, what is reasonable and to what extent is such intervention productive in terms of national health goals? How much can we leave to local decision, and how much can wisely be mandated from above?

We are going to have to do some keen listening to people who will be affected by the health care system. We will need constant oversight of what is taking place as a result of what we have enacted or opposed. It's part of the democratic process, and it is difficult but not impossible.

Will keen listening to consumers really help? Did your constituents provide guidance in your drafting of the rural health clinic bill?

Yes, I think so, though perhaps not in a technical sense. For example, we asked people what they thought of rural clinics, of physician's assistants and nurse practitioners, and whether they had confidence in the care they were receiving. Many, if not most, of our ideas came from people who are actually served by rural health clinics. During hearings we also leaned heavily on the knowledge of providers, who made up about half of the witnesses.

From consumers we learned that many of them don't know where to go for care. Some consumers are in need of primary care, but because of inconvenience or lack of transportation, they simply forego it. On the other hand, those people for whom a rural clinic with primary physicians and/or physician extenders has been established really use it. We concluded that most rural residents are predominantly concerned about the availability of primary and emergency care.

As you might expect, many consumers complained to us about the cost of care, but it is very hard to evaluate this criticism because of inflation throughout the economy, especially because we heard many complaints from older people who live on fixed incomes. They feel the brunt in all areas, not just in health care. If you look into housing for older people, for example, the question of cost is always of first concern.

I'd say that the most common complaint from the elderly with respect to health care costs is related to prescription drugs and the great drain they place on what little discretionary income the elderly have.

A last question, Senator. In your view, could programs of health educations make a contribution to improvement of health care in rural areas?

I know you don't mean that to sound like the obligatory question about motherhood, but of course, the answer is yes. At first, the cost of health education programming would mean a greater investment and therefore would result, when and if facilities become available in rural areas, in a greater use of services and an increase in expenditures for health care. In the long run, however, as in urban areas, we would hope that health education would prevent much illness and help substantially to reduce its recurrence. In any case, it is my intention to support health education as a primary component of the national health policy that in many ways seems to be taking shape.

PANAMA CANAL

Mr. PEARSON. Mr. President, after carefully examining the strong and persuasive arguments on both sides, after listening to the testimony of some of the expert witnesses before the Senate Foreign Relations Committee and visiting Panama, I have concluded that on balance ratification of the Panama Canal Treaties is in the best interests of the United States.

These treaties have been negotiated to replace the 1903 Hay-Bunau Varilla Treaty—a source of irritation in the relations between the United States and Panama since the day it was signed. It is important to mention that the 1903 treaty was negotiated and signed for Panama by a French citizen, Philippe Bunau-Varilla. No Panamanian ever saw the treaty before it was signed. Panama had no choice but to ratify the treaty, for failure to do so would have meant a return of the Colombian armed forces. The 1903 treaty created a canal zone which is still seen by most Panamanians as infringing upon their sovereignty. They feel that it would be analogous to another country controlling a stretch of land 10 miles long, running the full length of the Mississippi River. Panamanians have also been concerned that the 1903 treaty deprives them of the full benefit of their major natural resource—their geographic location.

Because the historical background is essential to an understanding of the issue, I am attaching a statement I issued on February 3, 1977.

Mr. President, while I feel sympathy for the sentiments of the Panamanian people, my greatest concern is the long-term security and foreign policy interests of the United States. In 1964, President Johnson announced the intention of the United States to negotiate a new treaty with Panama. Since then, each President, two Democratic and two Republican, has worked toward achieving this goal.

Presidents Johnson, Nixon, Ford, and Carter were persuaded that a new treaty relationship with Panama is more likely to serve long-term security and foreign policy interests of the United States. Above all, it would assure what is the essence of our interests—the efficiency, neutrality, accessibility, and security of the Panama Canal.

Americans are faced with a difficult choice. We do not know how well the new treaties will operate. We do not know if they take into account all contingencies. We are forced to make a choice between the uncertainty of the future against the unacceptability of the past.

The new treaties present us with risks, but Americans have always been willing to accept risks, provided they seem reasonable. I believe that these new treaties are as reasonable for our time as those risks that were assumed by Teddy Roosevelt in his time.

Another important consideration is how the new treaties would affect our relations with other Latin American countries. The other nations of Latin America have joined with Panama in urging a new treaty with the United States. In their eyes, the canal runs not just through the center of Panama but through the center of the Western Hemisphere. Indeed, the problem affects our relations with the entire Third World, since the nations of the Third World have made common cause on this issue. In March 1973, the United Nations Security Council would have passed a resolution favoring the Panamanian position on this issue had not the United States used its veto. The other nations of the world view our position on the canal as the last vestige of a colonial past which evokes bitter memories and deep animosities. The new canal treaties provide the United States with a unique position to improve our relations with virtually all of the countries of this hemisphere, and, indeed, the people of the entire developing world.

Mr. President, before arriving at my decision to support these treaties, I listened very carefully to the opponents and to the arguments that they made. I read with great interest the vast volume of mail from my constituents in Kansas. I must admit that I, too, have been deeply troubled by many of the issues raised by opponents of the treaties. Primarily these deal with the sovereignty issue, the economic questions, the possible need for a new sea level canal, the security questions and the role of Omar Torrijos.

Mr. President, many of my constituents have written to me and asked, "We bought it, we paid for it, why give it away?" "If we give away Panama, what is to prevent us from giving away Alaska or Louisiana?"

To answer those questions, one must look at article 3 of the Hay-Bunau-Varilla treaty in which the U.S. was granted all "rights, power, and authority within the zone," as "if it were sovereign." The United States never claimed sovereignty over the Canal Zone. In fact, we continue to pay rent for the use of the Zone.

Secretary of War William Howard Taft, the future President and later Chief Justice of the Supreme Court, studied the question of sovereignty further and declared,

> The truth is that while we have all the attributes of sovereignty in the construction, maintenance, and protection of the canal, the very form in which these attributes are conferred in the treaty seems to preserve the

titular sovereignty over the canal zone in the Republic of Panama.

The United States did not purchase the Canal Zone as it did Alaska and Louisiana. The Hay-Bunau-Varilla treaty provided for a payment of $10 million to Panama for treaty rights, not territory. In the Louisiana Purchase of 1803, France ceded to the United States, "forever and in full sovereignty the territory with all its rights and appurtenances." When the United States purchased Alaska, it received all rights, franchises and privileges previously belonging to Russia. In both cases, the United States received all public lands and all the inhabitants became U.S. citizens. In neither case did the United States have to pay a continuing annuity or rent or assume other obligations after taking over the territory. In addition, it should be mentioned that children born in Alaska or Louisiana are automatically U.S. citizens, while children born in the Canal Zone do not automatically become American citizens.

Mr. President, let me turn to some of the economic considerations involved. The Panama Canal Treaty changes the basic economic assumptions under which the canal has historically been operated. For the first time in history the new treaty gives long overdue recognition to the fact that the canal is Panama's primary economic resource. While Panama has benefited from the presence of the canal through salaries paid Panamanian nationals, direct purchases by the Canal Company and establishment of private, commercial, and service industries related to the canal, the direct payment to Panama for use of the canal was held to a minimum, presently only $2.3 million annually.

The important point to consider is that the treaty does not allocate one dime from the American Treasury to go to Panama. The entire payments to Panama specified in the treaty are all to come from canal revenues.

The United States has been operating the canal "at cost." We have deliberately kept the canal's toll rates low. In effect, the United States has been subsidizing the shippers of the over 70 nations which use the canal. The canal could easily absorb the toll increases that might be needed under the new treaty. These increases would provide sufficient revenue to pay Panama the annuities pledged in article XIII.

Toll increases would have less than a 2-percent effect on the total shipping costs of items that transit the canal. The total effect on the cost to the American consumer would be even smaller. Thus, I agree with the Foreign Relations Committee which concluded that the economic effect of the new treaty on the total U.S. economy would be minimal.

Mr. President, I have received a number of letters questioning the additional economic package to Panama. This additional assistance program is not part of the Panama Canal treaties. It will be considered by separate congressional procedures. The program is based upon the desire for greater cooperation between the United States and Panama, in light of the new partnership arrangements which will result from the treaty. It must also be pointed out that this assistance program consists of loans, not grants. The bulk of the program is supported by money lent by the Export-Import Bank for American exports to Panama. In addition, this section will help U.S. manufacturers, and it will not cost the American taxpayer any money.

Mr. President, I am concerned about the future capacity of the Panama Canal and the possible necessity to enlarge it or to build a new canal. The canal is truly the "moonshot of the early 20th century." As David McCullough wrote in his excellent book, "The Path Between the Seas,"

> The creation of a water passage across Panama was one of the supreme human achievements of all time, the culmination of a heroic dream of 400 years and of more than 20 years of phenomenal effort and sacrifice . . . Primarily the canal is an expression of that old and noble desire to bridge the divide, to bring people together. It is a work of civilization.

The canal is a masterpiece of design and construction. The locks have performed well from the time they were opened. Ships now transit the canal at a rate of over one per hour, every hour of the day during the year.

Ships of a size that were never dreamed of when the canal was built are now capable of transiting the canal. However, we are now building larger and larger ships, and it may become necessary to build a new canal in the future.

Section 2 of article XII of the Canal Treaty prevents the United States from building a new sea level canal in any other place other than Panama. On the other hand, it prevents Panama from negotiating with any other power to build a canal through its territory.

Mr. President, this section has received much criticism, but it was added at the insistence of the United States. President Johnson appointed the Atlantic-Pacific Interoceanic Canal Study Commission, headed by former Secretary of the Navy, Robert Anderson. In 1970, the Commission filed its voluminous report, concluding that the best route for a sea level canal would be in Panama. We did not wish Panama to negotiate with other powers to build such a canal. Thus, our negotiators insisted that the treaty include the provision giving us the first option on a sea level canal in Panama. Now, if the treaty is approved, Panama cannot allow another country to build such a waterway unless the United States grants permission. In return for this concession, we agreed not to build a canal in any other country other than Panama, which we had no intention of doing in any case.

Mr. President, I also am concerned about the defense of the canal. The defense of the Panama Canal consists of two components: internal security and external defense. Both are presently the responsibility of the U.S. Government. Internal security is primarily concerned with countering sabotage and terrorist activities. Under the new treaty the internal defense of the Panama Canal will be greatly enhanced by our cooperating with the Government of Panama.

The external defense of the canal will remain the primary responsibility of the United States during the balance of this century. Under the new Panama Canal Treaty, the Panamanian Guardia Nacional and appropriate U.S. commanders will develop plans in concert to provide for mutual defense. As past and present members of the Joint Chiefs of Staff have repeatedly pointed out, the capacity to defend the Panama Canal would be improved through cooperation with the Government of Panama. After the year 2000, the Neutrality Treaty provides for a canal open to ships of all nations in times of peace or war. However, it specifically provides that the United States and Panamanian Naval ships shall transit expeditiously and without impediments or preconditions.

Our ability to defend the canal, and our rights to do so, were further strengthened by the "Statement of Understanding" by President Carter and Omar Torrijos, which are now amendments to the treaty.

Although we can never be sure that no one will ever attack the canal, we can be sure that the United States will always be prepared to defend it.

Mr. President, I must admit that the aspect of these treaties which troubles me most is that we had to deal with the government of Omar Torrijos. I am troubled that Torrijos is a dictator. I am troubled that Panama's "human rights policies" leave a lot to be desired.

The treaties do not accomplish the impossible. They will not restructure the Government of Panama in our own image; they will not guarantee respect for human rights; they will not prevent drug smuggling through Panama into the United States; they will not insure that every Panamanian Government official will agree with the ideological line of the United States. But, while I wish the United States did not have to deal with Torrijos, we cannot pick and choose the heads of governments of other countries. We deal with the leaders of many countries, even when we disagree with them. We should also not forget that the United States has been committed to a new Panama Canal Treaty since 1964, 4 years before Torrijos came to power.

Although we may not approve of the Torrijos regime, it is important to note that the recent plebiscite in Panama approved the treaties by a majority of over 2 to 1. Whatever the Panamanian people may think of Torrijos, they are strong in their opposition to the continuation of the Hay-Bunau-Varilla Treaty. As William Jordan, our Ambassador to Panama, testified before the Foreign Relations Committee,

> This is an issue—probably the only issue—which brings Panamanians together in a kind of national unanimity that is rare in history. . . . Talk with Panamanians. You will find that whether they are rich or poor, city or campesinos, university graduates or day laborers, they are as one in their dream of a Panama that is united and sovereign, a country that is no longer divided in half by a foreign enclave.

In sum, Mr. President, I support the new treaties because they are in the best interests of the United States. They will make the canal easier to operate and easier to defend. They will assure for the

United States continued access to the canal, for both military and commercial purposes. They will advance our position throughout Latin America, and, in many important respects, throughout the world. It is a signal to the world community that few actions can be taken independent of the welfare of others.

Finally, they will fulfill the expectations of every American that this country will continue to act as a world leader, proud of its heritage and willing to accept the challenges of the future. As Theodore Roosevelt stated,

The important thing is the next step. It often happens that the good conditions of the past can be regained not by going back, but by going forward. We cannot recreate what is dead; we cannot stop the march of events; but we can direct this march, and out of the conditions develop something better than the past knew.

Mr. President, I ask unanimous consent that the statement be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

HISTORICAL BACKGROUND ON THE PANAMA CANAL

To understand the present situation, it is necessary to review the events that led up to the Hay-Bunau-Varilla Treaty of 1903 and see how it came about, for it is still at the heart of the argument. Americans had been interested in a Panama Canal as early as 1826, when Secretary of State Henry Clay came out in favor of building such canal. In 1850, the United States and Britain agreed to the Clayton-Bulwer Treaty stating that both nations would cooperate in the construction of an isthmian canal; they also bound themselves never to fortify or exercise exclusive control over such a waterway.

From 1881 through 1889, the French attempted to build a canal through Panama. The French ran into insuperable medical, engineering and financial problems. More than 20,000 workers died, mostly from yellow fever. In one stretch of the Canal, the walls kept caving in as fast as they were dug. Besides the tremendous actual cost of the construction, the company building the canal was rocked by charges of high-level corruption.

The United States emerged from the Spanish-American War a Caribbean as well as a Pacific power. This changed status brought about a remarkable resurgence of interest in an isthmian canal. Although the United States had built a railroad across the isthmus, such a water passage now seemed imperatively necessary if the American people were to take full advantage of their new trade opportunities in the Pacific, and at the same time, unfeather their fleet. During the war, the United States battleship *Oregon* had been ordered from Puget Sound to Cuban waters. It had to sail almost 13,000 miles around Cape Horn to get from the Pacific to the Atlantic; had there been a canal, the ship would have had to travel only 4,600 miles.

The first obstacle in the path of the building of the canal was diplomatic, rather than physical. In November 1901, two months after the assassination of President McKinley, Britain agreed to give up its claims to the United States. The second Hay-Pauncefote Treaty allowed the United States a free hand to build, control and fortify an isthmian canal.

In 1899, Congress appointed the Walker Commission to study whether it would be better to build the canal in Panama or Nicaragua. In November 1901, the Commission reported in favor of the Nicaraguan route, primarily on the grounds of lower costs. On January 9, 1902, the House of Representatives voted in favor of a Nicaraguan waterway (308 to 2). Shortly thereafter, Congress changed its mind and voted to support the Panamanian route, largely as a result of the efforts of William Cromwell and Phillipe Bunau-Varilla. Cromwell was a member of the law firm of Sullivan and Cromwell, John Foster Dulles' law firm. The firm represented the railroad that the Americans had built across the isthmus. Bunau-Varilla represented the new Panama Canal Company successor to the French Canal Company.

Bunau-Varilla and Cromwell formed an alliance to convince the United States to opt for a canal through Panama; their price was criginally $109 million, but this was quickly reduced to $40 million. Cromwell was most influential, especially as he had donated $60,000 to the Republican National Committee. The Committee Chairman, Senator Mark Hanna, changed his support to a Panmaa route shortly after this. Bunau-Varilla astutely lobbied for the Panama route by sending each Senator a letter with the postage stamp showing volcanic action in Nicaragua. In June 1902, Congress approved the Panama route.

In 1903, Panama was still part of Colombia. The Hay-Herran Treaty in January 1903, gave the United States the Canal Zone, six miles wide, for a cash payment of $10 million and an annual payment of $250,000 to Colombia. The new Panama Canal Company was to receive $40 million for their rights and property and the trans-isthmus Panama railroad.

In August 1903, Colombia rejected the pact, due to insufficient funds and the possibility that it seriously impinged upon Colombian sovereignty in Panama. Rocsevelt referred to the Colombians as "insufficient bandits," "foolish and homicidal corruptionists", "contemptible little creatures", "jack rabbits", and "cat rabbits". He stated that "the blackmailers of Bogota . . . should not be permitted to permanently bar one of the future highways of civilization."

Bunau-Varilla was convicted that the time was right for Panama to revolt against Colombia. The center of the revolutionary activity was Room 1162 of the Hotel Waldorf Astoria in New York City. The revolutionists raised a "patriot" army consisting of 500 bought" Colombian troops, in addition to members of the local fire department. The leader of the revolt was Dr. Manuel Ambador, a physician who had worked for Cromwell's railroad. Dr. Amador was presented with $100,000, supplied by J. P. Morgan, a secret code, a Declaration of Independence, a draft of the new nation's Constitution, and the soon to be born Republic's flag, thoughtfully designed and sewn by Bunau-Varilla's wife. On November 2, 1903, the *U.S.S. Nashville* reached Colon, Panama. A day later, the revolt took place and on November 4, Panama declared its independence. An hour after the news reached Washington, the new govermnent was recognized.

Bunau-Varilla, although a French citizen, represented the Republic of Panama in Washington. Hay sent him a draft treaty similar to the Colombian one. Two days later, Bunau-Varilla sent one back more disadvantageous to Panama, in the hope that the Senate would approve it. A day later, and only a few hours before representatives from Panama came to negotiate a treaty, the new pact was signed. Hay admitted we shall have a treaty vastly advantageous to the United States, and we must confess, not so advantageous to Panama.

The Hay-Bunau-Varilla Treaty gave the United States the right to the Canal in perpetuity—instead of to the year 2003, which the Colombian Treaty had called for. Article II afforded the United States all the rights, power and authority within the zone . . which the United States would possess and exercise if it were the sovereign of the Territory.

The Panamanians were disappointed with the terms and talked of rejecting the Treaty. They were warned that Colombia might try and overthrow the new government and that the United States would not help unless Panama agreed to the Treaty. With the news that Colombian gun boats were on their way to Panama, the Panamanian government ratified the Treaty in February 1904.

The European and Latin American press criticized Roosevelt, who defended himself by claiming a "mandate from civilization." In 1911, Roosevelt boasted "I took the Canal Zone and let Congress debate; and while the debate goes on, the Canal does also".

In 1914, a Treaty was signed with Colombia in which the United States "expressed sincere regret" for the Panama business and agreed to pay a $25 million sum as compensation for the loss of Panama. Roosevelt's friends in the Senate, notably Henry Cabot Lodge, were able to defeat this Treaty. In 1921, a new Treaty paying Colombia $25 million was accepted.

BRIEF ANALYSIS OF THE PANAMA CANAL ZONE TREATY NEGOTIATIONS

In 1903, the United States and the Republic of Panama signed the Hay-Bunau-Varilla Treaty which granted the United States a strip of land ten miles wide and fifty miles long for the purpose of constructing, operating, maintaining and defending a canal between the Atlantic and Pacific Oceans and which gave the United States rights as "if it were the sovereign" in perpetuity on Panamanian soil.

The events leading up to the 1903 Hay-Bunau-Varilla Treaty are important in order to gain a full understanding of U.S.-Panamanian relations. As President Theodore Roosevelt himself boasted in 1911, "I am interested in the Panama Canal because I started it. If I had followed the traditional conservative methods, I would have submitted a dignified state paper of probably 200 pages to Congress and the debates on it would still have been going on yet; but I took the Canal Zone and let Congress debate; and while the debate goes on the Canal does also."

The basic Treaty was revised twice. The 1936 Hull-Alfaro Treaty cancelled U.S. guarantees of Panamanian independence from Colombia and the right of the U.S. to intervene in certain internal Panamanian affairs. It also increased the annual U.S. payment to Panama from $250,000 to $430,000. In 1955, the Eisenhower-Remon Treaty transferred certain U.S. rights and properties to Panama and again increased the annual payment, this time to $1.93 million.

From the Panamanian point of view the existence of a United States controlled "enclave" in the heart of their sovereign territory has become a major affront to national dignity and national sovereignty. It is virtually the only issue capable of uniting all Panamanians. Among the major grievances voiced by Panama are the existence of a United States "government within a government" in their territory, the "overwhelming presence" of U.S. civilian and military personnel and the inequitable sharing of the economic benefits derived from the Canal.

In the past, this nationalist sentiment has erupted periodically and it culminated in serious demonstrations in 1959 and again in 1964. Recognizing the vulnerability of the situation, President Johnson committed the U.S. to bilateral negotiations in 1964. By 1967, three draft treaties had been agreed upon; one, joint U.S.-Panamanian control of the Canal; two, joint construction of a new, sea-level canal; three, U.S. defense of the old and the new canal for a specified period of time. Action was never taken by either nation, attributed in part to the fact that both nations were then involved in major election

campaigns. In August 1970, the government of General Omar Torrijos, in power as a result of a military coup in 1968, formerly rejected the draft treaties.

Talks resumed in 1971. In March 1973, the U.S. vetoed a U.N. Security Council resolution referring to a new Panama Canal Treaty which would "guarantee full respect for Panama's effective sovereignty over all its territories" on the grounds that the Treaty negotiations were a bilateral matter. Shortly thereafter, serious negotiations were resumed. In February 1974, Secretary of State Henry Kissinger and Panamanian Foreign Minister Juan A. Tack signed an agreement of principles as the basis for the formal negotiations. The eight principles called for an entirely new treaty with a fixed termination date, thus ending the concept of perpetuity; the return to Panama of the territory in which the Canal is located; a "just and equitable" share for Panama of the benefits from the Canal; a role for Panama in administering the Canal during the life of the new Treaty and total responsibility for its operation upon termination of the Treaty; joint protection and defense of the Canal by the two countries; the rights necessary for the United States to regulate the flow of ships through the Canal and to operate, maintain and defend it; and provisions for the future enlargement of the waterway.

PROPOSED ARMS SALES

Mr. SPARKMAN. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $25 million or, in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulated that, in the Senate, the notification of proposed sales shall be sent to the chairman of the Foreign Relations Committee.

In keeping with my intention to see that such information is immediately available to the full Senate, Mr. President, I ask unanimous consent to have printed in the RECORD at this point the notification I have just received. A portion of the notification, which is classified information, has been deleted for publication, but is available to Senators in the office of the Foreign Relations Committee, room S-116 in the Capitol.

There being no objection, the notification was ordered to be printed in the RECORD, as follows:

DEFENSE SECURITY ASSISTANCE AGENCY AND DEPUTY ASSISTANT SECRETARY (SECURITY ASSISTANCE), OASD/ISA,
Washington, D.C., February 2, 1978.

In reply refer to: I-24817/77ct.

Hon. JOHN J. SPARKMAN,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding under separate cover, Transmittal No. 78-10, concerning the Department of the Air Force's proposed Letter of Offer to the United Kingdom for major defense equipment, as defined in the International Traffic in Arms Regulations (ITAR), estimated to cost $40 million.

Sincerely,

H. M. FISH,
Lieutenant General, USAF, Director Defense Security Assistance Agency, Deputy Assistant Secretary (ISA), Security Assistance.

TRANSMITTAL NO. 78-10

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b) of the Arms Export Control Act—

(i) Prospective Purchaser: United Kingdom.

(ii) Total Estimated Value:
Major Defense Equipment [1]—$40.0 million.
Other—$0.0 million.
Total—$40.0 million.

(iii) Description of Articles or Services Offered: [Deleted].

(iv) Military Department: Air Force.

(v) Sales Commission, Fee, etc. Paid, Offered or Agreed to be Paid: None.

(vi) Date Report Delivered to Congress:

PANAMA CANAL TREATIES

Mr. GRIFFIN. Mr. President, being the lone dissenter on the Foreign Relations Committee, which has favorably reported the Panama Canal treaties by a vote of 14 to 1, I have filed minority views as part of the committee's report to the Senate.

I ask unanimous consent that a copy be printed in the RECORD.

There being no objection, the views were ordered to be printed in the RECORD, as follows:

MINORITY VIEWS OF SENATOR ROBERT P. GRIFFIN

This has been one of the most difficult issues I have confronted in my 21 years in the Congress. I have long recognized that a major revision in our treaty relationship with the Republic of Panama is desirable and could be in the interests of both countries.

I recognize the importance of maintaining close and friendly relations with the people of Panama and with the people of other nations throughout the hemisphere. I am deeply conscious of, and concerned about, the impact that outright rejection of the treaties could have on our relations in the hemisphere.

Sometimes political responsibility imposes upon public officials the necessity of choosing among several undesirable courses of action. That may seem to be the dilemma that we face with these treaties.

After months of agonizing consideration, I have concluded that I cannot consent to ratification of the treaties before us. I think they are fatally flawed in a number of substantive respects. In my view they do not adequately protect the interests of the United States or of other nations that depend upon the Canal.

Furthermore, I believe the defects are so basic and so serious that they cannot be remedied by trying to rewrite the treaties on the Senate floor.

Although these treaties should not be ratified, I believe there is a course open to the Senate other than outright rejection. Despite all of his knowledge about the history of the Canal, or perhaps because of it, David McCullough, the distinguished author of *The Path Between the Seas* acknowledged before the Senate Foreign Relations Committee that he had experienced great difficulty in reaching a personal decision about the merit of these treaties. Although he finally decided, on balance, to support the treaties, when he appeared before the Committee he made this profound and perceptive point:

* * * if we say "yes" to these [treaties] in a gruding way * * * [because we think] we have painted ourselves into a corner and we have to get out * * * [that would be] unfortunate * * * [and] just as wrong, and in some ways a greater mistake than to say "no" in the spirit of saying "no" because [it should be] done right—because we don't want to have to come back in 15 or 20 years and have to do it all over again.[1]

Under the Constitution, of course, the Senate's role is one of "advice and consent." Instead of consenting to these treaties, I believe it would be a wiser course for the Senate to exercise only its "advice" authority. In other words, without rejecting the treaties outright, the Senate in this instance ought to advise the President to send the negotiators back to the drawing boards with instructions to persist until a more acceptable treaty can be fashioned.

As I said in a meeting of the Foreign Relations Committee, I respect our two Senate leaders and my colleagues who have reached a contrary conclusion—those who are convinced in their own minds that these treaties do serve the best interests of the nation. I salute them for having the courage of their convictions, because I believe with Edmund Burke that a senator owes his constituents his judgment and should not sacrifice it to public opinion alone.

However, I also believe that when the call on the merits of an issue is as close as this is, or as close as I perceive it to be, the judgment of the people ought not to be taken lightly. Very honestly and frankly, I have come to the conclusion that in this situation, as so often is the case, the people are right.

I. THE CANAL AND U.S. SECURITY

Military experts may disagree as to the advisability of ratifying these treaties, but there is general agreement that the Panama Canal is vital to the security of the United States.

Indeed, as the Soviet Navy continues to grow larger and larger, while our own Navy shrinks, the Canal becomes more—not less—important.

If access to the Canal were denied to U.S. naval vessels, the trip from ocean to ocean would involve an 8,000 mile journey around Cape Horn—an extra 17 days for a warship traveling at 20 knots.[2]

In 1968 the United States had 976 naval ships. Today that figure has been cut by more than half—to 459. In 1974, when the Soviet fleet was smaller than it is today, our Joint Chiefs of Staff asserted that we need more than 800 ships to "support our current national defense strategy."[3]

Furthermore, as far as U.S. naval strength is concerned, it appears that things will get worse before they get better. Writing in the January 4, 1978, issue of the *Baltimore Sun*, Charles W. Corddry wrote:

The [Carter Administration] request for shipbuilding funds in fiscal 1979 is to be cut 20 per cent below the $5.8 billion that Congress provided for this year after doing some pruning of its own. * * * The Navy goal of expanding the fleet from its present 459 ships to more than 500 in the early 1980s now may be as elusive as the onetime target of 600 became. Officials acknowledge that the fleet will shrink further before there is an upturn in numbers.

In contrast, the Soviet Navy by 1975 had grown to 1,200 vessels—although, admittedly, their ships do not compare with ours in tonnage or combat effectiveness.[4]

The sobering fact is, however, that the rapidly expanding Soviet Navy raises real concerns about future control of the maritime "choke points" of the world—one of which is the Panama Canal.[5]

As Admiral Thomas Moorer, former Chairman of the Joint Chiefs of Staff, has testified, we do not have a two-ocean Navy. "A large majority of our war and contingency plans are totally infeasible unless one assumes that full and priority use of the canal will be available,"[6] said Admiral Moorer.

It's true that our aircraft carriers, of which we have 13, are too large to transit

[1] As included in the U.S. Munitions List, a part of the International Traffic in Arms Regulations (ITAR).

Footnotes at end of article.

the Canal. But the United States has a Navy, that is effective in both major oceans precisely because the rest of the Navy, particularly supply and support ships for the aircraft carriers, are able to shuttle between the oceans through the Canal.

Of course, we can only speculate about the real intentions of the Soviet Union and its Caribbean proxy, Cuba, with respect to the Canal. But few would argue against the proposition that it will be a tragic blow to U.S. and free world security if the Panama Canal should fall into Communist hands.

Since as far back as the 1959 Panama riots, there has been reason for concern about the covetous eye of Castro. For example, the *New York Times* wrote then about the "obvious influence Cuban revolutionaries were exerting on crowds that eventually formed mobs." The *Times* noted:

Banners and insignia were largely dedicated to endorsement of Premier Fidel Castro and the Cuban revolutionary movement. Two Cuban newsmen were continuously in the forefront of the most violent group, urging it on toward the Canal Zone.[7]

Evidence of Cuban influence may have been less obvious in recent years, but it also is true at the moment Castro has his hands full in Africa.

On June 8, 1977, four of the nation's most respected naval leaders (Retired Admirals Robert Carney, George Anderson, Arleigh Burke and Thomas Moorer)—each of whom has served as Chief of Naval Operations—wrote to President Carter and forcefully expressed concerns about the treaties then being negotiated. They wrote, in part:

* * * Contrary to what we read about the declining strategic and economic value of the Canal, the truth is that this interoceanic waterway is as important, if not more so, to the United States than ever.

* * * * *

The existing maritime threat to us is compounded by the possibility that the Canal under Panamanian sovereignty could be neutralized or lost depending on that government's relationship with other nations. We note that the present Panamanian government has close ties with the present Cuban government which in turn is closely tied to the Soviet Union. Loss of the Panama Canal, which would be a serious setback in war, would contribute to the encirclement of the United States by hostile naval forces, and threaten our ability to survive.[8]

Adequacy of the proposed treaties

During the 1976 presidential campaign, candidate Jimmy Carter told the voters:

I would *never* give up complete control or practical control of the Panama *Canal Zone*. (Emphasis supplied)[9]

The treaties negotiated shortly after President Carter assumed office, and which now are before the Senate, not only turn the Canal over to Panama in the year 2000, but also they would turn practical—if not complete—control of the Canal *Zone* over to Panama *30 months after the treaties became effective*. The treaties become effective six months following ratification, so Panama would take effective control of the Canal *Zone* 36 months, or three years, following ratification.

If we accept the decision to turn the Canal over to Panama in the year 2000, still our security interests require, in my view, that the treaties be rewritten to include certain fundamental safeguards:

We need more control and jurisdiction between now and the year 2000 to insure that we will be able *effectively* to operate and defend the Canal.

We must have the right, in *unambiguous* terms, beyond the year 2000 to use military force, if necessary, to protect the neutrality of the Canal against any threat—even a domestic Panamanian threat.

We need to maintain our option to negotiate for construction of a second (perhaps sea level) and *outside* of Panama, should that prove necessary because of Panamanian intransigence, or desirable because of economic or security considerations.

The Panama Canal Treaty

Of course, under the existing 1903 Treaty, the United States exercises within the 10-mile-wide strip of land known as the Panama Canal Zone:

* * * [A]ll the rights, power and authority * * * which the United States would possess and exercise if it were the sovereign of the territory * * * to the entire exclusion of the exercise by the Republic of Panama of any such sovereign rights, power or authority.[10]

Conceding that the United States is not sovereign—but has all the rights, power, and authority *as if* it were sovereign—the point is that such control is important and, in my view, essential to the effective operation and maintenance of the Canal by the United States between now and the year 2000.

Under the proposed treaty, the United States would have the responsibility to operate the Canal during the next 23 years with employees—U.S. and Panamanians—who would be subject (even while performing their duties with respect to the Canal) to the laws, the police and the courts of Panama.[11]

Instead of solving problems, this arrangement is pregnant with the seeds of acrimony and conflict.

Under the treaty, persons employed by the Panama Canal Commission would be "employees of the United States"; they would have the right to be represented by unions and to "negotiate collective contracts."[12] If disputes arose—and that would not be unusual in labor relations—how would they be resolved?

Under the treaty arrangement, the Commission itself would be immune from suit in the courts of Panama, and could be sued only in the U.S. District Court in Louisiana—something of an inconvenience for employees in Panama who claim back pay for discrimination or who have any other claims against the Commission.[13]

How would the Commission enforce legal obligations undertaken by others—a union, for example? Apparently, such matters would be left to the Panamanian courts. Would they apply United States law or Panamanian law?

Panamanian civil and criminal jurisdiction would extend throughout the strip now known as the Canal Zone. One exception is provided with respect to criminal jurisdiction applicable to our military personnel who would be stationed on the four U.S. bases that would remain after ratification.[14] However, even that exception would be subject to the following provision:

* * * (5)(c)(iii) when *charged* with murder, rape, robbery with violence, trafficking in drugs, or *crimes against the security of the Panamanian State*, the accused *shall* be handed over to Panamanian authorities upon *their* request, or if already in their custody, shall remain with them. (Emphasis supplied)[15]

It's no wonder that many U.S. military and civilian personnel who now work in the Zone are deeply concerned about this and other parts of the arrangement.

Outside the boundaries of our four remaining military bases, of course, U.S. military and civilian personnel would be subject at all times to arrest and prosecution by Panamanian police in Panamanian courts.[16]

We are assured by the State Department that arrested U.S. personnel in Panama would be protected by a "status of forces" type agreement set forth in Annex D, which is similar to agreements we have with Japan and certain NATO countries where U.S. forces are stationed."[17]

Annex D does recite that such U.S. citizens charged with crime in a Panamanian court would have the right to a "prompt and speedy trial," protection against involuntary confessions, self-incrimination, and the like. But the decision on what constitutes a "speedy trial" or an "involuntary confession" will be left, once again, to the Panamanian courts.

For years, Soviet citizens have been "guaranteed" human rights by the Constitution of the Soviet Union. The only problem, of course, is that officials of the Soviet Union pay no attention to them.

That allusion would be unfair and out of order if the Panamanian Government under General Torrios had a good record of observing human rights in Panama. However, despite the fact that similar "guarantees" are set forth in the Constitution of Panama, last year the Torrijos government had the worst human rights record of any country in this hemisphere, except Cuba.[18] Indeed, in this respect, Panama was rated by Freedom House as being about par with the Soviet Union.[19]

Our "status of forces" agreements in other situations have worked reasonably well, perhaps because the host country has wanted the continued presence of our U.S. troops. Obviously, if a NATO ally didn't appreciate our military presence, and asked us to leave—we would.

In contrast, our troops are—and would be—stationed in the Canal Zone because we have a treaty right to protect the Canal. Under the new treaty—at least in theory—our right to have troops there until the year 2000 would not depend on the continuing permission of General Tirrijos or any successor.

In that kind of setting, it seems to me there is reason for concern about the adequacy of the protection in Annex D accorded U.S. citizens.

In a country where anti-Americanism has a proven political value,[20] and where courts may be heavily influenced by the ruler in power, one is left to wonder whether such a treaty arrangement would be used as the basis for harassing U.S. military and civilian personnel to force them out of the country.

Because many U.S. citizens (as well as some black Panamanians) who now work in the Canal Zone are deeply concerned about their human rights if the new treaty should be ratified, morale among such employees is "very poor."[21] Many of these employees indicate that they will leave if these treaties are approved; one recent, poll indicated that more than 60 percent of U.S. civilians in the Zone consider themselves in that category.[22]

According to Gen. H. R. Parfitt, Governor of the Canal Zone, there are at least 1,000 highly skilled U.S. citizens whose services are absolutely essential and for whom Panamanian replacements could not be trained in the short term. In this category are 210 ship pilots, all but two of whom are U.S. citizens.[23]

In view of the great importance of keeping the Canal open, it would be ironic as well as tragic if the Senate, by approving these treaties, should trigger an exodus that closes down the Canal.

The Neutrality Treaty

The "primary responsibility" of the United States to protect the Panama Canal would end with expiration of the Canal Treaty on December 31, 1999. After that date, only the second treaty—the Neutrality Treaty—would remain in effect.[24]

Prior to the year 2000, while both treaties would be in effect, deficiencies in the Neutrality Treaty provisions for Canal security would

Footnotes at end of article.

be masked by the stronger language of the Panama Canal Treaty.

However, since the Neutrality Treaty would stand alone after termination of the Canal Treaty, its provisions must be very carefully examined now.

One key provision is Article One of the Neutrality Treaty, which recites:

The Republic of Panama *declares* that the Canal, as an international transit waterway, shall be permanently neutral * * * (Emphasis supplied)

Obviously, this is only a unilateral declaration by Panama—rather than a joint commitment by the two countries—and it would be difficult to base any U.S. defense move after the year 1999 on this language.

Perhaps a U.S. role after 1999 can be inferred—but certainly it was not spelled out—in the language of Article IV, which reads:

The United States of America and the Republic of Panama agree to maintain the regime of neutrality established in this Treaty, which shall be maintained in order that the Canal shall remain permanently neutral, notwithstanding the termination of any other treaties entered into by the two Contracting Parties.

This language, while obviously vague and ambiguous, is seized upon by many who promote the treaties as a guarantee that "* * * the United States will have the permanent right to defend the Canal from any threat." [25]

The vague language of Article IV is further qualified by Article V, which reads:

After the termination of the Panama Canal Treaty (in 1999), *only* the Republic of Panama shall * * * maintain military forces * * * within its national territory. (Emphasis supplied)

Surely, a principal purpose of any treaty ought to be to prevent or settle disagreements, not create them. If the parties disagree from the outset on the meaning of important provisions, a treaty is doomed to failure—even if it is ratified.

On the vital issue of the right of the United States under Article IV to intervene and defend the neutrality of the Canal with military force, if necessary, major disagreements have existed between U.S. and Panamanian negotiators, and those disagreements have continued even after the signing of the treaties.

We owe it to ourselves—and to our children who would have to suffer the consequences of our mistakes—to understand the depth of these disagreements and their grave implications for the future if left unresolved.

Accordingly, it is not only instructive but essential to scrutinize and compare carefully the public statements of American and Panamanian officials on this crucial point.

For example, on July 29, 1977, chief Panamanian negotiator Romulo Escobar told a Panama City press conference:

* * * we can tell you that the draft neutrality pact between our two countries does not make the U.S. a guarantor of * * * neutrality * * * U.S. intervention within the neutrality pact would take place only if another power attacked Panama.[26]

On August 19, after negotiations were completed and the treaties had been initiated, Dr. Escobar reported to the Panamanian National Assembly:

We did not give in either to the Americans' insistence that the United States and Panama jointly declare the neutrality of the Canal. We said the declaration of the Canal's neutrality was an act relating to Panama's sovereignty, and that it would have to be a unilateral declaration. * * * [W]ith the neutrality pact, we are not giving the United States the right of intervention. What we are giving is an assurance that the Canal will be permanently neutral. * * * [27]

When the Committee began hearings on these treaties on September 26, 1977, this interpretation was called to the attention of the U.S. negotiators and the Secretary of State. The following exchange transpired:

Senator CASE. A point has been made that the Panamanian negotiators are telling the Panamanians that this does not give the United States the right to intervene in protecting the neutrality of the canal. * * * I wish you would corroborate me in this as to our right to intervene as opposed to our power to do it.

[Ambassador Linowitz nods affirmatively.]

Secretary VANCE. * * * I think our right to do so is clear, and there can be no question about it.[28]

Later, when asked about the Escobar statement, Ambassador Linowitz told the Committee:

We know of these statements. We are disturbed by them. We have discussed them with our Panamanian colleagues. I don't think you will hear such statements again.[29]

The Ambassador's words were not prophetic. Only four days later another member of the Panamanian negotiating team, Carlos Lopez-Guevara, said on Panamanian television:

I have heard it said that the United States has the right to intervene in Panama after the year 2000. It is sad to see highly responsible officials in the United States say that this neutrality treaty grants the right of intervention. It is sad to note this inconsistency * * * because there is nothing in this treaty to serve as a basis for such a claim.[30]

An effort to end some of the ambiguity was made on October 14, 1977, when President Carter and General Torrijos issued an unsigned Joint Statement of Understanding, which read in part:

Under the Treaty [of Neutrality] * * * Panama and the United States have the responsibility to assure that the Panama Canal will remain open and secure to ships of all nations. The correct interpretation of this principle is that each of the two countries shall, in accordance with their respective constitutional processes, defend the Canal against any threat to the regime of neutrality, and consequently shall have the right to act against any aggression or threat directed against the Canal or against the peaceful transit of vessels through the Canal * * *

This does not mean, nor shall it be interpreted as a right of intervention of the United States in the internal affairs of Panama. Any United States action will be directed at insuring that the Canal will remain open, secure and accessible, and it shall never be directed against the territorial integrity or political independence of Panama.[31]

While clearly an improvement over the actual treaty text, the Joint Statement itself was not without its own ambiguities.

As if to emphasize this, on the day the statement was released, General Torrijos provided an interpretation not inconsistent with the earlier position taken by Dr. Escobar. According to the *Washington Star:*

Torrijos left Washington yesterday afternoon. In a brief airport news conference, the general said through an interpreter that he did not agree to anything that would permit a foreign country to intervene in Panama. Any leader who would permit such a thing, he continued, should not be trusted.

Torrijos indicated that the United States had a right to defend the canal if attacked by a great power.

Linowitz was later asked about this qualification, which had been attributed to Torrijos in news accounts.

The U.S. negotiator said that as the language of the statement of understanding indicated, the United States had a right to defend the canal against any threat or aggression from whatever quarters.[32]

The situation was further complicated when General Torrijos arrived back in Panama and remarked, "I haven't even signed an autograph"—at least implicitly suggesting that the unsigned statement was of questionable legal validity.[33]

Four days after the release of the joint Statement of Understanding, Dr. Escobar discussed it at a press conference. Far from conceding that it represented a different interpretation of U.S. rights after 1999 than the one he had provided earlier, he asserted that "what they have said is what has been said all along." [34] Of particular interest, the Panamanian chief negotiator stated:

Why did the problem arise? Because some Senators in the United States maintained that the language used in Article IV effectively gave the United States the right of defense against attacks on the Panama Canal in violation of the Neutrality Treaty. They extended this to mean that, as a consequence of this right of defense, they had the right to intervene in the Republic of Panama.

On the other hand, ever since the first public and official explanation in our country on 19 August, we said . . . that the scope of this right of defense at no time could be extended to mean the right to intervene within the Republic of Panama.[35]

Surprisingly, the suggestion that the dispute had been caused by members of the United States Senate, rather than by the Panamanian negotiator, was endorsed the next day by Ambassador Linowitz. Reversing his earlier position that Dr. Escobar had misstated the terms of the treaty, Mr. Linowitz told the Foreign Relations Committee on October 19:

We believe that there never was disagreement between the responsible chiefs of state of both countries as to what the treaties meant. Had the issue not been raised here, sir, we don't think it would have been necessary to have this statement of understanding.[36]

Nevertheless, the next day, by contrast, Ambassador Linowitz continued to assure the Committee that the U.S. had the right to protect the neutrality of the Canal *even from a Panamanian threat.*

He had this exchange with Chairman Sparkman:

The CHAIRMAN. * * * Will the statement limit our response to a threat to the neutrality of the Canal from the Government or people of Panama?

Ambassador LINOWITZ. No, sir. There is no limitation in this statement with reference to the action which the United States may undertake to counter any threat or aggression against the canal and its neutrality.[37]

Later during that hearing, the same issue was raised by Senator Stone:

Senator STONE. The problem is that the Joint Statement says "internal." If the Panamanians say this is an internal dispute we have going here, do we then have the right to intervene?

Ambassador LINOWITZ. If the issue is maintaining an open, secure, and accessible canal, the United States is authorized to take such actions as it thinks necessary, and there is no qualificational limitation as to where that threat comes from. * * *

Since there is no limitation, it obviously would not exclude any action which involves a Panamanian threat to the canal.[38]

That same day, however, this interpretation was questioned by the American Law Division of the Library of Congress' Congressional Research Service, which concluded:

* * * [T]he Carter-Torrijos statement, while guaranteeing each party the right to act against threats directed at the Canal, also specifies that the U.S. may not intervene in the internal affairs of Panama. *It is not altogether clear that the statement would permit the United States to intervene*

Footnotes at end of article.

in the event that the aggression or threat should result from Panamanian action. (Emphasis supplied)[39]

The following day, October 20—three days before Panama's national plebiscite on the proposed treaties—General Torrijos addressed the Panamanian people on nationwide radio and television.

He said that prior to the release of the Joint Statement he talked with President Carter, who assured him that the United States has no interest in intervening in the peaceful existence of Panama. According to Torrijos, President Carter said:

Tell your people * * * that in case the Canal is attacked or threatened, or if the free circulation or transit * * * is endangered, we do want to have the right to support that people so that their principal natural resource is not blocked.

Torrijos continued:

Then I told him: "Well, that is the way I see it, too. I feel you are obliged—obliged—to come and defend us if our military or defense capacity is insufficient compared with the attacking force.

He said: "Well, that is where the difference lies. You say obliged, but here I have to sell this as having the right to do so. We feel the same, we are saying the same thing."[40]

Repeatedly, General Torrijos assured his Panamanian radio and TV audience that the role of the United States under the Neutrality Treaty was to defend the Canal from *foreign* aggression *if* requested by Panama. Thus, he said:

"* * * [I]f we are attacked by superior forces, the United States is obligated to come to our defense.

* * * [I]t is necessary for the United States to be committed so that *when we ring the bell* here, *when we push the button*, a bell rings over there, and the United States comes in defense of the Panama Canal. * * *

I repeat, *we push the button*, the bell rings, and the United States is obligated to come to our defense." (Emphasis supplied)[41]

This statement by General Torrijos highlights yet another crucial disagreement between the two negotiating teams. Specifically, can a determination that the Canal's neutrality has been threatened or violated be made unilaterally by the United States, or is U.S. action dependent upon a prior agreement with Panama that neutrality is in jeopardy?

Nearly two months earlier, during an August 22 press conference, Dr. Escobar said:

The neutrality pact does *not* provide that the United States will say when neutrality is violated. That is not provided there. There is an article which reads that Panama and the United States will maintain the neutrality pact with the purpose that the Canal remain open peacefully for all ships of all flags of the world. That is all it says. *It does not say that it falls to the United States to decide when neutrality is violated or not.* (Emphasis supplied)[42]

On September 26, this position was challenged by Ambassador Linowitz, who—in his prepared statement to the Committee on Foreign Relations—asserted:

Under the treaty the United States is in a position to assure that the Canal's permanent neutrality is maintained and there is *no limitation* on our ability to take such action as we may deem necessary in the event the Canal's neutrality is threatened or violated from *any source*. * * *

But the key point is that it is for the United States to make the determination as to how we should respond and how we should defend our rights under the Canal's regime of permanent neutrality.

* * * *We are under no obligation to consult with or seek approval from any other nation* or international body *before acting* to maintain the neutrality of the canal nor does the treaty in any other way limit our ability to act. (Emphasis supplied.)[43]

Once again, following the October 14 Carter-Torrijos "understanding," it became clear that the two sides still had not reached agreement. On October 18, Dr. Escobar told a press conference:

"There is no exact method of interpretation on how violations of the neutrality treaty will be determined. * * * The general treaty includes an article which states that in case of a discrepancy between the two sides concerning the interpretation of an article, they will reach an agreement between themselves or, if necessary, they will appoint an arbiter to decide the issue. This is the general way these situations are handled."[44]

On this record, it is painfully obvious that the United States and Panama have been in disagreement—and still disagree, despite the October 14 Carter-Torrijos "understanding"—on at least two major points:

Our Administration tells the American people that the United States will have the right to defend the Canal after the year 2000 against *any* threat to its neutrality, including an internal threat from within Panama. But spokesmen for Panama assert that the United States will have such a right only if the Canal is threatened by a *foreign* power.

Our Administration tells the American people that the U.S. can determine *unilaterally* when such a right to defend the Canal can be exercised. But Panamanian spokesmen insist that U.S. forces can come in only when requested or when the action is agreed to by Panama.

We would be living in a fool's paradise to assume that these contradictory interpretations will simply go away if the treaty is ratified. Indeed, we would be most fortunate if they did not come back to haunt us in a most agonizing way.

If, at some future time, we genuinely believed that the neutrality of security of the Canal is being threatened by a third party—and Panama, for whatever reason, disagrees—what would we do?

Or if we became convinced that Panama itself (or forces within Panama) were violating the Canal's neutrality or endangering its security—and we could not persuade Panama to change its course—what would we do?

Would we feel compelled to stand by and watch while the Panama Canal fell into hostile hands?

Or would we be justified in using military force to protect the Canal even in the face of Panamanian protest or, perhaps, outright resistance and military confrontations?

These questions are not easy, and there are no simple answers. It is essential that we avoid being placed in such a dilemma—by resolving in advance of ratification such ambiguities and misunderstandings, which contain the seeds of future agony.

If we fail—or if we try to paper over serious deficiencies and disagreements for short-term political expediency—we could be buying ourselves a one-way ticket to another Vietnam.

II. THE NEW CANAL OPTION

If the security and economic interests of the United States are to be protected, we should *not* relinquish our option to negotiate for construction of a second canal (possibly a sea level canal in a country *other* than Panama.

That's exactly what we would do under Article XII of the proposed Canal Treaty, which reads in part:

(b) During the duration of this Treaty, the United States of America *shall not negotiate with third States* for the right to construct an interoceanic canal on any other route in the Western Hemisphere, except as the two Parties may otherwise agree. (Emphasis supplied)

In exchange for our commitment *not* to build a new canal in any other country, what would we get in return under the proposed treaty?

The Administration says we would get a commitment that Panama will not collaborate with any other nation to build a second canal in Panama.[45] Whether that would be a fair exchange is open to serious question. But beyond that, there are three important points to be made: (1) the language of the new treaty does *not* say that; (2) we already have such a guarantee under the existing 1903 treaty; and (3) the existing guarantee would be wiped out if we were to ratify the proposed treaty.

In exchange for our clear and unambiguous commitment *not* to build a new canal in any other country, Panama would be "bound" by the following language in Article XII:

* * * during the duration of the Treaty, both parties commit themselves to *study* jointly the feasibility of a sea level canal in the Republic of Panama, and *in the event* they determine that such a waterway is necessary, they shall negotiate terms agreeable to both parties for its construction. (Emphasis supplied)

It isn't necessary to take a high school course in business law to realize that, under such language, Panama would be obligated only to "study" and to "negotiate." There is no clear and unambiguous commitment there—or anywhere else in the treaty—that would preclude Panama's joining with a nation other than the United States to construct a second, or sea level, canal in Panama.

Subsection 2(a) of Article XII does say that—

No new interoceanic canal shall be constructed in the Republic of Panama during the duration of this Treaty, except in accordance with the provisions of this Treaty, or as the two parties may otherwise agree.

At worse, this language is meaningless. At best, it is fuzzy and ambiguous.

If Panama acts "in accordance with" the treaty, it is under no prohibition with respect to the construction of a second canal. It is required only to "study jointly" and to "negotiate" with the United States concerning the Canal.

Under this language, it might be claimed that the United States has sort of a "first option"—but it is a pretty weak claim under the language employed.

Even though the existing Canal is not obsolete, we must look toward the day when it will no longer be adequate.

The dream of a sea level canal—without locks—ought to be more than a dream in an era when men and women are going to the moon.

Studies have indicated that the least expensive place to build a second canal would be in Panama. But, for political and other reasons, it might be very wise to construct the second canal in another country—even though it might cost a few billion dollars more.

Furthermore, perhaps such a canal should be built under the auspices of the Organization of American States or some other arrangement of international interests.

In a study published under the auspices of the Council on Foreign Relations in 1967, Immanuel J. Klette surveyed various canal options and concluded that, if nuclear excavation were prohibited, the preferable route for a new canal would be the Nicaragua-Costa Rica route.[46] He observed:

Although the cost of construction bears on the final choices, it should not be the prime factor in making decisions on a new canal. A waterway which is less expensive in dollars may be the most expensive in political consequences.[47]

As we move toward a new treaty relationship with Panama, we should not ignore the

---

Footnotes at end of article.

value of competition—economic, political, and even diplomatic.

Holding open even the possibility of building a new canal outside of Panama—an option foreclosed by the proposed treaty—could be very important and useful in our relations with Panama.

After all, for the foreseeable future, Panama's economic survival is dependent on the Panama Canal. As Professor Edwin C. Hoyt observed several years ago in the *Virginia Journal of International Law:*

If Panama is too intransigent, she may lose the [sea level] canal to one of these other countries. This would be an economic disaster for Panama.[48]

Furthermore, if a canal were constructed elsewhere in Latin America, Panama would be forced to keep its own tolls competitive or risk losing most of the traffic to its almost certainly more modern rival.

A major conference on Panama sponsored by Georgetown University's Center for Strategic Studies in 1967 reached a number of conclusions, one of which was:

Though the Republic of Panama seems technically to be the best place for a future canal facility, the United States should not abandon the right to approach other countries for possible canal location in the event that future political conditions exclude the project from Panama.[49]

Under the circumstances, it is difficult to conclude that Article XII of the proposed Canal treaty serves the best interests of the United States.

III. SOME ECONOMIC CONCERNS

Importance of the Canal

When he testified before the Committee, Ambassador Sol Linowitz asserted that the Canal has "to a substantial extent become economically obsolescent." [50] That is the view of many who support the treaties.

Of course, it is true that modern-day "supertankers" are too large to transit the Canal. But it also is true that none of the coastal ports of the United States is able to accommodate the supertankers.

A variety of facts and statistics can be summoned to suggest that the Canal is rapidly losing its economic importance to the United States. Sometimes the point is buttressed by noting that the number of commerical U.S.-flag vessels transiting the Canal has decreased substantially during the past two decades.[51]

But the fact is that most cargo going to or from U.S. ports is carried in vessels that are not U.S.-flag carriers. The tonnage of U.S. cargo transiting the Canal actually has increased during the last two decades by more than 300 per cent.[52]

Careful analysis underscores that the Panama Canal remains economically very important, both to the United States and to world commerce in general.

Consider a few statistics

Between 1948 and 1976, cargo tonnage moving through the Canal increased almost 400 per cent.[53] That upward trend continued during fiscal year 1977.[54]

About 93 per cent of the world fleet of 27,000 ships of 1,000 gross registered tons and over are capable of transiting the Canal.[55]

At least 96 per cent of U.S. merchant ships and more than 98 per cent of our naval vessels can use the Canal.[56]

At least 57 per cent of all the tonnage passing through the Canal is shipped from, or is destined for, United States ports.[57]

The Canal is particularly important to producers and consumers of certain American commodities—for example, Alaskan oil shipped through the Canal to refineries on the East and Gulf Coasts, and farm products bound for foreign and domestic markets. Twenty per cent of all U.S. farm exports pass through the Canal.

Footnotes at end of article.

A study by the U.S. Maritime Administration concluded if the Canal were closed the price of U.S. exports would be increased by $932 million and the price of imports would be increased by $583 million.[58]

While the Canal is important to the United States, relatively speaking, it is even more important to some other countries. For example, Japan probably is more dependent on the Canal than is the United States,[59] and several Latin American nations rely on the waterway for more than half of their foreign commerce.[61]

Not only is the Canal economically important, but also transits are projected to increase in the years to come. Canal Zone Governor H. R. Parfitt has testified that transits probably will increase about 40 per cent by the year 2000.[61]

Self-sustaining or profitmaking

While the United States (along with much of the rest of the world) certainly has benefitted from the existence of the Panama Canal, it has not been—and never was intended by the United States to be—a profitmaking venture. On the contrary, according to calculations by Arthur Anderson & Company, unrecovered U.S. investments in the Panama Canal and the Canal Zone Government has exceeded $3 billion.[62]

In his recent book, *The Panama Canal Controversy*, Paul Ryan wrote:

The United States government, in a strictly bookkeeping sense, has never made a profit on the Panama Canal and in fact, beginning in the 1970s, has lost money on its operation. It was President Theodore Roosevelt's goal that the international waterway be devoted to the common good of mankind, and for over sixty years ships of all nations enjoyed safe, secure transit and paid the same low tolls.[63]

In fact, the refusal of the United States to view the Canal as an economically profitable venture has been a cause of some friction in our relations with Panama.

Former Assistant Secretary of State and Ambassador Thomas C. Mann has observed:

The main thing to be said is that Panama and the U.S. have entirely different concepts about the role of the Canal. Panama has always aspired to sole control . . . for the purpose of maximizing revenues from the Canal to it; for the purpose of charging all that the traffic will bear for the right of transit. The United States . . . has had two objectives: first, to keep transit tolls as low as possible so as not to add to the cost of goods that must transit the Canal; second, ability of the United States ships to transit the Canal in peace and in war and on a nondiscriminatory basis.[64]

This difference of approach was even reflected in testimony by Transportation Secretary Brock Adams, who told the Committee that after the year 2000 he thought the Panamanians "will try to get out of the [Canal] passage their operating costs and to obtain the amounts of money that will not only cover it but give them a profit." [65]

If Panama should try to extract a profit from the Canal, perhaps it would not be surprising.

Since General Torrijos came to power in 1968, Panama's national debt has grown from $167 million to about $1.5 billion—an increase of nearly 900 percent—giving the country the dubious honor of having the highest per capita debt in Latin America.[66]

Between 1975 and 1977, under General Torrijos' leadership, the interest on Panama's debt has increased from $138 million to $243 million—a jump of more than 75 percent in just two years.[67]

Nowhere in the treaties does Panama make a commitment to maintain the Canal—least of all out of revenues. We are left to hope that, in its own self-interest, it would do so. But a future government of Panama might well decide that the tolls would be better used for social programs than for the cost of maintaining the Canal—maintenance which is enormously expensive as well as highly technical.[68]

Financing canal operations

Some who seek to sell the new treaties to the American people have portrayed the economic provisions as painless and cost-free.

They assert that tolls from the Canal will cover not only its operating costs, without subsidy by American taxpayers, but also the cost of specified payments, which the treaties categorically require the United States to make to Panama.

On the first day of Senate hearings, for example, Secretary of State Cyrus Vance assured the committee that "the treaties require no new appropriations, nor do they add to the burdens of the American taxpayers." [69]

Similarly, President Carter, in his fireside chat on February 1, 1978, gave this assurance:

Are we paying Panama to take the Canal? We are not. Under the new treaties payments to Panama will come from tolls paid by ships which use the Canal.[70]

The best that can be said for such simplistic assurances is that they are optimistic to the point of naivete.

Current payments made to Panama under the existing treaty amount to $2.3 million a year. Under the new Canal treaty, our annual payments would be increased by about 3,000 per cent.[71]

Just what would go into this 3,000 per cent increase?

The annual payment from tolls would go up from $2.3 million to $50 million to $70 million.[72]

The treaty calls for a fixed annuity of another $10 million.[73]

In addition, the treaty provides up to $10 million more to be paid out of revenues if they exceed expenses.[74]

Beyond that, we would pay $10 million a year to Panama for police, fire and other municipal services—and these costs can be negotiated upward every three years.[75]

Outside these provisions of the treaty, if Congress concurs with President Carter's commitment, Panama will receive various types of loans, guarantees and credits totaling about $300 million over the next 10 years—plus $50 million worth of military hardware.[76]

All this is beyond the fact that we would be giving Panama the Canal itself and all related facilities (valued well in excess of $1 billion), and giving them the Panama Railroad—all without any reimbursement or recompense.

Notwithstanding all of this, President Carter told the American people on December 28: "We wanted a treaty that did not put a financial burden on the American taxpayer, and we got it." [77]

In theory—but only in theory—these treaty obligations will be paid out of Canal revenues. But it is clear that until the year 2000 the United States is obligated to meet these financial commitments with appropriated funds, if necessary, should revenues from tolls fall short.

Since Article III(2)(d) of the Panama Canal Treaty grants to the United States until the year 2000 the right to "[e]stablish, modify, collect and retain tolls for the use of the Panama Canal," some may assume that such authority will be sufficient to avoid the need for appropriations.

Unfortunately, even with control of the checkbook, we have to face some stark realities.

During a 60-year period prior to 1974, there was never an increase in the toll charge for transiting the Canal.

Since 1974, however, because of the escalating costs of operating and maintaining the Canal, there have been two toll increases, totaling about 50 per cent.[78]

If the treaties are ratified, even Administration witnesses concede that tolls will have to be hiked again—immediately—by 25 to 40 per cent.[79] Other experts predict that the increase will be as much as 46 per cent.[80]

In a report prepared for the House Panama Canal Subcommittee in December, 1977, W. M. Whitman, an expert on the economics of the Canal, presented this disturbing analysis:

In the first year of operation under the treaty, Panama Canal revenues will fail to cover costs of operation of the canal and related treaty costs by about $99 million. [This] would require an increase in rates of tolls of more than 60 per cent * * *.

* * * [T]he conclusion to be drawn from the data so far available is that costs will rise at a rate higher than any foreseeable increase in revenues over the period of operation of the Canal by the United States under the Treaty.

Constraints on our ability to raise tolls to keep pace with rising costs are both political and economic.

In view of the great emphasis placed by Administration spokesmen on the value of this treaty as a "positive action * * * in our relations with Latin America," [81] one must wonder how much thought has been given to the possible reactions in Latin America to such gigantic toll increases.

One would have expected, and our Latin American neighbors must have hoped, that before the Administration agreed to a treaty that would drive tolls up so dramatically in order to cover such a huge increase in our annual payments to Panama, more consideration would have been given to the 1977 resolution of the Organization of American States—adopted last June by a vote of 19 to 0 (with the U.S. abstaining and Panama not voting). The OAS resolution:

Reaffirms the principle that Panama Canal tolls should *only* reflect the operational cost of the waterway. (Emphasis supplied.) [82]

Neither should we ignore the fact that the Panama Canal is not a monopoly. Other trade routes exist, and their appeal will increase as Canal tolls are raised.

Consider these excerpts from the prepared testimony to the House Panama Canal Subcommittee by Leonard J. Kujawa, a partner in Arthur Anderson & Company who since 1962 has been a consultant on various financial and accounting matters to the Panama Canal Company:

To those that argue that Panama Canal tolls can be increased significantly with no effect on traffic, I would say "prove it in the market place." * * *

Tolls must be adjusted moderately and prudently or there can be severe dislocations that would set into motion irrevocable economic consequences. In a short term, tolls could be increased very substantially creating economic hardship for the users who, in the short term, would have available few alternatives. However, such action would have serious long-term consequences. * * *

* * * [I]n the long term, an imprudent toll increase could sour traffic growth and set in motion irreversible decisions. Loss of traffic coupled with growth of costs could result in higher unit costs and the need for further toll increases, producing a vicious cycle that would result in eventual financial collapse.[83]

Thus, despite the Administration's soothing reassurances, there is every reason to believe that even increased Canal tolls will not cover required treaty payments to Panama and sharply escalating operating costs, particularly after 1984 when it is likely that North Slope oil will bypass the Canal. In that unhappy—but likely—event, the American taxpayer will once again be stuck with the bill.

IV. OTHER CONCERNS

Beyond the points already discussed, there are a number of other disturbing concerns.

1. Although the Canal would be turned over to Panama under the proposed treaties in the year 2000, no firm obligation is undertaken by Panama to operate and maintain the Canal thereafter.

Notwithstanding testimony by Secretary of State Vance that Panama's obligation to do so is "clear," [84] Panamanian negotiator Romulo Escobar has categorically stated that "* * * Panama could *not* be tied down to keeping open a canal which was not earning revenues." [85]

For the United States, Ambassador Linowitz concluded:

We did disagree with them on the position they asserted and therefore that (commitment) was not included in the Treaty. The position we took was should such a circumstance arise, we would have to talk with one another.[86]

There is only one ambiguous phrase in Article II that could even be used as the basis for implying an obligation on Panama to keep the Canal open after 2000. But our negotiators have conceded the point in statements such as that made by Ambassador Linowitz. This sets the stage for Panama after the year 2000 (particularly if we are precluded in the interim from building a second canal) to demand that the United States continue to subsidize the operation and maintenance of the Canal.

2. Would Panama be able to nationalize or expropriate the Canal shortly after ratification of the treaties—without waiting until the year 2000 to take control?

Under the existing 1903 Treaty, the U.S. has all rights, power and authority *as if* it were sovereign. Panama, under the existing treaty, cannot claim the sovereign power of eminent domain.

The proposed treaty would "wipe out" the 1903 Treaty and all the powers of sovereignty would become vested in Panama once the treaties are ratified.[87] We already have seen that the United States would have no clear right to intervene if the Canal were the subject of a take-over by Panama itself.

The Suez comparison is worth some reflection. One month after the British withdrew from the Suez Canal Zone in 1956, the Suez Canal Company was nationalized and Egypt kept the canal profits. And it also kept the canal—and kept it closed to Israeli shipping—despite treaty commitments, war with Israel, attack by Britain and France, condemnation by the United States, and a 1948 U.N. resolution demanding Israeli access to the canal.

While no forecast of similar action by Panama is intended, our negotiators might have avoided this risk by calling upon Panama, as an act of good faith, to surrender (in the terms of the proposed treaties) any right to nationalize or expropriate the Canal during the period between now and the year 2000.

3. In testimony before the Committee by a panel of international law scholars, concerns were expressed that the new treaties are not compatible with the Revised Charter of the Organization of American States.[88]

It was maintained that, at a minimum, the OAS Charter appears to make even more ambiguous and uncertain any claim under the Neutrality Treaty by the United States of a right to protect the Canal against a threat from within Panama. At the very least, legal conflicts between the OAS Charter and the proposed Neutrality Treaty appear to give Panama a basis for arguing that *any* introduction of U.S. military forces on Panamanian soil would violate Article 20 of the OAS Charter.

In light of all the problems of interpretation to be found within the four corners of the treaties themselves, this additional cause for uncertainty is not exactly needed.

4. Were these treaties negotiated in haste under the pressure of a time deadline?

Because the treaties contain so much ambiguous language and so many provisions of doubtful merit, it is appropriate to ask such a question. And, unfortunately, there is reason for some concern.

On *February 10, 1977*, shortly after he took office, President Carter named Sol Linowitz to represent the United States as negotiator for the Panama Canal treaties. But, strangely, Mr. Linowitz was appointed only on a temporary basis—for a six month period. Under the law,[89] an appointment on this basis does not require confirmation by the Senate. Such an appointment operates to bypass the usual scrutiny by a Senate committee of a nominee's qualifications and possible conflicts of interest.

If hearings had been held, the Senate would have learned that Mr. Linowitz was serving as director of a New York bank that participated in making huge loans, still outstanding, to the Torrijos government of Panama.[90] Furthermore, the committee might have cleared the air with respect to allegations that Mr. Linowitz formerly represented the Marxist Allende government of Chile, and was required in connection therewith to register as an agent of a foreign government.[91]

Because the Senate is an integral part of the treaty-making process under the Constitution, it was unwise and something of an affront to the Senate for the Administration not to submit a treaty negotiator's name for confirmation. Utilizing such a short circuit procedure did not build Senate confidence in the treaty negotiations, and it also denied Mr. Linowitz the opportunity he should have had to explain away any possible conflicts of interest.

Mr. Linowitz, who was appointed on February 10, had six months—until August 10—to negotiate a new treaty without having his name submitted to the Senate for confirmation.

Interestingly enough, it was on August 10 that negotiators for the two countries finally announced their agreement in principle on new treaties relating to the Panama Canal.

CONCLUSION

Clearly, as submitted to the Senate by the President, these treaties are fatally flawed.

Any new treaty relationship built upon the ambiguities of the treaties now before us would be doomed to failure from the start.

It is argued by some that defects in the treaties can be remedied by adopting a series of amendments.

Along with David McCullough, I believe that how we say "no" in this situation is very important in terms of our future relations with the people of Panama.

To adopt amendments that make substantive changes in the text of the treaties is one way of saying "no." As the late Professor L. Oppenheim has pointed out:

"* * * the proposal of an amendment to a treaty on the part of the Senate amounts to a proposal of a new treaty * * *" [92]

If the Senate tries to make substantive changes in the text of the treaties—and particularly if General Torrijos should decide later to "accept" them without holding another plebiscite—the foundation would be laid for future Panamanian claims that the treaties are invalid because in their final form they were not properly ratified in accordance with Panama's constitution.[93]

In my judgment the appropriate course for the Senate is to withhold its "consent"—and instead to "advise" the President to persist in negotiations until acceptable treaties can be fashioned.

ROBERT P. GRIFFIN.

[85] *Ibid., pt. I*, pp. 59–60.

[86] *Ibid., pt. I*, p. 61.

[87] Article I(a) of the Panama Canal Treaty.

[88] U.S. Senate. *Hearings*, pt. IV, pp. 92–93. Article 20 of the Revised OAS Charter reads: "The territory of a State is inviolable; it may not be the object, even temporarily, of military occupation or of other measures of force taken by another State, directly or indirectly on any grounds whatever."

This is modified by Article 22, which provides: "Measures adopted for the maintenance of peace and security in accordance with *existing* treaties do not constitute a violation of the principles set forth in Articles 18 and 20." (Emphasis supplied.)

Since the 1903 Treaty qualifies as an "existing" treaty, action taken to defend the Canal under its provisions is less likely to be in conflict with the OAS Charter than action under any new treaty.

GENERAL TORRIJOS TELEVISION ADDRESS

Mr. GRIFFIN. Mr. President, in my minority views which accompany the report of the Committee on Foreign Relations on the Panama Canal treaties (Ex. Rept. 95–12), I have quoted from an October 20, 1977, television and radio address to the Panamanian people delivered by Gen. Omar Torrijos.

Because it was delivered after the October 14 joint statement of understanding released by General Torrijos and President Carter, and shortly before the October 23 Panamanian plebiscite, I believe this lengthy speech provides important insight into the interpretations which General Torrijos and future Panamanian leaders are likely to give to key provisions of these treaties. And, as I have pointed out in my minority views, some of those interpretations are very disturbing.

In order that my colleagues will have access to the full text of the remarks delivered by General Torrijos on that occasion, I ask unanimous consent that a translation thereof by the Foreign Broadcast Information Service, provided by the Department of State, be printed in the RECORD.

There being no objection, the transcript was ordered to be printed in the RECORD, as follows:

TORRIJOS ADDRESSES NATION PRIOR TO TREATY PLEBISCITE

(Nationwide radio and TV conversation with the nation by Chief of Government Gen. Omar Torrijos at the Televisora Naoinal TV studios in Panama City with Mario Valasquez as moderator—live.)

(Moderator) General Torrijos, welcome to Televisora Naoinal, welcome to Panamanian television. For us it is a source of great pride and pleasure that you should be in our studios tonight to have this conversation with the Panamanian people—this friendly conversation, by which you show great interest in sending a message, in communicating your impressions of your trip to Europe. Would you be so kind, General Torrijos, to talk to us first about your trip to Europe? I understand that this was the first time that a Panamanian chief of government, a Panamanian ruler, has made a trip to Europe while in office.

(Answer) This is true. Following my return to the country after a trip of almost 20,000 km, I wish to use this media to resume our dialog, in which we have been engaged for 9 years. Our trip was very interesting. The traveler was not General Torrijos, but he was the representative of a people with a cause. When in the various countries I was addressed and the national anthem was played, I felt, in my deepest soul, that the national anthem was not being played for Omar, but the national anthem was being played for 1.7 million Panamanians who, through their struggle, through their principles, through many sacrifices, decided to end a shameful colonialist enclave and decided that international public opinion should never consider us a colony.

I was proud because now the name of Panama has been incorporated among those of the dignified countries of the world. I was proud because all the attention shown to me was attention which I was receiving on your behalf, and I was proud because our country is being heard at the highest levels, and it is being heard as a country which has issued a cry to the world, a cry which has been heard by the moral leaders of the most powerful and highly industrialized countries of the world.

I emerged from my meetings with optimism. I was optimistic because I went there with the timidity of one who is unfamiliar with this great world. I felt optimistic because in each of these leaders I found sincere support, an in-depth knowledge of our cause, and a profound conviction that the Panamanian people had exhausted all peaceful means of solving a problem. I received congratulations, which I hereby extend to you. I received congratulations from those great leaders because they say that Panama, despite its small geographical size, has given a very significant example—the use of peaceful means to resolve a problem, the use of negotiations as a means of settling a problem of great significance to the world. I had been very confused, and I had had the impression that this was a bilateral problem between Panama and the United States.

I return with a more complete idea of the significance of this problem. Leaders like German Chancellor Schmidt told me: Look, Torrijos, for me and for Germany, but especially for me, the problem of the canal is not just a matter of free, innocent passage for our tonnage; it is as much a sentimental matter for me as it is for you. I was raised in Hamburg, one of Germany's main ports, and even as a child, ever since I could move around the wharves, I saw ships which were coming from or going to Panama.

So that name has a sentimental meaning for me, as it does for your people. I congratulate you. Do not feel alone and never believe that this treaty will not be ratified. I say that it cannot fail to be ratified because it is a problem of such significance to world shipping that it is not possible to commit the irresponsible act of refusing to ratify it for your people. And it is such an important matter, other leaders told me, that it would be disastrous for world trade if the intransigence of those who do not understand the true importance of this should be allowed to endanger the innocent passage of ships of all the world's flags that transit the canal.

I return with great optimism. I am very optimistic because I had felt that the problem was local. The problem has an umbrella, a universe that is much larger than we thought, and the support of these men is much more extensive than I expected.

On returning from Europe, I had a meeting with President Carter, a meeting which was much commented upon in this country, and justly so because, as a result of a standing operating procedure in history the booby traps always come at the end. It is always at the end that the Panamanian people are asked to sign receipts for intervention, to sign receipts which are degrading, or to sign receipts which disguise the perpetual presence of a foreign power in our territory. There were those who advised me: Omar, do not go. Do not go because those people are very smart, very clever, very smart and very clever and they make you unknowingly sign something that could reverse all that we have won. I went. I paid no attention to this advice. I paid no attention to this advice, first of all, because I divine, I discover, I visualize, and I see in Carter—when I talk with Carter I realize that I am talking of a man who has turned his back on intervention, that I am facing a man of high moral character. We met, and what he proposed was quite acceptable for my signature, but I did not wish to sign it precisely because I represent 1.7 million inhabitants and I did not wish there to be the slightest doubt regarding my actions. And I did not wish anyone to believe that, by deceit, flattery or attention, I could be made to accept something which our people do not accept.

However, those who think this way—this way of thinking is the product of the exaggerated foreign presence in the Canal Zone, because to think this way is to underestimate or underrate the ability of the Panamanians.

Listen, I regard myself just as smart as those people, and those people are so smart they can detect a lame man even if he is sitting. [laughter] They can detect a lame man even if he is sitting, those people are so smart. Nevertheless, I talked to him and he told me the following very respectfully. He speaks quite a bit of Spanish and if one talks to him slowly he understands. There they use the term a four-eye meeting, a six-eye meeting, an eight-eye meeting because the interpreter's eyes are innocent eyes, they do not count. We held a four-eye meeting with the interpreter. And he said to me: Torrijos, we have made a commitment. We made a commitment and signed it. The commitment was that we would sell the same product on different markets. I said, that is correct. [Then he added] but it turns out we are not selling the same product. When Romulo—they know Romulo's name, he handles it very well—when Romulo says that we go indiscriminately anywhere we please and when Linowitz says that, regardless of any pact or signature, we [always] follow our national interests, both of them are hurting us because that was not the intention of what we signed.

Tell your people, but please tell them that neither the United States nor this government has any interest in intervening in the peaceful existence of that nation. And I said: Would you affirm this, Mr. President. [He answered] I affirm this to you as many times as you want. We have no interest in intervening in your internal, intimate or domestic life, in your political form or in the way of being of the Panamanians. But tell them also that in case the canal is attacked or threatened, or if the free circulation or transit of 15,000 ships per year now, 26,000 in 2000, is endangered, we do want to have the right to support that people so that their principal natural resource is not blocked.

When I told him: Well, that is the way I see it, too. I feel you are obliged—obliged—to come and defend us if our military or defense capacity is insufficient compared with the attacking force.

He said: Well, that is where the difference lies. You say obliged, but here I have to sell this as having the right to do so. We feel the same, we are saying the same thing.

So we drafted a declaration. We drafted one in the United States and we drafted one here. It is a declaration which guarantees and explains. It explains because he was elected in a country of 200,000 [as heard] inhabitants who felt a certain moral loathing because their fatherland, the United States, had turned into the world's international policeman, because they have young people on their way back from interventions, because it is a youth which feels moral loathing and repugnance for what happened in Santo Domingo, for what happened in Vietnam and for what happened in Playa Giron. It is a youth [he corrects himself] it is a country on its way back from such interventions and he did not want for a single moment . . . he said: Explain this to them well, but explain it to them in the way I am explaining it to you. I do not want the Panamanian people to think for a single moment that I am disguising here a receipt to intervene in their peaceful existence or way of life. That is signable and I [Torrijos] believe I should have signed it, but I did not do so to avoid misinterpretations.

We then parted. Both of us felt very happy.

He told me: Have faith, have faith because moral causes always prevail. Your cause is moral and so is my attitude in listening to a moral attitude. I know I am capable of convincing my people that they have been taught a distorted story and that, as a result of this, many of them have come to feel that Panama exists under the same moral or geographical condition as Alaska or Louisiana, but that is my problem and I can assure you that I can resolve that problem.

When I asked him what were the possibilities that the treaty would be rejected, he answered: Do not think negatively, Torrijos, do not think negatively. The only thing is that I do not want you to pressure me or tell me to sign it Monday, Tuesday, or tomorrow. Give me some time and this treaty will be signed.

I told him, a treaty awaiting to be ratified represents hope, but a rejected treaty is a provocation. And he said, that is right, that is the way I see it, too.

On arriving here and as a good observer of my people—I feel that I am a man who understands your feelings, who understands my people's intimate truth, because there are two types of truths, public truths and intimate truth, and I understand intimate truth, that truth which you will express in the plebiscite. I understand it and I come pretty close to understanding almost perfectly—I realized that the issue was being viewed differently here.

Instead of talking about the real present, they were talking about the legal future. What does the real present mean?

The real present means that there is an enclave there, that bases have to be built and that those military bases have teeth, claws, cannons and a large capacity for retaliation. That is the real present. The real present means that because the country is divided by that enclave we have not been able to perfect our independence and place our flag there, the visible symbol of our sovereignty. The real symbol of our sovereignty is the right of every Panamanian to attend a school or hold a job, the right of every Panamanian mother not to be abandoned to her own resources, and her right to have the state provide herewith a job and her child with an education. That is the real present. We often forget this.

The new treaty—although I never like to mix the economic aspects with the issue of sovereignty, I must also admit that sovereignty means not being dependent; that sovereignty means having a job, that sovereignty means to continue providing our school age children with decent classrooms. I must admit that in this aspect we have not been sovereign. We have not been fulfilling certain sacred principles of sovereignty, and one can easily make a mistake and confuse pseudonationalistic feelings with real nationalistic feelings. In this we have had many pseudonationalistic factors. Let us look at things as nationalists. As nationalists we see that thousands are jobless; as nationalists we see that Colon is demanding and awaiting a response; as nationalists we see that farmers want the Canal Zone market incorporated into their sales market whenever there is superproduction. That is being nationalistic. There we see a part, an important aspect, of real sovereignty. Panamanian farmers want the Canal Zone incorporated into their market because at present there is such contempt . . . the 1903 treaty is so bad that under it [Americans in the Canal Zone] are authorized to bring in tomatoes from California. [laughter].

Those are tomatoes from California that are brought here on ships and when they arrive here how could they taste like a Los Santo tomato? They do not. However, there are some people who despise our people so much that they prefer to eat a tasteless and colorless tomato rather than a tomato produced in the hills of Volcan, or Boquete, or in the warm lands of Herrera, Los Santo and Nata. These are things we have to explain to you, and we have to explain them to you because these are things which form part of the dismantling and gradual turnover that the treaty establishes, that the treaty authorizes, we will replace milk from the Netherlands with milk from Panama and Australian meat with Panamanian meat. All these things will solve the situation of thousands and thousands of jobless persons in our country.

So, instead of thinking about those great elegant legal theories, let us think about the real future of our fatherland. Do not think that in the year 2001 there will be a ruler who will be the reincarnation of Theodore Roosevelt. No, gentlemen, the course of history is as irreversible as the course of a river. No one can tell a river to return to the mountains. Rivers flow to the sea because this is their natural and historic path. The course of history cannot be stopped. Those who think that history can be stopped, those having these legal shortcircuits are not aware of the reality of our people. They are not thinking about the reality of our people, because we have a different situation. Our people are a nation that feels, that thinks and that is urging me to solve their needs. Sovereignty is part of life. It can be touched, but it cannot be eaten. Sovereignty is also an obligation on the part of the government to give all Panamanians a decent job, to give all Panamanian children a health program that will begin to take care of them before they are born and continue taking care of them until they die. This is sovereignty. This is the real present. This is real sovereignty.

It is also being said that the treaty should not be approved because we are going to misuse the annuity of 80 million [balboas]. I do not know why. 80 million will not hurt. We need it. These people are claiming 80 million for their development. 80 million can be used to create 40,000 jobs, each paying 200 balboas. So what do they want? For us to keep 2 million? I do not understand.

There is something of which we must be aware: There are Panamanians who are not thinking only of occupying the zone, but of occupying it to plunder it. They are mistaken. Those who think that filth will replace cleanliness, that anarchy will replace order, and that disrespect will take the place of respect, those who are working so that there will not be free and innocent transit for all the nations of the world are working from the position of those who do not want us to administer the canal. They are working together.

I have just returned from a trip around the world. The world has much faith and knows a great deal about Panama. The leaders do. They trust that Panama has the capacity to manage the canal with common sense.

Somebody told me: Torrijos, you have shown great political maturity. Your presence here is evidence of the great political maturity of your people. Your people have accepted a negotiated solution. Probably I will not be alive in the year 2000 to see it, but this, one of those leaders told me is the greatest altruistic action a ruler can perform.

When I told this same thing to another leader, he told me: What do you mean? What is this about you not being around in the year 2000? You are still young. In the year 2000 I will be 70 or 71 years old, if I do not hide the years and if I keep continuing. He said: You will still be strong at that time. I said: No. Statistics say that the average lifespan in our country is 64 years. He then asked: Do you believe in statistics? And I said: Yes, I believe in my country's statistics because they are accurate.

However, there is need for mixing the credo with punishment. As somebody once said you should mix the credo with rocks and faith with the whip. [sentence as heard] Those thinking about entering the zone to plunder . . . and I am talking about all Panamanians—including those in the government, including myself—we are going to leave Gamboa prison open in order to lock them up right there, so that they may taste it. We are going to let them try out the jail there so that they can correctly use the jail if they try to use the Canal Zone incorrectly.

The treaty states that there will be loans of up to 50 million balboas for the National Guard. This scares even me, but what the people do not know is that a study by the staff has made three recommendations: First, this 50 million must not be used to increase the National Guard's capacity for reprisal, movement or firepower. Second recommendation: If we want to continue having, or make possible, peaceful coexistence among our people, the National Guard should never have a percentage greater than 50 percent of the number of teachers in the country. That is, the National Guard can only be half as large as the total number of teachers in the country. This means that if we have 30,000 teachers, there can be a maximum of 15,000 guards. But if there are 100,000 teachers, we will not have 50,000 guards because that would be too many.

The third recommendation is that in the Canal Zone the policing of the installations can be perfectly carried out with only an additional 300 guards. However, the staff recommends that, although 300 guards are sufficient, we should have 500 in order to further distribute jobs.

However, these 500 guards must be high school graduates and bilingual, and they must have no military training, but detective training and training in criminal investigation for crimes that could occur around a canal, and training in the problems that result from the movement of 15,000 ships a year. However, they also recommend that these Panamanian graduates include men and women—because there is much discrimination against women in this country. We will see to it that the new system will not discriminate much against women. Women can direct traffic perfectly well. We will give these 500 graduates the opportunity to work and to study in order not to cut short their careers so they can go on to the university.

When we think about obtaining that 50 million in 10 years, I am in fact thinking about a war, but about the war we have now, a war whose mission it is to have helicopters and planes not for combat but for transportation to take a medical team at any time to any part of the country; that is, we are thinking about a structure that would correspond to that kind of war and that type of mission.

When we think about equipping the National Guard we are not thinking about tanks. We are thinking about attack tractors, tractors to attack the land, about cranes and machinery with which to attack and punish, to punish the river which has killed so many children on their way to school, to punish it with a bridge. This is the type of war we think about, to develop a National Guard with a strong civic action at the service of the people. We do not need too many rifles. We only require the number necessary to guarantee peaceful coexistence and we do not believe that we are—and never want to be—a repressive government. We are not thinking about flamethrowers, but about guns that spread seed killer. We are not thinking about destructive war machinery, but we are thinking about machinery to destroy ignorance, machinery that will promote development.

Are we in a hurry to sign the treaty for economic reasons? What reason would we have to hurry? The economic problems do exist. I will not deny this. The money we have spent and owe has been invested. You have

seen it. The country has progressed a lot in 9 years and it could have progressed more, it could have progressed more. We are aware of this. We now have a country and government that are well equipped, well organized, a government that not only has ideas but has turned the ideas into projects and the projects will be turned into work.

We have been negotiating for 13 years. There has been no hurry. Nine of those 13 years correspond to our government. Understand me well, I want this nation to continue having confidence in me. No one makes me sign anything under pressure. I would prefer to disappear from the world of the living rather than permit the humiliation of my people with my signature. I am not looking for that. There has been no pressure of any kind. What has happened is that a series of circumstances arose in which the correlation of force was a correlation of moral forces, because a President Carter emerged who is ashamed to apply force to a weak country, who feels shame and listens to his country youth who do not want to return to the battlefields of Vietnam, because there was understanding and because I also matured a lot politically. Previously I was very intransigent. I wanted the gringos to leave on Monday. However, a negotiation is a compromise. It is not a cosmetic document, it is not a precious document, but it is a working instrument. Note that working instruments are designed to be effective, not to be pretty. I am satisfied with this instrument we have designed because this instrument guarantees that gradually the enclave will disappear and guarantees that more than 1,000 square kilometers will be incorporated in 3 years; that is, 30 full moons, 3 sugar harvests, 3 holy weeks—in 3 years all these square kilometers are incorporated into the geography of national dignity.

What do I mean by that? I mean that the police disappear immediately and our police, who could be the son of Nino, the son of (Pincho) or whoever, go in. However, the Panamanian policeman will be paid better because his responsibility will be much greater since he will be protecting vital installations and since we must set an example of guaranteeing with our responsibility the support that the world has given us. We must keep order and these policemen will have to be well prepared and specialized. We have National Guardsmen, many National Guardsmen with a high degree of professionalism and who speak English. However, they must speak one, two or three languages, at least.

Therefore, there has been no hurry. That has not been the ingredient. The ingredient has been those who gave me their support, all those who gave me their support, because this very local cause was first converted by us into a national cause, then into a hemispheric cause and finally we turned it into a world cause and we have to act with responsibility in reply to the support that the world has given us.

(Question) I would like to make an observation. You have made a general presentation of the prospects for our development, not only economic but also political and administrative and governmental, assuming that the treaties become effective. Since you have just returned from Washington and spoke to President Carter, you are bringing back the experience and situation of Washington. I would like to ask you, what would happen or what would be the reaction of your government or the Panamanian people if the United States were to reject the treaties?

(Answer) First of all, I returned very convinced, not only due to Carter's opinion, but due to the opinion of the world's leaders who told me that this problem is not yours alone, but it is also our problem. We see the canal in a worldwide frame of reference, not in a local one. This problem goes far beyond the country or the electoral district of a senator. Nevertheless, in asking President Tito this question [words indistinct] he said don't worry man, how could they not approve this. It would be such an irresponsible act that it is inconceivable in this day and age of history to commit such an irresponsible act.

Nevertheless, let us be pessimistic. Let us assume that it will not be approved in spite of the pressure—not pressure of force but pressure to convince—which all the leaders of the world will exercise in support of Carter. All these things could happen, (I asked him the same question you asked). He said: Well, undoubtedly I completely agree with you that when all the paths for a peaceful solution are closed to a nation, it is completely justified to undertake a violent path. However, Torrijos, that does not justify that if it is rejected today you will take the violent path on Monday. You have to convince all the leaders of the world that you are right. You have to convince all the world's leaders that you are right and that it is the Senate's intransigence that endangers free transit, not you with a guerrilla movement or a unilateral decision. If you do not convince them, they will blame you and they will say that with your intransigence, by feeling and thinking, you have affected free transit, you have converted the transit of 8 hours into a transit of 30 days. Therefore, it is up to you to take a plane and go to talk to all the heads of state of the world. This could take you almost a year. You must convince them so that whenever this people must take another course because all the peaceful routes have been closed to it, it will have 150 spokesmen in the world and we will have not only moral support but even material support. I say 150 because this is the number of countries existing in the world.

(Question) General Torrijos, there is another matter which has been in the news during this period of intense debate in the country.

It refers to the possibility of building a sea-level canal. The opponents of the treaty claim that, by means of the treaty, Panama is mortgaging its future and granting the United States a series of rights for the building of a sea-level canal at its discretion. I would like you, General, in this talk with the Panamanian people, to explain to us really what is the nature of the agreement existing in the treaties regarding the possibility of building a sea-level canal.

[Answer] This is correct. If there was not so much suspicion—but I see it not as suspicion about me because the people know me, but it is traditional distrust because the people always look for the bad parts—if it were not for this suspicion we would be working already with the United States on the updating and adaptation of the studies for a sea-level canal. However, since this is not a matter in dispute, nor must it be solved in the treaty, I have not wanted to bring it up or accept that it be brought because if we accept this it could mean that attention will be sidetracked to the sea-level canal and the U.S. reactionary forces could say: Let us leave the situation as it is and wait for the sea-level canal.

However, there is a great deal of interest in the United States. In the treaty we give priority, not exclusiveness, for the building of a sea-level canal. The United States is given the first option. We commit ourselves to jointly study what the construction methods and route shall be, keeping in mind that it will use conventional means—that is, the atomic bomb cannot be used in building the sea-level canal.

The senator from Alaska is the one most interested in this sea-level canal because Alaska has become a great source of petroleum with possibilities that go far beyond the petroleum produced in the continental U.S. territory. The Alaska senator said: Omar, if you sign this letter I can get from the Senate 7 million balboas so that jointly with you—when I say you I am thinking about who I am going to appoint, I am thinking of the Polytechnical Institute, I am thinking of the best trained Panamanian minds in ecology, in engineering, in canal problems—let us begin to make this study now. This study should cost 7 million: 3 million for ecology, 3 million for engineering and another for something else.

I brought this matter up because some may say: He has not solved the treaty problems as yet and he is getting involved in another problem. I do not want our people to think—and our people know this—that a second marriage is the triumph of hope over experience.

(Question) General, if you have no objection, there is a matter to which I would like to return. It deals with the economic aspects of the treaty, especially the prospects of economic development in the country by means of the use of the annuity. My insistence is based on the fact that in general the country is confronting a series of economic problems, and economic factors are very important. I understand that the people are very interested in knowing how the return of the canal will reflect on the well-being of their families.

(Answer) This is a fact. This is what I say: It means the sovereignty of the Panamanian, the sovereignty of the moment, the true sovereignty. The treaty brings many economic benefits. From $2 million it passes to $80 million. There are aid plans. They are not gifts. I am very distrustful and do not accept generosity or gifts of any kind. He who accepts a gift runs the risk of being deprived of it later. The treaty includes loans which will almost allow us to solve the housing problem in the country. I feel that I have been foiled when after 9 years I have not been able to solve the problem of giving every Panamanian family a roof over their heads.

This economic injection—it is not a gift, but it is like collecting an earned salary—brings with it loans for the Agricultural Development Bank which has so much influence in our agriculture. It brings loans for irrigation and it returns the docks and drydocks. When I was in Sweden I contracted with a Swedish concern for the greatest utilization of the drydocks which are now not being used. They are among the installations to be returned. It also has the economic advantage that we can, in an organized, orderly and planned manner, build housing projects that are not as far away as Cerro Batea and the Chagres, which is detrimental to the family economy because what they save in housing they will spend on transportation. They are too far from the marketing and working centers. It also means that every North American who retires must be replaced by a Panamanian. It sees a prosperous economic horizon and I also see that there is the hope of solving our problems. It is a real hope, not a false one. It is a positive and not a fictitious hope. I see this people having the basic things which every government must provide.

(Question) General, as in the case of the economic aspect about which I feel very pleased because of the new concept and emphasis you have given this matter, I want to bring up the matter of neutrality because during these 6 weeks of debate it has been the central point of debate and it seems that the neutrality pact, the treaty dealing with permanent neutrality and the canal's operation, has become the Achilles heel of these documents. I would like for you, tonight in this talk with the Panamanian people, to explain more thoroughly how we should understand neutrality, what it represents for our country, what degree of mortgage, if any, it represents for our sovereignty and how it affects our development as an independent nation.

(Answer) This is correct. What does neutrality mean? It means that Panama com-

mits itself to the free transit of all ships of all flags of the world, without charging one more than the other. It means that Panama takes on the obligation of maintaining the geographic basin at the service of this shipping, because the canal can be very well defended, but if we did not keep the geographic basin at the service of this shipping, navigation would be impossible because there would be no water. And no matter how good a sailor the captain of a ship may be, he cannot navigate without water. It means that Panamanians, no matter how much we may fight internally, must respect the fact that this strategic belt is at the service of humanity, and that this strategic belt is our main natural resource, which has to bear the burden of the development of future generations.

What happens, then? There are those who allege that this must be weighted against what can happen in 23 years, that what we have signed is a receipt for intervention. This is not true, I would be irresponsible if I were to sign a receipt that permits intervention in Panama, but I would be equally irresponsible if I failed to leave future generations the certainty that, if their country is attacked by forces which are superior to our capacity to respond, the United States is obligated to come to our defense.

I do not want the money, the assets, the economic benefits generated by the canal to be spent totally for weapons. It would be irresponsible to spend it all on weapons because all the weapons we could buy would be useless against the weapons which other countries have. I do not want The Netherlands to say in the future that they have the right—and there is a basis—to intervene in Panama. Those who wish to intervene always find a basis to do so: that is, tomorrow the Nordic countries could say: The first people to arrive in Panama were the Vikings, and we have the right to that strategic waterway. Spain could say: Columbus was there, so it belongs to us. Others near here, because we looked at them with disapproval, could say: You have disrespect for our flag and we are going to intervene there.

I do not want the security and tranquillity of future generations to be dependent on the number of tanks that another country may have. We will maintain the force necessary to insure peaceful coexistence, but if we are attacked by superior forces, the United States is obligated to come to our defense. And when I said that we remain under protective umbrella, I say it without shame. I feel no shame because I do not wish to escape the threat of a lizard only to be threatened by a shark. This is the way it is. I do not wish to escape the threat of one kind of snake only to be threatened by another kind of snake. No, sir! What I want is for this to be really neutral and for the whole world to respect the isthmus as a peaceful place where all flags are welcome and which has opened its depth, for the benefit of humanity.

However, since at times this respect . . . it is necessary for the United States to be committed so that when we ring the bell here, when we push the button, a bell rings over there, and the United States comes in defense of the Panama Canal.

(Question) General, certain comments have been made regarding the influence to which the National Guard could be subjected because of the mechanism of joint defense provided for in the treaty for the next 23 years, an influence which, of course, would be exerted by the United States, by the U.S. troops. Some critics of the treaty call this the Americanization of the National Guard. As chief of government, and also as commander in chief of the National Guard, what do you have to say about this?

(Answer) The people think that joint defense means being in the same barracks, that we are going to send all our combat troops, our guards, the Tigres, the Diablos Rojos, the Massemontes [National Guard units], all the companies to the Canal Zone. This is not so. They are going to remain at their posts. In the event of an attack on the Canal Zone, the troops which are in Chiriqui, the troops in Tinajita, the troops which are here, come from their duty stations, and if the attack is superior to our capacity for response, I repeat, we push the button, the bell rings, and the United States is obligated to come to our defense. On the other hand, when one says Americanization, it seems as if they are disrespecting our nature. Why do they not think—if our guards were really going to be there—that perhaps we would Panamanianize the Gringo soldiers?

There is one thing that I wish to be very clear, that is that every one will remain at this post, and that guard duty will be carried out by 500, 600 or 400 guards, whether men or women, who are specialized in police surveillance of the canal. This is so because we have to maintain standards of respect which are somewhat higher than usual, but without repressing anyone. When the guardsman, the policeman, the policewoman, the traffic officer is a compatriot, he can reprimand one for a violation, cite one for a violation, but not oppress, which is what is happening at present. They (the U.S. forces) do not reprimand; they repress and oppress.

(Question) General, you were out of Panama for almost 3 weeks. You returned 1 week ago, and, of course, you have rapidly been able to sound out the level of the debate which will culminate in the plebiscite on Sunday. What comments, what message, do you have for the Panamanian people with regard to the plebiscite on Sunday?

(Answer) Mario, here is a document which it might be appropriate to read now, or else I will read it later, so that the people can see—there is talk about what Torrijos signed.

(Question) Let us read it now.

(Answer) Here President Carter commits himself, and he confirmed what he said.

(I said:) Look, Mr. President, you are not going to intervene in our domestic affairs, [and he said]: I told you that this is not my intention. Read it, read the document, so that people do not think that I went around signing things, that I hid this or that. Let the people know that when they go to vote on 23 October, everything will have been said. There is nothing, absolutely nothing, hidden.

(Velasquez) Very well, General, with pleasure. It concerns the joint Carter-Torrijos declaration agreed upon in Washington on Friday, which states as follows: In accordance with the treaty concerning the permanent neutrality and the functioning of the Panama Canal—the neutrality treaty—Panama and the United States have the responsibility of insuring that the canal will remain secure and open to the ships of all nations. The correct interpretation of this principle is that each of the two countries in accordance with its respective constitutional procedures, will defend the canal against any threat to the regime of neutrality and will consequently have the right to act in the event of an aggression or threat to the canal or the peaceful transit of ships through the canal. It does not mean, nor will it be interpreted to mean, that the United States has the right to intervene in Panama's internal affairs. Any action by the United States will be designed to insure that the canal will remain open, secure and accessible, and will never be directed against the territorial integrity or the political independence of Panama. The neutrality treaty provides that warships and auxiliary vessels of the United States and Panama will have the right to transit the canal expeditiously. This was the intention, and it will be so interpreted, of guaranteeing the passage of these ships through the canal as rapidly as possible, without obstacles, with simplified processing and, in the case of necessity or emergency, they may go to the head of the line of ships in order to transit the canal quickly. This is the end of the quote from the joint declaration.

(Torrijos) This is what we all want. There was a problem about whether they would go first. All warships will be first in line. I do not wish to see warships around here. Those warships have guns which point everywhere. They point everywhere, and when warships are in line, I would prefer to let a ship carrying copper wait rather than delay a ship which has such destructive power, because if that ship is attacked near here because it did not transit quickly, it (?harms) the country. So let it leave quickly, let it leave quickly. This is the interpretation. And I would sign this right here if you want. If Carter asks, I would sign this because this is what our youth, our generations want. And this is the peace which I am going to take to my grave—that I do not leave a canal which is greatly coveted by the whole world without knowing that a great power is obligated to come to its defense.

Finally, in closing, I would like to ask our people, now that we are incorporating the entire country under a single flag and now that our cause is only a few days from an overwhelming triumph, I would not like to see a country united under one flag, with a single geography, but with the Panamanian family divided. I ask you not to promote hatred. Let us not encourage bad blood. If in the heat of discussion—it had to be heated since it is such a hot topic—I have offended anyone, I sincerely ask them to forgive me. I do not want to leave a country united under one flag but with a divided Panamanian family. Thank you very much.

AMTRAK RAILROAD SERVICE THROUGH GEORGIA

Mr. TALMADGE. Mr. President, the Georgia House of Representatives, now in session in Atlanta, has adopted a resolution which, for myself and my colleague, Senator NUNN, I bring to the attention of the Senate, and ask unanimous consent that it be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

RESOLUTION

Whereas, many citizens of the State of Georgia are desirous of having adequate rail passenger service provided to Florida and to the Midwest; and

Whereas, Amtrak has recently cancelled the Floridian rail passenger service which operated from Chicago to Florida through Birmingham, Alabama, as a result of a lack of adequate financial support for the service; and

Whereas, rail passenger service through Atlanta and Savannah would provide Amtrak with the opportunity to serve a larger population base than the former service; and

Whereas, Amtrak has directed its staff to examine the possibility of providing service through Atlanta and Savannah; and

Whereas, such service would provide numerous Georgians with an efficient, effective and alternative mode of transportation which they do not currently have available to them; and

Whereas, the Honorable Bo Ginn, a distinguished member of Congress from the State of Georgia, is currently seeking methods for providing rail service to Georgia.

Now, therefore, be it resolved by the House of Representatives that the members of this Body hereby urge the Congress of the United States to appropriate necessary funds to Amtrak for the provision of rail passenger

service from Chicago to Florida via Atlanta and Savannah.

Be it further resolved that the Clerk of the House of Representatives is hereby authorized and directed to transmit appropriate copies of this Resolution to the Clerk of the House of Representatives of the United States, the Secretary of the Senate of the United States and to each member of Congress from the State of Georgia.

FARM POLICY

Mr. PEARSON. Mr. President, today the House Agriculture Committee initiates a set of hearings designed to assess the magnitude of the farm problem and to determine what changes should be made to the present farm program. It is my understanding that the Senate Agriculture Committee will initiate similar hearings later this month.

I am pleased that this effort is underway for it is increasingly apparent that the agriculture situation has deteriorated appreciably since the Congress wrote a new farm program last year. This reassessment is essential and we must do it as quickly as possible. The chairman of the Senate Agriculture Committee has proposed that the administration act under the authority it currently has under the existing farm program to provide substantial economic relief to the agriculture community. The ranking member of the committee and my Kansas colleague have proposed a substantial revision in the target price system as well as some modifications to the grain reserve program. Both approaches deserve serious consideration by the committee.

I have joined in cosponsoring Senator DOLE'S Flexible Parity Act of 1978. It is not yet clear that this is the direction in which we should move but this proposal is a new idea and represents fresh thinking and we need to give it very serious and careful consideration.

Other ideas will be brought forth in the weeks ahead. I know that many of those in the American agriculture movement feel frustrated by the fact that the Congress does not act immediately upon their proposals but I believe that they are coming to more keenly appreciate the fact that major shifts in public policy which affect many different interests cannot be taken except after due consideration. That consideration is now underway primarily because the American agriculture movement has effectively demonstrated that a reevaluation of present farm policy is needed.

A PITTANCE OF AID

Mr. CLARK. Mr. President, Senator Humphrey left us a major new legislative initiative in the International Development Cooperation Act, which has already been cosponsored by a number of Senators. This bill would reorganize and revamp our foreign assistance efforts by the establishment of a new administration to bring together U.S. bilateral and multilateral aid efforts. It is a major step forward in making our aid more effective in dealing with fundamental problems of world poverty.

The lead editorial in the New York Times today pays tribute to Senator Humphrey's view that foreign aid is a great investment in the long-term prosperity and stability of the world. However, the editorial points out that the President's request for funds for fiscal year 1979 fails to meet his own earlier commitment for a doubling of aid over the next 5 years. This is not just altruism, the Times states. Vital global considerations are at stake, including food shortages and population increases that will have a major impact on the way Americans live in the next decades. Interdependence is no longer a catch phrase, but a fact of life that will increasingly affect our food supply, energy needs, access to raw materials, and employment opportunities.

But we shall be hard pressed to address these needs in the context of our present foreign assistance legislation. That is why Senator Humphrey's legacy is so important to us, because it provides the organizational framework for addressing these issues. We have a chance to deal seriously with these global economic concerns this year if we will only seize it.

Mr. President, I ask unanimous consent that the editorial from the New York Times of January 31 be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the New York Times, Jan. 31, 1978]

A PITTANCE OF AID

In a eulogy to Hubert Humphrey, President Carter opened a window into his own heart on an issue close to the heart of the Minnesota Senator. "He didn't see foreign aid as a give-away," the President said. "He didn't see foreign aid as billions of dollars going from our nation to others. He said human needs. He saw foreign aid as a great investment—from a rich nation, a pittance almost, compared to what we earn and have—that builds up a well-spring of friendship between us and those hungry people."

Yet, when the time came to send his new budget to Congress last week, Mr. Carter postponed for a second year the large initiatives in economic aid that he had promised. His requests for fiscal 1979 are roughly the same as those he made last year, except for "catch-up" funds that Congress failed to provide to meet Administration pledges to the international development banks.

As presented, the Agency for International Development's program of economic assistance remains at about $4 billion, essentially unchanged except for a shift in funds from Portugal to still poorer nations. Food aid through the Agriculture Department is also held steady at about $1.4 billion. The Administration's annual commitment to the "soft" or concessional loan windows of the World Bank and regional development banks is put at $1.1 billion. Yet bookkeeping changes and a bid to make up for past delinquencies will bring this year's request for the international banks to $3.5 billion, a sum that is sure to revive last year's destructive Congressional attacks on the banks. What should be debated, however, is not why so much indirect aid is earmarked for the banks but why direct loans and grants, which Congress prefers, are not being increased to a responsible level.

Of A.I.D.'s proposed $4 billion, about half would go to the Middle East, mostly to Egypt and Israel, to keep their economies going. Direct development assistance, to be spread thinly over some 50 countries, is allotted only $1.7 billion—truly Mr. Carter's "pittance." Congress provided these funds without argument last year and has been calling since 1973 for "new directions" strategy to give priority to basic human needs. The emphasis would be on smaller rural-development programs designed to improve food output, health and employment and to reduce infant mortality and population growth. The aid agency is prepared to stress this direction. What it needs is money. Congress is unlikely to vote more than the Administration requests. The low level of Mr. Carter's proposal is variously attributed to the lagging economy, inflation, the competing demands of domestic programs, the budget deficit and Congressional opposition. These are obstacles, but not easily sustained excuses.

The United States now ranks 12th on the list of 17 aid-giving industrial democracies. It contributes one-quarter of one percent of the gross national product. That compares with one-half of one percent during the Kennedy Administration. During the 1976 campaign and at the London economic summit last May, Mr. Carter spoke of "doubling" American aid over four or five years. After Administration studies listed this goal as the highest of three plausible options, Mr. Carter chose a more modest goal last October: an increase, adjusted for inflation, of 50 percent by 1982. Now, three months later, he has failed to take even a first step in this direction.

The issue here is not just altruism. Apart from tactical considerations in the North-South diplomatic confrontations, some vital global considerations are at stake. Unless the developing countries can be helped to feed themselves, there will be widespread food shortages (and soaring prices in American supermarkets) as the world's population doubles to 8 billion around the turn of the century. Unless adverse social and economic trends can be arrested, that figure may continue to rise to 11 billion before it stabilizes. Mr. Carter was right the first time around. American aid needs to be doubled. But to achieve a 50 percent increase by 1982, some increase is needed now. It should at least be possible to more than double the small but critical development assistance element in A.I.D.'s program. That is the element that focuses directly on third-world food production and other elementary needs. Pinching pennies in this area will in the end cost Americans more than dollars.

PANAMA CANAL TREATIES

Mr. MATHIAS. Mr. President, the Senate debate regarding the ratification of the Panama Canal treaties will begin shortly. Like so many of my colleagues, I have spent the months since the treaties were signed carefully examining the issues raised by them. As part of this examination, I wrote to Secretary of State Cyrus Vance requesting the administration's position on what appear to me to be the major questions raised by the treaties. On December 5, 1977, I received a very detailed response to my letter.

As we embark on this debate, I think it important that my colleagues have the benefit of this exchange. Accordingly, Mr. President, I ask unanimous consent that my letter and the administration's response be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD as follows:

NOVEMBER 3, 1977.

Hon. CYRUS R. VANCE,
Secretary of State,
Department of State,
Washington, D.C.

DEAR MR. SECRETARY: I am writing in reference to the proposed Panama Canal Treaties.

I have examined with great interest the

testimony you and other Administration officials gave to the Senate Foreign Relations Committee regarding these treaties. This testimony, together with that given by opponents of the treaties, has been very helpful in clarifying the issues. The major questions have been delineated.

I attach a list of what I think, from my perspective as a Maryland Senator, are the major questions regarding these treaties. I would appreciate having the Administration's views on these questions. I intend to share both my questions and your responses with my constituents.

With best wishes.

Sincerely,

CHARLES MCC. MATHIAS, Jr.,
U.S. Senator.

Attachment.

QUESTIONS REGARDING THE PANAMA CANAL TREATIES

GENERAL SUGGESTIONS

1. Sovereignty—Is the Panama Canal Zone part of the United States as has been suggested by some people? What "right" do we presently have to the Panama Canal?

2. Cost and Benefit to U.S.—How much money has the United States invested in the Panama Canal since 1903, and what benefits have we derived from this investment?

3. Future Costs—Besides the many physical assets of the Canal Zone, what other economic benefits would Panama receive under the Treaty and at what cost to the American taxpayer and consumer?

4. Commercial Value—What are U.S. commercial interests in the Canal? How will U.S. commerce be affected by expected increases in toll rates?

5. Port of Baltimore—How might the volume of traffic to or from the Port of Baltimore be affected by expected toll increases?

6. Canal Operation—Once the U.S. has departed, what evidence is there that the Canal would continue to be efficiently operated?

7. Government of Panama—In dealing with the Torrijos government, are we dealing with a regime whose word and human rights record is suspect?

8. Strategic Significance—What is the strategic and diplomatic importance of the Canal? What will the strategic value be in the year 2000 when the last of our troops will be gone?

9. National Security Interests—On what basis does the Administration contend that the national security interests of the United States are best safeguarded by ratification?

10. Risks of Non-ratification—What, if any, are the risks run by the United States if we do not ratify this Treaty?

11. Alternatives—What are the feasible alternatives to ratification of the treaties?

SPECIFIC QUESTIONS

Panama Canal Treaty

1. Need for modernization (Article XII)—Why is it in the national interest to give Panama a veto over our construction of a canal through a third country?

2. Financial (Article XIII)—The Panama Canal has operated at a loss in recent years. What evidence does the Administration have that the greatly expanded payments to Panama incorporated into the Treaty can be met out of Canal revenues?

Neutrality Treaty

1. Article IV—What specific rights will the United States have to intervene in Panama after the year 2000? What is the Panamanian interpretation of these rights?

2. Article VI—What is meant by the word "expeditiously"? Does it mean priority passage of the Canal by our warships? What is the Panamanian interpretation of this word?

3. What legal weight, if any, can be attached to the statement issued by the White House at the time of General Torrijos' recent meeting with President Carter?

4. Are U.S. obligations under the neutrality treaty consistent with other U.S. obligations—for example, the Rio Pact and the OAS and UN Charters?

DEPARTMENT OF STATE,
Washington, D.C., December 5, 1977.

Hon. CHARLES MCC. MATHIAS, Jr.
U.S. Senate

DEAR SENATOR MATHIAS: Secretary Vance has asked me to reply to your letter of November 23 concerning the Panama Canal Treaties.

I am enclosing a response to the specific questions you raised and some related materials. We are happy to have been able to respond to your inquiry and hope the attached information will be helpful.

Sincerely,

DOUGLAS J. BENNETT, Jr.,
Assistant Secretary,
for Congressional Relations.

Enclosures: Material as stated.

QUESTIONS AND ANSWERS ON THE PANAMA CANAL TREATIES

1. Sovereignty—Is the Panama Canal Zone part of the United States as has been suggested by some people? What "right" do we presently have to the Panama Canal?

The enclosed statement entitled "Panama Canal Treaty Negotiations—Legal Status of the Canal Zone" describes our treaty rights in Panama. In brief, we have authority as if sovereign in the Canal Zone. We have never had sovereignty, which remains with Panama.

As a result of our treaty rights, the United States controls a strip of territory ten miles wide, coast to coast. It exercises exclusive jurisdiction over 550 square miles. Within this area we operate not only the Canal but a government on Panamanian soil. The Canal Zone Government maintains a police force, courts, and jails to enforce U.S. laws, which apply equally to all persons, including Panamanians. We maintain seven military areas. For all these rights we pay Panama an annuity of $2.3 million.

The status of the Canal Zone is different from that of territory over which the United States has sovereignty such as Alaska or the areas included in the Louisiana Purchase. In the treaty for the Louisiana Purchase the United States was explicitly granted full sovereignty over the "territory with all its rights and appurtenances." The purchase of Alaska involved a similar cession of territory. In neither transaction was provision made—as in the 1903 Treaty with Panama—for a continuing annual payment or for a continuing relationship on the matters covered by the agreements.

2. Cost of Benefits to U.S.—How much money has the United States invested in the Panama Canal since 1903, and what benefits have we derived from this investment?

Partly because accounting procedures for the Canal enterprise during its history have varied, there has been uncertainty over what would be an appropriate figure for the total United States investment in the Canal. In an effort to clarify this matter, we have asked the Treasury to review total United States expenditures on and receipts from the Canal since its inception. The final figures are not yet available, but a preliminary calculation indicates that over the entire period since 1903 expenditures have exceeded receipts by $130 million. We expect to have a definitive figure shortly and will forward it to you together with explanatory material.

The benefits of the Canal to the United States are in the time and money it saves our vessels when they move between the Atlantic and Pacific. That is why we built it, and that is why we continue to care about its future. We have operated the Canal more as a public service than as a business. The Canal's tolls have been set as low as has been compatible with meeting costs. As a result, shipping of all nations, not just our own trade, has benefited from the waterway.

3. Future Costs—Besides the many physical assets of the Canal Zone, what other economic benefits would Panama receive under the Treaty and at what cost to the American taxpayer and consumer?

An enclosed fact sheet outlines the payments Panama will receive under the new Canal agreement. We believe these payments represent a reasonable economic settlement and one which is in the interest of the United States. The annuity payments (first paragraph of the fact sheet) are to be drawn entirely from canal revenues and thus do not require the use of United States tax revenues. The public service payment (second paragraph of the fact sheet) reimburses Panama for services to be provided to the Panama Canal Commission. These services are presently provided by the Canal Zone Government at a cost of $18 million annually—or $8 million more than we will be paying Panama for these services at the start of the new treaty. The loans, guarantees, and credits contained in the economic cooperation program (third paragraph of the fact sheet) are within existing authorized programs. The only appropriation required will be $50 million to a reserve fund for the Foreign Military Sales credits. Thus, the cooperation program will for the most part impose no additional burdens on the taxpayer.

4. Commerical Value—What are United States commercial interests in the Canal? How will United States commerce be affected by the expected increases in toll rates?

Roughly 70 percent by tonnage of the cargo passing through the Canal is either going to or coming from United States ports; however, this cargo amounts to only about 12 percent of total United States waterborne trade by tonnage and is an even smaller portion of our total foreign trade.

As noted in our answer to Question 3, the Canal Treaties will provide increased payments to Panama from Canal revenues. They will also entail a number of changes in the Canal administration that will increase some operating costs and decrease others. The net effect of these changes on Canal operating costs will, we estimate, require that toll rates be increased about 30 percent when the treaties go into effect in order that the Canal can continue—as at present—to be financially self-sufficient. On the basis of studies that have been made, we do not anticipate that a 30 percent toll increase will be a burden to world shipping or the American consumer. In this connection, it is of interest to note that toll were incerased 50 percent between 1974 and 1976 and that the overall economic effect of these increases in the United States was small.

5. Port of Baltimore—The expected toll increase in the neighborhood of 30 percent resulting from the treaties should not affect the volume of traffic to and from the port of Baltimore. About 20 percent of all cargo handled in Baltimore transits the Canal—24 percent of all general cargo. In most cases, a 30 percent toll increase would not cause diversion to alternative routes or commodities. Where this might result, the cargo would continue to be handled at the port in spite of a different route.

For example, the bulk of this trade is destined for the Far East. If the tolls were to rise substantially, traffic might be diverted around the Cape of Good Hope or through the Suez Canal. This is already the case with an increasing amount of Appalachian coal destined for the Orient. From either Norfolk or Baltimore, it is shipped around the Cape of Good Hope on ships of up to 125,000 tons at a cost that is comparable to the shipping of coal through the canal on smaller ships, and any increase in Panama Canal tolls

would accelerate this trend. But, by either route, the volume of coal leaving the port of Baltimore is unaffected. Therefore, even if the toll increase resulting from the treaty changes transportation routing from the East to the Orient, the Port of Baltimore would continue to handle the traffic.

In the case of Baltimore's trade with the west coast of Latin America, the traffic would not be diverted by a toll increase and therefore the Port of Baltimore would not be adversely affected. General cargo is the largest category of trade originating from the port destined for Latin America. Our sensitivity studies show that a 30 percent increase would have a minimal impact on the average additional transport cost (for example, approximately $3.00 on a new automobile). This is not enough of an increase to cause diversion to alternative routes.

6. Canal Operation—Once the United States has departed, what evidence is there that the Canal would continue to be efficiently operated?

More than 70 percent of the work force is Panamanian. The Treaty provides for training programs and on-the-job experience for Panamanians at all levels of the operation during the period of United States control. We believe that this period of twenty years provides ample time to prepare Panamanian personnel to operate the Canal.

By the time the treaty expires, there should be well-qualified Panamanians to fill all the positions related to Canal operation.

7. Government of Panama—In dealing with a regime whose word and human rights record is suspect?

In general, Panamanian enjoy life, liberty and security of person. Secretary Vance stated in his testimony before the Senate Foreign Relations Committee on September 26:

"The Panamanian Government has in the past been charged with abusing the civil and political rights of some of its citizens and we have discussed this issue with that Government. The closer relations between our two governments that will grow out of the new treaties will provide a more positive context in which to express such concerns, should it be necessary to do so in the future."

I am enclosing the full text of this statement and a copy of the Department's Human Rights Report which was part of the Congressional presentation document for the FY 1978 Security Assistance Program.

8. Strategic Significance—What is the strategic and diplomatic importance of the Canal? What will the strategic value be in the year 2000 when the last of our troops will be gone?

The position of the Joint Chiefs of Staff has been that the Panama Canal is a major defense asset, the use of which enhances United States capability for timely reinforcement of United States forces. Its strategic military advantage lies in the economy and flexibility it provides to accelerate the shift of military forces and logistic support by sea between the Atlantic and Pacific Oceans and to overseas areas. The strategic value of the canal is not expected to change substantially through the life of the new canal treaty and beyond. The United States military interest in the Canal, however, is in its use, not ownership. We need to be able to depend on the Canal when we need to move ships or cargo. This requires an arrangement that guarantees, as much as is possible, free passage at all times. It means making sure that:

The canal system is not physically put out of use by sabotage or by inexpert operation.

Ships passing through are safe from attack.

9. National Security Interests—On what basis does the Administration contend that the national security interests of the United States are best safeguarded by ratification?

While the Panama Canal and the Canal Zone can be defended, even in a hostile environment, the continuous operation of the Canal could not be ensured in that environment. The canal complex is susceptible to varying degrees of sabotage and the Canal Zone is vulnerable to attack from forces or weapons located outside the the area of United States jurisdiction.

The political environment, therefore, is a very important factor in canal defense. The preferred defense of the Canal would be in conjunction with a friendly Panama. Thus a new Canal treaty, by fostering a friendly and cooperative relationship with Panama, would be most conducive to effective canal defense.

10. Risks of Non-ratification—What, if any, are the risks run by the United States if we don't ratify this Treaty?

It is fair to say that after 13 years of negotiating, if the treaties were rejected, our relations with Panama would be shattered, our standing in Latin America damaged significantly, and the security of the Canal itself placed in jeopardy.

11. Alternatives—What are the feasible alternatives to ratification of the Treaties?

a. No action.—

This option assumes that the *status quo ante* can be preserved. However, a decision not to press ahead with the treaty does not mean that the existing situation in Panama would continue indefinitely. Nationalists and extremist political forces in Panama are pressing for immediate and drastic changes in the Canal's status, and discontent in Panama will become stronger and more forceful if frustrated by the absence of a treaty.

b. Postponement.—

Postponement would satisfy neither those Panamanians who support the Treaty nor the Treaty's opponents, who want Panama to take possession of the Canal immediately. Thus, postponement would create an unstable situation, whose consequences would eventually be similar to those of taking no action.

SPECIFIC QUESTIONS

1. Article XII.—

For the duration of the Panama Canal Treaty, the United States and Panama are committed to deal exclusively with each other concerning the possible construction of any new canal. Paragraph I of Article XII states that both countries will conduct a joint feasibility study, and if the two countries conclude that a sea-level canal is necessary, will negotiate mutually acceptable terms and conditions for its construction.

Panama has agreed that no new canal will be built in its territory during the treaty period without the agreement of the United States, and in return, we have agreed not to negotiate for the right to construct an interoceanic canal elsewhere in the hemisphere.

We believe the agreement not to negotiate elsewhere is not detrimental to United States interests. On the contrary, this arrangement has assured us exclusive rights to participate in a sea-level canal along the only really suitable routes. The 1970 United States study of possible alternative routes for a sea-level canal concluded that from the standpoint of engineering feasibility and cost, sites in Panama are far more suitable for a sea-level canal than sites in any other country. For example, the estimated cost for constructing a canal with conventional explosives on the Nicaragua route was $11 billion, compared with $2 billion for a Canal in Panama.

2. Article XIII.—

While it is true that the Canal Company has been operating at a deficit for the last few years, we anticipate the Company will show a slight profit this year. Traffic is increasing, and with the advent of North Slope oil from Alaska, we expect this trend to accelerate.

In addition, under the terms of the new treaties, the Canal Zone Government will be dismantled and some of the Company's activities will revert to Panama. This will reduce expenditures and lower operating costs. We anticipate that a toll increase in the neighborhood of 30 percent will be necessary to meet our treaty obligations. It should be possible to hold toll increases at reasonable levels, although increases will, as in the past, be necessary from time to time to cover increases in operating costs due to inflation or other reasons.

Neutrality treaty

1. Article IV.

2. Article VI.—

There is no disagreement between the United States and Panama as to the meaning of Articles IV and VI. In October, both governments issued a statement of understanding which reaffirmed their interpretations of the meaning of these provisions. Enclosed is that statement and a paper on the Defense and Neutrality of the Panama Canal under the new treaties.

3. What legal weight does the understanding have?

Such statements are often made which are signed by neither party but represent their views. Our legal interpretation is that it is an agreed statement by both parties, and is the definitive interpretation of those two articles.

4. Consistency with Rio Pact, OAS and UN Charters.

The Neutrality Treaty is entirely consistent with this provision. It authorizes the use of force for the sole purpose of maintaining the neutrality of the Panama Canal. It does not authorize, and the United States would not consider the use of, armed force against the territorial integrity or independence of Panama or in any other manner inconsistent with the purposes of these Charters.

PANAMA CANAL TREATY NEGOTIATIONS

I. Legal Status of the Canal Zone.—

The legal status of the Panama Canal Zone is a question of considerable interest in the context of current negotiations with Panama for a new canal treaty. The position of the United States Government concerning this matter is as follows:

Article II of the 1903 Treaty grants to the United States "the use, occupation and control" of the Canal Zone, and Article III authorizes the United States to exercise therein "all the rights, power and authority . . . which it would possess and exercise if it were the sovereign of the territory . . . to the entire exclusion of the exercise by the Republic of Panama of any such sovereign rights, power or authority."

The question is often posed as to whether this grant of rights had the effect, under international law, of transferring the territory comprising the Canal Zone from Panamanian sovereignty to that of the United States. In other words, is the international legal status of the Canal Zone that of Panamanian or of United States territory?

It is clearly established under international law that a state may grant to a foreign state the right to exercise exclusive sovereign powers within portions of its territory without effecting a cession of its own sovereignty over that territory. For example, during the latter part of the 19th Century China's leases of naval bases to France, Germany and Russia included grants to the lessees of rights to exercise sovereign powers within the leased ares. (I MacMurray, Treaties and Agreements with and Concerning China, 1894–1919, at 112, 119, and 128.) Similarly, Article III of the U.S.-Cuba Agreement of February 16, 1903, relating to Guantanamo Naval Station provides:

"While on the one hand the United States recognizes the continuance of the ultimate

sovereignty of the Republic of Cuba over the above described areas of land and water, on the other hand the Republic of Cuba consents that during the period of the occupation by the United States of said areas under the terms of this agreement the United States shall exercise complete jurisdiction and control over and within said areas. . . ." (TS 418; 6 Bevans 1113.)

A more recent example of one nation being granted sovereign rights within the territory of another is found in Article III of the Treaty of Peace with Japan (3 UST 3169; TIAS 2490) which authorized the United States to "exercise all and any powers of administration, legislation and jurisdiction over the territory and inhabitants of (the Ryukyu and Daito islands)" while Japan retained what Secretary Dulles termed "residual sovereignty"[1] over those areas. (The rights of the United States under Article III were terminated by the US-Japan Treaty of June 17, 1971).

With respect to the Canal Zone, the United States has consistently recognized that Panama retains "titular" sovereignty over the area.

". . . The truth is that while we have all the attributes of sovereignty necessary in the construction, maintenance, and protection of the Canal, the very form in which these attributes are conferred in the treaty (of 1903) seems to preserve the titular sovereignty over the Canal Zone in the Republic of Panama . . . (Letter from Secretary of War William H. Taft to President Theodore Roosevelt, January 12, 1905.)

In essence, while the United States required extensive treaty rights to use the Canal Zone and to exercise sovereign powers within it, the area technically remains part of the territory of the Republic of Panama.

"The rights of the United States in the Panama Canal Zone offer an example of the most complete transfer of jurisdiction over a territory without its being a cession in the technical international law sense . . ." (Vali, Servitudes of International Law, 2d ed., 1958, 254.)

This distinction between the right to exercise jurisdiction within the Zone area and its international status was recognized in Article III of the Treaty of Friendship and Cooperation of March 2, 1936 (53 Stat. 1807; TS 945), which refers to the Zone as "territory of the Republic of Panama under the jurisdiction of the United States."

Perhaps the most clear description of the nature of the rights the U.S. acquired in the 1903 treaty is that of M. Phillipe Bunau-Varilla, the principal drafter of the document:

"I decided to grant to the United States, *in the interior of the zone, all rights, power, and authority that she would have if she were sovereign, to the entire exclusion of the use of any such rights, power and authority by the sovereign Republic of Panama.*

"The United States, without becoming the sovereign, received the *exclusive use* of the rights of sovereignty, while respecting the sovereigntly itself of the Panama Republic." (Italics in original.) (Bunau-Varilla, *From Panama to Verdun* (1940 158).)

With respect to the domestic law of the United States, the Canal Zone has been treated in various ways for the purpose of defining the applicability to the Zone of specific legislative provisions. For example, the Canal Zone is considered to be an organized territory of the U.S. for purposes of extradition (37 Stat. 48 USC 1330). On the other hand, it is treated as foreign territory for purposes of customs duties (33 Stat. 843, 19 USC 126) and its ports are considered foreign ports for purposes of the transportation of mail (*Luckenback Steamship Co.* v. *U.S.* 280 U.S. 173 (1930)).

Thus, U.S. domestic legislation and court decisions would not appear to provide a basis for any definitive conclusions with respect to the international status of the Canal Zone, nor are they intended to. Rather, such definitions are made for the sole purpose of extending the effect of a specific provision of U.S. law to the Canal Zone or of exempting the Zone from its application.

The often cited case of *Wilson* v. *Shaw* (204 U.S. 24 1907) must be considered in this context. That case was taken to the Supreme Court by a taxpayer who maintained that the Federal Government could not continue to expend funds lawfully for the Construction of an interoceanic ship canal in Panama. He sought an injunction against any further expenditures on the grounds that the U.S. did not have a sufficient legal interest in the Canal Zone to authorize the expenditure of tax money there. The Supreme Court held that the Federal Government did have broad enough power to encompass expenditure of funds for the construction of the Canal and refused to issue an injunction. In speaking of the legal interest of the U.S. in the Zone, the Court said.

"It is hypercritical to contend that the title of the United States is imperfect, and that the territory described does not belong to this Nation, because of the omission of some of the technical terms used in ordinary conveyances of real estate."

Thus, the Supreme Court did equate the Canal Zone with territory belonging to the United States, but in the context of establishing the authority of the Federal Government to expend funds and to engage in construction work in the Zone. As noted above, the Court has subsequently held the Zone to be foreign territory for other purposes (*Luckenbach Steamship Co.* v. *U.S.* (280 U.S. 173 1930)), and such interpretations of the status of the Canal Zone under domestic U.S. law for the purpose of determining the applicability of specific statutes therein are not determinative as to its international status.

PANAMA CANAL TREATY—ECONOMIC ARRANGEMENTS FACT SHEET

1. Annuity Provisions (Article XIII.)—

The new Panama Canal Commission shall pay Panama the following three annual payments exclusively out of Canal operating revenues:

a. 30 cents per Panama Canal ton transiting the canal. (This rate will be readjusted during biennial periods on the basis of the wholesale price index of total manufactured goods of the U.S. beginning 5 years after entry into force of the treaty.);

b. $10 million; and

c. Up to $10 million to the extent Canal operating revenues exceed expenditures.

2. Payments for Public Services (Article III).—

The new Panama Canal Commission and its U.S. citizen employees will be exempted from taxation by Panama. The Commission shall reimburse Panama $10 million for the cost of municipal public services; i.e., police, fire protection, street maintenance, street lighting, street cleaning, traffic management and garbage collection. Every three years that cost will be reexamined to determine whether an adjustment of the payment should be made.

3. Economic Cooperation Outside the Treaty.—

Outside the treaty, the United States has pledged its best efforts commitment to provide Panama with an economic program to promote its economic stability and development under existing statutory programs. Each element of the program would provide non-concessional loans, credits or guarantees and would require private sector participation. The economic cooperation program over 5 years would include:

Up to $200 million in Export-Import Bank credits;

Up to $75 million in A.I.D. Housing Guarantees; and

$20 million in Overseas Private Investment Corporation loan guarantees.

Panama will also receive up to $50 million in foreign military sales credits over a period of 10 years, under existing statutory programs, to improve Panama's ability in the Canal's defense.

HUMAN RIGHTS REPORT

I. POLITICAL SITUATION

Panama is a republic governed under the provisions of a constitution which entered into force October 11, 1972. The present government came into power in 1968 following a coup. Organized opposition by political parties is not permitted. A transitory provision of the 1972 Constitution grants General Omar Torrijos broad powers as Chief of Government for a six-year period.

Torrijos has based his government on broad support within Panama, and has made a number of concessions to both the left and the right to assure the continuation of this support.

II. LEGAL SITUATION

The Constitution guarantees equality before the law. It guarantees a hearing before a competent authority within 24 hours of detention, and writ of habeas corpus. Warrants are required before a search can be undertaken. The Constitution also guarantees freedom of movement, religion, assembly and expression. These guarantees are generally observed.

Justice is generally administered fairly and without regard to race, social class or wealth.

III. OBSERVANCE OF INTERNATIONALLY RECOGNIZED HUMAN RIGHTS

A. Integrity of the person

Article 3: Panamanians enjoy the guarantee of life, liberty, and security of person. A very few exceptions have occurred where individuals engage in political activities which the Government considers inimical. Nearly all of the exceptions involving arbitrary imprisonment occurred prior to 1972. The noteworthy exceptions in recent years occurred when 14 participants in the January 1976 political protests and three persons who allegedly fomented riots in September 1976 were exiled.

Article 5: There is no evidence that the Panamanian Government makes a practice of arbitrary imprisonment, torture, or murder for political purposes. A "Panamanian Committee for Human Rights" has published an anonymously-authored pamphlet alleging brutality on the part of the Government. There is no independent corroboration of the allegations and it appears that nearly all of the alleged incidents are believed to have occurred during the 1968–71 period.

Article 8: In general, Panamanians can obtain an effective remedy from the courts if their rights are violated. Exceptions to this are more frequent for political opponents of the Government.

Article 9: The Government has exiled opponents who it felt threatened its existence. This occurred most recently in January and September 1976, when the government summarily exiled 17 prominent Panamanians. Although this latest group was composed primarily of lawyers and businessmen, opponents who have been exiled represent the full political spectrum including radicals on the left and leaders of the Communist party (PDP). Some exiled persons have been permitted to return to Panama after a time.

Article 10. The practice of *amparo* (habeas corpus), which requires that a hearing to

---

[1] Conference for the Conclusion and Signature of the Treaty of Peace with Japan: Record of Proceedings 78 (Department of State Pub. 4392, 1951.)

determine charges and rights be held within twenty-four hours after arrest, is generally observed in Panama.

Article 11: Panamanians have reasonable assurance of obtaining a fair trial in the vast majority of civil and criminal cases. The guarantee of a fair trial might not be observed in a case with important political considerations, however.

B. Other important freedoms

The Government does not condone discrimination although some evidence of it remains in Panama's racially-mixed population. In general, Panamanians can move freely within the country and may travel abroad without restrictions. Property rights are respected.

There is freedom of religion. Freedom of assembly is observed. However, political organization and activity are limited. Organized open political opposition is not tolerated. The media are monitored by the government. While strict censorship is not imposed, editors and others in positions of responsibility are made aware of what will be tolerated by the government; and editors of one newspaper chain, which is owned primarily by high officials of the GOP, take guidance from the Government. While radio criticism of the GOP has occasionally been sharp, criticism appearing in the press is aimed primarily at low-level officials and at failures in the implementation of policies rather than broadside attacks on top leadership.

IV. OTHER HUMAN RIGHTS REPORTING

The Amnesty International Report on Torture, published in 1973, states that the most serious allegations of torture in Panama date from before 1970, but notes allegations of single instances in 1971 and 1972. The Amnesty International Report 1975–76 does not contain a section on Panama.

Freedom House describes Panama as "not free".

THE DEFENSE AND NEUTRALITY OF THE PANAMA CANAL UNDER THE NEW TREATIES

The new Panama Canal Treaty and the Treaty Concerning the Permanent Neutrality and Operation of the Panama Canal provide the framework for the United States permanently to protect the security of the Panama Canal and to assure its operation in accordance with the general principle of transit by the vessels of all nations on a non-discriminatory basis. The arrangements under which the United States will assure the security and neutrality of the Canal are in two forms: those which apply until 2000, while the United States operates, maintains and defends the Canal, and those which apply permanently thereafter.

PANAMA CANAL TREATY

The arrangements in the Panama Canal Treaty for the protection and defense of the Canal until 2000 are based on the concept of a combined defense with Panama. However, under Article IV of the Treaty, the United States assumes primary responsibility to protect and defend the Canal throughout the period of United States operation of it. Panama has agreed further in Article IV that the United States may act unilaterally against a threat to the Canal from any source.[1] While the United States has undertaken in Article IV to attempt to maintain its military force in Panama at a level no greater than that in the Canal Zone at the entry into force of the Treaty (at present approximately 9300), the United States may increase that force as it deems necessary for the defense of the Canal. In addition, the Treaty and its related agreements grant to the United States the rights until the year 2000 to use the specified defense sites and military installations necessary for the protection and defense of the Canal.

Article IV further provides for close coordination and cooperation between the United States Forces and the Panamanian National Guard. This will be carried out through the military Combined Board established in the Treaty. It is anticipated that during the Treaty term the Panamanian Forces will assume an increasing degree of operational responsibility in the combined plans the Combined Board will develop for Canal defense.

TREATY CONCERNING THE PERMANENT NEUTRALITY AND OPERATION OF THE PANAMA CANAL

Assurance of permanent access to the Canal for the United States after 1999 is provided by the Treaty Concerning the Permanent Neutrality and Operation of the Panama Canal (Neutrality Treaty). This treaty enters into force simultaneously with the Panama Canal Treaty and does not terminate regardless of the termination of any other treaty or agreement between the two countries. The United States and Panama, during their respective periods as Canal operator, must operate the Canal in accordance with the regime of neutrality which is established in the Treaty. Thus, after 2000, Panama is obligated to the United States to afford access to the Canal to United States vessels, in accordance with these same provisions, including the right for its military vessels to transit the Canal at the head of the line of vessels waiting to transit when the United States considers it necessary. Panama will have the same obligation as regards any other canal constructed in Panama.

THE REGIME OF NEUTRALITY

The Treaty establishes a "regime of neutrality"—general rules for operation of the Canal and the transit of vessels—that are set out in the Treaty. The basic principle of this regime, stated in Article II of the Treaty, is that "both in time of peace and time of war the Canal will remain secure and open to peaceful transit by vessels of all nations on terms of entire equality without discrimination against any nation concerning conditions or charges of transit."

In addition to establishing the basic premise of non-discriminatory operation of the Canal, this statement sets forth two important general principles for the future. First, it makes clear that the security of the Canal is a vital element of its regime of neutrality. Secondly, it contains the basic commitment of both Parties to maintain the Canal open.

RULES OF NEUTRALITY

The regime of neutrality also contains specific standards for the operation of the Canal. These include commitments that it shall be operated efficiently and that the conditions of transit and the applicable rules and regulations shall be just, equitable, reasonable and limited to those necessary for safe navigation and efficient operation of the Canal (Article III Section 1(a)). There is a further requirement that tolls and other charges for transit and related services must be just, reasonable, equitable and consistent with the principles of international law. (Article III Section 1(c)).

Special provision is made for the transit of military vessels without inspection, and irrespective of the type of armament they carry or how they are powered. (Article III Section 1(e)). Under this provision, military vessels which may be nuclear powered or armed are assured of the right to transit the Canal permanently without inspection. The Treaty permits such vessels to transit the Canal at all times, irrespective of any belligerent status they may have. However, the waters of the Canal would extend only for about three miles, as they do at present.[2] While a general blockade of the Canal outside these waters would not be permissible, belligerents of the United States navigating the high seas would be fair game.

One of the most significant elements of this regime of neutrality is Panama's commitment that after after 1999 only Panama will operate this Canal or any other canal ever constructed in Panama (Article V and Article I). Panama has also agreed that it alone will maintain military forces or military installations within its territory after the termination of the Panama Canal Treaty (Article V).

Article VI of the Neutrality Treaty provides certain limited exceptions to the general principle of non-discriminatory transit established in Article II. The first exception is that U.S. and Panamanian military vessels may transit the Canal expeditiously regardless of "their internal operation, means of propulsion, origin, destination, armament or cargo carried."

It is agreed that this special right of transit assures United States and Panamanian military vessels the quickest transit possible which will include, when necessary, the scheduling of their transit at the head of the line of vessels waiting to transit. The provision for expeditious passage is stated as an explicit exception but is not inconsistent with the general implementation of the principle of non-discrimination under the 1903 Convention in which certain vessels, e.g., passenger vessels and vessels carrying perishable cargos, may be scheduled ahead of waiting vessels when circumstances warrant.

The second exception to the general principle of non-discrimination is that the Canal operator is authorized to provide toll-free transit to the troops, vessels of war and materials of war of Colombia. This provision allows the United States, as Canal operator, to accord it such preferential transit in order to fulfill the United States' obligation to Colombia under the 1914 Thompson-Urritia Treaty. After 1999 Panama is authorized to extend such preferential treatment to Costa Rica, its other neighboring country, as well.

The inclusion in the regime of neutrality of authorization for Panama to make this exception to the general principle of non-discrimination for Costa Rica after 1999 highlights the fact that the Neutrality Treaty constitutes a permanent commitment from Panama to the United States to operate the Canal always in accordance with this regime; no changes in the regime could be made in the future unless the United States were to agree.

An important additional aspect of the Neutrality Treaty is its assurance in Article I that this "same regime of neutrality shall apply to any other international waterway that may be built either partially or wholly in the territory of the Republic of Panama." This means that the assurances of efficient operation and non-discriminatory access contained in the Treaty would continue in effect for any new Canal in Panama irrespective of when or by whom it may be constructed. (Under Article XII of the Panama Canal Treaty, the United States has a veto over any sea-level canal construction in Panama until the year 2000.)

MAINTENANCE OF THE REGIME OF NEUTRALITY

In Article IV of the Treaty, Panama and the United States agree to maintain permanently the regime of neutrality for this Canal and for any other canal which may ever be built in Panama with United States partici-

[1] "Each Party shall act, in accordance with its constitutional processes, to meet the danger resulting from an armed attack or other actions which threaten the security of the Panama Canal or of ships transiting it."

[2] See map attachment to the Annex of the Neutrality Treaty.

pation in construction or financing.[3] Panama and the United States have issued a statement of interpretation clarifying the meaning of this Article. The statement recognizes that this Article commits both parties to defend the Canal permanently against any threat to the regime of neutrality established in the Treaty. Accordingly, either party would have the right to take whatever action it would deem necessary, including military action in appropriate circumstances, to defend the Canal against any aggression or threat directed against the Canal or against the peaceful transit of vessels through the Canal.

However, the United States would not have the right, nor would it intend, to intervene in the political processes or internal affairs of Panama. The statement thus makes clear that any United States action would be directed at insuring that the Canal will remain open, secure and accessible, and would not be directed against the political independence or territorial integrity of Panama.

While this provision commits the parties to maintain the Canal's neutrality, the means either party would use to accomplish that objective would be entirely within its discretion. A wide range of measures would be available. It is clearly understood, as noted in the statement of interpretation, that any decision by the United States to use military force in a particular circumstance, would be made in accordance with its Constitutional processes.

PROTOCOL TO THE NEUTRALITY TREATY

Following the ratification of the Panama Canal Treaties, a protocol to the Neutrality Treaty would be opened for accession by all nations of the world in accordance with a resolution to be sponsored by the United States and Panama in the Organization of American States. The nations acceding to this Protocol will associate themselves with the objectives of the regime of neutrality described above, and will promise that they will respect that regime and that the vessels of their registry will observe its rules. The Protocol also recognizes that the maintenance of the established regime of neutrality will ensure access to the Canal permanently on a basis of entire equality.

NUCLEAR SECURITY

Mr. NUNN. Mr. President, I would like to take this opportunity to insert into the RECORD three articles which recently appeared in the Atlanta Journal-Constitution. Written by investigative reporter, Joseph Albright, they recount in detail the ease with which Mr. Albright, under the feigned identity of a construction contractor, managed to gain entry into two nuclear weapons storage sites of the Strategic Air Command. The lack of security precautions which Mr. Albright encountered in penetrating these two highly sensitive installations raises questions about the vulnerability of our nuclear weapons to unauthorized seizure.

On January 19, I wrote a letter to Secretary of Defense Harold Brown expressing my concern and asking for a status report on the security of our nuclear storage facilities in the United States.

I believe that both the executive branch and the appropriate congressional committees should give immediate and careful consideration to the questions this series of articles presents to the security of our weapons.

Mr. President, I ask unanimous consent to have these articles printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

NUCLEAR SECURITY: HOW SECURE?—I

(By Joseph Albright)

WASHINGTON.—As an impostor, I talked my way past the security guards at two highly secret Air Force nuclear weapons depots last month and was given a tour of the weak links in their defenses against terrorist attacks.

I passed within a stone throw of six metal tubes that appeared to be hydrogen bombs. I could not tell if they were live bombs or dummy training devices, which contain merely the electronic ingredients of bombs.

Without doing anything illegal, I also purchased a set of government blueprints showing the exact layout of the weapons compounds and the nearby alert areas where bomb-laden B–52s of the Strategic Air Command are ready to take off in case of nuclear war.

One blueprint disclosed a method of knocking out the alarm circuits. Another diagram showed two unguarded gates through the innermost security fence.

Carrying a Brooks Brothers topcoat and a yellow plastic hardhat, I appeared at the first base last month and claimed to be a potential bidder on a construction contract.

No one questioned me or asked for any credentials except for my District of Columbia driver's license. No one searched me or demanded to inspect my bulky briefcase.

As far as the guards knew, I could have been carrying hand grenades.

Looking equally amateurish, I entered another SAC base a few weeks later and joined a tour of its weapons compound which had been organized for prospective contractors.

This time, guards required two IDs—a credit card and my driver's license. They also manifested a considerable interest in my middle initial. They even went so far as to search all briefcases. However, no one asked whether I really was a contractor.

The first SAC base is less than 10 miles from a medium-sized American city, in a region that has been beset by terrorist dynamitings. The second SAC base is about 20 miles from a major state university.

The exercise was part of a two-month investigation into one of the ghastly, yet unavoidable, questions of the nuclear age. Are Americans safe from their own nuclear weapons?

Without succumbing to hand-wringing or hysteria, it is fair to conclude that there are some inexcusable chinks in the doors to the U.S. atomic arsenal.

Informed in advance about this story, Pentagon nuclear weapons chief Donald R. Cotter ordered an immediate investigation into Defense Department construction procedures involving weapons sites. As part of the inquiry, Cotter phoned Air Force Gen. Richard Ellis, SAC commander in Omaha, to find the exact circumstances of my unwanted visits.

"You did find a considerable chink in the security system," acknowledged Cotter, who is Defense Secretary Harold Brown's assistant for atomic energy.

"This was too . . . simple," said Cotter. "This story should be a plus for our security efforts." In recent years, Cotter explained, construction jobs at weapons sites have been opened to contractors without security clearances in an effort to avoid concentrating too much business among a small "club" of high-priced builders.

My nuclear excursion was only one piece in a disturbing pattern. Other evidence, found in government documents and in interviews with Pentagon and Department of Energy weapons experts, includes:

The CIA, Defense Department and key members of Congress are clearly concerned about the possibility of terrorist groups seizing weapons of mass destruction for high-stakes political extortion. "It seems prudent to assume that sooner or later some group is bound to take the plunge," an unclassified CIA study declared in 1976.

Although no one has ever stolen a nuclear weapon, there have been troubling incidents that have received little or no publicity. Thus in 1974, guards at a Nike-Hercules anti-aircraft battery near Baltimore were unable to capture an intruder whom they saw near the corner of a warhead building. In 1975 a terrorist group affiliated with the West German Baader Meinhof gang reportedly stole some mustard gas from a munitions depot in France. In 1976 an unidentified Army unit found what the Defense Nuclear Agency calls "indications of possible attempts to reconnoiter or photograph a storage site." Last year according to the Defense Nuclear Agency an Army unit "reported that two individuals attempted penetration of the outer boundaries of a security area."

Despite these warnings, the Defense Department is relying on relatively unsophisticated devices to keep intruders out. When the military finishes its $300 million program to "harden" weapons storage sites, they will have stronger fences, better lighting and bullet-resistant glass in the guard shacks. But in many cases, the sites will not be protected with the most modern electronic sensors, such as those which make up the "early warning system" operated by a U.S. support mission in the Sinai desert to detect an attack from either the Egyptian or Israeli side.

Officially, the Defense Department tries to keep secret the location of nuclear storage sites by refusing to confirm or deny the presence of nuclear weapons. However, in congressional testimony, the Air Force published a list of 16 of its bases where it sought funds for "nuclear weapons security improvements."

The CIA, in its 1976 study "International and Transnational Terrorism," said it would be "a few years yet" before any terrorist group would be able to manufacture or steal a nuclear weapon. But the CIA study chillingly added:

". . . A more likely scenario—at least in the short term—would seem to be a terrorist seizure of a nuclear weapons storage facility or a nuclear power plant in a straightforward barricade operation. Such a group need not threaten a nuclear holocaust (although that possibility would be in the back of everyone's mind), just the destruction of the bunker or reactor with the attendant danger of radiological pollution. The publicity would be enormous. And if their demands were to be denied, the terrorists would be in a position to tailor the amount of damage they actually inflicted to their appreciation of the existing circumstances."

Defense bomb experts insist that American nuclear weapons are designed so that their nuclear components cannot be detonated by a single external shock or fire. However, nuclear weapons contain powerful TNT charges, which can explode and scatter plutonium into the atmosphere without setting off a nuclear blast.

Last year, Joe F. Meis, a ranking Pentagon logistics expert, acknowledged to the House Appropriations Committee that some of our stockpiled tactical nuclear weapons—those with destructive power equivalent to the bomb dropped on Hiroshima—are not fully safe from theft.

"It is remote, but it is conceivable," Meis said, "that an attempt to capture a tactical nuclear weapon might succeed against the limited existing security systems. The latter

[3] The definition of "Canal" in Annex A includes the existing Canal and any other interoceanic canal in Panama in which the United States participates in construction or financing.

were designed for a quieter age and not configured to meet the bold and sophisticated operations of today's highly organized revolutionary groups."

The official assumption is that no one could ever penetrate a SAC base and seize a strategic weapon—a weapon that could explode with the force of 50 Hiroshima-sized bombs.

As Alfred D. Starbird, the retired Army general who heads the nuclear weapons program in the Department of Energy, put it, bombs stored at SAC bases "are secure at this time."

If my experience means anything, the average commercial airport in America is in some ways better prepared against terrorists today than some of SAC's bomb storage sites. This is due, in part, to revealing bits of information in unclassified government publications.

Last fall, a U.S. Commerce Department magazine published a notice to prospective bidders entitled, "Weapons System Security Improvements." According to the notice, the successful bidder would provide "lighting, fencing and security entry control facilities of both the bomber alert area (apron) and weapons storage area." The cost estimate for this job was given at $1 million to $5 million.

What was dangerous about the notice was that it named the base where this construction would take place. By referring to published congressional testimony, anyone could readily deduce that this was a nuclear weapons storage site.

The Army Corps of Engineers, which placed the contract notice, included an inviting sentence: "Plans and specifications available on or about 14 Nov 77 at a cost of $5.30 per set (non-refundable)."

Curious about whether the Corps of Engineers could distinguish between a legitimate contractor and a phony. I mailed them my personal check for $5.30. It was accompanied by a five-line letter, typed on my personal stationary in which my nonexistent "assistant" asked for the plans without specifying that I was a contractor.

A fat brown envelope, stamped "Priority Mail," arrived at my home the following week. Inside was a large book of 53 blueprints showing how the weapons storage area is now protected and how it would be after planned security renovations. Also enclosed were about 300 pages of technical specifications for the contract, including instructions on how workmen can get credentials to enter the base.

Amid the dense language of the specifications one passage stood out: "Bidders are urged and expected to inspect the site where services are to be performed and to satisfy themselves as to all general and local conditions that may affect the cost of the contract. . . ."

It took me three phone calls to reach a Mrs. Hilda Ferry, a kindly secretary who works in the base construction office. Could she, I wondered, arrange for me to tour the site next Tuesday? She asked for my Social Security number and told me to call back in 24 hours so she could check it with her boss, Capt. William Branford.

The following day, I telephoned Mrs. Ferry once again. No problem, she said. Be here at 1:30 p.m. and ask for a Mr. Wilmer.

I know nothing at all about soil compaction, mitering of joints, electromagnet capability or anything else about the construction industry. I thought I might pick up some of the jargon by visiting the Washington library of the Association of General Contractors. As it turned out, I spent two hours reading an encyclopedia of construction terms and got no further than the "B"s.

Steve Wilmer, a civilian construction employee at the base since 1966, was mostly interested in talking about the weather. At one point he said something about electrical generators I did not understand. I said I was deaf in one ear. He nodded.

He suggested that I could leave my yellow hardhat in my car.

Under the specifications for the contract, the Corps of Engineers had the right to ask for a list of my other construction contracts before showing me the site.

No one asked.

Nor was I asked to prove that I was a licensed contractor. Although many states require construction contractors to be licensed, it turns out that the federal government does not.

Even so, I thought the game was up when Wilmer led me into a windowless room inside the SAC security detachment and we stood waiting for 20 minutes. But the only trouble, it finally developed, was that the sergeant who was supposed to escort us was out to lunch.

So Lt. Andrew Ford, the chief Air Force security man on duty, offered to drive us around the post in his pickup truck.

First stop was the bomber alert apron, a fenced-in airplane parking lot where I counted the row of jungle-camouflaged B–52s. Before entering the area, Ford spent almost a minute checking under the hood of his truck and inside each of the wheel covers to find if anyone was hiding there. If he had any curiosity about me, he satisfied it by examining my D.C. driver's license.

Inside the alert apron, I asked Wilmer why the Corps of Engineers had decided to bulldoze one area near the fence.

"We have to get rid of those hiding places," said Wilmer, pointing to several erosion-caused ditches.

"We wanted to do a little more work over there, but it was cut out." I asked why. "Money," said Wilmer.

Ford now drove us a mile down an isolated road to a weapons depot, a fenced compound about the size of six football fields. Inside the fence were about half a dozen earth-covered mounds, known in the Air Force as igloos, which serve as warehouses for city-buster bombs.

At Ford's suggestion, we began by slowly driving around the outside of the fence.

"You know how long it would take to get over that?" Ford asked, nodding at the chain link fence topped with barbed wire.

I said I didn't have any idea.

"Three seconds," Ford said. "If you know what you are doing—three seconds."

Just then, I noticed a small tractor hauling an open trailer inside the weapons compound about 150 feet away. On the trailer were four torpedo-shaped cylinders, each painted silver, with metallic fins on their tails. The tractor driver was slowly maneuvering the cylinders into what looked like a cinderblock garage.

At that moment, I was holding my briefcase, which no one had bothered to examine. Ford, who had a pistol on his hip, had both hands on the wheel.

Based on unclassified Atomic Energy Commission photographs I had examined before my visit, the cylinders looked exactly like model MK–28 hydrogen bombs, each packing the equivalent of at least one million tons of TNT. Four such bombs are the typical payload of a B–52 bomber when on nuclear alert.

"Seen enough?" asked Ford.

One more thing, I said: How about letting me inside the security guardhouse in the weapons compound? He looked sideways at me but agreed, after once again asking for my Social Security number.

I stayed inside the guardhouse long enough to count the guards and to find the button which opens the turnstile to the weapons' compound.

Then, on my way out, I asked whether "my" work crews would have to worry about guard dogs. No, replied Wilmer. He proceeded to tell me the hours when the dogs are kept in their cages.

Could it have been a one-time fluke that no one saw through this pose?

To find out, I mailed $6 to another regional office of the Corps of Engineers and asked for plans and specifications for a similar construction job at yet another SAC base.

Back came an equally revealing set of blueprints, along with an invitation to bidders to join a tour of the site.

For me, the highlight of touring inside the second weapons storage area was the sight of an unattended red trailer on the west side of Building 323, about 100 feet away. The trailer could have carried two canoes. Instead, it held two taped cylinders that looked considerably like the official photographs of B–43 hydrogen bombs.

My host, an Air Force sergeant, was also good enough to tell me the route and approximate daily schedule for the vehicles that carry nuclear weapons back and forth between the storage site and the B–52's.

Upon learning of my tour, Gen. Ellis of SAC informed the Pentagon that at the second base I had seen dummy training bombs.

Could I have seized a nuclear weapon?

Not at the second SAC base, where the guards were careful to search all briefcases. And even at the first base, where the security verged on lackadaisical, the odds would have been against me.

Escaping with a hydrogen bomb is not a simple matter since the MK–28 model weighs one ton.

But, there was a chance I might have succeeded. Given a few suicidal confederates, a CB radio and a fast getaway helicopter, there is no telling how far I might have gone.

NUCLEAR BUNKER MISHAP MAY SCATTER PLUTONIUM

The destruction of a bunker containing several nuclear weapons could scatter tiny but measurable amounts of plutonium downwind over a 100-square mile area, according to a recent calculation by government bomb experts at Lawrence Livermore Laboratory, done at the request of Cox Newspapers.

Within that area—roughly 50 miles long and two miles wide—the plutonium contamination of the soil would exceed the plutonium "screening level" recently proposed by the Environmental Protection Agency as safe for permanent human habitation.

In the event of such a nuclear accident, the government would move in and strip away the most heavily contaminated soil, plowing under areas with minor radiation levels. However, it would be virtually impossible to render a 100-square-mile area completely safe by EPA's proposed plutonium "screening level."

Specifically, the EPA proposed a "screening level" of two-tenths of a millicurie of plutonium radioactivity per square meter of soil. The agency noted that even at this very low level of plutonium contamination, residents would incur a slight extra risk of developing cancer.

LAX GUARDING OF N-WEAPONS AN INVITATION TO TERRORISTS—II

(By Joseph Albright)

WASHINGTON.—Marine Pvt. Timothy Scudder, 17 could be considered an atomic-age hero. He is the only American serviceman known to have lost his life while guarding a nuclear weapons compound against the prospect of terrorist attack.

The Marine Corps band is not about to schedule any full-dress parades for him, however. Very few Pentagon officials have been told how he died. Those who know would be happy to forget the whole thing.

Yet the story of his death is worth telling, for it exposes a grisly problem that has at-

tracted only sporadic attention at high levels in Washington. How can the 20,000 U.S. nuclear weapons be kept ready for use in wartime without inviting a terrorist incident or freak accident in time of peace?

It is a question that continues to worry the United States intelligence community. CIA analyst David Milbank warned in a 1976 unclassified agency study that "it seems prudent to assume" that sooner or later a terrorist group will attempt to steal a nuclear weapon for its value in a political extortion scheme.

And in a report called "Facing Tomorrow's Terrorist Incident Today," one of the government's chief experts on terrorist behavior, Robert H. Kupperman of the Arms Control and Disarmament Agency, warned four months ago: "Although few terrorist groups have yet focused systematic attacks on nonhuman targets, this may become a more attractive alternative as we become inured to assassinations, bombings and hostage-taking.

"Incidents such as the attacks on mass-transit ticket machines in West Germany, power facilities in California, broadcasting studios in Spain and Argentina and nuclear power plants in France, Spain and Argentina may foreshadow more extensive nationally disruptive acts. . . .

"It is no secret that many governments—and some subnational groups—are anxious to get their hands on a nuclear weapon."

By an unofficial estimate, it will cost more than $350 million this year just to guard the U.S. nuclear weapons stockpile. At each weapons site, the two-man weapons patrols are backed up by a Response Force of at least 15 heavily armed troops that supposedly can meet any emergency in less than five minutes, and by an Augmentation Force of several hundred men that can reach the scene in less than an hour.

The weapons themselves are generally stored in steel-doored igloos, protected by anti-intruder alarms and security locks that cannot be opened by one person.

The Pentagon is proud of its safety record over the last 33 years of protecting its worldwide inventory of nuclear bombs, artillery shells, mines and rocket warheads. So far, no atomic weapons have ever been stolen or accidently detonated.

Defense sources said the scariest incident in recent years occurred one night last March at a nuclear weapons storage site in southern Virginia known as the Advanced Undersea Weapons Compound.

When the episode was over, Marine Pvt. Scudder—a high school dropout from Hamilton, Ohio—lay dead of bullet wounds.

His partner on the two-man guard team, Pfc. Milton Scott, 20, insisted that Scudder had been cut down by sniper fire from outside the compound.

What was first reported as a terrorist attack later turned out to be a different sort of incident. Even now many of the facts are disputed, but it is clear that Scudder had been shot six times at point-blank range. After that was established, his partner Scott changed his story and said he had never actually seen any sniper fire. In fact, said Scott, he was asleep on watch when Scudder was shot.

Navy authorities soon concluded that Scudder must have been killed by Scott. But the embarrassing part was to figure out how Scudder was shot with his own rifle. Scott was charged with the murder, and last summer he was convicted of unpremeditated murder by a military court-martial on the basis of circumstantial evidence. He was sentenced to 30 years at hard labor.

At Scott's trial, the fact that Scott and Scudder were on duty guarding nuclear weapons was not divulged by any witness. But the nature of their duties has been subsequently confirmed by a key Pentagon source. Considered in this light, some of the other evidence in the court-martial is not particularly comforting.

According to Scott's statements to Navy investigators, it was common practice for one of the two guards on duty to sleep while his partner covered for him. Another young Marine, who had not been on duty that night, testified that he, too, knew of times when guards at the compound went to sleep on watch. The prosecution did not seriously dispute this.

The backup force, asleep in the guard barracks less than a mile away from the magazines, never heard the shooting. Thus once Scudder died, Scott was alone near the weapons magazines. And just outside the rear fence of the compound, not far from the shooting scene, was a little-traveled road leading out of the naval base.

The incident in southern Virginia was perhaps unique in that a nuclear weapons guard was killed. But there have been other events and observations involving nuclear weapons which seem equally unsettling.

In 1971, two Mexican border-jumpers made their way through at least three security fences and found themselves inside the Monzano Mountain base, a secret depot in New Mexico that serves as a central stockpile for Air Force nuclear weapons. Seeking jobs, the two aliens mistook this atomic Fort Knox for a cattle ranch and simply went through the fence. Forty-five minutes later, they were finally spotted by an Air Force security patrol and evicted.

In 1967, according to Senate Foreign Relations Committee testimony, Greek military troops surrounded several American nuclear bases near Athens during an attempt by dissident Greek colonels to overthrow the American-supported Greek government. The aim, it was thought at the time, was to prevent U.S. forces from interfering with the coup. As it turned out, the Greek colonels succeeding in taking power without any direct confrontation with American weapons custodians.

In 1972, an investigator from the U.S. Joint Atomic Energy Committee toured half a dozen American nuclear weapons sites in Europe. At one post in Germany, the investigator found nuclear weapons stored in the basement of a barracks. When he arrived, the basement door was open and unguarded. At another European site, nuclear weapons were found stored at a depot outside the gates of an airbase, so that they had to be transported to planes over a strip of public road.

In 1974, Sen. Sam Nunn, D-Ga., spoke to American commanders and enlisted men in Europe assigned to nuclear units. "I was frankly appalled by our lack of security," Nunn recalled recently. "There were all sorts of problems over there—narcotics, inadequate lighting, guards forced to work tours that were too long."

In 1975, House Appropriations Committee investigators toured 38 tactical nuclear weapons depots in Europe and wrote a top-secret report enmerating dozens of weaknesses in their security arrangements. The report, which led to a series of classified hearings, is said to have persuaded several members of the Defense Appropriations subcommittee that that there was some danger of an "inside job," in which a weapons guard would be induced to cooperate in a scheme to "embezzle" a nuclear weapon.

Between 1973 and 1977, U.S. authorities reportedly have had to deal with about 72 threats from cranks claiming to have manufactured or stolen nuclear weapons. So far, all these threats have been hoaxes.

There is no single solution for the government's doomsday storage problem. The military needs some more money for electronic sensors, hardened guard posts, and other anti-terrorist devices. But equipment isn't everything. As Pfc. Scott's defense lawyer, James Brydges, put it:

"It becomes a question of who is going to watch the guy on watch."

That is a dilemma which the military services try to answer by means of a rigorous program of background checks and psychological screening known in the Pentagon as the "human reliability program." The theory behind the program is to make sure no unstable servicemen are ever assigned to duties involving access to nuclear weapons.

However, in practice, the arithmetic of the U.S. atomic arsenal makes complete human reliability an almost impossible goal. With about 20,000 warheads spread out among about 636 "nuclear-capable" units around the world, errors in personnel assignments are all but unavoidable. About 20,000 servicemen are assigned to guard nuclear weapons under the "human reliability program," a Pentagon spokesman said.

The Navy, in response to a Cox Newspapers query, disclosed that in 1976 it had to drop 48 Navy or Marine guards from nuclear security duty for "negligence or delinquency in performance of duty."

The Air Force, with considerably more nuclear weapons to protect, was obliged to drop 326 weapons guards in 1976 for "negligence or delinquency" on duty or during training, an Air Force spokesman said.

The Army said it disqualified 12 nuclear weapons guards in 1976 for "negligence or delinquency" on duty. A spokesman insisted that none of these instances involved carelessness with a weapon, but was unable to say exactly what the 12 guards had done.

Incredibly, there is no official in the Pentagon who knows the details of these reported instances of negligence or delinquency. Cases were dealt with by base commanders without being reported in detail to the Pentagon, officials said. "Negligence and delinquency" is usually a very minor infraction in a program with very high standards, the officials contended.

Guards are only one factor in the situation. Pentagon figures released by Rep. Les Aspin, D-Wis., show that in 1976, 115,767 military people were assigned to duties involving some access to nuclear weapons. Besides guards, they included weapons maintenance technicians, loading crews, bomb couriers, command and control officers and emergency disposal teams and flight crews.

Despite strict entrance requirements for the "human reliability program," military commanders in 1976 found reason to wash out 4,965 of these nuclear specialists and guards from jobs involving access to weapons. The reasons ranged from drug and alcohol abuse (usually off-duty) to mental stress to negligence or conviction of criminal offenses.

Some commanders are evidently more successful than others in weeding misfits out of nuclear weapons crews. In the last four years, inspection teams from the Defense Nuclear Agency have given "unsatisfactory" ratings to 79 out of the 520 "nuclear-capable" units that have been subjected to formal inspections.

A breakdown of the reasons for "unsatisfactory" ratings showed that 45 units were flunked for "security," nine for "safety" and another 29 for deficiencies in the human reliability program.

Sometimes one unit was deficient in several categories.

Other reasons for nuclear demerits included improper techniques in handling, storing and transporting weapons.

All this is not too surprising, for the task of caring for America's weapons of mass destruction is left to men and women with human frailities, many of them very young. And, as Nunn has remarked, "Guarding a nuclear weapon is the most boring job in the world."

After the death of 17-year-old Timothy Scudder, a reporter asked a Marine commander involved in the incident whether

Scudder had been given too heavy a responsibility for his age.

"He joined up to be a Marine," answered the commander, who declined to be identified. "He's just as much a man at 17 as someone who is 19 or 20 or older.

"We've got people 17 years walking sentry duty all over the world."

H-BOMB VIGILANCE ORDERED

WASHINGTON.—The Air Force has issued a worldwide directive to its major commands re-emphasizing vigilance against intruders as a result of last week's article by a Cox Newspapers reporter who made an incognito tour of two hydrogen bomb depots.

The message instructed commanders to insist on "strict adherence" to all current security rules governing entry into sensitive nuclear areas. It was transmitted late Wednesday by Brig. Gen. William E. Brown, Jr., chief of the Air Force security police.

The Air Force is still investigating the circumstances under which reporter Joseph Albright penetrated the two weapons sites last month posing as a contractor.

An Air Force spokesman said it was "very probable" that some of six metal cylinders viewed by Albright in the weapons depots were live nuclear bombs, despite an initial Air Force statement suggesting they were all dummy training devices.

NO SAFETY ON MANY NUCLEAR WEAPONS—III

(By Joseph Albright)

WASHINGTON.—Largely to save money, the Pentagon plans to retain into the mid-1980s at least 10,000 nuclear weapons which lack modern safety devices to prevent them from being blown up by terrorists or destroyed by accident.

Some of these obsolete warheads are Army "mini-nukes" that will fit in a backpack. Others are multi-megaton Air Force hydrogen bombs that can create city-wrecking fireballs 15 miles wide.

Deployed around the world to deter a Communist attack, these warheads are stored in military weapons compounds such as the two Strategic Air Command weapons sites that were penetrated last month by this reporter posing as a fencing contractor.

Pentagon authorities now concede that four metal cylinders that were a highlight of this incognito visit to SAC were indeed hydrogen bombs.

Judging from government photographs, they were 1950s-model H-bombs, which are not equipped with recent electronic safety devices to prevent unauthorized explosions. This early-model weapon apparently was a Mark-28 hydrogen bomb.

As the Defense Department points out, such a weapon is under the electronic control of the president whenever it is inside the bomb bay of a B–52.

But these older H-bombs are not under presidential control when they are on the ground outside the bombers, Pentagon officials concede.

Unhappily, a Mark-28 could be opened and reworked by a competent electrician so that it would detonate when dropped from a civilian plane or left in a warehouse. The explosion could be as much as 50 times as powerful as the A-blast at Hiroshima.

Eventually these older SAC bombs are due to be replaced by a new, safer model. But the changeover has been several times postponed.

A weapons factory in Amarillo, Tex., was supposed to be assembling a replacement bomb late this year. But it was learned last week the Carter administration has denied an Air Force request for funds to begin making the new bomb. The Carter budget reflecting the decision will be released Monday.

The lack of sophisticated safety devices on older American nuclear weapons is a documented fact. Alfred Starbird, then chief of the U.S. weapons program, told a House Appropriations subcommittee in 1976 that the newest Air Force nuclear bombs "are all much safer and more secure than the weapons we have in the stockpile at the present time."

Starbird's little-noticed testimony shows he was emphatic about the benefits of a new electronic safety catches, known as the Category D Permissive Action Link.

The job of this so-called PAL device, which costs about $20,000, is to insure that the bomb cannot be detonated without using the proper six-digit code.

Starbird also praised a new triggering system, which he said is less prone to accident since it uses an "insensitive" high explosive instead of TNT used to set off the older warheads.

"These are of the nature of the features that will tremendously increase the safety against an accident (deleted) either just the high explosive and scatter the plutonium or nuclear fire the weapons," said Starbird, according to the censored transcript.

Asked to explain this passage, a spokesman for the U.S. weapons building program, now part of the Department of Energy, said Starbird was alerting the subcommittee about two hazards inherent in some older warheads:

A so-called "plutonium-scattering accident" set off by bomber crash, a lightning strike or some other external blow to the weapon. This can occur when something accidentally explodes the TNT trigger of a nuclear weapon, discharging plutonium particles into the atmosphere but without causing a nuclear blast.

Terrorist seizure of a nuclear weapons site followed by an attempt to detonate, or "nuclear fire the weapons," in Starbird's words.

Despite Starbird's seemingly compelling case for weapons safety improvements, the Pentagon is not initiating a crash program to purchase the new models and retire the old ones.

In fact, a two-month Cox Newspapers investigation has uncovered a pattern of only halting progress toward nuclear weapons security, coupled with instances of delay, neglect and overconfidence.

Air Force Maj. Gen. Richard N. Cody, deputy director of the Defense Nuclear Agency, acknowledged in an interview that safety features could be phased in somewhat more rapidly if money was made available.

"Naturally, everything in the national security budget has to compete for funds, whether it is a new warhead or a battalion in Europe," Cody said.

Of course, there are several layers of weapons safeguards already, many of them classified.

There has not been an accident involving a nuclear weapon since 1968, when a B–52 carrying four H-bombs crashed on a frozen bay in Greenland.

In that incident, the weapons and jet fuel caught fire in the crash, scattering plutonium on the icecap. The fire was hot enough to burn through eight feet of ice, and some bomb components were lost in 800 feet of water.

As a result of the Greenland crash, and an earlier B–52 wreck near Palomares, Spain, the Defense Department in 1968 eliminated the practice of keeping some B–52s with nuclear weapons on around-the-clock airborne alert. Today, the bombers are kept on alert on SAC base runways.

The prospect of an air crash involving nuclear weapons has not been completely eliminated, however. For example, a Defense Department order has authorized helicopters and "tactical aircraft" to airlift nuclear weapons on "logistic flights."

The unclassified Pentagon order, dated Dec. 20, 1972, contains a laconic warning to pilots: "Nuclear weapons and major assemblies shall be jettisoned from transporting aircraft only in accordance with the provisions of the USAF Special Weapons Overflight Guide."

Air Force officials said the overflight guide, a top-secret publication, contains maps showing unpopulated areas around the world where nuclear weapons could be tossed overboard if necessary.

The military shopping list for new nuclear weapons is a secret document issued annually and known in atomic circles as the "New Dog." The aim of the Nuclear Weapons Development Guidance, as it is officially known, is to put all requests for new warheads in priority order.

"In the past, the 'New Dog' has been relatively fiscally unconstrained," said Cody. "It is more constrained now."

What that means is that requests for safety improvements on existing weapons sometimes have to be delayed so that the government weapons factories can concentrate on higher-priority weapons.

Those now about to enter full production include warheads for the cruise missile, the Trident submarine-launched missile, the Minuteman missile, the eight-inch Army artillery shell and—most controversial—the Army's neutron warhead.

As part of its shopping list, the Air Force wants to replace its old Mark-28 H-bombs, which have been in storage for as long as 19 years. It also wants to supplant a 1961-model bomb, the B-43, which also lacks safety devices.

But the Air Force is not in much of a hurry.

So far, it has ordered the new and safer B–61–4 warheads favored by Starbird to replace only those Mark-28 and B–43 bombs now located at the 1,000 or so U.S. and NATO fighter-bombers bases in Europe.

Later, the Air Force also hopes to replace the older H-bombs used by the Strategic Air Command bombers in the United States.

In fact, weapons designers already have conducted underground tests on a new, safer replacement bomb known as the B–77 FUFO bomb. For peacetime, its safety features include the new insensitive high explosive trigger and a Category D permissive action link.

Its wartime advantages include a delayed fusing system allowing it to be dropped from a low-flying bomber without killing the crew.

Although the Air Force wants the B–77 bomb, it is not a high-priority item. Under current Air Force plans old model H-bombs in SAC weapons depots will be replaced by B–77s over seven years or longer.

Although the B–77 bomb has a built-in permissive action link system, congressional testimony in 1976 indicated that SAC does not believe it actually needs the new safety system.

SAC's explanation, which has come into question in these articles, was that nuclear weapons stored at its bases are "secure at this time against terrorists."

The Air Force did seek funds for the B–77 bomb in next year's budget, but two key sources said OMB denied the request for reasons that have not been spelled out. The OMB decision will freeze the B–77 bomb in the development stage for an extra year unless Congress intervenes.

SAC has at least 6,780 strategic nuclear weapons at its 19 bomber bases in the United States. This does not include a large supply of "re-strike" weapons, supposedly for use by bombers not shot down on their first mission.

Not all of these weapons are bombs. Some are nuclear-tipped shortrange attack missiles, which hang under the wings or in the bomb bays of B–52s and are fired before the pilot reaches the target.

According to the Pentagon's testimony, the existing short-range missiles have safety problems of their own. That was largely why a new version, known as the SRAM–B, was developed for the B–1 bomber.

Justifying the new SRAM–B, Brig. Gen. William B. Maxson, then the deputy nuclear weapons chief in the Pentagon, said in 1976: "From a safety standpoint, we are talking of putting aircraft on alert and keeping them on alert with the SRAM missiles onboard with the insensitivity high explosive, and it is a much safer operation."

In spite of its safety features, the SRAM–B project was canceled in the Pentagon after Carter killed the B–1 bomber. SRAM–B could have been purchased instead for the older B–52s, but it wasn't.

The delays in phasing out Air Force weapons are matched by the slow-motion pace of the government's actions to replace several thousand 25-year-old Army nuclear warheads assigned to NATO artillery units in Europe.

In the meantime, as a recent Congressional Budget Office study put it, "the frequency of incidents of international terrorism in the early 1970s prompted a realization that highly determined, well-organized, trained and equipped groups of terrorists might succeed in an attempt to penetrate special ammunition storage sites and gain control of a nuclear weapon."

This prospect prompted NATO to increase security forces at the approximately 100 atomic weapons stockpiles in Western Europe. But so far, at least, plans to make the weapons themselves terrorist-proof are at an early stage.

Among the more tempting targets for a group such as the now defunct Baader-Meinhof gang is the U.S. Army's 155-millimeter howitzer shell.

It can be carried by one man. It will destroy almost everything in a radius of a quarter-mile.

Although its shipping case has a tough combination lock referred to as a PAL device, Pentagon experts fear it could be jimmied open.

When investigators for the House Appropriations Committee expressed alarm in 1975 about the security of nuclear weapons in Europe, the Defense Department reportedly replied that it had made a technological breakthrough to minimize the terrorist problem arising from such "mininukes" as the 155-millimeter and 8-inch atomic artillery shells.

The supposed breakthrough was a 4,000-pound steel box for each warhead. Inside would be a special self-destruct feature allowing weapons custodians to destroy a warhead by remote control in the event it was seized by a terrorist.

Three years later, the chief of the House investigating team learned—as a result of the Cox Newspapers investigation—that the warhead destruct boxes had been canceled.

"The system was too expensive and too heavy," Gen. Cody of the Defense Nuclear Agency said in an interview. "It was just too darned expensive in terms of competing priorities."

Instead of the destruct box, the Army has developed an electronic self-destruct device that it plans to install inside its new 8-inch atomic shells.

The Army is also hoping to replace its old 155-millimeter warheads with a new 155-millimeter atomic shell containing this self-destruct feature. But full funding has not been approved, in part because of the separate controversy over the neutron warhead.

A high Pentagon official was asked whether it is possible in the meantime for a military commander in Europe to destroy one of the older atomic artillery shells to keep it out of terrorist hands.

"We can do it," he replied, "but it is not a very delightful option, because we would have to scatter the plutonium (into the atmosphere)."

Fabricating nuclear weapons is not highly expensive, by Pentagon standards. One high official said once new warheads have been designed, they cost about $100,000 apiece to produce, assuming the nuclear ingredients of an older weapon are recycled. Fitting in a Category D safety device and an insensitive high explosive trigger will add "a few tens of thousands of dollars" to the warheads's price tag, it was noted.

Like all assembly lines, the government's nuclear bomb factories cannot be turned off and on at will. The Department of Energy, which runs the weapons plants, tried to achieve and maintain a "sustained level of effort" while avoiding "undue fluctuations" in its weapons work force.

Even so, the government's leading bomb experts acknowledge that the job of replacing old warheads which lack modern safety equipment could be speeded up.

But it would cost money: Perhaps as much as $5 billion in spending over the next few years that could otherwise be postponed until the late 1980s.

Is it worth it? That is a question which until now, Congress and the Carter administration have left to the military weapons bureaucracy.

Yet, in light of demonstrated weaknesses in security arrangements at nuclear weapons sites, it is a question that needs to be answered soon.

SRI LANKA

Mr. PERCY. Mr. President, Friday was the 30th anniversary of the independence of the Republic of Sri Lanka. This island, known better to the world as Ceylon, is famous for its tea and its jewels. Its name means resplendent island, and its lush tropical beauty has served as the backdrop for many motion pictures including "The Bridge Over the River Kwai."

But in marking its independence day, I believe Sri Lanka deserves recognition for something else. For three decades this nation has maintained its commitment to the principles of democracy. The reigns of power have changed hands peacefully through democratic elections six times since independence. As recently as July 1977 the Ceylonese people reaffirmed their rights as citizens in a democracy and chose a new government headed by Junius Richard Jayewardene.

Sri Lanka has also made important social progress. The literacy rate has climbed 85 percent, education is universal and free through the university level with the average Ceylonese now having attended 9 years of school. Its rate of population growth compares favorably with that of the developed world, and life expectancy has increased to 67 years.

These impressive gains have not come without cost, however. Like many developing nations, Sri Lanka is heavily dependent on export earnings from a few commodities. Its economy was hit severely by the worldwide inflation that resulted from the increase in oil prices since 1973. Sri Lanka has grown dependent on imports to meet its food requirements. I am pleased to note that the new government of J. R. Jayewardene has taken a number of steps to improve the Sri Lankan economy, aimed at increasing agricultural production, decreasing unemployment, and reducing dependence on imported food. Much progress has been made since my visit to, then Ceylon, a decade and a half ago.

Mr. President, Sri Lanka has compiled an impressive political and social record in the past three decades and I believe that its efforts to bring about new achievements in the economic sphere are equally worthy of our support and praise.

THE NEED FOR A BETTER NAVAL PROGRAM

Mr. HART. Mr. President, I would like to bring to the attention of my colleagues a column from the Washington Post of Sunday, February 5, by Mr. Joseph Kraft.

Mr. Kraft argues that in view of the continuing Soviet military buildup, it would be appropriate for the United States to take steps to improve its own naval capability. The Soviets have developed a formidable navy, according to Mr. Kraft, and it is difficult to reconcile our foreign policy objectives with Secretary Brown's moves to cut back our naval forces.

I think Mr. Kraft is fully correct. By all basic criteria—geography, imports and exports, alliance commitments and tradition—the United States is a sea power, not a continental land power. We do need to improve the defense capabilities of NATO in central Europe, but it is not prudent for us to do so at the expense of adequate naval power. Like Britain in the 18th and 19th centuries, we are inherently a maritime nation, and a continental strategy is likely to prove as unfortunate for us as it did for Britain in the First World War. Britain has yet to recover fully from the draining of her blood and treasure into the fields of northern France.

Mr. President, I ask unanimous consent that the column by Mr. Joseph Kraft, "Toward a Rational Defense Policy," be printed in the RECORD.

There being no objection, the article, was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Feb. 5, 1978]

TOWARD A RATIONAL DEFENSE POLICY

(By Joseph Kraft)

Leaks from the Pentagon combine with a series of official statements to demonstrate the extreme difficulty of developing a rational defense policy while living in the same world as the Russians. For the Soviet Union is maintaining a steady military buildup.

Sensible countermeasures in defense are not readily available to the United States. But because this country is taking many political steps that suggest a relaxed attitude toward security, some additional military efforts probably have to be made to warn the Russians they are playing a fool's game.

According to the defense posture statement presented to the Congress by Secretary Harold Brown last week, "Soviet defense spending has been gradually increasing . . . over the past 15 years." In particular, the Russians have strengthened conventional forces in Europe, developed a formidable navy and expanded their nuclear forces in a way that will eventually threaten this country's land-based strategic weapons.

The United States can obviously do some things to prevent the actuality—or, more likely, the impression—of a strategic imbalance in appropriations of about 2 per cent for the next five years.

He rightly gives high priority to improving the combat effectiveness of NATO forces with new tanks, new antitank weapons and a highly modern system of communications and control. The Mideast, and particularly the Persian Gulf area, is singled out as a region requiring more American attention.

But Brown and the Carter administration tend to take a dim view of some of the bigger items recommended earlier by the Ford administration. In the matter of advanced strategic weapons especially, the Carter administration has shown extraordinary self-restraint.

President Carter cancelled—without getting any Soviet concessions in return—the advanced supersonic bomber, or B–1 program. The allocation of funds for a new land-based, mobile missile, the MX, is stretched out in the current budget. Brown argues that there is already so much nuclear power available to the two superpowers that neither can acquire a decisive edge.

He pours cold water on the fashionable idea of limited nuclear war. In the posture statement he said: "Any use of nuclear weapons by the two super-powers against one another—whether tactical or strategic—would carry a high risk . . . of escalating the conflict to a full-scale thermonuclear exchange."

I find these arguments highly convincing. Indeed, I should confess to a feeling of something like reverence for Brown's defense judgments. But defense judgments need to be weighed against the political actions of the Carter administration, which—rightly or wrongly—strike many persons as indicating a lack of stomach for tough thinking on security issues.

The Panama Canal treaties are one example. The new arms-control treaty, especially when measured against the proposals originally advanced by the administration, is another. In the same mold are the withdrawal of troops from South Korea and the hostile attitude toward arms sales abroad.

Maybe all these steps are, as the president said of the Panama Canal treaties in his speech Wednesday night, "right." But the world tends to be more impressed by strategic consequences than moral motives, and strategically all these steps look like standing down. So the United States, it seems to me, needs to find defense measures that will let the Russians know this country needs to be taken seriously.

Building up the Navy strikes me as the obvious right step. In 1975 then-Secretary of Defense James Schlesinger expressed alarm when the fleet was at 600 ships. Now it has less than 500.

Leaks from an internal Pentagon document—a first draft of the so-called Consolidated Guidance—suggest that Brown's analysts are dubious about a larger role for the Navy. They think it has the job of protecting the sea lanes, as in World War II, and of supporting American forces on shore, as in Vietnam. But they apparently do not see any special need for matching the growth of the Soviet fleet.

I cannot challenge these views. But translated into foreign policy they sound less than compelling. Everything that is known about the Carter White House, moreover, suggests poor coordination of defense and foreign policy. So I hope the Congress will press Brown to take another look at defense posture—and particularly at the naval estimates—with a view to convincing the Russians that the unrestrained military buildup is only taking them into deeper and deeper water.

THE CASE FOR CETA REAUTHORIZATION: CONTINUED DECENTRALIZATION AND DECATEGORIZATION

Mr. MATHIAS. Mr. President, in January of 1977, when I introduced S. 1, the Employment Resources Act, unemployment was hovering around the 8-percent mark. Despite recent fluctuations in the level of unemployment, it remains at an unacceptably high rate. We must, therefore, continue our efforts to put every able and willing American to work.

The National Council on Employment Policy has just issued its statement on CETA reauthorization which comes up for review this session. It provides a valuable insight into the continued need for CETA and for revision of that act.

I think it only fitting to note at this point that the Council has dedicated its report on CETA reauthorization this year to a man who worked ceaselessly for the principle for which that body stands. Gerald G. Somers died on December 30, 1977. All those who worked with Jerry came to admire and respect his talent and dedication. He will be missed as the work he pursued so vigorously is carried on by his colleagues.

I think the dedication of the Council's report states clearly what kind of person Mr. Somers was, and I ask unanimous consent that it be printed in the RECORD at this point.

There being no objection, the dedication from the report was ordered to be printed in the RECORD, as follows:

A DEDICATION

Gerald G. Somers died on December 30, 1977. He was fifty-five years old and at the peak of his career. Jerry achieved prominence among labor economists not only because of his own work, but also as a result of work by his students and colleagues who he inspired, and with whom he collaborated. Because of his wide interests, professional skills, and personal qualities, he was a bridge between quantitative labor market analysts and institutionalists, and between social welfare scholars and economists.

Jerry became a member of the National Council on Employment Policy in 1969, but his work in the Council's area of greatest interest—the relationship between government policies and labor market outcomes—began more than ten years earlier. The modern period of an "active labor market policy" by the federal government had its roots in the late 1950s with the bill proposing aid to depressed areas. It flourished in the 1960s with the Area Redevelopment Act, the Manpower Development and Training Act, and today operates on a larger scale mainly through the Comprehensive Employment and Training Act. Jerry was a pioneer in the analysis and evaluation of ARA and MDTA, and he was beginning a study of CETA when he died. It is fitting that the National Council's report on CETA be dedicated to him. The report expresses his approach—constructive criticism and sympathetic encouragement. We have lost a humanitarian, colleague, and a great friend.

GLEN G. CAIN.

Mr. MATHIAS. Mr. President, with that as a prologue, I ask unanimous consent that the entire text of the Council statement on CETA be printed in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

THE CASE FOR CETA REAUTHORIZATION: CONTINUED DECENTRALIZATION AND DECATEGORIZATION

After its first three years of operation and only cursory congressional review, CETA was extended for a year in 1977. In 1978 it is deliberate assessment of its record. When we first endorsed CETA in 1974, saying it was "a solid achievement . . . the right approach for the right time," [1] the Council also cautioned that a major effort would be required in order to make state and local officials fully appreciative of the complexity of manpower problems. We were concerned at the time that there would be an overeager shift of responsibility and authority from the federal level to an unprepared local level. We are hoping now that the CETA record will be examined in light of what has been feasible over the last few years and not on the basis of some earlier optimistic expectations.

CETA's first few years have not been easy. Thus far it has operated in an intractable, high unemployment economy. These adverse conditions have put the CETA delivery mechanism to a test unlike anything the earlier categorical efforts encountered. Those earlier efforts were created to cope with largely structural problems, mostly among the hardcore unemployed.

In contrast, CETA, although first conceived largely as a structural measure, has been pressed to channel vast countercyclical assistance to local areas around the country hit hard by a sluggish economy, as well as to bring into the employment and training arena actors who have not traditionally been involved in delivering manpower services and in serving manpower clients.

While CETA has not delivered on the promises that some had hoped for, we think that the central policy choice to decentralize and decategorize was a sound one. Experience prior to CETA demonstrated the inability of centralized federal merchanisms to respond flexibly and expeditiously to changing local conditions. The CETA experience so far represents a three and a half year test of the notion of whether a decentralized-decategorized approach can be effective for identifying labor market pathologies and formulating solutions to correct them. It is the opinion of the National Council on Employment Policy, based on the evidence available, that CETA's immediate objectives of decentralization and decategorization have been achieved, and that some locally based planning and delivery systems tailored to local needs have indeed emerged. We believe that creative use of CETA by local prime sponsors has improved the quality of the nation's manpower service system and reinforced the validity of local partnership. This is no mean accomplishment during a period in which the country has gone through three changes in leadership and the most serious economic recession in four decades.

Within the context of a decentralized, decategorized manpower planning and delivery system, a number of important issues have surfaced. Some were foreseen and debated before CETA was adopted. Others have emerged since then. The most important ones revolve around questions concerning targeting, the state role, service deliverers, accountability, the role of public service employment, funding levels and cycles, private sector involvement, and the effectiveness of employment and training policy analysis. These issues all need to be aired before the next building block in America's manpower policy is laid in place. The obligation now is to draw on our recent lessons and improve the efforts started in 1974.

THE CASE FOR CETA REAUTHORIZATION: CONTINUED DECENTRALIZATION AND DECATEGORIZATION

---

[1] "Manpower Policy for a New Administration," October 1974; a position paper of the National Manpower Policy Task Force.

The issues examined here are neither extensive nor all inclusive. But, in the opinion of the National Council on Employment Policy, they are the most important ones. They are the underpinnings of the CETA approach. If they can be addressed head-on now, and if the policy choices they present can be decided now, the questions raised by a number of other subsidiary issues can be settled administratively.

TARGETING: WHO SHOULD BE SERVED UNDER CETA

One of the most volatile issues associated with CETA has been the question of whom it should serve. Departing from the precedent of the antipoverty programs in the 1960s that entailed strict means tests, Congress broadened under CETA the potential clientele by expanding participant eligibility critera to include the unemployed and the underemployed. This wider targeting has given CETA a broader constituency, making it more politically viable at the local point. Relaxed provisions also work to the advantage of program participants.

Targeting CETA services just to the disadvantaged could stigmatize CETA participants resulting in more rather than less isolation for the poor. We believe the current provisions should be retained. A reversion to narrower targeting could incite serious social divisiveness. The special targeting provision for Indians, immigrant labor, and youth (Title III) has helped prevent this from happening by allowing pursuit for national priorities related to special problems while maintaining a broad focus at the local level through other titles.

Whether the full benefits of less restrictive targeting will fully materialize remains to be seen. While CETA has gotten into the mainstream of community service delivery in some areas, it is anathema to others. But the evidence suggests that the looser targeting provisions have not resulted in wholesale abandonment of the poor by local prime sponsors. The available data suggest that Title I participants are comparable to the population served by earlier categorical programs. It also appears that the proportion of poor served under the public service employment components are even higher than under the Emergency Employment Act of the pre-CETA days. Furthermore, the current administration has shown a pronounced sensitivity to the problems of the disadvantaged.

Even where there are open-ended targeting provisions, the emphasis of the program should continue to be on the poor. However, where strict targeting is adopted, requiring income criteria for determining eligibility, there is need for uniformity and simplicity.

For present CETA programs with means-tested eligibility provisions, there are no fewer than three different sets of criteria now in force for different programs. The multiple standards complicate program administration and confuse program participants and prime sponsor planners alike. In light of the relatively unenforceable small differences between the different income criteria a single income eligibility criterion should be adopted.

THE STATE ROLE

The multiple role of balance of state prime sponsor—to coordinate the manpower services from state agencies, to review local prime sponsor plans and to promote interagency linkages—has not necessarily been effective in several states. With the same staff handling both prime sponsor and state manpower services council responsibilities in too many states, the balance of state role, encompassing programmatic responsibility and most of the funding, has demanded the bulk of the attention. State manpower service councils are often unwieldy and since their purposes are less than clear, many governors do not provide personal leadership.

There is little payoff for the governor and the manpower council to review prime plans, or to monitor and coordinate the participation of state agencies. The bulk of the 4 percent discretionary funds is more often used for special projects than for encouragement of comprehensive planning and interagency coordination. The 5 percent CETA/vocational education grants rarely have been coordinated with other vocational education activities and, even worse, rerely have been used to involve the vocational education establishment in program development and evaluation either for prime sponsors or in the balance of state.

It is clear after these years of experience that, at a minimum, the balance of state prime sponsor and statewide interagency coordinator functions should be separated. In many states it might be well to divide the balance of state responsibility among local prime sponsors on an "economic watershed" basis. In others it would be well to delegate the prime sponsor role to associations of local governments too small for national prime sponsor designation. Many scarcely populated states are best served by a statewide prime sponsor, as long as the two roles are kept clearly separate.

We recommend that the thrust of the state role should be focused on the promotion and enforcement of interagency linkages, the coordination and the provision of labor market information, and technical assistance to prime sponsors.

WHO GETS THE ROLES AS SERVICE DELIVERERS?

Another critical issue that CETA has not resolved concerns the perennial question of presumptive deliverers of service; which players are going to be tapped for key roles in service delivery, and how will they fit into a comprehensive manpower delivery system? A key concept of CETA was that service deliverers should be tied to high performance, and awarded on the basis of competition. Most prime sponsors started off with little hard knowledge about the performance capabilities of the local deliverers of services. Therefore, in the first year, many of the actors were given extensions of their current contracts to enable local prime sponsors to develop benchmarks or track records by which performance could be measured. In other cases, local community sentiment was so clearly articulated against certain service deliverers, based on reputation, that their inclusion as delivery agents would have jeopardized the credibility of the system.

As the CETA system has developed, the notion of "demonstrated effectiveness" has assumed genuine importance at the local levels as prime sponsors have tried to find effective program agents. The attempted monitoring and evaluation by some prime sponsors has been a new and threatening experience for some service deliverers. The search for the appropriate role of the employment service, community-based organizations, community action agencies, and others under CETA has been a constantly evolving process. There have been promising developments in some communities, and disagreement and conflict in others. On the whole, however, the myriad actors on the CETA stage have learned to accept each other and to devote their major energies to the improvement of manpower services for the disadvantaged.

We believe the development and promotion of local initiatives should be encouraged and strengthened. This can be done by avoiding strict requirements on prime sponsors to contract more services to predetermined service deliveries. Congressional mandates for presumptive deliverers of consolidated manpower services might cut off the development of neighborhood initiatives and reduce the effectiveness of comprehensive manpower planning by prime sponsors. The record of the past is clear that those who become too immersed in day-to-day service delivery have difficulty maintaining the perspective for strategic planning or the objectivity for evaluating results.

On the one hand, prime sponsors should retain a broad measure of flexibility to plan, coordinate, and implement comprehensive manpower plans appropriate to their communities. At the same time, prime sponsors should avoid building extensive capacity for programs delivery activities of their own when capable and experienced. Every effort should be made to maximize the use of organizations that have shown an ability to reach and effectively serve those most in need of manpower services. Such pluralism is the essence of decentralization.

The relationship of CETA to the state employment security system has been more complex and more ambiguous. Initially, the Department of Labor indicated that there would be no presumptive role for any former service deliverer. Consequently, each former player had to negotiate his role with local prime sponsors. If this was an uncomfortable role for community based organizations, it was an even more unfamiliar experience for the state employment services. During the second year of CETA, it became clear that the Department of Labor, as the parent of both the employment service and CETA, was beginning to favor its first born. Conflicting policy statements emanated from the national level of the Department of Labor office. At one point the regulations mandated job placement services by the employment service. But the national office later acquiesced to the urging of prime sponsors who viewed compulsory reliance upon state employment services as an intrusion on their mandated flexibility to select deliveries of service based on locally demonstration effectiveness.

There is growing evidence that CETA and the employment service are developing accommodations to each other reflecting the recognition that, at a minimum, the combined resources of the two systems are necessary prerequisities to the development of labor market exchange and employability development functions required of a manpower system. In many areas there are examples of coordination of roles to effect better penetration of the private sector to locate increased numbers of jobs, as well as better integration of efforts for outreach and recruitment of target populations. We are persuaded that prime sponsors and employment service agencies at the local level are better able to work out their individual patterns of accommodations without imposing a single national model. While acknowledging that a single, compartmentalized solution may be "neater" and conceptually more appealing, we agree with the Employment and Training Administration official who suggested that we develop a tolerance for a little "disorder" in the interest of more effective service delivery at the local level.

Many possible approaches have been suggested to address the issues of two national manpower systems, CETA and employment services, but much of the thinking on the subject is purely conjectural. We trust that Congress and the Administration will avoid hasty "solutions" that divide functions between the two systems. Assigning intake and job referral to the employment service and employability development to the CETA system, or other equally simplistic suggested approaches that would assign job ready client groups to the employment service and non-job ready to the CETA system would be a mistake at this time. Some more definitive analysis may be in sight, however. The Department of Labor funded 10 demonstration projects to test various models of interface between CETA and the employment services. It will be well to examine the results before Congress attempts to mandate any changes in CETA.

ACCOUNTABILITY

The issue of accountability in a decentralized, decategorized system is a complex and sensitive one. The responsibility at the federal level to see that CETA funds are spent

in line with legislative objectives has to be balanced against the stated purpose of the Act to permit prime sponsors to exercise their judgment in assembling a local manpower capability. Conceptually, this is one of the biggest puzzles in the CETA system. It resists any cut and dried solution, but demands further attention because the present arrangements are not adequate.

Early charges notwithstanding that initially the feds intended to leave the money on the stump and run, the Department of Labor established early standards of financial accountability which are apparently working. They are sensible and direct. Funds mismanagement is occurring probably no more frequently than is to be expected or can be reasonably prevented. Because the federal government has a responsibility to demand financial accountability, financial management standards have an appropriate place.

Program accountability presents a different story. Although the Department of Labor has an understandable need to know whether prime sponsors are doing their jobs, there is an explicit question about how such information should be distilled. There is also an implicit question about whether the prime sponsor should adapt to providing standardized evaluation information to the Department of Labor, or whether the Department of Labor should adapt to evaluating unstandardized programs run by prime sponsors.

In the 1970s, the Employment and Training Administration's (ETA) capacity to monitor the activities under its purview has been steadily eroded. Personnel cuts and ceilings and internal management policies that have inhibited staff development have all hurt agency morale and reduced ETA's capabilities. This has come at a time when the demand has been for an expanding ETA role.

Centralized performance goals run counter to the spirit of the CETA approach. Individual prime sponsors and their programs are as unalike as apples and oranges; attempting to apply a single standard to them denies local initiative. Yet, that is all ETA is capable of doing in its present condition. A special problem emerges because so few in national and regional offices have front line experience in decentralized manpower programming. Suggested program guidelines and performance indicators promulgated by the national office as rough guides in reviewing prime sponsor plans and actual performance, are instead applied mechanically in areas where there is no substitute for seasoned and informed judgments. Just as importantly, ETA lacks a critical capacity for providing technical assistance. By virtue of CETA being a decentralized, decategorized system that assumes no program model, the technical assistance capacity is needed now more than ever.

Flexible decisionmaking authority and the responsibility for developing performance indicators should be retained at the local level. This will better assure the development of comprehensive employment and training services responsive to local labor market needs. The monitoring role of the Employment and Training Administration should be expanded to include reviewing prime sponsor evaluation plans and performance measures. ETA's review should then be carried on with reference to prime sponsors' goals. ETA should also extend its technical assistance capability to assist prime sponsors developing evaluation strategies.

ETA national and regional office staffs should be augmented to permit ETA to carry out a genuinely decentralized program of monitoring and technical assistance. A more aggressive use of the Intergovernmental Personnel Act could bring into the national and regional DOL offices more people who know the procedures and problems of prime sponsors and their subcontractors.

While we feel that accountability should be defined in terms of locally established standards, we are not proposing that the Department of Labor abdicate its responsibility under CETA of pursuing national policy goals. We think that if the notion of a national/state/local manpower partnership is still valid (and we think it is), then there is a definite place for national programs to complement state and local emphases. In the cases of such national programs, ETA does have an appropriate role in determining general standards of performance. But even here the standards should be formulated to steer prime sponsors towards desired final effects, not intermediate objectives based on national office views of how goals should be achieved.

PUBLIC SERVICE EMPLOYMENT

The public service employment (PSE) component of CETA, only a relatively small provision under Title II of the original CETA legislation, has mushroomed. Starting at a level of $250 million, PSE efforts are budgeted for $6 billion in fiscal 1978 under Titles II and VI; three-fifths of the CETA total.

The continued expansion of PSE as a countercyclical tool has created a dependency in local governments on CETA that has evolved as a major policy issue. Other topics for concern are the extent of substitution at the local level on one hand and the uncertainty over whether additional useful jobs can be created on the other hand. Prime sponsors are especially concerned with the changes in eligibility criteria for PSE slots and the quixotic nature of PSE funding—unpredictable funding releases whose timing and levels are nearly impossible to predict.

The dependency issue is real. Many urban areas are hard hit simultaneously by recession-induced revenue shortfalls and social service demand increases, as well as deteriorating tax bases. They are dependent on PSE for delivery of basic municipal services. The issue of substitution—which various observers estimate to range between 0 and 100 per cent—clouds the serious municipal service delivery situation of many local governments. While most prime sponsors have utilized PSE funds to hire new workers for new or expanded services, some cities have found themselves in the position of having to lay off thousands of teachers, police, fire, sanitation and other employees due to a severe fiscal crisis. Maintenance of effort is meaningless under those conditions. People would be without jobs and municipal services would not be delivered without PSE. City officials could not defend laying off employees with years of seniority while hiring new workers with PSE funds.

Observers have also followed a line of questioning from the opposite direction, asking whether or not prime sponsors have reached the saturation point with PSE slots. Fearing a wave of make-work jobs, there are doubts about how much good additional allocations for job creation would do. Intuitively, these concerns seem ungrounded given the ever expanding demands for added governmental services. In fact, however, some prime sponsors have encountered administrative difficulties in developing worthwhile slots integrated into service agencies.

It may be that the potential expansion of service type jobs is approaching its limits. In any event, it might be possible to put the unemployed to work more productively if local sponsors could shift to a service mix that includes social capital formation. Some of this can now be done by improving linkages between public works and economic development projects at the local level. But the statutory one-year time limit on PSE projects should also be relaxed where it stands in the way of projects achieving self-sufficiency at the local level. Consideration should be given in any expansion of a PSE program for including on a limited basis authority for prime sponsors to engage directly in capital formation projects.

It appears that PSE has fast become a kind of special purpose financial assistance program for local governments. Unless improvements in municipal finance capacity coincide with drops in unemployment, there could be serious disruptions in municipal services, as unemployment falls and the PSE spigot is shut down to a trickle.

The big if in this scenario is if the revenue-raising capacity of municipalities will improve as employment opportunities improve. In all likelihood, any general upsurge in economic activity that reduces unemployment will improve the revenues of most prime sponsors. But it is not so certain that increases in revenues will be sufficient to offset lost PSE resources. Local governments have been hit hard by inflation, limiting service capability. The tax structures are regressive and, in some cases, have already been pushed to the limit. What this means is that although high unemployment may not always be with us, a need for the kind of municipal service support that PSE provides will be. The job creation requirements of welfare reform may provide a bridge maintaining those services when and if unemployment declines. But employment programs should not be used as a permanent subterfuge for general revenue sharing. Congress should decide directly to what extent local government costs are to be federally subsidized.

Though the emphasis has been on PSE's value as a countercyclical tool, the original thrust as a structural instrument should not be lost. Prime sponsors should be free to continue to offer public service job opportunities to those who normally are not considered for public employment. The design can ensure transition to nonsubsidized jobs for many and the opening of new routes into public employment for many of the disadvantaged.

Another consideration to keep in mind with respect to PSE is, of course, the job creation provisions of any welfare reform legislation. It would be premature to lock in rigid funding formulas or program features while that aspect of welfare reform is up in the air. But it should be recognized that a large proportion of the candidates for welfare reform job creation might also be candidates for PSE slots aimed at structural unemployment.

Substitution is a lesser problem for structural uses of public service employment than it is for countercyclical purposes. Changing the allocation formula as we suggest below would make a larger proportion of the funds available for public job creation in those areas where employment potential is most limited. However, because job creation needs in such areas require a long-term commitment, it is essential for PSE to be related to economic development and population distribution policies which offer either occupational or geographic mobility.

CETA FUNDING

The CETA funding mechanism has built-in problems that are inhibiting the flexibility of prime sponsor operations and limiting the effectiveness of CETA. Some of the problems are simply fruits of the democratic process; but others are a function of poor legislative and administrative design, and they can be changed.

Perhaps the most pervasive problem has been the unpredictability of CETA funding, including the level as well as the timing of funding. Under Title I, questions about the level of funding have impinged upon the amount of genuine planning prime sponsors have been able to do, forcing either hap-

hazard planning or requiring the devotion of excessive energy to contingency planning. The problems have been compounded by the fact that Title I grants—the centerpiece to prime sponsor manpower efforts—have been eroded by inflation.

Consequently, prime sponsors have seen their Title I service capacity steadily diminished by rising costs, as total appropriations have not kept pace with inflation. The multiyear funding authority built into CETA has not been exercised exacerbating the difficulties of long-range planning by prime sponsors. Lacking the fair warning that multiyear funding might give them, prime sponsors have not even been in the position to improvise in their plans to compensate for underfunding or overfunding.

While prime sponsors have encountered problems under Title III similar to those under Title I, especially for summer youth programs, Titles II and VI have presented different problems. Pegged as they are to unemployment rates, the PSE funding is even more uncertain. Because the unemployment trigger is only an on-off switch, prime sponsors have not been able to make legitimate estimates of how much PSE funds to expect. With the unemployment rates as high as they have been since 1974, prime sponsors have known only that they will get some assistance. Once it arrives, the demand for fast enrollment pushed by the Department of Labor and the nature of countercyclical measures has seriously undercut attempts to create solid, functional jobs.

Because the state of the local economy is no more perdictable than the national economy, it is impossible to remove the uncertainty attached to funding many activities under CETA. But some changes can be made by taking advantage of the permanent aspects of some of the programs and reducing the wide range of response possible under the countercyclical efforts.

The Title I allocations to prime sponsors, should be adjusted for the effects of inflation so that service levels can be maintained. It is essential though, that prime sponsors have a guaranteed base. It certainly would be a mistake to allocate a specific percentage of total employment and training funds for Title I. The need for such funds would vary with the stages in the business cycle and would force prime sponsors to engage in extensive training during periods of high unemployment. The discretionary set-aside for the Secretary of Labor should be increased so that the prime sponsor base can be supplemented where special considerations warrant.

In order to improve the conditions for prime sponsor planning, CETA should be authorized for at least three years, and the Department of Labor should take advantage of advance appropriation provisions. The level of additional funding should depend on the state of the economy. There should also be a trigger for additional funds under Title VI, to provide countercyclical assistance to local areas. The national level of assistance should be set by a guideline of creating at least 25,000 jobs for every 100,000 unemployed above 4.5 percent.

But, no matter what the details of a PSE trigger might be, Congress should frankly recognize the limits of the data that the Bureau of Labor Statistics can furnish. BLS presently is not equipped to provide more sophisticated data, because of limits on the state of the art and limits on BLS resources.

One serious shortcoming in the allocation formulas used in apportioning the CETA funds to the various prime sponsors is the inadequate attention paid to economic hardship. Unemployment ratios continue to be the principal tool for identifying areas of greatest need. Four years ago, the Council recognized the limits of unemployment data: "The unemployment rate has become less and less useful as a measure of deficient aggregate demand or of deprivation and need." [2] The feeling then as now is that underemployment on one hand, and the network of income transfer and in-kind aid on the other hand, make a simple measure of unemployment an insufficient indicator of need.

We recommend that the Bureau of Labor Statistics develop the methodology for determining economic hardship as required by Section 312, of CETA and that such a measure be incorporated into CETA allocation formulas.

The question of relating funding to economic hardship raises the issue of resource allocation. Pre-CETA employment and training programs tended to stress an antipoverty focus. CETA gave more concern to unemployment levels in its allocation formulas, thus shifting funds away from central cities and rural areas where labor force participation tends to be low and poverty high. We recommend that as the economy continues its recovery, leaving behind residual structural problems, the allocation formulas be adjusted to put more emphasis on family income and less on unemployment, hence shifting resources to redressing the problems of the most disadvantaged population.

PRIVATE SECTOR INVOLVEMENT

Rhetoric and good intentions notwithstanding, CETA has not successfully tapped the resources of the private sector, nor has it succeeded in taking advantage of private sector labor demand any more than prior manpower efforts. Program operators have had difficulty placing many CETA clients in jobs where they have attempted to set up work experience situations. Many factors have accounted for these problems. CETA has operated in a high unemployment economy. Rigid legislative and regulatory requirements have limited prime sponsors in making arrangements with private sector interests.

When private firms are laying off their own workers or are putting them on part-time schedules, they have little opportunity or need to train or hire CETA clients. In times of economic growth, employers are seeking new employees and can be influenced in regard to who is to be hired. But, in the past, incentives for disadvantaged workers have been largely limited to underwriting training costs. There has been a reluctance to experiment with straightforward wage subsidization for groups such as inexperienced youth who employers have been slow to hire. We recommend such experimentation.

If experience is any indicator, firms are reluctant to establish any financial ties with local manpower efforts even in good times, because of reporting requirements and possible new liability to federal regulation. Those who have tried cooperation have come away disenchanted over the unpredictable funding, recordkeeping standards, and management headaches that go with the programs.

Where it is feasible and not self-defeating or inequitable, private sector involvement should be encouraged. This should be done using a variety of strategies, including provisions for experimentation with wage subsidies beyond that which is already permitted under the Youth Employment and Demonstration Projects Act. Whatever is done should be accomplished in such a way as to minimize administrative complexity.

Any new attempts at private sector involvement within the context of present programs. Dramatic new program initiatives from the national level are not going to overcome the biases of private employers against getting involved in government manpower efforts. But flexibility at the national level that permits greater experimentation by prime sponsors may have some appreciable payoffs.

THE NATIONAL COMMISSION FOR MANPOWER POLICY

One of the important provisions of CETA was the establishment of the National Commission for Manpower Policy as an independent body for reviewing national employment and training policy. Maintaining an outside perspective it has brought to the Department of Labor good quality policy analysis and independent assessment of employment and training programs. However, the Commission has been restrained by lack of independence from administration policy. While the majority of its members are from the general public, the Commission also includes members representing a number of executive departments and agencies. This has had a stifling effect on some of the Commission's policy statements. At very little risk to the policy relevance of its work, the Commission could be granted more freedom in expressing independent opinion.

Voting privileges, and the authority to approve or disapprove Commission position statements, should be vested only with the public members of the Commission. To further strengthen the independence of the Commission, it should be provided direct funding. Administration members should be retained in an advisory capacity.

LOWER FARES GENERATE GROWTH IN PROFITS AND TRAFFIC IN AIRLINE PASSENGER INDUSTRY

Mr. KENNEDY. Mr. President, as Members of the Senate are aware, the Air Transportation Regulatory Reform Act will be before us in a matter of weeks. This bill is the culmination of over 3 years of legislative effort by the Judiciary and Commerce Committees to encourage, through regulatory reform, the development of an air transportation system which relies upon competitive market forces to determine the variety, quality and price of air services. All present data indicate that competition within the industry will result in substantially lower fares for passenger service.

Fear has been voiced that these lower fares will cause a loss of revenue for the airlines by diverting passengers from higher fare services to the lower ones. It is becoming increasingly clear that this will not be the case and that lower fares will instead generate new growth in traffic and revenue by adding passengers. This growth will reflect a utilization of air transportation by segments of our population that have previously used it only sparingly or not at all due to the high rates. No significant diversion of existing higher fare passengers is likely to take place, and to the extent that it does, revenue losses will be more than made up by the increased traffic.

Discount fares already in effect are beginning to have a positive impact on the air industry. United Airlines has applied to the CAB to expand its discount service because its experience has shown that lower fares generate new passengers and sustained profits. British Airways has confirmed that its new low air fares between New York and London have added passengers to the transatlantic market, not diverted others from higher fare services. Trans World Airlines has reported its best quarter

since 1966 due, in large part to the swift growth in airline traffic generated by new discount fares.

Greater profitability and increased traffic will demonstrate that more competition will mean more jobs, not less, and that the airline workers will be better off in an industry whose growth is no longer hampered by restrictive regulation.

Mr. President, I request unanimous consent that the text of articles in the Washington Post and the Wall Street Journal discussing these new developments be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Jan. 5, 1977]

LOWER AIR FARES ADDING PASSENGERS

(By Carole Shifrin)

A top British Airways official yesterday confirmed that the new low air fares between New York and London have added new passengers to the transatlantic market, not diverted others from higher-fare services.

"The evidence at the moment—if we are talking about our own scheduled services—is that quite a bit of the market is new," Roy Watts, director of finance and planning for British Airways, said yesterday.

BA, along with the other airlines on the New York-London route, responded to the introduction of Laker Airways' low-cost no-reservations Skytrain air passenger service in September with three kinds of low-fare offerings of their own, although officials of some of the airlines complained that the new fares most likely just would divert passengers from their other fares.

Watts said yesterday there was little evidence that had happened, although he acknowledged that some observers feel there might be more diversion from the charter airlines. "Certainly we wouldn't claim at the moment that we have diversion," he said. In October and November, for instance, he said BA carried "rather more passengers" on the North Atlantic than usual for those months and "large numbers of stand-by traffic" (one form of low fare).

Watts expects BA to continue to offer the entire package of low fares after their initial expiration in March, although the price levels could change a bit. "I don't see the scene changing the next year," he said. "The fares are here and they appear to be successful."

Watts also disclosed that British Airways is looking into the possibility of instituting shuttle service—patterned after the Eastern Airlines' shuttle between Washington and New York—between London, on the one hand, and Paris, Brussels, Amsterdam and Dublin on the other.

BA introduced shuttle service between London and Edinburgh, Glasgow and Belfast four years ago, but this is the first time it is considering a no-reservations, walk-on, high-frequency "Euro-Shuttle" service on the dense routes to some of Europe's capital cities.

The airline is talking with the major airlines with which it competes on those routes because a formula would have to be worked out where the carriers of the different countries on each route could run the shuttle jointly, Watts said. They also would have to develop a different philosophy seeking to identify customers with a destination, not a carrier. "You wouldn't fly British Airways or Air France; you'd fly 'to Paris'," he said.

All shuttles to Europe would have to go through something like a "Eurogate" in a separate satellite building between the main terminals at Heathrow Airport in London, he added.

Watts also said:

BA is in the market this year for 20 planes each seating about 120 persons. In the running are planes made by two American companies, Boeing Co. and McDonnell Douglas Corp.

Concorde flights between New York and London were 90 to 92 per cent full before Christmas, while the Washington-London Concorde flights fell off to about 60–65 per cent full.

[From the Wall Street Journal, Jan. 18, 1978]

TRANS WORLD AIR SAYS ITS 4TH PERIOD RESULTS WERE BEST SINCE 1966

New York.—Trans World Airlines will report its best fourth quarter results since 1966, Edwin Smart, chairman and chief executive officer, said.

Because of slow business for airlines, the fourth period is usually a loss period for the company. But for the 1977 fourth quarter, TWA expects to break even or report a profit, Mr. Smart said.

The results would mean TWA, for the full year, will report record profit, the executive added.

Despite these results, TWA doesn't have any plans to declare a dividend on the common stock in the immediate future, Mr. Smart indicated. He noted that bank and insurance-company loans to the company carry restrictions that currently preclude any common dividends. He added, however, that with another $10 million in airline earnings, readjusted for certain items, TWA will be free of such restrictions.

TWA reported a loss of $2.1 million in the 1976 fourth quarter. For the full year, TWA reported profit of $37 million, or $2.51 a share. TWA's previous record profit was $54 million in 1965.

Although Hilton International, a hotel subsidiary and Canteen Corp., a food-service subsidiary, recorded good performances, it was the airline that showed the principal improvement in the fourth quarter, Mr. Smart said.

Earlier in the year, airline results had been deteriorating, mainly because of increased losses on domestic routes. But Hilton International and Canteen had contributed greater profit. As a result, in the first 11 months consolidated profit was $65.6 million, or $3.98 a share, up from $44.8 million or $3.10 a share a year earlier.

A surge in traffic, which has been experienced by many airlines, has been triggering a recent improvement in airline operations, Mr. Smart indicated. He noted that while traffic grew 7 percent in the entire year, TWA traffic jumped 8 percent in November and 13 percent in December.

Discount fares are a major reason for airline traffic's swift growth recently, Mr. Smart said. The discounts have generated so much new traffic that they have more than offset any revenue losses and have become profitable, he said.

TWA is following American Airlines' lead in extending Super Saver fares, Mr. Smart noted. The fares, which link major cities in the East and Midwest with the West Coast, offer discounts ranging up to 45 percent.

[From the Washington Post, Feb. 1, 1978]

UNITED PROPOSES BROAD FARE DISCOUNTS

(By Carole Shifrin)

United Airlines yesterday proposed the most wide-ranging fare discounts yet in the continuing and escalating domestic air travel price war.

The nation's largest airline said it would ask the Civil Aeronautics Board today for permission to extend Super Saver discount fares to all United routes over 900 miles. The plan would expand the discount fares, with savings of 30 to 40 per cent off regular coach fares, to each of the 110 cities United serves.

From Washington, the new low fares would be available to 34 different cities.

Until now, United offered Super Saver fares between a total of 26 pairs of cities, all of which were major transcontinental routes. With CAB approval, the discount fares would be offered between a total of 1,500 pairs of cities on United's extensive route system.

Under United's proposal, the new fares—with discounts of about 40 percent Monday through Thursday and 30 percent Friday through Sunday—would be available for travel beginning March 18. An exception would be made for travel to Florida cities, where Super Saver fares would be available beginning April 26.

Also on April 26, the new fares would replace Super Saver fares which now offer 30, 40 and 45 percent discounts depending on the day of the week.

All the new fares, which would be available on a maximum of 36 percent of the seats on all flights, would remain in effect through May 31. They would apply on round-trip travel only to trips between seven and 45 days in length, not counting the day of departure. Reservations must be confirmed at least 30 days before departure.

Howard Putnam, United group-vice president for marketing, said United hopes the fares will stimulate pleasure travel during traditionally "soft" spring months, especially on longer routes that frequently have empty seats this time of year.

The discount fares have proven most popular on those routes, he said. He noted that United's Freedom fares, which feature discounts of up to 20 per cent, will continue to be available on routes shorter than 900 miles.

Putmam said results of the spring discount fare expansion would help the airline decide what to do about summer fares.

Alluding to the fact that United officials were skeptical at first about the ability of the discount fares to generate new passengers, Putnam said, "We now believe Super Saver fares at the discounts we're proposing are capable of generating sustained profit for the airlines. We have experienced substantial growth in markets currently offering the fares."

In a related development, the CAB yesterday approved Braniff Airways' proposal to institute a 50 per cent fare reduction "Home Free" plan on certain routes after Braniff agreed to modify certain cancellation and no-transfer conditions.

Braniff resubmitted a proposal that would allow a traveler with a discount ticket who wants to cancel a reservation to transfer the ticket to another within 14 days of the flight or to forfeit half of the ticket price. Braniff's original proposal would have allowed no transfers. A person cancelling a reservation would have had to forfeit the entire ticket price under that plan.

CONCERN FOR RURAL AMERICA

Mr. ABOUREZK. Mr. President, I had the pleasure of taking part in the Third National Conference on Rural America held at the Shoreham-Americana Hotel here in Washington on December 5 to 7. The conference was held simultaneously with one on rural housing and one on rural health. Some 2,000 people participated in the 3 events.

A broad cross section of concerned rural Americans attended. They came from rural community service agencies, national farm organizations, from nonprofit housing corporations, rural doctors, nurses, and paramedics. Legal service aids attended, as did environmentalists, farmers, transportation specialists. Many church groups took part.

Also, people concerned with the problem of farm workers and the rural elderly.

Among the proposals coming out of the three meetings was a call for a national commitment to an energy program that would center around renewable energy sources such as solar, wind, and distilled fuels made from farm products.

The Rural Health Conference delegates voted to form a rural health council that will work for a national health service of salaried professionals including physicians that would be financed by the Federal Government. This council is now taking shape.

The Rural Housing Conference called on the Federal Government to create a home ownership program to assist families with very low incomes acquire their own home. President Carter, in his budget message, announced his intention to submit such legislation this year.

The conferences were well covered by the media and several of the articles do a good job of capturing the spirit and content of the meetings. I ask unanimous consent to print a selection of the press coverage in the RECORD at this time.

There being no objection, the press coverage was ordered to be printed in the RECORD, as follows:

[From the St. Louis Post Dispatch, Dec. 11, 1977]

RURAL POVERTY: "THESE PEOPLE SUFFER IN SILENCE"

(By William K. Wyant, Jr.)

WASHINGTON.—"There has been a rising ooze of consciousness about rural poverty—there is some movement," executive director Clay L. Cochran of Rural America Inc. said last week.

Cochran, a large and bearded New Mexican who is given to smoking a corncob pipe, has long been trying to pry from the federal establishment a little more than the widow's mite that now goes to the poor Americans who live in the countryside.

As their Demosthenes, county lawyer, and Capitol Hill shepherd, he allowed himself a guarded optimism after the fire and fury of the three-day third National Rural American Conference, which ended Wednesday, had died down.

One of the practical consequences of the coming together, which attracted more than 2000 delegates and included the Rural Housing Conference and the National Rural Health Conference, was a decision to set up a Rural Health Council.

It is Cochran's conviction that the nation is urban-oriented, and every time it sets up a program to help Americans the 60,000,000 to 80,000,000 people in the small towns and on the farm tend to be left out.

What ought to be kept in mind, he says, is that more Americans live in towns of 2500 and below than live in the nation's 153 largest cities, and the rural element accounts for 44 per cent of the officially designated poor.

Cochran is old enough to have seen something of the Great Depression of the 1930s. He was admitted to the Texas bar in 1939, did graduate work at the University of Texas and took a Ph.D. in economics at the University of North Carolina in 1950.

He was a legislative consultant on agriculture and resources for the American Federation of Labor-Congress of Industrial Unions. He ran the Rural Housing Alliance from its formation in 1966. The alliance merged this year with Rural America, Inc.

Central to the credo of the organization, which is quasi-government because it subsists on federal funds as well as foundation and member contributions, is the idea that national policies discriminate against citizens in non-metropolitan areas.

Documenting that thesis is easier than getting something done about it. Cochran often uses the word "metropolyanna" to describe what he calls "a nearly universal tacit assumption that, sooner or later, everybody is going to come to the city and live happily ever after."

There is no malice in it, Cochran says, but the laws on housing and the like are written with the cities in mind, and it sometimes looks as if the nation is "dedicated to the maldistribution of income" as far as the rural poor are concerned.

Cochran said one recurrent difficulty has been that federal assistance typically comes in a package in which the federal government puts up the capital, but local government must pay operating costs. Rural counties cannot afford to do much, and their poor suffer.

President Carter's proposed welfare program, aimed in part at righting the imbalance between welfare payments in cities and the country, is being watched carefully and skeptically as it goes through the congressional mill.

In line with the "to him who hath it, shall be given" philosophy that usually prevails, some in Rural America, Inc., believe, the benefits to poor people in rural areas are being pared so that more money can be poured into the urban areas.

The rural America constituency overlaps with but is not the same as the farm elements involved in this weekend's "American Agriculture" grass-roots protest strike. The conference here this week tabled a motion to support the strike.

In his own conference speech, Cochran was pleased to note that Farmers Home Administration funds for rural housing had increased six-fold in one decade from less than half a billion dollars to more than 3.1 billions. But he was not euphoric.

"There is an establishment of awesome power, resilient and resourceful, with a base solidly glued into our culture, and that establishment is as wedded to a maldistribution of income as a skunk is to its odor," said Cochran.

Inasmuch as getting a decent habitation for poor rural people seems a visionary objective in the short run, Cochran suggested as a "modest proposal" that the president and Congress undertake to build at least "a nice sanitary pit toilet" for all dwellings that need one.

Senator James Abourezk, D-S.D., delivered a strong address on the plight of the American farmer, as did Secretary of Agriculture Bob Bergland, whose agency, Cochran said, should be a Department of Rural Affairs instead of a "Department of Agribusiness."

A great many people are left out, Bergland said, when the American countryside is thought to be composed of only farms and farm communities. He said many are only indirectly part of the farm economy, but still are part of the rural picture and must be given consideration.

For decades and decades, today as well as yesterday, rural people have been found to have the highest percentage levels of poverty, the worst housing, the most inadequate medical care and education and the least access to public transportation, Bergland said.

"These folks suffer in silence," Bergland repeated.

Since President Theodore Roosevelt's Country Life Commission of 1908, and even before, there has been a series of studies about the needs and difficulties of families living out in the rural places.

"If there is one lesson taught by history," Teddy Roosevelt said, "it is that the permanent greatness of any state must ultimately depend more upon the character of its country population than upon anything else."

Franklin D. Roosevelt put great emphasis on the alleviation of rural poverty. In 1966, President Lyndon B. Johnson set up a National Advisory Commission on Rural Poverty. Johnson, embroiled in the Vietnam War, was accused of trying to suppress the commission's report, called "The People Left Behind."

Some of the farm leaders involved in rural America, Inc., considered President Richard M. Nixon a decidedly negative force. As for President Carter, they find it hard to see that he has made much difference, except that the Carter-appointed officials are more friendly.

[From the Washington Post, Dec. 6, 1977]

SMALL FARMS SEEN PERILED BY CARTER'S PROPOSALS ON ENERGY

(By William Claiborne)

The Carter administration's national energy plan would seriously undercut the life-and-death struggle of rural America for economic survival and would speed the extinction of the small family farm.

That was the conclusion of several speakers yesterday at the opening session of the third National Conference on Rural America in which the economic and social malaise of the nation's heartland is undergoing scrutiny by 1,500 individuals involved in rural economic, health, housing and social welfare programs.

Carter's energy policy is inseparable from the development of nonrenewable resources, such as oil and natural gas, and would inevitably squeeze farmers in a continuous spiral of rising costs, said Barry Commoner, a leading ecologist and advocate of solar energy.

"The time has come, I believe, to recognize that the [energy plan], whether it emerges approximately intact or is reassembled from the contradictory scraps now before Congress, is the answer to the wrong question," said Commoner, director of the Center for the Biology of Natural Systems at Washington University in St. Louis.

No matter which side wins the "political burlesque" in the House-Senate conference on energy, Commoner said, the farmer will lose.

Since 1973, he said, farm production costs have increased at an average annual rate of 11.8 per cent, led by 100 per cent cost increases in propane, 250 per cent rises in nitrogen fertilizer costs and 67 per cent costs in pesticides—all petroleum-based commodities. At the same time, the farmers' selling price has fallen "to the point of squeezing the grain farmer up against the inexorable rising costs of production."

Moreover, he said, the energy plan would worsen the energy industry's drain on the availability of capital, which would make it even harder for the American farmer to raise capital.

"In practical terms, if the national energy plan were adopted, farmers would find it harder to get loans as the banks' capital is grabbed up by the equally hard-pressed, but much more powerful utilities and coal companies," Commoner asserted.

"It is time, I believe, to start over again with the right question. When that is done, we will discover that the right answer is the farmer's oldest partner—the sun," Commoner said.

Renewable energy sources produced by the sun—such as grain that can be converted to ethyl alcohol and wood that can be used to manufacture methane gas—ultimately can help the farmer "escape from the economic tyranny which the industry has imposed on him," Commoner said.

A similar theme was advanced by Sen. James Abourezk (D.S.D.), who assailed the "exploitation" of the small farmer by the oil

industry, grain traders, agribusiness conglomerates and the "duplicity of the Commerce Department and the venality and stupidity of officials of the Department of Agriculture."

"The classic example of this ripoff mentality at the expense of the farmer was the Great Grain Robbery of 1973," Abourezk said, referring to grain sales to the Soviet Union.

In an attack on current energy policy, Abourezk singled out a drive to deregulate natural gas, which he said is "tantamount to an express train to economic oblivion for the American farmer and consumer."

He urged Carter to withdraw his support of the bill emerging from joint Energy Conference Committee, and substitute a plan reliant on renewable resources such as solar and wind power, bio-energy and conversion of alcohol to natural gas.

The conference, held at the Shoreham Americana, is sponsored by Rural America, a non-profit Washington based organization to promote the economic and social welfare or rural people.

Simultaneously sessions are being held by the National Rural Housing Conference and the National Rural Health Conference.

[From the Washington Post, Dec. 6, 1977]

RURAL AMERICA: THE UNNOTICED PLACES

(By Colman McCarthy)

Even though we have a President with a rural background and even though the social problems of rural America continue to dominate the lives of the 60 million citizens who live in our small towns and country places, it usually takes something quirky to focus attention on what is happening "out there." Recently, wire photos pictured some protesting farmers jamming the roads of Plains, Ga., with their tractors. Last spring, floods in Appalachia captured the headlines for a day or two.

But this week in Washington, attention of a more positive kind is to be given the unnoticed places beyond the cities. The Third National Conference on Rural America, which began its three-day meeting yesterday, brings together some of the nation's most dogged and resourceful organizers who have committed themselves to such goals as better health-care delivery; more adequate sewer and water systems; more land ownership for blacks, Chicanos and Indians; improved transportation services; and, in general, a fairer distribution of the nation's resources to rural America.

Those attending the conference are neither theorists demanding instant or unrealistic reforms nor professional conference-goers ready to issue a position paper at the drop of a per diem. They are mostly community workers, lower-level government officials and lone citizens who know that while city dwellers romanticize rural America as the place "to get away from it all," the rural scene is, in fact, deep in the anguish of its own problems.

According to figures from the Department of Agriculture, the Department of Health, Education and Welfare and the federally funded Rural Housing Alliance:

One-half of the nation's poor are rural people, though they are only a third of the population.

For every one substandard housing unit in a metropolitan area, two can be found in rural areas.

Only 12 per cent of the nation's doctors are in rural areas, while half of all rural citizens live in areas officially designated as "medically underserved."

Two million acres of farmland are lost annually. This year in Wisconsin, four times the number of farmers are leaving the land than in 1974. America's farmers pay $3 billion annually in state and local taxes, up 53 per cent from 1967.

Forty-one per cent of the nation's elderly are rural residents. One third of that number have incomes below the poverty level, against 25 per cent of the urban elderly.

Nearly 150 bus companies that were serving small towns in 1962 are now out of business.

Some 5.3 per cent of rural school-aged children are not enrolled in school, a non-enrollment rate twice that of urban children.

These figures are less a sudden overdose of bleakness than a reflection of a slow process of decay that began decades ago when industrialization, migration from the countryside and technology exerted their pressures on rural America. But decay is not despair, and many of those at this week's conference believe a turning point may be at hand.

In federal legislation, for example, several victories are in sight. These include the new water-pollution-control amendments, with a $600-million authorization for conservation assistance to mostly small farmers fighting land-resource problems; at a time when farmlands suffer 25 per cent more erosion than in the dust bowl years, the money would translate into production in future years. They also include the new rural-health-clinic bill, which would allow nurse practitioners and doctors' assistants to be reimbursed for their services under Medicare and Medicaid (formerly, rural health clinics could provide coverage only if a doctor was physically present at the clinic).

According to Roger Blobaum, chairman of the conference: "Throughout the country, evidence exists that the problems of rural people are being treated with unaccustomed respect and interest. Congress now has a Rural Caucus that last spring developed and fought for a multibillion-dollar budget for federal programs serving rural America. One agency alone, the Farmers Home Administration, now has authority to lend and grant more than $8 billion a year. The agriculture committees of both the Senate and the House have held extensive oversight hearings on rural development, seeking to bring life to the programs they had mandated."

In the two earlier conferences, frustrations emerged because it wasn't even felt that the federal government was an ally of rural citizens. That feeling has changed, however slightly. Several appointments have been made within the bureaucracy to suggest that at least some of the Cabinet members will be fed some accurate information on what is or is not happening outside Washington. Rural America still endures a disproportionate share of the nation's economic and social ills, but for the moment it is taking for itself a larger share of hope that a modest revival is occurring.

[From the Milwaukee Journal, Dec. 6, 1977]

ABOUREZK BACKS SMALL FARMS

(By Steve Hannah)

WASHINGTON, D.C.—Sen. James Abourezk (D-S.D.) warned Monday that the two biggest threats to the welfare of America's small farmers were the menace of agribusiness conglomerates and the indifference of the US Agriculture Department.

"Make no mistake about it," he said, we are in the midst of a life and death struggle to preserve the best of agricultural America from exploitation by those who farm the farmers—the commercial grain traders, packing houses, agribusiness congolmerates and the money men who provide the financing."

Abourezk directed his remarks to more than 2,000 persons at the opening session of the National Conference on Rural America.

The South Dakota Democrat said the classic example of agribusiness maneuvering at the expense of the small farmer was what he called the Great Grain Robbery of 1972. Abourezk said that thanks to the stupidity of USDA officials, the Russians cornered one-quarter of the world grain market at reduced rates while agribusiness insiders pocketed millions in profits.

SMALL—EFFICIENT

Yet, he said, "it is a statistical fact that small family farm units are much more efficient than corporate farms. The only area in which conglomerate agriculture displays any efficiency is in gathering capital and obtaining huge amounts of credit. This enables them to accumulate more land in order to control all aspects of production from the seed to the supermarket."

Abourezk maintained that the USDA, despite denials, had continued to subsidize corporate agriculture at the expense of the research needs of the small farmer.

He said a careful examination of the federal research and development budget provided a pathetic commentary on the federal government's inverted priorities. Abourezk said the defense budget consumed 48 percent of the total, with space research a distant second at 16 percent.

"Agricultural research is a paltry 2 percent of the total—approximately $700 million," he said. "And the overwhelming portion of that figure goes exclusively for the promotion of agribusiness interests."

WATER FIGHT HAILED

Abourezk said he was gratified to see that Rural America had played an active role in the current controversy over acreage limitations for federal water projects. That issue is now before the US Supreme Court.

The US Interior Department, faced with a lawsuit filed by a California group called National Land for People, has issued new regulations that would limit ownership of federally irrigated lands to 160 acres per family member. The regulations also would impose strict residency requirements on persons receiving federal water.

"This is a crucial problem area, for there are 9 million acres irrigated by federally supplied and subsidized water," Abourezk said.

RURAL ACTIVISTS PUSH FOR NATIONAL HEALTH PLAN

(By Don Kendall)

WASHINGTON.—Rural America, a nonprofit activist group, is deeply rooted in projects aimed at improving the housing for poor people in small towns and rural areas but health care is also high on its list.

So are many social and economic issues: farm labor housing, minority rights in agricultural programs, agricultural marketing, the encroachment of corporate farming, water rights and virtually all other topics having to do with the quality of life outside the big cities.

A major part of Rural America's three-day annual meeting last week was directed at rural health services which, speakers repeatedly pointed out, lag far behind those which are available in urban areas.

Leaders of Rural America are uncompromising in their view that a national health program is needed to replace what they say has been a failure of private medicine to provide adequate service to rural people.

"We have permitted the development in this country of a health-care system which is grossly inequitable, prohibitively expensive and largely unresponsive to the people's needs," the group says in one of its reports.

"Quality health care is a presumed right of the privileged and those who live in the right communities and can afford it, but is denied to large segments of our population, both in the central cities as well as in small towns and rural areas."

Sen. Patrick J. Leahy, D-Vt., told the conference that "the federal government's pol-

icy toward rural health is a policy of neglect" and that rural people generally do not get their fair share of federal allocations for various programs of many types.

For example, Leahy said that rural women make up only 20 percent of all women of child-bearing age yet account for 50 percent of all maternal deaths. Despite this, he said, rural areas get only 11.7 percent of the federal maternal and child-care funds while metropolitan areas get the remaining 88.3 percent.

"I believe that rural areas lose health-care dollars because of an urban bias in federal health programs," Leahy said. "Unfortunately, this bias in health programs is merely an example of an urban bias which pervades many of our federal programs."

Leahy said that "this bias comes not out of malice but more out of ignorance" of the problems of rural areas. He cited these statistics:

"Forty-six percent of our country's poor still live in non-metropolitan areas. Yet they receive less than 20 percent of the public assistance funds, and less than 25 percent of the Health, Education and Welfare social service and the Community Services Administration anti-poverty money.

"Rural areas have three-fifths of the nation's substandard housing but receive less than one-fifth of the federal housing loan and program dollars.

"More than 30,000 small communities lack safe water systems, and the absence of adequate waste disposal systems affect millions of rural Americans.

"Moreover, the major legislative vehicle for assisting rural areas, the Rural Development Act, remains a showpiece. Most of the programs authorized have never been funded. Those which have received money are seriously under-funded."

Leahy said that one mark of progress was the recent passage by Congress of the Rural Health Clinic Reimbursement Act. It authorizes the use of Medicare and Medicaid funds to pay for health services in areas where doctors are not available or are in acute short supply.

The act specifically is aimed at reimbursing doctors' assistants and nurses who provide primary medical care in rural areas where there are shortage of doctors. It also will help rural health clinics where physicians supervise the services.

While health services are of major importance to Rural America, the organization views as pervasive a far-ranging set of problems which not only affect medical care but the quality of life generally in rural areas.

Clay L. Cochran, executive director of Rural America, said that some progress has been made since the first national rural housing conference was called in 1969—the forerunner of last week's meeting—but that major goals still have not been gained fully.

"Basically, what we want is a combination of income creation—employment and farm prices—and income redistribution," Cochran said.

This has to involve a commitment "that the various agencies of this people's government are to see to it that every living soul in this country has a relatively wind-and-water-tight shelter with electricity, running water and a place to run the waste water where the insects won't flourish and the kids won't get diseases from it, and where it won't pollute the water supply."

Cochran said that Rural America will agree to a 10-year plan to achieve that goal "but unless we can come up with a lot of clever ideas to sell the establishment" it will not be achieved.

"There is an establishment of awesome power, resilient and resourceful, with a base solidly glued to our culture, and that establishment is as wedded to a maldistribution of income as a skunk is to its odor," Cochran said.

About 2,000 persons attended all or parts of the three-day meeting, a spokesman said.

RURAL JUSTICE MISSES POOR

(By Steve Hannah)

WASHINGTON, D.C.—In recent years, television and a couple of big box office attractions have combined to show the American public just how justice is exercised in Small Town, USA.

According to Hollywood, it looks something like this:

A rather rotund sheriff, who splits his waking hours with hovering over a checkerboard or bowl of chili, apprehends a poor suspect. The suspect is carted off to the courthouse, where we find the two cornerstones of the local justice system—the county judge and his crony, the town's leading lawyer—also playing checkers.

The sheriff presents his charges. The attorney advises his newfound client to plead guilty and throw himself upon the mercy of the court. The judge, a most paternal character, convicts the poor fellow after delivering a stirring speech on the virtues of law and order in rural America.

RURAL JUSTICE SUFFERING

The offender is carted off to the county jail. The checkerboard and bowl of chili reappear.

Some of the lawyers from Southern states, who attended the National Conference on Rural America here, suggested that Hollywood's rendition of rural justice was not entirely distorted. Lawyers north of the Mason-Dixon Line, however, painted a more moderate picture.

But both groups agreed that the health of the justice system in rural America was suffering, at best, from a severe case of undernourishment.

There is a statistical dimension to the problem. According to the American Bar Association, there are about one-quarter as many lawyers serving the rural areas of the United States as the cities.

SCARCITY OF LAWYERS

Russell Hahn, a staff attorney for Rural America, Inc., said the statistics could not begin to tell the human side of the rural injustice story.

The scarcity of lawyers, particularly advocates representing the rural poor, prevents representation in many civil cases. In criminal cases, where every citizen has a constitutional right to legal counsel, the consequences can be far more dramatic.

Hahn said the principal problem with the rural justice system was that it had a weak private sector.

"There is just not enough business to support any sort of public interest law firms in small towns," he pointed out, "so legal matters fall by default on private, small town lawyers. They are not, because of the social structure of the communities, likely to take on cases which will upset the status quo. Consequenctly, poor people in rural areas rarely get the kind of legal help that might improve their social situation."

EVERYBODY KNOWS

Lee Reno, an attorney who organized a national conference for rural lawyers in Texas last month, said the delivery of justice in small towns suffered, too, simply because "everybody knows everybody else."

In small towns all across the country, Reno said, any controversial action in the local scheme of justice is inevitably followed by personal reaction.

Hahn said that where the legal system was purely the responsibility of the private sector—"as in most rural areas where the social hierarchy is obvious"—people at the lower end of the social spectrum were not likely to call upon people at the top for help.

Hahn said a recent case in a rural Maryland town was a good illustration of just how far removed from the justice system poor people often found themselves.

The community in question applied for a federal grant, presumably to repair a cluster of substandard homes. The town fathers, however, decided that the federal money could best be spent on constructing a marina to house a dozen cabin cruisers.

Hahn said the marina was built, and the next winter two persons living in the substandard homes froze to death.

FEARED EVICTION

"Those shacks just happened to be owned by one of the city council members," Hahn said. "You know, the poor people who live in those houses knew that the grant was federal money and they had a gut feeling about what it was supposed to be used for.

"But they thought they might be evicted from their homes if they complained. They were too scared and there was no sympathetic legal service to approach."

Legal assistance for the rural poor—41% of the people below the federal government's poverty level live in nonmetropolitan areas—must come from government supported attorneys. Today, that means the federal government's Legal Services Corp. Unfortunately, Hahn said, there is no requirement that it devote a percentage of its funds or legal assistance to rural clients.

"Oftentimes Legal Services opens up shop in an area that has lots of rural turf," Hahn said. "But the tendency has always been to spend most of the time and money on the problems of the urban poor. Among other things, they are just a lot more vocal."

REPRESENTING THE NEEDS OF RURAL AMERICA

(By Joe Belden)

WASHINGTON.—There are as many people in the rural U.S. as in the country's 153 largest cities. The fact that those 60 million citizens lacks the private and public resources and services available to their city cousins provided motivation for the Third National Conference on Rural America.

Meeting here the first week of December, this gathering of nearly 2,000 farmers, workers, consumers, land reformers, housing and utility activists, organizers, environmentalists, and other advocates for the countryside was actually three conferences—on rural housing, rural health care, and "rural America." That last term covers agriculture, the elderly, women, farmworkers and education.

In all of those areas non-metropolitan Americans usually get the short end of the stick. Sometimes they get the stick broken over their heads. As Secretary of Agriculture Bob Bergland told the conference, there has been recent growth in rural areas, but "rural people still have the highest percentage levels of poverty, the poorest housing, the most inadequate medical care and the least access to public transportation."

The conference was put together by Rural America, a national membership organization that serves as a sort of populist-agrarian Common Cause. Founded in 1975 after a conference of that name, Rural America merged this year with the ten-year-old Rural Housing Alliance. The organization has a detailed platform covering many issues. A Washington-based staff coordinates policy research, information and action on rural needs.

MANY NEEDS

The needs are many. Rural areas, for example, get only 20 percent of all federal housing subsidies but have 60 percent of the country's bad housing.

In 1974 non-metropolitan areas had six physicians for every 10,000 people, while

metropolitan areas had 16. There are no medical doctors at all in 5,000 towns and 138 rural counties.

More than two-fifths of the working poor live in rural America. Two million rural adults lack a fifth-grade education. And rural median income is 27 percent less than the urban figure.

With these inequities in mind, Sen. James Abourezk (D-SD) told the assembled activists that "Today," for rural and urban people, "our government is, in too many instances, a government of the few, by citizen."

As the Great Depression lifted, Abourezk said, "major portions of urban and suburban America rushed forward in mad pursuit of the bitch-goddess success. They left trampled in the dust the millions of rural Americans to be content to diet on the leftovers of shattered dreams and broken promises. For too many Americans the horrors depicted in *The Grapes of Wrath* and *Let Us Now Praise Famous Men* are still an everyday reality of life."

Two of the most pressing rural concerns are the plight of the small farmer and the energy "crisis." Abourezk declared that the farmer, who has often been asked to turn the other cheek, "has turned all four cheeks in recent years." On energy, Abourezk noted that rural people in particular should be aware that in the past five years the top 20 oil companies have gained control over nearly 40 percent of the nation's own coal deposits.

NEW ENERGY DIRECTIONS

Barry Commoner, author of *The Closing Circle and The Poverty of Power*, also dealt with rural energy problems. Over the past few years Commoner's Center for the Biology of Natural Systems has done valuable research on organic farming and energy.

Commoner told the conference that, while industry has replaced human labor with energy-intensive machinery, agriculture is in the more precarious position of having used machines and chemicals to replace such natural and renewable energy and fertilizer sources as wind, wood, manure, grass and feed. He urged that the nation, and farmers especially, turn to solar energy and other appropriate technologies as alternatives to President Carter's energy blueprint.

Some of the new energy directions that Commoner advocated are being put into practice by the Small Farm Energy Project, a research and demonstration program in Cedar County, Nebraska. Dennis Demmell of the project's staff told a conference workshop that 25 small farmers in Cedar County are adopting a variety of practices to increase their energy self-sufficiency, including better insulation, wind pumps and generators, solar heating and grain drying, methane production from manure, composting of manure for fertilizer and the making of alcohol fuel from plants. The aim is to show that agriculture need not be so energy-intensive.

Housing is another issue of concern to rural people. Clay Cochran, executive director of Rural America, told the housing portion of the conference that the public goal should be "that every living soul in this country has a relatively wind-and-water-tight shelter with electricity, running water and a place to run the waste . . . where it won't pollute your water supply."

Cochran went on to say that the people living in such housing should "have to pay no more for debt, interest, insurance, taxes, maintenance, heat, water, and electricity than 25 percent of their income if they are low or moderate income people."

Outlining a policy, Cochran added, is easy; getting it implemented is not.

INADEQUATE PROGRAMS

The Farmers Home Administration, which now has $8 billion a year to loan to rural people and communities, should be meeting much of the need. But at the rate the FHA is presently replacing bad rural housing in Kentucky, it will take 51 years to finish the job. In McDowell County, West Virginia, it will take 359 years and in Mingo County, West Virginia, 738 years.

Some government programs, like Farmers Home, fail even when specifically designed to help rural people. The Rural Development Act of 1972 has not even been given the chance to succeed or fall due to inadequate funding.

Other federal programs are designed to discriminate openly against the needs of the countryside. The Carter administration's $4 billion public works program, for instance, effectively redlines all towns with populations of less that 50,000. No public jobs for them.

The argument is, that the cities' jobless rate are worse. But when discouraged jobseekers and the underemployed are figured in, it's clear that rural unemployment is much higher than the figures of the Bureau of Labor Statistics would indicate. One estimate of "subemployment" in rural Mississippi is 42 percent.

For most of the 20th century, people have left rural areas for urban ones. It was argued by many that rural problems would go away as an increasingly industrialized society provided jobs and a better, more "civilized" life in metropolis. Rural to urban migration, however, did not always make matters better for those who sought the city lights. Not everyone found a decent job—or even a job at all. The rural exodus thus helped create today's "urban crisis."

But the immediacy of urban problems has tended to confer a second-class citizenship on rural Americans, especially the poor. They are, as the Presidential Advisory Commission on Rural Poverty said in 1967, "the people left behind."

RETURNING TO THE COUNTRY

Recently though, flight to the cities has been turned on its head. Demographers at the Department of Agriculture have shown that during the 1970s rural areas have been gaining population faster than urban places.

This provides new human and fiscal resources for rural communities, but also puts stress on local services, already tight job markets, disappearing agricultural land and other problem areas.

The rural conference reflected both hopes and fears. Roger Blobaum, chairperson of Rural America, said, "Throughout the country, there is evidence that the problems of rural people are being treated with unaccustomed respect and interest . . . And yet, while the signs of a reawakening fill us with hope, much work needs to be done."

There was some tension at this gathering of people committed to so many different causes. Some farmers and environmentalists felt that others wanted to bring too much industry (and thus jobs) to rural areas. Some of the conflicts were reflected in the debate on resolutions and revisions to the Rural America platform.

Dealing with a very current rural movement, the conference also passed a resolution supporting, in general terms, the concept of a farmers' strike.

Yet despite some internal tuggings and pullings, there appeared to be a spirit of consensus, of closed or closing ranks in the face of adversity. But, for a change, it was an adversity tempered by hope. Sen. Abourezk may have summed it up when he said, "Like Woody Guthries, we are secure in the knowledge that this land is our land—and we intend to keep it. But, like Langston Hughes, we will no longer tolerate a concept of a dream deferred."

Jimmy Carter, rural American, was asked to address the conference, but had to cancel at the last minute. Too bad, he might have picked up a few things. Rural activists hope, now that Carter has made that migration to the city, that he will not turn his back on the problem at his roots. One thing is certain: Carter is no dummy. Before leaving the farm, he made sure he had a job waiting.

[From the Toledo (Ohio) Blade, Dec. 7, 1977]

U.S. ASKED TO SLOW FARMLAND TAKE-OVER

WASHINGTON.—More government leverage should be used to slow down the take-over of valuable farmland by urban development, highways, recreational facilities, and other nonagricultural projects, Rural America says.

The organization, which describes itself as a nonprofit group "formed to promote the economic and social welfare" of people in small towns and rural areas, is meeting here this week.

"The most formidable obstacle to the rational use of our land is that we have come to rely on what we call the 'market' to determine the uses and abuses of it," one of its reports says.

In other words, if the encroachment of a city or industry happens to trigger soaring land prices in a community, farmers will respond to this market—and often because they cannot pay the higher taxes—by selling their land.

"The market is a miserable piece of machinery to use in protecting and determining the use of the resources basic to human existence," the report said.

BIGGEST THREAT SEEN TO "PRIME" LAND

Urban growth and other developments have caused the U.S. farmland inventory to shrink for many years. Agriculture Department experts say, however, that the biggest threat is to "prime" land—the most productive—and that it is primarily up to states and local governments to decide on which kind of policies they need to guard against the drain.

The report by Rural America includes these observations:

Two million acres of farmland "disappear" each year.

Between 1950 and 1973, the nation lost 6 per cent of its taxable farm acreage.

In the same period, New England lost half of all its farm acreage; New Jersey lost 45 per cent.

California cedes 375 acres of farmland to commercial development each day.

According to the Agriculture Department, there were about 1.08 billion acres in farms as of last Jan. 1, a decline of about 2.75 million acres in one year. Although significant, the lost farmland still represented a reduction from the total on Jan. 1, 1976, of about 0.25 per cent.

CITES LOSS OF SOIL FERTILITY

The Rural America report said that loss of soil fertility from erosion also is a major problem. In the past, it said, too much emphasis was placed by the U.S. Soil Conservation Service in helping farmers who voluntarily sought help while ignoring those with the most severe erosion problems.

Citing a study by the General Accounting Office, an investigative agency of Congress, the report said programs operated by the Agriculture Department to help pay farmers for carrying out conservation projects have not focused enough on long-range measures to protect the land.

"Some people believe that the voluntary nature of the programs should be changed and that USDA (price-support) loan and

target-price programs should have compliance with measures recommended by the Soil Conservation Service as a prerequisite for individual participation in those programs," the Rural America report said.

The group added that "other observers" believe state governments should take a more active role in controlling soil erosion and that "Iowa is currently the only state with a soil-erosion program comparable to the Federal Government's."

[From the (Calif.) San Gabriel Valley Tribune, Dec. 4, 1977]

FARMWORKERS' HOUSING NEEDS TO BE AIRED

WASHINGTON—The housing needs of migrant and seasonal farmworkers will be spotlighted at a three-day conference opening Monday at the Shoreham-Americana Hotel.

More than 500 people are expected to attend the Third National Rural Housing Conference, convened by the Housing Assistance Council (HAC), Rural America, and the National Rural Housing Coalition.

The special housing problems of farmworkers—many of whom are Hispanic Americans—will be discussed in a panel moderated by Humberto Fuentes, of the Idaho Migrant Council, in Boise. Panelists include Rudy Juarez, chairman of the board of Organized Migrants in Community Action, Homestead, Florida; Alex Morrisey, executive director of the New Jersey Farmworker Corporation, Vineland, New Jersey; and Frank Salazar, executive director of the Edcough Rural Housing Authority, Edcough, Texas.

Hispanic American panelists another sessions of the Conference include: Ernesto Arzola, executive director of the Tierra del Sol Housing Corporation, Las Cruces, New Mexico; John Lopez, project director for the National Council of La Raza, Phoenix, Arizona; Ronnie Lopez, chairman of the board of the Housing Assistance Council (HAC); John Maldonado, executive director of Colorado Housing, Inc., Denver; and Senator Miguel Hernandez Agosto of Puerto Rico.

Alex P. Mercure, assistant secretary of agricultuer for rural development and former vice president of the University of New Mexico, will speak to the conference at a Tuesday luncheon. Mercure is the former executive director of the New Mexico Home Education Livelihood Program, where he was instrumental in setting up a statewide nonprofit agency for training migrant farmworkers.

Opening speaker at the conference is Congressman John B. Breckinridge, chairman of the Congressional Rural Caucus. He will be followed by Professor Barry Commoner, noted environmentalist, who will discuss the energy needs of rural people. Representative Les Au Coin (D-Ore.), chief co-sponsor of the rural title of the 1977 Housing and Community Development Act, will be the keynote speaker. On Tuesday, Gordon Cavanaugh, administrator of the Farmers Home Administration and former executive diretcor of HAC, will speak.

The Conference is called to discuss alternative proposals for meeting the housing needs of the rural poor. It will examine the effectiveness of current housing initiatives in key federal agencies and Congress. It will take a hard look at the equity of existing programs and their delivery systems. Workshops on credit and subsidies, land acquisition, and community facilities, will explore new methods and techniques for overcoming roadblocks to developing successful rural housing programs.

For Hispanic Americans, the Conference has particular significance, acording to HAC Board Chairman Ronnie Lopez. Says Lopez:

"We know that for every substandard unit in a metropolitan area, there are two in rural areas. In the rural areas where Hispanic Americans live, we find that nearly half of their housing units are substandard—more than double what it is for white Americans in those areas."

The Housing Assistance Council is a national nonprofit corporation federally-funded to increase the availability of decent housing for rural low-income people The six-year old organization is governed by a 36-member board of directors representing public and nonprofit housing agencies, public interest organizations, unions and minorities at the local, state and national level.

[From the Mitchell (S. Dak.) Republic, Dec. 13, 1977]

WE MUST FIGHT "BIG OIL"

(By Judy Burke)

WASHINGTON.—Sen. James Abourezk of South Dakota told delegates to a conference on rural problems this week that they must fight the power of big oil companies.

The Democratic senator said rural America can't survive, if oil companies are allowed to keep increasing petroleum prices and buying up alternate sources of fuel.

Higher fuel costs that hit the farmer hardest are inevitable, unless people in rural America do something to cut back the mushrooming monopoly of oil companies, Abourezk told the Third Annual National Conference of Rural America

"So let me lay it on the line," Abourezk said, "rural America ought to have the biggest stake in constraining the power of the big oil companies . . . companies whose sole motivation for acting in this manner at the present time is their unmitigated greed . . . Their only concern is to maximize their profits, and they will use any means available to them, legal or illegal, to achieve their objective."

Abourezk has been denouncing the oil industry most of his five-year career in the Senate. Sen. Howard Metzenbaum of Ohio and he spent almost two weeks in the Senate this fall holding up a vote that removed federal price controls on natural gas, most of which is owned by major oil companies.

The fight of federal price controls is continuing during the lengthy conference sessions between the Senate, which voted to deregulate, and the House, which did not.

Abourezk told the rural representatives that the conference committee is producing a "case study in utter chaos and confusion."

Congress should be rebelling against "Big Oil" and turning to renewable fuel sources such as the sun and the wind, as well as reducing fuel consumption by setting "honest" mileage standards on cars and rebuilding the country's railroads, Abourezk said.

He told the Rural Conference, "We must prevail over the James Schlesingers (Secretary of Energy) of this society. That is, if we want to leave our children a legacy of sanity and safety in the search for new energy sources."

Abourezk also criticized the Department of Agriculture, the Housing and Urban Development Department and Congress in general for neglecting the housing, medical and financial needs of people in rural areas.

The government should stop the growth of agricultural conglomerates by making it easier for small farmers to get capital and a fair return on their produce, he said.

The senator said the government should let American farmers export goods to whatever countries want to buy, including Cuba, "which used to be the seventh largest importer of U.S. agricultural products."

He said the best solution to the inefficiency and indifference of the Agriculture Department to rural people might be to set up a new department for rural affairs, a step he said would improve services "at less cost to the taxpayer."

[From the Astoria (Ore.) Astorian, Dec. 14, 1977]

AUCOIN CALLS FOR RURAL STRATEGY

WASHINGTON.—There isn't an "urban crisis" in America, there is a "human community crisis" that plagues urban and rural areas alike, Congressman Les AuCoin said in the keynote address to the National Rural Housing Conference here.

"No urban strategy will work," AuCoin, D-Ore., told a crowd of 700 conference delegates, "unless it also proposes concrete steps to improve the living environment of rural America."

Recalling a recent mobile office tour he took through his congressional district that included a town meeting in Warrenton, AuCoin said he saw the extent of rural blight first-hand, adding:

"It's not right that the government wastes millions of dollars on military cost overruns while a bucket on the front porch passes for sanitary facilities in some remote parts of my congressional district.

"It's wrong that there are two substandard housing units in rural areas for every one in a metrotropolitan area.

"It's wrong that in America today there are migrant farmworker families who actually live in the abandoned hulks of automobiles."

AuCoin, a member of the Housing Subcommittee, praised the recently passed Housing and Community Development Act which contained an entire section that modernizes and strengthens Farmers Home Administration housing programs. "It's the first time," he said, "a major housing bill spoke to both urban and rural needs."

But the congressman said more action is needed as he declared the nation is at a crossroads in devising new housing strategies and proposed a "Rural Housing Agenda."

He called for:

A program to broaden home ownership opportunities for low-income rural families;

Investigation into problems contributing to rapidly escalating housing costs, a problem of troubling proportions in urban and rural areas;

Establishment of a rural development agency that draws together "rural and housing and community development programs into an orderly, coherent single unit;"

A balanced growth policy that recognizes the importance of diversifying and strengthening rural economies; and

—Improved terms and availability of Farmers Home sewer and water grant programs.

AuCoin indicated he plans to re-introduce the Rural Housing Act of 1977 next year, as well as examine rural housing issues as chairman of the Task Force on Home Ownership charged with making recommendations on how to curb skyrocketing housing costs.

[From the Sidney (Nebr.) Telegraph, Dec. 14, 1977]

BERGLAND PROPOSES NEW RURAL STRATEGY

WASHINGTON.—Secretary of Agriculture Bob Bergland told delegates to the Conference on Rural America in Washington last week that despite recent population growth in rural areas, "rural people still have the highest percentage levels of poverty, the poorest housing, the most inadequate medical care, and the least access to public transportation."

He said the U.S. Department of Agriculture (USDA) and the Administration were determined "to develop a new national strategy for meeting these problems through a comprehensive and coordinated rural development program."

The secretary said that elements of this program were:

Reorganization of USDA's Rural Development Service so that it works more closely with programs of the Farmers Homes Administration (FmHA), which has budgeted programs for rural development.

A 20 percent increase in fiscal program budget for the Farmers Home Administration—to $8.2 billion.

Redirection of FmHA-insured lending of families of low and moderate incomes.

An FmHA rent supplement program that will provide subsidies for 20,000 rental units with renters paying 25 percent of their income as rent with the government making up the difference.

Bergland said that, "Despite the fact that the FmHA budget is up 25 percent over 1961, we have never as a nation had a real rural America policy or strategy since the enactment of the Homestead Act more than 100 years ago.

"We have had some earnest and sincere attempts to understand rural America's problems. But it has been a piecemeal effort—with no unified and comprehensive national policy or even a complete understanding of the magnitude of the problem.

"We intend to use our administrative authorities to the fullest in developing such a strategy."

[From the Economic Opportunity Report, Dec. 12, 1977]

RURAL HEALTH NEEDS NEGLECTED, CHARGES SEN. LEAHY

"The Federal government's policy toward rural health is a policy of neglect," said Sen. Patrick Leahy, D-Vt., chief sponsor of rural health clinics legislation, at last week's national rural health conferences in Washington.

The bias in favor of urban America comes not out of malice, Leahy said, but out of ignorance of rural America. He reeled off statistics to show just how neglected rural America's health needs are. Sixty percent of all medically underserved people, 83 percent of the critical health manpower shortage areas, one-half of the nation's poor, and a disproportionate share of the elderly are located in rural places, he said. Also, most Native Americans and migrant farmworkers are rural residents, and the most hazardous jobs—lumbering, mining and farming—are performed by rural workers.

Metropolitan America, on the other hand, has benefited from Congress' attention to the nation's health needs, said Leahy. Urban areas receive over 88 percent of maternal and child health care funds and 75 percent of Community Health Center grants. Urban areas also get 75 percent of all Medicare funds, although 31 percent of the elderly population live in rural areas.

Also, Leahy said, grants from the Rural Health Initiative (RHI) program are about one-fifth the size of grants awarded by the generally urban-oriented Community Health Service Program. RHI grants, along with Health Underserved Rural Area grants, are the main sources of funds for rural projects. Together, these two programs will spend only $45 million in FY 1978 for rural health projects.

Leahy said the best thing for rural America would be a nationally financed system of health care, but only if it does not perpetuate present inequities. He warned that improved health for rural people will not automatically result from national health insurance. The administration's cost containment bill will not work in rural America, according to Leahy, "because merely cutting back programs and services is impossible. We don't even have adequate services now."

REGULATORY PROCEDURES REFORM ACT—LEGISLATION TO END REGULATORY DELAY

Mr. MATHIAS. Mr. President, today I am pleased to join several of my colleagues in sponsoring the Regulatory Procedures Reform Act, a bill to remedy the serious delay that Americans now encounter when they go before the agencies.

Our Committee on Governmental Affairs has been pursuing this subject for some time. In July of 1977, the committee issued its detailed Study of Delay in the Regulatory Process as part of its comprehensive review of Federal regulation. This particular study concluded that delay was a fundamental problem in the regulatory process.

The bill we are introducing today seeks to implement the recommendations made in that study in order to end this unnecessary and costly regulatory delay.

Senator RIBICOFF, the chairman of the Governmental Affairs Committee and principal author and architect of this measure, has noted that the study found that the regulatory process takes far too long to accomplish far too little. There is tremendous inefficiency. In many instances the process seems without aim or purpose, unassisted by plan or priority. This process all too frequently leads to unnecessary delay which imposes significant costs on government, consumers and industry alike.

This bill addresses that issue directly and forcefully, while remaining sensitive to the need for fairness and due process. It is an innovative approach that I think offers the Senate an opportunity to be creative in a vital area of national concern.

This bill reflects the committee's initial thinking and research on the subject of regulatory delay. There is no doubt in my mind that many agencies, with vast experience in their areas, will provide us with added insight into ways of perfecting this measure. I join the chairman in hoping that they will be prompt in examining this bill and sending their comments and suggestions. The need for reform in this area is critical. Their cooperation is essential. Our responsibility is clear. If we all pull together on this issue, the benefits to society as a whole will be incalculable.

I look forward to the hearings on this vital piece of legislation with anticipation. The bill demonstrates the Senate's good faith to the American people and to various segments of the economy which need their confidence bolstered now more than ever. We are dead serious about addressing this national problem and determined to do something about it.

SUPPORTING THE FARMER

Mr. TALMADGE. Mr. President, the Georgia Senate, now in session in Atlanta, has adopted two resolutions which, for myself and my colleague, Senator NUNN, I bring to the attention of the Senate, and ask unanimous consent that they be printed in the RECORD.

There being no objection, the resolutions were ordered to be printed in the RECORD, as follows:

RESOLUTION

Whereas, the backbone of our free enterprise system and our American way of life is and always has been the untiring contributions of our farmers and since the founding of this great nation the farmer has been the major source of stability and strength of America; and

Whereas, the American farmer has led the world in agricultural innovation and in solving chronic food shortages which have plagued the developed and undeveloped world alike; and

Whereas, agribusiness is the largest economic activity in Georgia and the citizens of the State of Georgia are deeply and forever indebted to Georgia farmers for their contributions to the overall standard of living and way of life Georgians enjoy and take pride in; and

Whereas, while the standard of living for many segments of our nation's economy has steadily increased, the farmer has been receiving a steadily decreasing share of the national income and this has led to an overall weakening of the agribusiness morale and if this adverse trend plaguing our farmers is not reversed, it most definitely will lead to a national economic crisis and will undermine our national strength in every area; and

Whereas, after suffering through escalating production costs, declining market prices, and extremely harsh weather conditions which literally destroyed whole crops, the farmers, out of virtual desperation, have joined together throughout this great State and nation under the banner of the American Agricultural Movement to peacefully, but dramatically, focus national attention on the economic woes of the agribusiness community; and

Whereas, although the Georgia Senate realizes the Congressional Delegation of the State of Georgia understands the plight of Georgia's farmers, there are those in the Congress of the United States who don't even have a single farmer in their district.

Now, therefore, be it resolved by the Georgia Senate that this body does hereby strongly support the farmer and hereby urge the United States Congress to take whatever steps are necessary and appropriate to assure economic parity for the farmer.

Be it further resolved that all members of the Georgia Senate are individually and collectively in support of the farmer and intend to do all in their power and authority to help the farmer resolve his economic dilemma and regain his long established leadership role in virtually every facet of American life.

Be it further resolved that the Secretary of the Senate is hereby authorized and directed to transmit appropriate copies of this Resolution to each member of the Georgia Congressional Delegation.

RESOLUTION

Whereas, the fundamental role that farmers have in our society was effectively summarized by Daniel Webster when he said: "Let us never forget that the cultivation of the earth is the most important labor of man"; and

Whereas, the honesty, individualism, dedication and independence that has always characterized the American farmer provide examples of qualities most valued by our citizens; and

Whereas, in recent weeks Georgia farmers have rendered a very valuable service in bringing to the attention of our citizens the serious problems facing the farmers of our country; and

Whereas, it is essential that the economy and governmental policy provide an environment where "the most important labor of man" is properly recognized and rewarded, and Georgia farmers have made an important contribution in sending this message to the American people.

Now, therefore, be it resolved by the Senate that the farmers of Georgia are hereby commended for providing the most valuable of all services and for bringing the plight of the farmer to the attention of the American people in a most effective and responsible manner.

Be it further resolved that the Secretary of the Senate is hereby authorized and directed to transmit an appropriate copy of this Resolution to Honorable Jimmy Carter, President of the United States, and to each member of the Georgia delegation to the United States Congress and to Honorable Tommy Kersey of Unadilla, Georgia, who has been an effective spokesman for the Georgia farmer.

THE DEPARTMENT OF AGRICULTURE'S RECOMMENDATIONS FOR WILDERNESS IN SOUTHEAST ALASKA

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD a statement by the Senator from Alaska (Mr. GRAVEL).

The PRESIDING OFFICER. Without objection, it is so ordered.

STATEMENT BY SENATOR GRAVEL

Secretary of Agriculture Bergland in a letter to Congressman John Seiberling dated February 1, 1978, announced the Administration's recomendations for wilderness designations within the two national forests in Alaska. In one stroke, these recommendations have largely wiped out over one and one-half years of planning effort.

Two years ago I became deeply involved in the growing controversy over wilderness, primarily on the Tongass National Forest in Southeast Alaska. The Forest Service had obviously neglected formal study of potential wilderness areas in Southeast Alaska up to that time, and several potential wilderness areas were being considered for timber harvest activities. While conservationists were pressing for designated wilderness or wilderness study areas, timber interests were equally concerned with clarifying which areas would be open for continued harvesting without constant threat of lengthy legal battles.

Thus, simulated from several sides, the Forest Service embarked on a comprehensive planning process in September of 1976 designed to seek public input, to gather resource information, and to make specific land use recommendations, including wilderness proposals, for the Tongass Forest. The first phase of this process was completed in April 1977 with the publication of the Southeast Area Guide. This Guide identified and resolved some of the major issues involving the Forest and established a process by which other issues could be resolved. A second major action was taken last summer when over two dozen public meetings were held, and over 1200 individual responses were solicited. Final resource and socio-economic studies are just now in the process of being completed and analyzed. A draft environmental statement describing the final recomendations of the Forest Service is scheduled for completion and release this June followed by a final statement in December.

By the Department's own admission its recent wilderness recommendations have been released far in advance of the orderly completion of its planning process. In the letter Mr. Bergland states "As this planning proceeds, we will make the information available to the Congress and may further perfect our recommendations. Our objective is to recommend the strongest wilderness package possible in Southeast Alaska coordinated with other needs and uses." I contend that this is obviously a political decision rather than a resource-based judgement, and has aready put the knife to any rational conclusion of the planning process. The Secretary has already prejudged the "other needs and uses" for which the information is still coming in.

Not only do I object to this type of decision-making approach, but I take strong exception to the recommendations themselves. Using the Department's own figures, which are open to much question, the Department's wilderness proposals would result in removal of 215–250 million board feet of timber from the annual potential yield of the Tongass Forest. If these recommendations were adopted, between 464–498 million board feet of timber would be economically available to the timber industry. In comparison, the Department places the average annual harvest for the years 1972–1976 at 510 million board feet (industry figures are somewhat higher). Thus, these recommendations would seriously jeopardize jobs and the entire economic fabric of Southeast Alaska.

The Department's answer to this apparent short-fall in available timber is that the industry must cut more of the so-called "special" or "marginal" components of timber. Yet, by definition, these are timber areas which, due to high environmental risk, low timber volumes, or other special requirements or conditions involved, are not economical to harvest under today's available technology for the region or which should probably not be harvested because of environmental concerns. The gulf between the industry and the Department in this respect is great: The Department says up to 60% of the special and marginal components should be harvested while the industry claims that the current level of 10% utilization of these components realistically represents the level for the foreseeable future.

This is tragic situation. All of the time, man-power, and money which have at long last gone into the Tongass planning process have now, in effect, been cast to the wind. Obviously wilderness should be recognized as a valuable part of the total land use pattern in Southeast Alaska, but we can not be expected to support this type of hasty decision-making, nor can we support any proposals which would so blatently threaten one of the chief economic components of life in Southeastern.

LIBRARY OF CONGRESS STUDY CRITICIZES DISC AND DEFERRAL TAX LOOPHOLES

Mr. KENNEDY. Mr. President, on Friday, February 3, the Library of Congress released a study criticizing the DISC and deferral tax loopholes and the disruption in the United States and world economy caused by these measures.

According to the study, repeal of DISC and deferral would reduce the tax-induced distortions affecting international investments decisions, and "increase the overall economic efficiency of investment allocation, resulting in somewhat higher levels of economic growth, real income and productivity."

As Members of the Senate and House of Representatives are aware, the Carter administration's 1978 tax reform proposals, now pending in Congress, call for the repeal of both DISC and deferral. The new Library of Congress study provides strong support for action by Congress to carry out the President's recommendations and eliminate two of the most unjustifiable tax abuses in the Internal Revenue Code.

Under current law, DISC enables exporters to avoid up to half the U.S. tax otherwise due on export income, if they set up so-called Domestic International Sales Corporations. Deferral allows U.S. multinational corporations to escape U.S. tax on overseas earnings of foreign subsidiaries until the earnings actually flow back to the U.S. parent. DISC costs the Treasury $1.2 billion a year, and deferral costs $410 million a year.

The Library of Congress study emphasizes the distorting effects of DISC and deferral on investment decisions. Because of interactions with other provisions of the tax laws (principally the foreign tax credit, which allows foreign tax payments to be subtracted from U.S. taxes due), the effect of deferral is to encourage excessive U.S. investment in low-tax foreign countries, at the expense of domestic U.S. investment. It also discourages U.S. investment in most of our major trading partners, such as Britain, France, West Germany, and Japan, where tax rates are higher than the U.S. rate, and where deferral, therefore, confers no advantage on investment.

A table in the Library of Congress study lists 37 nations with tax rates below the 48-percent U.S. corporate rate, where deferral therefore operates to encourage investment. One of the most serious distortions caused by deferral is its incentive for runaway plants, in which U.S. firms move abroad to produce for the U.S. market with cheap foreign labor.

The effect of DISC is to encourage excessive investment in U.S. export industries. As a result, in the current international system of floating exchange rates, DISC puts upward pressure on the dollar, thereby encouraging U.S. imports, and impairing domestic U.S. industries that must compete with such imports.

Both of these loopholes have undesirable consequences on U.S. jobs. The effect of deferral is to export U.S. jobs by encouraging American firms to build plants overseas. And the increase in job stimulated by DISC in export industries is offset by the DISC-induced loss of jobs in U.S. industries competing with imports. Because import-competing U.S. industries tend to be labor intensive, DISC actually has a negative impact on U.S. jobs, since the gain in jobs in capital-intensive export industries is more than offset by the loss of jobs in labor-intensive industries that must compete with imports.

With regard to DISC and the balance of payments, the Library of Congress study emphasizes that with the adoption of flexible exchange rates, a permanent effect on the balance of payments cannot be expected. Provisions such as DISC may cause the balance in international accounts to be established at a higher level

of exports and imports. The study notes, however, that this effect does not actually change the balance of payments. It does, however, increase the size of U.S. export industries such as agriculture, transportation and equipment and machinery, while reducing the size of import-competing industries such as textiles, shoes, and electronics.

The study also rejects the argument that DISC and deferral are necessary to offset comparable tax practices of other countries. With regard to deferral, U.S. firms operating abroad do not compare their rates of return with those of other industries, but rather with alternative investments in the United States.

With regard to DISC, the study makes the point that export subsidies of foreign countries, given the present exchange rate system, are actually more likely to harm import-competing industries in those nations, while having little or no impact on U.S. exporters. Thus, DISC benefits U.S. exporters, even though they may not be harmed by foreign export subsidies, but it damages import-competing U.S. industries by increasing imports.

Mr. President, I believe that the Library of Congress study will be of interest to all of us as we consider these two tax loopholes and the President's recommendations, and I ask unanimous consent that the study be printed in the RECORD.

There being no objection, the study was ordered to be printed in the RECORD, as follows:

DEFERRAL AND DISC: TWO TARGETS OF TAX REFORM

(By Jane G Gravelle and Donald W Kiefer, Specialist in Taxation and Fiscal Policy, Economics Division Congressional Research Service, Library of Congress, Febrary 3, 1978)

TABLE OF CONTENTS

Summary.
I. Introduction.

C. Effects on the Competitiveness of American Industry.
VI. The Effects of Repealing Deferral and DISC

SUMMARY

The tax cut and reform proposals announced by the Carter Administration in January 1978 include termination of the deferral of U.S. taxation of the income of foreign subsidiaries and repeal of the Domestic International Sales Corporation (DISC) provision. Deferral refers to the fact that, in general, the United States does not tax the income of a foreign subsidiary of a domestic corporation until (and unless) the income is paid as a dividend to the U.S. parent corporation. DISC allows U.S. exporters to set up special domestic corporations through which to channel their export sales and which receive tax deferral benefits on a portion of their income.

The direct economic effect of deferral is to reduce the worldwide effective tax rate on foreign source income of subsidiaries of U.S. corporations located in foreign countries in which the total effective tax rate on earnings by U.S. subsidiaries is less than the statutory U.S. tax rate (presently 48 percent). Foreign countries with effective tax rates lower than the U.S. rate tend to be underdeveloped nations which use the low tax rates to stimulate economic development. The direct economic effect of the LISC provision is to reduce the effective tax rate on U.S. export income.

The most important economic effects of deferral and DISC are their investment incentive effects which influence the international allocation of American capital resources. The investment incentive effects of these two provisions cannot be examined in isolation; they must be studied within the context of the overall U.S. tax treatment of foreign source income. The entire U.S. tax structure affecting foreign source income, including deferral and DISC, results in a complex pattern of counteracting influences or international investment decisions. These influences weigh differently on each investment opportnuity depending on the foreign country and type of investment involved; however, in general, the U.S. tax structure, including deferral and DISC, provides advantages for labor intensive investments in low-tax foreign countries and it provides disincentives to capital intensive investment in high-tax foreign conutries.

Under a system of flexible exchange rates, which has existed since 1973, a permanent effect on the balance of payments cannot be expected from policies such as DISC or terminating deferral. This is because a flexible exchange rate system will automatically move, through market adjustments in exchange rates, toward a position of balance in the international payments accounts of each country. Thus, in the long run any policy which attempts to permanently improve a nation's balance of payments will be rendered ineffectual by market forces.

To the extent that short term intervention in the exchange market is desired to moderate exchange rate fluctuations or ease adjustments in international markets, DISC and deferral are inappropriate because of their permanent nature, their slow action, the inability to control them on a day to day basis and inability to coordinate them with policies of other countries. The appropriate short term policy tool for this purpose is buying and selling of foreign exchange.

Under a system of flexible exchange rates, DISC and the repeal of deferral cannot be expected to have more than a brief impact on the aggregate level of employment in the United States. However, because the policies may lead to a higher overall level of foreign trade, they may create jobs in the export industries, such as agriculture, transportation equipment, and machinery, and accelerate the decline of import competing industries, such as textiles, shoes, and electronics, leading to less employment in those sectors.

It is argued that the repeal of deferral would lead to a reduction of U.S. business activities in low-tax foreign countries—interpreted as reduced "competitiveness" by the multinational corporations—however, the implications of this observation for tax policy deserve careful consideration. Elimination of deferral would remove the special U.S. tax treatment of investments in low-tax countries and, therefore, would be expected to diminish such investment. However, the standard of tax policy with regard to business opportunities is to treat alternative investments uniformly so the tax structure does not cause distortions in the relative attractiveness of investments unless a clear national purpose is served by such nonneutralities. U.S. multinational corporations make investment decisions, not with reference to what other firms of different nationalities are earning on any given investment, but rather with reference to the rate of return on alternative investments available to U.S. corporations, including investments in the U.S. domestic economy and U.S. export activities. However, the deferral policies of other countries do have an indirect effect on the investment allocation of U.S. multinationals, and there is no unilateral U.S. policy response which will perfectly neutralize this indirect effect of the foreign tax preferences. If the U.S. does not allow deferral, the foreign country deferral policies will disadvantage U.S. multinationals with regard to their "competitiveness" in low-tax foreign countries. On the other hand, if the U.S. retains deferral of the taxation of foreign income, this policy leads to a disproportionate investment of U.S. capital in low-tax foreign countries.

The situation with regard to DISC as a response to foreign export subsidies is very similar; there is no unilateral policy option available to the United States which will perfectly neutralize the effects of a foreign export subsidy. Adoption of a competing export subsidy, such as DISC, benefits exporters and further harms import competing industries. Conversely, U.S. adoption of a countervailing tariff to protect import competing industries from the subsidized foreign exports would damage U.S. exporters. A more direct response would be to negotiate the removal of all export subsidies; however, to date this approach has not been successful. One important consideration is that foreign export subsidies, while they may adversely affect some sectors of the U.S. economy, may be beneficial to the U.S. as a whole because they will typically result in a relatively larger real quantity of imports as compared with real exports.

The economic impact of a terminating deferral and DISC is not known with certainty. The direct result of the combined policy changes would be to increase the effective tax rates on investments by U.S. companies in export activities and in operations in low-tax foreign countries. The most important economic impact of this change would be the influence on the allocation of U.S. investment capital. Investment in the U.S. economy for domestic production would be expected to increase, as would investment in high-tax foreign countries. The effects of the combined policies on U.S. export investment and foreign investment in low-tax countries are offsetting, and the overall result is uncertain. In general terms, however, the repeal of deferral and DISC would reduce the tax induced distortions affecting international investment decisions (although not eliminate them) and thereby increase the overall economic efficiency of investment allocation, resulting in somewhat higher levels of economic growth, real income, and productivity.

I. INTRODUCTION

The continued effort to "reform" the Federal tax system has affected virtually every aspect of the Internal Revenue Code. Many of the subjects of tax reform have been highly complex and controversial, but probably none more so than the provisions affecting the taxation of foreign source income. Two such "foreign tax" topics—deferral and DISC—are again being targeted for possible "reform" in early 1978.

Deferral does not refer to a provision of the tax code but rather an omission; it refers to income which is not taxed, not because of a specific exemption but because it is not included in the definition of taxable income. Basically, deferral refers to the fact that foreign source income earned by a foreign subsidiary of a U.S. parent corporation is not

taxed (in most cases) by the United States until the income is remitted to the U.S. parent.[1] Deferral was first the target of a tax reform effort in the early 1960's. President Kennedy had proposed substantial elimination of deferral by taxing all foreign income currently regardless of repatriation. The Revenue Act of 1962 stopped short of this revision and instead created Subpart F of the tax code which currently taxes so-called "tax haven" income. Tax haven income, now termed "Subpart F Income," refers to income channeled through subsidiaries in low-tax-rate foreign countries to serve as pipelines or reservoirs for income generated in other foreign countries, and thereby reduce the worldwide tax on the income. Deferral has been discussed in virtually every tax reform debate in Congress during the past fifteen years, and in the Tax Reduction Act of 1975 amendments were enacted to further tighten the provisions of Subpart F.

The Domestic International Sales Corporation (DISC) provisions of the tax code were adopted in 1971. Basically, DISC allows a domestic corporation to establish an export subsidiary and enjoy partial tax deferral on the export income earned by the subsidiary. Several arguments were offered in support of DISC at the time of its inception, one of which was that it would serve as a domestic counterpart to deferral, so exporters would not have to establish foreign subsidiaries to enjoy deferral of U.S. taxation on export earnings. DISC has been the subject of controversy almost since its enactment. The debate peaked in 1975–76 during the drafting of the Tax Reform Act of 1976; an effort was made to repeal DISC but instead the Act reduced DISC benefits and made the provision incremental.

Deferral and DISC are both again the subject of renewed tax reform interest. When the Carter Administration was preparing major tax reform proposals for announcement in the fall of 1977, the repeal of deferral and DISC were among the reform options. The "Tax Reform Option Papers" prepared by the Treasury for the White House and "leaked" to the press on September 2, 1977, discussed repeal of deferral and DISC as possible options.[2] Subsequently, the major tax reform effort by the Administration was postponed, and replaced in January 1978 by a tax cut proposal, coupled with selected "minor" tax reforms. The repeal of deferral and DISC are among the reforms proposed by the Administration, and will thus be the subject of extensive congressional debate.

In anticipation of this debate this report provides background information on deferral and DISC. Section II provides a general description of the provisions, section III discusses their direct economic effects, section IV analyzes their impact on capital investment, section V examines their effects on the balance of payments, employment, and the competitiveness of American industry, and section VI looks at the effects of repealing deferral and DISC. The approach is to provide specific information focused on these two provisions rather than a detailed theoretical and applied analysis of the general subject of the taxation of foreign income.

II. A DESCRIPTION OF DEFERRAL AND DISC

A. Deferral

In general terms, if a company wishes to operate abroad directly, as opposed to portfolio investment or a licensing or export sales arrangement, it will operate through a foreign branch of subsidiary. The distinguishing characteristic of a branch operation, as opposed to a subsidiary, is that a branch is not a separate legal entity from the "parent" corporation. A branch is merely an outgrowth of the parent which is separated by geography or purpose (however, the branch may require separate accounting, decision making, etc.). Thus, the income of a branch is also income of the parent. Because the United States corporate income tax is imposed on the worldwide income of U.S. corporations, the tax applies to all branch income, foreign and domestic.

However, special rules apply to the taxation of foreign income to avoid double national-level taxation of foreign earnings. The U.S. income tax provides a foreign tax credit for income or profits taxes paid to foreign governments on foreign source earnings. The rules governing the application and computation of the foreign tax credit are complex. Basically, however, the foreign tax credit claimed by a domestic corporation for any year may not exceed the tax which would be imposed on the foreign source income of the corporation by the U.S. income tax. For purposes of computing this limitation on the foreign tax credit, the aggregate foreign operations of a U.S. taxpayer are treated as one overall business operation (except that the limitation must be computed separately for interest income not directly related to the conduct of a trade or business, DISC income, and certain oil and gas related income). Excess foreign tax credits may be carried back by the taxpayer for two years and then forward for five years to offset taxes in a year in which a residual U.S. tax liability on foreign source income may be due.

For a variety of reasons a U.S. corporation may wish to operate in a foreign country through a subsidiary rather than a branch. The foreign host country may require local incorporation for certain types of operations (for example, mineral extraction) or may require that a specified percentage of certain types of business operations be locally owned. Incorporation in the host country allows compliance with such requirements or bringing in partners with required skills in technology, finance, marketing, etc. Operating as a foreign subsidiary may also provide the parent corporation with certain U.S. tax benefits.

A subsidiary is a separate corporation from its parent and, therefore, income of the subsidiary is not necessarily regarded as income of the parent corporation (although it may be under Subpart F of the Internal Revenue Code). Thus, under normal circumstances, foreign subsidiary income is not taxable to the parent corporation unless and until the subsidiary pays a dividend to the parent corporation. This delay of U.S. taxability of earnings of foreign subsidiaries of U.S. corporations is popularly referred to as "deferral."[3]

When a foreign subsidiary pays a dividend to a U.S. parent, the U.S. taxation of the dividend income works differently (although the same principles are involved) than the taxation of foreign branch earnings, because the entire income of the subsidiary is not regarded as income of the parent. Only the dividend paid from the subsidiary to the parent, which is paid out of after-foreign-tax income of the subsidiary, and a pro rata share of the foreign tax is regarded as income of the parent. Thus, the dividend received by the parent must be "grossed up" to calculate the total amount of taxable earnings represented by the dividend and the amount of foreign taxes allowable as a credit against the U.S. tax liability. Because of this gross up procedure and the attribution of a proportionate share of foreign taxes paid to the dividend received by the parent, the foreign tax credit allowable against U.S. tax liability on dividends is frequently referred to as the "indirect" foreign tax credit or the "deemed-paid" foreign tax credit.[4]

The principles involved in computing the U.S. tax liability on a dividend received by a parent from a foreign subsidiary can be illustrated by an example. Assume a foreign subsidiary has earnings of $100, operates in a foreign country having an effective income tax rate[5] of 40 percent, and distributes all of its after tax earnings (i.e., $60) to its U.S. parent. The U.S. income tax on the dividend received by the parent would be computed as follows (assuming no foreign withholding tax):

Taxable income of foreign subsidiary			$100
Foreign income tax (40 percent)		$40	
Income available for distribution		$60	
Dividend received by U.S. parent	$60		
Grossup	40		
Taxable income to parent	100		
U.S. income tax (48 percent)	$48		
Foreign tax credit	40		
Net U.S. tax		8	
Total income taxes			48
Income after taxes			52

If the same subsidiary distributed only half of its after tax earnings to its U.S. parent, the computation would be as follows:

Taxable income of foreign subsidiary			$100
Foreign income tax (40 percent)		$40	
Income available for distribution		$60	
Divident received by U.S. parent	$30		
Grossup	20		
Taxable income to parent	50		
U.S. income tax (48 percent)	$24		
Foreign tax credit	20		
Net U.S. tax		4	
Total income taxes			44
Income after taxes			56

Thus, the proportion of total taxes paid by the subsidiary to the host foreign government which is included in the gross-up and is allowable as a credit against U.S. tax liability on the dividend received by the U.S. parent is equal to the proportion of total subsidiary earnings available for distribution which is actually paid through a dividend to the U.S. parent. The second illustration also reveals the benefit of deferral. When the subsidiary distributes only half of its after tax earnings, the total tax bill on the foreign source earnings is reduced because U.S. taxation of the undistributed portion of the subsidiary's earnings is "deferred." This

[1] The U.S. owners may be individuals, but the more typical case is a U.S. parent corporation with a wholly or partially owned foreign subsidiary.

[2] The Treasury memorandum recommended repeal of DISC but the retention of deferral.

[3] Deferral of a tax liability provides a benefit to the taxpayer even though the full tax amount may eventually be paid. For example, if the interest rate is 8 percent, a 5-year deferral of a $1,000 tax liability is equivalent to a reduction of the tax by $319.26, because $680.74 invested for 5 years at 8 percent will yield $1,000. Similarly, a 10-year deferral is equivalent to a tax reduction of $536.80.

[4] Some foreign countries impose a withholding tax on dividends paid by corporations, in addition to the regular corporate income tax. Such withholding taxes are also creditable against the U.S. income tax but are ignored in this description for simplicity. See pp. 48–49 for implications of withholding taxes for repeal of deferral.

[5] The term "effective income tax rate" refers to the amount of tax divided by the amount of taxable income (earnings and profits) according to the U.S. definition.

tax benefit (compared to U.S. taxation of branch earnings) occurs in cases in which the foreign tax rate is lower than the U.S. rate and the foreign subsidiary distributes less than 100 percent of after tax earnings. Effective foreign tax rates which are lower than the U.S. corporate tax rate appear primarily in the underdeveloped countries of Asia, Africa, and Latin America, where low taxes commonly are used as an inducement to capital development.

B. Domestic International Sales Corporation

The Domestic International Sales Corporation (DISC) provisions were added to U.S. tax law in 1971 to provide a partial deferral of U.S. taxation of income from exports. DISC was adopted partially as a stimulant to increased exports, partially as an offset to export subsidies in foreign countries, and partially as a way of reducing the relative advantage to U.S. exporters of operating abroad through foreign subsidiaries to reap the benefit of tax deferral on export income. The DISC provisions allow exporters to set up special domestic corporations through which to channel their export sales and which receive special treatment in the taxation of their income.

To qualify as a DISC a corporation must receive 95 percent of its gross receipts from exports and export-related activities, and also 95 percent of its assets must be export-related. Included in export-related assets are "producer's loans," which are loans of the DISC profits to a U.S. export producer, usually the DISC's parent corporation. The "producer's loan" enables the parent corporation to use the DISC profits in its operations without receiving the profits as a dividend and thereby incurring tax liability.

The taxable income allocable to the DISC (and therefore eligible for the tax benefit) may be calculated in whichever of three ways yields the highest DISC income. First, the DISC taxable income may be computed under the normal inter-company pricing rules and subject to the normal allocation regulations (under section 482 of the tax code). Second, the transfer prices may be set so DISC net income equals 4 percent of the DISC's export promotion expenses. Alternatively, DISC net income may equal 50 percent of the combined taxable income of the DISC and the parent corporation received from export sales through the DISC, plus 10 percent of the DISC's export promotion expenses.[6]

The special tax treatment accorded a DISC is the deferral of U.S. taxation of a portion of DISC income. In some ways a DISC is treated by U.S. tax law similarly to a foreign subsidiary. The DISC is not actually taxed, but the parent is taxed on a constructive divident of DISC income (similar to Subpart F treatment). Also a DISC shareholder is allowed to claim the foreign tax credit on a DISC divident (corporate shareholders may claim a deemed paid credit) and a DISC parent corporation is not allowed to claim the intercorporate divident deduction on DISC dividends.

Prior to the Tax Reform Act of 1976, the parent corporation of a DISC was taxed on a constructive divident of 50 percent of DISC net income. Thus, assuming the DISC used the 50 percent income allocation rule, the effect of DISC was to reduce the effective tax rate on export income by one-fourth, from 48 percent to 36 percent. The Tax Reform Act of 1976 changed the constructive dividend rules to reduce the amount of DISC income on which taxation is deferred beginning January 1, 1976.

A new constructive dividend is now taxed to DISC shareholders. The new constructive dividend is equal to a fraction of the DISC's net income; the fraction equals 67 percent of the DISC average export gross receipts for a 4-year base period divided by the DISC's current year export gross receipts. The 4-year base period initially is the years 1972–1975; beginning in 1980 the base period advances one year for each year beyond 1979 (i.e., in 1980 the 4-year base period will be 1973–1976). In addition to the new constructive dividend, 50 percent of the excess of the DISC's taxable income over the new constructive dividend will also be taxed as a constructive dividend.

The effect of these new provisions is to allow benefits, similar to prior DISC benefits, for only those DISC receipts which exceed 67 percent of the average receipts during the 4-year base period. The logic of the new provision, especially with the moving average base period, was that if DISC is an export promotion intended to stimulate increased exports, then DISC benefits should be available mostly for incremental export receipts rather than all exports.

Small DISC's with adjusted taxable income of $100,000 or less are exempt from the new constructive dividend provision, and thus continue to be taxed under the prior system. The exemption phases out between $100,000 and $150,000 of taxable income. Since 50.4 percent of DISC's have net income under $100,000 and another 14.3 percent have net income between $100,000 and $200,000, over half of the DISC's will be wholly or partially exempt from the new system; however, these DISC's receive less than 5 percent of the gross receipts and less than 4 percent of the net income of all DISC's.[7]

There are several other more minor constructive dividend items taxed to the shareholders of a DISC, among them the amount of gross interest received by the DISC on producers' loans and 50 percent of the taxable income of the DISC attributable to the sale of military property (the latter provision added by the Tax Reform Act of 1976). Additionally, DISC benefits are denied for the export of certain products on which a percentage depletion deduction is allowed, including oil, gas, coal, and uranium products (added by the Tax Reduction Act of 1975 and modified by the Tax Reform Act of 1976).

III. THE DIRECT ECONOMIC EFFECTS OF DEFERRAL AND DISC

A. Deferral

The direct effect of deferral is to reduce the worldwide effective tax rate on foreign source income of subsidiaries of U.S. corporations located in low tax rate foreign countries, that is, countries in which the total effective tax rate on earnings by U.S. subsidiaries is less than 48 percent (the statutory U.S. rate). The relationship between total effective tax rates, including domestic and foreign taxes, on foreign branch earnings and dividends from foreign subsidiaries, for various distribution rates and different foreign host country tax rates, is illustrated in Figure 1.[8] (Figure not printed in Record.) The top, solid line in the graph shows the total effective tax rate on foreign branch earnings and income from a foreign subsidiary which distributes all of its after foreign tax income. In either case there is no deferral of U.S. taxation of the foreign income. Thus, the total effective tax rate, U.S. and foreign is always 48 percent regardless of the foreign tax rate, unless the foreign rate is higher than 48 percent, in which case the foreign rate also becomes the total effective rate (because no U.S. tax would be imposed). For foreign subsidiaries which distribute less than 100 percent of their after tax income, however, the total effective tax rate may be less than 48 percent due to the deferral of U.S. tax liability.

For example, if a foreign subsidiary distributes 50 percent of its after tax foreign income to its U.S. parent, half of the U.S. tax on that income will be deferred. Thus, in the extreme case, if the foreign host country imposes no income tax on the subsidiary's income, the total effective tax rate will be merely the U.S. tax applied to the half of the subsidiaries' income which is repatriated, i.e., 24 percent (see graph). As the foreign host country's tax rate on the subsidiary's income increases from 0 to 48 percent, the total effective tax rate also increases, but only half as fast because of the U.S. foreign tax credit. Thus, if the foreign country imposes a 10 percent income tax, the total effective tax rate on the income will be 29 percent (24 percent plus 5 percent); if the foreign country imposes a 20 percent tax, the total effective rate will be 34 percent (24 percent plus 10 percent); etc. Similar reasoning lies behind each of the other lines in the graph representing different distribution levels.

As Figure 1 illustrates, substantial tax advantage (compared to the U.S. statutory rate) is available to foreign subsidiaries which operate in low tax rate countries and make low distributions.[9] Table 1 reports statutory and realized (effective) corporate tax rates, the withholding tax rate which applies to dividend payments to the United States, and the total realized tax rate on grossed-up dividends for more than 60 countries.[10] An important fact indicated by the table is that most of our major trading partners have total effective tax rates higher than the U.S. statutory rate. Thus, deferral is not an issue with regard to U.S. investments in these countries.

---

[6] Neither the 4 percent method nor the 50 percent method may be applied in such a way as to create a loss to the DISC's parent corporation while the DISC earns a net profit.

[7] Source: 1975 Annual Report of the Department of Treasury on the Operation and Effects of the Domestic International Sales Corporation Legislation, issued April 1977, Table 4–4. (Hereafter referred to as 1975 Treasury Annual Report on DISC.)

[8] The effective tax rates portrayed in the graph for subsidiaries assume that the deferral of U.S. taxation of the foreign income is effectively permanent. If the deferral is not permanent then the true effective tax rates would be higher than shown.

[9] This statement is true only for the subsidiary's earnings which are not "Subpart F income." See section VI A.

Table reproduced from, Hufbauer, Gary and David Foster, "U.S. Taxation of the Undistributed Income of Controlled Foreign Corporations" in Essays in International Taxation: 1976, The Department of the Treasury, Dec. 31, 1976. pp. 27-29.

Thirty-seven countries have total effective tax rates below the U.S. statutory rate of 48 percent. Twenty-seven of these countries are underdeveloped nations which presumably use the low tax rates to stimulate economic development.

B. Domestic International Sales Corporation

The direct effect of the DISC provision is to reduce the effective tax rate on export income. The amount of reduction depends on two factors: the allocation method used and, under the incremental provisions adopted in 1976, the past and current export performance of the DISC.

According to the Treasury Annual Report on DISC, the 50–50 allocation rule is estimated to be used by DISC's reporting 82 percent of total income on exports. The arms length method is associated with about 12 percent of export income and the remaining 6 percent of income is associated with the 4 percent method.[11]

Using the 50–50 method, the effective tax rate is reduced from 48 percent to 36 percent without consideration of the incremental rule (or alternatively the tax rate is reduced to 36 percent for that DISC income eligible for the provision). The other rules afford a lower rate which may be as low as 24 percent (when all income is allocated to the DISC).

The effect of the incremental DISC provision is to increase the effective overall tax rate on DISC exports. The total effect depends on the ratio of the 67 percent base period amount to the amount of current year exports. If eligible income is one half of total export income (i.e., current receipts are 134 percent of the base period receipts) the re-

[11] 1975 Treasury Annual Report on DISC, op. cit., Table 5–4.

duction, under the 50–50 pricing rule, is from 48 percent to 42 percent.

Initial revenue estimates indicate that the adoption of the incremental rate reduced DISC benefits by about one third, therefore reducing the effective tax rate under the 50–50 pricing rule to around 40 percent. Since the base remains fixed for a period of years, the effective tax rate will be lower over time.

The purpose of adoption of the incremental credit was to provide DISC benefits only for incremental exports, therefore increasing the so-called "bang for the buck" per dollar of DISC revenue loss. However, the Treasury Department notes that the use of a moving base means that the incentive to expand exports under DISC is reduced even if the producer looks only at the marginal export rather than the overall effective tax rate. Because an additional dollar of gross receipts today will enter into the export base period and reduce the DISC benefits sometime in the future, the present value of the future reduction in benefits (i.e., the future value discounted by an appropriate interest rate) must be subtracted from the current value of the DISC benefits. The Treasury has estimated that this effect reduces the benefits of DISC by about 40 percent, using a discount rate of 10 percent.[12]

IV. THE EFFECTS OF DEFERRAL AND DISC ON INVESTMENT

While the direct economic effects of deferral and DISC are clear, the effects of the tax provisions on the real economic variables of investment, GNP, trade, employment, etc. are not so clear, nor are the potential effects of eliminating the tax provisions. For example, it has been argued that deferral provides a tax incentive for U.S. corporations to invest abroad in low-tax-rate foreign countries rather than in the U.S. Of course, other things being equal, a lower effective tax rate on investments in certain countries would be expected to encourage investment in those countries. However, the situation is not quite that simple; other provisions of the tax system operate to diminish or alter the effect of deferral.

The investment tax credit (ITC) allows taxpayers to claim a credit against taxes due equal to 10 percent of the amount of investment in qualified property. Qualified property includes depreciable tangible personal property and certain limited kinds of depreciable real property with a useful life of at least seven years (property with a useful life of three to seven years qualifies for a partial credit). There is a limit on the amount of ITC which may be claimed each year but excess credits are allowed carryover treatment. Because the ITC was adopted largely as a stimulus to investment, capital formation, productivity, and economic growth in the United States, it is allowed only on domestic investment. The limited exceptions to this rule involve vehicles, aircraft, containers, cables, and satellites which provide transportation or communication to and from the United States, and property used in resource management or extraction in international waters in the northern portion of the Western Hemisphere.

First, of course, DISC provides a counteracting incentive to invest in the U.S. and export to foreign markets rather than locate abroad. As indicated earlier, DISC is available only to domestic exporters and was adopted, in part, to serve as an offset to the attractiveness of deferral. In addition, some of the most beneficial provisions of the U.S. tax code are available only with regard to domestic income; these provisions include the investment tax credit, the asset depreciation range, and the ability to file a consolidated tax return.

[12] 1975 Treasury Annual Report on DISC, op. cit., p. 16.

The asset depreciation range (ADR) is a system which allows taxpayers to choose the useful life of assets for purposes of depreciation from ranges specified by the Treasury for designated classes of assets. For each designated class of assets the Treasury specifies an "asset guideline life," and taxpayers are permitted to depreciate assets over a period ranging from 20 percent shorter than the guideline life to 20 percent longer than the guideline life without justification of the period chosen (use of a period outside the ADR may require justification based on historical records, industry practice, etc.).

The ADR system was adopted in 1971 for several reasons, including providing an additional incentive for investment (others were to reduce administrative problems associated with the determination of depreciation lives, to correlate tax treatment with actual practice, etc.). Use of the ADR system by a company provides a tax benefit compared to prior depreciation rules, because shorter depreciation lives yield accelerated deductions and thereby reduce tax liability. The ADR system (i.e., the 20 percent range from the asset guideline life) is not available for depreciating foreign property used outside the U.S.; however, taxpayers may use the asset guideline life in depreciating foreign property.

With certain exceptions,[13] domestic corporations which are members of an affiliated group are permitted to file a consolidated tax return. Through this device the members of the affiliated group are essentially treated as one taxpayer.[14] Thus, the losses of one domestic subsidiary may be offset against the income of another in computing taxable income. This enables the losses to be used to reduce current tax liability rather than carried over to reduce future taxes for the loss subsidiary. Foreign corporations are generally ineligible to join in a consolidated tax return; the only exception applies to wholly owned subsidiaries in Canada or Mexico organized solely for the purpose of complying with the laws of those countries. The overall limitation on the foreign tax credit operates similarly to allowing consolidation of all foreign operations of a taxpayer with regard to computation of the foreign tax credit but not with regard to losses. Foreign branch losses may be deducted in computing taxable income of the parent subject to the recapture provision of the Tax Reform Act of 1976. Thus, foreign losses are generally treated less favorably than domestic losses in the U.S. tax code.

A final important asymmetry in the tax treatment of domestic and foreign source income is the crediting of foreign sub-national income taxes against U.S. tax liability. U.S. States and local taxes paid by a domestic corporation may only be deducted in computing Federal taxable income. However, income taxes paid to foreign sub-national governments are accorded foreign tax credit treatment.

The picture presented by these counteracting tax influences on the international investment decisions of U.S. multinational corporations is summarized in Figure 2, which is, of course, somewhat oversimplified. Deferral increases the attractiveness of investment in low-tax foreign countries (i.e., it increases the after-tax rate of return on such investment) both relative to domestic investment and relative to foreign investment in high-tax countries. An additional factor weighing in favor of foreign investment is the creditability of foreign sub-national taxes. Opposing influences on the international investment decision result from DISC, the investment tax credit, the asset depreciation range, and tax return consolidation which are available only with regard to domestic income.

Of course, the situation is actually more complex than depicted in the diagram. For example, DISC is available only with regard to U.S. exports and thus is an incentive to produc in the U.S. only for the foreign market. It offers no domestic production incentive for the so-called "runaway plant," the U.S. subsidiary which produces abroad for the U.S. market. For the same reason DISC influences investment decisions within the U.S. toward production for the export market, as opposed to the domestic market, since only exports qualify for DISC benefits. An additional complication from the simplified picture in the diagram is that deferral is an incentive to invest in low-tax foreign countries only to the extent that the business operations contemplated would not run afoul of Subpart F of the tax code and thus be taxed currently.

The overall effect of these differing treatments of domestic and foreign income in the U.S. tax code will vary among companies and among investment opportunities within given companies. For companies which are relatively capital intensive, the availability of the investment tax credit and the asset depreciation range on domestic investment provides a strong tax inducement to manufacturing at home and exporting goods to foreign markets, perhaps through a DISC. This inducement is especially strong if the foreign market is in one of our major trading partners; with the domestic tax benefits the company can enjoy an effective tax rate on domestic source income which averages about 41 percent (and is lower for the most capital intensive firms) as opposed to the effective tax rates shown in Table 1 for our major trading partners.

In regard to business opportunities in less developed countries with lower tax rates, whether the tax system favors investment at home or abroad will depend on the relative magnitudes of ITC, ADR, and DISC versus deferral and crediting sub-national taxes for the specific investment choice. Business firms which are less capital intensive would be expected to find the benefits of deferral relatively more attractive, and, of course, for all firms the appeal of deferral will be stronger the lower the foreign tax rate.

Thus, the U.S. tax treatment of foreign source income results in a complex pattern of counteracting influences on international investment decisions. These influences weigh differently on each investment opportunity depending on the foreign country and type of investment involved; however, in general, the U.S. tax structure provides advantages for labor intensive investments in low-tax foreign countries and it provides disincentives to capital intensive investment in high-tax foreign countries.

These investment incentives and disincentives, which influence the allocation of American capital resources, are the most important economic effects of deferral and DISC. The allocation of capital investment and the influence of the tax structure on that allocation, have become the subjects of intense interest and public debate in the United States in the last several years. In general, in the absence of outside distortions, natural economic forces will cause investment capital to flow into investment opportunities which provide the highest rate of return. So long as the private rates of return

[13] The exceptions apply to tax exempt corporations (under section 501), life and mutual insurance companies, possessions corporations, mutual funds, real estate investment trusts, and DISC's.

[14] An affiliated group consists of a group of corporations of which at least 80 percent of the voting power of all classes of stock of each corporation is owned by other corporations in the group.

accurately reflect the economics of alternative investments, this process will also maximize economic growth, productivity and income levels, and minimize inflation. However, to the extent that tax provisions, such as deferral and DISC, alter the relationship between private and social rates of return, investors in the favored projects will be benefited, and the costs to society as a whole will be felt in lower levels of economic growth, real income, and productivity. Hence, the importance of evaluating the tax provisions to determine whether, and to what extent, they serve important policy goals and therefore justify their economic cost.

V. THE EFFECTS OF DEFERRAL AND DISC ON THE BALANCE OF PAYMENTS, EMPLOYMENT, AND THE COMPETITIVENESS OF AMERICAN INDUSTRY

The effects on investment induced by provisions such as deferral and DISC subsequently result in a variety of short-term and long-term indirect economic effects which have become important issues in terms of policy formulation. These effects include balance of payments implications, effects on employment, and considerations of equitable treatment of multinational firms and the effect of the U.S. tax structure on their competitive position in world markets.

A. Balance-of-payments effects

Both the 1962 proposal to eliminate deferral and the evolution and eventual adoption of DISC were motivated in part by a desire to favorably affect the U.S. balance of payments. These balance of payments objectives were formulated during a period of fixed exchange rates. In 1973 the world switched to a system of floating exchange rates, and the effects of tax provisions which influence investment and the size of export revenues are very different under a fixed exchange rate regime from when currencies float.

Under a fixed exchange rate regime these provisions could have permanent effects on the balance of payments. An export subsidy like DISC would act to increase export receipts in two ways. First, by inducing firms to locate in the United States rather than abroad in order to produce for foreign markets, it would improve the balance of payments because the costs of production (wages, taxes, etc.) would accrue to workers and others in the United States—amounts which formerly accrued abroad. DISC would also act to expand the total supply of goods sold to foreigners, since it induces investment within the United States to flow into export production, and given current estimates of elasticities, this effect would also increase export revenue.

Deferral had the opposite effect. It provided an inducement to invest abroad in low-tax countries and, through the location choice, presumably reduced export revenues. Unlike DISC, however, deferral also provided an incentive to firms producing for sale in the United States to locate overseas and export goods back into the U.S. This effect would also increase any balance of payments deficit by increasing imports.

During the 1960's making changes such as repealing deferral and adopting DISC could be seen as one solution—perhaps a "second best" solution—for what was perceived as a long term balance of payments problem. This problem, which resulted from a dollar price that was too high, hurt both U.S. exporters whose goods were artificially overpriced abroad and U.S. import competing industries since imports were artificially underpriced.

However, with the adoption of flexible exchange rates, a permanent effect on the balance of payments from such tax policies can no longer be expected. This is because a flexible exchange rate system will automatically move, through market adjustments in exchange rates, toward a position of balance in the international payments accounts of each country. This movement may be somewhat unsteady and protracted, and may be moderated or retarded by the policies of interested governments (as the world is presently experiencing), but in the long run any policy which attempts to increase permanently net export receipts without also increasing exports of investment capital will be rendered ineffectual by market forces. For example, it was observed above that under a system of fixed exchange rates DISC would improve the balance of payments by increasing exports and reducing payments to foreign factors of production. Under flexible exchange rates these initial effects will eventually cause an increase in the price of the dollar on foreign exchange markets; this exchange rate change will reduce U.S. exports and increase imports, thus offsetting the effects of the original incentive as far as the balance of payments is concerned. Deferral has the opposite impact; by contributing to higher foreign investments and lower U.S. exports it will be a force toward decreasing the price of the dollar thus offsetting its original impact. Thus, under a system of flexible exchange rates, international currency price adjustments will render ineffective policies which attempt to have a long-term impact on a nation's balance of payments.

These adjustments are part of the normal economic process by which supply and demand adjustments in international markets occur under a system of flexible exchange rates. There might occasionally be reasons a country would wish to intervene on a short-term basis in the foreign exchange market. First, all countries have an interest in smooth adjustments in the exchange markets because erratic adjustments erode planning capabilities and cause a deterioration in trade and investment conditions. This concern for stable adjustments is particularly strong with regard to the U.S. dollar, not only within the U.S. but abroad, because the dollar is the exchange medium for much of the world's trade. Secondly, net exports (exports minus imports) enter into the aggregate demand of a nation's economy which determines levels of income and employment. Thus, for example, the U.S. may be concerned about an initial deficit in the trade account and wish the price of the dollar to fall more quickly, while foreign countries may be concerned, once the price of the dollar begins to fall, about the effect on their export sector and wish it to fall more slowly. In the case of some foreign countries whose economies are heavily dependent on the international trade sector, this concern may be greater than in the United States.

These reasons for intervening in the foreign exchange markets are short-term in nature. They require policies which are temporary, easily controlled, quick acting, and capable of coordination with the policies of other nations. Market adjustment mechanisms such as the buying and selling of foreign currencies meet these criteria; deferral and DISC do not.

One final point with regard to the balance of payment effect of the tax provisions should be made. While provisions designed to improve the balance of payments will not have a permanent effect on the payments balance (i.e., whether it is in surplus or deficit) under a flexible exchange rate system, such provisions may affect the level of international trade and investment activity at which the balance of payments is eventually achieved. For example, provisions such as DISC typically would be expected to cause the eventual balance in international accounts to be achieved at a position in which the real quantities of U.S. exports and imports are higher than otherwise.[15] This effect does not change the balance of payments, but it does increase the size of U.S. export industries such as agriculture, transportation equipment, and machinery and reduces the size of import competing industries such as textiles, shoes, and electronics.

B. Employment effects

Another argument which has been used in support of DISC and the elimination of deferral is the effect of these provisions on employment in the United States. It is argued that DISC increases employment by increasing exports and that elimination of deferral would also increase employment by inducing a shift of production by U.S. multinationals from low-tax foreign countries to the United States. This argument should be considered in both a short-term and long-term context.

Unemployment is generally considered to result from structural and cyclical problems. The structural problems may be considered long-term in nature and the cyclical problems short-term, although even the short-term may be somewhat protracted as demonstrated by current economic conditions. Cyclical unemployment results from a greater number of job seekers than job openings and can result from a number of factors such as a recession (or "growth recession"), an unusually large influx of new labor force entrants, and downwardly rigid wages. Appropriate policy responses to cyclical unemployment include countercyclical fiscal and monetary policy and programmatic responses such as job programs, public works projects, and countercyclical revenue sharing. DISC and the repeal of deferral are not candidates for short-term countercyclical policies because they are not amenable to increasing or decreasing as the cyclical pattern of the economy may require, nor can their impact be targetted toward the unemployed.

The structural unemployment problems involve the distribution of skills and the location of the labor force compared to the requirements of the job market. Policy responses to structural unemployment include training, relocation programs, and income maintenance programs. DISC and the repeal of deferral do not contribute directly to a solution to these structural unemployment problems. Additionally, as discussed in the previous subsection on balance of payments and trade effects, DISC and deferral repeal may create jobs in the export industries, but under a system of flexible exchange rates they will likely accelerate the decline of import competing industries and lead to less employment in those sectors. This is exactly the opposite of the effect which occurs with a tariff, under which import competing industries are generally benefitted and exporters are harmed.

The effects of provisions such as DISC and deferral on capital flows do lead to some ef-

[15] The actual effect depends on the induced investment location effects and elasticities of demand and supply in the export and import markets. Theoretically, virtually any new configuration of trade in terms of both physical quantities and the revenue volume of trade might result. Normally, however, one would expect the physical quantity of trade to increase, given usual elasticities of export demand, with the increase in the physical quantity of exports exceeding the increase in physical quantity of imports. The dollar volume of trade, however, might fall.

fects on labor income. Generally, foreign investment tends to increase capital income and decrease domestic labor income. However, if there is a desire to reduce the level of foreign investment, the appropriate device would be some type of generally less favorable tax treatment of such investment rather than provisions like DISC and deferral which distort investment allocation within the United States and the location of U.S. production abroad. For theoretically optimal worldwide efficiency in the location of production and investment, however, taxes should be equalized on foreign and domestic investment.

C. Effects on the competitiveness of American industry

Another argument which has been used in support of deferral and DISC is that these tax provisions are required to allow U.S. companies to be competitive in the world market. Specifically, it is argued that deferral is necessary to allow U.S. foreign subsidiaries to be competitive with the subsidiary operations of foreign firms which are not taxed currently by their home countries, and that DISC is necessary to allow U.S. exporters to compete with foreign firms which also enjoy export subsidies.

With regard to deferral, it is observed that most countries either do not tax, or defer taxation of, the foreign earnings of their corporations. Therefore, the corporations of other nations, with whom U.S. multinationals compete, will generally pay taxes only to the host countries with regard to their foreign investments and operations. It is argued that the U.S. policy of deferral puts U.S. multinationals on an equal competitive footing with these foreign subsidiaries with regard to business opportunities in low-tax foreign countries. Repeal of deferral would therefore reduce the competitiveness of U.S. firms in low-tax foreign countries and decrease their foreign activities.

The argument that repeal of deferral would lead to a reduction of U.S. business activities in low-tax foreign countries—interpreted as reduced "competitiveness"—is correct; however, the implications of this observation for tax policy deserve careful consideration. As discussed in section IV above on investment incentives, deferral causes an inducement to U.S. investments, particularly labor intensive investments, to flow into low-tax foreign countries. Elimination of deferral would be expected to remove this inducement and diminish U.S. investments in these countries (see the discussion of repeal effects in section VI below). This reduced foreign investment, combined with the resulting higher output prices on the goods and services produced by such investments, would be seen by U.S. multinationals (correctly from their perspective) as evidence of reduced "competitiveness."

However, the standard of tax policy with regard to business opportunities should be to treat alternative investments uniformly so the tax structure does not cause distortions in the relative attractiveness of investments unless a clear national purpose is served by such nonneutralities.[16] U.S. multinational corporations make investment decisions, not with reference to what other firms of different nationalities are earning on any given investment, but rather with reference to rates of return on alternative investments available to U.S. corporations, including investments in the U.S. domestic economy and U.S. export activities. Thus, the deferral policies of other countries do not directly affect the investment decisions of U.S. multinationals because they do not directly affect the rates of return on alternative investment opportunities available to the U.S. firms.

The deferral policies of other countries do, however, have an indirect effect on the investment allocation of U.S. multinationals. Other countries' policies of deferral, or not taxing their firms' foreign earnings, encourage foreign capital to flow into low-tax countries which tends to decrease the rate of return on invesements in those countries. This lower rate of return on investment opportunities in low-tax countries will affect the investment decisions of U.S. multi-nationals, leading to reduced investment in those countries. However, there is no unilateral U.S. policy response which will perfectly neutralize these indirect investment effects of the foreign tax preferences. If the U.S. does not allow deferral, the foreign country deferral policies will disadvantage U.S. multinationals with regard to their "competitiveness" in low-tax foreign countries. On the other hand, if the U.S. retains deferral of the taxation of foreign income, this policy leads to a disproportionate investment of U.S. capital in low-tax foreign countries.

The situation with regard to DISC as a response to foreign export subsidies is similar. It is important at the outset to distinguish between two types of supposed export subsidies which have played a role in this argument. One is the policy of other countries of rebating indirect taxes, primarily the value added tax, on exports. The second is the existence of export subsidies which are similar to DISC. With regard to the value added taxes and other indirect taxes, it is important to understand that rebates of these taxes do not constitute export subsidies which create disadvantages for U.S. firms.

For example: Suppose that Germany has a 10 percent value added tax on a specific item and New York has a 6 percent retail sales tax. An article produced in the United States and exported to Germany will not be subject to the 6 percent sales tax but will be subject to the 10 percent tax in Germany—just as the identical item produced by a German manufacturer and sold in Germany will be. Similarly, a German good exported to New York will not be subject to the 10 percent value added tax (which is rebated) but would be subject to the 6 percent sales tax. The goods are therefore subject to the same excise tax burden regardless of where they are sold and are thus on an equal competitive footing. Thus rebate of value added and similar indirect taxes on exports and imposition of indirect taxes on imports are consistent with tax neutrality.

However, traditionally direct taxes, such as the corporate income tax, are assumed to reduce the return to capital rather than being shifted forward in higher prices. If direct taxes to fall on capital, then rebating them is not consistent with tax neutrality. As an example, suppose that in the absence of taxation a good would sell for $100 and earn a profit of $20 per unit. Assume a corporate income tax is imposed in one country at a 50 percent rate. If the tax is ultimately borne by capital, then the after tax profit on the $100 will drop to $10 per unit, and the price will remain unchanged. Under this assumption it would not be consistent with tax neutrality to rebate or forgive the income taxes on exports. If the country did adopt a full rebate system, the profit margin on exports would revert to the pre-tax amount of $20 per unit, but the profit margin on other similar goods sold within the home country would remain at the after-tax level of $10 per unit, inducing more investment to flow into export activity until the rate of return were equalized at somewhere between $10 and $20 per unit. This effect would increase the output of export goods and result in a lower price than occurred prior to the imposition of the income tax. The effect would be to make the goods of the country imposing the tax unfairly competitive with goods produced by other countries. Thus, the rebate of direct taxes, such as the corporate income tax, does constitute an export subsidy.

Initially, export subsidies of other countries have two effects on the United States. First, they make foreign exports to third country markets more "competitive," thereby reducing the demand for U.S. exports. Secondly, foreign export subsidies reduce the price of the subsidizing countries' exports to the United States. These induced effects will result in exchange rate adjustments in all countries which will eliminate the initial trade imbalances which occur and tend to offset the initial reduction in export demand and in import prices.

The final results of these changes cannot be predicted precisely because they are dependent on supply and demand elasticities in each country for both imports and exports. However, some potential results can be gleaned from looking at estimates of these elasticities for the United States. Export demand for the United States tends to be relatively price elastic, while import demand elasticities are often estimated at close to one.[17] If import demand elasticity in the United States is precisely equal to one, then there will be no effect on import *revenues* from a foreign nation's export subsidy. As a result, to re-establish the original balance of trade, exchange rate adjustments will return U.S. exports to their original position. The effects on import *quantities* are indeterminate, but are typically expected to be positive and therefore harmful to U.S. import competing industries.[18]

In this situation, just as in the case of deferral, there is no unilateral policy option available to the United States which will perfectly neutralize the effects of the foreign export subsidy. Adoption of a competing export subsidy, such as DISC, would benefit exporters and further harm import competing industries. Conversely, U.S. adoption of a countervailing tariff to protect import competing industries from the subsidized foreign exports would damage U.S. exporters. Theoretically, a combination of all countries adopting countervailing tariffs with income transfers (to return the tariff revenues to the country providing the export subsidy) would restore the original position entirely. However, a much more direct response would be to negotiate the removal of all export subsidies. In this regard, DISC may have had two affects. First, it might be used as a bargaining chip in negotiations. Second, it might be viewed as a further escalation of an export subsidy battle, and its repeal might encourage other countries to remove their own export subsidies. Assessment of

[16] There are, of course, many nonneutral tax provisions which were adopted explicitly to serve national goals, such as the investment tax credit designed to stimulate capital investment.

[17] See, for example, Stephen P. Dresch, et al., Substituting a Value Added Tax for the Corporate Income Tax, National Bureau of Economic Research, 1977, Chapter 6.

[18] This typical expectation can be more easily seen by viewing it from the standpoint of the country granting the export subsidy, where the normal results are that the country ends up with a larger physical quantity of exports than imports compared to previous balances. The opposite effect would therefore occur with its trading partners; i.e., imports would increase more than exports.

these effects is difficult; however, to date the use of DISC as a bargaining chip has not been particularly successful. In 1973, the Dutch, French and Belgian governments brought action under GATT to have DISC declared a violation of GATT rules. The United States brought simultaneous action to have GATT void certain provisions of the French, Dutch and Belgian laws which were charged to constitute export subsidies. The GATT panel which considered these complaints decided that in all four cases the practices were inconsistent with GATT rules. The U.S. Government moved to have GATT accept the decision of the panel; however, the European countries expressed reservations about the findings and no action has been taken.

Before leaving the subject it should be noted that the effects of foreign export subsidies, while detrimental to efficient worldwide trade, are not necessarily harmful to the United States as a whole. While foreign export subsidies may adversely affect some sectors of the U.S. economy, they will typically result in a relatively larger real quantity of imports as compared with real exports. This effect occurs because the export subsidy of the foreign country has turned the terms of trade (relative prices of exports and imports) in favor of other countries. If foreign export subsidies enable the U.S. to receive more goods from the rest of the world while giving up fewer of our own, then in an aggregate sense, the United States will be better off. While the U.S. must be sensitive to the health of its exporters and import competing industries and facilitate any necessary adjustment in world trade patterns, the aggregate economic effects of foreign trade policies are to also be considered.

VI. THE EFFECTS OF REPEALING DEFERRAL AND DISC

Just as the effects of deferral and DISC are uncertain, or at least vary depending on the circumstances, the potential effects of eliminating deferral and DISC are also somewhat incalculable. This is especially true with regard to deferral because there are several alternative ways in which deferral could be terminated or curtailed, each with different potential consequences, and because the elimination or reduction of deferral could elicit behavioral changes on the part of U.S. multinational corporations and/or foreign governments which would wholly or partially offset the effect of the U.S. policy change.[19]

If deferral is to be restricted or eliminated, there are several ways this could be accomplished. One method would be to expand the applicability of Subpart F of the tax code to include virtually all income earned by foreign subsidiaries, rather than just "tax haven" income. This method offers the advantage of using an existing mechanism and also of policy flexibility. Through an expansion of Subpart F, for example, U.S. parent corporations could be taxed on the constructive receipt of a portion of foreign subsidiary earnings (say 75 percent) regardless of actual distribution, thereby curtailing but not eliminating deferral. Alternatively, if deferral is to be fully eliminated, the policy could be accomplished by treating subsidiary earnings the same as branch earnings (on a pro-rata basis according to the percentage of ownership). This policy would allow foreign subsidiary losses to offset domestic source income whereas the Subpart F expansion would not. The two methods would also differ in complexity and administrative approach. Legal restrictions would probably prevent either approach from taxing currently the income of foreign subsidiaries which are not controlled, or owned at least 50 percent, by U.S. shareholders; however, such subsidiaries currently represent only a small portion of foreign subsidiary earnings.

A second design consideration for a change in deferral is whether the change will be accompanied by the requirement that the limitation on the foreign tax credit be computed on the overall or the per country basis. The Tax Reform Act of 1976 requires all corporations presently to use the overall limitation; however, before that Act corporations generally had a choice (with limitations) between the methods (the foreign tax credit limitation on foreign oil and gas income was required to be computed on the overall basis by the Tax Reduction Act of 1975). The primary difference in the two limitations of relevance to consideration of the elimination of deferral is that the overall limitation would allow excess foreign tax credits generated in one country (i.e., tax payments in excess of the U.S. 48 percent statutory tax rate) to offset residual U.S. tax liability in another country (i.e., a country in which tax payments were less than the U.S. 48 percent rate) whereas the per country limitation would not allow such offsets. Thus, other things being equal, the per country limitation would be expected to produce higher revenues if deferral were ended because multinationals would not be able to use excess foreign tax credits from high-tax countries to mitigate the impact of current taxation of earnings in low-tax countries.

An additional design consideration is whether, and to what degree, to allow consolidation in the tax computations of foreign subsidiaries. U.S. taxes could be computed separately for each foreign subsidiary; consolidation could be allowed on a per country basis; or worldwide consolidation could be permitted. Consolidation allows the losses of unprofitable subsidiaries to be offset against the income of profitable subsidiaries in computing income tax, whereas disallowing consolidation forces the losses of the unprofitable subsidiary to be carried over to offset profits of that subsidiary in a profitable year.

The potential impact on the revenue effects of terminating deferral under alternative foreign tax credit limitation and consolidation rules is indicated in Table 2. The estimates in the table assume no behavioral changes on the part of corporations or foreign governments. Thus, they represent "first round" approximations only and not long-run impact estimates.

TABLE 2.—*Termination of deferral with alternative consolidation requirements and with current dividend distribution rate*[20]

[Millions of dollars]

	1976 calendar year tax liabilities
Overall limitation on foreign tax credit:	
Worldwide consolidation of CFCs	365
No consolidation of CFCs	1,100
Per-country limitation on foreign tax credit:[21]	
Country consolidation of CFCs	630
No consolidation of CFCs	1,300

(Office of the Secretary of the Treasury, Office of Tax Analysis, April 6, 1976.)

SOURCE: Reproduced from Hufbauer, Gary and David Foster, "U.S. Taxation of the Undistributed Income of Controlled Foreign Corporations," in Essays in International Taxation: 1976, The Department of the Treasury, December 31, 1976, p. 41.

One additional design consolidation would apply to the termination of both deferral and DISC: how to treat previously deferred taxes. The benefits of deferral and DISC have always been described as deferral of taxation, not forgiveness (although deferral is equivalent to partial forgiveness; see footnote 1, p. 5). Therefore, some tax reform advocates argue that if deferral and DISC are terminated, the deferred taxes from past years perhaps a limited number of years, say three) should become due and payable. Others argue that termination of the tax provisions should be only on a prospective basis, and that deferral of taxation of prior income should continue until it is received by the parent corporation. One solution would be to phase out tax deferral on prior income by requiring a constructive receipt of a portion of previous earnings over a period of several years. The arguments about the desirability of retrospective versus prospective termination of special tax provisions are many,[22] and the decision has significant revenue consequences. If the terminations of deferral and DISC are to some extent retroactive, the revenue impact of the policy changes, at least in the early years, would be considerably higher.

In assessing the impact of the proposed termination of deferral and DISC, one must also consider the probable reaction to the policy changes by U.S. multinationals and foreign governments.[23] This is especially true with regard to deferral because the range of potential reactions is considerable. One possible reaction on the part of corporations would be for foreign subsidiaries to increase the porion of earnings paid to U.S. parent corporations as dividends. Many U.S. multinationals would like to repatriate as much of foreign earnings as possible but also wish to minimize their tax burden. With deferral, repatriation from low tax rate foreign countries involves an additional tax cost unless excess foreign tax credits are available to offset the tax; however, without deferral taxes on the earnings will be paid regardless of repatriation. Increased repatriation would increase the amount of foreign taxes paid in the form of dividend withholding taxes and thereby increase the amount of foreign tax credits claimable by U.S. parent corporations. The potential magnitude of this effect is revealed by a Treasury estimate that if the termination of deferral would lead to a 100 percent distribution rate among foreign subsidiaries, the Treasury could experience a revenue loss (the magnitude depending on the type of limitation on the foreign tax credit) rather than a revenue gain from the policy change. It should be added that repatriation is unlikely to increase beyond the point at which foreign tax credits just offset the additional U.S.

[19] These issues are described very briefly here; for a detailed analysis see Hufbauer, Gary and David Foster, op. cit.

[20] These estimates assume the present dividend distribution rate is maintained.

[21] These estimates assume that the per-country limitation is already in place, and that deferral is then ended. The revenue changes refer only to the additional impact of eliminating deferral.

[22] See, for example, Graetz, Michael J., Legal Transitions: The Case of Retroactivity in Income Tax Revision, University of Pennsylvania Law Review, v. 126, Nov. 1977. pp. 47–87.

[23] The discussion here does not cover the complex, and largely separate, issues involving the taxation of international shipping; see Field, Marcia and Richard Gordon, Tax Treatment of Income From International Shipping, in Essays in International Taxation: 1976, Department of the Treasury, December 31, 1976. pp. 64–98.

tax liability, thus an actual revenue loss to the U.S. Treasury from terminating deferral is unlikely.

A second likely reaction among multinational corporations to the end of deferral would be to shift the capital structure of their foreign subsidiaries away from equity and toward debt financing. This shift would likely occur because the relative cost of equity financing would be increased by termination of deferral (because of higher U.S. taxation of foreign profits). This is a further influence toward higher dividend repatriation from foreign subsidiaries since reinvestment of foreign earnings is a common method of increasing the equity financing. Such a shift to greater debt financing would reduce the revenue productivity of the termination of deferral; however, this reduction could be more than offset by higher domestic profit tax receipts if the reduced equity financing abroad is matched by increased investment at home.

A third possible reaction of U.S. multinational corporations to ending deferral would be to take minority shareholder positions in foreign operations rather than operate abroad primarily through wholly owned or majority owned subsidiaries. The reason for this change in approach would be to challenge the legality of current U.S. taxation of the earnings of a shareholder in a foreign corporation if the shareholder is not, singly or in combination with other U.S. shareholders, a majority owner of the foreign corporation or in control of the corporation. The legality of current U.S. taxation of the earnings of U.S. shareholders in majority owned foreign corporations has been upheld by the courts. However, a precise delineation of what constitutes "control" or majority ownership (50 percent, or greater than 50 percent?) has not been made by the U.S. courts.[24] If deferral were ended this issue would probably be litigated, and some corporations would seek to avoid current U.S. taxation of foreign earnings by "decontrolling" their foreign operations. (There are other pressures in this direction as well; many foreign countries are pressuring the multinationals for greater local participation in their business enterprises.) All of the above potential reactions of U.S. corporations have a common theme: faced with higher effective tax rates on investment earnings in low-tax foreign countries, the multinationals would have a strong incentive to reduce their equity investments in those countries.

The termination of deferral might induce policy shifts in foreign countries as well as among the multinational corporation. The foreign countries which presently tax corporate income at or above the U.S. statutory rate would not be affected by eliminating deferral; however, some less-developed countries, including some countries with which the U.S. has important foreign policy ties (India, Pakistan, Israel, the United Arab Republic), maintain low effective tax rates on corporate income specifically as an incentive to development. These countries would be adversely affected by the termination of deferral and would be expected to react. This reaction could take one of two tax policy directions, in addition to possible political reactions (e.g., pressuring for new tax treaties). One possible tax policy reaction would be for the foreign country involved to change its policies in an attempt to preserve the economic incentives to invest in the country despite the termination of deferral in the U.S. tax code. One way to accomplish this would be to move away from tax relief and toward direct cash subsidies as investment incentives. Through a combination of direct subsidies and higher tax rates a foreign country could insure equal after-tax profits to foreign firms despite termination of deferral. Alternatively, foreign governments could merely increase their tax rates on profits of U.S. corporations (through a dividend withholding tax, for example) so that any increased tax on the foreign enterprise would accrue to the host countries rather than the U.S. Once deferral were terminated in the U.S. tax code, such a foreign tax increase, at least up to an effective rate of 48 percent, would be essentially costless to the corporations involved and thus, one of these two reactions on the part of foreign governments would be highly likely.[25]

Given the above discussion, the economic impact of terminating deferral and DISC is obviously not known with certainty. Foreign governments would be expected to make some statutory changes designed to minimize the adverse impact of the U.S. policy change or capture the increased tax revenue for themselves. The direct result of the combined policy changes would be to increase the effective tax rates on investments by U.S. companies in export activities and in operations in low-tax foreign countries. The reduction in marginal investment in some developing countries may suggest some consideration of offsetting revisions in the U.S. foreign aid program.

As discussed in section IV above, the most important impact of this change would be the influence on the allocation of U.S. investment capital. The repeal of deferral, as a separate policy, would reduce U.S. investments in low-tax foreign countries and increase the relative rates of return on investments in high-tax foreign countries, investment in the U.S. for export, and investment in the U.S. for the domestic market. Repeal of DISC, as a separate policy, would reduce the rate of return on investment in the U.S. for export production; it would increase the relative profitability of investment in the U.S. economy for domestic production and foreign investment in both high-tax and low-tax countries. The two policies in combination would, therefore, be expected to increase investment in the U.S. economy for domestic production and increase investment in high-tax foreign countries. However, the effects of the combined policies on U.S. export investment and foreign investment in low-tax countries are offsetting, and the overall result is uncertain. While these issues have been the subject of economic research, the present level of development of that research does not permit reliable estimation of the overall investment shifts which would occur as a result of repealing deferral and DISC. In general terms, however, repeal of deferral and DISC would reduce the tax induced distortions affecting international investment decisions (although not eliminate them) and thereby increase the overall economic efficiency of investment allocation, resulting in somewhat higher levels of economic growth, real income, and productivity.

The potential outcome for the tax system of repealing deferral and DISC is also not known with certainty. While two non-neutral tax provisions would be removed, tax induced influences on foreign trade and investment decisions would remain. Additionally, while two so-called "tax expenditure" items would be eliminated, deferral amounting to approximately $410 million per year and DISC equaling about $1.2 billion annually, the increase in tax collections might be considerably different from these amounts. The tax rise resulting directly from repeal of deferral could be nil, depending on responses by multinational corporations and foreign governments. The tax rise resulting directly from repeal of DISC could be higher or lower than the tax expenditure estimate depending on the net result of the investment shifts. Additionally, some rise in tax revenue would be expected to result from the higher level of investment in domestic production induced by the repeal of deferral and DISC.

[24] For further detail on the legal history of this issue, see Hufbauer and Foster, op. cit., pp. 19–21.

[25] For example, assume a U.S. multinational operates in a foreign country with no income tax, earns $100 of profit, and repatriates none of its foreign earnings. With deferral the after-tax profit is $100 (ignoring any future tax liability); without deferral the firm would owe a tax of $48 to the U.S. However, the foreign country could offer the company an annual subsidy of $100 and tax the profits of the company at a 50 percent rate. This would leave the company with $100 of after-tax profits and a $100 foreign tax credit which will fully offset the U.S. tax liability of $96 on the $200 of foreign earnings.

THE AMERICAN CONTRIBUTION TO PANAMA'S PROSPERITY

Mr. HATCH. Mr. President, one of the most frequently repeated arguments in support of the proposed Panama Canal Treaties is the claim that Panama is a "colonial enclave" and a victim of U.S. "exploitation." This argument, reminiscent of Marxist dialectics, fails to take into account the fact that Panama has received very substantial benefits because of U.S. investments in the zone, to say nothing of American largesse in terms of foreign aid. Contrary to the false impressions created by the State Department, these benefits amount to a solid contribution to every major facet of Panama's economy.

A recent letter appearing in the Baltimore Sun does much towards elucidating, in a dispassionate and factual manner, this little publicized aspect of our relationship with Panama. I ask unanimous consent that the letter, by Mr. Martin D. Tullai of Brooklandville, Md., be printed in the RECORD for the benefit of my colleagues.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

[From the Baltimore Sun, Jan. 28, 1978]

AMERICAN BENEVOLENCE IN PANAMA

Sir: As the U.S. Senate prepares to face its moment of truth regarding the Panama Canal Treaties, there seems to be a revival of the absurd contention that the U.S. has been the aggressive exploiter of Panama. Myths like this, repeated often enough, die hard. And one would be remiss to allow them to stand without refutation, for a dispassionate appraisal of the facts reveals otherwise.

Although no more than a pestilential swamp in 1903, Panama is today a fairly prosperous nation almost entirely due to our generosity and monies that poured into the region because of the canal. Panama has been and still is the greatest single beneficiary of the canal enterprise. Harold R. Parfitt, governor, Panama Canal Zone, has testified that, "the presence of the Panama Canal has infused much money into the Panamanian economy, and is responsible for the high standard of living in that part of Central

America." This claim is not difficult to substantiate. Consider some facts:

(1) There is an inflow to the economy of Panama of between $240 million and $250 million annually. In addition, it receives an annuity of $2,328,000. The initial annuity was set at $250,000. In 1936, this was increased to $430,000, it was raised again in 1955 to $1,930,000. Today it stands at the aforementioned $2,328,000.

This is not a rental fee as some have mistakenly construed. It was an annuity designed to assume the annual franchise payment which the Panama Railroad formerly paid to Colombia. It did not affect the status of the Canal Zone, but was the obligation of the railroad to Colombia. This obligation was now assumed by the United States which paid Panama the annuity or "compensation." This was not a rental or lease—these words do not appear in the treaty, but significantly, the term "grants" appears 19 times.

(2) The canal is larger than any other single source of employment in Panama. About 10,000 people—72 per cent of the total work force of the Panama Canal Company and the Canal Zone Government—are Panamanian nationals, thousands more work for the U.S. military.

(3) Panama has the highest per capita income in all of Central America ($1,375) and stands fourth of 19 nations in all of Latin America. It has twice the per capita wealth of Colombia, the nation from whom she declared her independence.

(4) The U.S. has favored Panama with more per capita foreign aid than any other country in the world. Between 1947 and 1973, this amounted to $342 million.

(5) American businessmen have contributed to Panama's economy with investments approximating $250 million.

(6) Until 1975, Panama had one of the lowest inflation rates in Latin America.

(7) In addition to direct economic boosts, Panama has gained much from a variety of beneficent projects. These include a bridge and highway across the Canal, built at U.S. expense to link the two parts of Panama; the country's deep water ports are U.S. built and operated; its principal international airfield was U.S. built, the U.S. constructed its transisthmian road and railroad; Panama's water supply comes largely from reservoirs and purification systems constructed by the U.S. its sanitation system was primarily the result of U.S. efforts; and U.S.-owned merchant ships flying Panama's flag of convenience add to her economic well-being, just as tourism, attracted by the Canal, adds many dollars to the merchants' coffers.

(8) The picture of health and social statistics is also quite striking. After the French failure, due largely to tropical fevers, U.S. physicians and scientists conquered the endemic, devastating diseases. They sanitized Panamanian swamps and established an extremely effective health system. Some results of these programs point up their successes:

Panama's infant mortality per 1,000 live births in 1970 was 3.0—lowest in all of Latin America, Argentina's being 60.1, Brazil's 85 to 95, Boliva's 159.0 and Haiti's 149.1; Panamanians have the fourth best life expectancy in Latin America—66.5 years; at 5.3 per thousand, its mortality rate in 1974 was the second lowest in Latin America; Panama's literacy rate of 84.0 stands fifth in all of Latin America—well above fourteen other nations of that region.

These obvious benefits have made Panama, despite its unstable and dictatorial government, one of the most favored nations in all of Latin America. Far from being exploited, it is evident that Panama's well-being has been greatly enhanced by the American presence in the Canal Zone. The canal is Panama's greatest single revenue source.

Hanson Baldwin, noted military expert and writer for the New York *Times*, has declared: "The exploitation myth is just that: a propaganda ploy fostered by Panama's politicians, by Castro's Cuba and by the Soviet bloc to help force the United States out of the zone. It has no basis in fact."

MARTIN D. TULLAI.

PROFESSOR BERGER'S REPLY TO LOUIS POLLAK

Mr. HATCH. Mr. President, as my colleagues are aware, I have submitted an amendment to the Panama Canal Treaties which provides that these agreements shall enter into force only after both houses of Congress have enacted legislation authorizing the transfer of Canal Zone territory and property to the Republic of Panama.

This amendment is necessary because there are, in my judgment, no adequate precedents to support the assumption that the Chief Executive has the authority to dispose of U.S. territory by treaty alone. The testimony of State Department and Justice Department representatives, as well as constitutional scholars appearing before congressional committees, has persuaded me that the territorial clause of the Constitution, which gives Congress exclusive power over the disposal of U.S. territory, would be violated if the House of Representatives is bypassed regarding the transfer of the zone to Panama.

Especially noteworthy in this regard is the testimony of the eminent constitutional scholar, Raoul Berger, whose searching analysis shows, beyond peradventure, that these treaties, as presently drafted, seek to expand the treatymaking powers of the Chief Executive beyond the limits of the Constitution—see CONGRESSIONAL RECORD, January 26, 1978, pages S596–S599.

On January 30, 1978, however, my distinguished colleague from Iowa (Mr. CLARK) called to the Senate's attention an interesting paper, written by Dean Louis Pollak of the University of Pennsylvania Law School, which purports to demonstrate the fallacies of Berger's testimony. Unmoved and unshaken, Professor Berger finds that Dean Pollak's critique simply confirms his own belief that there is no constitutional basis for the extraordinary exercise of Presidential power that is contemplated under these treaties.

Professor Berger has favored me with a copy of his reply to Pollak's paper which I would like to share with my colleagues. Of particular significance is Berger's observation that the Pollak paper has added confusion to the controversy by misstating the constitutional issue. As Senator CLARK pointed out one of Pollak's important conclusions is "that the discussion in the Constitutional Convention of 1787 confirms the settled understanding of our treatymakers and of the Supreme Court that territory belonging to the United States may be ceded by treaty." This conclusion detracts little from the strength of Berger's analysis, of course, for the simple reason that no one—including Berger—has denied that the treaty power extends to the disposal of U.S. territory. The real issue, as Berger explains, is whether the Chief Executive has the power to dispose of U.S. territory by a self-executing treaty, thereby circumventing Congress.

Mr. President, I believe that any Senator who fairly and impartially studies the constitutional question that is before us, and subjects the different interpretations of the precedents offered by Berger and Pollak to an objective and forthright analysis, will conclude that the weight of authority clearly supports the view that these transfers under the treaties cannot take effect until Congress has approved them.

To assist the Senate in its consideration of this matter, Mr. President, I ask unanimous consent that Raoul Berger's response to Dean Pollak's paper be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

MEMORANDUM

To: Senator Dick Clark.
From: Raoul Berger.
Re Panama Canal Treaty: Dean Louis Pollak's Reply.
Date: February 1978.

Dean Louis Pollak has favored me with a copy of his critique of my statement before the Subcommittee on the Separation of Powers addressed to you under date of January 19, 1978. I am honored by his expressions of esteem, and his sentiments are warmly reciprocated. High regard for his attainments, however, may not inhibit the expression of scholarly differences on a great constitutional issue; it requires careful study of the alleged infirmities that have persuaded him that I am in error.

At the outset I must disclaim the version of the issue that he attributes to me, namely that the Panama cession "cannot be effectuated by treaty, but only by statute." My objection is to a "self-executing" treaty because Article IV of the Constitution requires Congress' consent to the disposition.

The starting point of analysis must be the Constitution itself not what others have said about it. A great British scholar, W. S. McKechnie, faced by contrary opinion by respected scholars, stated, "the truth of historical questions does not depend on the counting of votes or the weight of authority" but rather on the historical record.[1] So too, in the construction of the Constitution, the document is always here to speak for itself. On this score I cannot improve upon John C. Calhoun, then a Congressman, whose remarks in the House respecting the treaty power are quoted *in extenso* by Dean Pollak, stating that Calhoun explained "with more precision than either [Marshall or Story] achieved, the scope of the treaty power and the constraints which other parts of the Constitution impose upon its exercise." Said Calhoun: "Whatever limits are imposed in those general terms ought to be the results of the construction of the instrument." The treaty power Calhoun continued is competent "to regulate all subjects" that require "the consent of another nation,"

provided, and here are its true limits, such regulations are not inconsistent with the Constitution. If so they are void. No treaty can . . . *do that differently which is directed to be done in a particular given mode.* (emphasis added).

Quoted Pollak 7–8. In terms of the present issue, a treaty may not "dispose" of the

Footnotes at end of article.

Panama Canal without the consent of Congress because Article IV confers that power on Congress.

Here Calhoun applies a rule of construction—the specific governs the general—upon which the administration has refrained from comment, and which remains unmentioned by Dean Pollak: "A broad statutory provision will not apply to a matter specifically dealt with in another part of the same act." [2] Then there is the complementary rule—express mention implies exclusion of the unmentioned—or as held by the Supreme Court, "When a statute limits a thing to be done in a particular mode, it includes the negative of any other mode." [3] Although the exclusion of the treaty power was not before the Court, it tacitly ratified the application of the foregoing rules when it stated that Article IV *"implies an exclusion* of all other authority over the property which could interfere with this right . . . ." [4]

From the beginning such rules of construction were respected; Justice Story recommended the "excellent summary of the rules for construing statutes" in Bacon's Abridgment.[5] If there is any doubt as to the legislative intent—Deputy Assistant Attorney General Ralph E. Erickson testified in 1971 (before Panama became a political issue) that the issue "is not altogether free from doubt." [6]—such rules serve as a guide to construction. Such "doubt" counsels against invasion of a power explicitly conferred on Congress; a clear case for the "concurrent power" is needed in the teeth of the express grant.

The treaty power is given to the President "with the advice and consent of the Senate." Without question the House is thereby excluded from participation in treaty making. By parity of reasoning, the "Congress shall have power to dispose" equally bars its exercise by the President and Senate. It is no adequate answer to say, as does Dean Pollak, that the "Congress shall have power" phrase "syntatically, does not preclude concurrent jurisdiction in the President and Senate as treaty makers," (Pollak 4), for grammatical syntax must yield to established canons of construction which show that Atricle IV "implies an exclusion of all other authority." One who disputes the results to which traditional canons lead has the burden of proof to show they are inapplicable.

Dean Pollak leads off with an appeal to John Marshall's remarks as a young Congressman on the Jay Treaty. In considering these and other treaty remarks, it is constantly necessary to distinguish between the treaty making process and any subsequent exercise of power by the House. That distinction was clearly drawn by Marshall. Washington had submitted the treaty for ratification to the Senate along with some instructions to the Miniser who had negotiated it; but he refused them to the House on the ground that it had no right to participate in treaty making.[7] Among the objections by the House, to quote Albert Bevereridge's "Life of John Marshall," invoked by Dean Pollak, were that though the "treaty regulated commerce . . . the House had not been consulted," that though "the raising and expending of public money must originate in the House," it had been ignored. The question raised, said Beveridge, was "whether a commercial treaty, or an international compact requiring an appropriation of money . . . could be made without the concurrence of the House as well as the Senate."

To this Marshall replied that it was " 'more in the spirit of the Constitution' for the National House to refuse support after ratification than to have a treaty 'stified in embryo' by the House passing on it before ratification." [8] Exclusion of the House from treaty making did not mean for Marshall that the House would be denied its function after ratification. Dean Pollak reads this as a "tactical concession" that was "not at odds with Marshall's constitutional definition of the potential scope of the treaty power." (Pollak 3n). If this was merely a "tactical concession" then his entire statement was a political "tactic", for Marshall gave no clue as to when he spoke as politician and when as constitutional sage.

Attorney General Griffin B. Bell conceded in his statement before the Senate Foreign Relations Committee, September 29, 1977, pp. 4–5, that the Senate and President may not "bypass the power of Congress and in particular the House of Representatives" in the "raising of revenue or expenditure of funds." What distinguishes "all bills . . . shall originate in the House" from "The Congress shall have power to dispose?" The thinness of the distinction is underlined by the State Department's concession that "treaties may [not] impose taxes." [9] Nothing in the Article I, § 8(1) "The Congress shall have power to lay and collect taxes" distinguishes it from the Article IV "The Congress shall have power to dispose."

JUDICIAL DECISIONS

Boundary dispute cases

The "boundary dispute" cases invoked by the administration are tacitly abandoned by Dean Pollak, presumably because, as he quotes Justice Story:

"In the case of a contested boundary, there is no pretence to say that an ascertainment of the true boundary involves the question of cession (Pollak, Appendix A, p. 3).

This was the ground upon which I dismissed those cases.

But Dean Pollak's reference to Story was for the purpose of showing his awareness "that the treaty power includes authority to cede American Territory. . . ." Governor Edward Everett of Massachusetts had written Story with respect to the Northeastern boundary, that in his words presented "a question not of ceding an admitted portion of Maine, but of ascertaining the boundary between the British territory and ours." (Pollak, Appendix, p. 1) As we have seen, Story concurred in this view. Everett sought Story's advice regarding a resolution by the Massachusetts legislature "That no power delegated by the Constitution *to the government* of the United States authorizes them to cede to any foreign nation any territory lying within the limits of either of the States of the Union." Id., (emphasis added).

Of course, Story rejected this drastic restriction, and added that Marshall "was unequivocally of opinion, that the treaty-making power did extend to cases of cession of territory, though he would not undertake to say that it could extend to all cases. . . ." Id. 3. Presumably what Marshall had in mind were the boundary disputes that called for settlement in his time. I would not deny that the President and Senate may enter into a treaty for the cession of territory; what is disputed is whether such a treaty may be "self-executing," without the subsequent consent of Congress under Article IV. Nor can Story's letter be read to repudiate the statement in his Commentaries that "The power of Congress over the public territory is clearly exclusive and universal." [10]

Indian treaty cases

(1) Dean Pollak follows the administration view of *Jones* v. *Meehan*, 175 U.S. 1, 10 (1899), quoting "that a good title to parts of the lands of an Indian tribe may be granted to individuals by a treaty between the United States and the tribe, without any act of Congress." (Pollak 10). But there the grant was made by the tribe, not the United States. The treaty had "set apart from the tract hereby ceded [by the tribe] a reservation of six hundred and forty acres" for an individual Indian, and the issue was what kind of title did he take. The Court, as I showed, quoted from an opinion of Attorney General Roger Taney:

"These reservation are *excepted* out of the grant made by the treaty, and *did not therefore pass with it*; consequently the title remains as it was before the treaty, that is to say, the lands reserved are still held under the original Indian title."

The Court held that "the reservation, unless accompanied by words limiting its effect, is equivalent to a present grant of complete title in fee simple." [11] Dean Pollak states that "the Taney opinion . . . was discussed by the Court and rejected as not controlling." (Pollak 11n). Only a not relevant portion of the opinion was held not controlling, the Taney clause immediately following the above quotation: "and therefore 'the Indian occupants *cannot convey them to individuals*, and no valid cession can be made of their interest but to the United States.' " (emphasis added).

Within a year of Taney's opinion, said the Court, Congress in a new Act "omitted the prohibition, contained in former statutes, of purchase or lease from 'any Indian' " and adopted an "altered form." Hence the Court concluded that "Congress did not intend that there should thenceforth be a general restriction upon the *alienation* by individual Indians of sections of land *reserved to them* respectively by a treaty with the United States. 175 U.S. at 12–13 (emphasis added.) In short, only that portion of Taney's opinion that denied to individual Indians the right to alienate their property was deemed "not controlling," because superseded by an Act of Congress; the power of Indian tribes to "reserve" portions of ceded property to individual Indians was left untouched.

It is not necessary to go into the Court's discussion of the nature of the reserved title, e.g. was it legal or equitable, arising from the fact that Indian lands were held in common; there were no individual titles. Suffice it to set out the Court's quotation from *Doe* v. *Wilson*, 25 How. 457, 463–464 (1859):

"The Pottawatomie nation was the owner of the possessory right of the country ceded, and all the subjects of the nation were joint owners of it. The reservees took by the treaty, directly from the nation, the Indian title." 175 U.S. at 15.

The continued validity of Taney's statement that title "reserved" to individual Indians does not pass to the United States may be gathered from *Francis* v. *Francis*, 203 U.S. 233, 238 (1906), which cites *Jones* v. *Meehan* for the proposition that when a treaty makes "a reservation of a specified number of sections of land . . . the treaty itself converts the reserved land into individual property."

(2) Apparently Dean Pollak concurs with my reading of *Percheman* v. *United States*, 32 U.S. (7 Pet. 0 51 (1833). *Percheman* was cited by Attorney General Bell to show that "the Court held self-executing certain clauses of the Florida Treaty with Spain which related to the regulations of property rights in newly acquired territory." [12] Those were property rights of individuals, not of the United States, and therefore irrelevant to Article IV. The treaty secured to private individuals grants that theretofore had been made to them by the Spanish King, being akin to "reserves" of the Indian treaties. Dean Pollak agree's that "Marshall held that the Treaty of Spain of 1819 had of its own force confirmed the titles of *pre-treaty owners* of Florida land ceded to the United States

Footnotes at end of article.

by the treaty." (Pollak 12n.; emphasis added).

But Dean Pollak states that *"Percheman* held that the interpretation of the 1819 treaty approved in *Foster* v. *Neilson,* 27 U.S. (2 Pet.) 253 (1829) (a case relied on by Mr. Berger . . .) was in error." Id. I cited *Foster* for the statement that "the ratification and confirmation which are promised must be by the act of the Legislature," i.e. Congress. *Percheman* held that no ratification was required because the Court discovered that the Spanish counterpart version of the treaty dispensed with all ratification, a fact not known to the *Foster* Court. 32 U.S. at 89. This does not repudiate the *Foster* holding that if ratification *is* required, it falls to Congress.

(3) There is no need to belabor Dean Pollak's mention of *Holden* v. *Joy,* 84 U.S. 211, 247 (1872), for Attorney General Bell granted that at best it was a "strong dictum," noting that "The Court conceded that the question was immaterial in the case because Congress has actually implemented and ratified that particular treaty." [13] Although Dean Pollak relies on dicta running in his favor, he rejects as dicta judicial statements that the Congressional power to dispose" is "exclusive." (Pollak 14). In fact the latter are not dicta, but were essential to decision as I shall prove by Dean Pollak. He recognizes that *Sioux Tribe* v. *United States,* 316 U.S. 317 (1942), "properly held presidential power over federal lands to be subordinate to the Congressional power," consequently the Court's reference to Congress "exclusive" power was immediately relevant to decision, not dictum. So too, *Wisconsin Central R.R. Co.* v. *Price,* 133 U.S. 496, 504 (1890), which stated that Article IV "implies an exclusion of all other authority over the property . . ." held, according to Dean Pollak, "state authority over federal lands to be subordinate to Congressional authority," again relevant to decision. Such holdings were earlier expressed by Justice Story as a general principle: "The power of Congress over the public territory is clearly exclusive and universal. . . ." [14] True, that principle has yet to be applied to the treaty power (as is equally true of Dean Pollak's citations), but it derives not from dicta but from statements essential to decision, whereas *Holden* v. *Joy* concededly is pure dictum. For this reason, I consider the cases I cite as more worthy of credence than the dictum of *Holden* v. *Joy.*

(4) Repeatedly Dean Pollak dwells on the "classic exposition," the "classic formulation of the [treaty] power in *Geofroy* v. *Riggs,* 133 U.S. 258, 267 (1890)." (Pollak 4n., 12). That case had not the slightest bearing on the effect of Article IV for it had nothing to do with either the disposition or regulation of government property. Under a treaty providing for reciprocal rights of inheritance by citizens of the respective countries, it was held that a Frenchman could take land by descent in the District of Columbia. In Dean Pollak's view, *"Geofroy* v. *Riggs* is a particular illustration of the capacity of treaties to regulate matters delegated to Congress: That case applied to rights of inheritance in the District of Columbia, notwithstanding that Article I, § 8(17) confers the power of 'exclusive legislation in all cases whatsoever' relating to the District." (Pollak 12n.). That still does not stretch to "regulation" by treaty of United States property and therefore in nowise diminishes Congress' power to dispose of it. Moreover, the treaty of 1853 conferred the right only in States "whose existing laws permit it" (the Court held the District a State for purposes of the treaty), and though the Act of March 7, 1887, forbade ownership of land in the District to aliens, it excepted the disposition of lands "secured by existing treaties" to them,[15] which the Court held included realty "acquired by inheritance." 133 U.S. at 272. Thus the treaty did not pretend to override local law to the contrary, and Congress had consented to application of the treaty to inheritance by Frenchmen.

(5) Finally, Dean Pollak summons *Missouri* v. *Holland,* 252 U.S. 1416 (1920), for the proposition that the treaty makers can "empower Congress to enact legislation going beyond its specifically enumerated grants of power." (Pollak 18). That, with all due respect, is a startling proposition. For the Founders, in the words of George Nicholas in the Virginia Ratification Convention, held that no treaty can be "inconsistent with the delegated powers," [16] let alone confer additional, undelegated powers. Lee assured that Convention that "When a question arises with respect to the legality of any power, exercised or assumed by Congress [the question will be] . . . is it enumerated in the Constitution? . . . It is otherwise arbitrary and unconstitutional." [17] The reservation of undelegated powers to the people by the Tenth Amendment was not made subject to treaty; additional power requires a grant from the people by amendment. Madison, chief architect of the Constitution, said, "Had the power of making treaties, for example, been omitted, however necessary it might have been, the defect could only have been lamented, or supplied by an amendment to the Constitution." [18]

For present purposes it suffices that *Missouri* v. *Holland* had nothing to do with the disposition or regulation of United States property. It arose out of a State challenge to a treaty with Great Britain for the protection of migratory birds which annually traversed parts of United States and Canada. Justice Holmes stated that "The whole question is whether it is forbidden by some invisible radiation from the general terms of the Tenth Amendment." Since, he held, "Wild birds are not in the possession of any one; and possession is the beginning of ownership," [19] the State could assert no property interest, and by the same reasoning, neither could the United States *Missouri* v. *Holland* is therefore wholly irrelevant to the power by treaty to dispose of property of the United States.

THE LEGISLATIVE HISTORY

Here I ruefully confess error in one particular, though it does not vitiate my basic analysis. Dean Pollak correctly charges me with an erroneous inference drawn from the Morris-Sherman remarks, which were not in fact "subsequent" to the discussion of the treaty power." (Pollak 16–17). I myself had caught the error and confessed it before the House Committee on Merchant Marine on January 18, 1978, a copy of which statement is attached hereto. As I there explained (p. 11):

"When [the Attorney General's statement before the Foreign Relations Committee] reached me late of a Saturday afternoon, as appears in my own Senate statement, I had only about two days to prepare my comments before having them typed and forwarded to the Senate Committee. Pressure of time conduces to oversights, and I was mistaken respecting a time sequence and in following the Attorney General's erroneous identification of a motion made by Williamson and Spaight with one he attributed to Sherman and Morris Leisure for reflection and further research has since enabled me to correct such inaccuracies and to sharpen my analysis."

Such oversights are regrettable, even though induced by undue pressure of time and accentuated by lack of secretarial service and a corps of research assistants such as the administration can devote to the task.

The Attorney General was guilty of a similar oversight in emphasizing a remark on the treaty power by George Mason during a debate on whether the Senate could share in originating revenue bills.[20] For Mason spoke *before* the Article IV progenitor had been proposed and referred to the Committee on Detail, and of course before the resultant "disposition" provision was debated./2 M. Farrand, Records of the Federal Convention of 1787, 297, 321, 324, 466 (1911). Manifestly Mason's earlier remark hardly expressed the view that the treaty power overrode the as yet unborn "power to dispose."

There is no need to repeat the fresh analysis on more thorough research that is set forth at pages 12–17 of my attached statement before the House Committee on Merchant Marine. Throughout, all that was under discussion was the performance of the Senate's own "advice and consent" function, whether it should turn on more or less than a two-thirds vote, without a hint of desire to curtail the House function under Article IV. It was one thing to insist that the Senate, in the performance of its own function, must act by a two thirds vote, and something else again to court the wrath of those who placed their faith in the more democratic House and were already displeased by the exclusion of the House from treaty making, by further reducing its role under Article IV. There is not, I repeat, the slightest hint in the history of an intention to do so. More is required to deprive the Article IV language of its clear meaning.

It remains to comment on Dean Pollak's rejection of my reminder that what the President seeks today with the "advice and consent" of the Senate he may next time seek to accomplish single-handedly by executive agreement. (Pollak 19n.) Doubtless you are familiar with the rapid proliferation of executive agreements in recent years, a label pasted on a treaty to avoid the necessity of submission to the Senate.[21] When Senator J. William Fulbright was chairman of the Foreign Relations Committee, he complained that the State Department submitted treaties for "the most trivial matters" but declined to submit them for agreements respecting Spanish bases and the like. As he ironically told Secretary of State Rogers, "something as important as stationing troops and the payment of millions of dollars is proper for an executive agreement." [22]

Dean Pollak dismisses my concerns "about the aggrandizement of executive authority" as

"not pertinent—indeed, they may properly be termed impertinent—when a President, acting in meticulous conformity with the procedure specified in the Constitution, has asked the Senate to fulfill the partnership role in making of treaties which the President expressly contemplates." (Pollak 19n.)

Since fulfillment of that "partnership role" (for which I broke more than one lance) was many times frustrated by attaching the "executive agreement" label to treaties, I may be pardoned for being skeptical about the rake's reform. Permit me to close with the words of Alexander Hamilton, the great proponent of expansive presidential power:

An agent cannot new model his own commission. A treaty cannot transfer the legislative power to the executive department.[23]

SENATOR HUBERT HUMPHREY

Mr. HART. Mr. President, Hubert Humphrey surely led one of the richest and most enlightened political careers in the history of our Nation. As Vice President Mondale said, it is almost impossible to speak of him in the past tense. His vitality, his boundless energy, and his interest in virtually everything that might improve the condition of his fellow man, will long pervade this Chamber.

Senator Humphrey's political legislative accomplishments are well known to us all. His legacy of achievement in social and economic legislation and in foreign affairs is unmatched in the Senate. What is more difficult to convey is the sense of personal warmth, courage, and genuine affection that he generated.

Although his voice has been stilled, his spirit remains to sustain us and future generations of Americans. We learned from Hubert Humphrey that America can be stronger and wiser, that America can learn from its past and look forward with confidence to a better and brighter future.

Not long before his death he said that more than anything else, he wanted respect. Respect is a quality that cannot be given, but must be earned. Hubert Humphrey earned more than our respect, he earned our admiration, gratitude friendship, and love.

His counsel was sought and adhered to by many of us, as well as by the leaders of this country, and leaders abroad. I know that I will deeply miss the valuable guidance he provided and the wisdom he shared. In both victory and defeat his spirit set an example that should be an inspiration to us all. His devotion to public service set a standard to which every one of us should strive.

ACHE INDIANS CF PARAGUAY

MR. ABOUREZK. Mr. President, The continuing genocide and persecution of the Ache Indians of Paraguay has not and will not go unnoticed, particularly when the Congress will have the opportunity to soon review U.S. assistance programs to that country. Prof. Richard Arens who has long studied the tragic case of the Ache Indians has written still another report on his most recent visit to Paraguay and what he found there. I think my colleagues will find his impressions interesting and therefore, Mr. President, I ask unanimous consent to have article printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From Inquiry, Jan. 2, 1978]

DEATH CAMPS IN PARAGUAY

(By Richard Arens)

The Ache Indians of Paraguay, a peaceful and primitive tribe that has lived for centuries in the jungles of South America, hunting and gathering food, is being systematically exterminated. As a matter of official policy, the Ache have been hunted like animals; the survivors of these manhunts have been sold into slavery or forced onto reservations. Today, their tribe numbers no more than 1000, and as a result of the continuing genocidal policies of the government of Paraguay, is in danger of extinction.

What have the Ache done to deserve this fate? In recent years Paraguay has experienced something of an economic boom. In 1965 and again in 1968, roads were cut through the jungle, making it more accessible and vastly increasing land values. Large lumber and cattle interests began moving into the interior of Paraguay. When this happened, as one observer has noted, the Ache became "inconvenient." Quite simply, they became an obstacle to economic development. And, as the corporations and their willing accomplice, the government of Paraguay, saw it, the Indians had to be removed.

The official policy was to "sedentarize" the Ache on reservations. Unofficially, the Paraguayan government set about to remove the Indians from their land by any means necessary. It is well documented that the man in charge of the "sedentarization" project, Manuel de Jesus Pereira, conducted manhunts against the Ache. Bands of Ache were slaughtered by rifle and machete, and the survivors were sent to reservations. Conditions on these reservations have been described as comparable to those in Nazi concentration camps.

These basic facts were first brought to the world's attention in 1973 by the German anthropologist Mark Münezl in a publication of the International Work Group for Indigenous Affairs (IWGIA), an organization based in Copenhagen. The International Commission of Jurists and the Anti-Slavery Society of Great Britain found his report persuasive, and the International League for the Rights of Man, as well as the Roman Catholic Church of Paraguay, denounced what they labeled as a campaign of genocide against the Aché Indians. Still, the atrocities continued, and the Paraguayan government continued to deny their existence.

In 1976, Temple University Press published, under my editorship, *Genocide in Paraguay*, in which the Paraguayan government was charged with complicity in the extermination of its Aché Indians. The genocidal practices perpetrated against the Aché included, but were not limited to, the following:

Aché were subjected to manhunts in which they were pursued like animals. Many were killed outright. The survivors were taken to reservations.

Many of the Aché on the reservations were sold as slaves—the men as manual laborers, the women as prostitutes, and the children as domestic servants. Others were simply left to die. Reservation officials would induce periodic waves of starvation in which both food and medicine would be withheld.

Indians on the reservation were denied the right to speak their language, sing their songs, practice their religious rites, and give their children Aché names. The purpose—and result—of these prohibitions was to create a feeling of helplessness and despair among the Aché and to destroy their cultural identity.

Genocide in Paraguay succeeded in attracting additional attention, including some expressions of concern by congressmen, to the plight of the Aché. Not long after its publication, the director of Indian Affairs of the Paraguayan Ministry of Defense invited me to come to Paraguay, so that I could be convinced, he said, on the basis of firsthand observation that the life of the Aché—and of other Paraguayan Indian tribes, as well—was not as bad as had been described in the book. The U.S. ambassador to Paraguay, George Landau, also telephoned my office several times to persuade me that my going to Paraguay would serve a useful purpose and that, if I went, my safety would be guaranteed.

This was, in fact, no small concern. About the time *Genocide in Paraguay* was published, the Paraguayan government arrested the staff members of a project called *Marandu*, which had sought to provide the forest Indians with food and medical assistance and to inform them of their rights under Paraguayan and international law. The members of the Marandu project were drugged, beaten, submerged in excrement to the point of near drowning, and the women

were subjected to grotesque forms of sexual abuse. In 1976, the Paraguayan government deported six Roman Catholic priests who had denounced the genocide of the Aché; it also arrested and tortured a seminarian. Six Protestant missionaries doing Indian relief work were arrested.

However, the representatives of both the Paraguayan and U.S. governments persisted, charging that by not accepting the invitation to go to Paraguay I would be acting perversely. They declared that as editor of *Genocide in Paraguay*, I bore a special responsibility at least to see for myself that the book was based on false information. Not to do so, they said, would prove that I was unwilling to test the argument of the book against the facts.

It appeared as if I had to go.

Funded by Survival International of Great Britain, I left for Paraguay on August 17, 1977, and arrived in Asunción on August 18, 1977. I was met by Colonel Alberto Samaniego, the director of Indian affairs; a civilian member of the Asociación de Parcialidades Indígenas (API), the successor to the defunct Marandu; and the third secretary of the U.S. embassy.

My arrival had been presaged by the arrest and detention (as usual without charges) of Oscar Rodriguez, a member of the API staff. The U.S. embassy seemed confident on the day of my arrival that his release was imminent, but as this article went to press, he was still a prisoner.

At 7:00 sharp the next morning, General Marcial Samaniego, the minister of defense, received me in the presence of a retinue of aides. There was much heel-clicking and I was photographed alongside a smiling minister. He assured me that a German anthropologist, whom he accused with some virulence of misconduct involving Indians, had concocted the lies about Indian suffering, and that now that I could see for myself, I should easily be able to tell fact from fiction. The fact was, and he put his right hand over his heart (above a most impressive paunch) in a gesture suggestive of the taking of an oath, that "we love our Indians." He added immediately thereafter that it was the policy of Paraguay "to integrate them into our society"—an expression I had come to understand as meaning that the Indians had to be driven out of the forests and rendered sedentary. As has often been noted, the "sedentarization" of a free hunting community, without decades of careful material and psychological preparation, inflicts suffering and, ultimately, death upon those rendered "sedentary." When I tried to raise this point, the minister shook my hand as though I had just expressed a sentiment of appreciation. A question about the imprisoned API staff member was left similarly unanswered. The minister assured me of the willingness of the Paraguayan government to let me see everything. I was *not* told that a northern part of the Chaco region in western Paraguay was barred to all unauthorized visitors, which included me. (I never was permitted into that area.) I was informed that I would be accompanied by a Ministry of Defense official who would serve as my interpreter wherever I went to meet Indians. After several days of surveillance, the young man attached to me from that moment on admitted, over a drink, that he was a member of the Intelligence Service of the Paraguayan Army and was reporting on me at required intervals.

Not until after an officer of the Ministry of Defense had telephoned the Colonia Nacional Guayaki on August 18 about an impending visit, was I finally permitted to proceed to the Colonia on August 20, 1977. This was the major reservation for Aché Indians, located in the eastern part of Paraguay, which Mark Münzel and others had described as a death camp. It took approximately five hours to reach it by embassy limousine, starting on moderately well paved highways and continuing upon dirt tracks and rocky and untended mountain trails.

The reservation was in a secluded area of the jungle, much of which showed evidences of ravages by the white man. Approximately 30 miles before reaching the reservation, the jungle changed from lush and wooded terrain to a lunar landscape, marked by ghostly emptiness save for grotesquely charred protruding tree stumps, mute relics of the Paraguayan deforestation program that had dispossessed the Aché nation in this area. Neatly constructed houses for officials of the New Tribes Mission, which is in charge of the reservation, contrasted sharply with dilapidated hovels available for the Achés at a not insignificant distance from the missionaries.

The hovels reserved for the Indians consisted of a makeshift collection of logs haphazardly attached to the ground and maintaining a precarious balance as they swayed in the Paraguayan winter wind. Gaps left between the logs were often wide enough to admit a child or even an adult, to say nothing of the elements. Canvas and paper and odd pieces of aluminum would occasionally be used to plug such openings. Logs of comparable quality were used for the creation of a roof. Here, too, the logs were in no way suited to keep out the elements—although they might be reinforced by canvas, cardboard, or aluminum sheeting.

A glance at the interior of the hovels revealed an absence of any bedding materials, with the occasional exception of a piece of wood; in only one instance was the wooden slab raised from floor level. The hovels were strewn with offal, an occasional log for making a fire, rusty food utensils, and scraps of newspapers handed to the Indians by the missionaries as cover against the winter cold. No sanitary facilities were visible save for the outhouses of the administration.

An unmistakable odor of human excrement lingered over the Indian part of the reservation.

The Indian population we encounteed consisted predominantly of elderly women and young children. A few elderly men were observed. There was a striking absence of young adult males.

Indian adults were squatting in positions of abject depression. No man or boy was seen wearing the traditional lip ornament known as the *betta*. All evidence of Indianness had been vigorously suppressed. Children disclaimed all knowledge of the Aché language. Indian women responded to inquiries about their native songs by saying that they had not sung them for a long time. When asked why, the women said they were weak and lacked energy. An Indian maintaining conversation with me through an interpreter in a standing position would sit or lie down on the ground in what seemed total apathy or fatigue within minutes of the conversation. Yet the conversation was not cut off. It seemed that he lacked energy to stand for any protracted period of time.

The missionaries proudly announced that all Indians were Christians. I asked for the name of a four-year-old Indian boy, and one of the missionaries' wives replied, "It is Felipe, a civilized name." When I asked the boy what name he preferred, he unhesitatingly gave his Indian name.

Aché Indians lack a sense of time as it is understood in the industrialized West. But they knew that they had been in the Colonia Nacional Guayaki for what could pass for a lifetime. When asked who had brought them there, almost all of them said, "Pereira"—Manuel de Jesús Pereira, the first administrator of the reservation—and with a frenzy born of a recollection long stifled, began displaying the scars left on the bodies of those who had survived the machetes wielded by Manuel de Jesús Pereira and his manhunters. And they remembered those who had been struck down, never to rise again. But then the frenzy died as suddenly as it had started, and men and women, prematurely old, sank back against the ground, as if in anticipation of final interment. Psychological death stared us in the face.

The appearance of the children, who at times appeared to play fitfully as though they lacked energy for more demanding games, was marked at first glance by excessive fat. A closer look revealed unevenly distributed fat deposits, an unhealthy chubbiness, in point of fact an appearance of bloating highlighted by distended abdomens, sometimes to the point of angularity. There was, moreover, not a child who did not suffer from festering sores, lesions, and blotches, covering arms, legs, and scalp, which was often completely denuded of hair. All the children were coughing and had runny noses. Both the diet (the staple on this reservation is the sweet potato) and the physical appearance of the Indians—above all, the appearance of the Indian children—were consistent with the protein-deficiency disease known as kwashiorkor.

Outside one of the huts, seated near his mother, was an Indian boy, barely 18 years old. Though no sound passed his lips, tears were streaming down his cheeks as he looked into space, clearly avoiding eye contact with any person. The mother approached the interpreter of the API and explained that he had been like this for at least six weeks. She showed us a half-empty aspirin bottle that the missionaries had given her for his use. When I turned to the missionaries for an explanation, I was told that the boy was merely trying to attract my attention. While this explanation was being offered, the boy went into convulsions on the ground, and one of the women in the missionary group said: "Oh, just look at him. Isn't he a marvelous actor?" I replied that I did not think this was a matter of acting and that while I could not speak for the embassy, I could assure the reservation official that the fate of the boy would be watched with keen and sympathetic interest by such international human rights organizations as Survival International and the International League for Human Rights. The immediate response was surly, but the warning at least produced some action. We were permitted to take the boy in the embassy limousine to a doctor living some 50 miles up a rocky jungle path, though not to a hospital, because that would cost money. We were told, however, that if the doctor recommended it, hospitalization might then be considered.

Upon arriving at the doctor's office after a bumpy three-hour ride, the Indian boy, Santiago Duarte, was pronounced gravely ill and in need of instant hospital attention. At the end of another three-hour ride in the embassy limousine, the boy was received in an Asunción hospital in a semiconscious state. Within days, the biopsy that was performed revealed a widely metastasized malignancy. Doctors familiar with the case said that the boy's condition had been ignored by the reservation officials for at least 18 months and that the prognosis was grave. Within days of this development, representatives of the New Tribes Mission had removed the boy from the hospital, claiming that the boy was unhappy there and that the cost of hospitalization was prohibitive. Their claim was without foundation, as they could not converse with Santiago in his Aché dialect. I had promised to hold myself personally responsible for the cost of the first

few days of hospitalization, and API had assumed full responsibility for his treatment. I immediately informed Colonel Samaniego of the boy's removal from the hospital and urged him to take the necessary steps to see that treatment was in fact made available. Samaniego ordered the boy brought to a military hospital from which removal by the New Tribes Mission would be barred. Within days, the New Tribes Mission filed a letter of complaint against me with the U.S. embassy.

I visited the Father Livio Farina Mission of Puerto Casado on August 22, 1977. The mission is located near a tannin factory, which is the industrial mainstay of this part of the Chaco. It houses some 700 Indian residents, drawn on for unskilled labor for the factory. Approximately 800 more Indians, occasionally attracted by the factory, bivouac in the neighborhood within a radius of 30 miles. They include the Angarte, Sanapana, Guana, Lengua, Toba, and Guarayos.

Upon entering the mission proper, one was immediately struck with the same stench of excrement noted in the Colonia Nacional. Here, however, it appeared more pervasive. The mission's Indian settlement was conspicuously divided by a fence segregating "Christions" from "pagans." While the hovels in which Indians lived were essentially indistinguishable on both sides of the fence, the "Christian" area did have a sheltered outhouse, while the "pagan" area lacked all sanitary facilities. The ramshackle housing, incapable of offering shelter against the elements, was again the dominant characteristic of Indian living. The interiors of the hovels in which Indians lived were, like those of the Colonia Nacional, devoid of bedding but contained charred logs and rusty eating utensils. Elderly men and women, some near death, could be seen squatting or lying in the debris. I asked a woman whose eye had been gouged out how she had sustained the injury. She shrugged and said it was an accident. When I asked whether she had asked for medical attention, she gestured with contempt and said that she did not have the money and medical attention had to be paid for. Another woman, clearly in pain and lying on the ground of a hovel, was asked why she had not requested medical attention. She replied that is was not made available.

The adult males in this mission made their living as unskilled laborers, working a 12-hour day in the tannin factory. Looking clearly emaciated and resigned, they could be seen struggling with bags of produce on their backs.

When believed to be unobserved, an Indian would occasionally display his back to a visitor or reveal the abrasions and sores caused by the weights that he carried, day in and day out in the factory. Festering wounds were shown to have been left unattended.

Factory wages for Indians were not easily ascertained, although it was clear from the general level of undernourishment that they were below any reasonable subsistence level. Occasionally, "wages" would be disbursed in rotgut whiskey. Numerous Indians could be seen lying drunk or comatose upon the ground. One Indian, his eyes glazed with alcohol, wandered past our group. His gait was steady and his speech only slightly slurred. He said he was happy. The alcohol had wiped out all recollection of his suffering and yet he could still enjoy the sun and the trees. Within minutes he had collapsed upon the ground.

During our stay at Puerto Casado, an Indian died within a few feet of me. When I asked if an autopsy would be conducted to determine the cause of death, I was told that Indians do not rate autopsies. Besides, said the officials, the multitude of Indian deaths at work would render normal autopsy procedures financially and practically prohibitive.

The political and religious purity of the Indians was policed by nuns. They followed me to overhear each conversation I had with an Indian, "Christian" or "pagan." Asked whether the Church looked after such matters as Indian health, one nun replied that most Indians could not pay for it but that "serious" emergencies would be handled without cost to the patient. The impression that I gleaned was that the nuns were the liaison officers between the priest, the industry, and the police.

The reservation was supervised by a priest of the Saliciano Order. He addressed several of his parishioners in my presence with such remarks as "Hello, you old liar," or "Buster, you're due for another warning from me." It was widely claimed that he had reported as Communists parishioners who appeared to be troublemakers at the plant. What appeared beyond dspute was that this mission—acting in defiance of habitual Catholic church policy in Paraguay—had prohibited Indian songs and dances and did not tolerate the open practice of Indian religious rites, even for the "pagans" segregated behind their ghetto fence.

I told the priest that I was shocked by the sanitary and health conditions of his mission—on both sides of the fence—and appalled by the practice of dispensing medicine, even for snakebite, on what seemed a cash-and-carry basis. The priest said that life was hard and medicine high and that we had to be patient. In the only outburst of anger I permitted myself in Paraguay, I replied that life was sacred and that patience with life-destroying conditions was intolerable. The priest nodded and said that it was all very sad. He seemed stooped and older than his years; some of the residents of his mission said that he was sick, and some said that he drank to excess. He walked with difficulty toward his quarters, apparently resigned to realities beyond his strength.

A cesspool was located in the heart of the reservation on the "pagan" side. It was flanked by four hovels constructed in part of aluminum and timber, and with scraps of cardboard, newspapers, and rags stuffed into the more prominent gaps. A photograph in my possession displays this particular scene with the further addition of a gnarled woman attempting to prepare some edibles outdoors. She is sitting outside her hovel, flanked by a tree and a number of branches, which have fallen into the cesspool. A vulture perched on one such branch is facing the woman, the hovel, and its inhabitants.

On August 26 we arrived by military plane at Faro Moro in the Chaco. We taxied down a makeshift airfield located in what at first glance looked like a wild expanse of wilderness. Almost immediately upon arrival, our military aircraft was surrounded by approximately 100 Indians. They were Moros or Ayoreos. It seemed that more than the novelty of a flying machine in a primitive wilderness had attracted them, for they stroke it and clung to it until they finally turned compulsively to every one of the strangers who emerged. Each Indian had something to tell. I was unable to make immediate verbal contact with an Indian as I was temporarily separated from the Moro interpreter whom we had brought with us from the nearby settlement of Filadelfia.

In the interim, I found myself talking to the mission administrator—this was yet another reservation under the jurisdiction of the New Tribes Mission. The mission administrator informed me that he had about 200 Moro Indians on his premises, that he regarded their food as adequate, and that he saw no health problems among his flock, 90 percent of whom he regarded as Christians. When asked whether the Indians were given freedom of religion and cultural expression, he replied in the affirmative, adding, however, "but we forbid immoral and wicked chants."

Everywhere I looked, I found the overcrowded makeshift hovels, wide open to the elements and cluttered with charred wood and offal, yes, and an occasional snake. Nowhere I looked were there sanitary facilities for Indians, and the place reeked of excrement with a pungency which exceeded even that of the Father Livio Farina Mission.

Again, there seemed a strange absence of young adult males. Fewer than a handful could be seen.

Upon returning to our Moro interpreter, I was in direct and friendly contact with the Indians for the rest of our stay, and their story was the worse of all we had heard.

They had, so they said, insufficient and inedible food, no doctor and no medicines. They were faced, they continued, with a never ending and demeaning interference with their folkways. An Indian informed us that one Indian had died the day before our arrival; another, a few weeks before. Both were described as having lingered for weeks without medical attention. As I looked about one of the Indian hovels, I noted a mound of recently shoveled earth. I was told that this was a grave of a man buried within the last few weeks. Were there more than I had been told about? The Moro interpreter communicated my question and waited. I was met with silence as an unspoken fear transmitted itself to all present—the figure of the reservation administrator, absent at the start of the interview, now loomed over the assembled Indians and their interviewers. One thing, however, was clear: Since the Indians traditionally buried their dead in the jungle, the graves suggested either a total psychological and cultural disorganization on the part of the Indians, or else a refusal by the New Tribes Mission administration to permit Indians to bury their dead according to their rites.

As I mingled with more and more of the Indians, I found myself engulfed by the collective gloom of a people who had given up on life. The administrator asked me how the Indians impressed me. I replied: "They are terribly depressed." "Repressed?" asked the administrator in a note of indignation. "No, depressed," I replied—and the adminitrator shrugged as if at something inconsequential. Yet, the people collectively bore the demeanor of a group of mourners at a funeral—and this is understatement, since the expression of mourning appeared mingled with despair.

I was about to enter another Indian hovel, but was stopped by an Indian woman, Kai Che Ke. She flung herself at me with a face contorted with grief, but without tears. She reported that four of her children had recently died on the reservation without medical attention. As I entered the hut, I encountered a Moro Indian, approximately 20 years old, struggling to support himself in a sitting position which, in the custom of his tribe, is the ceremonial position anticipatory of death. The mission administrator, who had previously told me that there was no health problem, stepped inside and said that this Indian was a terminal tuberculosis case, and that there was nothing that could be done for him. Several seriously emaciated Indian children hovered in the background. The immediate family of the dying Indian, whose name was Epajai (although the whites, against his wishes, called him Roberto), showed me a bottle of aspirin, the medication he was given for his illness. He was visibly convulsed by stomach spasms and coughs, and told me, through the inter-

preter, that he was no longer able to stand upright.

I asked the reservation administrator why Epajai could not be taken in our plane to a hospital. The administrator replied that he could not afford it. When told that he would not be responsible for the expenses, he replied that the Indian would be unhappy away from his family. "Nothing can be done for him, in any event," he concluded. The administrator then promptly contradicted himself by saying that the Indian had been working the fields only a few days ago—and then added, hastily, that he had been doing only light labor. Once again, he turned down a request to permit the Indian to be taken to a hospital. On leaving the hovel, we were surrounded by another group of Moro Indians. Once again, the striking fact was the absence of any normal proportion of adult males. Many cried and said that now that we were about to depart, they would soon die. A Moro woman, perhaps 50 years old but much older in appearance, took my arm and said she did not want to live. I held her hand and made the usual superficial remark about hope. She recoiled but replied without bitterness, "My husband died only a little while ago and so did the rest of my family. I want to follow them."

We had spent approximately two hours on this reservation. As we proceeded to the aircraft, we inspected some of the primitive cooking utensils utilized by the Indians. We found no food we would have regarded as edible, but we discovered foul-smelling animal skins, apparently intended for Indian consumption. The physical appearance of the adults tended toward the emaciated. Children varied—some showing the conventional signs of malnutrition, others the bloated appearance described at the Colonia Nacional.

As we entered the plane, Indians tried to delay our departure, as if life itself depended on our continued presence. Some of them held on to the plane as though to keep it in place. For a minute or two all of us, and particularly the pilot, sat immobile in response to their plea. Then as if accepting the verdict against them, the men and women who had surrounded the plane stepped aside. The pilot started the engine. The plane took off and the unhappy Moro Indians dissolved into the distance.

At 7:00 a.m. on September 2, 1977, I kept an appointment made for me by the U.S. embassy with Paraguayan Minister of Defense Marcial Samaniego. I was received by a number of uniformed aides and then left with the minister and the member of the Paraguayan Intelligence Service (my security escort) as the only interpreter. For almost two hours, I was forced to listen to a monologue maintained by the minister between sips of tea, which was handed to us in porcelain cups refilled with almost embarrassing regularity.

The tone of the monologue was an extraordinarily friendly one. Paraguay was the best friend that America had in the hemisphere. It tolerated no iron curtain embassies or missions and was a haven for American investment, which was not subject to the fluctuations of less carefully regulated markets like North America.

The minister moved his chair toward mine conspiratorially as he explained to me how I, or any American national, could make a modest investment multiply with almost lightning rapidity in Paraguay under proper guidance.

I barely had a chance to raise a question or two about the plight of the Indians, to which the minister replied that the situation was much worse in Brazil. At this point, heel-clicking men in uniform entered the room, headed by Air Force General Ranalfo Gonzalez. My interview with the minister was over.

A new stage of the proceedings was about to begin; I was escorted into another conference room adjoining the minister's, for yet another exposure to Paraguayan governmental procedure. The meeting was chaired by General Ranalfo Gonzalez.

A group of approximately eight people in civilian clothes had marched into the room from one of the other doors and had seated themselves at the conference table. They were led by General Bejarano, the president of the Asociación Indigenista del Paraguay, the official government-sponsored group for Indian welfare. Yet another group of approximately six uniformed men had accompanied General Gonzalez alongside the director of Indian affairs, Colonel Alberto Samaniego, who was silent from beginning to end, and almost worshipful in the anxious glances that he cast toward his superior. There could be no doubt who was in charge of both the conference and the ultimate disposition of Indian affairs—Air Force General Ranalfo Gonzalez, one of whose more colorful "campaign" ribbons signified three years service as Paraguayan air attaché in the political campaigns of the Washington cocktail party circuit.

General Gonzalez, who had once told a senior official of the Inter-American Foundation who had come to see him from Washington to intercede for a political prisoner, "I don't recognize you as an American. You are just a Chicano," adopted an identical tone with me. His suggestion, by no means veiled, was that I go back where I came from, Eastern Europe, where the matter of human rights violations was more like to be usefully explored than in Paraguay. This was followed by a crude attempt at testing my political purity when he inquired about my opinion of Solzhenitsyn and the failure of the White House to receive him. Hoping to salvage what I could from this conversation, I replied that Solzhenitsyn was one of the world's great writers, and that the general would appreciate that I had not been consulted as to whether he should be received by the White House, but that Secretary Kissinger doubtlessly had. "Kissinger," continued the general, "is not an American either. He is a Jew and a German." As for me, resumed the general, and his tone was now coldly prosecutorial, I was patently guilty of libeling his country and his government. The only reason that he could conceive for the lies I had peddled in *Genocide in Paraguay* was the desire to undermine the only stable anti-Communist government in South America, and only one conclusion could be drawn from that: I was a Communist.

Since the API had begged me to make every effort I could to plead for an Indian land grant, I found myself, however reluctantly, striking a conciliatory note. I told them that the picture I had seen of Indian life on my brief trip in Paraguay was not as bad as had been anticipated, although it would be a serious distortion for me not to point out that wherever I went I had found Indians suffering and dying. No, I had not seen any Indian manhunts—surely an improvement attributable to Paraguayan government policy—but I had seen repeated evidence of Indian slavery. The response to this statement was morose silence, followed by ad hominem attacks by generals and their aides, shifting from the contributors to the book to me.

General Gonzalez's assessment of me as at least a crypto-Communist was swiftly supported by General Bejarano. Pounding the table with his fist for emphasis, he shouted that the claim that there was genocide in Paraguay was "a lie, a Communist lie, a diabolical lie." His colleagues in civilian clothes and military uniforms nodded and looked appropriately outraged. I had, moreover, continued General Bejarano, pointing to me, avoided every opportunity of meeting with him, notwithstanding the repeated requests that he had made to the U.S. embassy. He had been prepared from the start to explain to me the inferiority and savagery of the Indian. A recent example was an attack staged by an 11-year-old Indian savage on a white woman for whom the Indian boy had worked in Asunción.

"I will at this stage," declared the general, "proceed with you to the headquarters of my organization, where you will be left in no doubt as to existing realities." General Bejarano rose at this point, accompanied by his cohort of civilian flunkies and assorted military aides. I remained seated and replied that I was going nowhere except to the U.S. embassy, where I was shortly expected, and then to the airport, at which I was to catch my flight back to the United States in the afternoon. "You have said," responded General Bejarano, "that Paraguayans are assassins." "No," I said, "I regard Paraguayans as some of the most charming people I have met." General Gonzalez spoke up: "Your apology comes too late. You, as a guest of the Paraguayan government, have soiled its honor." I replied that a Paraguayan government policy of concern for its Indian population could be readily expressed by terminating the slave trade. I reported specifically having met four Indians who had been slaves less than two weeks before I met them, and added: "Where was the prosecution of the slave traders?" But there was not even a ripple of interest in this theme, let alone a taking of notes, as I offered to provide the names of the slave traders to the military and civilian gentlemen determined to uphold their honor.

As I rose to leave, I was not sure that I would be leaving under my own power or with the help of an armed escort directing me to the Departmento de Investigaciones. But to my surprise there were perfunctory handshakes. I was told, in stern military tones, to inform the American public that the Paraguayan government loved its Indians and that was why it would persist in resettling them, and, further, that my report would be expected in Paraguay without fail and would be studied with care.

If the purpose of my trip to Paraguay was to persuade me that conditions of Indian life had improved under a Paraguayan government spurred, for whatever reasons, to a policy of greater benevolence toward Indians, it was not a success.

My view of Indian life in Paraguay was, in fact, significantly more pessimistic after I had come and seen for myself, and the fact that I was on a strictly conducted tour—with large areas of Paraguay barred to me—did not help.

Let me deal with my findings on the trip in the order of their seriousness.

The book had recounted the subjection of the Aché to manhunts. Did I see manhunts?

No. I did, however, see survivors of the manhunts, carried out, among others, by the notorious manhunter, murderer, and slave trader, Manuel de Jesus Pereira. The survivors I saw were kept at the Colonia Nacional Guayaki. As previously described, they gave full and gory accounts of their capture and transportation by Pereira. They displayed the scars that had been inflicted upon them with machetes, and they spoke of those who had never risen after a manhunt and of those who had been taken far, far away on the trucks of the white man. These eyewitnesses have not been interviewed by Paraguayan officials with a view to securing their testimony in a court of law. They have been left to rot. So has their testimony. Evewitnesses who made a concerted attempt to put the

evidence of the massacres, and the identity of the perpetrators, before the Paraguayan authorities have been threatened with their lives. Some have been literally intimidated from going anywhere near the U.S. embassy to prevent such information from being transmitted to Washington. There is no indication that the State Department has intervened in this harassment of individuals seeking to communicate with our government. Statements by credible informants have asserted that "Peace Corps" volunteers have, at least in one recent instance, actually attempted to discourage a potential informant from trying to contact the U.S. embassy with such information.

It is true that the Pereira reign over the Colonia Nacional was formally terminated around 1973. Pereira, however, was allowed to settle on a plantation of his selection, serviced in all of his needs by Aché Indians. The estate is at present open to inspection to visitors like myself, although I chose not to see it. It is clear, however, that Pereira is aging in the comfort of the semiretirement and that the Paraguayan government is not proceeding against him on the basis of the evidence of mass murder, torture, and slave trading, which is readily at hand. Rumors have him reporting to the minister of defense as a consultant in Indian affairs—even though General Gonzalez vigorously asserts that Pereira has fully severed all connections with the Paraguayan armed forces.

I interviewed an Aché Indian—outside of the reservations I visited—about manhunts. And he told me, with the culturally conditioned smile used to avoid distressing listeners, how he and a group of 30 Aché, singing around a fire they had built in a jungle forest, were set upon by white men (in a maneuver evidently planned with some care) and mowed down from all sides by rifles or shotguns. Almost all were killed, including the wife of my informant. They had heard of manhunts before, but had tried not to believe in them. That night, he and his band of Indians had suddenly found themselves surrounded by white men who shot them down. His voice consistently flat, his face consistently smiling, he explained how he had made his escape. He carried one of his children in his arms as he fled through the forest.

As he gave his account, the flatness of his voice at times gave way to what sounded like a giggle, at times to a prolonged hysterical-sounding laugh. Throughout, however, his eyes reflected unremitting sadness and resignation, rarely lightened by the suggestion of a gleam of appeal to his listeners. Had he reported this massacre to the authorities? His answer to me carried the patience of an adult responding to the question of a child. But for the first time the flatness of his tone seemed controlled with some difficulty. "It would have been very dangerous," he replied through an interpreter.

Are the Indians of Paraguay held as slaves? I interviewed a member of the Paraguayan bureaucracy (who cannot be more directly identified) who reported that an American New Tribes missionary, known by the first name of Roberto, had acquired 300 Indian slaves in 1975. These slaves worked for him in a remote part of the northern Chaco. Yet another informant, an Indian, told me that the owner of an *estancia*, José Dolorez Pereira, was widely believed to have participated in manhunts. He was now keeping an Indian girl slave and refused to return her to her family, in spite of all entreaties. He lived approximately 9 kilometers from an Indian settlement in Lauril.

I interviewed three 15-year-old girls who had found refuge from slavery less than two weeks before meeting me. I found a 15-year-old boy who had also been a slave and had escaped only a few days ago. Each of them had been sold after a manhunt, one as recently as 1973. All spoke of other slaves whom they had known while acting as domestic servants or manual laborers, some of them in Asunción. They provided the names of their slavemasters and, in one case, of their captors. The three girls had been used for domestic labor. All complained of overwork, malnutrition, and being kept in rags. Two of them displayed evidence of barbaric punishment. One showed large scars on her legs, which, she explained, had been the result of beating; the other showed another scar upon her leg resulting, she explained, from having boiling oil thrown at her by her slavemaster. An attending doctor confirmed that the scar was consistent with second-degree burns. She escaped when taken to a hospital in Asunción for childbirth and informed that immediately after delivery her child would be sold to other Paraguayans. Mother and child escaped with the assistance of a nun.

The boy remembered being captured in the jungle by Pereira around 1973. Taken to the Colonia Nacional Guayaki, he was sold as well, but finally made his escape. One of the girls had been bartered in exchange for two dogs.

A summary of recent information on known episodes of slavery in Paraguay, submitted to the Inter-American Commission on Human Rights and left uncontroverted by the Paraguayan government, has pinpointed six specific areas of thriving Aché slavery. The number is almost certainly an underestimate.

The overall impression based upon these materials, as well as upon my interviews, is that Indian slavery, far from being inhibited by the Paraguayan authorities, has been permitted to flourish and strike deeper roots—at times, it seems with the assistance of Paraguayan army units.

Genocide in Paraguay documented the pervasive existence of deculturation, the destruction of Indianness, and the initimate link of deculturation with the growing death rate of the Indians.

What I now found was that deculturation and its induced death rate, mainly from tuberculosis, influenza, and diseases of malnutrition, yes, and even the more subtle forms of "psychological death," had grown apace.

And this is a report on reservations that the Paraguayan government was willing to display. What about those to which access was barred? At least one New Tribes Mission in the northern Chaco, for example, is still out of bounds for ordinary travelers. Indians are suffering and dying at all but one of the reservations I saw—the only exception being the reservation at the Mission of St. Augustin, which is financed by the Inter-American Foundation and staffed by the API.

The descriptions of the other reservations do not need restatement. Literally and figuratively they deserve to be called cesspools, calculated to induce disease and death. Given the further evidence of tuberculosis, and the utter lack of medical care or concern for Indians on the reservations, it would be foolhardy to assume that even 50 percent of the Indians seen by me in all but one of the reservations will not die within a year, if not in a matter of months.

Are we to assume that the horror of existing conditions of Indian life is the product of a nationwide state of impoverishment that affects white and Indian alike? The short answer to that suggestion is that Paraguayan whites, including the poor, whose death rate is admittedly high, are not upon the threshold of extinction as a group. The Indians are. In a word, we are witnessing the Paraguayan version of a "final solution" directed against the forest Indians of the land, Aché, Moro, and all the remaining forest Indians who, however indirectly, have blocked the economic development plans of the government of Paraguay.

STOPPING CRIME AS A CAREER

Mr. KENNEDY. Mr. President. In the past 8 years of its existence, the Law Enforcement Assistance Administration has often and appropriately been criticized for wasting money on projects and programs of questionable value. Even though there have been instances in which LEAA has deserved the criticism it has received, there are also programs and projects which it has developed and for which it deserves praise.

One of those programs is the career-criminal prosecution units which LEAA developed to deal effectively with the repeat offender. Statistics have shown that about 7 percent of arrested suspects are responsible for more than 25 percent of the crimes which are committed. Twenty-four cities throughout the country have set up career-criminal prosecution units to deal with these major violators, and the success of these programs has been remarkable. Conviction rates are an amazing 94 percent as compared to a national average of 73 percent. These units, because of their success and determination, are at least partially responsible for the reduction in crime which we have witnessed in some of our large cities.

Almost as remarkable as their success is their low cost. The program has cost only $14 million of the $4.8 billion spent by LEAA in the past 5 years. Unfortunately, funding for these projects is being phased out. I ask all of my colleagues to join me in urging the agency to continue these programs. I sincerely doubt that any other program funded by LEAA has had so great a return on so little investment.

Mr. President, Time magazine recently had an article about these programs, and I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From Time magazine, Jan. 30, 1978]

STOPPING CRIME AS A CAREER

Two elderly black sisters were knitting and singing *We Shall Overcome* in the kitchen of their small Boston house one hot night last summer when a convicted burglar burst through the back door and demanded money. The intruder, 6 ft. 4 in. and 220 lbs., viciously beat the two women before fleeing. Police captured him a short time later. Thanks to clogged conditions in many urban courts, suspects in felony cases often relax on the street for a year or more and eventually extract a light, plea-bargained sentence from beleaguered prosecutors. But only 61 days after the Boston assault, the intruder had been tried, convicted of five felonies and sent off to the maximum-security prison at Walpole, Mass., for ten to 20 years.

The assailant had qualified, through an elaborate point system, for special treatment under Boston's Major Violators program. It is hardly news in the U.S. that industrious malefactors, variously known as revolving-door or career criminals, commit crime after crime, year after year. About 7% of arrested suspects account for a quarter or more of

the nation's crime. The first wholesale attack on the problem began only three years ago, when 24 cities, with federal funds and a good idea, both provided by the Law Enforcement Assistance Administration, began establishing career-criminal prosecution units. The aim: first identify multiple offenders, then shepherd their cases diligently through the courts until conviction. In 30 months, the nationwide program has put away over 5,000 hard-core criminals for terms averaging more than 14 years each.

Local prosecutors select their career violators using individual systems. Louisville targets suspects with two previous felony convictions or five arrests. Washington concentrates on parolees who are arrested again, for a crime of violence; Detroit zeros in on three-time offenders charged with murder, rape, household burglary and armed robbery. Boston uses a "case evaluation form," based on a ten-point penalty system. Penalty points are given for brutality, use of firearms, parole or bail status at the time of the crime, and even strength of the evidence against the suspect. Any suspect who gets ten points or more gets the Major Violator treatment. "It's almost like being selected for college," a Boston prosecutor notes, "only they're going to jail, not school."

Once identified and apprehended, a career criminal will find his case assigned to a district attorney for start-to-finish prosecution. With a light case load (one-third that of other prosecutors), the D.A. usually seeks high bail, or no bail, to keep the suspect in jail, refuses to plea bargain, and pushes for an early trial.

Reluctant witnesses, who tend to disappear, thus scuttling the prosecution's case, are cajoled into court. Several prosecutors have allowed defense attorneys to look through all police evidence against the suspect in an "open file" policy, to prevent long courtroom delays for "discovery." Says Washington Attorney Charles Work, who started the program in 1975 when he was with LEAA: "These cases get the same attention they'd receive in a small town. It's not a concentration of resources against an individual. It's a simple effort to keep the important cases from falling apart in our swamped, pothole-strewn big-city prosecution system."

Despite discouragement of plea bargaining, conviction rates are startingly high: 94% nationally, compared with a regular conviction rate of 73%. That rate naturally troubles defense attorneys. Some of them are critical of the program on grounds that it is racist, because a notable percentage of career criminals are black. Others claim that their clients are stigmatized by the career-criminal category, even though the trial jury never learns the defendant has been specially labeled. The career-criminal program has reduced the gap between arrest and trial to about 60 days in some cities, a marked improvement. Remarks Boston Prosecutor Lloyd Macdonald: "Defense attorneys are always trying to stall."

Law-enforcement officials say the program is partially responsible for the slight reduction in big-city crime last year. Detroit reports a decline in major crime for the first six months of 1977: murder down 27%, burglary and armed robbery each down about 25%. New Orleans District Attorney Harry Connick, who started the first LEAA-financed career-criminal program in 1975, cites a Rand Corp. estimate that a career criminal commits 20 offenses a year. If that is true, the 992 career-criminal convictions obtained thus far in New Orleans could prevent about 198,000 crimes over the next ten years.

The program has cost LEAA only $14 million (of $4.8 billion spent by the agency in the years 1972 through 1977). But federal funding for the project is now being phased out. LEAA officials blame budget cutbacks, noting, however, that successful experiments should be taken over by state and local officials Most communities are struggling to do just that. Washington, D.C., has been running its version of the program, Operation Doorstop, without LEAA funds for 17 months. When Norfolk's LEAA grant runs out in October, prosecutors plan to work overtime to keep the program alive. New York, New Orleans and Boston are seeking state aid to continue. "Anybody who knows anything about crime in this society knows that what criminals fear most is a speedy trial and the certainty of punishment," says retired Massachusetts Jurist Walter H. McLaughlin. "The Major Violators program combines both. It ought to be continued at all costs."

HUBERT HUMPHREY

Mr. DECONCINI. Men of vision in politics are rare. Most of us are overwhelmed by the moment; like other men we only dimly see the outlines of the future, and we have little heart to struggle to mould its shape. Hubert Horatio Humphrey was, however, one of those rare men of vision, a man willing to expend the energy to help create a future based on certain transcendental values. Most of us live our lives on a day-to-day basis, facing decisions when they arise, incapable or unwilling to fit them into an overall congruent pattern. But Hubert Humphrey has a lifetime of political decisions that proclaim to anyone who will look or listen that he truly held a philosophy, a conception of life and politics.

Hubert Humphrey is gone. He has passed from this life into what my faith teaches will be a fuller and more perfect existence. But he leaves us a patrimony of ideas and beliefs that enrich by their mere presence. This Senate loved Hubert Humphrey. This Nation loved Hubert Humphrey. We did so not because each and every one of us agreed with all he said and did. We do so, in part, because we recognized in this warm and loving man certain rare qualities that only occasionally grace the mundane world of politics, qualities that elevate politics and transform it into the noble endeavor envisioned by Aristotle and Cicero and Aquinas.

Every man and woman in public life wishes in the deep recesses of his or her heart to have the inner qualities of spirit and intellect to make a memorable imprint on the fabric of history. Some men leave their mark because of the battles they fought and the people who died. Hubert Humphrey leaves his mark on each of us and future generations because he feasted on life. He loved life. Life was the supreme value. To this man, each and every human being was important. From that great love flowed the political philosophy and the political action that is the essence of Hubert Humphrey.

If Hubert Humphrey had a flaw in his character, it was his immense optimism about the nature of man. It led him to believe the best of even the worst of men. He did not speak ill of others. He did not bear grudges, even against his most hostile and vociferous political opponents. He relished the political arena—its combats, its victories, and even its defeats. He fought hard to win and believed in the justness of his causes. Yet, he respected every viewpoint. Some idealists become ideologues; Hubert Humphrey was a confirmed humanitarian.

Hubert Humphrey never spoke on this floor in anger. He always spoke with passion. He spoke with conviction and belief. He spoke to share with others his vision of the world, his hopes for humanity, his love for life, his belief in man. His causes were the causes of the New Testament. He was an ecumenical man before that term was invented. All men should be free, thus he led the struggle for civil rights. All men should be without suffering, thus he led the struggle to provide assistance for those no longer able to care for themselves. All men should live in dignity, thus he led the struggle for full employment and decent working conditions.

My deep personal regret is that I came to the Senate too late to know this man well. I met him early in my political career when my brother, Dino, coordinated his presidential campaign in Arizona. Like so many thousands of other Americans who met this man during his long career as a public servant, I was immediately drawn to him. I felt his warmth; I never questioned his absolute sincerity; and I recognized that he was a very special man.

Few Americans will be as long or as fondly remembered as Hubert Humphrey. Few will leave as deep an impression on our social and political life. This is, perhaps, more notable because he never achieved the office of the Presidency. That he did not, is a terrible loss. Few men had more potential for greatness in the office.

The Senate of the United States has counted many outstanding men among its number. But I do not believe that the Senate has ever had a man greater in stature, a man greater in contribution to the public good, or a man of greater love for humanity than Hubert Horatio Humphrey.

SENATOR LEE METCALF

Mr. HART. Mr. President, I would like to join my colleagues in expressing deep sorrow over the death of Lee Metcalf, the distinguished senior Senator from Montana. Highly respected and genuinely well liked, Lee Metcalf was an effective advocate of the traditional western populism of his native State.

Honesty, integrity, and decency epitomize Lee Metcalf's life. His public service was always characterized by a belief that the purpose of government is to champion the public interest, not private gain.

His early sponsorship of legislation for clean water, consumer protection, Federal aid to education, and land reclamation, demonstrates a vision that was truly national in scope. Lee Metcalf was a tireless advocate for preserving and protecting our Nation's national herit-

age and was an important leader in developing wilderness legislation.

Lee Metcalf had a passion for the vast natural resources and scenic beauty that made his State unique. He worked quietly and diligently with considerable legislative skill to insure the preservation of land for future generations. The people of Montana should take enormous pride in the accomplishments of Lee Metcalf. Though he will be truly missed, his legacy will live on through his achievements.

DEPARTMENT OF STATE REPORT ON HUMAN RIGHTS POLICY

Mr. KENNEDY. Mr. President, I would like to share with the Senate a report by the Secretary of State on the administration's human rights policies and the operations of the recently established Bureau of Human Rights and Humanitarian Affairs in the Department of State.

The Secretary's report to Congress was required by legislation I sponsored last year during our consideration of the Foreign Relations Authorization Act for 1978.

I believe the Secretary's report is an important indicator of the high priority the administration continues to attach to human rights and related humanitarian concerns in our Nation's foreign policy. And I am sure I speak for many Americans in welcoming the Secretary's pledge to strengthen further our national commitment in this significant area of public policy and concern.

I am pleased that the report notes "progress" and "some tentative results" in the human rights field after the first year of the new administration. I am gratified that the report pledges renewed efforts to marshall additional "resources and machinery" to assist the growing number of refugees and displaced persons around the world.

In many parts of the world, the flow of refugees not only tells us of human needs, but also of the deprivation of human rights. Certainly this is true of refugees fleeing their homes in South Africa, Uganda, Chile, Cambodia, and other countries. And we must fully participate in the international efforts to resolve the serious humanitarian problems posed by homeless people on the move in so many parts of the world.

Mr. President, I ask unanimous consent that the text of the Secretary's report be printed in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

REPORT OF THE SECRETARY OF STATE TO CONGRESS REGARDING THE OPERATIONS AND MANDATE OF THE BUREAU OF HUMAN RIGHTS AND HUMANITARIAN AFFAIRS

INTRODUCTION

President Carter and his Administration, the Congress of the United States, and the American people share a determination to increase the importance of human rights and humanitarian concerns in the design and implementation of United States foreign policy. In recent years, the Congress has called for a renewed emphasis in our foreign policy on traditional American values of individual integrity and the expansion of human freedom. This Administration fully endorses as a principal goal of United States foreign policy, increased observance of internationally-recognized human rights. Respect for human rights and fundamental freedoms is deeply rooted in the American constitutional heritage and embodied in the United Nations Charter and the Helsinki Final Act.

Respect for human rights as a fundamental tenet of our foreign policy was underlined by Presidetn Carter in his inaugural address when he said that "The world itself is now dominated by a new spirit. Peoples more numerous and more politically aware are changing and now demand their places in the sun—not just for the benefit of their own physical condition, but for basic human rights." We are engaged in the process of assuring that this new spirit—a far higher priority for human rights and humanitarian considerations than has been the case in the past—is reflected in the foreign policy decision-making process.

Secretary of State Vance who, along with Deputy Secretary Christopher, has been closely and personally involved in the conduct of the policy, has spoken on the specific rights which the Carter Administration will emphasize in its foreign policy—all of which stem from traditional American values and the Universal Declaration of Human Rights.

The first of these is the right to be free from governmental violation of the integrity of the person. Such violation includes torture, arbitrary arrest or imprisonment and cruel, inhuman or degrading treatment or punishment. It also includes denial of fair public trial and invasion of the home.

Second, is the right to such vital needs as food, shelter, health care, and education. We recognize that the fulfillment of this right depends, in part, on the stage of a nation's economic development. But we also know that governments violate this right by indifference to the plight of the poor or through corrupt official practices which divert resources to an elite at the expense of the needy.

Third, is the right to enjoy civil and political liberties such as freedom of thought, religion, assembly, speech, freedom of the press, freedom of movement within and outside one's own country and freedom to participate in government.

There has been progress during the past year in bringing the instruments of our foreign policy to bear on our human rights objectives. This has involved more active communication of our human rights concerns to other governments and, at times, some restriction in foreign assistance programs. We also have worked to increase the attention to human rights issues in international organizations.

Over the past year, there have been some tentative results. While we do not seek to take credit for the following developments, we believe the human rights policy of this Administration has contributed to them. First, there has been more intense focus on human rights by the world's press and media. Second, human rights issues have become a major theme of discussions in international organizations such as the United Nations, the Organization of American States and the Belgrade Conference. Third, human rights has become a subject of active national policy debate in a number of countries. Finally, we have seen some easing of repression in several countries. In some instances, the liberalization may be token, but over all there are positive steps: Prisoners have been released; there have been some liberalizations of authoritarian systems; and there have been some improvements in the treatment of political detainees.

The Bureau of Human Rights and Humanitarian Affairs is the focal point for the advocacy of human rights and humanitarian concerns within the Department of State. It is actively involved in day-to-day policy development and the implementation of important foreign policy decisions. The Bureau's ideas and recommendations are incorporated into the constant flow of briefing memoranda, action memoranda, cables, letters, press statements and speeches which reflect policy implementation.

Public Law 95–105 requires a report on the current "mandate and operations of the Office of the Assistant Secretary for Human Rights and Humanitarian Affairs, the mandate and operations of its predecessor offices and proposals for the reorganization of the Department of State that would strengthen human rights and humanitarian considerations in the conduct of United States foreign policy and promote the ability of the United States to participate effectively in international humanitarian efforts." This report is submitted in fulfillment of that requirement.

The mandate and a history of operations

In 1975, the Department of State established the position of Coordinator for Humanitarian Affairs within the Office of the Deputy Secretary of State. The Coordinator's responsibilities included operating the refugee and migration programs, pursuing POW/MIA concerns, and advising the Department on matters relating to human rights in the conduct of our foreign policy. At first, the staff consisted of the Coordinator and a Deputy Coordinator for Human Rights. Later, a second Foreign Service Officer was assigned to assist the Deputy Coordinator with human rights work. During this period of limited staffing, the human rights responsibilities of the office were assigned less priority than we now believe desirable.

PL 94–329, enacted in 1976, established a Coordinator for Human Rights and Humanitarian Affairs in the Department of State. Section 502B of this law directed the Secretary of State, acting through the new Coordinator, to promote the enhancement of human rights as a fundamental foreign policy objective. The Coordinator's responsibilities under Section 502B are to advise the Secretary on human rights and humanitarian affairs including matters relating to refugees, prisoners of war, and members of the U.S. Armed Forces missing in action.

The new office was changed with the following specific responsibilities in the human rights area:

"(A) gathering detailed information regarding humanitarian affairs and the observance of and respect for internationally recognized human rights in each country to which requirements of Sections 116 and 502B of this Act are relevant;

"(B) preparing the statements and reports to Congress required under Section 502B of this Act;

"(C) making recommendations to the Secretary of State and the Administrator of the Agency for International Development and regarding compliance with Sections 116 and 502B of this Act; and

"(D) performing other responsibilities which serve to promote increased observance of internationally recognized human rights by all countries".

The first human rights reports required under Section 502B were submitted to Congress in early 1977 with the Security Assistance budget presentation for FY 1978.

The Office of the Coordinator for Human Rights and Humanitarian Affairs helped prepare the reports.

The mandate and current operations

From its earliest days, the new Administration resolved to give far higher priority to human rights considerations in the formulation of American foreign policy. The Administration also wished to comply fully with the letter and intent of Section 502B. The following institutional, administrative and procedural changes have been undertaken to strengthen our human rights policies.

The Administration supported legislative changes upgrading the rank of the Coordinator for Human Rights and Humanitarian Affairs to that of an Assistant Secretary (PL 95–105, Section 109). Consistent with this action, the Department established an independent Bureau of Human Rights and Humanitarian Affairs.

The Bureau is now comprised of three divisions: the Office of Human Rights, the Office of Refugee and Migration Affairs, and a separate section responsible for POW/MIAs.

OFFICE OF HUMAN RIGHTS

Five human rights officers were added to the Bureau staff, and assigned to the Human Rights Office in order to increase its capacity to carry out our statutory responsibilities and implement the Administration's intent to make human rights a central element of our foreign policy. The Office now has a total of 13 officers and support personnel, including a Deputy Assistant Secretary for Human Rights. The human rights officers have both functional and geographic responsibilities.

One officer is responsible for monitoring the security assistance program, commercial arms sales, military training for foreign military personnel, and other aspects of our military relationships with other countries. This officer also monitors human rights developments and U.S. policy in the Near East and South Asia.

Another human rights officer monitors bilateral economic assistance programs (including PL 480), U.S. participation in the international financial institutions, and other U.S. economic activities such as the Export-Import Bank, OPIC and the Commodity Credit Corporation. In addition, this officer follows human rights conditions in the Latin American countries and assists with the formulation of U.S. policy in the region. She also monitors the activities of the Organization of American States.

A human rights officer is responsible for overseeing the information gathering system that forms the basis for the preparation of human rights country reports required by Sections 116 and 502B of the Foreign Assistance Act of 1961. This officer also is responsible for monitoring human rights developments and assisting in the development of policy with respect to human rights in the countries in East Asia and the Pacific region. In view of the importance and the volume of work involved in gathering and analyzing information on country conditions, another officer has been assigned to work on this area.

One human rights officer is responsible for monitoring the human rights aspects of our policies in international organizations, with a major focus on the Third Committee of the United Nations General Assembly, UNESCO, and the International Court of Justice. This officer is a member of the U.S. Delegation to the United Nations Human Rights Commission. In addition, he is responsible for monitoring human rights developments and assisting in the design of policy with respect to the countries of Africa, including the activities of the Organization for African unity.

Another officer is responsible for following U.S. participation in the Commission on Security and Cooperation in Europe (CSCE) and advising the Assistant Secretary in her role as the State Department representative on the CSCE Commission and a member of our delegation to the CSCE Review Conference. This officer also is responsible for following human rights concerns and assisting in policy development with respect to the countries in Eastern and Western Europe, including the activities of the Council of Europe.

One officer is responsible for liaison with international non-governmental organizations active in the human rights field, particularly those cited in relevant statutes. This officer also is responsible for increasing contacts with appropriate domestic human rights and foreign policy organizations.

Several additional institutional changes have been made to further strengthen the human rights policy of the U.S. government.

First, an Inter-Agency Committee on Human Rights and Foreign Assistance was established to insure consideration of human rights factors in the conduct and administration of foreign assistance policy. The Bureau of Human Rights and Humanitarian Affairs is represented on this inter-agency body, along with other State Department bureaus and representatives of the Departments of Defense, Commerce, Agriculture, and Treasury, the National Security Council, representatives of the Export-Import Bank, OPIC, AID and the U.S. Directors of both the Inter-American Development Bank and the World Bank also attend its meetings. The Committee is chaired by the Deputy Secretary of State. The Committee examines the human rights aspects of all AID budgetary program decisions and the U.S. position on loans awaiting action in the international financial institutions. A working group comprised of all participating agencies reports to the Committee. The working group is co-chaired by the Deputy Assistant Secretary for Human Rights and his counterpart in the Economic and Business Bureau.

The Arms Export Control Board, which was formed to consider all aspects of the Administration's arms transfers policy, includes a permanent representative of the Bureau of Human Rights and Humanitarian Affairs. The Bureau is also charged with advising the Secretary of State and the Under Secretary for Security Assistance on all munitions export license approvals.

The Department has designated full-time human rights officers each geographic bureau to provide liaison with the Bureau of Human Rights and Humanitarian Affairs to assure more effective human rights policy guidance.

The Department has directed all Ambassadors to assume personal responsibility for implementing the human rights policy and human rights officers have been designated at each Embassy to report on local human rights conditions. This has resulted in an increase in the amount and quality of information on human rights developments reported to the Department from our overseas posts during the past year. The Assistant Secretary or other senior Bureau representatives have participated significantly in human rights policy discussions at regional meetings of U.S. Ambassadors, and regional consular conferences.

The Department has established new lines of communication with international and domestic human rights organizations to insure that we receive information they wish to provide on human rights conditions in various countries. We have worked with these organizations to obtain human rights improvements and to encourage cooperation by other governments. A representative of the Bureau headed the U.S. Government delegation to the 1977 International Conference of the Red Cross in Bucharest, a conference which significantly highlighted human rights questions. In addition, Bureau representatives have participated in conferences sponsored by the International Commission of Jurists, Amnesty International, the International Rescue Committee, and the International League for Human Rights.

Finally, the Department has broadened its training programs for incoming Foreign Service Officers and its midcareer training programs to include special programs on human rights in the formulation and conduct of foreign policy.

We believe that the operations of the Bureau of Human Rights and Humanitarian Affairs clearly respond to the intent of the Congress. The bureau coordinates a human rights policy for the Department and makes recommendations to the Secretary designed to ensure that human rights are a central element of U.S. foreign policy.

Bilateral relations

The Bureau has helped communicate our human rights policy to foreign governments and representatives by supporting and complementing the role of our Embassies abroad and the regional bureaus in Washington.

The Assistant Secretary has visited Argentina, El Salvador, Bolivia, Brazil, Uruguay, Indonesia, Singapore, the Philippines, Thailand, and Yugoslavia, and has held discussions with the highest government officials in those countries. She has also met with local groups and organizations familiar with human rights conditions in these and other countries. She attended the Belgrade CSCE meeting and has had intensive discussions with NATO representatives on human rights issues. The Deputy Assistant Secretary for Human Rights, and other human rights officers, also have met with high officials of other governments to communicate our specific concerns on the human rights situation in their countries, and to seek where possible to work with them on efforts to enhance the respect for human rights.

Consultations are expanding with other governments on ways to increase international cooperation and concern for human rights around the world. These discussions include consultations on human rights conditions in individual countries and specific human rights initiatives in international organizations and in the international financial institutions.

These actions by the Bureau and its officers have complemented representatives and communications by our Embassies overseas and the Department in Washington. There is a continuing exchange between the Bureau and other regional and functional bureaus in the Department on both immediate operational questions and long range strategies to achieve our policy objectives.

Bilateral economic assistant

The Bureau of Human Rights and Humanitarian Affairs plays a continuing role in advising AID on human rights conditions in particular countries.

It also has worked closely with AID in the Inter-agency Committee on Human Rights and Foreign Assistance. In addition to working with AID to respond more fully to development needs in countries with positive human rights records, we have collaborated with AID in devising new ways to support non-government groups and individuals concerned with the international human rights movement. In the past, AID has provided varying forms of assistance to

legal aid and legal assistance programs in developing countries. These efforts are now being expanded and special attention paid to women's rights. Finally, the Bureau is discussing with AID ways to identify and support programs and activities which will encourage or promote increased adherence to civil and political rights in the spirit of Section 116 of the Foreign Assistance Act.

The Administrator of AID, and the Department as a whole, have considered the human rights record of potential recipient countries an important factor in determining the funding level of bilateral development assistance programs, including PL–480.

We intend to pursue our human rights policy objectives even more systematically in future years, giving particular attention to using our development assistance as a positive incentive to governments which are seriously attempting to improve their human rights situation.

Where countries engage in practices which seriously violate the human rights of their citizens, the Bureau has worked with AID to bring about a reduction or halt in our aid programs, except in cases where those programs directly benefit needy people. In such cases we have worked with AID to insure that help for the needy is the primary purpose of the project and that the needy will be the principal beneficiaries of a program. During the course of the year, the Bureau has helped develop guidelines to assist overseas posts in determining whether bilateral projects benefit the needy. The definitions of "needy people" continue to be those established in AID's 1975 report to the House of Representatives on implementing New Directions.

In 1977 AID projects were delayed or halted in some countries, and the bilateral economic assistance program was linked to expressions of our concern over human rights conditions in other countries.

Provisions were also adopted in PL 95–88 to require consideration of human rights conditions in extending PL–480 Title I assistance. In furtherance on this policy the Bureau advises AID and the Department of Agriculture on human rights conditions in the relevant countries. The Inter-Agency Committee also reviews PL–480 allocations. Thus far in FY 1978, we have instructed our missions in some recipient countries to negotiate an additional provision to our PL–480 agreements to insure that the food or the proceeds of the program will go directly to the needy. In two countries, adjustments were made in the allocation level to proposed PL–480 recipients.

Security assistance

The Bureau advised the Arms Export Control Board, the Under Secretary for Security Assistance and the Secretary of State concerning human rights conditions in countries for which security assistance was proposed. Human rights factors were also considered, under section 502B, in the preparations for the submission of the FY 1979 budget, and in the allocation levels for the security assistance program.

In administering the security assistance program approved by the Congress for FY 1978, we plan to consider current human rights conditions prior to the actual implementation of particular country agreements. The Bureau also will examine the recipient agency within each country and the character of the equipment or arms involved in transfers in order to reduce or eliminate the identification of the United States with human rights violations.

International financial institutions

Under Section 701 of PL 95–118, the Executive Branch is charged with using its voice and vote in the IFIs ". . . to channel assistance toward countries other than those whose governments engage in a consistent pattern of gross violations of internationally recognized human rights." The Bureau advises the Treasury Department, through the Inter-Agency Committee, on human rights conditions in countries before the U.S. position on particular loans is decided and, in conjunction with other appropriate Bureaus within the Department of State and the Department of the Treasury, has participated in a series of consultations with other nations to discuss the role of human rights in the IFI's.

During the past year, the United States opposed loans to several countries because of the human rights situation in those countries. In other instances, after advising the country that the United States would oppose loan applications if they were presented to the governing boards of international financial institutions, the countries chose to withdraw their applications.

Cultural affairs

The Bureau of Human Rights and Humanitarian Affairs has worked to emphasize human rights considerations in our cultural affairs programs. Our educational exchange programs have, in the last year, significantly increased the number of exchanges and activities designed to promote a better understanding of human rights.

These programs deal with human rights and related issues in a number of ways and with varying degrees of specificity. For example, American specialists traveled to all parts of the world to meet and discuss with their colleagues human rights and related issues such as comparative legal systems, the administration of justice, the changing role of women in society and economic and legal delivery systems needed to reach poor. International visitors came to this country to meet with their professional counterparts, and in the process both visitors and Americans shared views on human rights. The exchange program has increased its support to private nongovernmental organizations in this country, such as the American Association for the International Commission of Jurists and the American Bar Association, both actively involved with human right issues.

During the past year, the Bureau has consulted with the U.S. Information Agency on increasing programming to reflect our human rights policy. Such programming will explain the Administration's human rights policy, the role of the Congress on championing human rights, the workings of the U.S. judicial system, the continuing deficiencies in our own society and our efforts to rectify our shortcomings.

The Agency has mobilized special efforts to enlist the ideas and energies of its overseas posts behind new initiatives to stimulate program interest in this vital area. Varied projects, with programs reaching large audiences, are underway utilizing all the modern media—TV, films, radio, press, books and other publications. Wide distribution is given to human rights statements by the President, Secretary of State and other USG officials. Thorough media coverage is given to events such as Human Rights Week and the CSCE Conference in Belgrade.

But USIA's major medium for human rights programs is the personal dialogue with small, select audiences including one-to-one discussions, seminars, panel discussions and lecture/discussion meetings. These efforts involve qualified official and private Americans who can engage foreign audiences from many points of view—including politics, law, philosophy, economics, social sciences—all using human rights as a point of reference. Such approaches, we believe, are effective in explaining U.S. attitudes and practices on human rights.

International organizations

The Bureau has worked within the Department to develop a strategy and objectives in the human rights area throughout the past UN General Assembly and in preparation for the upcoming United Nations Human Rights Commission meeting. We will continue to pursue efforts for a UN High Commissoner for Human Rights, or its equivalent, to expand the capacity of the United Nations to respond to human rights problems in particular countries and to coordinate the human rights activities of the various United Nations Agencies. We have worked to establish new human rights procedures within UNESCO. The Bureau maintained regular contact with our UN Mission and contributed policy guidance for General Assembly deliberations on human rights matters. The human rights officer responsible for these matters participated in the day to day activities of the Third Committee. The Committee's deliberations included resolutions to establish procedures for implementing the 1975 Declaration Against the Use of Torture, and a resolution to create regional human rights commissions in areas where none now exist.

With the Organization of American States, the Bureau worked to establish a unique interchange between the Inter-American Commission on Human Rights and the European Commission on Human Rights. The Bureau also assisted with the development of a policy aimed at strengthening the role and resources of the Inter-American Commission on Human Rights and encouraging nations within the hemisphere to cooperate with its activities. Four countries recently have agreed to investigations by that body.

Public Affairs

The Bureau has participated in a series of town meetings sponsored by the Department to help communicate our human rights policy to the American public and to seek public comment and criticism of our current efforts. Bureau officers also have participated in a wide range of seminars and conferences sponsored by non-governmental organizations including universities, business groups and professional associations where the human rights activities of the Department were discussed.

OFFICE OF REFUGE AND MIGRATION AFFAIRS

Establishment of the Bureau of Human Rights and Humanitarian Affairs headed by an Assistant Secretary of State has provided an appropriate and permanent place in the Department's structure for the Office of Refugee and Migration Affairs (ORM). Concern about and assistance to international refugees has long been a basic aspect of our foreign policy, and the work accomplished by ORM has long been an expression of our humanitarian purposes. Over the years ORM has been attached to various entities in the Department—the former Bureau of Security and Consular Affairs and, starting in 1966, the Office of the Special Assistant to the Secretary for Refugee and Migration Affairs. Making ORM a major component of the Human Rights and Humanitarian Affairs Bureau now gives due recognition to this humanitarian subject in which the U.S. has a major and continuing involvement.

The Assistant Secretary for Human Rights and Humanitarian Affairs has been particularly interested in bringing about close liaison and cooperation between human rights and refugee matters, both within the Bureau and in the foreign affairs community as a whole.

Because it was an already existing office, ORM has undergone less dramatic structural changes than the new human rights office. The number of positions remains at 40, including support personnel, some of which, particularly on the administrative side, continue to do double duty for the Bureau as a whole. During the past year ORM's major activities have included the Indochina refugee program, assistance to refugees in Latin America, new programs for African refugees, and participation in regular and special meetings of the major refugee organizations. For the purpose of this report it may be useful to provide a review of U.S. refugee policy, with special attention to its relationships to our humanitarian and human rights concerns.

United States policy toward refugees is based on a traditional American concern for the uprooted and persecuted who, fearing oppressions flee their home countries. The United States has taken the lead for more than three decades in translating this humanitarian concern into action through programs of refugee assistance.

One of our fundamental objectives is to create conditions in the world which would facilitate the freer movement of people, a process which would enable people to leave and return to their own country as they choose. Unfortunately, in many parts of the world, restrictions exist which prohibit such choice. Moreover, periodic political upheaval or military action also cause massive migrations or individual flight. These conditions will not be eliminated soon, and refugees will likely remain with us for the foreseeable future.

We believe that refugees must be treated humanely and that their basic material needs must be met. They should be accorded the same rights and protection as other citizens. Their status as refugees should be of the briefest possible duration, and they should be returned to an active, productive life as quickly as possible. While in refugee status they should be given asylum and counsel. Efforts should be made to prevent large groups of refugees from creating political instability, or to be a factor in reducing economic welfare. On the whole it is our objective to reduce their total number.

We recognize that in order to achieve these objectives, the avenues for flight must be kept open.

Conditions must be maintained wherein governments will continue to be willing to offer asylum and not engage in forced repatriation. Large groups of refugees should not be allowed to accumulate in asylum areas thereby creating local or even international friction.

To achieve our objectives in the area of refugees, existing resources and machinery must be marshalled and new ones created. Obtaining the necessary financial resources and keeping the machinery viable is a primary function of the Human Rights and Humanitarian Affairs Bureau. Clearly the problem of refugees is not ours alone, but we must continue to exercise the necessary leadership to assure refugees receive international humanitarian attention.

The existing machinery is largely of U.S. design and is compatible with essential U.S. interests. In specific terms, it consists of the private American and international voluntary agencies, the United Nations High Commissioner for Refugees (UNHCR), the Intergovernmental Committee for European Migration (ICEM), and the International Committee of the Red Cross (ICRC). The voluntary agencies deal with individual refugees, providing counseling, care and maintenance, and resettlement assistance. The UNHCR provides for legal protection and interim care (sometimes through the voluntary agencies) and promotes permanent solutions for refugee problems through resettlement, repatriation or integration. ICEM's principal function is to provide low cost transportation and related resettlement services for the refugee migrants. The politically neutral ICRC provides relief in conflict situations and promotes the rights of political detainees and prisoners of war.

Programs fall into two general categories—on-going or anticipated activities; and new, unforeseen problems, some of which may be emergencies. The existing structure can deal with both categories, but U.S. support is vital to the structure.

The United States Refugee Program (USRP) is an on-going, annual effort to assist refugees from communist-dominated areas of the world. USRP is an expression of concern by the United States for those who manage to escape and have valid reasons to fear persecution should they return home. USRP helps keep the avenues of escape open and contributes material resources to support refugees in first asylum areas. Without these resources governments might exercise more stringent admission policies or even close their doors. USRP's supplementary care and maintenance program is only a first step. The larger effort involves finding permanent resettlement opportunities for refugees wherever possible and locating resources to finance resettlements. Unless there is movement out of the asylum areas these doors also will close.

Funds which support the work of the United Nations High Commissioner for Refugees (UNHCR) satisfy our objectives of giving practical meaning to the need for legal protection for refugees worldwide and to meet other material needs of the refugees. The UNHCR operates in Africa, Latin America and East Asia where the bulk of the refugee populations are now located. The United States is providing a modest amount for on-going programs and higher amounts for situations of special concerns such as the Indochina refugee program and refugees in Africa.

The most sensible and lasting solution to refugee problems is repatriation or resettlement. Since most refugees usually prefer resettlement to repatriation the Inter governmental Committee for European Migration (ICEM), a creation of the United States, is frequently involved. Its principal function is to provide transportation for refugees and migrants at reduced costs. ICEM also is concerned with related problems such as refugee resettlement processing and activities involving embarcation and reception. ICEM's program of selective migration to Latin America contributes to the economic and technical development of the Southern Hemisphere.

The International Committee of the Red Cross provides a wide range of humanitarian assistance in crisis areas afflicted by military and civil strife. In recent years it has functioned effectively in Cyprus, Lebanon and Angola.

The three international organizations discussed above have the capacity to expand their activities quickly in times of emergency—Hungary in 1956, Czechoslovakia in 1968, Uganda in 1972 and Indochina in 1975. It is in the U.S. interest to sustain this emergency capacity while assuring that ongoing tasks are met.

In 1977, some 60,000 refugees were resettled with the help of the voluntary agencies and ICEM. Over 80 governments contribute to the UNHCR's program, 35 governments contribute to ICEM, and over 80 support the ICRC.

The process is a continuing one worldwide. The major task is to ensure that both the resource and resettlement burden is shared by members of the international community. Participation by the United States in this effort is a major part of our humanitarian commitment and the key to any significant level of achievement.

In meeting its responsibilities in the area of Refugees and Migration, the Human Rights and Humanitarian Affairs Bureau, in cooperation with the regional bureaus, Consular Affairs and the Office of Legal Affairs, maintains close contact with our diplomatic posts in refugee problem areas, and cooperates closely with the U.S. Immigration and Naturalization Service (INS).

PRISONERS OF WAR AND MISSING IN ACTION

The third component of the Bureau responds to the Administration's and the Congress' continuing concern that all possible actions be taken on behalf of prisoners of war and Americans missing in action. This responsibility previously was handled in the Department by a Special Assistant to the Deputy Secretary, and it too has been integrated successfully with our human rights and humanitarian concerns. The Deputy Assistant Secretary responsible for this area participated in the diplomatic conference sponsored by the Swiss Government in Geneva in 1977 which completed a new protocol to the 1949 Geneva Conventions on the protection of war victims. A new section in that Protocol for the first time prescribes specific responsibilities for governments in accounting for the dead and missing in armed conflicts.

The major MIA responsibility in 1977 was the Carter Administration's initiatives with the countries of Indochina. In cooperation with the East Asia Bureau, the Bureau provided key staff support for the Presidential Commission headed by Leonard Woodcock which traveled to Vietnam and Laos for direct talks on the MIA accounting. Building on the work of the Woodcock Commission, the Deputy Assistant Secretary participated in our negotiations with Vietnamese government representatives in Paris in May, June, and December. He also travelled to Hanoi in September for the return of the remains of 22 U.S. servicemen on whom information had been provided during the May and June meetings. Preparations are now underway for a visit by Vietnamese MIA specialists to the U.S. Joint Casualty Resolution Center and Central Identification Laboratory in Hawaii, expected to take place later in the spring.

As an outgrowth of the POW/MIA responsibility, the Bureau has responsibility for liaison and cooperation with the International Committee of the Red Cross (ICRC). The ICRC's recognized role cuts across the entire range of the Bureau's responsibilities: human rights, refugees, and POW/MIA's. Increasingly in recent years the ICRC has assisted our human rights concerns by its interventions on behalf of political prisoners and other detainees in areas of tension and unrest. Its humanitarian assistance has been provided to refugees in areas from Lebanon to Africa to Indochina. It has taken the lead in family reunion efforts in Vietnam for relatives of American citizens, and is continuing to work for an MIA accounting. Our embassies have consulted the ICRC on human rights questions in a number of countries where the ICRC is active. The Secretary met with the President of the ICRC in Geneva in May, and a visit to the U.S. by the ICRC President is expected in March, 1978.

The Bureau's responsibility for ICRC liaison relates also to its responsibility for coordination with the Foreign Disaster Assist-

ance Office in AID. For more than a decade, and particularly since the Nigeria/Biafra and Congo crises in the 1960's, the ICRC has played a major role in providing international disaster and relief assistance in areas of armed conflict, where governments and other international bodies, including the United Nations, are unable to function for reasons of political sensitivity. The traditionally neutral, humanitarian character of the ICRC enables it to provide assistance to victims of the conflicts without regard to political differences and issues. The Bureau has worked closely with OFDA in arranging U.S. financial support for ICRC emergency programs in the Lebanon, Indochina, and the Ogaden conflict. This support is in addition to the U.S. government's annual contribution to the ICRC's regular budget, which is funded through the ORM appropriation.

DISCRIMINATION

The Assistant Secretary is required by the Foreign Assistance and the Foreign Military Sales Act to assist in the preparation of statements requested by Congress on any security assistance transactions in which a foreign government prohibits a U.S. citizen from participating on the basis of race, religion, national origin or sex. This requirement was part of the 1976 amendment to the Foreign Military Sales Act and is now included in section 501.

At the time that the new requirement was adopted, the Department instructed our embassies in security assistance recipient countries to report on any discriminatory or exclusionary policies or practices of their host government known to exist, or that might arise in connection with military assistance and sales programs. No reports of such discrimination were received at that time.

Again, in December 1977, the Department queried our embassies in security assistance countries regarding such discrimination and received no indications that it existed.

The Bureau remains in close touch with the geographic bureaus and others in the Department who have initial action responsibilities in discrimination cases. In the event of any confirmed cases of discrimination barring U.S. persons from participating in security assistance programs, the Bureau would ensure that all possible steps are taken to eliminate such discrimination.

FUTURE OPERATIONS AND MANDATE

In reviewing the organization of the Bureau of Human Rights and Humanitarian Affairs, the Department is convinced that the present structure provides an effective way to assure consideration of human rights and humanitarian considerations in the conduct of United States foreign policy. We believe the close connection between the various parts of the Bureau is useful and desirable. Maintaining these functions under the Assistant Secretary for Human Rights and Humanitarian Affairs is seen as an effective way to assure integration of our human rights and humanitarian objectives. The linkage extends across bureaucratic and voluntary agency lines to the individuals searching for relief. For example, many of the world's refugee population are victims of repressive governments which have denied these individuals their basic human rights.

Obviously, within the Bureau, the organization of our human rights efforts continues to receive review and examination. During this year, several additional reporting and statutory responsibilities in the area of PL 480, Export-Import Bank activities and the international financial institutions required reassessment of our personnel and resource needs.

In looking to the future, we intend to strengthen our capacity to assure the fulfillment of our statutory and policy objectives to make human rights a fundamental tenet of our foreign policy. To that end, we have begun to design an internal office reorganization which would establish within the Office of Human Rights the following three subdivisions: a division of regional affairs, a division of functional affairs and, a division of information and policy planning. The separation of responsibilities for regional and functional affairs would be a highly effective way to strengthen the implementation of our human rights policy.

Under this plan, the division of regional affairs will have individual human rights officers for the different geographical areas. The division of functional affairs will have officers responsible for security and military assistance issues, economic issues, international organizations, cultural affairs and USIA. The information and policy planning division will be the center for the continuing acquisition of information on country conditions, preparation of country reports, and development of longer range policy concepts.

The Department believes that past and proposed actions provide a foundation for the continuing effort to assure that human rights is a basic objective of our foreign policy, and that the United States continues its leadership in international humanitarian efforts.

POST ARTICLE RAISES SERIOUS NATO QUESTIONS

Mr. HART. Mr. President, the Washington Post of Sunday, January 15, published a cogent article about NATO, "Carter's NATO Budget Indicates Shift of Military Focus," which raises some interesting questions.

Many members of the Senate, including myself, have expressed their belief that NATO's defenses should be improved. As this article notes, the administration is putting new emphasis on doing this. However, there are several questions which can be asked about the administration's actions.

The first, which is mentioned in the Post article, is whether we should emphasize NATO to the extent that we seriously weaken other important capabilities. In particular, I would tend to question any moves which result in reducing our naval power, in a time when Soviet naval power is growing. Both our commitment to NATO and our interests elsewhere in the world require adequate naval forces. We must not forget that, however great our interests in NATO's central front, the United States is essentially a sea power, not a land power. Our geography alone dictates that.

The Post article also raises some interesting questions about the nature of our initiatives to strengthen NATO. Adm. George H. Miller notes that the current NATO strategy of Forward Defense violates the basic military rule of "don't put your main body of troops on the picket line." He suggested that the majority of U.S. troops in Europe be held back as operational reserves.

The question of forward defense is central to any improvement of NATO. The historical record of this type of defense is poor; conceptually, it is very much like the Maginot Line. Both German and Soviet World War II experience indicates the wisdom of putting comparatively few forces forward and keeping the main strength in the operational reserve, where it can act once the nature and direction of the opponent's main attack is clearly seen. As long as U.S. NATO initiatives are incorporated into a strategy of forward defense, it is not clear that any net improvement in NATO's defense capability will result.

Mr. President, I ask unanimous consent that the article, "Carter's NATO Budget Indicates Shift of Military Focus," be printed in the RECORD.

There being no objection, the article was order to be printed in the RECORD, as follows:

[From the Washington Post, Jan. 15, 1978]

CARTER'S "NATO BUDGET" INDICATES SHIFT OF MILITARY FOCUS

(By George C. Wilson)

NATO, the 15-nation alliance of garrisoned soldiers who have yet to fire a shot in anger, is now where the action is for the American military.

So much so, for example, that President Carter's first military budget going to Congress later this month is being advertised as "the NATO budget."

The big increases in his $126 billion defense budget for fiscal 1979 are for NATO-related conventional forces and weapons. The President wants to increase NATO accounts by about 5 per cent, compared to only a little over 2 per cent for the entire Pentagon budget.

Service leaders, acutely aware that NATO is the name of the game, are putting Vietnam out of their minds and concentrating on widening their roles in Europe.

They are being encouraged to think NATO by an assistant defense secretary who himself dramatizes the shift in focus, Robert W. Komer.

Komer, formerly head of the U.S. government's pacification program in Vietnam, is now Defense Secretary Harold Brown's chief NATO adviser, working out of an office near Brown's in the Pentagon's prestigious E-ring.

Additional evidence of the NATO focus includes:

President Carter announcing on his recent overseas trip that 8,000 more U.S. troops will go to Europe to bring American units attached to NATO up to full strength.

The Marine Corps, long identified with the Pacific, trying to carve out a front-line role for itself in NATO by conducting maneuvers during the last two years on the northern and southern flanks of the alliance—Norway and Turkey.

The Air Force stationing more of its hottest planes in Europe, adding a wing of F-111s to those already in Britain and putting 72 F-15 fighters in Bitburg, Germany, without taking out the F-4s already there.

The Army, long worried whether its reserves could get into a European battle in time to stop a Warsaw Pact advance, considering a new scheme to take tanks and other heavy stuff out of reserve unit armories in the United States and garage them in Europe where reserves would fly to join up with them.

Defense leaders forcing the Navy and Marine Corps to buy cheaper planes—F-18 and A-4—on the theory that Israel losses in the Yom Kippur War of 1973 demonstrated that quantity will be more important than quality in a NATO war.

Although this NATO emphasis is widely supported in Congress, there are some concerns arising that the White House and Pentagon have developed tunnel vision.

Mike Mansfield, U.S. ambassador to Japan, warned Navy leaders recently that Japan is becoming nervous about being abandoned by the U.S. military. Those fears are nurtured

by the withdrawal of American combat troops from South Korea and the uncertainty about future Pacific deployment of aircraft carriers.

Adm. Elmo R. Zumwalt, former chief of naval operations, gave military substance to such fears by indicating current U.S. war plans call for pulling the carriers away from Japan if war breaks out in Europe.

Said Zumwalt on the ABC "Good Morning America" television program last week: "If we had a war with the Soviet Union, we would abandon our allies in the Western Pacific and concentrate on the defense of Hawaii and Alaska, putting most of our ships into the Atlantic in a desperate effort to try to save Europe."

Why all the new stress on beefing up NATO?

The official Pentagon answer is that the United States and its NATO allies, now that there is a standoff between the United States and Soviet Union in strategic nuclear weapons, must spend money to field more nonnuclear strength in Europe. Strong conventional forces are the best way, the argument goes, to persuade the Kremlin that attacking the West with nonnuclear forces would be a loser, too.

Also, U.S. officials state that while the United States was preoccupied with Vietnam, the Soviet Union expanded and modernized its Warsaw Pact forces by deploying new tanks, armored personnel carriers, antitank weapons, aircraft and electronic warfare equipment. The United States and its NATO allies have some catching up to do, both in arms and war planning, officials stress.

Carter has promised to increase the U.S. investment in NATO by at least 3 percent a year, urging other members of the 29-year-old alliance to follow suit. He has called for a summit meeting of NATO heads of state later this year in Washington.

Yet interviews with civilian defense officials and military leaders did not indicate any grave fears that the Soviet Union was on the verge of abandoning "detente" and attacking NATO.

In fact, some generals, when assured anonymity, said that, besides deterring Moscow from launching an attack, a big reason for the continued commitment of U.S. troops in West Germany is to keep the German war machine from rising again.

The United States had 272,247 military people on active duty attached to NATO as of Sept. 30. Of that total, 224,466 were stationed in West Germany, according to the Pentagon.

Soviet generals, in talking with their American counterparts in informal situations, often indicate they welcome the U.S. troop presence in Germany because of its restraining influence.

Retired Adm. George H. Miller, a former strategic planner for the Navy, said in a telephone interview that another reason the Soviets like to see "our forces tied down in NATO is so they can pick our pockets every place else in the world."

Miller is among the military professionals who complain that NATO planners are still looking at the last war, not the most likely new one; that more money alone will not make the alliance militarily viable.

"There's no way to do what we're committed to do," Miller said. "Anybody who really thinks we could reinforce NATO in a war is smoking opium."

He said the Soviets could disable landing fields for cargo aircraft in Europe with ease, then concentrate the submarines and planes on cutting the sea supply line.

Even if the United States somehow found the cargo ships needed to resupply Europe, Miller argued, the losses would be so high "that we wouldn't go. And if you don't go, NATO falls."

The bucket-kicking admiral also faulted NATO land warfare strategy, declaring it violates the basic military axiom of "don't put your main body of troops on the picket line."

He contended that crowding the bulk of NATO's troops along the front line shows the Soviet where the alliance is strong and where it is weak. The U.S. troops in Europe, he contended, should be regarded "as earnest money," with 50,000 on the line enough to serve that purpose. The rest should be kept back to strike where needed, he maintained.

Miller's recommendation is to "drive the submarine back to the drawing board" by building advanced surface ships that could cross the ocean at speeds of 60 knots to keep NATO supplied. He said Defense Secretary Harold Brown was shortsighted in cutting from the new budget funds for the surface effect ship that could achieve such speeds.

Although Miller's interest in high-speed ships might be considered parochial, he was not alone in contending NATO planning has failed to reckon with battlefield realities. Army officers who have commanded units deployed on the NATO front made these other complaints in discussing the theater that has become the focus of military interest:

Combat units of different allied armies still have a hard time talking to each other by radio—a possibly disastrous situation if war broke out suddenly. Microwave radio antennas used for front-line communications could easily be destroyed.

Front-line U.S. troops in Germany would be hard-pressed to retaliate to a surprise attack because their rifles and ammunition are locked in separate places.

Tactical nuclear weapons, with 155mm nuclear shells the most numerous, are so close to the front lines that a blitzkrieg attack might reach them before permission was granted to fire them at the invaders. The Army's own field manual on "request sequence" shows it might take 24 hours to get permission to go nuclear.

There is no well conceived plan for evacuating nukes—so much heavier than conventional weapons that it takes two men to load just one shell and four to lift the underground nuclear mines onto a truck—if they are in danger of being overrun. The alternative is to disable the nukes and leave them in place.

The U.S. Army, in response to the passage of an amendment by Sen. Sam Nunn (D-Ga.), has cut back on its logistical units in Europe to the point that there would not be enough support people to distribute replacement troops and ammunition in the crucial early days of a war.

"Now we're all teeth and no tail," complained one Army officer with considerable command experience in Europe.

There are so many American dependents in Germany that the roads would be blocked by them if war came, hindering troop movements. The Pentagon said that in Germany there were 224,466 active-duty U.S. military people (as of last September), 147,299 military dependents, 16,636 American civilian employees and 77,161 dependents of these employees (as of September, 1976.)

Gen. Alexander Haig, NATO commander, has no real war headquarters with the communications needed to run a war in Europe. "He apparently wants to fly around in an AWACS (airborne warning and control system airplane the United States is trying to persuade NATO countries to buy) to see who lost," one Army commander said.

Defense officials conceded there are indeed still a lot of NATO military problems to be solved but emphasized the Carter administration is determined to solve them—and is succeeding.

Komer, for example, agreed it is "scandalous" that communications between various allied forces in NATO are still inadequate but said command, control and communications are getting top-priority attention.

The Pentagon's civilian NATO chief added that the underlying planning assumption is a Warsaw Pact attack across the NATO line "would not be a bolt from the blue attack" but would provide the alliance with at least "two to three days" warning.

The "forward strategy" of putting heavy troop concentrations along the NATO front is the most effective way to deter an invasion and combat one if launched, defense officials believe. The new Pentagon budget will have billions in it to buttress the front lines with the new XM-1 tank, armored personnel carriers, antiaircraft and antitank missiles, artillery, attack helicopters and the Air Force's flying antitank gun, the A-10 plane.

To get more bang for the buck, the Pentagon's NATO team is pushing "standardization, rationalization, interoperability"—NATO buzz words for building weapons alliance members can use and repair interchangeably.

Defense officials asserted that Germany could handle resupply during a war and that Haig has various means of communicating with NATO forces although getting a better command post is a current objective.

Pentagon officials said there are plans for evacuating nukes but conceded they need improvement.

For the military services, "getting with the program" now means getting with NATO—the only game in town.

ANNOUNCEMENT OF POSITION ON VOTE ON CRIMINAL CODE REFORM ACT

Mr. CHILES. Mr. President, recently the Senate completed action on S. 1437, to revise and reform the Criminal Code of the United States. While I was present during consideration of this measure and the numerous amendments offered, I was not able to record my vote on final passage. I was required to return to Florida to attend the funeral of the son of a close friend of mine.

I do not wish to appear unrecorded on legislation of this magnitude and importance. If I had been present I would have voted affirmatively on the bill. I am certainly pleased that the Senate passed S. 1437 by a considerable majority.

As I am sure is the case with most other Senators, I am not satisfied with all the provisions of the criminal code revision package. Several amendments, which I think represented improvements, were not adopted by the Senate. However, on balance, I believe the legislation is a major step toward achieving a modern and workable criminal code for this Nation.

For over a decade revision of the criminal code has been an issue of consideration for the Senate. That such an extraordinarily complex and controversial proposal is successfully brought to fruition speaks well for our legislative process and for the Senators who labored so

diligently on this measure. The final achievement of a rational and coherent system of Federal criminal laws will be a major landmark in the continued progress of American jurisprudence.

THE NEED FOR FULL DIPLOMATIC RELATIONS NOW BETWEEN THE UNITED STATES AND THE PEOPLE'S REPUBLIC OF CHINA—A STATEMENT BY SENATOR EDWARD M. KENNEDY

Mr. CRANSTON. Mr. President, I have just had the privilege of serving as chairman of the 16th congressional delegation to visit the People's Republic of China since the Shanghai Communique was signed by the United States and the People's Republic of China almost 6 years ago, on February 28, 1972.

The Shanghai Communique recognized the need for and is pledged to the normalization of relations between the United States and the People's Republic of China—that is, full diplomatic relations. At the time of the communique, both the Chinese and the Americans thought that this normalization would be achieved within a reasonable period of time. It is now 6 years later and we have made little progress on the path to normalization and full diplomatic recognition. As chairman of the 16th congressional delegation to the People's Republic of China, I will be making a formal report on the trip and the need to fulfill the promise of the Shanghai Communique. However, another of our distinguished colleagues, Senator EDWARD M. KENNEDY of Massachusetts, also visited China during January and has issued a statement concerning his 2 weeks in the People's Republic of China. I had the pleasure of meeting and conferring with Senator KENNEDY when I arrived in Peking just when he was about ready to conclude his visit. I also have read and considered his views on the People's Republic of China. I think that we all should have the benefit of that perceptive first hand statement made by Senator KENNEDY on his departure from the People's Republic of China.

Mr. President, I ask unanimous consent that the statement of Senator EDWARD M. KENNEDY in Hong Kong, on January 9, 1978, be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF SENATOR EDWARD M. KENNEDY IN HONG KONG, JANUARY 9, 1978

I came to China to hold discussions on a broad range of international issues of concern to both of our countries and peoples. I met with Chinese leaders directly responsible for these issues: Vice Chairman Teng Hsiao-Ping, Foreign Minister Huang Hua, Minister of Foreign Trade Li Chiang, and of course my hosts at the Chinese People's Institute of Foreign Affairs.

I leave China more committed than ever to helping move forward the process of normalizing relations between the United States and China.

It is a tragedy of history that normal diplomatic relations have been interrupted between us for almost 30 years.

For over 10 years, I have called for full diplomatic relations between our two countries. Since the hopeful opening in 1972, we have had an opportunity to establish normal and enduring relations not just of bilateral significance, but of global importance. We should not lose this historic and strategic opportunity. On the basis of my discussions, I believe the Chinese share this view and this hope for early normalization of relations.

I am convinced of the common destiny of our two peoples. We have important differences of principle. But no one should forget the fundamental transformation of our relations from confrontation and mutual isolation, in the 1950's and 1960's, to limited cooperation and parallel action today.

The facts that China and Japan now enjoy friendly relations for the first time in over a century, and that both these nations are also friendly to the United States, are important and encouraging developments for the future peace and prosperity of both Asia and the World.

The key obstacle to normalization is the future of the 16 million people on Taiwan. I did not expect and cannot report progress in resolving that issue. But I believe the Chinese have a better understanding of the view prevailing in America—which I share—that Taiwan should enjoy a peaceful and prosperous future. And I, for my part, have a better understanding of the Chinese view.

Clearly, further discussions will be needed to resolve continuing differences between the American and the Chinese positions on Taiwan. But surely it is one of the great anomolies of our foreign policy that the United States has not yet established diplomatic relations with Peking—increasingly a power of global proportions, and with many years of effective control over the 900 million people on the mainland of China.

I also believe that we and the Chinese share an interest in creating a positive political climate in which normalization can take place. Exchanges of visits and meetings of leaders in themselves make a contribution. The continued drawdown of U.S. military forces and of the official U.S. presence on Taiwan is an important element. So is the expansion of trade and cooperation on an increasing number of levels between our two societies.

While in China, I suggested that the United States supply advanced oil technology to China in exchange for a share of Chinese oil production.

On humanitarian grounds, I asked the Chinese leaders to consider a number of requests by their citizens to visit their relatives in the United States. In Shanghai, I was able to visit one such family with relatives in my own state of Massachusetts.

And I urged the Chinese leaders to consider six proposals by the National Academy of Sciences for new cooperative efforts in the field of science and technology, including exchanges of experts and data in the crucial field of cancer research.

I am hopeful that the Chinese will give favorable consideration to these various proposals. Already in Peking, we were told by the Peking Philharmonic Orchestra that it would like to send five or six Chinese musicians to join the Boston Symphony Orchestra next summer at Tanglewood—an important step in the cultural field.

I also devoted a substantial proportion of my discussions with Chinese leaders to the current world situation. We now share many common perspectives, not least the importance of a strong United States and Western Europe as well as a secure and prosperous Japan. I took the opportunity to describe extensively for the Chinese the many strengths we share with our allies in the political, military, and economic fields—in contrast to their view of weaknesses in the position of the West.

I believe the United States and China should work hard to expand the scope of our dialogue and of our cooperation on global issues. As Chinese power increases, I am convinced that it can and should be an influence for peace and for progress in international affairs.

Finally, and equally important, I came to China to learn as much as possible, within two short weeks, about the country and the Chinese people. I made efforts to meet with workers in factories and communes, students in universities, inmates in prisons.

Two weeks make no one an expert on any country, especially one as large and diverse as China. But after months of discussion and reflection before the trip—and our experiences during it—I come away with two somewhat contrasting sets of impressions.

On the one hand, China remains a developing country, one with immense economic challenges before it. It remains very much a closed society, with strictly limited freedom of expression. And its ideological commitment remains contrary to our own.

On the other hand, I am struck by the strong commitment of the Chinese people to modernization. I come away with an overall sense that China is a nation that can make it as a modern industrialized state in the future, if it can avoid the social and political upheavals that have threatened it in recent years.

It is very likely that China will be an increasingly important factor in the history of this century and the next. The goal of our leaders and Chinese leaders should be that China uses its growing international weight for constructive purposes. The United States should move quickly and responsibly to normalize the relations that were interrupted, more than a quarter century ago, between the world's most populous nation and the world's most powerful nation. When I return to the United States, I will work to help advance these important objectives, which are in the best interests of both our countries.

NOTICE CONCERNING NOMINATIONS BEFORE THE COMMITTEE ON THE JUDICIARY

Mr. EASTLAND. Mr. President, the following nominations have been referred to and are now pending before the Committee on the Judiciary:

Larry D. Patton, of Oklahoma, to be U.S. attorney for the western district of Oklahoma for the term of 4 years, vice David L. Russell, resigned.

Coy W. Rogers, of Oklahoma, to be U.S. marshal for the western district of Oklahoma for the term of 4 years, vice Floyd E. Carrier, term expired.

On behalf of the Committee on the Judiciary, notice is hereby given to all persons interested in these nominations to file with the committee, in writing, on or before Monday, February 13, 1978, any representations or objections they may wish to present concerning the above nominations with a further statement whether it is their intention to appear at any hearing which may be scheduled.

CONCLUSION OF MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Is there further morning business? If not, morning business is closed.

NUCLEAR NONPROLIFERATION ACT OF 1977
